CHUNDRAGHERRY (చంద్రగిరి - chandragiri,* *Tel.*). From (chandra, san. moon + giri, san. mountain); from tradition that the moon worshipped shiva here.——(1) Talook, North arcot district. Tahsildar's pay Rs. 150. Area 548 square miles. Average length 35 miles, average breadth 16 miles. Population 100,194. Language Teloogoo. N. of district adjoining Cuddapah frontier. Bounded north by talooks of Pollampett and Voilpaud of that district, west by Poonganore zemindarry, south by Chittore talook and Carvetnugger zemindarry, and east by portions of that estate and of Calastry. Chundragherrycottam was a division of Tondaimundalam. Includes the polliems of Cullore and Poolicherla. Constituted in 1849, out of the two old talooks of Pennamurry and Tripatty. In the amalgamation the Toombapollem and some neighbouring Government villages were transferred from Pennamurry to Chittore. Hilly and picturesque. The Eastern ghauts [q.v.] run through the north and the Carvetnuggur hills occupy most of the south. The Tirmullay range, upon which the sacred temple of Tripatty stands, are the most considerable hills. This range, upwards of 2,000 feet high, forms portion of the Eastern ghaut line, and is about 100 square miles in extent. The chief valleys are those of Daumalcheroo, Maumandore, Naugapootla, and Tripatty. The forests are the most extensive and valuable in the district. The best are along the eastern slopes of the Tripatty hills, being the southern continuation of the Baulapully jungles of Cuddapah. Soil [munn] chiefly consists of black and red clays mixed with sand, of which the red soil is considered the more fertile. Limestone [choonam cull] is found and iron sand [manal] is gathered and smelted. The two principal rivers are the Daumalcheroo and Swarnamookhy. The latter is the more important and is held in reverence by the people. Remarkable tank at Rungampett. Contains two divisions, Chundragherry and Tripatty, in charge respectively of a Tahsildar and Deputy tahsildar; the latter being subordinate to the Tahsildar in revenue but not in magisterial matters. Places of archæological interest:—Auttore, Chennayyagoonta, Chettipulley, Chigoorvauda, Chundragherry, Comaurpulley, Daumalcheroo, Dauminaid, Dharmarajapooram khandriga, Kircambaudy, Moondlapoody, Mullauvaram, Mungalam, Mungaupooram, Nullappa reddigauripulley, Peroor, Pillapollem, Raghavapooram, Tirchanore, Tripatty lower, Tripatty upper. Principal trig. stations:—Peddadroog, Tellaraullapett. The leading places, &c., in the talook are the following.——*Bheemanuddy* (భీమనది - bhímanadi, Tel.). From (bhíma, san. one of the five pándavas + nadí, san. river).* River. Rises near Mungalapenta in Poolicherla polliem, and unites with the Swarnamookhy near Narsingapooram. Some white decomposed shale near spring of the river is regarded as ashes resulting from sacrifice by Bheeman.——*Calyaunanuddy* (కళ్యాణనది - kalyánanadi, Tel.). From (kalyána, san. prosperity + nadí, san. river). River. Affluent of the Swarnamookhy. Comes down the Shaumala valley, north of Chundragherry, and is rarely quite dry.——*Chiratanore* (చిరతానూరు - chiratánúru, Tel.). From (chirata, tel. panther + úru, tel. village). Sanscrit name (shríshukapurí), means holy city of shoocabramha, the sage. Tamul name (alamélumangáppuram), means town of lutchmy, the woman on the flower; also (tiruççánúr), meaning same as sanscrit. Village, Place of pilgrimage; pop. 1,786; acres 1,966; lat. 13° 37′; long. 79° 30′; from Chittore N.E. 37 miles; from Chundragherry E. 9 miles. Pond called Pudmasaras with floating festival in April-May. Annual Bramhotsavam [pundigay, 6a] also in October-November. Under management of Mahant [q.v.] of Tripatty. The goddess said to be wife of Shree vencatesha sawmy, deity of Upper tripatty. Pilgrims now invariably visit the goddess after they perform their vows at Upper tripatty. Thread marriages and marriages avowed to be performed at Upper tripatty are now performed in the temple of the goddess.——*Chundragherry* (చంద్రగిరి - chandragiri, Tel.). See below.——*Cullore* (కల్లూరు - kallúru, Tel.). See sep. title.——*Daumalcheroo* (దామలచెరువు - dámalcheruvu, Tel.). See sep. title.——*Gauzoolamundem* (గాజులమండెం - gádzulamandem, Tel.). From (gádzu, tel. glass bracelet + mandem, tel. factory). Village; pop. 2,387; acres 4,492; lat. 13° 36′; long. 79° 33′; from Chittore N.E. 39 miles; from Chundragherry E. 13¼ miles. Manufacture of glass beads.——*Kircambaudy* (கரக்கம்பாடி - karakkambádi, Tam.). From (karukkan, tam. the name of the founder of the village + pádi, tam. village). Village; pop. 2,147; acres 20,004; lat. 13° 40′; long. 79° 33′; height 275 feet; from Chittore N.E. 42 miles; from Chundragherry E.N.E. 15 miles. Poligar of this place fell in 1759 and village was sacked and burnt by English.——*Krishnapooram-pollem* (కృష్ణాపురంపాలెము - krishnápurampálemu, Tel.). From (krishnápura, san. city of krishna + pálemu, tel. fortified village). Zemindarry; pop. 1,433; square miles 15·68 or 10,032 acres; lat. 13° 41′; long. 79° 36′; from Chittore N.E. 45 miles; from Chundragherry E.N.E. 17 miles. Polliem resumed about 1848. ——*Maumandore* (మామండూరు - mámandúru, Tel.; மாமண்டூர் - mámandúr, Tam. mámandúr*) From (má, san. lakshmí, the goddess + vindu, tam. yishnu + úr, tam. village). Village; pop. 658; acres 5,462; lat. 13° 45′; long. 79° 30′; height 569 feet; from Chittore N.N.E. 44 miles; from Chundragherry N.E. 14¾ miles. Industry in stones for rubbing sandal-wood into powder out of a sandstone [manal cull] called Gandhapoosaunarye, quarried by Woddar near Tripatty and Maumandore. Every pilgrim carries away one of these stones.——*Pedda droog* (పెదదుర్గము - pedadurgamu, Tel.). From (pedda, tel. large + durga, san. fort). Trig. station; lat. 13° 33′ 03·90″; long. 79° 23′ 37·08″.——*Permaulpully* (పెరుమాళ్లపల్లె - perumállapalle, Tel.). From (perumál, tam. vishnu, the great god + palle, tel. village). Village; pop. 2,105; lat. 13° 31′; long. 79° 05′; from Chittore N.N.W. 20 miles; from Chundragherry W.S.W. 20 miles. Copper [taumram] images made.——*Poodiputla* (పుదిపట్ల - pudipatla, Tel.). From (puthu, tam. new + patla, tel. place). Village; pop. 2,040; acres 5,348; lat. 13° 36′; long. 79° 25′; from Chittore N.E. 33 miles; from Chundragherry E.N.E. 3¼ miles.——*Poolicherla* (పులిచెర్ల - pulicherla,* Tel.). From (puli, tel. tiger + cherla, tel. village). Village, Polliem; pop. 2,473; acres 36,005; lat. 13° 35′; long. 79° 05′; from Chittore N. 26 miles; from Chundragherry W. 18 miles. Peshcush Rs. 5,585. *Poyney* (పొయిని - póyini, Tel.). See sep. title.——*Renigoonta* (రేణిగుంట - réniguṇta, Tel.). See sep. title.——*Swarnamookhy* (స్వర్ణముఖి - svarnamukhi, Tel.). See sep. title.——*Tellaraullapett* (తెల్లరాళ్లపేట - tellarállapéta, Tel.). From (tella, tel. white + rávi, tel. stone + péta, tel. suburb). Trig. station; lat. 13° 43′ 25·90″; long. 79° 20′ 54·08″; height 3,739 feet; from Chundragherry N. 10 miles; from Tirmaley N.W. 4 miles.——*Tirmaley* (திருமலை - tirumalai, Tam.). See sep. title.—— *Toombopr cona* (తుంబురుకోన - tumburukóna, Tel.). From (tumburu, san. diospyros embryopteris, pers. + kóna, tel. ravine). Sanscrit name (tumburutírt'ha), meaning toombooroo, the sage so called + place of sacred waters. Valley, Waterfall; from Tripatty N. 5 miles. Rishies lived here. There is a cave having communication with Tripatty temple. Now infested with wild beasts [aroovy].——*Tripatty* (తిరుపతి - tirupati, Tel.). See sep. title.——*Vencatachellam* (வெங்கடாசலம் - véngadásalam, Tel.). See sep. title.——(2) Town, Tahsidar's station; North arcot dist., Chundragherry tal.; pop. 4,790; acres 8,060; lat. 13° 35′; long. 79° 22′; from Arnee N. 63 miles; from Chittore N.N.E. 29 miles; from Madras W.N.W. 74 miles; from Ranipett N. 45 miles; from Tripatty W. 7 miles; from Vellore N.N.E. 48 miles. On right bank of Swarnamookhy, east of hills on which stands the fort. The old town has disappeared. Many deserted temples, old tanks, and fine carved mantapams. Fort was originally built in A.D. 1000 by a Yaudava rajah, Immady narsimhan. Ten rajahs of that dynasty reigned till the Vijianugger dynasty, of whom Krishna deva roya reduced the place. In A.D. 1592, Vencatapaty of the Vijianugger dynasty retired here from Penoocondah, which had been the Vijianugger capital since 1564. In A.D. 1639 Shreerungaroyer of Vijianugger signed in the palace the treaty by which the site of the Presidency town was made over to the English [madras]. The fort fell in 1646 into the power of the Golcondah chief, from whom it was wrested a century later by the Nawaub of Arcot. In 1758, it was held by nawaub Abd ool wahaub khan, who assumed the protection of the sacred town of Tripatty. In 1782, it was captured by Hyder ally and remained subject to Mysore until the treaty of Seringapatam in 1792. The hill fort must have been impregnable by storm. The style is similar to that of Vellore fort. A lower fort encloses two mahauls. Two miles south is a ruined temple called Jangamvaurygoody below the Addacondah hill.——(3) Village, Hill, River; South canara district, Cassergode talook; pop. 1,410; lat. 12° 28′; long. 75° 03′; from Cassergode S.S.E. 2¼ miles; from Mangalore S.S.E. 29 miles; from the sea E. 1½ miles. Large ruined square fort on a hill, south of river of same name. Built by Shivappa naick, first ruler of the Ikkairy line [payashwany].

CHUNDRAM (ചന്ത്രം - chantram, *Mal.*). Treasury.—— *Chundracaur* (ചന്ത്രക്കാരൻ - chantrakkáran, Mal.). From (above + káran, mal. doer). Inferior officer under Praverticauran [q.v.].

CHUNDRAN (चन्द्र - chandra, *San.*). From (chand, san. to shine). The moon [chand, chundah]. He is generally a male, riding on a car drawn by an antelope [jinka]; he presides over Somavauram, Monday [vauram]. Is also occasionally represented as female. According to one version, when the moon is in opposition to the sun, it is the god Chundran; but when in conjunction with it, the goddess Chundry. The moon was worshipped as male and female, by the Egyptians. Cf. Latin lunus and luna [matam]. Used as Hindoo 2nd or pers. name in composition. Chundranautan is the moon-lord. Chundrashekharan is Shiva, the moon-crowned. Chunder sen is moon-like chief. Ramchendran is moon-like Rama [peyar]. Plant first term, from white color or flowering at moon rise.

as in:—Elettaria cardamomum (chandrabálá), daughter of the moon; Ipomæa bonanox, var. grandiflora (chandrakánti), fond of the moon; Mirabilis jalapa (chandramalle), moon jasmine; Solanum ferox (chandrapushpá), moon flower. See gloss. paragraphs. Chundra maunam [q.v.] is the system of calculating the years, months, &c. Chundra punchaungam is the lunar calendar. Chundra samvatsaram is the lunar year. The Hindoo astrologers say:—if a person be born under the planet Soman, he will have many friends, will possess elephants, horses, and palaunkeens, be honorable and powerful, will live upon excellent food, and will rest on superb couches [jyotisham].——*Chaundram* (चान्द्र - chándra, San.). Lunar.——*Chundrachoodan* (चन्द्रचूड - chandrachúda, San.). From (above + chúda, san. head). Moon-crested. Shiva.——*Chundragooptan* (चन्द्रगुप्त - chandragupta, San.). From (above + gupta, san. protected). Greek σανδρακόττος. The discovery of the identity gave the first date to early Indian history. Diodorus distorts the name into Xandrames, and Curtius into Agrammes. King of Magadha and founder of the Mowrya dynasty, 325 B.C. to 188 B.C. Drove the Greeks out of India. Formed an alliance with Seleucus, whose daughter he married and received a Greek ambassador named Megasthenes at his court, whose writings comprise nearly all that is known of ancient India. Died 301 B.C. [charitram].——*Chundramowleeshwaran* (चन्द्रमौलीश्वर - chandramaulíshvara, San.). From (above + mauli, san. head + íshvara, san. ruler). Shiva at Tripatty.——*Chundra shekharan* (चन्द्रशेखर - chandrashékhara, San.). From (above + shikhara, san. head). Shiva. There was a Paundy king of Madura of this name about 1558. Driven out by rajah of Tanjore who was in turn conquered by a Vijianugger general; latter seized the country and threw off his master's allegiance; his own son Viswanautha naick defeated him and founded the Naick dynasty of Madura. Vol. 1 (124), (154) [charitram].——*Chundravamsham* (चन्द्रवंश - chandravamsha, San.). From (above + vamsha, san. lineage). The race of the moon. The name of an Aryan [q.v.] tribe supposed to have entered India about the twelfth century B.C., and to have superseded the more peaceable solar race [soorya vamsham] which had entered seven or eight hundred years before. The lunar race ruled in Benares, Magadham, and near the modern Delhi; it had two chief branches, one called Yadoo, in which Krishnan was born, and the other Pooroo, to which the Pandavas, the heroes of the Mahabhaurat [q.v.], belonged. Yadoo has eight branches, of which the Jhareja and Bhatty in Cutch and Jessulmeer are the most powerful. See vol. I (115) [charitram].——*Chundricay* (चन्द्रिका - chandriká, San.). Moon-light. Plant name common to:—Lepidium sativum; Rauwolfia serpentina. See gloss. paragraphs.

CHUNDRAS (چندرس - chandras, *Hind.*). Corruption of pers. (sandrús). Same as Sandrach [dammer].

CHUNGAUTAM (ചങ്ങാതം - channátam, *Mal.*). From (sangháta, san. union). Companionship. Money paid for convoy. This name was given originally to certain responsible guides in the Nayar country who escorted travellers from one inhabited place to another, guaranteeing their security with their own lives, like the Bhatts of Goozerat. So when a person wished to place himself under the special protection of a man of consequence, as a Deshavauly, Naudvauly, or Rajah he paid from 4 to 64 fanams annually for Chungautam, making sometimes an assignment on particular lands for the payment. The patron sometimes furnished a peon for ordinary times. There were four classes of officers about the rajah, whose posts were not hereditary but within his gift; viz., Moonnaulipaud, attendants with a daily allowance of three nauzhies [q.v.] of paddy [q.v.], youthful attendants; Aurnaulipaud [q.v.], attendants with double the above allowance; Pundaurapaud, treasury officials; and the present Chungautipaud. The temples often subjected themselves to Chungautam money to rajahs to ensure the benefit of their power.——*Chungauticoory* (ചങ്ങാതിക്കുറി - channátikkuri, Mal.). From (above + kuri, mal. lottery). Mutual benefit society on west coast. Might always be composed indiscriminately of Nayars, Teeyar, Moplahs, &c. Is at the present day merely a loan club.

CHUNK (शङ्ख - shankha, *San.*; سنکھ - sankh, *Hind.*). From (sham, san. to soothe); from sound when held to ear. Title otherwise Conch shell. Turbinella rapa of naturalists [chippy]. A large convolute shell, five inches long by three broad, regarded with religious veneration. Large quantities are obtained from the muddy bottom of the sea off the south coast, like the pearl oyster [sadaf], by means of divers. The fishery is a monopoly, the property of Government. Unlike the pearl oyster the chunk is always found, and the fishing has been regularly leased out by Government to the highest bidder. The fishery is chiefly worked at Keelakaray in the Ramnaud territory, and Tuticorin in the Tinnevelly district. The chunks lie at the bottom in from 2 to 5 fathoms of water. The divers carry a bag round their necks, and dive and grope over the bottom; 20 chunks are a good haul for one plunge. The fishing season is from October to March. The chunks are sawn into narrow rings or bracelets, armlets, beads, and are worn as ornaments [nagay] for the arms, legs, fingers, &c., by Hindoo women. Many of them are also buried with the bodies of opulent and distinguished persons. Those which, from being taken with the living mollusc [chippy], are called green chunks, are most in demand. The white chunk, which is the dead shell thrown upon the beach by strong tides, having lost its gloss and consistency, is not much considered. The value of the green chunk depends upon its size. The Jangam [q.v.] religious mendicants and those of the Veeramootty sect, blow them as horns, a hole being bored through the base. When blown they give a loud, sharp, and piercing sound. They are also used in Hindoo worship to call the attention of the gods to their worshippers. In ancient times, the Indian warriors had the chunk for their sole trumpet. Krishnan's chunk was called Paunchajanyam, and Vishnoo's Darendram. The pictures and figures of Vishnoo always represent him with a chunk shell in one hand and a discus or Chuckram [q.v.] in the other. A chunk shell is the national emblem of Travancore. It was also one of the insignia of royalty of the Chalookya dynasty when ruling at Calyaun in the upper Carnatic [q.v.]. Chunks used to be sent to Bengal where they were cut into cowries for coin [naunyam]. They are also used as lamps in temples [coil]. The conch shell, used for pouring water on the gods, is a smaller one, the Mazza rapa of naturalists. There is a Tamul proverb:—சங்கிலே வார்த்தால் தீர்த்தம், சட்டியிலே வார்த்தால் தண்ணீர்—"If poured into a conch water becomes sacred, if "into a chatty it is what it is;" meaning that things depend on circumstances. The abnormal Valamboory chunk, with its spiral opening to the right, is of exceptional value, and has been sometimes priced at a lakh of rupees. The Jalanchalam is poetical name for some super-eminent form of chunk, not identified. The following is from the Chintaumany:—கலம்புரியகலல்குர்ருயர்தவ்வையர் சிலம்புரிதிருர்தடிபரவச்செல்பவள்வலம்புரிசலஞ் சலம்வளைஇயதொத்தனள் குலம்புரிந்தனைய தோர்கொடியினீர்மையால்—"She, vijayay, who bore the "slender frame of a tender creeper, who was distinguished by "high birth and noble virtues, whose easy graceful steps while "moving with sounding anklets claimed the homage of all her "elders and matrons from a noble race of modest virtue, was like "the jalanchalam conch amongst the valamboory conches." The following are different kinds of chunk.——*Jalanchalam* (சலஞ்சலம் - shalañjalam, Tam.). A chunk of super-eminent qualities, said to be found surrounded by one thousand ordinary valamboory chunks; see above.——*Mool chunk* (முட்சங்கு - mudchangu, Tam.). From (mul, tam. thorn). With thorn-like points.——*Putty* (பட்டி - patti, Tam.). Short chunk.——*Shool chunk* (சூற்சங்கு - shúrchangu, Tam.). From (shúl, tam. impregnation). Containing pearls [moty].——*Tauzham chunk* (தாழஞ்சங்கு - tázhañjangu, Tam.). From (tázhi, tam. pan). With a wide mouth.——*Valamboory* (வலம்புரி - valamburi Tam.). From (valam, tam. right + puri, tam. spiral). Otherwise Nundyauvarttam or Nundyauvuttam, or shell of happy convolutions. A chunk turning to the right; see above. Both short and long.——*Yidamboory* (இடம்புரி - idamburi, Tam.). From (idam, tam. left + puri, tam. spiral). The ordinary chunk opening to left.

CHUPPER (چھپرا - chhaprá, *Hind.*; ಚಪ್ಪರ - chappara, *Can.*). From (chhad, san. to cover). A temporary thatched structure, as for living in the jungle, for the celebration of a marriage, giving water to travellers, a screen addition to an ordinary building, &c. Thatching materials used are:—naunal [q.v.], palmyra [q.v.] leaves, straw of the common grains, and the spice grass Andropogon schœnanthus [lemon grass]. Cocoanut [q.v.] leaves are made into a kind of coarse matting, called tennam-keet [q.v.], used for thatch [cottye, pandaul]. Plant first term from growing over sheds, as in:—Cyamopsis psoralioides (chapparadavare), chupper bean; Lycopersicum esculentum (chapparadabadanegida), chupper brinjaul. See gloss. paragraphs.

CHURRUCK (چرخ - charkh, *Pers.*). From (chakra, san. wheel). Wheel.——*Churruck poojah* (چرخ پوجا - charkhpújá, Hind.). From (pújá, hind. worship). Penitential ceremony formerly observed by the lower orders on the day the sun enters maisham [mausam, raushy], for expiation of sins. They were suspended, by an iron hook passed through the skin of the back, to one end of a lever, which was raised on the top of a high pole and whirled round by means of a rope fixed to the other end. Those who could afford it had it done by deputy [shirry].

CHUTNEY (तेमन - témana, *San.*; چٹنی - chatní, *Hind.*; ಉಪ್ಪಿನಕಾಯಿ - uppinakáyi, *Can.*; ఊరుగాయ - vúrugáya, *Tel.*; ഉപ്പിലിട്ടത് - uppilittatu, *Mal.*; ஊறுகாய் - úrugáy, *Tam.*). San. from (tim, san. to be wet). Tel. from (úru, tel. to soak + káya, tel. unripe fruit). Mal. from (uppu, mal. salt + idu, mal. to put). Tam. from (úru, tam. to soak + káy, tam. unripe fruit). Condiment, half sauce, half pickle [curry]. The better classes amongst the natives, more especially Mahomedans, use these. The following is a list of principal articles under botanical names:—Averrhoa bilimbi, blimbing, fruit; Averrhoa carambola, coromandel gooseberry, fruit; Bambusa arundinacea, common bamboo, stems; Capsicum minimum, bird's eye chilly, fruit; Carissa carandas, carondah, fruit; Citrus aurantium, orange, fruit; Citrus aurantium, var. bergamia, bergamot orange,

fruit; Mangifera indica, mango, fruit; Phyllanthus emblica, emblic myrobálan, fruit; Zizyphus jujuba, bair, fruit.

CHUTTRAM (सत्त्र - sattra, *San.*; چھتر - chhattar, *Hind.*; சத்திரம் - shattiram, *Tam.*). From (sattra, san. abode). A house where pilgrims and travelling members of the higher castes are entertained and fed gratuitously for a day or two. Chuttrams much resemble the ancient hostelries of Europe. They are charitable foundations for the lodging and entertainment of a certain number of guests for a specified time; one day, three days, and sometimes longer. Some are founded merely for the relief of Bramins; others, for all classes of the natives; and some in former days even for the accommodation and entertainment of Europeans. Chuttrams are mostly terraced, and built of quarry stones [cull], or brick [shengal] and choonam [q.v.]. The smaller ones are single square rooms, open towards the street, where the roof is supported by large square pillars. In the walls are excavations for lamps, which are lighted in the night; but they have no windows. Every large chuttram has a pond or tank near it, partly to serve for the daily ablutions of the Hindoos and partly to allay thirst. Distinguish from chauvady or choultry, which is merely an open assembly hall. Common suffix in place names. Compare moosaufer khana.

CHY (چی - chí, *Pers.*). Suffix denoting agent; as Cajaunchy, treasurer.

CINNAMON (کنامون - kinamon, *Ar.*). From hebrew. Botanically the Cinnamomum genus, lauraceæ [vricsham, 111]. Evergreen trees or shrubs; leaves opposite or alternate; flowers small, in axillary and sub-terminal panicles; the fruit berry-like, one-seeded, in a cup-like calyx. The species best known to the natives are shown below. Other s. indian species indigenous or naturalized are:—Cecidodaphne; tree; malabar. Glanduliferum; giving nepaul camphor wood, nepaul sassafras; in pharm. non-officinal. Perottettii; tree; flowers brown; neilgherries. Sulphuratum; common in wynaud, coorg, western slopes of neilgherries, etc. Compare malabathrum. Also condray for cassia.——**(1)** *Cinnamon stone* (गोमेदक - gómédaka, San.; یاقوت زرد - yákútizard, Hind.; గోమేధికము - gómédhikamu, Tel.; கோமேதகம் - kóméthagam, Tam.). Title from color. San. from (gó, san. cow + méda, san. fat); of the color of cow's fat. Hind. from (yákút, ar. garnet + zard, pers. yellow). Tel. and tam. from sanscrit. Yellowish-brown stone, a species of garnet [tamrah] found in Ceylon, &c. Has the same names as sardonyx [akeekisiyah, ratnam].——**(2)** *Camphor cinnamon* (कर्पूर - karpúra, San.; कापूर - kápúra, Mahr.; شجر کافور - shajarikáfúr, Ar.; درخت کافور - darakhtikáfúr, Pers.; کافورکا پیڑ - káfúrkáper, Hind.; کاپورکا جھاڑ - kápúrkájhár, Dec.; کپور - kapur, Malay; ಕರ್ಪೂರ - karpúra, Can.; కర్పూరపుచెట్టు - karpúrapuchettu, Tel.; കർപ്പൂരം - karppúram, Mal.; කපුරු - kapuru, Singh.; கர்ப்பூரம் - karppúram, Tam.). Title as the source of ordinary camphor. San. from (krip, san. splendour). Ar. from (shajar, ar. tree + káfúr, ar. camphor) Pers. from (darakht, pers. tree + káfúr, ar. camphor). Tam. also (shúdan), meaning hot thing. Title otherwise Camphor laurel, Camphor tree, China camphor, Common camphor, Dutch camphor, Formosa camphor, Japan camphor, Officinal camphor. Botanically Cinnamomum [cinnamon] camphora, nees et eber, lauraceæ [vricsham, 111]. Alias Camphora officinarum; Laurus camphora, camphorifera. Trunk lofty; flowers small, pale, greenish yellow; fruit a drupe, the size of a pea. Wood white, damasked with reddish waves, of aromatic odour; made into boxes, preservative against insects. The chief source of camphor in this country; see that head.——*Cassia cinnamon* (तेजपत्र - téjapatra, San.; दालचिनी - dálachiní, Mahr.; زرنب - zarnab, Ar. and Pers.; تالیس - tálís, Hind.; برمی کا جھاڑ - barmíkájhár, Dec.; మొద్దులవంగపట్టచెట్టు - moddulavangapattachettu, Tel.; ഇലവങ്ങം - ilavannam, Mal.; பெரியலவங்கப்பட்டை - periyalavangappattai, Tam.). Title from (quása, hebrew, to peel off) and flavor. San. from (téja, san. pungent + patra, san. leaf). Mahr. from (dáru, san. wood + chiníya, mahr. chinese). Tel. from (moddu, tel. thick + lavangapattachettu, tel. cinnamomum zeylanicum, breyn.). Mal. from (lavanga, san. clove, eugenia caryophyllata, willd.). Tam. from (periya, tam. big + lavangapattai, tam. plant, cinnamom zeylanicum, breyn.). San. also (tamálapatra), meaning leaves of the tree [malabathrum]; (tamála) [ceylon gamboge, karanj, yellow mangosteen]; (tvacha), meaning bark. Hind. also (sadrus); (taj); (dálchíní), meaning cinnamomum zeylanicum, breyn.; (motídálchíní), meaning thick cinnamomum zeylanicum, breyn. Tel. also (nagacheraloo); (tálishapatri) [indian plum, taulisham]; (lavangachettu) [lavangam]. Mal. also (karuva), meaning black. Tam. also (shirunágappú), meaning the tree, mesua ferrea, linn. [nauga champak] + flower; (tálisappattiri) [taulisham]; (ilavangappattai), meaning cloves + bark, properly cinnamomum zeylanicum, breyn. Greek κασσία. Title otherwise Cassia bark tree, Cassia bud tree, Cassia lignea tree. Botanically Cinnamomum [cinnamon] tamala, nees, lauraceæ [vricsham, 111]. Specific name from sanscrit. Alias Cinnamomum albiflorum, nitidum; Laurus cassia. Moderate-sized evergreen tree fifty to sixty feet, on malabar coast. Immature flowers, flores cassiæ, gathered and dried, called cassia buds; of a dark brown color; the flavor resembles cinnamon [ceylon cinnamon]. The bark resembles that of ceylon cinnamon in appearance, smell and taste, but may be readily distinguished by being thicker in substance and more pungent; this is cassia lignea, cortex cassiæ, cortex casseæ ligniæ, of chemists; it is stripped from the twigs by running a knife along the branch. The leaves and bark are also distilled and furnish cassia oil. Medicinal uses of this bark same as ceylon cinnamon; used especially in veterinary practice in cordial preparations. The buds are used like cloves [lavangam]; the oil for flavoring [cassia].——*Ceylon cinnamon* (त्वच - tvacha, San.; दालचिनी - dálachiní, Mahr.; दाल्चिनी - dálchiní, Conc.; دارصینی - dársíní, Ar.; دار چینی - dárchíní, Pers.; دارچینی کا پیڑ - dárchíníkáper, Hind.; دال چینی کا جھاڑ - dálchíníkájhár, Dec.; کولتمنس - kulitmanis, Malay; ಲವಂಗಪಟ್ಟೆಮರ - lavangapattemara, Can.; ಇಜಿನ್ - ijin, Too.; లవంగపట్టచెట్టు - lavangapattachettu, Tel.; ഇലവങ്ങം - ilavannam, Mal.; කුරුඳු - kurundu, Singh.; இலவங்கப்பட்டை - ilavangappattai, Tam.). Title from habitat. San. from (tvak, san. bark). Mahr. from (dáru, san. wood + chiníya, mahr. chinese). Conc. from mahratta. Ar. from (dár, ar. wood + síní, ar. chinese). Pers. from arabic. Hind. from persian. Dec. from hindostany. Can. from (lavanga, san. cloves + patte, can. bark + mara, can. tree). Tel. from (lavanga, san. clove tree + patta, tel. bark + chettu, tel. tree). Mal. from (lavanga, san. clove tree, eugenia caryophyllata, willd.). Tam. from (lavanga, san. clove tree + pattai, tam. bark); from similar flavor and property. San. also (gudatvacha), meaning sugar bark, refers to the bark of the tree; (tápiñchha), meaning heat + sheltering; (vasana), meaning bark; (dárusitá), meaning wood + white, is cinnamon in sticks. Conc. also (tikké). Ar. also (kirfahisailániyah), meaning ceylon bark. Pers. also (salíkhahisailániyah), meaning ceylon cassia. Hind. also (kalamídárchíní), meaning cinnamon in quills; (taj), meaning cassia lignea. Can. also (dálchinimara); (lavangachakkemara), meaning the tree. Tel. also (sannalavangapattachettu), meaning thin + the tree. Mal. also (karuva), meaning black; (varanam); (cheriyayilavannam), meaning small cinnamon. Tam. also (shannalavangappattai), meaning small + cinnamon; (karuvá). Hebrew kinamon, Greek κιννάμωμον, Latin xylocinnamum; the modern cinnamon however is a different product from that of the greeks and romans, which was not a bark, nor rolled up into pipes, but consisted of the tender shoot of the same plant; the ancient article was of much higher value. Title otherwise Common cinnamon, Sweet bark, True cinnamon. Botanically Cinnamomum [cinnamon] zeylanicum, breyn., lauraceæ [vricsham, 111]. Alias Cinnamomum cassia, verum; Laurus cassia, cinnamomum, malabathrum, nitida; Persea cinnamoma. Small evergreen tree, with willow-like branches and alternate, oblong, elliptical, smooth, entire leaves, with longitudinal veins running from the base to the apex; flowers inconspicuous, with unpleasant smell; fruit a small berry; native of ceylon. The inner aromatic bark is cinnamon; requires to be distinguished from country cinnamon [q.v.] which is very inferior; real cinnamon occurs in small closely rolled quills, containing several smaller quills within them of a light yellowish-brown color, fragrant odour, and warm sweet aromatic taste; country cinnamon is a much larger and thicker bark, generally curved, but seldom completely quilled, the taste less sweet, with some degree of astringency, and the smell less fragrant. Cassia lignea [cassia cinnamon] is also frequently substituted in commerce for cinnamon; by the ancients these two were never carefully distinguished. Four kinds of real cinnamon are distinguished:—Ceylon, Tellicherry, Malabar, and Java. Ceylon cinnamon is the most esteemed; Tellicherry or bombay cinnamon is grown at tellicherry; Malabar or madras cinnamon is of inferior quality, it is grown on the coromandel coast; Java cinnamon is from a separate species, javanicum. The culture of cinnamon was begun in ceylon about 1770 under the dutch. The shrubs grow in clusters and are decorticated when the shoots are from 1 to 3 inches in diameter; cinnamon is prepared by making longitudinal incisions in the bark which separates from the branches, and rolls up in the form of a pipe about the size of the finger; scraped and dried is of a brown color, and the cinnamon of commerce; the best cinnamon is procured from branches three years old; oil of cinnamon is obtained from the bark by distillation after it has been macerated in sea-water, and a fatty matter is procured from the fruit by boiling. Cinnamon is largely combined with other medicines as a condiment, and is indicated in all cases characterised by feebleness; gives to pharm. inner bark of shoots from the truncated stocks, cinnamomi cortex, virtues reside principally in a volatile oil, oleum cinnamomi, in addition to which it contains tannin and a peculiar acid, cinnamic acid, aromatic, stimulant, and carminative; it is closely allied in medical properties and uses to cloves [lavangam]. Cinnamon is used in curry [q.v.] and enters into the preparation known as paun [q.v.]. Three oils obtained:—oil of cinnamon is prepared from chips; oil of cinnamon leaf is procured by macerating the leaves; cinnamon camphor obtained by distillation from the roots. Ceylonese distinguish honey cinnamon, serpent cinnamon, fragrant cinnamon, astringent cinnamon; these do not constitute separate species.——*Country cinnamon* (तिलक - tilaka, San.; रानदालचिनी - ránadálachiní, Mahr.; टिक्कि - tikki, Conc.; جنگلی دارچینی - janglídárchíní, Hind.; جنگلی دال چینی - janglídálchíní, Dec.;

ಅಡವಿಲವಂಗ - adavilavanga, Can.; ಇಜಿನ್ಮರ - ijinmara, Too.; అడవిలవంగపట్టచెట్టు - adavilavangapattachettu, Tel.; കാട്ടുകറുവ - káttukaruva, Mal.; காட்டுக்கருவா - káttukkaruvá, Tam.). Title from being indigenous. San. means mark on the forehead [peacock gingelly, tirootauly]. Mahr. from (rána, mahr. forest + dálachini, mahr. cinnamomum tamala, nees.). Hind. from (janglí, hind. wild + dárchíní, pers. cinnamon, cinnamomum zeylanicum, breyn.). Dec. from hindostany. Can. from (adavi, can. jungle + lavanga, san. cinnamon tree). Tel. from (adavi, tel. forest + lavangapattachettu, tel. tree, cinnamomum zeylanicum, breyn.). Mal. and tam. from (kádu, tam. forest + karuvá, tam. cinnamon tree, cinnamomum tamala, nees.). San. also (tamálapatra), meaning cinnamomum tamala, nees. + leaf. Hind. also (dálchíní), meaning cinnamon; (sadrus); (tálispatar); (tálispatrí); (barhmi); (tajpát); (putruj). Can. also (kádudalchini), meaning jungle + cinnamon; (dálchínimara); (kádulavanga), meaning jungle + cinnamon. Tel. also (ákupatrikamu); (tálishapatri); (paççákuchettu), meaning green + leaf + tree. Mal. also (ilavannam). Tam. also (shembilá), meaning red + jack tree, artocarpus integrifolia, willd.; (pulippilá), meaning sour + jack tree, artocarpus integrifolia, willd.; (tálisappattiri) [indian plum, taulisham]; (ilavangam) [lavangam]. Title otherwise Wild cinnamon tree. Botanically cinnamomum [cinnamon] iners, reinw., lauraceæ [vricsham, 111]. Alias Cinnamomum eucalyptoides, malabathrum, nitidum, rauwolffii; Laurus iners, malabathrum. Small tree; leaves coriaceous, oval or oblong, nearly equally attenuated at both ends, usually three-nerved, almost veinless, lateral nerves nearly reaching the apex, shining and glabrous above, glaucous beneath; aromatic when bruised; panicles equalling or exceeding the leaves, slender, peduncled, lax, branchlets three-flowered, and with the flowers equalling the pedicel; lobes of the calyx falling off at the middle. Inner bark substituted in the bazaars for cassia lignea [cassia cinnamon]; is however, a much larger and thicker bark; generally curved, but seldom completely quilled; and its smell and taste are quite different from those of cassia [q.v.]. The dried buds partake of the carminative properties of cinnamon and cassia; the seeds bruised and mixed with honey [shahad] or sugar [q.v.] given in dysentery and coughs, and combined with other ingredients in fevers; inner bark quoted in pharm. like cinnamon, but non-officinal. Bark a condiment in curries.——*Martaban cinnamon* (کیو گدیس - kayogadis, Malay). Title from place of growth. Botanically Cinnamomum [cinnamon] parthenoxylon, meissn., lauraceæ [vricsham, 111]. Fruit yields an oil used in rheumatic affections; infusion of root substitute for sassafras.——*Wild cinnamon* (காட்டுக்கருவா - káttukkaruvá, Tam.). From similar flavor of berries. Same as China pepper.

CIRCAR (سرکار - sarkár, *Hind.*). From (sar, pers. head + kár, pers. business). Government. Chief authority. Also a small province. In the Mahomedan land revenue system each soobah [q.v.] was divided into a certain number of circars, each circar into pergunnahs or mahauls. See vol. I, 112. Prefix in place names, showing that the village was once Amauny as opposed to lease [sar].——**(1)** *Circar avacausham* (സർക്കാർ വകാശം - sarkáravakásham, Mal.). From (above + avakásha, san. claim). Government dues [mail vauram].——*Circar caurbyastan* (സർക്കാർകാര്യസ്ഥൻ - sarkárkáryast'han, Mal.). From (above + káryast'ha, san. agent). A public servant.——*Circar gueny wurg* (ಸರಕಾರಗೇಣಿವರ್ಗ - sarakáragénivarga, Can.). From (above + géni, can. rent + varga, san. class). Estates lapsed to Government.——*Circar moothal* (സർക്കാർമുതൽ - sarkármutal, Mal.). From (above + mutal, mal. money). Public money.——**(2)** *Northern circars* (سرکارات شمالی - sarkárátishimálí, Hind.). The expression "the Circars" was first used by the French in the time of Bussy for the Nizam's governments of the country from a little south of the Kistna to Orissa. The Circars of Chicacole now Vizagapatam district, Rajahmundry and Ellore now in Godavery district, and Condapully now in Kistna district, were the subject of a grant from the Great moghul obtained by Clive in 1765, confirmed by treaty with the Nizam in 1766. Guntoor now also included in Kistna district devolved eventually by the same treaty, but did not come permanently under British rule till 1803. These were then called by the English the Northern circars. The tract lay about between lat. 15° 40′ to 20° 17′; long. 79° 12′ to 85° 20′. Its sea-coast commenced at Motoopully in Bauputla, Kistna district in lat. 15° 43′; long. 80° 19′, and held a direction north-east for 450 miles to the vicinity of Ganjam in lat. 19° 35′; long. 85° 20′. Its greatest width was towards the south-west, where it extended about 100 miles in breadth inland, but in one part, towards the north-eastern extremity, the breadth was not more than 18 miles. The tract contained the important towns of Ganjam, Chicacole, Vizianagram, Vizagapatam, Coringa, Masulipatam, Ellore, and Nizampatam. In the early part of the Christian era, the Kesary [q.v.] or lion kings of Orissa held sway there, followed by the Gajapaty [q.v.] or elephant dynasty in the north and Narapaty [q.v.] in the south, then by the Bahmany [q.v.], the Cootb shahy [q.v.], and the Asaf jahy. A sketch history of the Northern circars from the year 1471 onwards will be found at vol. I (179) [andhram, calingam].

CIRCASSIA (سرکاشیہ - sarkáshiya, *Hind.*). The country.——*Circassian bean* (سرکاشیہ کی پھلی - sarkáshiyakíphallí, Hind.). Bean of False red sanders.

CLEARING NUT (कतक - kataka, *San.*; निर्मळा - nirmalá, *Mahr.*; चिलबीयि - chilabíyi, *Conc.*; نرملی - nirmalí, *Hind.*; چل بنج کا جھار - chilbínjkájhár, *Dec.*; ಚಿಲ್ಲಿ - chilli, *Can.*; చిల్లచెట్టు - chillachettu, *Tel.*; କତକ - kotaka, *Oor.*; തേറ്റാമരം - téttámaram, *Mal.*; ඉඟිනි - ingini, *Singh.*; தேற்றா - téttá, *Tam.*). Title from its power of clearing muddy water. Mahr. from (nir, san. negative particle + mala, san. dirt). Oor. from sanscrit. Tam. from (téttu, tam. to clear up). San. also (payahprasádi), (ambuprasádí), (tóyaprasádana), all meaning water-clearing; (guchhap'hala), meaning cluster fruited; (ruchya), meaning palatable; (tiktap'halá), meaning bitter fruited; (tiktamarícha), meaning bitter piper nigrum, linn.; (khataka); (kata). Can. also (chali); (chittu). Tel. also (indupuchettu); (induga). Tam. also (akkólam). Title otherwise Water-filter nut. Botanically Strychnos [mooshty] potatorum, linn., loganiaceæ [vricsham, 89]. Alias Caniram tetankotta; strychnos tetankotta. Tetankotta, from (téttánkotta), malayalam clearing nut. Small tree; calyx five-parted; corolla funnel-shaped; leaves opposite, from ovate to oval, glabrous, pointed; bark deeply cracked; corymbs from the tops of the old shoots round the base of the new ones, bearing in ternary order many small, greenish-yellow, fragrant flowers; berry shining black when ripe, one-seeded, size of cherry [auloo]; tree common in mountainous districts, larger than nux-vomica [poison nut], flowers during hot season; the one seed is the clearing nut. Property of clearing water depends upon the albumen and casein which seeds contain; seeds sliced and digested in water yield a thick mucilaginous liquid, which, when boiled, yields a coagulum or albumen, and by subsequent addition of acetic acid [sirkey ka tezaub], it furnishes a further coagulum or casein. Flower religious; one of the flowers with which the arrows of the cauman are tipped [cauma baunam]. Seeds pulverized and mixed with honey [shahad] are applied to boils to hasten suppuration, and with milk given in sore eyes; seeds are remedy in diabetes and gonorrhœa; sometimes applied over the abdomen in the form of paste to relieve colic; mucus or thin pulp round seeds, and the pericarp or testa of fruit are emetic; substituted for british ipecacuanha; seeds are in pharm. non-officinal. Ripe pulp of fruit eaten; seeds used by distillers to render spirit more intoxicating. Ripe seeds are dried and sold in the bazaars to clear muddy water and render it potable; one of the seeds is rubbed very hard for a minute or two round the inside of an earthen vessel, into which the water is poured and left to settle; in a short time the impurities subside and leave the water perfectly limpid and tasteless. Wood white when fresh cut, turning yellowish-grey on exposure, hard, close-grained, seasons well.

CLEFT GRASS (கமரிப்புல் - kamarippul, *Tam.*). Tam. from (kamar, tam. crevice + pul, tam. grass). Title otherwise Indian fescue, Malabar meadow grass. Botanically Festuca indica, retz., graminaceæ [vricsham, 156]. Alias Digitaria malabarica; Poa malabarica. Culm in moist places erect, in dry procumbent, azure green; panicle contracted, erect, half the part at the same time flowering and spreading, then contracted and the other part flowering; spikelets compressed, somewhat six-flowered, sub-aristate; malabar; coromandel [q.v.] mountains.

CLOSEPETT (ಕುಲಿಸ್ಪೇಟೆ - kulíspéte, *Can.*; closepet, *Mys. Gov.*).—"*a*" Talook in the south-west, Bangalore district, Mysore, head-quarters at Closepett. Contains the hoblies:—Beirmungala, Chennaputna, Closepett, Coongull, Honganore, Maukaly, Moodigerey, Mullore, Vírpautchipore. Principal places:—Cagalipore, Chennaputna, Closepett, Coodacull, Coodlore, Honganore, Jakkairy, Jaulavangala, Mullore, Melnaickenhully, Mungalvaurapett, Sogaula, Soogganhully.—"*b*" Town; lat. 12° 43′; long. 77° 19′; from Bangalore S.W. 27 miles. On the Bangalore-Seringapatam road. Named after Sir Barry Close, Resident; called Hospett, in Hindostany navapett, meaning new town, also Ramagherry. The horse-breeding establishment of the Sillahdars, since removed to Coongal in Toomcore district, was formerly here.

CLUB GRASS (नल - nala, *San.*; అల్లికి - alliki, *Tel.*; அலிகை - aligai, *Tam.*). Title from shape of culms. Tel. from (allu, tel. to spread). San. also (kastéru), meaning resting in water. Tel. also (gittigadda); (billappa); (boddutunga), meaning round + cyperus rotundus, linn.; (gundatunga), meaning round + cyperus rotundus, linn. Title otherwise Bull-rush, Club-rush, Round toonga. Botanically the Scirpus genus, cyperaceæ [vricsham, 155]. Grasses; inflorescense in solitary spikes or several together, clustered and forming heads; glumes imbricated on every side, none of the scales empty; style jointed at the base and deciduous; flowers furnished with bristles beneath the ovary. The species best known to the natives are:—Grossus; culm triquetrous, leafy at the base; in stagnant waters. Juncoides; culms cæspitose, sheathed. Kyssor; specific from sanscrit; culms 5-6 feet, triangular, hispid; western coast. Maritimus, glaucous club-rush, salt-marsh club-rush, sea-side club-rush, spurt-grass; creeping; culms triquetrous. Mucronatus. Subulatus; culm round, three-cornered at the apex, sheathed, leafless; in sandy localities.

CLUSTER GRASS (குஞ்சப்புல் - kuñjappul, *Tam.*). Title from habit. Same as Wild raggy.

CO (കോൻ - kón, *Mal.*; கோ - kó, *Tam.*). King.——*Coil* (కోవెల - kóvela, Tel.; കോയിൽ - kóyil, Mal.; கோவில் - kóvil, Tam.). From (above + il, tam. abode). In Malabar it has its original meaning, a palace [covilagam]. So a temple [covil, cshetram]. A Dravidian temple consists architecturally of four main parts:—the vimaunam [q.v.], or actual temple, which is square in plan and surmounted by a pyramidal roof; the mantapam [q.v.], or porch; the gopooram [q.v.], or gateway towers; and the chauvady [q.v.], or pillared hall. The gopooram is much higher than the temple proper. The following are the other parts:—Calyauna mantapam, Dhwaja stambham [q.v.], Dwaura mantapam, Mandiram, Moola staunam [q.v.], Praucauram [q.v.], Rath [q.v.]. The parts according to religious treatises are Mayan, the body; Sarpaugra mantapam, the head; Ardha mantapam, the neck; Maha mantapam, the chest; Darshana mantapam, the abdomen; Moolastaunam, the holy place; Yauga shaulay, the place of offerings; Madapully, the kitchen. Another division is into the Garbhagriham or womb of the house, the Antaraulam or ante-temple, and the Ardhamantapam or front portico [matam]. Coil is common suffix in place names, as Atchancoil. Or prefix, as in Coilputty.——*Coilputt* (கோயிற்பற்று - kóyirbattu, Tam.). From (kóyil, tam. temple + pattu, tam. connexion). Lands, &c., belonging to a temple [devadauyam].——*Coilputty* (கோவில்பட்டி - kóvirbatti, Tam. koilpati *). From (kóvil, tam. temple + patti, tam. village).—"*a*" Zemindarry; Tinnevelly dist., Shauttore tal. Peshcush Rs. 3,230. Annual revenue Rs. 10,580.—"*b*" Village, Railway station; Tinnevelly dist., Shauttore tal.; pop. 2,740; acres 2,238; lat. 9° 10'; long. 77° 55'; height 287 feet; from Shauttore S.S.W. 12½ miles; from Tinnevelly N.N.E. 33 miles. Ancient rent-free village on the Madura-Palamcottah road. Famous temple. Perennial spring known as Agastya teertam. About a mile south-west is a remarkable rock with a cavern. Weekly fair on Monday. Trig. station in lat. 9° 09' 42·93"; long. 77° 54' 01·80"; height 534 feet; from Paundavarmungalam N.N.W. 1¾ miles; from Shauttore S.S.W. 13 miles.——*Coil tumbooraun* (കോയിത്തമ്പുരാൻ - kóyittampurán, Mal.). From (kóyil, mal. palace + tampurán, mal. lord). A class of quasi-noble Nayars, regarded as Cshatriyas; and from their ranks are chosen the consorts of the princesses. The men give cloth to Shoodra females, while the women are united to Numboory bramins [jauty].——*Colachel* (കൊല്ലച്ചൽ - kolláççal, Mal.). From (kollam, mal. palace + kal, mal. suffix of place). Greek κωλίας. Village, Port; Travancore state, Pudmanaubhapooram division, Yerraneel tal.; pop. 18,699; lat. 8° 10'; long. 77° 19'; from Yerraneel S.W. 4¼ miles; from Bombay S.S.E. 790 miles; from Cadiapatam N.W. 4¼ miles; Tengyeputnam S.S.E. 7½ miles; from Trivandrum S.E. 29 miles. In a diminutive bay. Of increasing importance for coasting steamers. Land is rather high and bold. Landing place sheltered by a reef. Cherma permaul took ship here to Mecca [randatarra]. Ancient seaport. Danes once had a factory and commercial resident. Referred to by Bartolomeo as safe harbour well known to ancients. Trade with coast and Ceylon. S. Travancore coffee [q.v.] prepared and exported. Salt [ooppoo] manufactured.——*Collam* (കൊല്ലം - kollam, Mal.). From (kóvilakam, mal. palace). Distinguish from Covalam [covelong]. Title otherwise Northern collam. Mal. also (pantaláyinikollam), meaning port collam. Village, Port; Malabar dist., Cooroombranaud tal.; lat. 11° 27'; long. 75° 43'; from Badagara S.E. 11¾ miles; from Bombay S.S.E. 540 miles; from Calicut N. 15 miles; from Cuddalore E. 3¾ miles; from Quilandy N. 1½ miles. The Pandarany of Portuguese writers, Plandrina of Frier Odoric, Fandreeah of Rowlandson's Tohfat ool moojauhideen, and Fandabraina of Ibn batuta. The place where the Malayalam era was started in the north, as distinguished from that of Southern collam or Quilon. Bhagavaty temple. Mosque of antiquity. Formerly favorite starting and landing place for Mahomedan pilgrims to and from Mecca. On a rock on the sea-shore is a deeply cut foot-print chiselled out of a natural hollow, 3½ long by 10 to 12 feet broad, said to be print of Adam's foot [condaveed], as he landed from across the ocean; his next step took him to Adam's peak [dharmarajacull] in Ceylon. For the collam era see Saca. There are three other collams:—"*a*" Southern collam; otherwise Quilon, in Travancore state; till recently head-quarters of Government of that state [quilon].—"*b*" Cauyan collam, otherwise Cully quilon, in Travancore [cauyancollam].—"*c*" Tirvanjy collam in Cochin, the ancient seat of Chera government on West coast [tirvanjicoolam].——*Coloo* (కొలువు - koluvu, Tel.; கொலு - kolu, Tam.). From (kolutsu, tel. to worship). Sitting of a king or idol in state.——*Coloopoo* (కొలుపు - kolupu, Tel.). Festival of village deity [grauma devatay].——*Conaud* (கோநாடு - kónádu, Tam.). From (above + nádu, tam. country). Former name of a talook, which with Laulgoody was amalgamated in 1861 into present Trichinopoly talook.——*Conaun* (கோனான் - 'kónán, Tam.). From (kón, tam. king). A shepherd proper name; common among the lower orders [peyar]. Title of the Yiday caste.——*Cone* (കോൻ - kón, Mal.; கோன் - kón, Tam.). King [carnautaca rajakkal, kone]. Prefix in place names, as Congaud, meaning royal forest.——*Covil* (കോവിൽ - kóvil, Mal.). From (above + illam, mal. house). Palace, temple [coil].——*Covilagam* (കോവിലകം - kóvilakam, Mal.). From (above + akam, mal. inside). Apartments of a rajah's palace. So a branch of a royal tarwaud [q.v.]. It answers to Tauvery among the subjects. The Zamorin rajah of Calicut's tarwaud [q.v.] has three Covilagams:—Eastern or kizhakk, Western or padinyaur, New or poothiya. The eldest female in these three is the head of the tarwaud. She enjoys certain of the common lands attached to the Ambaudy covilagam or chief palace so called, and is regarded as the holder of a staunam or dignity. Next after her follow in succession the five eldest males of the tarwaud, who stand in the order of their respective ages, and who are known respectively as:—Zamorin [q.v.], Yeralpaud, Moonalpaud, Yeddatralpaud, Nedootralpaud. To each of them a certain portion of the tarwaud property is allotted to enable him to maintain his staunam or dignity, and he is called a Coorvaulcha [q.v.] or Joint ruler. As soon as a member of the royal tarwaud attains to a staunam of dignity, he theoretically loses his place in the Covilagam of his origin; but practically now when there are no political powers to be exercised, he is allowed to manage the common property of his branch.

COAST (கரை - karai, *Tam.*). In books of the eighteenth century means the Coromandel coast specifically. παραλία, the shore, was applied in a similar specific way, in Ptolemy to the coast near Cape comorin. The Madras Army was not long back called the Coast army. See however also the other terms below.——*Coromandel coast* (சோழமண்டலக்கரை - shózhamandalakkarai, Tam.). Sailor's term. The Coromandel coast is the παραλία σωρητῶν or Ѕωριγῶν of Ptolemy, and also the district τῆς ἰδίως λεγομένης παραλίας τωριγγῶν or σωριγγῶν, in which the mouth of the κάβηρος, or Cauvery, was situated. Begins at Calimere point, 130 miles north-east of Adam's bridge and in lat. 10° 16', long. 79° 55', and holds a direction due north across the estuaries of the Cauvery, which either inclose or traverse a delta, having a base of 82 miles towards the sea. The coast continues to hold a northerly direction in lat. 15° 27', where the river Goondlacumma is considered to bound it to the northward, and retains the same character of slight elevation and general sandy formation with shallow water along shore. Throughout this distance there is no shelter for large ships, except at Madras. During the closing months of the year, when the coast is exposed to the north-east monsoon [caur], it is nearly deserted. At all times a heavy sea rolls on shore from the vast expanse of the Bay of Bengal, and causes a surf, which precludes communication from the ships lying at anchor with the land by European built boats. The coast throughout is, with little exception, low and sandy, and the sea shallow near the shore, with sounding gradually increasing with the distance from land. The surf wave breaks from 3 feet in fine weather to 12 or 14 feet high in gales; it breaks at 300 feet from shore in calm and at 450 to 1,000 feet in stormy weather. Poolicat shoal, 14 miles north of Madras city, and Covelong reef, 25 miles south, are points of danger on the coast. Commencing with the north-east wind, a current of variable velocity sets in from the north in a direction parallel with the shore. This generally increases in strength in the course of the day and decreases during the night, and is moreover influenced by the strength of the wind. It appears to reach its maximum velocity about the 1st of November, when in conjunction with the tide it amounts to three miles per hour; and from this time decreases until the 10th of December, when it amounts to a small fraction of a mile per hour only. The current is always stronger in the afternoon than in the morning. The geological appearances in several places along the coast of Coromandel render it probable that the whole coast was heaved up at some remote period. That extensive estuaries must have indented the coast previous to that period is shown by the fossil remains, both pelagic and terrestrial, many miles removed from the present shore. The revenue districts along the Coromandel coast are Madura, Tanjore, South arcot, Chingleput, and Nellore. See vol. II, 158.——*Golcondah coast* (గోలుకొండరేవు - gólukondarévu, Tel.). Sailor's term. Begins from the Goondlacumma river in lat. 15° 27'; namely at Pedda devanampaud, Ongole talook, extending thence to the southern point of the district of Vizagapatam, in lat. 17° 15', where begins the Orissa coast. In the south-western part, the Golcondah coast contains the estuaries of the branches of the river Kistna, and those more numerous of the river Godavery; and in that part is so low, that when prolonged and violent gales from the north-east are simultaneous with great land floods, the coast is extensively inundated and great devastation takes place. The most important maritime places on the Golcondah coast are Motoopully, Masulipatam and Coringa, Narsapore, Point godavery, and Wattauda. The hills on the Golcondah coast are connected in some places with the Eastern ghauts [q.v.], and as this range approaches the south-west, its distance from the shore gradually increases, leaving space for the plain comprised in Northern circars [q.v.] and Carnatic [q.v.]. See vol. II, 164.——*Malabar coast* (ಮಲಯಾಳತೀರ - malayálatíra, Can.; മലയാംകര - malayámkara, Mal.). Sailor's term. Begins at Mount delly and stretches generally south-east as far as Cape comorin, a distance of 325 miles. Is the coast south of the Concan [q.v.]. With little exception, low, and either muddy or sandy, having

numerous shallow inlets extending a considerable distance into the land, and called by Anglo-indian backwaters [cauyal]. This coast was a fixed starting point in ancient oriental geography. According to Friar Jordanus, Bishop of Quilon, Lesser india embraced Sindh and the coast as far as some point immediately north of Malabar. Greater india extended from Malabar indefinitely to the eastward and included Champah or Cambodia [q.v.]. India Tertia was the east of Africa. Other writers changed the names, but with similar divisions [india]. See vol. II, 147.——*Orissa coast* (ఓఢ్రరేవు - ódhrarévu, Tel.). Sailor's term; at S. point of Vizagapatam district, in lat. 17° 15′; and extends north beyond this Presidency.——*West coast* (மேற்கரை - mérgarai, Tam.). General Anglo-indian term. Meant in earliest writings the west coast of Sumatra. Now always means W. coast of this peninsula from Travancore to Canara. The climate is warm, but equable, temperature being seldom lower than 68° or higher than 88°; the mean temperature 78°. March, April and May constitute the hot season, the south-west monsoon [caur] setting in about the beginning of June. The most remarkable feature of this country is the great range of the Western ghauts, for a description of which see under ghaut. For coast see vol. II, 147. For separate accounts of Travancore, Cochin, Malabar, and South canara, see vol. II, appendix XII.

COBBARY (கொப்பரை - kópparai, *Tam.*). The white kernel of the cocoanut [cocoanut, coppray].

COBJA (कुब्ज - kubja, *San.*). From (ku, san. prefix implying want + ubj, san. to make straight). Hunch-backed [coon]. Cobja vishnoovardhanan dethroned the sovereign of Vengy and established the Eastern chalookya [q.v.] dynasty, which, fixing its capital at Rajahmundry, extended its conquests to the borders of Orissa and ruled for four centuries. Vol. I (132) [charitram].

COBRA (नाग - nága, *San.* and *Mahr.*; ناگ سانپ - nágsámp, *Hind.*; ನಾಗೆರಹಾವು - nágerahávu, *Can.*; మంచిపాము - manchipámu, *Tel.*; വിഷത്താൻ - vishattán, *Mal.*; නයා - nayá, *Singh.*; நல்லப்பாம்பு - nallappámbu, *Tam.*). Title from portuguese. San. from (nagna, san. naked). Tel. from (manchi, tel. good + pámu, tel. snake); euphemistic to avert snake's anger. Mal. from (visha, san. poison + attán, mal. honorific suffix). Singh. from sanscrit. Tam. from (nalla, tam. good + pámbu, tam. snake). Tel. also (manchinágamu), meaning good + cobra; (nágupámu), meaning cobra + snake. Tam. also (nágappámbu), meaning cobra + snake. Title otherwise Cobra de capello, Binocellate cobra, Spectacled cobra. Cobra de capello is in Portuguese snake of the small hood, from the appearance of a hood which it produces by the expanded skin about the neck. Friar Jordanus, the Quilon Bishop of the fourteenth century, has the following:—"There be also venomous animals, such "as many serpents, big beyond bounds, and of divers colors, "black [black cobra], red [red cobra], white, and green [whip "snake], and parti-colored; two-headed [domoonh], also three-"headed and five-headed. Admirable marvels!" The last might be suggested by the appearance of a cobra with dilated hood and spectacles. Naga tripudians, elapidæ [naug], ophidii colubriformes venenosi, ophidia [sarpam], reptilia [sarpy, 27], of naturalists [jantoo]; erroneously spelt Naja by early writers. Alias Coluber naja; Naja atra, kaouthia, larvata, lutescens. There is only this one species. Body and tail of moderate length; belly flat; head rather high and short, not very distinct from neck, which is very dilatable, the anterior ribs being elongate. The shields of the head normal, but the loreal is absent. Nostrils wide, lateral between two shields; eye of moderate size, with round pupil. One præthree, sometimes two or four post oculars. Six upper labials, the third and fourth entering the orbit; the third forms the lower half of the anterior margin of the orbit. Scales smooth, much imbricate, in numerous series round the hood. Anal entire. Sub-caudals two-rowed. The fang is grooved, with foramen at its extremity; one or two small ordinary teeth at a short distance behind it. The neck is marked between the tenth and seventeenth transverse series of scales with a white, black-edged ⊃ or ≻ enclosing at either extremity a black ocellus. This pattern is entirely on the steel-brown skin, and is only seen when the cervical disk is expanded; then the scales are distant from one another like grains of linseed [alsee] symmetrically arranged in rows; at other times the scales are imbricate and conceal the pattern. The general color varies from light olive, or even buff, to dark-brown; this color is entirely on the scales, the interstitial skin being white, occasionally with dark cross-bands. A common variety has numerous narrow light cross-bars, generally in pairs. Under parts ash or dark mottled; anteriorly a lateral black spot corresponding to the position of the ocellus on the neck; two or three series of ventrals between the fifteenth and thirtieth are very dark, nearly black. The colors are variable in shade, and they mark caste according to the Tamulians. As a rule the cobras found on the coast are much lighter than those of inland districts. They seldom exceed 3 or 4 feet in length, and are about an inch and a quarter thick with a small head. Cobras never attack without distending the hood. They raise the anterior third of the body from the ground, slide slowly along on the posterior two-thirds, and with the hood dilated remain on the alert, darting the head forward to the attack when anything hostile approaches. This attitude is very striking, and few objects are more calculated to inspire awe than a large cobra, when with his hood erect, hissing loudly, and his eyes glaring, he prepares to strike. Nevertheless they are not aggressive; unless interfered with or irritated, they crawl along the ground with the neck undilated, looking not unlike innocent snakes; but the moment they are disturbed they assume the menacing attitude. The cobra is a nocturnal snake; that is to say it is most active in the night; but it is often seen moving about in the day. It is oviparous; the eggs, from eighteen to twenty-five in number, are obovate and about the size of those of a pigeon [capotam]; the shell is white, but tough and leathery. The cobras feed on small animals, bird's eggs, frogs [bhaicam], fish, or insects; they rob hen-roosts and swallow the eggs whole; they prefer taking their food at dusk or in the night. They drink water, but they will live for months in captivity without touching food or water. They go into water readily and swim well, but are essentially terrestrial snakes. They can climb and occasionally ascend trees in search of food. Cobras are not unfrequently found in the roofs of huts, holes in walls, fowl houses, old ruins, under logs of wood, in cellars, old brick kilns [collvye], and old masonry of stone, brickwork or mud. Their chief enemies are the jungle-fowl [q.v.], which destroy the young brood, and the herpestes or ichneumons [mongoose], which will attack and master the largest cobra. The cobras are the favorites of the snake-charmers, who make them assume a dancing motion opposite a pipe [jeenboorra, magady] which is played before them. These snake-catchers render them harmless by extracting the fangs when they are young, or when they are caught. A piece of stout cloth is put before the cobra on which it bites; the cloth is then suddenly drawn back, tearing out the fangs with it. The snake-charmers say that their charms and musics make the poison ineffective; but these are quickly reproduced, unless with the fang all the reserve fangs and germs are removed, in which case the snake is harmless for life. The cobra poison, when thoroughly inoculated by a fresh and vigorous snake is quickly fatal. Paralysis of the nerve-centres takes place, and death occurs with great rapidity sometimes in a few minutes, especially when the fangs, having penetrated a vein, inoculate the poison immediately into the venous circulation. None of the reputed antidotes [snake-stone] will cure the bite of the cobra if the snake is full-grown and if its poison fang is full and be not interfered with by clothing. The most probable remedy in all cases of snake-bite is the injection of ammonia. The Tamul Cooral has the following:—உடம்பாடிலாதவர் வாழ்க்கை குடங்கருட்பாம்பொ டுடனுறைந் தற்று—"Living with "those who do not agree with one is like dwelling with a cobra "in the same hut." There is a Tamul proverb:—கடிக்கிறநாகம் கலந்து உறவாகுமா—"Will the biting cobra mix in "friendly intercourse?" The following different kinds are recognized among the Dravidians. All are deadly, except Hill cobra and Male cobra, which are not real cobras.——*Black cobra* (నల్లనాగు - nallanágu, Tel.; കൃഷ്ണസർപ്പം - krishnasarppam, Mal.; கருநாகம் - karunágam, Tam.). Same as pariah.——*Black-hooded cobra* (నల్లతాచుపాము - nallatátsupámu, Tel.). Black on the hood unusually deep.——*Bramin cobra* (బాపననాగు - bápananágu, Tel.; பாப்பாரநாகம் - páppáranágam, Tam.). Same as red.——*Chetty cobra* (శెట్టినాగు - shettinágu, Tel.; செட்டிநாகம் - shettinágam, Tam.). Otherwise Merchant cobra, so called from its habit of looking about on all sides when lifting up its head.——*Crab cobra* (ఎండ్రినాగు - endrinágu, Tel.; நண்டுதின்னிநாகம் - nanduthinninágam, Tam.). Alleged to live upon crabs [nundoo].——*Flower cobra* (పూనాగు - púnágu, Tel.; பூநாகம் - púnágam, Tam.). The smallest kind found amongst flowers; extremely venomous.——*Foliage cobra* (ఆకునాగు - ákunágu, Tel.; தழைநாகம் - tazhainágam, Tam.). Found among leaves.——*Hill cobra* (కొండనాగు - kondanágu, Tel.). See sep. title.——*Jasmine cobra* (మల్లెనాగు - mallenágu, Tel.). From frequenting those flowers.——*Male cobra* (சாரை - shárai, Tam.). See Rat-snake.——*Mogily cobra* (بارِی کا سانپ - báríkásámp, Hind.; మొగిలినాగు - mogilinágu, Tel.). Frequents the Caldera bush [screw-pine].——*Pariah cobra* (మాలనాగు - málanágu, Tel.; பறைநாகம் - parainágam, Tam.). Same as black.——*Red cobra* (ఎర్రనాగు - erranágu, Tel.; சென்னாகம் - shennágam, Tam.). Same as bramin.——*Shell cobra* (శంఖునాగు - shankhunágu, Tel.). Plain hood without any mark.——*Wheat cobra* (గోధుమనాగు - gódhumanágu, Tel.; கோதுமைநாகம் - kóthumainágam, Tam.). A cobra with a short, thin body.

COCA (کوکا - koka, *Hind.*). Title from mexican. Title otherwise South american coca bush, South american spadic bush. Botanically Erythroxylon coca, lam., lineæ [vricsham, 28]. Distinguish both from cocoa and cocoanut. Shrub of upright, bushy habit with alternate entire ovate leaves about 1½ inches in length and small, greenish-white flowers; from south america; leaves dried and mixed with burnt lime form a masticatory [charvanam]; leaves can be infused as tea [q.v.]; immediate effect with american natives said to be a gentle excitement, with sensation of high enjoyment; its use lessens desire for food, and enables the consumer to undergo an enormous amount of

fatigue from an increased nervous energy; has evidently some analogies to betel-nut [q.v.]; has not equal effects with europeans as far as observed. For the only indigenous species of this tree see Deccany deodar.

COCANADA (కాకినాడ - kákinâda, *Tel.*). From (káki, tel. crow + nádu, tel. country); perhaps from the dark clay soil. **—(1)** Division, Deputy tahsildarry, Godavery district. Pay Rs. 100. Area 126 square miles, containing sixty-one towns and villages. Population 120,907. Language Teloogoo. E. coast of district. Boundaries:—N. Pittapore division; S. Yanam and Ramchendrapooram talook; E. sea; W. Ramchendrapooram talook. Extends all along the coast. Soil of a regar [q.v.] clay [calimunn] and generally fertile. Paddy [q.v.], jaggery [q.v.], hides [chamrah], castor [aumanac], and gingelly [q.v.] seeds, largely exported. Cigars are manufactured. Irrigation by canals. Yelair irrigates about twenty villages. A few villages by Godavery floods. Places of archæological interest:—Bheemavaram, Inzaram, Juggannautapooram, Neelapully, Sarpavaram. Principal trig. stations:—Gorrepoody, Manjair, Mullavarammol, Polecore, Raipore, Rameshwaram, Timmapooram, Vaucalpoody lighthouse. The leading places, &c., in the division are the following.——*Atchootapooratrayam* (అచ్యుతాపురత్రయం - açcutápuratrayam, Tel.). From (açcutápura, tel. town so-called + traya, san. triad); being composed of atchootapooram, bootchampett and rameshwaram. Sanscrit name (ráméshvara), meaning rama, the lord, from the temple of rama now existing. Zemindarry, Village; pop. 1,793; lat. of village 16° 57′; long. 82° 13′; from Cocanada W. 3 miles; from the sea W. 5½ miles. ——*Bheemavaram* (భీమవరం - bhímavaramu, Tel.). See sep. title.——*Cocanada* (కాకినాడ - kákináda, Tel.). See below.——*Coringa* (కోరంగి - kórangi, Tel.). See sep. title.——*Gooroozaunapully* (గురుజానపల్లి - gurudzánapalli, Tel.). From (guruja, tel. diamond + palli, tel. village). Zemindarry village; pop. 1,447; lat. of village 16° 54′; long. 82° 15′; from Cocanada S. 3½ miles; from the sea W. 1½ miles. Peshcush Rs. 1,251. Salt factory.——*Gorrepoody* (గొర్రెపూడి - gorrepúdi, Tel.). From (gorre, tel. sheep + púdi, tel. village). Trig. station; lat. 16° 51′ 44·26″; long. 82° 14′ 24·24″; from Cocanada S.S.W. 6 miles; from Congode E. 1¼ miles; from the sea W. 3½ miles.——*Hope island* (కోరంగిదీవి - kórangidívi, Tel.). See sep. title.——*Inzaram* (ఇంజరము - indzaramu, Tel.). See sep. title.——*Juggannautapooram* (జగన్నాథపురము - jagannát'hapuramu, Tel.). From (jagannát'hudu, tel. proper name + pura, san. town). Government village; pop. included in Cocanada; lat. of village 16° 56′; long. 82° 16′; from Cocanada S. 1 mile; from the sea W. 1 mile. Formerly Dutch. Salt factory.——*Manjair* (మంజేరు - manjéru, Tel.). From (manju, san. beautiful + éru, tel. river). Trig. station; lat. 16° 49′ 21·25″; long. 82° 14′ 25·37″; from Cocanada S.S.W. 9 miles; from the sea W. 5 miles; from Seela N.E. 1½ miles.——*Mullavaram* (మల్లవరము - mallavaramu, Tel.). From (mallaya, tel. proper name + pura, san. town). Trig. station; lat. 16° 43′; long. 82° 18′; from Cocanada S. 16 miles; from the sea W. 4½ miles; from Tallaraiv S.E. 5 miles.——*Neelapully* (నీలపల్లి - nílapalli, Tel.). See sep. title.——*Pengoodoor* (పెనుగుదురు - penuguduru, Tel.). From (penu, tel. large + kuduru, tel. halting place). Zemindarry village, Salt factory; pop. 1,493; lat. of village 16° 54′; long. 82° 14′; from Cocanada S.W. 4 miles; from the sea W. 2½ miles.——*Polecore* (పోలేకుర్రు - pólékurru, Tel.). From (póli, tel. proper name + kurru, tel. hamlet). Trig. station; lat. 16° 46′ 00·00″; long. 82° 16′ 00·00″; from Cocanada S. 11 miles; from the sea W. 4 miles; from Tallaraiv S. 1 mile. ——*Raipore* (రేపూరు - répúru, Tel.). From (rédu, tel. king + pura, san. town). Trig. station; lat. 16° 56′ 54·21″; long. 82° 13′ 58·69″; from Cocanada W. 3¼ miles; from Covoor N.E. ¾ mile; from the sea W. 4½ miles.——*Ramanayyapett* (రామనయ్యపేట -ramanayyapéta, Tel.). From (ramanayya, tel. proper name + péta, tel. suburb). Zemindarry village; pop. 1,451; acres 904; lat. of village 16° 59′; long. 82° 17′; from Cocanada N. 3 miles; from the sea W. 2 miles.——*Rameshwaram* (రామేశ్వరము - rámésh-varamu, Tel.). From (ráma, san. the god + íshvara, san. lord). Trig. station; lat. 16° 58′ 48·75″; long. 82° 14′ 32·24″; from Cocanada N.N.W. 3 miles; from Maudhavaputnam S. ¾ mile; from the sea W. 3¾ miles.——*Samulcottah* (సామర్లకోట - tsámarlakóta, Tel.). See sep. title.——*Sarpavaram* (సర్పవరము - sarpavaramu, Tel.). From (sarpa, san. snake + pura, town). Village, Place of pilgrimage; pop. 1,374; lat. 17° 00′; long. 82° 16′; from Cocanada N. 4¼ miles; from the sea W. 3¾ miles. Ancient Vishnoo temple founded by a Rishy, with fourteen inscriptions. North is a small lake called Nauradagoondam. A large pagoda [q.v.].——*Tallaraiv* (తాళ్లరేవు - tállarévu, Tel.). From (tádi, tel. palmyra, borassus flabelliformis, linn. + révu, tel. harbour). Zemindarry village; lat. of village 16° 47′; long. 82° 16′; from Cocanada S. 12 miles. Ships repaired.——*Timmapooram* (తిమ్మాపురము - timmápuramu, Tel.). From (timmayya, tel. proper name + pura, san. town). Zemindarry village; pop. 1,160; lat. of village 17° 02′; long. 82° 19′; from Cocanada N.N.E. 6 miles; from the sea W. 3 miles. Trig. station; lat. 17° 02′ 06·27″; long. 82° 17′ 11·79″; from Cocanada N.E. 6 miles; from the sea W. 4 miles; from Panasapaud N.E. 2 miles.——*Vaucalpoody* (వాకలపూడి - vákalapúdi, Tel.). From (váka, tel. stream + púdi, tel. village). Zemindarry, Village, Lighthouse; pop. 891; lat. of village 17° 00′; long. 82° 19′; from Cocanada N.N.E. 5 miles; from the sea W. 1 mile. Lighthouse is a Trig. station; lat. 17° 00′ 49·87″; long. 82° 19′ 30·78″; from Cocanada N.N.E. 3 miles; from the sea W. ½ mile; from Tammavaram S. 1½ miles. Light 500 yards from the shore. White; flashing. A flash every 20 seconds. 14 miles range. Visible from all directions seaward. White column. To lead clear of the shoals to the northward of the Point godavery.——*Yanam* (యానాము - yânâmu, Tel.). See sep. title.——*Yelair* (ఏలేరు - éléru, Tel.). See sep. title.**—(2)** Sub-magistracy, Godavery district. Pay Rs. 70. **—(3)** Town, Port, Municipality, Collector's Divisional and Deputy tahsildar's head-quarters, Sub-judge's Court, Telegraph office, District registrar's office, Marine office; Godavery dist., Cocanada division; pop. 40,553; lat. 16° 56′; long. 82° 16′; from Coonavaram E.S.E. 76 miles; from Coringa N. 10 miles; from Ellore E.N.E. 76 miles; from Madras N.N.E. 288 miles; from Narsapore N.E. 50 miles; from Ooppauda S.S.W. 12 miles; from Rajahmundry E.S.E. 31 miles. On Golcondah coast [q.v.], at the northern extremity of the Godavery delta. Connected by canal with Samulcottah and the Godavery at Dowlaishweram. Includes the old town of Juggannautapooram formerly a Dutch settlement which is connected with Cocanada proper by an iron girder bridge across the salt creek, completed in 1865. For lighthouses see Vaucalpoody and Hope island. In 1802 a dock was constructed to receive ships of the Royal navy not drawing more than 14 feet of water. A great impetus was given to trade of place during American civil war, when large quantities of cotton were shipped. The shipping has increased and communication is kept up with Calcutta, Madras and Rangoon. Many mercantile houses have been established and a branch of the Bank of Madras opened. Chief exports are cotton [q.v.], gingelly-oil [q.v.] seed, cheroots [q.v.], sugar [q.v.] and rice [q.v.]. Imports are iron [auhan], copper [taumram], gunny [q.v.] bags, and various liquors. The following are the travelling distances by road from Cocanada to different places:—

To	Viâ	Miles and Furlongs.	
Berhampore ...	Samulcottah and Chicacole	262	7¼
Bezwada	Rajahmundry and Samulcottah ...	132	2

COCHIN * (കൊച്ചി - koççi, *Mal.*). The final "n" is from the Portuguese. Cf. coleroon, comorin. Vern. means small place. Sanscrit name (bálápurí), means city of maidens; also (góshrí-nagarí), means cow + wealth + town. Also called Cheriya anantapooram as opposed to Periya anantapooram or Trivandrum. Local name for the province is Mautacshmah, meaning palace + country; also Mautabhoo, meaning same; also Perimpadapp, meaning great + creation, the great centre of population.**—(1)** Native state; situated on the west of the Presidency; between 9° 48′ and 10° 50′ N. lat., and between 76° 5′ and 76° 58′ E. long.; bounded N. by Malabar district, E. by Malabar and Coimbatore districts, S. by Travancore state, W. by Malabar district and the sea; pop. 600,278; lang. Malayalam. Contains rivers Alwye, Carvanore, Chaulacoody, Ponnany, Tattamungalam; ports Maulipooram, Naracal. The whole area of the state is represented by the following sub-areas:—Canyanore, Chittoor, Cochin, Cranganore, Moocoondapooram, Talapully and Trichore talooks. The following general references should be made to the preceding volumes:—general geography, I (1) to (29); general ethnology, I (29) to (109); general history, I (110) to (188); physical geography, II, 1; meteorology, II, 3; geology, II, 8; fauna, II, 21; flora, II, 26; mineralogy, II, 29. The following references in the preceding volumes will furnish details special to the district:—particulars about towns, II, 48; coast survey, II, 150; lighthouses, II, 168; ports, II, 423; missionary stations, II, 455. A special gazetteer account of the whole state is given at II, 68. Places of archæological interest:—Caccaud, Cochin, Cranganore, Nidoombara tully, Pauraul, Poonilaurava, Putticaud, Tircore, Tirvillamala, Trichore. The leading places, &c., in the State are the following.——*Ambalacottah* (അമ്പലക്കോട്ട - ambalakkótta, Mal.).

See sep. title.——*Anjikeimal* (അഞ്ചിക്കൈമൾ - añchikkaimal, Mal.). See sep. title.——*Annamanada* (അന്നമനട - annamanata, Mal.). From (annamman, mal. the food goddess, so called + nata, mal. entrance). Village; lat. 10° 14′; long. 76° 22′; from Irinyaulacode S.E. 12 miles; from Ernacolum N.N.E. 18 miles; from Trivandrum N.N.W. 128 miles; from the sea E. 12 miles. Capital of a small tract called Adoor graumam.——*Aunamala* (ആനമല - ánamala, Mal.). From (ána, mal. elephant + mala, mal. mountain). River. Rises in the mountains of Coimbatore, where called Auliyaur [q.v.], and flows 15 miles through forest taking different names. Stone-bridge near Tattamungalam. Joins with Ponnany river west of Parly railway station.——*Ayicottah* (അഴിക്കോട്ട - azhikkótta, Mal.). See sep. title.——*Caccaud* (കക്കാട് - kakkátu, Mal.). From (kal, mal. rock + kátu, mal. jungle). Village; pop. 216; lat. 10° 39′; long. 76° 06′; from Ernacolum N.W. 47 miles; from Trichore N.W. 13 miles; from Vadacancherry W. 12 miles; from the sea E. 6 miles. Rock-cut cave with pillars.——*Canyanore* (കണയന്നൂർ - kanayannúr, Mal.). See sep. title.——*Carvanore* (കരുവന്നൂർ - karuvannúr, Mal.). See sep. title.——*Chaulacoody* (ചാലക്കുടി - chálakkuti, Mal.). See sep. title.——*Chennamungalam* (ചേന്നമംഗലം - chénnamangalam, Mal.). From (shéndan, tam. skanda, the god + mangala, san. prosperity). Village; lat. 10° 10′; long. 76° 16′; from Cochin N. 14 miles; from Ernacolum N.N.W. 14 miles; from the sea E. 4 miles. The residence of Polliett atchan, a rich jenmy [q.v.]. Family once hereditary ministers of rajah of Cochin.——*Cheranore* (ചേരാനൂർ - chéranúr, Mal.). From (chéran, mal. chéra king + úr, mal. village). River. Rises in Vallangy hills and runs for 4 miles in rocky channel. It is then joined by others. Passes 20 miles through Trichore district and joins Carvanore river.——*Chittoor* (ചിററൂർ - chittúr, Mal.). See sep. title.——*Cochin* (കൊച്ചി - koççi, Mal.). See below.——*Codacherry* (കോടശ്ശേരി - kótashshéri, Mal.). See sep. title.——*Colinjappaura* (കൊഴിഞ്ഞാമ്പാറ - kozhiñchánpára, Mal.). From (kozhi, mal. wither + pára, mal. rock). Village; pop. 4,314; lat. 10° 44′; long. 76° 53′; from Chittoor E.N.E. 6 miles; from Trichore E.N.E. 45 miles; from Ernacolum N.E. 65 miles; from the sea E. 60 miles. On the road to Pollachy. Fair held on Wednesdays.——*Coonnancoolam* (കുന്നങ്കുളം - kunnankulam, Mal.). From (kunnam, mal. hill + kulam, mal. tank). Town; pop. 4,004; lat. 10° 39′; long. 76° 6′; from Ernacolum N.N.W. 48 miles; from Trichore N.W. 13 miles; from Vadacancherry W. 13 miles; from the sea E. 6 miles. Large Christian town, with Syrian and Church missionary society establishments. One Malayalam bimonthly paper is published here.——*Cranganore* (കൊടുങ്ങല്ലൂർ - kotunnallúr, Mal.). See sep. title.——*Cullvetty bazaar* (കൽവെട്ടിബജാർ - kalvettibajár, Mal.). See sep. title.——*Ernacolum* (എറണാകുളം - eranákulam, Mal.). See sep. title.——*Irinyaulacode* (ഇരിഞ്ഞാലക്കോട - iriññálakkótu, Mal.). From (iru, mal. two + chála, mal. palace + kótu, mal. place). Village talook head-quarters; pop. 884; lat. 10° 21′; long. 76° 16′; from Chittore S.W. 43 miles; from Cochin N. 27 miles; from Ernacolum N. 26 miles; from Trichore S. 12 miles; from Tripoontora N.N.W. 29 miles; from Madras W.S.W. 330 miles; from the sea E. 6 miles. Has a large temple whose annual festival is in April-May. Weekly fair on Wednesdays.——*Keicherry* (കൈച്ചേരി - kaiççéri, Mal.). From (kai, mal. hand + chéri, mal. village). River. Rises at foot of hills and after 27 miles through Talapully district enters Trichore lake. During monsoon [q.v.] waters are made to irrigate lands by dams.——*Mattancherry* (മട്ടാഞ്ചേരി - mattáñchéri, Mal.). See sep. title.——*Maulipooram* (മാലിപ്പുറം - málippuram, Mal.). See sep. title.——*Moocoondapooram* (മുകുന്ദപുരം - mukundapuram, Mal.). See sep. title.——*Moolattara* (മൂലത്തറ - múlattara, Mal.). From (múla, mal. corner + tara, mal. village). Village. Anicut here on the Aunamala river. It irrigates a large tract of territory.——*Naracal* (ഞാറക്കൽ - ñárakkal, Mal.). See sep. title.——*Neliampathy* (നെല്ലിയാമ്പതി - nelyámpati, Mal.). See sep. title.——*Nemmaura* (നെമ്മാറ - nemmára, Mal.). From (nal, mal. good + mári, mal. rain). Village; pop. 4,601; lat. 10° 35′; long. 76° 38′; from Chittoor W.S.W. 14 miles; from Trichore E. 26 miles; from Ernacolum N.N.E. 46 miles; from the sea E. 40 miles. At foot of Neliampathy hills. Has a pagoda. Is the head-quarters of a Sub-magistrate.——*Nidoombara tully* (നിടുമ്പരത്തളി - nitumbaratalli, Mal.). From (netumpura, mal. barracks, the long house + tali, mal. temple). Village; lat. 10° 45′; long. 76° 18′; from Ernacolum N. 50 miles; from Trichore N. 14 miles; from the sea E. 21 miles. Temple with inscriptions.——*Nullapully* (നല്ലേപ്പള്ളി - nalléppalli, Mal.). From (nalla, mal. good + palli, mal. village). Village; pop. 4,306; lat. 10° 44′; long. 76° 50′; from Chittoor N.E. 3¾ miles; from Ernacolum N.E. 62 miles; from the sea E. 56 miles. Consists mostly of Bramins.——*Olloor* (ഒല്ലൂർ - ollúr, Mal.). From (ul, mal. interior + úr, mal. village). Village; lat. 10° 29′; long. 76° 17′; from Trichore S.S.E. 3½ miles; from the sea E. 13 miles. Syrian population and church.——*Oorgam* (ഊരകം - úrakam, Mal.). From (úr, mal. village + akam, mal. inside). Town; pop. 1,109; lat. 10° 26′; long. 76° 16′; from Ernacolum N.N.W. 30 miles; from Trichore S. 7 miles; from the sea E. 9 miles. Large temple and a palace. Festival in temple, March-April.——*Otchantora* (ഓച്ചന്തുറ - óççantura, Mal.). From (óççan, mal. a drum beater + tura, mal. harbour). Village; pop. 2,280; lat. 10° 01′; long. 76° 17′; from Ernacolum N.W. 3 miles; from Cochin N. 3½ miles; from the sea E. ¼ mile.——*Paliport* (പള്ളിപ്പുറം - pallippuram, Mal.). See. sep title.——*Pazhayanore* (പഴയന്നൂർ - pazhayannúr, Mal.). See sep. title.——*Periyaur* (പെരിയാറു - periyáru, Mal.). See sep. title.——*Poonyicara* (പുഞ്ഞിക്കര - púññikkara, Mal.). See sep. title.——*Putticaud* (പട്ടിക്കാട് - pattikkátu, Mal.). From (patti, mal. cattle fold + kátu, mal. jungle). Village; lat. 10° 33′; long. 76° 22′; from Ernacolum N.N.E. 40 miles; from Trichore N.E. 8 miles; from the sea E. 20 miles. Formerly remarkable for the robberies committed on travellers. Now a celebrated place amongst sportsmen. Several dolmens [coday cull]. In the forests in the vicinity are several deserted temples, solidly built of granite [caroom cull].——*Shoranore* (ചെറുവണ്ണൂർ - cheruvannúr, Mal.). See sep. title.——*Talapully* (തലപ്പിള്ളി - talappalli, Mal.). See sep. title.——*Tattamungalam* (തത്തമംഗലം - tattamannalam, Mal.). See sep. title.——*Tircore* (തൃക്കൂർ - trikkúr, Mal.). From (tirukku, mal. border + úr, mal. village). Village; lat. 10° 28′; long. 76° 19′; from Ernacolum N. 32 miles; from Irinyaulacode N.E. 8 miles; from the sea E. 14 miles. Temple in a cave.——*Tirvanjicoolam* (തിരുവഞ്ചിക്കുളം - tiruvañchikkulam, Mal.). See sep. title.——*Tirvillamala* (തിരുവില്വാമല - tiruvillámala, Mal.). From (tiru, mal. holy + villán, mal. bowman + mala, mal. hill); hill of rama, the bowman. Sanscrit name (bilvádri), means bael [q.v.] tree, ægle marmelos, corr. + mountain. Village; lat. 10° 44′; long. 76° 28′; from Ernacolum N. 52 miles; from Trichore N.E. 20 miles; from Vadacancherry N.E. 13 miles; from the sea E. 33 miles. Temple and rock-cut caves.——*Trichore* (തൃശ്ശിവപേരൂർ - trishshivappérúr, Mal.). See sep. title.——*Tripoontora* (തൃപ്പൂണിത്തുറ - trippúnittara, Mal.). See sep. title.——*Vadacancherry* (വടക്കാഞ്ചേരി - vatakkáñchéri, Mal.). From (vatakku, mal. north + chéri, mal. village). Talook head-quarters; lat. 10° 40′; long. 76° 17′; from Chittore W.S.W. 34 miles; from Cochin N. 47 miles; from Ernacolum N. 47 miles; from Trichore N.N.E. 9½ miles; from Tripoontora N.N.W. 49 miles; from Madras S.W. 318 miles; from the sea E. 19 miles. On road to Trichore. Moonsif's court. Syrian christians.——*Vellaurapully* (വെള്ളാരപ്പിള്ളി - vellárappalli, Mal.). From (vella, mal. white + áru, mal. river + palli, mal. village). Village; lat. 10° 8′; long. 76° 28′; from Canyanore N. 14 miles; from Cochin N.E. 17 miles; from Ernacolum N.E. 15 miles; from the sea E. 17 miles. An isolated portion of the State surrounded by Travancore territory, on northern bank of Periyaur. Sanitarium and watering place. The Rajah has a country residence.——*Vypeen* (വൈപ്പി - vaippi, Mal.). See sep. title.——*Yenamacull* (ഏനാമാക്കൽ - énámákkal, Mal.). From (énam, mal. ready + má, mal. large + kal, mal. stone). Village.——**(2)** Talook, Cochin state; pop. 89,758. Principal places:—Andicadav, Ayicull, Cheralye, Cochin, Maulipooram, Naracal, Neirambalam, Otchantora, Palloorty, Poonyicara, Yedacotchy, Yedavancaud and Yelangoonnapoya.——**(3)** British talook, Malabar district. Surrounded by Native state of Cochin, but under Malabar Collector [malabar]. Southernmost talook of the district. Area 1½ square miles, including seventeen detached plots known as pauttoms or farms situated in lat. 9° 58′ 7″ N. and long. 76° 17′ E. Bounded north by the Native state of Cochin and backwater, south by the Cochin state, east by the river and the Cochin state, and west by the sea. Comprises three amshoms. Anjengo, Cochin and Tungacherry. Open seaboard. Form irregular being intersected here and there by the Cochin and Travancore states. Surface level. The Cochin inner harbour lies to the north of the town. About a mile in length is British territory, the rest belonging to the Native cochin state. There is an uninterrupted water communication from Cochin to Anjengo and thence to Trivandrum on the south and to Tiroor, a Railway station in Ponnany talook on the north. Soil alluvial and sandy; congenial to cocoanut palm, which is the chief product. Paddy [q.v.] is the only grain grown, and that to but a small extent. Staple produce is the cocoanut [q.v.]. Chief exports include the produce of Cochin and Travancore states and consist of cocoanut oil, coir [q.v.], fibre, coffee [q.v.], pepper [q.v.] and ginger [q.v.]. The chief imports are food grains, piece-goods, liquors and spices. Manufactures are cocoanut oil, coir-matting, casks, coir-yarn and lemon-grass [q.v.] oil. There are two small dams in the south of the town constructed for the purpose of protecting paddy cultivation from salt-water. Extensive protective works were at one time carried out at Cruz milagre

about two miles to the north of the Cochin river-mouth to prevent the river from forcing for itself a new outlet. Small tanks are numerous, but the cultivation is entirely dependant upon south-west monsoon [q.v.]. There is a good camping ground in the heart of the town facing the Police station. The leading places, &c., in the talook are the following.—— *Anjengo* (അഞ്ചുതെങ്ങ - añchutennu, Mal.). See sep. title.—— *Cochin* (കൊച്ചി - koççi, Mal.). See below.——*Tungacherry* (തങ്കശ്ശേരി - tankashshéri, Mal.). See sep. title.——**(4)** British town, Port, Head-quarters of Deputy collector, Sheristadar magistrate, Civil surgeon, Port office, Assistant superintendent of sea customs, Adhicaury, Telegraph office; Malabar dist., Cochin tal.; pop. 15,698; lat. 9° 58′ 04″; long. 76° 17′ 07·51″; from Bangalore S.W. 224 miles; from Bombay S.E. 648 miles; from Calicut S.E. 95 miles; from Cannanore S.E. 145 miles; from Chittoor S.W. 60 miles; from Cottayam N.N.W. 30 miles; from Ernacolum S. 3 miles; from Madras S.W. 345 miles; from Maulipooram S. 2½ miles; from Mangalore S.E. 220 miles; from Trichore S. 41 miles; from Tripoontora W. 6½ miles. On S. bank of principal entrance to Travancore estuary. Formerly on bank of a river, but in A.D. 1341 changes took place in backwater and whether from cyclone winds, or earthquake, or other causes Vypeen island was formed; a circumstance commemorated by an era of its own, known as Poothooveppoo or New deposit [vypeen]. The town is now fronted to N. by this island. The town extends for a mile along the Travancore estuary and then joins Mattancherry and the Jews settlement. It is half a mile in width. The numerous quaint old Dutch buildings give it a picturesque appearance. The chief native quarters are Cullvetty bazaar and Amravatty, the latter inhabited by Chetties and goldsmiths. The water-supply is bad and drinking water is brought by boats from Alwye, 20 miles distant. Light on a small mound, which formed a bastion of the old fort to the south of the harbour. Lat. 9° 57′ 47″; long. 76° 13′ 45″. White; fixed, 15 miles range. Visible from all directions seaward. White laterite [q.v.] column. Adjoining the lighthouse are the European residences facing the sea. Of late years, the sea had threatened to encroach, but stone groins were thrown out at right angles to river bank, and the foreshore has been reclaimed. Though it has the greatest depth of water of any Madras harbour, port is closed during Cochin S.W. monsoon [caur]. The best anchorage in the roads is from 5½ to 6½ fathoms soft ground, 2 to 2½ miles off shore. The stream of tide is strong and its times of change irregular, influenced by the evaporation from, or the fall of rain upon, the immense area of backwater [cauyal], of which Cochin river-mouth is the outlet. At the anchorage abreast the bar, the ebb sets west-north-west, but the tendency is to the north-west; racing over the sand-banks on the northern side of river entrance it always produces heavy breakers there, which a ship's boats should avoid. The bar at the river's mouth is a narrow strip of land having 13 feet on it at low water, but the rise and fall being only 3 feet at spring tides, only vessels drawing less than 14½ feet are taken in. The bar is marked by two buoys. The best channel does not always remain at the same spot. There is at times a surf on the bar occasioned by the strong ebb running out against the sea breezes when there is any swell outside. The river inside is deep seven to nine fathoms. Under the old wall of the fort, the depth of water is about twenty or thirty feet. Cochin is the only port south of Bombay where large ships can be built. In 1820 and 1821 three frigates for the royal navy were built. Smaller vessels for the Indian navy have also been built, and many ships from 500 to 1,000 tons burthen for the merchant service. The principal material is teak, procured from Western ghauts, but frequently so much injured in the passage down the torrents, as to be unfit for the construction of any but small craft of from 50 to 250 tons burthen. Repairs to sailing vessels are still executed. Cochin was one of the first spots in India visited by Europeans. Tradition asserts that St. Thomas labored in this region in 52 A.D., leaving behind him the colony of Christians called Nasrauny moplahs; and that in the first year of Christian era Jews settled on the site of their present colony. The latter afterwards established their head-quarters at Cranganore where they remained until driven back in the sixteenth century by the Zamorin's moplahs. From copper plates still extant, it is put beyond doubt that the Syrian christian and Jewish churches were firmly established in Cochin by the eighth century. In 1500, Cochin was visited by Cabral, after his attack on Calicut. He met with a friendly reception from the rajah, who is described as a reluctant vassal of the Zamorin. Cabral returned to Portugal with a cargo of pepper, and was followed by Inande nova castelho. In 1502, Vasco da Gama, on his second voyage, established a factory here. In 1503, Albuquerque arrived just in time to succour the Cochin rajah, who was besieged by the Zamorin in the island of Vypeen. He built the Cochin fort called Manuel cottah, the first European fort in India in 1507. The fort was enlarged in 1525 by Menezes. Albuquerque returned to Portugal, leaving Cochin guarded by only a few hundred men under Duarte pacheco. The Zamorin invaded the country but was compelled to retreat to Calicut. In 1505, Francisco Almeyda arrived as the first Portuguese viceroy of India. He was succeeded in 1510 by Albuquerque. On Christmas day 1524, Da Gama was buried here, according to Correa, in the principal chapel of the Franciscan monastery, now used as the Protestant church. His body was in 1538 removed to Portugal. In 1530, St. Francis Xavier preached in these parts and made many converts. In 1557, the church of Santa cruz was consecrated as the cathedral of a bishop. In 1577, the Society of Jesus published at Cochin the first book printed in India. In 1585 Cochin was visited by Ralph Fitch. In 1616 the English, under Keeling, engaged to assist the Zamorin in attacking Cochin, on the understanding that a English factory was to be established there. These relations were however broken off, and the factory was built some years later with the consent of the Portuguese. In 1663, the town and fort were captured from the Portuguese by the Dutch, and the English retired to Ponnany. The Dutch greatly improved the place and its trade, building substantial houses after the European fashion and erecting quays, &c. In 1776 the state was subjugated by Hyder. In 1778, Adrien Van Moens completely altered the fort, providing it with new ditches and building seven strong bastions. In 1795, on the conquest of Holland by the French, it was besieged and captured by Major Petrie. In 1796 a Dutch superintendent of Police, Justice of the Peace and Attorney-General in criminal cases, a criminal and civil court and a court of appeal were constituted at Cochin. The college for the guardianship of orphans and minors, a Dutch institution answering to the Court of Wards, a separate orphan house, an hospital for lepers at Paliport, and a matrimonial college were also continued. In 1800, Cochin was placed under the Malabar commissioners; in 1801, the Cochin commission was abolished and it was placed under the principal Collector of Malabar. The establishment was afterwards reduced to that of a Principal sudder ameen and Joint magistrate and of a Tahsildar-magistrate. In 1806 the English blew up the cathedral, destroying at the same time some of the quays, the best houses in the place, and the fort. This drove away the wealthier Dutch families. In 1814 finally ceded to the British by treaty at the time when the other Dutch indian settlements, captured the same year, were restored to Holland. British duties abolished in 1836. British resident appointed 1839. The Dutch church passed into the hands of the English. The Jews here are of two kinds; the fair Jews, of more recent arrival and settlement in the country; and the black Jews, who reside apart in a village outside the town [cranganore, ernacolum]. The latter have a synagogue. The Protestant church, formerly the principal chapel of the Franciscan monastery and probably dedicated to St. Anthony, which escaped the general destruction in 1806, is a plain massive building, with a nave 142 feet long by fifty-one broad. Its exact age is unknown; but from inscriptions on the floor it certainly existed before 1546, and is therefore the oldest European church in India, except perhaps the Calicut church. It contains some curious epitaphs. One tombstone is sometimes pointed out as that of Vasco da Gama, because it has the word 'Vasco' on it, the rest of the name being obliterated, but the coat of arms above is not that of Da Gama. The façade of the church was surmounted by an ornamented bronze cross and a weathercock 6 feet high which could be perceived some 10 miles off at sea. In 1865 these were pulled down. There are altogether nine Christian churches in the town; two Protestant, six Roman catholic and one Syrian. There are two temples; Amman coil dedicated to Bhagavaty, and Janardana devasom in Amravatty. Nearly all traces of the old fort have disappeared. The building now occupied as court house and talook cutcherry was formerly the Roman catholic convent. The Custom-house is situated on the boundary limits of British and Native cochin. The parade ground occupies the heart of the town beyond the Protestant church. Cochin is known for gold [pon] and silver [velly] work and wood and ivory [dant] carving. Two weekly English newspapers are published in addition to a Malayalam paper. There is a Tamul proverb:— கொச்சிக்குப் போனவன் செய்தியைப்பார், தன்குருவை விற்றவன் செய்தியைப்பார்—"See the result of his having "gone to Cochin, and of one who betrayed his Gooroo;" meaning that Tinnevelly tamul should stay at home. The following are the travelling distances by road from Cochin to different places:—

——(5) Native town; Cochin state, Cochin tal.; lat. 9° 58′ 7″; long. 76° 17′; from Chittoor S.W. 61 miles; from Ernacolum W. 2 miles; from Madras S.W. 347 miles; from Trichore S. 38 miles; from Tripoontora W. 7 miles. Also called Cochin bunder. Consists of four conjoined villages, on the Travancore estuary, half a mile south of the British town of Cochin, in the midst of the populous tract lying between the backwater and the sea. Connected by canals with Trichore for 45 miles. Former capital of the State; and near it tradition places the gold reefs said to have been once worked. Gives its name to the form of elephantiasis known as Cochin leg [cullvetty, mattancherry].——(6) River; Cochin state. Rather the tidal opening of a large system of backwaters [cauyal] in which numerous rivers from ghauts [q.v.] lose themselves. The backwaters extend north into Cochin territory and south into Travancore and afford a means of conveying the produce of this extensive tract. The rush of water across the bar is so great as to maintain a depth on it of about twelve feet, which enables ships of considerable size to come into harbour and load in smooth water.——(7) *Cochin leg* (हस्तिपद - hastipada, San.; فیل پا - fílpá, Pers.; ہاتھی کا پاؤں - háthíkápáun, Hind.; ಆನೆಕಾಲು - ánékálu, Can.; ఏనుగకాలు - énugakálu, Tel.; മന്ത് - mantu, Mal.; ஆனைக்கால் - ánaikkál, Tam.). San. from (hasti, san. elephant + pada, san. leg). Pers. from (fíl, ar. elephant + pá, pers. leg). Hind. from (háthí, hind. elephant + páun, hind. leg). Tel. from (énuga, tel. elephant + kálu, tel. leg). Mal. from (manda, san. slow); from the gait. Tam. from (yánai, tam. elephant + kál, tam. leg). Tam. also (perungál), meaning large + leg. Title because first observed in Malabar. Lepra tuberculosa seu nodosa. Called Elephantiasis, but this was not the Greek, &c.; see Cooshtam. Otherwise Barbadoes leg. The appearance is familiar. Begins with fever [jwaram] and pain in the leg, extending as high up as the thigh. These gradually subside, but leave a thickening of the cuticle, which continues to increase in size and in duration with every attack of fever [veidyan].

COCHRANE CANAL (கொக்கரேன்வாய்க்கால் - kokkarénváykkál, *Tam.*). Called after Cochrane, a contractor. Canal; Chingleput dist., Ponnairy and Sydapett tals. Now part of Buckingham canal [q.v.]. Ran north from Black town through the Poolicat lake as far as Doogarauzpatam.

COCK UP (फिताद - p'hitáda, *Mahr.*; کروا - korvá, *Hind.*; ಕುಳಂಜಿ - kulanji, *Can.*; పండుచేప - panduchépa, *Tel.*; ଦୁରୁଆ - durruá, *Oor.*; നരിമീൻ - narimín, *Mal.*; கொடுவாய் - koduváy, *Tam.*). Title from erect sharp spines of dorsal fin. Hind. from tamul. Can. from (kuli, can. pit + anji, can. be alarmed); used when small. Tel. from (pandu, tel. old + chépa, tel. fish). Mal. from (nari, mal. tiger + mín, mal. fish). Tam. from (kodumai, tam. frightfulness + váy, tam. mouth). Can. also (madávu), applied only to a large nayar fish, cf. english jack and pike. Tel. also (panduminu), meaning old fish. Mal. also (nadimín), meaning river fish. Tam. also (panrimín), meaning hog + fish. Title otherwise Indian perch, Nayar fish. Lates calcarifer, percidæ [panayairy], acanthopterygii, teleostei [matsyam, 1], of naturalists [jantoo]. Alias Coius vacti; Holocentrus calcarifer, heptadactylus; Lates nobilis; Perca calcar, pandoomenoo; Plectropoma calcarifer. Shoulder bone serrated; air vessel thin, but furnishes a good isinglass [meen vajram]; grey, with dash of green along back, and silvery on abdomen; during monsoon it has a tinge of purple; immature are usually darker than adults; seas, backwaters, and mouths of tidal rivers, up which last it often ascends long distances to prey upon weaker neighbours; excellent eating when from the vicinity of large rivers; salts well, and from it some of the best Tamarind-fish [q.v.] is prepared. No other common species here.

COCOA (کوکو کا جھاڑ - kokokájhár, *Dec.*). Title corrupted from cacauat mexican; to be distinguished from coca [q.v.] and cocoanut [q.v.]. Title otherwise Cacao, Chocolate tree. Botanically Theobroma cacao, linn., sterculiaceæ [vricsham, 26]. Habitat central america; cultivated in ceylon. The cocoa fruit or capsule is oval, from 2½ to 4 inches long and about the same in circumference, yellow and five-celled, each cell containing generally from eight to ten seeds; the seed is ovoid or oval, black and covered with a membranous and succulent aril; the alkaloid of cocoa is theobromine, identical in its effects on the system with theine [tea] or caffeine [coffee]. The roasted and broken seeds are sometimes exported from ceylon and sold by native merchants at madras. Prepared cocoas are made by powdering the roasted seeds and removing a portion of the concrete oil by heat, and in the cheaper kinds sugar and farinaceous substances are added; chocolate consists of the kernels of the seeds, which are first roasted, then deprived of their shells, and lastly reduced by grinding between heated stones into a paste, mixed with sugar and spices and pressed into cakes.

COCOANUT (नारिकेल - nárikéla, *San.*; नारली - náralí, *Mahr.*; नार्ले - nárla, *Conc.*; شجرة النارجيل - shajaratunnárjíl, *Ar.*; درخت نارگیل - darakhtinárgíl, *Pers.*; ناریل کا پیڑ - nárelkáper, *Hind.*; ناریل کا جھاڑ - nárelkájhár, *Dec.*; کالپا - kálapa, *Malay*; ತೆಂಗಿನಗಿಡ - tenginagida, *Can.*; ತಾರೆ - táre, *Too.*; టెంకాయచెట్టు - tenkáyachettu, *Tel.*; ନଡିଆ - nodiya, *Oor.*; തെങ്ങ് - tennu, *Mal.*; පොල්ගහ - polgaha, *Singh.*; தென்னை - tennai, *Tam.*). Title from a spanish word macoco applied to a monkey's or other grotesque face; no connection with cocoa or coca. San. from (nála, san. tube + ka, san. water + ír, san. to throw); from water springing up when the top of a tender cocoanut is cut; the sanscrit has originated the persian (nargíl), which appears in cosmas indicopleustes as ἀργέλλιον; in the periplus it is said that ναύπλιος was exported in small quantity from the marts of azania, for ΝαΥΠλιος there has been suggested ΝαΡΓΙλιος from this sanscrit word. Mahr., &c., from sanscrit. Ar. from (shajar, ar. tree + nárikéla, san. cocoanut). Pers. from (darakht, pers. tree + nárikéla, san. cocoanut). Can. from (tenka, can. south + gida, can. plant). Singh. from (pol, singh. cocoanut + gaha, singh. plant). Tam. from (ten, tam. south); as coming from ceylon. San. also (trinarájá), meaning grass king [bamboo]; (dírghavriksha), meaning tall tree; (sadáp'hala), meaning always fruiting [neeroory]; (rasáyanataru), meaning juice + abode + tree; (lángalí), meaning resembling plough, ploughshare-like spathe [wild bachnaug]. Ar. also (shajarijauzulhind), meaning indian nut tree. Pers. also (darakhtibádinj), meaning cocoanut tree. Malay also (kálambar). Tel. also (kobbarikáyachettu), meaning dried cocoanut + tree; (errabondálakobbarichettu), meaning red + spathe + cocoanut tree; (guddzunárikadamu), meaning juice + cocoanut tree. Tam. also (tengu), meaning south tree; (édagam), meaning leaf tree, applied to both palmyra and cocoanut; (tázhai), meaning shady tree; (kéli), applied specially to red variety. Title otherwise Argell, Cocoanut palm, Coker nut, Coquer nut, Indian nut, King of grasses [bamboo], Naurail, Naurikelam, Southern tree. To be distinguished as above said from Theobroma cacao of tropical america, which gives the cocoa bean; and from Erythroxylon coca of peru which gives coca leaves. It has been assumed in these pages that it gave its name to Paundy, Chera and Congoo countries, and the Porny or Tamrapurny river through its product toddy; see those heads. Botanically Cocos nucifera, linn., palmaceæ [vricsham, 149]. Alias Palma cocos.—"*a*" Spathe axillary, cylindric, oblong, terete, bursting longitudinally; spadix erect, or nearly so, winding; male flowers numerous, approximate, sessile, above the female; calyx three-sepalled; leaflets minute, broadly cordate, fleshy; petals three; female flowers usually one, occasionally wanting, near the base of each ramification of the spadix; corolla six-petalled. Tall cylindrical tree rising to a height of from 30 to 100 feet with a diameter of about 1½ feet at the bottom and one foot at the top; the tree is surmounted by numerous wavy leaves and their foot-stalks are often called branches; the leaves are about 15 feet long; a number of narrow and long leaflets are ranged along the two sides; amidst these leaves hang the fruits. Specially abundant in ceylon, sumatra, java, the eastern archipelago, malabar and coromandel; along the western side of the bay of bengal it is found as high as calcutta; it will not grow in egypt; the native accounts say that the cocoanut was brought from ceylon to india.—"*b*" The cocoanut requires a tropical sun, a saline atmosphere, sandy porous soil, and abundance of fresh water; it is thus in a great measure a littoral plant, attaining earliest maturity, greatest size, and greatest fruitfulness close to the sea, although growing also and yielding fruit at a distance from it; in the former position, should the soil be loose and friable, though of the most meagre description, such as sea sand and shells, it grows luxuriantly without the aids of cultivation, manure, or the proximity of inhabited houses; when planted beyond 1 or 200 feet from the seashore, it neither grows well nor affords fruit, unless on rich soil, or in the proximity of dwellings; it is self-propagating; its keel-shaped nut, protected from the salt water by its tough and thick though light covering sails on the ocean to barren spots, where it germinates and causes even the smallest islets to become covered with clumps of the palm. When artificially cultivated, ground prepared four or five months before planting. Soils suitable for a cocoanut plantation are as follows, particularly observing that stony grounds, or those overlying rocky foundations, are to be avoided:—soils mixed with sand, either dark colored or river-washed [manal]; sand mixed with clay, ferruginous earth, or black mould [pasalay munn]; clayey soils where the under-strata consist of sand [calimunn]; sand and clay, even when mixed with gravel and pebbles [adaimunn]; seashore banks of backwaters, rivers, tanks, and paddy-fields; alluvium of rivers and backwaters, provided a yard and a half of land is to be generally seen above water-level [vandal munn]; marshy land even in brackish soils, but not where salt is formed

in crystals by evaporation [calar munn]; all level lands exposed to the sea-breeze where the soil is good, as the valleys between hills, tanks, and ditches which have been filled up; lastly, even the floors of ruined houses well worked up, and any places much frequented by cattle and human beings on account of the ashes and salts of ammonia from the urine, &c., deposited day by day in the soil. Ripe nuts carefully collected should alone be employed as seed, and for this purpose they are usually gathered from february to may; seed from very young or very old trees is avoided; after having been kept for a month to six weeks they are planted; this may take place in january to april, or again in august, provided the rains are not heavy; the seed-beds are dug 2 feet deep and the nuts planted 1 foot apart; the nuts are laid on their sides, leaving 2 inches of their surface exposed; ashes, or ashes and salt, are freely placed in the trenches, these acting both as a manure and as a preventative against insects; the seed-bed thus prepared is kept moist, but not soaked; the germinated seeds are transplanted when they are in their second to their sixth or even twelfth month; in damp localities the transplanting is done in the hot season, otherwise during the rains; the seedlings are now put out in the plantation, pits 12 yards apart having been prepared for them; in rich soils the pits may be small, but in poor soils 1 to 2 yards wide and 2 to 3 feet deep; in cold clay soils these pits are filled with sand; in marshy land, walls are constructed around them; ashes are often freely mixed with the prepared soil to be put into the pits, as this prevents attacks of beetles destructive to trees; cultivation of turmeric [country saffron], arrowroot, [malabar arrowroot], &c., in the pits along with the cocoanuts is beneficial; the soil round the seedlings is also often kept damp by a bed of leaves, particularly such as will not encourage, but rather check, the approach of ants into the prepared soil; if the soil be naturally poor, salt, ashes, paddy-straw, fish manure, goats dung, and dry manures are added during the first year. By the end of the first year the normal leaves will begin to form and at this stage the soil around the plants is dressed and ashes added; every succeeding year the ground is opened out and manured about the commencement of the rains, the soil being replaced and levelled about the close of the rains; by the fourth year the stem begins to appear and has about twelve leaves, it is distinctly visible by the fifth year, when the tree has about twenty-four leaves; the spathes commence to be formed by the sixth year, and plant is then 1 to 2 feet above the ground, but in exceptionally favorable climates and soils it may be three or four times that height; the first few spathes do not form flowers or fruits, but presently they begin to do so, and in three or four more years the tree is in full bearing; about six months after flowering the fruits set, and by the end of the year they are fully ripe; as a rule a cocoanut throws out a spathe and a leaf every month; each flowering spike yields from ten to twenty-five nuts; the produce of a tree in full health and properly tended may be from fifty to one hundred and even two hundred nuts a year, the yield depending greatly, on the suitability of the climate and soil for cocoanut cultivation; a safe average would be one hundred nuts a year to each tree in full bearing; in good situations, the fruit is gathered four or five times in the course of the year; fruit-bearing power is improved by taking toddy [q.v.] during first two years of its productiveness only. The tree continues bearing from seventy to eighty years; it is in its highest vigour from twenty-five to thirty years of age, but will attain the age of a hundred years. Cocoanut trees have great enemies in the shape of two beetles; one of these is a large curculio, rhynchophorus sach, called the red beetle, nearly as large as the english stag-beetle; the other is the oryctes rhinoceros, so called from its projecting horn; the red beetle is so called from the red mark on the upper part of its breast; its attacks are on the nut, but those of the rhinoceros beetle are on the terminal bud of the palm stem; when so injured the bud dies, and the crown of the leaves falling off, leave the cocoanut tree a mere bare stem; the same result occurs to other palms, the palmyra, the areca, in which the top bud, or cabbage [q.v.], as it is called, is destroyed. Cocoanut palms may be easily transplanted, and indeed often with advantage; some of the fibrous roots should be cut away, and manure, together with a little salt, placed in the pit in which it is intended to plant the tree.—"*c*" There is scarcely a part of the plant which cannot be applied to some use; the chief are the oil from the nuts, the nuts themselves, the fibres, the leaves, the stem, and the toddy; see below; the natives say that its uses are as numerous as the days of the year. Friar jordanus, the quilon bishop of the fourteenth century, has the following:—"first of these is a "certain tree called nargil, which tree every month in the year "sends out a beautiful frond like a date palm tree, which frond "or branch produces very large fruit, as a big as a man's head; "there often grow on one such stem thirty of those fruits as "big as I have said; and both flowers and fruits are produced "at the same time, beginning with the first month and going "up gradually to the twelfth, so that there are flowers and "fruit in eleven stages of growth to be seen together; a wonder! "and a thing which cannot be well understood without being "witnessed; from these branches and fruits is drawn a very "sweet water; the kernel at first is very tender and pleasant to "eat, afterwards it waxeth harder, and a milk is drawn from "it as good as milk of almonds, and when the kernel waxeth "harder still, an oil is made from it of great medicinal virtue; "and if any one careth not to have fruit, when the fruit-bearing "stem is one or two months old, he maketh a cut in it, and "bindeth a pot to this incision, and so the sap, which would "have been converted into fruit, drops in, and it is white like "milk and sweet like must, and maketh drunk like wine, so "that the natives do drink it for wine, and those who wish not "to drink it so, boil it down to one-third of its bulk, and then it "becometh thick like honey, and 'tis sweet and fit for making "preserves like honey, and the honeycomb; one branch gives "one potful in the day and one in the night on the average "throughout the year, thus five or six pots may be found hung "upon the same tree at once; with the leaves of this tree they "cover their houses during the rainy seasons; the fruit is that "which we called nuts of india; and from the rind of that fruit "is made the twine with which they stich their boats together "in those parts; there is another tree of a different species, "which like that gives all the year round a white liquor pleasant "to drink, which tree is called tari; there is also another "called belluri, giving a liquor of the same kind, but bitter." Ludovico di varthema says:—"ten useful things are derived "from this tree; the first utility is wood to burn; nuts to eat; "ropes for maritime navigation; thin stuffs, which, when they "are dyed, appear to be made of silk; charcoal in the greatest "perfection; wine; water; oil; and sugar; and with its leaves "which fall, that is, when a branch falls, they cover the houses; "and these ward off water for half a year."—"*d*" Several distinct varieties:—king cocoanut, very handsome, of a golden orange color, never attaining to more than fifteen or twenty feet high; dwarf cocoanut, about fifteen feet; bramin cocoanut producing large handsome nuts, deep golden color, esteemed for milk they contain, considered inferior as regards quality of kernel; and others [taur].——**(1)** The principal products of the cocoanut palm are for convenience shown separately below.——*Arrack* (سیندھی کی دارو - sendhíkídárú, Hind.; റാക്ക് - rákku, Mal.; தென்னங்கள்ளுச்சாராயம் - tennangalluççáráyam, Tam.). This distilled from cocoanut toddy after it has undergone fermentation and becomes sour [sharaub]. See sep. title.——*Branch* (മട്ടൽ - mattal, Mal.; தென்னமட்டை - tennamattai, Tam.). The thin branches form a substitute for tooth-brush, the ends being beaten so as to make them soft.——*Cabbage* (ناریل کا کرد - nárelkákrud, Hind.; കൂമ്പ് - kúmpu, Mal.; தென்னங்குருத்து - tennanguruttu, Tam.). The terminal bud at summit of tree. A tender vegetable when cooked; but cannot be obtained without destroying the tree.——*Cotton* (ناریل کی روئی - nárelkíruí, Hind.; టెంకాయచెట్టుపత్తి - tenkáyachettupatti, Tel.; അടിച്ചാര - atiççára, Mal.; தென்னம்பஞ்சு - tennambañju, Tam.). This is a soft, downy, light brown-colored substance, found on the outside of the lower part of the compound leaves of the cocoanut tree, where they spring from the stem and are partially covered with what is called punnauday [q.v.], or coarse vegetable matting [q.v.] of the tree. The cocoanut cotton is used for stopping blood in cases of wounds, bruises, leech-bites, &c.——*Fibre* (ناریل کا نار - nárelkánár, Hind.; ചെകരിനാർ - chekarinár, Mal.; தேங்காய்நார் - téngáynár, Tam.). The fibres covering the nut are when separated known as coir [q.v.]. The coir is separated from the shell by forcing the nut upon the point of an iron spike or sharp piece of hard wood, fixed firmly in the ground. In this manner the husks of 1,000 nuts can be separated from the shells by one man daily. These husks are subsequently thrown into salt or fresh water to soak, or buried in sand within the influence of sea-water for six or twelve months. The fibres are then separated from the cellular and other matter by beating with heavy mallets, and in some places by rubbing between the hands also. The various steps of this process differ in some particulars in different places. The coir from the Laccadives is the best. Though its quality varies according to the kind of nut from which it is taken, yet a great deal depends on the mode of its preparation. Good coir is known by its clear yellow color, the filaments being fine and even. The coir is manufactured into cordage of various sizes. It is well known to be one of the best materials for cables on account of its lightness, elasticity, and strength. It is also very durable and little affected by salt water. Numerous instances have been related of ships furnished with cables of this material, riding out a storm in security, while stronger made though less elastic ropes of other vessels have snapped in two, and when even chain cables have given way. Ropes made of it are used over the greater part of the country for almost all purposes. It is much used for stuffing mattresses, cushions, and saddles. The planks of the masulah [q.v.] boats are stitched together by thin ropes of this material. The loose fibre answers well as oakum, not being liable to rot. Of late years, it has been manufactured in England into a great many articles, such as brushes, brooms, matting, door-mats and netting for sheep folds, stair-carpets, table-mats, fancy baskets, and even bonnets and hats. For fibre generally, see Naur.——*Flower* (ناریل کا پھول - nárelkáphúl, Hind.; പൂക്കുല - púkkala, Mal.; தென்னம்பூ - tennambú, Tam.). The flowers contain a powerfully astringent property which is used medicinally. It is from the flower and spathes, before the flower has expanded, that the toddy or palm-wine is obtained.—

Gum (தென்னம்பிசின் - tennambisin, Tam.). Procured in very small quantities and not put to any use.——*Husk* (نارل کا پوست - nárelkápost, Hind.; ചകിരി - chekari, Mal.; கதம்பை - kathambai, Tam.). Tam. also (téngaymattai), meaning cocoanut + fruit + fibrous husk; (urimattai), meaning stripped + husk. The nuts are enclosed in a thick fibrous husk from which the coir of commerce is obtained by maceration and beating. The husk itself is employed as a scrubbing or polishing brush.——*Jaggery* (نارل کا گڑ - nárelkágur, Hind.; బెల్లం - bellam, Tel.; ചക്കര - chakkara, Mal.; தென்னம்வெல்லம் - tennamvellam, Tam.). This is yielded abundantly by cocoanut toddy. The sugar is obtained from the pure sweet toddy, drawn morning and evening, by simple evaporation over a slow fire. After being boiled for some time, the liquid becomes like honey [shahad]. By further boiling a coarse looking brown sugar [q.v.] is obtained, which is formed into cakes of various shapes and sizes. These are afterwards dried in smoke, and to preserve them from humidity they are further tied up in dried plantain [q.v.] leaves, each piece by itself. Particular care is taken that the vessels into which the toddy is collected for the above purpose are quite clean, so that it should be pure and free from acidity. It is considered a very valuable addition to choonam [q.v.] in building.——*Kernel* (نارل کا مغز - nárelkámaghz, Hind.; തേങ്ങ - ténna, Mal.; தேங்காய் - téngáy, Tam.). In its young and green state, the cocoanut contains a clear albuminous fluid, with a sweetish taste and a slight degree of astringency; see Water. But as the nut advances to its full maturity, the fluid disappears, and the hollow is filled by the almond-like dried albumen, which is the germinating organ. This pulp or kernel, when young, can be easily removed by a spoon. It is used grated in curries, or its milk is expressed from it. The white and solid albumen is often cut into ornaments of flowers and fruits, meant to represent the garlands given to visitors of distinction. They are worn by Tamul women at particular festivals. When cut in pieces and dried in the sun, the kernel is called coppray [q.v.], which forms an extensive article of commerce. From the coppray cocoanut oil is expressed; see Oil. The refuse oil-cake, ponnauk [q.v.], forms an excellent manure. Reduced to powder, kernel is used as a tooth powder, and also as antiseptic and disinfectant. Used also as masticatory [charvanam].——*Leaf* (نارل کا پتا - nárelkápattá, Hind.; തെങ്ങോല - tennóla, Mal.; தென்னோலை - tennólai, Tam.). The full-grown leaves which are pinnate are from 18–20 feet long. These, when split through the middle, are woven into mats [boriyah, chaupa] called cadjans [q.v.], and are employed for thatching bungalows. This thatching is preferred to straw, as lighter, more durable, and not attracting rats and reptiles. Cadjan roofs resist rain better than tiles, if the thatching is put on just before the monsoons. These mats are also used as screens and for sleeping upon. The leaves split into thin strips are used for writing on with a style. The leaves of the palmyra [q.v.] and talipot [q.v.] palms are however preferred for that purpose. The dried, old leaves, are used as torches. The large petioles, midribs of the compound leaves, serve as paddles for canoes or small rafts; yokes, fishing-rods, palings, stakes, wattling, brushes, combs, &c. The finer midribs of the leaflets form strong brooms for the garden or for the decks of ships, lasting longer than those formed of the culms of the common broom-grass [q.v.]. Aristida setacea, retz. The alkaline ash [sujjee khaur] obtained by burning worn-out cadjans is used for washing cloths [dhoby's earth].——*Marine soap* (نارل کا بیسن - nárelkábesan, Hind.; தேங்காயெண்ணெய்ச்சப்பு - téngáyenneyççappu, Tam.). Soap made with cocoanut-oil, useful for washing linen in salt water. The component parts are soda [sowdoo], cocoanut, lard, and water [sauboon].——*Matting* (پنارا - panára, Hind.; കോച്ചാട - kóççáta, Mal.; தென்னம்பன்னாடை - tennambannádai, Tam.). This is a web-like tissue, formed of strong fibres, holding a position similar to ochrea of the rhubarb tribe, or the pericladium of umbelliferous plants. It does not look unlike coarse, brown cloth, and is somewhat stiff. It is stripped off in large pieces by the shaunaur, who make it serve as a strainer for the toddy; the latter usually contains some impurities as well as insects, these being attracted to it by its sweetness. In some places it is woven into a coarse article of apparel used by fishermen. This punnauday or mattula is nothing more than the so-called cocoanut cotton in its maturity.——*Milk* (نارل کا دودھ - nárelkádúdh, Hind.; തേങ്ങാപ്പാൽ - ténnáppál, Mal.; தேங்காய்ப்பால் - téngáyppál, Tam.). The milk extracted by pressure from fresh kernel is used in curries and confectionery. When well boiled with rice [q.v.] and some of the kernel, the dish is known as cocoanut conjee [q.v.], and is given to the poor on particular occasions by native christians. The milk is oil in a transition state, or oil in a natural emulsion with vegetable albumen and water. After the hair has been cleansed by soap [sauboon], or other detergent material, this milk is poured on the head and rubbed well into the hair, some smearing even the body with it; it is then washed off by water. This application leaves the hair soft and silky. The milk has been employed in debility, incipient phthisis, and cachexia. In large doses it proves aperient, and in some cases actively purgative. It is one of the best recipes for freckles.——*Nut* (نارل - nárel, Hind.; തേങ്ങ - ténna, Mal.; தேங்காய் - téngáy, Tam.). The nut, when perfect, is about the size of a child's head, and is covered with a quantity of rough fibre, which, when separated and cleaned, is termed coir [q.v.]. Underneath the fibrous covering is the shell, and in it is contained the kernel and a milky fluid. The shell is very hard and susceptible of a fine polish. On festive occasions, old and well-seasoned nuts are fixed on stakes by the roadside or gates to serve as torches, for which they are well-fitted by the oil within and the fibrous husk without. The ripe nut is sometimes sawn through transversely, the kernel and shell removed, the two halves of the fibrous husk answering as above said as scrubbing crushes for floors and certain articles of furniture. Cocoanuts are hourly broken and offered to the native deities.——*Oil* (नारिकेलतैल - nárikélataila, San.; نارل کا تیل - nárelkátel, Hind.; کھوپرےکاتیل - khoprekátel, Dec.; ತೆಂಗಿನಾಯೆಣ್ಣೆ - tengináyanne, Can.; కొబ్బరినూనె - tenkáyanúne, Tel.; വെളിച്ചെണ്ണ - veliççenna, Mal.; தேங்காயெண்ணெய் - téngáyenney, Tam.). The freshly-prepared oil is nearly as fluid as water, of a pale-yellowish color, and almost inodorous but after a few days it acquires a peculiar rancid odour and taste; many attempts have been made to divest the oil of this smell, which renders it inapplicable for the perfumers' use, but only with partial success; the oil is solid at low temperatures; the best oil is exported from cochin and the neighbouring ports on the malabar coast. The oil is ordinarily obtained by expression from the dried kernel, chiefly by mill pressure. When the oil is required for edible purposes, the kernel of the fresh nut is taken, rasped and mixed with boiling water; this yields by pressure a milky fluid, which, on being boiled until all the water has evaporated, produces a clear edible oil; only just sufficient water to moisten the pulp is added, as a larger proportion prolongs the operation and deteriorates the product. Each tree is calculated to yield at least two and half gallons of oil per annum. Oil is much used for liniments and other external applications; employed as a local application in baldness and in loss of hair after fevers and debilitating diseases; used internally as a substitute for cod-liver oil, but in such cases it is not the commercial oil, but the oleine obtained by pressure, refined by being treated with alkalies [cauram] and then repeatedly washed with distilled water; its prolonged use internally is apt to disturb the digestive organs and induce diarrhœa. The oil is used for culinary purposes, especially in travancore [yennay]. In the more northern and eastern districts, it is chiefly employed for burning in lamps; it is used largely in england in the manufacture of candles and soap [sauboon]; for the candle maker the stearine is separated from the oleine, the former product being used for candles, for which it is most applicable on account of the high temperature required to fuse it; the oleine is then made over to the soap-boiler for conversion into soap; soap made from cocoanut oil is lighter than water, and consequently floats in that medium, whilst from its being the only soap which will dissolve freely in salt water it is usually called marine soap; in southern india the oil is made into soap by boiling with a proper proportion of dhobies' earth [q.v.], salt [ooppoo], saltpetre [shorah], quicklime [choonam] and water.——*Oil cake* (کھل - khal, Hind.; തേങ്ങാപ്പിണ്ണാക്ക് - ténnáppinnákku, Mal.; தேங்காய்ப்புண்ணாக்கு - téngáyppunnákku, Tam.). The refuse or oil-cake after extracting the oil from the kernel; it is considered an excellent food for fattening pigs and poultry; the best manure to young cocoanut trees.——*Porcupine wood* (نارل کا کھیر - nárelkákhair, Hind.; തെങ്ങിന്തായ്മരം - tennintáymaram, Mal.; தென்னஞ்சேகு - tennañjégu, Tam.). The porcupine wood of commerce is the produce of two palms, the palmyra and the cocoanut, chiefly however of the latter. The wood is either cut longitudinally or transversely. The pieces of speckled wood are very small.——*Root* (نارل کی جڑ - nárelkíjar, Hind.; തെങ്ങിൻവേർ - tenninvér, Mal.; தென்னம்வேர் - tennamvér, Tam.). The long fibrous roots are made use of as tooth-brushes. They contain an astringent principle. They are used also as brushes for painting with, and are sometimes chewed instead of the areca-nut [q.v.] with the leaf of the betel [q.v.]. A decoction [kwautam] of these roots with ginger [q.v.] and jaggery [q.v.] is considered highly efficacious in remittent and intermittent fevers. This decoction is also employed, mixed with the fresh oil, as a gargle in certain cases of sore mouth and throat.——*Sago* (തെങ്ങിന്നൂറ് - tenninnúru, Mal.; மாவு - mávu, Tam.). A farinaceous substance contained in the stem, a substitute for real sago [q.v.].——*Shell* (نارُوٹی - nárutí, Hind.; نارل کا چپا - nárelkáchuppá, Dec.; కొబ్బరిచిప్ప - tenkáyachippa, Tel.; ചിരട്ട - chiratta, Mal.; கொட்டாங்கச்சி - kottángaççi, Tam.). Tam. also (téngáyódu), meaning cocoanut shell. Within the fibrous husk of the nut is the shell, which is very brittle, though its structure somewhat fibrous. Cut in various ways it is formed into cups and drinking vessels, into pictures, funnels and lamps. It is susceptible of a high polish and admits of being turned in an agreeable manner. Those shells which are tolerably circular are used for the bodies of cups and vases, the feet and covers being made of wood and ivory [dant]. Common buttons are also made of the cocoanut shell and are considered better than those of horn, as they do not, like that material, absorb the

moisture, which causes horn [sing] buttons to swell and burst. The shell forms a valuable charcoal [adooppkary]. Yields also, when burnt, a black paint [rangh], which, in fine powder and mixed with choonam [q.v.], is used for coloring walls of houses. ——*Spathe* (نارل کا پالا - nárelkápálá, Hind.; കൊതുമ്പു - kotumpu, Mal.; பாளை - pálai, Tam.). The tough fibrous covering of the blossom. Cocoanut trees of vigorous growth send forth nine, ten, and even twelve clusters of buds every year, but those on which little care has been bestowed and which are consequently feeble, produce only four or five spathes. The old, tough spathe is converted by the Shaunaur into a coffer or light box, which serves to hold the knives and apparatus which he carries with him up the tree. It is also used for making sheathes for daggers and other knives. The natives soak it in water and prepare from it a kind of coarse, short cordage, with which they tie the thatch on their houses, &c.——*Stem* (نارل کی پیر - nárelkíper, Hind.; തെങ്ങിന്തടി - tennintati, Mal.; தென்னமரம் - tennamaram, Tam.). The stem during the period of most abundant bearing, considered to be between ten and thirty-five years' growth, is so soft and spongy at its centre that it is merely used for fences, water-pipes, &c.; but when old, and has ceased to bear fruit, it goes under the name of porcupine wood [q.v.], which, in Ceylon, is converted into chairs, ladies' work boxes, drums, rafters, small boats, spear-handles, and a variety of fancy articles. The living stem is said to possess such elasticity as to cause a cannon ball to rebound and be reflected from it.——*Tenneerk* (ഈർക്കൽ - írkkal, Mal.; தென்னீர்க்கு - tennírkku, Tam.). The woody ridge which runs along the back of the cocoanut leaf. With it natives make baskets for catching fish and brooms; they also use bundles of it as torches.——*Toddy* (نارېلی - nárelí, Hind.; نارل کی سیندی - nárelkísendí, Dec.; టెంకాయకల్లు - tenkáyakallu, Tel.; തെങ്ങിങ്കള്ള - tenninkallu, Mal.; தென்னங்கள்ளு - tennangallu, Tam.). This is obtained from the unexpanded spadix. This spadix, which is compound, is closely enveloped in a dense, tough spathe, which becomes quite ligneous when old. To procure the toddy, the spadix is bound firmly round with the young leaves, or strips of fibre from the under surface of the petiole. This is to prevent the spathe from opening. It is now struck all over with a small piece of wood or the handle of the toddy-knife. This operation of brushing is repeated morning and evening regularly for four, five, or six days. After this, an earthen vessel is tied on to the spadix, two or three inches of the latter having been previously cut off by a sharp knife. The toddy does not begin to exude until the second day and sometimes later. The fluid is then collected morning and evening, the extremity of the spadix being cut a little every day. This cutting is necessary, as the toddy, which is viscid, would otherwise concrete on the wound, and prevent further flow. Fruit is never looked for in the spadix which has been subjected to such treatment [shaunaun]. When taken early in the morning toddy has a pure sweet taste. It is slightly stimulant and gently aperient. Fermenting toddy is used by bakers as yeast, the bread made with it being remarkably light. Toddy is artificially brought to the vinous and acetous fermentations, and in the former state an alcoholic spirit is distilled from it which forms one of the arracks of commerce. One hundred gallons of toddy produce, by distillation, twenty-five gallons of arrack [q.v.]. Eight gallons of sweet toddy, boiled over a slow fire, yield two gallons of a luscious syrup, from which, by further boiling, a coarse brown sugar [q.v.] is produced, known in commerce as jaggery [q.v.]. Good vinegar [caudy] is made from cocoanut toddy, particularly at Mahé.——*Vinegar* (سرکہ - sirká, Hind.; കാടി - káti, Mal.; தென்னங்காடி - tennangádi, Tam.). This is the liquid left after toddy has passed through the vinous and acetous fermentations. The acetous fermentation is hastened by the husks of paddy [q.v.]. Used extensively in the making of pickles [caudy].——*Water* (نارل کا پانی - nárelkápání, Hind.; یلنیر کاپانی - elnírkápání, Dec.; ഇളനീർ - ilanír, Mal.; இளநீர் - ilanír, Tam.). Liquor amnii. This is a liquor contained within the kernel of the cocoanut while it is yet growing, and is refreshing and extremely pleasant to the taste, particularly in hot weather. It may be drunk to almost any quantity without injury, and is considered by the native doctors as a purifier of the blood. As the kernel approaches to maturity the liquor is diminished in quantity, becoming somewhat more sharp and a little aperient in its best state. It has the appearance of water with a small admixture of milk in it. It is used by bricklayers in preparing a fine whitewash. It is also employed in making the best and purest kind of castor [aumanac] oil, a certain portion of it being mixed with the water in which the seeds are boiled.——*Young leaf* (نارل کا گابا - nárelkágábá, Hind.; കുരുത്തോല - kuruttóla, Mal.; குருத்தோலை - kuruttólai, Tam.). The unexpanded leaves are used in making ornaments for decorating houses, arches, and places of worship on festive occasions [coondal]. These ornaments are in the forms of birds, crowns, flowers, &c. Mats of fine quality are made in the Laccadives from leaves just before they unfold, cut out of the heart of the tree; involving the loss of the bunch of fruit which accompanies. The leaves of the chowk or unproductive trees are chiefly employed. These mats are used by W. coast islanders for the sails of their smaller boats.——**(2)** *Double cocoanut* (جہازی نارل - jaházínárel, Hind.). Title from size and appearance. Hind. means ship cocoanut as coming from sea. Same as Sea-cocoanut.——*Maldive cocoanut* (مالدیپ کا نارل - máldíbkánárel, Hind.). Same as Sea-cocoanut.——*Sea-cocoanut* (अब्धिनारिकेल - abdhinárikéla, San.; نارجیل بحری - nárjílibahrí, Ar.; نارگیل بحری - nárgílibahrí, Pers.; دریا کا ناریل - daryákánáriyal, Hind.; دریا کا نارل - daryákánárel, Dec.; సముద్రపు టెంకాయ - samudrapu-tenkáya, Tel.; കടൽതെങ്ങ - kataltenna, Mal.; මුහුදුපොල් - múdupol, Singh.; கடற்தெங்கு - kadattengu, Tam.). Title from being often found floating in sea. San. from (abdhi, san. sea + nárikéla, san. cocoanut, cocos nucifera, linn.). Ar. from (nárjíl, ar. cocoanut + bahr, ar. sea). Hind. from (daryá, hind. sea + náriyal, hind. cocoanut). Tel. from (samudra, san. sea + tenkáya, tel. cocoanut, cocos nucifera, linn.). Singh. from (múdu, singh. sea + pol, singh. cocoanut). Tam. from (kadal, tam. sea + tengu, tam. cocoanut tree). Hind. also (jaházínárel), meaning ship + cocoanut. Dec. also (zahrínárel), meaning poison cocoanut; inner husk reckoned an antidote more efficacious than bezoar stone. Mal. also (akráritennu). Title otherwise Coco de mer, Double cocoanut, Jahauzinaurel, Maldive cocoanut, Zahrinaurel. Botanically Lodoicea seychellarum, labill., palmaceæ [vricsham, 149]. Alias Cocos maldivica. Very tall tree confined to the seychelles islands; fruit resembles two cocoanuts fastened together; it is convex on one side, and almost flat on the other, oblong, and somewhat pointed at both ends; shell dark-colored and contains kernel, not unlike that of ordinary cocoanut, but drier and more insipid; old belief was that fruit was produced on a palm [taur] growing below sea; fruit formerly in repute as a universal antidote, now only an object of curiosity; shells are made into drinking cups and scallops, used by devotees. No other common species here.

CODA (കോട - kóta, *Mal.*; கோட - kóda, *Tam.*). Crooked, west, border [code].——*Codacherry* (കോടശ്ശേരി - kótashshéri, Mal.). From (kóta, mal. west + chéri, mal. village). Mountain; Cochin state, Moocoondapooram tal.; lat. 10° 21′ to 10° 22′; long. 76° 23′ to 76° 28′; from Ernacolum N.N.E. 26 miles; from Irinyaulacode E. 10 miles; from the sea E. 16 miles. Mountainous tract, extending along the Chaulacoody river, containing timber. Feverish, inhabited by a few jungle people, 2,000 feet in elevation. Elephants [q.v.] and bison [gowr] abound.——*Codaga* (ಕೊಡಗ - kodaga, Can.). From (kuda, tam. west). The Coorg language or tribe [bhaushay, jauty].——*Codambaukam* (கோடம்பாக்கம் - kódambákkam, Tam. kódambákam *). From (kódam, tam. border + pákkam, tam. village). Village, Railway station; Chingleput dist., Sydapett tal.; pop. 2,206; acres 1,471; lat. 13° 03′; long. 80° 16′; height 28 feet; from Sydapett N. 1¾ miles; from the sea W. 4½ miles.——*Codavanaur* (கொடவனாறு - kodavanáru, Tam.). From (kudavu, tam. crookedness + áru, tam. river). River; Madura dist., Dindigul tal. Rises in the Bhootamullay hills. After fertilizing the tableland of Patchalore is joined four miles from its source by the Kullaur, from the Valrangatty hill. Thence it flows S.E. 3½ miles; E. by N. 2 miles, through a narrow wooded valley; is joined by the Collooparay stream running s. from the tableland of Periyaur; then flows in a winding course easterly, obstructed by rocks, and precipitates itself down the mountains to the N.E. of Manalore; thence skirting the hills a short distance through a deep forest, it enters the plains, and joined by a large rivulet from the Audalore hill four miles W. of Auttore, winds past the above place. Subsequently joins the Cauvery. To its junction with the Kullaur, it is known as the Oomaiyaur. In the rainy season it is very deep and rapid. Principal tributary is the Vagatchay [aroovy].——*Coday* (கோடை - kódai, Tam.). From (kodumai, tam. severity). Hot season. For seasons generally see caulam, caur, and caurtey.——*Codoo* (കൊടു - kotu, Mal.; கொடு - kódu, Tam.). Bent.——*Codoon* (கொடும் - kodum, Tam.). Rough; applied to Tamul, as opposed to the Shen.——*Codoonga cutty* (കൊടുങ്ങക്കത്തി - kotunnakkatti, Mal.). From (kodu, mal. bent + katti, mal. knife). The knife worn for defence by the Nayars of Malabar, fastened to a hook attached to a leathern girdle at the back of the body.——*Codvaul* (கொடுவாள் - koduvál, Tam.). From (kodu, tam. bent + vál, tam. a saw). Sickle [arivaul].——*Codyartanaur* (கொடியார்த்தனாறு - kodiyarttanáru, Tam.). From (kodiya, tam. cruel + arattan, tam. mars, the red planet + áru, tam. river). River; Madura district, Pulney talook. Tributary of the Tenaur. Rises in the Pulneys and flowing westerly receives, about four miles from its source, a large stream from the Cowdamully range on the right. Leaving the hills, and after a tortuous course of 25 miles during which it receives numerous large mountain streams it is joined at Mungaputty by the Cheggataur, after which it is known as the Tenaur.

CODACHAUDRY (ಕೊಡಚಾದ್ರಿ - kodachádri, *Can.*). From (kutacha, san. the tree, holarrhena antidysenterica, wallich + adri, san. hill). Mountain; South canara dist., Coondapore tal.; trig. station lat. 13° 51′ 24·48″ N.; long. 74° 54′ 32·56 E.; height 4,411 feet; from Coondapore N.E. 19 miles; from Mangalore N. 68 miles; from the sea E. 17 miles. Peak of the Western

ghauts [q.v.], forming boundary between Shimoga district of Mysore state, and Coondapore talook. A well-known landmark. On the Mysore side it rises 2,000 feet from the plateau. Towards the west it falls precipitously to the plain of Canara for 4,000 feet, and affords a view as far as the sea. Half-way up is a temple to Hully deva. It used to be known to mariners as False barcelore peak [barcelore].

CODAY (கொடை - kodai, *Tam.*). From (kodu, tam. to give). Charity. Prefix in place names, as in Codavausal, meaning charity + gateway.——*Codavausal* (குடவாசல் - kudavásal, Tam.). From (above + vásal, tam. entrance); charity place. Otherwise Codavoyil.—"*a*" Deputy tahsildarry, Tanjore district. Pay Rs. 70.—"*b*" Town, Deputy tahsildar's station; Tanjore dist., Nunnilam tal.; pop. 7,785; acres 1,706; lat. 10° 52′; long. 79° 31′; from Combaconam S.E. 9½ miles; from Madras S.S.W. 160 miles; from Mayavaram S.S.W. 20 miles; from Munnargoody N. 14 miles; from Negapatam W.N.W. 25 miles; from Nunnilam W. 8½ miles; from Tanjore E.N.E. 24 miles. Two old temples, Shiva and Vishnoo. Former cusbah [q.v.] of talook now merged in Nunnilam talook.

CODAY (குடை - kudai, *Tam.*). Umbrella. Made of screw-pine [q.v.], palmyra [q.v.], talipot [q.v.], areca [q.v.], &c. Plant first term, from form of leaves or use. Ex., where transl. is of second term:—Acacia tomentosa (kudaivél), acacia; Chloris barbata (kudaippul), grass; Corypha umbraculifera (kudaippanai), borassus flabelliformis. See gloss. paragraphs.——*Codapanay* (குடைப்பனை - kudaippanai, Tam.). Means umbrella palm; from use made of leaves. Same as Talipot.——*Coday cull* (ಕೊಡೆ ಕಲ್ಲು - kodekallu, Can.; குடைக்கல் - kudaikkal, Tam.). Vernacular means umbrella + stone. Ortholithic stone with a wide cross slab. The European dolmen [aursham, paundoo cull].

CODAYAUR (കോതയാർ - kótayár, *Mal.*). From (gódá, san. water-giving + áru, mal. river). River; Travancore state, Pudmanaubhapooram division, Cullcoolam and Vilvancode talooks. Rises in the Moolautchy mountains. Its course is at first south-westerly through a wild and wooded tract. It flows into the Tamrapurny, 14 miles from its mouth. Length, 20 miles. Its banks are precipitous and bed rocky. During the latter part of its course, the stream becomes more tranquil and for a short distance rafts may be floated upon it. Several waterfalls are formed by it during its course, two of which are upwards of 40 feet in height. One of the waterfalls is near Tirparapp, near which stands a very ancient Shiva temple. There was a project to divert the water of this river southwards, so as to irrigate Cullcoolam and Yerraneel talooks, but the scheme was subsequently given up [aroovy].

CODE (कोटि - kóti, *San.*; ಕೋಡು - kódu, *Can.*; കോട്ടു - kótu, *Mal.*; கோடு - kódu, *Tam.*). From (kut, san. to curve). Summit of a hill. Suffix in place names as Palcode, meaning milk + summit; Pullicode, meaning caste so called + summit [coda, gode].——*Codicondah* (కొడికొండ - kodikonda, Tel.). From (kodi, tel. peak + konda, tel. hill). Village; Anantapore dist., Hindoopore tal.; pop. 1,198; lat. 13° 50′; long. 77° 49′; from Anantapore S. 58 miles; from Hindoopore E. 19¼ miles. Formerly a flourishing head-quarter town. The ruins of the jail, talook cutcherry [q.v.], court, and judge's bungalow can still be seen. The small rock is fortified and has a needle-like projection on the summit forming a conspicuous landmark; whence the name. Is on right bank of Chitrauvaty.

CODY (ಬಳ್ಳಿ - balli, *Can.*; കൊടി - koti, *Mal.*; கொடி - kodi, *Tam.*). Flag, creeper.——**(1)** Plant first term often joining two genera. Ex., where transl. is of second term. Barleria prionitis (kodippasalai), basella; Cæsalpinia coriaria (kodivélam), acacia; Citrus medica, var. medica proper (kodimáthalai), punica granatum; Derris scandens (kodippungu), dalbergia lanceolaria; Ipomæa hederacea (kodikákkattán), clitoria ternatea; Pergularia minor (kodisambangi), michelia champaca; Sarcostemma brevistigma (kodikkalli), euphorbia tirucalli; Vitis vinifera (kodimundiri), anacardium occidentale. See gloss. paragraphs.——**(2)** Plant second term. Ex., where transl. is of first term:—Aristolochia indica (garudakkodi), braminy kite; Artabotrys odoratissimus (manóranjanballi), mind + to please; Barleria prionitis (vettilaikkodi), piper betel; Cardiospermum halicacabum (agniballi), fire; Cocculus villosus (káttukkodi), wild; Convolvulus sp. (gauriballi), the goddess; Dæmia extensa (ugurusuttuballi), whitlow; Hemidesmus indicus (párgodi), milk; Heptapleurum venulosum (pisukkodi), unctuous; Memecylon amplexicaule (ollekodi), good; Methonica superba (shivaraktiballi), shiva red; Mucuna pruriens (náyisonaguballi), dog + writhing; Piper betel (ilaikkodi), leaf; Pothos scandens (adikebiluballi), areca nut + hedge; Pterolobium indicum (bádabakkaballi), fence + lean; Rubia cordifolia (shávalgodi), cock; Sarcostemma brevistigma (sómaballi), moon; Smilax pseudochina (káttukkodi), wild; Trichosanthes cucumerina (kádáduballi), jungle + sheep; Vitis indica (sambáraballi), spicery; Vitis quadrangularis (sanduballi), joint. See gloss. paragraphs.——**(3)** *Codicaul* (கொடிக்கால் - kodikkál, Tam.). From (above + kál, tam. post). A betel-vine garden.——*Codicaul vellaulan* (கொடிக்கால்வெள்ளாளன் - kodikkálvellálan, Tam.). A class of Vellaular who cultivate betel [jauty].——*Codishaunty* (കൊടിശാന്തി - kotishánti, Mal.). From (koti, mal. flag + shánti, mal. priest). The highest priest in a temple.

COFFEE (बूंद - búnda, *Mahr.*; شجرةالقهوة - shajaratulkahwah, *Ar.*; درخت قهوه - darakhtikahwah, *Pers.*; بن کا جھاڑ - bunkájhár, *Hind.* and *Dec.*; کوپی - kopi, *Malay*; ಕಾಪಿಗಿಡ - kápigida, *Can.*; ಕಾಪಿಗಿಡ - kápigida, *Too.*; కాపిచెట్టు - kápichettu, *Tel.*; കാപ്പി - káppi, *Mal.*; කෝපි - kópi, *Singh.*; காப்பிச்செடி - káppiççedi, *Tam.*). Title from arabic through malay. Ar. from (shajar, ar. tree + kahwah, ar. coffee). Pers. from (darakht, pers. tree, &c.). Hind. from (bun, ar. coffee berry + jhár, hind. tree). Can., &c., from arabic. Hind. also (bunkafí), meaning coffee seed. Malay also (kávàh). Can. also (bondagida); (búnugida), meaning coffee plant. Mal. also (bunnu). Title otherwise Arabian coffee. Botanically Coffea arabica, linn., rubiaceæ [vricsham, 71]. Alias Coffea laurifolia, vulgaris. Large erect bush, quite smooth in every part; leaves oblong-lanceolate, acuminate, shining on the upper side, wavy, deep green above, paler below; stipules subulate, undivided; peduncles axillary, short, clustered; corolla white, tubular, sweet-scented, with a spreading five-cleft limb; anthers protruded; berries oval, deep purple, succulent, two-seeded. Native of africa of the region between the 10th and 15th degrees of north latitude, but thrives anywhere in a suitable soil and locality within the tropics; it was in use in persia a.d. 875, and avicenna fully describes it circa a.d. 1000; introduced here, and now very common in a cultivated state on the west side of the presidency, and run wild in some forests. The young fruit, which is red on ripening, is about the size of a small cherry, each containing two seeds, closely united; these, on being separated, constitute the coffee berries of commerce, and on being ground and roasted, the coffee powder of european shops. The value of commercial coffee depends upon the texture and form of the berry, the color and flavor; coffee powder contains in the raw state, about 0·75 per cent. of caffeine, reduced to 0·25 in the process of roasting, 10 to 13 per cent. of fat, 13 of nitrogenous substances, and between 6 and 7 of salts, potassium, magnesium and calcium in combination with phosphoric acid and chlorine. The plant was brought across the red sea from abyssinia and cultivated on the mountains of arabia as late as about the year 1450, less than half a century before the discovery of america and the passage to india by the cape; its product was introduced into europe at venice about 1615, at marseilles 1641, london 1652, and paris 1657; the plant was introduced into southern india more than two centuries ago by a mahomedan pilgrim, bababooden [q.v.]; this man, on his return from a pilgrimage to mecca, brought a few berries with him, and taking up his abode on the hills in western mysore, which still bear his name, planted them near his hut; from the trees thus raised by the fakeer bababooden, most of those cultivated in native gardens in mysore and coorg have been derived; for a long time the culture was entirely in the hands of natives, but about fifty years ago it began to attract the attention of europeans; since that time the industry has been taken up by european capitalists. The elevation at which the plant can be most profitably cultivated in southern india varies from 2,000 to 4,000 feet above sea-level, and the average annual rainfall of the coffee zone is from 80 to 100 inches; but the greater portion of this occurs during the south-west monsoon, so that in most districts there is a long dry season; the chief coffee districts here are mysore, coorg, wynaud, the neilgherries, and travancore, all sections of the western ghaut [q.v.] range, but there are also numerous estates on other isolated hill ranges, such as the shevaroys, anamullays, &c. For cultivation ground prepared in south from caurtigay or november to auny or june, on w. coast from macaram or january to maidom or april; the jungle is felled and burnt and pits 18 inches cube made 5-6 feet apart; seed sown in south in tye or january, on w. coast in toolaum [mausam] or october and vrishchicam or november; in nursery beds the seed being laid 2 or 3 inches apart; after transplanting to pits land is kept free of weed; failure in first planting is supplied; the plants when they have attained the height of 2-3 feet are topped to promote lateral growth; when the tree is bearing pruning is required every year to remove old wood; full grown crop shows bunches of red berries at each joint that is about 4 inches apart along the primaries; the trees begin to bear during the third year; ripe berries are picked by hand; they are then passed through a pulper to remove the pulp; the seeds are then washed and dried; the seeds are sent to market about four weeks after being picked. The crops have suffered much of late years from a disease called the coffee blight, which is caused by a fungus, hemileia vastatrix, spreading over the leaves, whose functions it completely destroys, resulting in a failure of the coffee crops; no cure has as yet been discovered. Medicinally the effect of the coffee alkaloid is to stimulate the nervous system; it increases the action of the heart, kidneys and skin, its diaphoretic property aiding its generally stimulating effects in rendering its use desirable in hot climates and hot weather [char, sharb]; it has the power of removing drowsiness and of retarding the access of sleep for some hours, and is prescribed in various derangements of the viscera and in nervous headaches; a strong decoction of coffee is capable of arresting diarrhœa; it is given to disguise the taste of nauseous medicines,

particularly quinine [koinah], senna [q v.], and epsom salts [bhaidy ooppoo]; a strong decoction allays the severity of a paroxysm of spasmodic asthma; in poisoning by opium [aphainam] or other narcotic poisons, a strong infusion without milk or sugar is an effectual stimulant; it is also advantageously given in the depression after drunkenness. The decoction of coffee berries is used as an ordinary drink like tea [q.v.] all over the world. Wood white, moderately hard, close-grained; pores very fine and extremely fine; medullary rays fine, numerous. Cultivated species other than the arabica are Wightiana, w. & a., in arid places from coorg to travancore, fruit much broader than long, with a deep furrow; and Travancorensis, w. and a., occurring in travancore, fruit broader than long. Liberian coffee is coffea liberica, hiern., natives of west tropical africa, taller and stronger than arabica, yielding a larger leaf and berry.

COILCOONTLA (కోయిలకుంట్ల - kóyilakuntla, *Tel.* koilkuntla*). From (koyila, tel. temple + kunta, tel. pond).——(1) Talook; Kurnool district. Tahsildar's pay Rs. 225. Area 572 square miles. Population 86,544. Language Teloogoo. S. of district. Bounded N. by Nundiaul talook, E. by Sirwail talook, S. by Jummalmudoogoo talook of Cuddapah district, and Tadpatry talook of Anantapore district and W. by Putticondah talook. Bunganapully jagheer is at W. end. The western and southern portions are hilly and gravelly, the hills being flat-topped as at Ooppalapaud and Aulvacondah. The eastern half of the talook and the plains about the Coondair are of black cotton soil [regar]. The chief products are white cholum [q.v.], cotton [q.v.], indigo [q.v.], bengal gram [q.v.], and wheat [geung]. Indigo manufacture is the principal industry, cotton and indigo the chief exports. Fine limestone [choonam cull] is procured in the Coondair. Rivers are the Coondair, and its tributaries, Palair, Gollalair, and Zoorrair. Owk timma rauz tank and Timmanayanipett tank are reservoirs formed by damming up main drainage channels of a watershed at the points of their emergence from a hill gorge. Places of archæological interest:—Aulvacondah, Calgotla, Coilcoontla, Colimigoondla, Condaupooram, Cumpamulla, Dornipaud, Goolladoorty, Goondoopaupaula, Govindinney, Injaid, Moodigode, Mookmulla, Nandavaram, Nitchenametla, Owk, Persomala, Sowdardinney, Toommalpenta, Vullampaud. Principal trig. station:—Ramavaram. The leading places, &c., in the talook are the following.——*Aulvacondah* (ఆలవకొండ - álavakonda, Tel.). From (áluvu, tel. sweet potato, ipomœa batatas, lam. + konda, tel. hill). Village; pop. 1,677; acres 8,722; lat. 15° 08′; long. 78° 17′; from Coilcoontla S.W. 8 miles; from Kurnool S.S.E. 49 miles. Veerabhadran temple.——*Bodamanore* (బోదమ్మనూరు - bódammanúru, Tel.). From (bódamma, tel. proper name + úru, tel. village). Village; pop. 1,286; acres 3,802; lat. 15° 04′; long. 78° 27′; from Coilcoontla S.S.E. 13 miles; from Kurnool S.S.E. 57 miles. Formerly held by Poligars of Hanoomatgoondam family. After division in seventeenth century, they held this village and under Aurungzeeb obtained four additional. Latter resumed in 1729 by Nawab of Cuddapah. In 1778, Hyder expelled Poligar, Yerra timma reddy, who soon after died leaving no heirs. His widow, Bootchammah, was restored by the Nizam's officers in 1792; but she was deprived of the village in 1796, and received some small inams in land for her maintenance. Her adopted son was held to have no right to the inheritance. ——*Coilcoontla* (కోయిలకుంట్ల - kóyilakuntla, Tel.). See below. ——*Colimigoondla* (కొలిమిగుండ్ల - kolimigundla, Tel.). From (kolimi, tel. furnace + gundu, tel. rock). Village; pop. 871; acres 2,604; lat. 15° 05′; long. 78° 09′; from Coilcoontla S.W. 18 miles; from Kurnool S. 52 miles. Several temples. Five by Chola kings. Four deserted. Annual festival in Narsimhasawmy temple on 14th Veishaukham [mausam] or may.——*Coondair* (కుందేరు - kundéru, Tel.). See sep. title.——*Dornipaud* (దోర్నిపాడు - dórnipádu, Tel.). From (tórana, san. gate + pádu, tel. village). Village; pop. 1,810; acres 7,839; lat. 15° 12′; long. 78° 30′; from Coilcoontla S.E. 9 miles; from Kurnool S.S.E. 50 miles. Inscription.——*Gollalair* (గొల్లేరు - gollaléru, Tel.). From (golla, tel. a shepherd + éru, tel. river). River. A rivulet rises on Ooppalapaud plateau to E. of Booragala; a masonry dam sends water to Owk tank. The surplus joins Palair 3 miles E. of Owk [aroovy].——*Goolladoorty* (గుళ్ళదుర్తి - gulladurti, Tel.). From (gudi, tel. temple + durti, tel. village). Village; pop. 1,701; acres 5,453; lat. 15° 10′; long. 78° 24′; from Coilcoontla S. 5 miles; from Kurnool S.S.E. 50 miles. Residence of branch of Nossam poligar family of Narsimha reddy.——*Nelabilam* (నేలబిలం - nélabilamu, Tel.). From (néla, tel. ground + bila, san. cave). A place of pilgrimage; from Coilcoontla south-west 20 miles. Subterranean cavern 170 feet deep. A perennial spring flows into bowels of the earth. A built staircase to bottom. ¼ mile E. of Bandarlapulley.——*Nossam* (నొస్సం - nósam, Tel.). See sep. title.——*Ooppalapaud* (ఉప్పలపాడు - uppalapádu, Tel.). See sep. title.——*Owk* (ఔక - auka, Tel.). See sep. title.——*Palair* (పాలేరు - páléru, Tel.). See sep. title.——*Ramavaram* (రామవరము - rámavaramu, Tel.). From (ráma, san. the god + pura, san. town). Village; pop. 532; acres 2,471; lat. 15° 17′; long. 78° 10′; from Coilcoontla W.N.W. 13 miles; from Kurnool S.S.E. 38 miles. Trig. station in lat. 15° 17′; 32″94″; long. 78° 09′ 07·61″; height 1,714 feet; from Coilcoontla W.N.W. 15 miles; from Ramavaram N.W. 1½ miles.——*Sangaputnam* (సంగపట్నము - sangapatnamu, Tel.). See sep. title.——*Sowdardinney* (సవుదరదిన్నె - savudaradinne, Tel.). From (sódarudu, tel. brother + dinne, tel. mound). Village; pop. 921; acres 2,672; lat. 15° 14′; long. 78° 21′; from Coilcoontla W. 1 mile; from Kurnool S.S.E. 44 miles. Temple of Janardanasawmy. ——*Timmanayanipett* (తిమ్మానాయనిపేట - timmánáyanipéta, Tel.). From (timmánáyadu, tel. proper name + péta, tel. suburb). Village; pop. 1,458; acres 512; lat. 15° 01′; long. 78° 12′; from Coilcoontla south-west 18 miles; from Kurnool S S.E. 56 miles. Very large tank. Weekly market on Fridays.——*Yerragoody* (ఎర్రగుడి - erragudi, Tel.). From (erra, tel. red + gudi, tel. temple). Village; pop. 730; acres 4,055; lat. 14° 59′; long. 78° 16′; from Coilcoontla south-west 18 miles; from Kurnool S.S.E. 59 miles. Best tobacco [pogauk] grown in the Presidency. ——*Yerramala* (ఎఱ్ఱమల - erramala, Tel.). See sep. title.——*Zoorrair* (జుఱ్ఱేరు - dzurréru, Tel.). See sep. title.——(2) Town, Talook head-quarters; Kurnool dist., Coilcoontla tal.; pop. 3,962; acres 5,172; lat. 15° 14′; long. 78° 22′; from Cumbum W.S.W. 57 miles; from Kurnool S.S.E. 44 miles; from Madras N.W. 198 miles; from Nundiaul S.S.W. 21 miles; from Pyaupaly E. 38 miles. Old fortified town. In eighteenth century given in jagheer to relatives of Cuddapah nawaub. Subsequently captured by the Nawab of Bunganapully and recaptured by Sarfrauz khan, brother of the Cuddapah nawaub. Again beseiged about 1760 A.D., the Poligar having rebelled against the Cuddapah nawaub. Weekly market on Fridays. Grand annual festival in Rungaswamy temple on 14th Veishaukham [mausam] or may.

COIMBATORE * (கோயமுத்தூர் - kóyamuttúr, *Tam.*). From (kóni, tam. the local goddess so called + muttu, tam. pearl + úr, tam. village).——(1) Revenue district; situated inland; between 10° 14′ and 12° 19′ N. lat., and between 76° 35′ and 78° 14′ E. long.; bounded N. by Mysore state, E. by Salem and Trichinopoly districts, S. by Madura and Travancore state, W. by the Neilgherries, Malabar district and Cochin state; square miles 7,860; pop. 2,004,839; lang. Tamul and Canarese. Contains rivers Amravatty, Bhawauny, Cauvery, Noyil; mountains Anamullays, Biligherry Rungam hills; sanitaria none. The whole area of the district is represented by the following sub-areas:—Bhawauny talook, Caroor talook, Coimbatore talook, Collegaul talook, Dharaupooram talook, Erode talook, Oodamalpett talook, Pollachy talook, Pulladam talook, and Suttimungalam talook. For general administrative purposes the district is distributed between the following revenue and magisterial officers who have their head-quarters at the places shown. The pay set opposite the subordinate officers gives the grade of the corresponding charge:—Collector, Coimbatore. Sub-collector, Erode, in charge of Erode, Dharaupooram, Caroor and Bhawauny talooks. Head assistant collector, Pollachy, in charge of Pollachy, Oodamalpett and Pulladam. General deputy collector, Suttimungalam, in charge of Suttimungalam and Collegaul. Tahsildars:—Bhawauny, Rs. 150; Caroor, Rs. 175; Coimbatore, Rs. 200; Collegaul—this Tahsildar is also the District moonsif of Collegaul and his consolidated pay is Rs. 250; Dharaupooram, Rs. 200; Erode, Rs. 225; Oodamalpett, Rs. 175; Pollachy, Rs. 175; Pulladam, Rs. 225; and Suttimungalam, Rs. 200. Deputy tahsildars:—Aravacoorchy, Rs. 70, range situated in the south of Caroor talook; Avanashy, Rs. 70, range situated in the north of the Pulladam talook; Caungyam, Rs. 70, range situated in the north of Dharaupooram talook; Coimbatore, Rs. 70, range situated in the south-east of the Coimbatore talook; Mettapolliem, Rs. 70, range situated in the north of the Coimbatore talook; Peroondoray, Rs. 70, range situated in the south-west of the Erode talook; Taulavaudy, Rs. 70, range situated in the north-west of the Suttimungalam talook. Similarly judicial officers:—Judge, Coimbatore; District moonsiffs, Coimbatore with jurisdiction extending over Coimbatore talook and that portion of Pulladam talook lying to the south of the Noyil river, Erode with jurisdiction extending over Erode, Bhawauny, Suttimungalam and that portion of the Pulladam talook to the north of Noyil river, Oodamalpett with jurisdiction extending over Oodamalpett, Pollachy, and part of Dharaupooram talook, Caroor with jurisdiction extending over Caroor and part of Dharaupooram talook, Collegaul with jurisdiction extending over Collegaul talook. Similarly Public works officers:—District engineer, Coimbatore. Contains Registration sub-districts:—Aravacoorchy, Avanashy, Bhawauny, Caroor, Caungyam, Codoomoody, Coimbatore, Collegaul, Dharaupooram, Erode, Ganapaty, Goodalore, Gopichettipolliem, Mettapolliem, Oodamalpett, Peroondoray, Pollachy, Pulladam, Shoolore, Suttimungalam, Taulavaudy. Contains Forest ranges:—Bhawauny, Bolamputty, Collegaul, Jadagam, Mettapolliem, Oodamalpett, Pollachy, Ponautchy, Pulladam, Sholacaray, Suttimungalam, Toonacadav. Contains Municipalities Caroor, Coimbatore, Erode. Contains District board and Talook boards, Coimbatore talook board embracing Coimbatore talook, Suttimungalam talook board embracing Suttimungalam talook, Collegaul talook board embracing Collegaul talook, Erode talook board embracing Erode, Bhawauny, Caroor and Dharaupooram talooks, Pollachy talook board embracing Pollachy, Oodamalpett and Pulladam talooks. The following general references should be made to the preceding volumes:—general geography, I (1) to (29); general ethnology, I (29) to (109); general history, I (110) to (188);

physical geography, II, 1; meteorology, II, 3; geology, II, 8; fauna, II, 21; flora, II, 26; mineralogy, II, 29. The following references in the preceding volumes will furnish details special to the district:—latitudes and longitudes, II, 47; particulars about towns, II, 48; comparative population, II, 172; location of revenue officers, II, 381; revenue settlement of the district, II, 408; registrars' and sub-registrars' stations, II, 420; rain-guage stations, II, 428; police divisions, II, 431; maps published, II, 436; survey topographical lists, II, 443; hospitals and dispensaries, II, 447; head-quarter stations of gazetted officers, II, 461; incidence of taxation, II, 463; weights and measures of the district, II, 509; zemindarries, II, 296. A special gazetteer account of the whole district is given at II, 71. For the detailed topography of the district, reference should be made to the talook notices in the present volume, viz.:—Bhawauny, Caroor, Coimbatore, Collegaul, Dharaupooram, Erode, Oodamalpett, Pollachy, Pulladam, Suttimungalam.——**(2)** Talook, Coimbatore district. Tahsildar's pay Rs. 200. Area 804 square miles. Unsurveyed tracts are 56 square miles in addition. Population 260,811. Languages, Tamul and Canarese. Includes lower slopes of Neilgherries. Situated in W. of district, at foot of Neilgherries which bound it on W. and N.; the Palghaut gap is close to S.W. extremity; Malabar and Cochin bound it on W. and S.; Pollachy and Pulladam talooks bound it on S. and E. and Suttimungalam on N.E. A large open plateau of considerable elevation sloping away from foot of Neilgherries to the south-east. Lambton peak within 6 miles of Coimbatore town. To W. Velliyangherry hills, within 15 miles of Coimbatore town form a defence against S.W. monsoon [q.v.]. Further to S.W. is Palghaut gap, through which in the monsoon rush masses of vapour. On the other side of the narrow gap rise abruptly the spurs of the Anamullays known as the Cootchimullay range, while the peaks of the Anamullays bound the landscape in the south. Traversed by the Bhawauny in the north and the Noyil in the south. The talook itself is no way picturesque. Forests were considerable, but denudation has taken place in Bolamputty valley. Climate pleasant. Elevation is in itself considerable, but chief salubrity is due to S.W. monsoon, through Palghaut gap from end of May. Rainfall is scanty. Soils are derived from the disintegration of the gneiss rocks, interpenetrated with lime [choonam], and in parts enriched by the organic vegetable soils [munn] from the hills. Kankar [q.v.] is abundant, and crystalline limestone [choonam cull] is found. Rock is very near the surface everywhere, and trees are stunted and poor. There are some tracts of black cotton soil [regar] and red loam. On dry black soil two crops are usually raised; cholum [q.v.] in the south-west and cotton [q.v.] in the north-east monsoon. In garden lands the speciality is wheat [geung], largely grown from October to February. Wet cultivation is excellent; giving crops of paddy [q.v.], sugar-cane [q.v.], betel [q.v.], coconnuts [q.v.], plantains [q.v.], &c. Sugar-boiling is carried on. Paper-making has died out. Tanning [chamrah] is well represented. Weaving is represented by the commonest manufactures. Silk [puttoo] has been attempted, but was a failure commercially, and the worms are liable to suffer from the heat in the summer. Chief exports are wheat, chillies [q.v.], tobacco [pogauk], jaggery [q.v.], and cotton; the first to the Neilgherries, the next three to the West coast, and the last to Bombay. The Noyil and its tributaries supply water by anicuts to channels and tanks. The Kullaur has no anicuts, but earth dams supply two channels. There are besides eleven rain-fed tanks and five jungle streams. Camping grounds:—Coimbatore, Pothanore and Mathoocaray. Proprietary estates:—Caroonjaumy gowndenpolliem, Meilairipolliem, Naickampolliem, Nauchipolliem, Paulatooray, Tumbagowndenpolliem, Vellimullayputnam, all held by one person paying Rs. 1,182 peshcush. Places of archæological interest:—Annoor, Bolamputty, Cauramaday, Circarshaumacoolam, Coimbatore, Covilpolliem, Cullmaday, Mettapolliem, Moottconampolliem, Panapolliem, Peroor, Vellalore. Principal trig. stations:—Attimullay, Coimbatore. The following are the leading places, &c., in the talook.——*Agrahaura vellalore* (அக்கிரகாரவெள்ளளூர் - akkiragáravellalúr, Tam.). From (akkiragáram, tam. bramin village + vellam, tam. flood + úr, tam. village). Village; pop. 5,259; acres 3,992; lat. 10° 59′; long. 77° 04′; from Coimbatore S.E. 5 miles. Also called Circar agrahaura vellalore. On Noyil near Pothanore. Wet lands are of high value. ——*Annoor* (அன்னூர் - annúr, Tam.). From (anu, tam. smallness + úr, tam. village). Village; pop. 2,112; acres 3,194; lat. 11° 14′; long. 77° 09′; from Coimbatore N. 19 miles. On road to Suttimungalam. Ancient Shiva temple with inscriptions. Once fortified. Veeraculls [q.v.]. Weekly market.——*Attimullay* (அத்திமலை - attimalai, Tam.). From (atti, tam. fig tree, ficus racemosa, linn. + malai, tam. mountain). Trig. station; lat. 10° 55′ 10·48″; long. 76° 56′ 50·33″; height 2,562 feet; from Coimbatore S.S.W. 6½ miles; from Yettimaday N. 2¼ miles.——*Bolamputty* (போளுவாம்பட்டி - póluvámbatti, Tam.). See sep. title.——*Cauramaday* (காரமடை - káramadai, Tam. karaimadai *). From (kárai, tam. canthium parviflorum, lamk. + madai, tam. sluice). Village, Railway station; pop. 6,208; acres 2,992; lat. 11° 14′; long. 77° 00′; height 1,207 feet; from Coimbatore N. 16½ miles. Old Vishnoo temple. Large circles of rough boulders. Annual car festival and cattle fair.——*Chettippolliem* (செட்டிப்பாளையம் - shettippálaiyam, Tam.). From (shetti, tam. one of that caste + pálaiyam, tam. fortified village). Village; pop. 3,173; acres 5,920; lat. 10° 55′; long. 77° 05′; from Coimbatore S.E. 7½ miles. On route to Dindigul.——*Coimbatore* (கோயமுத்தூர் - kóyamuttúr, Tam.). See below.——*Coordoomullay* (குறடுமலை - kuradumalai, Tam.). From (kuradu, tam. hook + malai, tam. mountain). Sanscrit name (agastyagiri), meaning agastyan's hill. Hill; lat. 11° 07′; long. 76° 56′; height 5,033 feet; from Coimbatore N.W. 9 miles.——*Goodalore* (கூடலூர் - kúdalúr, Tam. gúdalúr *). From (kúdal, tam. junction + úr, tam. village). Village, Railway station; pop. 2,299; acres 4,669; lat. 11° 09′; long. 76° 59′; height 1,430 feet; from Coimbatore N. 10½ miles.——*Kullaur* (கல்லாறு - kalláru, Tam.). See sep. title.——*Maroothamullay* (மருதமலை - maruthamalai, Tam.). From (marutham, tam. terminalia tomentosa, bedd. + malai, tam. mountain). Hill, Place of pilgrimage; from Coimbatore N.W. 11 miles.——*Mathoocaray* (மதுக்கரை - mathukkarai, Tam. madukarai *). From (madhu, san. honey + karai, tam. border). Village, Railway station; pop. 2,030; acres 7,001; lat. 10° 54′; long. 76° 59′; height 1,117 feet; from Coimbatore S. 6½ miles. Weekly market.——*Meilairipolliem* (மைலேரிப்பாளையம் - mailérippálaiyam, Tam.). From (mayiléri, tam. skanda, the peacock rider + pálaiyam, tam. fortified village). Shrotriem village; pop. 1,716; acres 2,038; lat. 10° 52′; long. 77° 04′; from Coimbatore S.S.E. 9¾ miles. A salubrious climate.——*Mettapolliem* (மேட்டுப்பாளையம் - méttuppálaiyam, Tam.). See sep. title.——*Noyil* (நொய்யல் - noyyal, Tam.). See sep. title.——*Peroor* (பேரூர் - pérúr, Tam.). See sep. title.——*Poothoor* (புதூர் - puthúr, Tam.). From (puthu, tam. new + úr, tam. village). Village; pop. 2,004; acres 2,122; lat. 10° 52′; long. 76° 57′; from Coimbatore S.W. 10 miles.——*Pothanore* (போத்தனூர் - póttanúr, Tam.). See sep. title.——*Shingallore* (சிங்காநல்லூர் - shingánallúr, Tam. singánallúr *). From (shingamma, tam. proper name + nal, tam. good + úr, tam. village); originally a bramin inam granted by shingammaul. Sanscrit name (simhapurí), meaning lion + town. Village, Railway station; pop. 8,719; acres 6,100; lat. 11° 00′; long. 77° 06′; height 1,242 feet; from Coimbatore E. 5¼ miles. Once entirely inam now ryotwarry. Town and fort destroyed by Mahrattas. Recovered under British rule. Now a busy place. ——*Shirmoogay* (சிறுமுகை - shirumugai, Tam.). From (shiru, tam. small + mugai, tam. crowd). Village; pop. 1,318; acres 964; lat. 11° 20′; long. 77° 03′; from Coimbatore N. 23 miles.——*Toodiyalore* (துடியலூர் - tudiyalúr, * Tam.). From (tudi, tam. dance of the seven virgin goddesses + úr, tam. village). Village, Railway station; pop. 1,254; acres 1,483; lat. 11° 05′; long. 76° 59′; height 1,470 feet; from Coimbatore N. 5¾ miles. Large market place.——*Tumbagowndenpolliem* (தம்பக்கவுண்டம்பாளையம் - tambakkavundambálaiyam, Tam.). Means Tumba gownden's fortified village. Zemindarry, Village; pop. 583; acres 701; lat. of village 10° 52′; long. 77° 01′; from Coimbatore S. 9 miles. Shrotriem [q.v.] village. ——*Vellalore* (வெள்ளளூர் - vellalúr, Tam.). See sep. title. ——*Velliyangherry* (வெள்ளியங்கிரி - velliyangiri,* Tam.). From (velli, tam. silver + giri, san. mountain); after keilausam, the silver mountain of shiva. Hill; lat. 11° 00′; long. 76° 44′; from Coimbatore W. 18 miles. A Punchalingam [q.v.] and place of pilgrimage.——**(3)** Deputy tahsildarry, Coimbatore district. Pay Rs. 70.——**(4)** Town, Collector's, Judge's and Talook head-quarters, Railway station; Coimbatore dist.; Coimbatore tal.; pop. 46,383; acres 2,308; lat. 11° 00′; long. 77° 00′; height 1,342 feet; from Bangalore S. 140 miles; from Bombay S.E. 600 miles; from Calicut E. 80 miles; from Erode W.S.W. 56 miles; from Madras S.W. 268 miles; from Mangalore S.E. 196 miles; from Ootacamund S.S.E. 32 miles; from Pollachy N. 25 miles; from Seringapatam S. 100 miles; from Suttimungalam S.S.W. 40 miles. Near left bank of the Noyil, in a dry and well-cultivated tract, on declivity and near base of Neilgherries and on the N. of Palghaut gap. Better suited for the residence of Europeans than most towns of the Presidency, having wide streets, good natural drainage, an abundant water-supply, and a cool temperature. An abundant supply of brackish water is available, but on the south side is a tank 3 miles in length. The European quarter is eastward of the town and detached from it. In the time of Hyder the town contained 4,000 houses; but it suffered in Mysore wars. From its position, commanding the approach to Palghaut on the west, and to the Guzzelhutty pass on the north, it was formerly of strategical importance. Originally belonging to the Cheran dominions it fell to the Madura naicks, by whom it was considered one of their chief strongholds, and afterwards to Mysore. Little is known of it till the time of the Mysore conquests. Both Hyder and Tippoo made it their head-quarters several times. It then had a fort. In 1768, the British took it, and again lost it, and in 1783 it was again taken and retaken. In 1790 the Company's forces a third time occupied it, but Tippoo, after a siege of five months, compelled the garrison to surrender. In 1792 provisionally, and in 1799 finally, the town was ceded to the British, and from that time it ceased to be a military station. It became district head-quarters on amalgamation of two divisions in 1805. A palace built by Tippoo

sultan, is utilized as a cutcherry [q.v.]. It is a terraced massive building with open quadrangles. The large musjid [q.v.] was also erected by Tippoo. The town is the centre of a considerable trade. It contains a handsome English church. The jail is noted for its plan, and management. Three missions are stationed here, viz., the Roman catholic french mission, headed by a Bishop, whose cathedral is a marked object in entering the town by rail; the London mission, whose premises are near the Collector's office; and the Lutheran mission. Trig. station in the Central Jail, Coimbatore tal.; lat. 11° 00′ 38·60″; long. 77° 00′ 39·53″; height 1,441 feet. The following are the travelling distances by road from Coimbatore to different places:—

COIR (கயிறு - kayiru, *Tam.*). Cocoanut fibre [q.v.].

COKAM (कोक - kóka, *San.*). Imitative term. Cuculidæ family, scansores, insessores, aves [pacshy, 15], of naturalists [jantoo]. Cuckoos. Comprise here:—Cuculinæ or true or parasitic cuckoos; all of which deposit their eggs in the nests of other birds [koel]. Phœnicophainæ, or malkohas, who live on insects, and make their own nests [crow pheasant, jungle parrot].

COKUM-BUTTER (کوکم کا تیل - kúkamkátel, *Hind.*). Product of mate mangosteen [q.v.] plant.

COL (கொல் - kol, *Tam.*). Metal [loham].——*Collan* (கொல்லன் - kollan, Tam.). Ironsmith. The corresponding terms are:—Hind. lohaur; Can. cummaura; Tel. cummara; Mal. collan. The Indian smith sits at the forge, and rises to his feet only when he uses a two-handed hammer. Hence the Tamul proverb:—இளகினஇரும்பைக்கண்டாற் கொல்லன் குண்டியைத் தூக்கிஅடிப்பான்—"When the smith perceives that "the iron is soft, he will raise himself to the stroke" [jauty].——*Collangode* (കൊല്ലങ്കോട് - kollankótu, Mal. kolangód*). From (kollan, mal. a blacksmith + kótu, mal. place).—"*a*" Town; Malabar dist., Palghaut tal.; pop. 2,558; lat. 10° 37′; long. 76° 44′; from Calicut E.S.E. 74 miles; from Palghaut S. 10 miles. In Padinyaurattara amshom. Travellers' bungalow built on site of a ruined fort. Formerly seat of petty chieftain, Vengoonauttil numbidy. Family still reside. Cautchancoorchy temple, to Vishnoo. The mantapam [q.v.] and the surrounding wall of Shreecovil or shrine, are painted with incarnations [avatar] of Vishnoo. As a preliminary to yaugam by any Numboory bramin the sacrificer must come first to this temple and receive from the Vengoonauttil numbidy, the moon-plant or Sarcostemma brevistigma, w. & a. [somam], the blackwood or Acacia catechu, willd. [catechu], and the skin of a black antelope [jinka].—"*b*" River; Malabar district, Palghaut talook. Locally called Gayatry nuddy; rises in Collangode bluff or Malaya mountains being N.W. extremities of Anamullays. Joins Ponnany river near Wottapollem station.——*Collat cauran* (கொல்லற்றுக்காரன் - kollattukkáran, Tam.). From (kollaru, tam. trowel + kára, san. door). The Teloogoo is beldar. Bricklayer caste [jauty].

COL (கொல் - kol, *Tam.*). To kill.——*Coleroon* (கொள்ளடம் - kolladam, Tam.). Portuguese corruption; cf. cochin, comorin. Tam. from (kol, tam. to kill + idam, tam. place); place of slaughter from tradition that the workmen were drowned when the temple was built at Shreerungam [tirmangay alwar]. River. The Cauvery divides into two branches at Shreerungam. One is called the Cauvery proper, and the other branching to the left the Coleroon, this having been an artificial diversion. In full flood the Coleroon is now in places nearly a mile wide, whilst the original stream of the Cauvery disappears before reaching the sea. The absence of notice of the Coleroon in Ptolemy's tables is an indication of its modern origin. The Coleroon leaves the main channel at the upper end of Shreerungam, about 10 miles west of Trichinopoly, in lat. 10° 53′ N. and long. 78° 39′ E. After a north-easterly course of about 94 miles, it falls into the Bay of Bengal at Atchaulpooram, 3½ miles from Porto novo, in lat. 11° 26′ N. and long. 79° 52′ E. For the greater part of its length the Coleroon forms the boundary between Trichinopoly and South arcot districts on the left and Tanjore on the right bank. As compared with the Cauvery proper, its course is more direct and its fall more rapid, and consequently it naturally tends to carry off the larger volume of water. To counteract this tendency and maintain the proper water-supply of the Tanjore delta, the great anicut was constructed in 1856 across the channel of the Coleroon by Sir Arthur Cotton. In the same year a second dam, known as the lower anicut was thrown across the Coleroon, 70 miles below Shreerungam, in order to regulate the irrigation of South arcot. This dam consists of a hollow bar of masonry, 8 feet high and as many broad, the interior being filled with sand rammed down. The total length is 1,901 feet and in the rear is an apron of masonry. The lower anicut also feeds the great Veeraunam tank by the Vadavaur channel and by several canals irrigates Tanjore district. In South arcot, the main channels from the Coleroon are the Khan sahib, the Iron company's, the Rajahvycaul, the Bhootangoody, and the Carangooly canals. The Coleroon is affected by the tide for 5 or 6 miles from its mouth. Boat traffic is considerable. See vol. I, 400. Coleroon beacon is a trig. station, Chidambaram talook; lat. 11° 26′ 31·62″; long. 79° 51′ 18·44″; from Chidambaram E.N.E. 8¾ miles; from Taundavaroya cholaganpettah N.E. 2½ miles; on the seashore.——*Colley* (ಕೊಲೆ - kole, Can.). Killing.——*Colleycull* (ಕೊಲೆಕಲ್ಲು - kolekallu, Can.). Tomb stone in honor of warriors killed in battle [aursham, veeracull].——*Collimullay* (கொல்லிமலை - kollimalai, Tam.). From (kolli, tam. killer + malai, tam. mountain), meaning haunt of wild beasts. Tam. also (valliyam), meaning shepherd village. Sanscrit name (chaturagiri), meaning square mountain, from the conformation. Range of hills; Salem district, Ahtoor and Namcull talooks; lat. 11° 11′ to 11° 30′; long. 78° 19′ to 78° 32′; height 4,663 feet; from Ahtoor S.W. 15 miles; from Salem S.E. 16 miles. For description see vol. II, 84.——*Colliverpan* (கொல்லிவெற்பன் - kolliverban, Tam.). From (kolli, tam. hill, so called + verban, tam. hill-ruler). See vol. I (127). Any ruler of the Cheram country [charitram].——*Colly* (கொல்லி - kolli, Tam.). Mountain in Salem, the modern Collimullays. See vol. I (127); II, 84 [charitram].

COL (கொள் - kol, *Tam.*). Buy.——*Colagam* (ಕೊಳಗ - kolaga, Can.; கொளகம் - kolagam, Tam.). From (above + agam, tam. inside); hollow vessel used in buying.—"*a*" Measure of capacity. 4 bullahs = 1 colagam; 20 colagams = 1 cundaga [alavay, 3c]. About = 3 bushels or 10 cubic feet and 1,500 cubic inches. Used in Bellary. Colagam of Mysore is 560 cubic inches, same as Coodoo and Pothy. Compare Bharnam.—"*b*" Superficial measure [alavay, 2c, d]. Approximate actual value, 1 colagam = $\frac{8}{11}$ acre. Land required to sow one colagam of paddy. See vol. I, 609; II, 508, 546.

COLA (ಕೋಲ - kóla, *Can.*). Jujube [bair].——*Colacumbey* (ಕೋಲಕಂಬೆ - kolakambe, Can.). From (above + kambe, can. a low hill). Village, Hill, River; Neilgherry district, Merkoonaud division; lat. 11° 17′; long. 76° 47′; height 5,601; from Coonoor S.W. 6 miles; from Ootacamund S.S.E. 9 miles. Coffee [q.v.] tract. Waterfall highest on Neilgherries, N. of hill has an unbroken fall of 400 feet. There are cromlechs [azhauram] and sculptured slabs [aroovy].

COLAH (கோலா - kólá, *Tam.*). From (kól, tam. stick); from long slender body and pointed head. Garfish, Garpike. The genus Belone, scombresocidæ, physostomi, teleostei, pisces [matsyam, 37], of naturalists [jantoo]. Bones green; indifferent as food. The species best known to the natives are Green pike, Stork pike. Cf. also Bottle-nosed pike, flying pike, which the natives connect.——*Bottle-nosed pike* (வட்டமூக்குக்கோலா - vattamúkkukkólá, Tam.). Tam. from (vattam, tam. circular

form + múkku, tam. nose + kólá, tam. flying fish, exocætus pœcilopterus). Anacanthus barbatus, sclerodermidæ, plectognathi, teleostei [matsyam, 44], of naturalists. Alias Alatarius barbatus; Aluterus barbatus; Balistes barbatus; Pogonognathus barbatus; Psilocephalus barbatus. Body strongly compressed. Dull brown or gray, fins yellow, the caudal with about six vertical or angular dark bands not so wide as the ground-color. Sea. 10 inches. No other common species here.——*Flying pike* (பறவைக்கோலா - paravaikkólá, Tam.). Title from poising in air by long pectoral fins. Tam. from (paravai, tam. bird + kólá, tam. flying fish, exocætus pœcilopterus). Exocætus pœcilopterus, scombresocidæ, acanthopterygii, teleostei [matsyam, 37], of naturalists. Bluish along back, becoming silvery on sides and beneath. Pectoral with many rounded and oval spots, sometimes transversely arranged in bands, in others irregularly placed. Two had black spots up on the dorsal fin; ventral white or with spots. Sea. No other common species here.——*Green pike* (వాలకద్దెర - válakaddera, Tel.; വാളക്കതിരാൻ - válákkatirán, Mal.; பசுங்கோலா - pasungólá, Tam.). Title from green back. Tel. from (válu, tel. long + kaddera, tel. stork pike, belone strongylurus). Mal. from (vál, mal. sword + katirán, mal. the fish, gobius giuris). Tam. from (pasumai, tam. greenness + kólá, tam. flying fish, exocætus poecilopterus). Belone [colah] annulata, scombresocidæ, physostomi teleostei [matsyam, 37]. Alias Belone cylindrica, gigantea, indica, melanurus; Mastacembelus annulatus, choram. Upper surface of head and back green, with steel-blue reflections minutely dotted with black, fading into silvery-white on abdomen. Side of upper jaw of a dark olive, of the lower silvery. Black line passes from upper third of angle of mouth along base of teeth. Cheeks and opercles silvery. Membranes of dorsal caudal, and pectoral fins of light greenish-gray, minutely dotted with black, especially at margins. Anal and ventral anteriorly white, dotted with black. Iris silvery, margin of orbit black. Seas and estuaries. 2 feet. Food of indifferent quality, used by natives.——*Stork pike* (तोल - tóla, Mahr.; بگلا مچھی - baglahmaççhí, Hind.; వడ్లముక్కు - vadlamukku, Tel.; കോപ്ല - kópla, Mal.; கொக்குமீன் - kokkumín, Tam.). Title from stork-like neck. Hind. from (baglah, hind. paddy bird, ardeola leucoptera + maççhí, hind. fish); from long nose. Tel. from (vadlu, tel. paddy + mukku, tel. snout), from form of the snout. Tam. from (kokku, tam. stork + mín, tam. fish). Tel. also (kaddera). Mal. also (kokku), meaning long beak. Tam. also (úsikkazhutti), meaning needle-necked fish. Title otherwise Long-nosed fish. Belone [colah] strongylurus, scombresocidæ, physostomi, teleostei [matsyam, 37], of naturalists. Alias Belone caudimaculata, strongylura; Esox; Mastacembelus strongylurus. Free portion of tail compressed, much deeper than wide and without any distinct lateral keel; summit of head and back yellowish-green, with minute brown dots, fading into silvery on sides, and white on abdomen; cheeks and opercles silvery; deep blue longitudinal band, bordered beneath by another broader one of silver, passes along posterior half of sides; dorsal with orange along upper edge, it and sometimes anal bright yellow, rays dotted with brown; pectoral and ventral diaphanous, the latter occasionally with a black spot at the base; caudal yellowish or greenish, minutely dotted with black, having round bluish-black spot in centre near root; iris silvery; upper surface of eye bluish-black; seas and coasts; 2 feet.

COLAM (കുളം - kolam, *Mal.*; குளம் - kulam, *Tam.*). From (kuli, mal. to bathe). A bathing pond. Prefix in place names as Colattore, meaning village with the tank [coolam].——*Colair* (కొల్లేరు - kolléru, Tel.). From (kollu, tel. pond + éru, tel. river). Lake; Godavery and Kistna dists., Goodivauda tal.; 158 square miles; lat. 16° 31′ to 16° 47′; long. 81° 08′ to 81° 25′; from Goodivauda N.N.E. 10 miles; from Masulipatam N. 25 miles. A stretch of fresh water, half lake, half swamp, sometimes covering more than 100 square miles in the monsoon. It is of oval shape. In the dry weather it is about 25 miles in length and 10 in breadth. The Boodamair, Ooppootair, Tammilair, and Veyyair, feed it. The last is a tidal river and is its only outlet. At no time is it very deep. Abounds in waterfowl, and fairly stocked with fish. Contains numerous fertile islets many of which are inhabited and cultivated. Many smaller ones are submerged during floods. Cultivators obtain no proprietary rights in their lands, but hold them on annual leases. There are in the lake forty-four villages, which have been nominally reduced to twenty-seven. In 1860 there was considerable cultivation in the lake by means of mechanical contrivances. In 1869 the lake was brought under anicut [q.v.] irrigation, and the Ooppootair was left open as a tidal outlet between the sea and the lake. The Colair has been caused by the land-making activity of the Godavery and Kistna rivers, acting together with the monsoon [q.v.], which blows up an intervening beach or bank of sand between any low-lying unfilled tract and the sea. The lake is thus the natural depression between the Godavery and Kistna alluvial deltas. At the present time its dimensions are gradually being reduced by reclamation and embankments. Two copper plates of the early Pullava dynasty were found in the lake, and legend connects the place with Langoolya gajapaty, king of Orissa from 1237 to 1282. The general of an opposing force, wishing to capture the Gajapaty fort of Colleticote, is said to have cut the Ooppootair channel leading the lake waters into the sea, and to ensure success he sacrificed his daughter [anantapore, royalcheroo], whence the breach is called Perantaul canama to this day. The principal route across the lake is from Ellore to Keicalore.——*Colleticote* (కొల్లేటికోట - kollétikóta, Tel.). From (kolléru, tel. lake so called + kóta, tel. fort). Island; Kistna dist., Goodivauda tal.; pop. 513; acres 956; lat. 16° 38′; long. 81° 20′; from Goodivauda N.E. 24¼ miles; from Masulipatam N.N.E. 32 miles. Old fort on an island in Colair lake said to have been built by Langoolya gajapaty, and the site of a battle. Figure of a female deity on a mound.——*Collore* (ಕೊಲ್ಲೂರು - kollúru, Can.; కొల్లూరు - kollúru, Tel.). From (kolanu, can. pond + úru, can. town). Can. also (múkámbi), meaning doorga, the dumb goddess; from tradition that she gave speech to a dumb cottayam king. Sanscrit name (kólápura), meaning jujube tree, zizyphus jujuba, lam. + town.—"*a*" Part of Valasheemey village, Place of pilgrimage; South canara dist., Coondapore tal.; lat. 13° 52′; long. 74° 52′; from Coondapore N.E. 18 miles; from Mangalore N. 69 miles; from the sea E. 14 miles. In a valley at the foot of the Western ghauts. Important temple to Moocaumbicay. Noted car festival.—"*b*" Ghaut; South canara dist., Coondapore tal.; lat. 13° 52′ to 13° 53′ 20″ N.; long. 74° 53′ to 74° 54′ E. Pass in Western ghauts, connecting Mysore with Canara.—"*c*" Village; pop. 371; acres 906; lat. 16° 42′; long. 80° 04′; from Crossoor N.W. 14 miles; from Masulipatam W.N.W. 81 miles. Once held by the Noozveed zemindar and afterwards by Vasireddy vencataudry naidoo. Temples with inscriptions. Old diamond [vajram] mines not worked now, whence came the Kohinoor. The mines were visited by Tavernier in the reign of Aurungzeeb, and by Marco polo and by Nicolo conti.

COLAM (കോലം - kólam, *Mal.*). Distinguish from Cholam; connected with Collam. Beauty.—"*a*" A floor ornament commonly formed at the entrance of a native house. The ornaments are renewed every morning. They contain various devices. In some a temple car is drawn, in others trees, birds, flowers, &c. They are connected with the prevalent ideas regarding the evil eye. There is a Tamul proverb:—எல்லாரும் தடுக்கின் கீழ் நுழைந்தால் அவன் கோலத்தின் கீழ் நுழைவான்—"If all can hide themselves under a small mat, "he can conceal himself under the colam;" he is so cunning.—"*b*" North malabar. The country subject to the Colattiry rajah extending originally from the Tooracherry river to Chundragherry, later from Tellicherry to Neeleshwar in Canara [charitram, chiracal, keralam].——*Colastry* (കോലത്തിരി - kólattiri, Mal.). Portuguese form of Colattiry or Colatnaud. Distinguish from Calastry [q.v.] of the E. coast.——*Colaswaroopam* (കോലസ്വരൂപം - kólasvarúpam, Mal.). From (above + svarúpa, san. dynasty). The Colattiry rajah.——*Colatnaud* (കോലത്തുനാട് - kólattunátu, Mal.). From (above + nátu, mal. country). Same as Colam or North malabar.——*Colattiry* (കോലത്തിരി - kólattiri, Mal.). From (above + tiri, mal. holy, title). The dynasty of Colam, Colastry, Colatnaud, or North malabar [vellattiry]. Collattiries were the agents of the Permauls who had their head-quarters at Tirvanjicoolam in Cochin. Their jurisdiction extended over lands around Collam as the title signifies. On the departure of the last of Permauls to Mecca, they became independent. They are now respectively the Chiracal rajahs in Malabar and the Travancore rulers [charitram].

COLANDAY (குழந்தை - kuzhandai, *Tam.*). From (kuzhavu, tam. young). Child; also term of address to children of both sexes. Colandasawmy, the son-god, Soobramanyan, is Hindoo 2nd or pers. name, common among non-bramins [peyar].

COLE (ಕೋಲು - kólu, *Can.*; കോൽ - kól, *Mal.*; கோல் - kól, *Tam.*). Stick [kole]. Straight or tall. Plant first term, as:—Cassia occidentalis (kóltagasigida), straight cassia. Dillenia pentagyna (kóltégamara), straight teak. See gloss. paragraphs.——*Colauttam* (கோலாட்டம் - kóláttam, Tam.). From (above + áttam, tam. dance). Generally a game or exercise with two painted and ornamented sticks held one in each hand; in which boys or girls move round in a circle singing in chorus and keep time by dancing and beating their sticks against each other. Jaday colauttam or pinnal colauttam is a special kind of the same exercise in which dancing girls or school boys, by moving in different directions, plait into one rope separate strings held in one hand, while they keep time by beating their sticks against those of their comrades.——*Coly* (കോലി - kóli, Mal.). From (kól, mal. stick); from size of grain, long and slender. A Malabar paddy [q.v.].

COLLAY (கொல்லை - kollai, *Tam.*). Dry field; especially backyard, or small garden at back of village houses. Suffix in place names, as Pinnacollay, meaning the field with the pinnay tree. Also high ground not capable of artificial irrigation. Plant first term. Ex., where transl. is of second term:—Phaseolus trilobatus (kollaippayaru), phaseolus mungo; Strigia euphrasioides (kollaippalli), lizard. See gloss. paragraphs.

COLLEGAUL (கொள்ளேகாலம் - kollégálam, *Tam.* kollegál*). Sanscrit name (kóhalagálava), meaning cohalan, the sage + gaulavan the sage; from their residence in the place.——

(1) Talook, Coimbatore district. Tahsildar's pay Rs. 150. Area 1,076 square miles. Population 88,533. Language Canarese. N. of district. Bounded N. and W. by Mysore. S. by Suttimungalam and Bhawauny talooks, E. by Bhawauny talook and Salem district, N. and N.E. by Cauvery. Forms part of mysore plateau, and is separated from Coimbatore district proper on the south and east by chains of mountains pierced here and there by passes, of which the chief are Guzzelhutty and Hassanore ghauts on S., Nadoocauvalcauverypooram on E. and Burgoor ghaut [q.v.] on S.E. General elevation from 2,500 to 3,000 feet with peaks and ranges from 4,000 to 5,000 feet. Forest on the south and east are vast and almost untrodden except by wild tribes. The sandalwood [sandal] under process of reservation. Talook is ill-provided with roads. Two main lines run up from the low country, one by Taulavaudy through Mysore territory and the other by Andiyore and Burgoor in Bhawauny talook. The latter road is out of order. Soil generally good. Of the assessed area, 77 per cent. is in the black and red loam series, 23 per cent. being red sand. At the Mautheshwaramullay festivals on Deepauvaly [pundigay, 6d], Shivarautry [pundigay, 6a], and Yoogaudy [pundigay, 6d], there are large cattle fairs. Kowthully, Ponautchy and Shengady, are notable for cattle of the pure Aulambaudy breed [maud]. Garden cultivation is little practised. Wheat [geung] is grown on dry land from July to October, and sugar-cane [q.v.] is a dry land as well as a wet crop. Raggy [q.v.] is also grown on dry land. Mulberry trees are grown to a considerable extent for feeding silkworms [puttoo]. There are few industries other than those of agriculture, cattle breeding, and weaving. There are about 2,000 looms [tarry] in the talook. Silk rearing and weaving are carried on to some extent, and the gold-laced cloths and handkerchiefs of Collegaul are good and well-known; Aulhully, Congarhully, Hindvaudy, and Shinganallore are chief breeding places, and Collegaul is the chief seat of manufacture. The sources of irrigation are the Cauvery, Goondal and Honnal. There are four masonry dams across the Goondal feeding the Polliem, Doddarunganautanhulla, Paupanacaulvye and Danakeray caulvye channels. Oottampully and Terampully are watered by a tank supplemented by the surplus water of a tank in Agra in Mysore province supplied by the Honnal. The Cauvery irrigates about 31 acres of wet land in the village of Danakeray, through which a channel from an anicut across the river, situated within the limits of the village, runs to two jagheer [q.v.] villages in the talook. Irrigation wells are hardly known. Camping grounds, Basavanuttam, near Bylore, Gergagundy, Hanoor and Moordigooddey. The only Jagheerdarry is:—Moollore and Ooginyam, Suttegaul. Rs. 2,236 peshcush. Places of archæological interest:—Aulambaudy, Bastipooram, Collegaul, Martahully, Nulloor, Oojipooram, Shengapaudy, Shinganallore, Shivasamoodram, Suttegaul. Principal trig. stations:—Bandahully droog, Ponautchybett. The leading places, &c., in the talook are the following.——*Aulambaudy* (ஆலம்பாடி - álambádi, Tam.). See sep. title.——*Ballirungam* (பிளிகிரிரங்கமலை - piligirirangamalai, Tam.). See sep. title.——*Bandhully* (ಬಂಡಹಳ್ಳಿ - bandahalli, Can.). From (banda, can. rock + halli, can. hamlet). Sanscrit name (páshánapurí), meaning rock + town. Village; pop. 1,882; acres 17,454; lat. 12° 10′; long. 77° 23′; from Coimbatore N.N.E. 84 miles; from Collegaul E. 16¼ miles. There was a fort on top of hill called Vicramadoorgam. Garrisoned in time of Hyder and Tippoo. The descendants of soldiers are still living. Trig. station; lat. 12° 12′ 13·00″; long. 77° 22′ 42·14″; height 4,276 feet; from Bandhully N.N.W. 3 miles; from Collegaul E.N.E. 15 miles.——*Burgoor* (பருக்கூர் - parukkúr, Tam.). See sep. title.——*Bylore* (ಬೈಲೂರು - bailúru, Can.). From (bailu, can. open plain + úru, can. village). Village, forest tract; pop. 365; lat. 11° 49′; long. 77° 17′; from Coimbatore N.N.E. 59 miles; from Collegaul S.S.E. 25 miles. Sandal-wood plantations.——*Cauvery* (காவேரி - kávéri, Tam.). See sep. title.——*Collegaul* (கொள்ளேகாலம் - kollégálam, Tam.). See below.——*Congarhully* (ಕೊಂಗರುಹಳ್ಳಿ - kongaruhalli, Can.). From (kongaru, can. the people of the konga country + halli, can. (hamlet). Village; pop. 1,620; acres 763; lat. 12° 08′; long. 77° 16′; from Coimbatore N.N.E. 80 miles; from Collegaul E.S.E. 8 miles.——*Coondore* (குண்டூர் - kundúr, Tam.). From (kunru, tam. hill + úr, tam. village). Village; pop. 1,687; acres 937; lat. 12° 08′; long. 77° 04′; from Coimbatore N. 78 miles; from Collegaul W.S.W. 5¼ miles. Temple on hill to Prabhalingasawmy.——*Goondal* (குண்டல் - kundal, Tam.). From (gundu, can. round stone). Sanscrit name (bhárgavanadí), meaning bhaurgavan, the sage + river. River. Rises in Biligherry rungam hills in Mysore territory, about 20 miles south of Collegaul and empties itself into the Cauvery at Sharagore, 3 miles north of the cusbah. Feeds a series of tanks in the talook.——*Haurvanpooram* (ஆருவன்புரம் - áruvanburam, Tam.). From (háruva, can. bramin + pura, san. town). Village; pop. 1,414; acres 637; lat. 12° 09′; long. 77° 12′; from Coimbatore N. 81 miles; from Collegaul E. 3 miles. Rich paddy [q.v.] fields.——*Kowthully* (ಕವಾಡಹಳ್ಳಿ - kavádahalli, Can.; கவுதள்ளி - kavuthalli, Tam.). From (kaváda, can. bullock's burden + halli, can. hamlet). Village; lat. 12° 4′; long. 77° 29′; from Coimbatore N.N.E. 81 miles; from Collegaul E.S.E. 23 miles. Europeans are acquiring lands for gold prospecting.——*Madhoovanhully* (ಮಧುವನಹಳ್ಳಿ - maduvanahalli, Can.). From (madhu, san. honey + vana, san. forest + halli, can. hamlet). Sanscrit name (madhuvanapurí), meaning honey + forest + town. Village; pop. 2,607; acres 1,439; lat. 12° 09′ 14″; long. 77° 11′ 22″; from Coimbatore N. 81 miles; from Collegaul E. 2¾ miles. Mulberry cultivated. Silkworms reared.——*Mautheshwarumullay* (மாதேசுவரமலை - máthésuvaramalai, Tam. máthesvaramalai *). Means mountain of the great lord or shiva. Sanscrit name (mahádévéshvaragiri), meaning great + god + lord + mountain. Village, Hill, Place of pilgrimage; pop. 1,499; lat. 12° 02′; long. 77° 35′; from Coimbatore N.N.E. 82 miles; from Collegaul E.S.E. 30 miles. Cattle-breeding. Resorted to during Deepauvaly [pundigay, 6d] and on new-moon days, especially in Tye [mausam] or january-february. Large annual cattle [maud] fair in November attracts from Mysore, Salem, &c.——*Moodicoondam* (முடிக்குண்டம் - mudikkundam, Tam.). From (mudi, tam. top + kunram, tam. mountain). Village; pop. 2,065; acres 3,254; lat. 12° 08′; long. 77° 08′; from Coimbatore N. 79 miles; from Collegaul S.W. 1¾ miles. A mart for sale of spices from low country.——*Moollore* (முள்ளூர் - mullúr, Tam.). From (mullu, tam. thorn + úr, tam. village). Shrotriem village; pop. 1,858; acres 1,797; lat. 12° 10′; long. 77° 06′; from Coimbatore N. 80 miles; from Collegaul W.N.W. 3 miles. On banks of the Cauvery. Rich soil.——*Ponautchipoly* (பொன்னச்சிப்பொளி - ponnáççippoli, Tam.). From (ponnáççi, tam. proper name + poli, tam. field-bund). Village; lat. 12° 09′; long. 77° 41′; from Coimbatore N.N.E. 88 miles; from Collegaul E. 33 miles. Bounded on one side by mountain range abounding with magnificent forests.——*Ponautchy bett* (ಪೊನ್ನಾಚ್ಚಿಬೆಟ್ಟ - ponnáççibetta, Can.). Trig. station; lat. 12° 08′ 19·67″; long. 77° 41′ 12·04″; height 4,970 feet; from Collegaul E. 36 miles; from Ponautchy E.N.E. 3¼ miles.——*Seetaur* (சித்தாறு - shittáru, Tam.). From (shittá, tam. custard-apple tree, anona reticulata, linn. + áru, tam. river). River. Tributary of Cauvery.——*Shivasamoodram* (சிவசமுத்திரம் - shivasamuttiram, Tam.). See sep. title.——*Sutteyaul* (சத்தேகாலம் - sattégálam, Tam.). See sep. title.——**(2)** Town, Talook head-quarters; Coimbatore dist., Collegaul tal.; pop. 9,946; acres 2,813; lat. 12° 09′; long. 77° 09′; from Coimbatore N. 81 miles; from Erode N.W. 70 miles; from Madras W.S.W. 223 miles; from Ootacamund N.N.E. 58 miles; from Pollachy N. 102 miles; from Suttimungalam N. 46 miles. On the Cauvery and at the extreme north-west of the talook. Old Shiva temple well sculptured and containing inscriptions. Ruined fort.

COLLERY (கள்ளர் - kallar, *Tam.*). From (kal, tam. to steal). Corrupted form of Cullar [cholera-horn].——*Collery stick* (கள்ளர்தடி - kallardadi, Tam.). From (above + tadi, tam. stick). Throwing stick or bomerang used by the Cullar.

COLLVYE (ಕಾಳವೆ - kálave, *Can.*; காளவாய் - kálaváy, *Tam.*). From (kála, san. black + váy, tam. mouth); black-mouthed. A kiln [shoolay]. Distinguish from Caulvye.

COLLY (ಕೊಳ್ಳಿ - kolli, *Can.*; కొల్లి - kolli, *Tel.*). A stream.

COLLY (கொள்ளி - kolli, *Tam.*). Means fire-brand. Pariah female proper name [peyar].

COMALAM (कोमल - kómala, *San.*). Grace.——*Comala vully* (कोमलवल्ली - kómalavallí, San.). From (above + vallí, san. creeper); graceful creeper. Mauriyamman.

COMARAN (கொமரன் - komaran, *Tam.*). Youth. The son god Soobramanyan [comauran, coomauran]. Non-bramin Hindoo 2nd or pers. name [peyar].——*Comaravole* (కొమరవోలు - komaravólu, Tel.). From (komaru, tel. beautiful + prólu, tel. town). Lake; Vizagapatam dist., Golcondah tal.; acres 2,542; lat. 17° 43′; long. 82° 44′; from Narsapatam N.E. 6¼ miles; from Vizagapatam W. 38 miles. One of main sources of irrigation in district.

COMATY (కోమటి - kómati, *Tel.*). From (gó, san. eye + mushti, san. fist); from their vigilant habit. Trading caste in northern districts. Girls are married in childhood; widows not remarried. In many localities a comaty must marry his uncle's daughter if any, whether liked or not. Polygamy is allowed. There is a teloogoo proverb:—[Telugu text]—"Coriander seed "caste;" treating a comaty roughly is the only way of dealing with him, as rubbing the coriander [cassibor] seed before sowing, is the only way of making it sprout. And another—కోడికి సుఖంలేదు, కోమటికి విశ్వాసంలేదు—"A fowl has no happiness "and a comaty has no faith." And another—[Telugu text]—"A comaty is a coward, if you hit him he runs away." And another—కోమటి సాక్ష్యం—"Comaty's evidence;" meaning shuffling evidence. There are two sub-divisions, smarta and veishnava comaties, who form separate classes and neither eat together nor intermarry. The males assume affix of Chetty. Number some 375,000, mostly in Godavery, Kistna and Nellore. There is a class called gowra comaty, from (gavara, tel. merchant), number about 9,000 [jauty].

COMAURAN (कुमार - kumára, *San.*). From (ku, san. grief + már, san. to kill); gladdener. A young man, son [comaran, coomaran]. Comauragooroo, the son-preceptor Soobramanyan who taught his father Shiva [gooroonautan], is non-bramin Hindoo 2nd or pers. name. Comaurasawmy the same, very common [peyar].——*Comauradhaury* (ಕುಮಾರಧಾರಿ - kumáradhári, Can.). From (above + dhárá, san. stream); called after soobramanyan. River; South canara district, Ooppinangady talook. Rises in lat. 12° 37′ N., and long. 75° 45′ E., in the Bisley ghaut on the boundary between Coorg and Hassan district of Mysore, below the Soobramanyam range of the Western ghauts. Flows westwards towards the Malabar coast. Near Ooppinangady it joins the Netrauvaty and the combined stream, under the latter name, flows into the sea near Mangalore. In the lower part of its course it is much used for navigation; small boats can proceed even above Ooppinangady.——*Comaurila bhatt* (कुमारिलभट्ट - kumárilabhatta, San.). From (above + bhatta, san. lord, title). A Bramin of Berar, in the eighth century. He excited an opposition to the Booddhists and Jeinas, which has been exaggerated by tradition into an extermination of Booddhists from the Himalayas to Cape comorin. His doctrine was a revival of the old Adweitam [q.v.] philosophy. He travelled into Southern india and had for disciple Shuncaracharry [q.v.]. See vol. I (75), (76).——*Comaury* (कुमारी - kumárí, San.). A young girl; goddess Doorga as a maiden [comorin, cunny].

COMBACONAM (کمکرن - kumkaran, *Hind.*; கும்பகோணம் - kumbagónam, *Tam.* kumbakónam *). From (kumbha, san. water pot + kóna, san. lane). Old Tamul (kudandai), meaning pot + place; used by Veishnavas.——**(1)** Talook, Tanjore district. Tahsildar's pay Rs. 250; area 342 square miles; pop. 377,658; language Tamul chiefly. N.W. of district. Bounded north by the Coleroon, which separates it from Trichinopoly and South arcot districts; south by Tanjore and Munnargoody talooks; east by Nunnilam and Mayavaram talooks; and west by the Coleroon, which separates it from Trichinopoly district. The talook is a plain tract consisting chiefly of paddy [q.v.] fields, gardens, &c. Soil is clayey, alluvial in part. Industry chiefly agricultural, but also brass [pittalay] vessels and weaving. The Cauvery and its branches give irrigation. Places of archæological interest:—Ammangoody, Anacoody, Aundauncoil, Audootoray permaul coil, Auvore, Caditchambaudy, Carooppore, Combaconam, Coorchy, Cottore, Cutchicutt, Devaroyapett, Keelasharcay, Mahadaunapooram, Mailayore, Manalore, Manjamully, Nauchiyaurcoil, Nullore, Nundivanam, Paupanausam, Pauparajapooram, Pundanallore, Putteeshwaram, Runganautapooram, Saucottah, Sawmymullay, Shenganore, Shivapooram, Shivaulyam, Shreenivasanullore, Soondrapermaulcoil, Sooryan coil, Tircaray cauvore, Tirchiray, Tirmungalacoody, Tirnaugeswaram, Tirnirayore, Tirpanandaul, Tirpatoray, Tirpirambiam, Tirvadamaroothore, Tirvalanjooly; Tirvoypaud, Tirvulliyangoody, Tookkautchy, Tribhoovanam, Tundantottam, Tyaugasamoodram, Vailacoody, Valangimaun, Veeramangoody, Villiyavarambal. Principal trig. stations:—Aulangoody, Combaconum college, Poottaharam, Tirpanandaulmantapam, Veeramungalam. The leading places, &c., in the talook are following.——*Arasilaur* (அரசிலையாறு - arasilaiyáru, Tam.). See sep. title.——*Audootoray* (ஆடுதுறை - áduthurai, Tam. áduturai *). From (ádu, tam. sheep + turai, tam. ford). Village, Railway station; pop. 104; lat. 10° 55′; long. 79° 15; from Combaconam W.S.W. 12 miles; from Tanjore N.N.E. 10 miles. Old Shiva temple.——*Aulangoody* (ஆலங்குடி - álangudi, Tam.). From (ál, tam. banyan tree, ficus bengalensis, linn. + kudi, tam. village). Trig. station; lat. 10° 49′ 55·23″; long. 79° 26′ 43·04″; height 73 feet; from Combaconam S.S.E. 9 miles; from Tillayaul nellore S.S.E. 9½ miles.——*Capistalam* (கபித்தலம் - kabittalam, Tam.). From (kapi, san. monkey + st'hala, san. place). Abode of Hanooman. Sanscrit name (kapist'hala), meaning same. Village; pop. 2,894; acres 1,255; lat. 10° 57′; long. 79° 18′; from Combaconam W. 7½ miles; from Tanjore N.E. 15 miles. On the Cauvery.——*Cauvery* (காவேரி - kávéri, Tam.). See sep. title.——*Coleroon* (கொள்ளடம் - kolladam, Tam.). See sep. title.——*Combaconam* (கும்பகோணம் - kumbagónam, Tam.). See below.——*Haridwauramungalam* (அரித்துவாரமங்கலம் - arittuváramangalam, Tam.). From (hari, san. vishnu + dvára, san. door + mangala, san. prosperity). Vishnoo is said to have entered the earth here to visit shiva's feet. Village; pop. 1,869; acres 1,796; lat. 10° 50′; long. 79° 24′; from Combaconam S. 8¾ miles; from Tanjore E.N.E. 15 miles. A Shiva temple.——*Mahadaunapooram* (மகாதானப்புரம் - magáthánappuram, Tam.). From (mahá, san. great + dána, san. gift + pura, san. town). Place of great charity. Village; pop. 5,265; acres 957; lat. 11° 00′; long. 79° 30′; from Combaconam E. 6 miles; from Tanjore N.E. 25 miles. Inscription near the river.——*Narasingapett* (நாரசிங்கன்பேட்டை - nárasinganbéttai, Tam. narasingampet *). From (narasimha, san. vishnu, the man lion god + péttai, tam. village); from narsingan, the ruler of the place. Village, Railway station; pop. 2,018; acres 932; lat. 10° 02′; long. 79° 33′; height 65 feet; from Combaconam E.N.E. 10¾ miles.——*Nauchiyaurcoil* (நாச்சியார்க்கோவில் - nácçiyárkkóvil, Tam.). From (nácçi, tam. honorable woman; epithet of a goddess + kóvil, tam. temple). Village; pop. 3,348; acres 752; lat. 10° 55′; long. 79° 29′; from Combaconam E.S.E. 5¾ miles; from Tanjore E.N.E. 23 miles. Old Vishnoo temple, highly sculptured and containing inscriptions.——*Paupanausam* (பாவநாசம் - pávanásam, Tam. pápanásam *). From (pápa, san. sin + násha, san. destruction). Village, Railway station; pop. 1,688; acres 1,062; lat. 10° 55′; long. 79° 18′; height 104 feet; from Combaconam W.S.W. 8 miles; from Tanjore N.E. 13 miles. Old Shiva temple with inscriptions.——*Poottaharam* (புத்தகரம் - puttagaram, Tam.). From (puthu, tam. new + agaram, tam. village). Trig. station; lat. 10° 56′ 30·27″; long. 79° 31′ 30·05″; height 47 feet; from Combaconam E.S.E. 7½ miles; from Tondaman tottam E. 2 miles.——*Pundanallore* (பந்தனல்லூர் - pandanallúr, Tam.). From (pandam, tam. torch + nal, tam. good + úr, tam. village). Sanscrit name (kandukapura), meaning ball + town. Village; pop. 1,136; acres 784; lat. 11° 08′; long. 79° 33′; from Combaconam N.E. 15½ miles; from Tanjore N.E. 35 miles. Old Shiva temple with inscriptions in old Tamul. Ruined fort with two Shiva and Vishnoo temples, also in ruins.——*Putteeshwaram* (பட்டீசுவரம் - pattísuvaram, Tam.). From (patti, tam. offspring of kámadhénu the wishing cow + íshvara, san. lord); shiva as worshipped by patty. Village; pop. 1,851; acres 1,345; lat. 10° 55′; long. 79° 23′; from Combaconam S.W. 3½ miles; from Tanjore E.N.E. 17 miles. Inscription of Chola dynasty in the temple of Sabhaupaty. Parts of the temple are well sculptured. Cloth weaving.——*Sawmymullay* (சுவாமிமலை - shuvámimalai, Tam.). From (svámí, san. deity + malai, tam. hill). Sanscrit name (skandagiri), meaning soobramanyan + hill. It is supposed to be one of the three summits of Keilausam [q.v.]. Village, Sub-Registrar's office, Hill; pop. 3,828; acres 648; lat. 10° 57′; long. 79° 22′; from Combaconam W. 3 miles; from Tanjore N.E. 18 miles. Old Shiva temple with inscriptions on the hill. In the hamlet of Vyausamungalam is another old Shiva temple. Centre of weaving industry.——*Soondrapermaulcoil* (சுந்தரப்பெருமாள்கோவில் - shundarapperumálgóvil, Tam. sundaraperumálkoil *). From (sundara, san. beautiful + perumál, tam. vishnu, the great lord + kóvil, tam. temple). Village, Railway station; pop. 2,689; lat. 10° 56′; long. 79° 22′; height 97 feet; from Combaconam W.S.W. 4½ miles; from Tanjore N.E. 15 miles. Old Vishnoo temple, built by a Chola king. Centre of weaving industry.——*Tircaraycauvore* (திருக்கரைக்காவூர் - tirukkaraikkávúr, Tam.). From (tiru, tam. holy + karai, tam. field + ká, tam. grove + úr, tam. village). Sanscrit name (garbharakshakapura), meaning interior + protection + town; also (mádhavívana), meaning the spring flower creeper, hiptage madablota, gærtn. + forest. Village; pop. 1,096; acres 868; lat. 10° 52′; long. 79° 20′; from Combaconam S.W. 9 miles; from Tanjore E.N.E. 11 miles. Old Shiva temple with Chola inscriptions.——*Tirmungalacoody* (திருமங்கலக்குடி - tirumangalakkudi, Tam.). From (tiru, tam. sacred + mangalá, san. párvatí, the auspicious deity + kudi, tam. village). Sanscrit name (mangaléshvara), meaning parvaty + shiva. Village; pop. 2,508; acres 1,091; lat. 11° 02′; long. 79° 31′; from Combaconam N.E. 8½ miles; from Tanjore N.E. 28 miles. Old Shiva temple with inscriptions in Grantam [q.v.].——*Tirnaugeswaram* (திருநாகேசுவரம் - tirunágésuvaram, Tam.). From (tiru, tam. sacred + nága, san. serpent + íshvara, san. lord). The residence of Andy sheshan, the chief of serpents. Town; pop. 5,041; acres 521; lat. 10° 58′; long. 79° 28′; from Combaconam E. 3¾ miles; from Tanjore E.N.E. 23 miles. Old Shiva temple. Notable Vishnoo temple near, called Ooppily appan covil. Weaving centre.——*Tirpanandaul* (திருப்பனந்தாள் - tiruppanandál, Tam.). From (tiru, tam. holy + panai, tam. palmyra tree, borassus flabelliformis, linn. + talam, tam. place). Village; pop. 795; acres 1,803; lat. 11° 06′; long. 79° 30′; from Combaconam N.N.E. 11 miles; from Tanjore N.E. 30 miles. Richly endowed Shoodra mutt, contains an old and valuable library of cadjan-leaf Tamul volumes. Trig. station at Mantapam in lat. 11° 05′ 30·43″; long. 79° 29′ 43·07″; height 80 feet; from Combaconam N.N.E. 10 miles; from Veeracunn N.E. 1¾ miles.——*Tirpirambiam* (திருப்பிரம்பியம் - tiruppirambiyam, Tam.). From (tiru, tam. sacred + pirambu, tam. cane + ayam, tam. place). Sanscrit name (pralayámbápura), meaning flood + goddess + town. Village; pop. 1,707; acres 1,441; lat. 11° 00′; long. 79° 23′; from Combaconam N.W. 4½ miles; from Tanjore N.E. 20 miles. Old Shiva temple with inscriptions.——*Tirvadamaroothore* (திருவிடைமருதூர் - tiruvidaimaruthúr, Tam.). See sep. title.——*Tirvalanjooly* (திருவலஞ்சுழி - tiruvalañjuzhi, Tam.). From (tiru, tam. sacred + valam, tam. right hand side + shuzhi, tam. whirlpool). From a whirlpool in the cauvery there. Said to be connected with the fact that shiva has a hole on the right side of his head. Village; pop. 1,101; acres 1,516; lat. 10° 56′; long. 79° 22′; from Combaconam W.S.W. 3½ miles; from Tanjore N.E. 17 miles. Old Shiva temple with inscriptions and fine gopooram. The sculptures of Jeina.——*Valangimaun* (வலங்கிமான் - valangimán, Tam.). From (valangai, tam. right hand + mán, tam. deer). Cf. Shiva. Town, Sub-registrar's office; pop. 7,244; acres 3,234; lat. 10° 53′; long. 79° 26′; from Combaconam S.S.E. 4¾ miles; from Tanjore E.N.E. 18 miles. Old Shiva temple with inscriptions.——*Veeramungalam* (வீரமங்கலம் - víramangalam, Tam.). From (víra, san. hero + mangala, san.

prosperity). Trig. station; lat. 10° 52′ 20·74″; long. 79° 21′ 00·36″; height 92 feet.——*Veppatore* (வேப்பத்தூர் - véppattúr, Tam.). From (vémbu, tam. neem tree, melia azadirachta, linn. + úr, tam. village). Town; area 3,354; pop. 5,788; lat. 11° 01′; long. 79° 29′; from Combaconam N.E. 5½ miles; from Tanjore N.E. 25 miles.——*Vinaickanteroo* (விநாயக்கன்தெரு - vináyakkanderu, Tam.). See sep. title.——**(2)** Deputy tahsildarry, Tanjore district. Pay Rs. 100.——**(3)** Town, Municipality, Railway station, Head-quarters of Sub-collector, Sub-judge, and District moonsifs of Combaconam and Valangimaun; Tanjore dist., Combaconam tal.; pop. 54,307; acres 1,257; lat. 10° 57′; long. 79° 25′; height 85 feet; from Madras S.S.W. 157 miles; from Mayavaram W. 20 miles; from Munnargoody W. 20 miles; from Negapatam W.N.W. 34 miles; from Tanjore N.E. 20 miles. Large and populous town in a low level tract between two considerable branches of the Cauvery, over which is a handsome bridge. Extends about 2 miles in length from north to south and 1 mile in breadth from east to west. Though only with a slight elevation above the sea, it is remarkably healthy. One of the most ancient towns in the Presidency. It is the centre of the Braminical religion and literature, and was once the capital of the Chola kingdom. Combaconam was the seat of the Zillah court of the district from its first establishment in 1806 until 1863, when it was removed to Tanjore. Also from 1860 to 1863 head-quarters of the Sub-collector. A branch mutt of Shuncaracharry [q.v.], founder of the Adweitam [q.v.] philosophy, is presided over by a chief gooroo of Smarta [q.v.] bramins. There are sixteen temples, twelve dedicated to Shiva and four to Vishnoo. Two of the temples are important; the larger dedicated to Vishnoo and the smaller to Shiva. The Vishnoo temple has a great gopooram [q.v.], of twelve storeys and 147 feet high, richly ornamented with figures, the ceiling being especially well painted. Near this is a small porch and two processional cars of carved wood of elaborate design, one of great size. The Shiva temple called Coombheshwaran pagoda is approached by a corridor 330 feet long and 15 feet wide. The principal gopooram is 128 feet high, and leads to a court 83 feet by 55 feet. The Ramasawmy temple has only one gopooram leading into the enclosure. The car of the Shaurngapauny temple is the one of the largest in Southern india. Besides the usual annual festivals, the Maha magham [pundigay, 5c], occurring once in twelve years and celebrated in February, draws an immense concourse from all parts of the country. Brick remains of the palace of the Chola are also found in the neighbourhood. Situated in the most fertile and most thickly populated part of the delta, Combaconam has always been a great centre of trade and manufactures; the latter consisting chiefly of silk [puttoo] and cotton [q.v.] cloths and metal [loham] ware. From the Government provincial college at this town come many of the best educated natives of the south. Trig. station at Combaconam college; lat. 10° 58′ 10·75″; long. 79° 25′ 29·38″; height 124 feet.

COMBOO (கொம்பு - kombu, *Tam.*). A branch [comma]. A common musical horn.——*Combairy mookkan* (చెట్టురుకుపాము - chetturukupámu, Tel.; കൊമ്പേറിമൂര്‍ഖന്‍ - kompérimúrkhan, Mal.; கொம்பேறிமூக்கன் - kombérimúkkan, Tam.). Tel. from (chettu, tel. tree + uruku, tel. to spring + pámu, tel. snake). Mal. from (kompu, mal. branch + éru, mal. to ascend + múrkhan, mal. poisonous snake). Tam. means branch-ascending and long-nosed by corruption. A tree-snake, not poisonous. Dendrophis picta, dendrophidæ [tree-snake], ophidii colubriformes, ophidia [sarpam], reptilia [sarpy, 20], of naturalists [jantoo]. Alias Ahætulla bellii, boii; Coluber decorus, pictus, russell; Leptophis maniar, pictus. Obtuse snout. Bronze brown above, sometimes with yellow vertebral on front part of trunk; yellow band along each side, along the outer series of scales, and has a black or blackish edge either below or above and below, upper black margin being continuation of black band which commences behind the eye. Lower parts white or yellow. One of the most common species. Variations occur in the coloration. Food consists of lizards [chipkalee], and frogs [bhaicam]. When old ferocious and bites readily; length 4 feet.——*Comban* (گینڈا - gendá, Hind.; കൊമ്പന്‍ - kompan, Mal.). Tusker or male elephant [q.v.]. Here applied to rhinoceros.

COMB TREE (کنگوئی کا جھاڑ - kangoikájhár, *Hind.*). From shape of leaf. Same as Tootty.

COMERCOLLY (کمارکھالی - kumárkhálí, *Hind.*). Title from a town in lower Bengal. Otherwise Marabou [q.v.] feathers. The fine ash or slate colored feathers so called are the under tail-coverts of adjutant [q.v.] birds.

COMMA (కొమ్మ - komma, *Tel.*). Branch [comboo].——*Commamore* (కొమ్మమూరు - kommamúru, Tel.). From (above + úru, tel. village). Depopulated village, canal; Kistna district, Baupatla talook. Canal, begun as an irrigation channel in 1858-59, was continued in 1877 to meet the Buckingham canal [q.v.]. The head of the canal is at the twelfth mile from Seetanagram, and continues in a south-westerly direction to Pedda ganjam, where connected with Buckingham canal by a tidal lock. At Chebrole bridge, 10 miles from Guntoor, a considerable traffic quits the canal for Guntoor. Three other locks exist at Collimera, Nullamada and Santaravore.——*Commy* (కొమ్మి - kommi, Tel.). Same as Tirauna.

COMORIN (കന്യാകുമാരി - kanyákumári, *Mal.*; குமரி - kumari, *Tam.*). Title is Portuguese corruption from tamul. Cf. cochin, coleroon. Mal. from (kanyá, san. youthful + kumári, san. virgin). Tam. means a virgin. The κομαρία ἄκρον καὶ πόλις of Ptolemy. Compare Cambojam or Khmer. The Periplus says:—"After this there is another place called κομὰρ, where there is a "βριάριον, for which read φρούριον, and a harbour, where also "people come to bathe and purify themselves, . . . for it is "related that a goddess was once accustomed to bathe there "monthly." This monthly bathing in honor of Doorga is still continued. Through encroachments of sea, the harbour has disappeared; but a freshwater well remains in the centre of a rock, some way out at sea. In the Sanscrit legend the virgin goddess was daughter of a shepherdess, born at same date as Krishnan; Krishnan's father was instructed in a dream to remove Krishnan to the house of the shepherdess and to take in return the child born there for fear of Krishnan being killed by Cumsan, Krishnan's maternal uncle. The goddess is otherwise the incarnation of Mauyay [q.v.] or illusion. Or sometimes taken as Doorga [q.v.]. Or again there is a legend that a virgin leapt into the sea. Coomary is regarded by Pooraunic writers as the name of a river, one of the seven great sacred rivers [gungay] of India. Coomary sherpan denotes lord of the Coomary sea-coast. The term Comorin is in some writings used for the whole of the southern portion of the peninsula. Village, Cape, Place of pilgrimage, Sanitarium, Travancore state, Pudmanaubhapooram division, Agasteeshwaram talook; lat. 8° 5′; long. 77° 36′; from Sooshindram S.E. 8 miles; from Bombay S.S.E. 810 miles; from Madras S.S.W. 390 miles; from Manacoody E. 4½ miles; from Trivandrum S.E. 49 miles. The cape is extreme southern point of peninsula. Formed of a circular low sandy point, not discernible above 3½ or 4 leagues. Within two or three cables' length of the south-east portion lies a sloping rocky islet, high above water, with other rocks about it, on which the sea breaks. There are several groups of rocks appearing above water. Westward of this islet the shore is sandy and barren, but eastward it abounds with trees. The land is safe to approach within about two miles, the depth in some places increasing towards shore. Eastward of the rocky islet and about three miles from it is a fort. To north-east the coast is little frequented for 166 miles; as navigation northwards into Bay of Bengal is obstructed by Adam's bridge. Inland, the cape rises in a gradual slope to the base of the ghauts [q.v.], the nearest of which at 4 miles north-west is an isolated, very sharp conical hill, 1,403 feet high, often mistaken for the cape itself. A small white, square pagoda crowns the extremity of the cape. A residency on the coast a little distance from the pagoda [q.v.] is resorted to by Europeans for health. Pilgrims come to worship the goddess and to bathe in the holy waters of the sea, this being one of the five renowned bathing places. There is a Bramin village near the pagoda and habitations of shaunaur and fishermen a little away from it. Sand of different colors is found. The legend of this is that Shiva at Sooshindram wanted to marry the goddess, but the marriage negotiations were broken off and the rice and other grains prepared for the ceremony were converted into sand [manal]. The country around is sandy and consists of palmyras [q.v.].

COMPOUND (کمپونگ - kampung, *Malay*). Means village. Applied by Europeans to the enclosure in which a house stands.

COMPRADORE (خرچ بردار - kharchbardár, *Hind.*). Portuguese from comprar, to purchase. Hind. from (kharch, hind. expenditure + bardár, pers. carrier). A house steward. Cf. curts.

CONA (ಕೋಣೆ - kóne, *Can.*; కోన - kóna, *Tel.*). From (kóna, san. corner). Recess; valley. Ravine; suffix in place names, especially in the Ceded districts [q.v.], as Punchalingaulacona, meaning ravine of the five lingams.——*Conair* (ಕೋನೇರಿ - kónéri, Can.; కోనేరు - kóneru, Tel.). From (above + éri, can. tank). A square tank with steps.——*Conamoogam* (கோணமுகம் - kónámugam, Tam.). From (mukha, san. face). A delta. The principal deltas in S. india are those of the Godavery, the Kistna, the Pennair, and the Cauvery. Vol. I, 391.——*Conamoola* (కోనమూల - kónamúla, Tel.). From (múla, tel. corner). Site of Collector's bungalow at Krishnapatam, Nellore district.——*Conaseema* (కోనసీమ - kónasíma, Tel.). From (kóna, tel. valley + síma, tel. tract). The Godavery delta.——*Conaudo* (కోనాడ - kónáda, Tel.). From (above + nádu, tel. country). Greek name πάρθαλις. Village, Promontory, Port; Vizagapatam dist., Bimlipatam division; pop. 4,128; lat. 18° 1′; long. 83° 37′; from Bimlipatam N. 12 miles; from Madras N.E. 400 miles; from Santapilly S.W. 6½ miles; from Vizagapatam N.E. 30 miles. The point is 2½ miles south of the village. The anchorage for native vessels is in about 5½ fathoms. British vessels seldom visit the port. The Champauvaty falls into the sea here. Salt factory.

CONCAN (कोंकण - konkana, *San.*; کوکن - kokan, *Hind.*; கொங்கணம் - konganam, *Tam.*). In ancient geography signified a kingdom south of Goa. Evidently allied to the Congoo country inland. Now a narrow strip of land, bounded on the east by the Western ghauts from Bombay to Goa. One of Hwen Thsang's nine divisions of s. india; capital Kong-kienna-pu-lo, or Concanapooram. This was the ancient kingdom of the

Cadambas, which for a time rivalled that of the Chalookyas [charitram].——*Concanasta* (कोंकणस्थ - kónkanast'ha, San.). Bramins distinct from concanies. Immigrants from Goa and Bombay canarese districts. Smartas. Are among dravida bramins.——*Concany* (कोंकणी - kónkaní, Mahr.). Pertaining to concan; used of persons or things. Concany bramins are puncha gowdas [q.v.] and are saraswats; included among gowdas; they are by religion rigvedies and madhwas. By occupation they are chiefly traders. Found throughout west coast, especially in Travancore and Cochin. Their family god is at Tripatty.——*Concany resin* (कोंकणधूप - kónkanadhúpa, San.). Same as White dammer.——*Sapta concanam* (सप्तकोंकण - saptakónkana, San.). The seven Concans of Sanscrit geography. See vol. I (128).

CONCH (शंख - shankha, *San.*). Title from greek *κόγχη*, which is from sanscrit. San. from (sham, san. to grow calm); from soothing sound when held to ear. Same as chunk [q.v.].——*Conch flower* (शङ्खपुष्पी - shankhapushpí, San.). Title from white color. Same as Keshinee and Crow-creeper.——*Conch yam* (शङ्खालु - shankhálu, San.). Title from color of root. Same as Wayaka.

CONDAH (కొండ - konda, *Tel.*). From (kunru, tam. rock). Hill; suffix in place names, as Penoocondah, meaning great hill.——*Conda dora* (కొండదొర - kondadora, Tel.). From (dora, tel. chieftain). Tribe in the mountains of Goomsoor.——*Condakirla auva* (కొండకిర్లావ - kondakirlaáva, Tel.). From (kondakara, tel. hill side + áva, tel. lake). Lake; Vizagapatam dist., Sarwasiddhy tal.; lat. 17° 36′; long. 83° 02′; from Vizagapatam S.W. 20 miles; from Yellamanchily N.E. 9 miles; from the sea N. $8\frac{3}{4}$ miles. One of main sources of irrigation in district. Fed by hill streams and supply-channels from the Shaurada nuddy.——*Condanaroos* (صحرائی سانپ - sahráísámp, Hind.; కొండనరుసు - kondanarusu, Tel.). From (above + arusu, tam. king). Desert snake. Term co-extensive with the family Psammophidæ, ophidii colubriformes, ophidia [sarpam], reptilia [sarpy, 19], of naturalists [jantoo]. The family approaches in some respects the Dryophidæ, or whip snakes [q.v.]. The only species known here is Psammophis condanarus. Alias Coluber condanarus; Psammophis indicus, tæniata. Back brown, with black edge along each side; brown, black-edged band along second outer series of scales, separated from back by a brownish-grey band, and from the belly by a yellow one; belly yellow, with black line along each side; head uniform light brown above; yellow, black-edged streak from rostral shield along canthus rostralis above the orbit to the neck; a second along the upper half of the labial shields.——*Condapully* (కొండపల్లె - kondapalle, Tel.). From (above + palle, tel. village); called after condadoo a shepherd. Hind. name (mustafánagar), meaning the chosen + city. Village, Hill, Bungalow; Kistna dist., Bezwada tal.; pop. 4,758; acres 8,295; lat. 16° 37′; long. 80° 35′; from Bezwada N.N.W. $8\frac{1}{2}$ miles; from Masulipatam N.W. 50 miles. Picturesquely situated. Now unimportant, but formerly of some strength, giving its name to the province called Moostafahnugger by Mahomedans. Built about A.D. 1360 by Anoovaima reddy of Condaveed and called Condapully after the shepherd Condadoo, who showed the site to the Reddy king. From the Reddy dynasty it passed to the Rajah of Orissa, and from them it was taken in 1471 by Mahomed shah II of Goolburga. The garrison revolted about 1476 and in 1477 the place stood a siege of six months, at the close of which the young king with his own hands killed the Bramins officiating at a Hindoo temple in the fort. In 1481 the encampment at the foot of Condapully was the scene of the tragic fate of the aged minister Cauja mahomed gawaun. Taken about 1515 by Krishna deva roya and restored to the Orissa rajahs when the Kistna was made the boundary between their territory and that of Vijianugger. Taken about 1521 by Sultan coolee cootb shah of Golcondah. For the next fifty years it remained the out-post of the Mahomedan power. In 1557 Bezwada and Ibrampatam, both in the neighbourhood of Condapully were attacked by the Commandant of Condaveed. It was a favorite residence of Ibrahim shah, king of Golcondah, 1530–1580, and during the reign of his great grandson, Sultan abdoollah, 1661--1669, the Bala hissar was built of Burmese teak [q.v.]. In July 1687 the fortress was treacherously surrendered to Aurungzeeb. On the 10th March 1766 General Calliaud took it by assault from Nizam ally. A small detachment of Company's troops was stationed at the foot of the hill until January 1859, when the station was abandoned. The only remaining barrack room is now utilized as a travellers' bungalow. Manufacture of small figures and toys from a very light wood growing on the hills.——*Condaveed* (కొండవీడు - kondavídu, Tel.). From (above + vídu, tel. town). Sanscrit name (kundinapura), meaning basin + city. Hind. name (murtazánagar), meaning moortezah khan, the general + town. Hill range village; Kistna dist., Narsarowpett tal.; pop. 2,129; acres 3,314; lat. 16° 15′; long. 80° 17′; from Guntoor S.W. 13 miles; from Narsarowpett E. $13\frac{1}{4}$ miles. There are two forts on the hill and one below; the last attributed to Krishna deva royel. The fortifications are much overgrown with jungle, but in good preservation. The greater part of the works are on the western side of the mountain, the principal summits of the ridge of the pettah being connected by a wall extending nearly $1\frac{1}{4}$ miles to the south. From the southern extremity a line almost at right angles passes over one of the highest peaks at half a mile from which it descends about the same distance and forms a junction with the southern face of the fort in the plain. A second line projects from the above-mentioned peak in a north-westerly direction. From the northern front of the lower fort a line of works extends up the mountain in an easterly direction until it joins the central ridge. There are also some detached works within the cultivated parts as well as a line on the high ridge immediately east of the central one. The lower fort was a strong enclosure at the foot of the hill, 5 furlongs in length by $2\frac{3}{4}$ in breadth, facing W.N.W. The walls are built of stone, with a parapet and loop-holes, well defended by bastions in the main line and cavaliers at the angles. That at the N.W. angle is the most perfect. The houses remaining in the fort are in ruins and chiefly occupied by Mussalman families. There are two small bungalows constructed in recent years by European officials. For history of the Condaveed reddies see vol. I (150). The Mahomedans, who captured Condaveed in 1565 on the overthrow of the Vijianugger dynasty, changed the name to Moortezahnugger after Moortezah khan, a distinguished General of Mahomed coolee cootb shah. The fortress remained under Mussalman rule until 1752, when it was given by the Nizam to the French. In 1757 Bussy only succeeded in capturing the place by starving out the garrison. This was the last instance of hostilities at Condaveed. The Fowjdar of Condaveed subsequently removed his residence to Guntoor, leaving in the fort a Killadar with a small force. The place was finally made over to the English in September 1788. On the highest peak of the hills, three miles east of the village, is a small mantapam [q.v.] built over an impression of Vishnoo's foot, called by Mussalmans Adam's foot [adam's peak, collam, dharmarajacull]. East of the town is a large ruined sculptured Vishnoo temple with an inscription, dated 1564, built in the time of the Reddy sovereigns. Inside the building known as the Treasury is a small temple with sculptured figures. Fifty yards west of this is an inscription dated A.D. 1525. Shiva temple of Ramalingam, north of the village, has an inscription dated A.D. 1666 recording its erection, and a finely sculptured figure of Veerabhadran. At Condaveed Mahomedans extract essences and fragrant oils [attar] from various flowers which are sent to Hyderabad for sale. They also manufacture a strong rough brown paper. The range of hills of this name occupies the north-east corner of the talook and overlooks the town of Guntoor. It forms a connected chain running by north-east and south-west for $9\frac{1}{2}$ miles, besides some unconnected heights to the north-east which extend it two and three miles further. Colonel Lambton placed a Trigonometrical station upon the highest peak, rather to the southward of the middle of the range. The outline of the ridge is uneven, having many projecting conical peaks and at a mile north of the station it is very low. To the south-west of the station it forms a box or tableland which connects the main ridge with a parallel or collateral ridge, about four miles long, terminating on the south by a conical peak called Sunna condah. The village of Condaveed lies at the western foot of the central ridge. Trig. station in lat. 16° 15′ 16·92″; long. 80° 19′ 48·04″; height 1,664 feet.——*Condayya* (ಕೊಂಡಯ್ಯ - kondayya, Can.). From (above + ayya, tel. master). Hindoo 2nd or pers. name [peyar].——*Condla* (కొండ్ల - kondla, Tel.). From (konda, tel. hill). Locative plural form. Suffix in place names as Goolcondla, meaning the bird's hill.

CONDAY (கொண்டை - kondai, *Tam.*). Top knot, in men or women [coodoomy].——*Condaicutty* (கொண்டைக்கட்டி - kondaikkatti, Tam.). From (above + kattu, tam. to tie); from wearing hair done up into a knot on top of the head. A class of Vellaular [jauty]. Number about 1,800.

CONDRAY (கொன்றை - konrai, *Tam.*). Plants of cassia [q.v.] genus, especially cassia fistula, linn. Includes also a Pithecolobium. Note that there are four species of cassia in the market:—Cassia lignea or bark [cassia cinnamon], Cassia fistula [common condray], Cassia buds [cassia cinnamon], and Cassia senna [senna].——*Common condray* (आरग्वध - áragvadha, San.; भावई - bhávaí, Mahr.; कक्काई - kakkáí, Conc.; خیار شنبر - khiyárshambar, Ar.; خیار چنبر - khiyárchambar, Pers.; کرمالہ - girmálah, Hind.; املتاس - amaltás, Dec.; ಕಕ್ಕೆ - kakke, Can.; ಕೊಂಡೆ - konde, Too.; రేల - réla, Tel.; ସୁନାରି - sunari, Oor.; കൊന്ന - konna, Mal.; ඇහැල - ahala, Singh.; கொன்றை - konrai, Tam.). San. from (áraja, san. a red variety of cutaneous disease + vadh, san. to kill); as a curative [wild condray]. Ar. from persian. Pers. from (khiyár, pers. cucumber, cucumis sativus, linn. + chambar, pers. necklace); from structure of pod. Can. from (kakku, can. to scratch) [wild condray]. Mal. from (kón, mal. king); perhaps from flowers worn as garland by kings. Tam. like malayalam. San. also (suvarnaka), meaning having golden color [nauga champak, shrubby balah]; (rájavriksha), meaning king + tree; (rájataru), meaning king + tree. Ar. also (kathalulhind), meaning indian cucumber. Can. also (kondemara); (araginamara); (árévatamara); (takkemara). Tel. also (kólaponna), meaning straight + calophyllum inophyllum, linn. Mal. also (svarnáviram), meaning gold + cassia auriculata, linn., from yellow flowers. Tam. also (sharakkonrai), meaning wreath

+the plant. Greek γλυκοκάλαμον, κασσία μέλαινα. Bark in Greek σύριγξ, in Latin fistula. Title otherwise Amaltas, Black cassia, Common cassia, Connay, Gold flower tree, Indian laburnum, King's tree, Pudding-pipe tree, Purging cassia, Shara condray. Botanically Cassia [soovarnacam] fistula, linn., leguminosæ [vricsham, 48]. Alias Bactyrilobium fistula; Cassia fistula, rhombifolia; Cathartocarpus fistula. Tree, middling size, with usually smooth bark; dense dark-green foliage; leaflets about five pairs, broadly ovate, obtuse or retuse, glabrous; petioles without glands; racemes terminal, long, lax, drooping; flowers on long pedicels; legumes cylindric, pendulous, glabrous, smooth, dark brown, nearly 2 feet in length; cells numerous, each containing one smooth, oval, shining seed, immersed in black pulp; pendulous racemes of flowers bright yellow, fragrant; like laburnum; flowering from may to september; common in dry forests. Mucilaginous pulp surrounding the seeds is medicinally laxative, consisting chiefly of sugar [q.v.] and gum, entering into composition of confection of senna; flowers are given in decoction in stomachic affections; roots are a febrifuge; bark and leaves rubbed up and mixed with oil are applied to pustules; root is a strong purgative; leaves parched are eaten for medicinal purposes; gives to pharm. cassiæ pulpa, officinal, also in british. Pulp of pods used as famine food. Bark used by tanners; the proportion of astringent extract being much smaller than in auriculata, and tends to thicken the leather [chamrah]; bark used along with terminalia; ashes used as mordant [cauram]; an astringent gum [gond] exudes. Wood strong, elastic and durable, close and straight-grained, dark brown color often finely mottled, and works well; used in ship-building and for bows and axles, and is also suited for furniture.——*Peacock condray* (மயிற்கொன்றை - mayirkkonrai, Tam.). Title from flower. Same as Gold mohur tree, and as Foreign tungaid.——*Red condray* (ఉరిమిడి - urimidi, Tel.; රතුවා - ratuvá, Singh.; சிவப்புக்கொன்றை - shivappukkonrai, Tam.). Title from rose-colored flower. Singh. from (ratu, singh. red); from pink flowers. Tam. from (shivappu, tam. redness + konrai, tam. cassia fistula, linn.). Tel. also (usikimánu). Tam. also (varikkonrai), meaning stripe condray; (karungonrai), meaning black condray, from dark fruit. Title otherwise Horse cassia, Roxburgh's cassia. Botanically Cassia [soovarnacam] marginata, roxb., leguminosæ [vricsham, 48]. Alias Cassia emarginata, roxburghii; Cathartocarpus marginatus, roxburghii. Small tree with dull light brown bark and wide-spreading branches; small leaflet foliage; racemes of small rose-colored flowers, something like weeping ash; the fruit is cylindric, 8--12 inches long, as thick as a man's little finger, of a dark brown color and having transverse partitions. Planted in gardens for ornamental purposes. Wood close-grained, hard and durable, works smoothly and stands a good polish, when fresh deep rose colored, eventually turns reddish brown.——*Tree condray* (కొండతంటెపుచెట్టు - kondatantepuchettu, Tel.; വലിയതകര - valiyatakara, Mal.; වල්හල - valahala, Singh.; வெள்ளைத்தகரை - vellaittagarai, Tam.). Title from size. Tel. from (konda, tel. hill + tantepuchettu, tel. cassia tora, linn.). Mal. from (valiya, mal. large + takara, mal. cassia tora, linn.). Singh. from (val, singh. jungle + ahala, singh. cassia fistula, linn.). Tam. from (vellai, tam. white + tagarai, tam. cassia tora, linn.). Tam. also (mañjakkonrai), meaning yellow + condray tree; (kunduppúkkonrai), meaning globe flower condray. Title otherwise Sulphur-flowered cassia, Surat condray, Tree senna, Wild condray. Botanically Cassia [soovarnacam] glauca, lam., leguminosæ [vricsham, 48]. Alias Cassia arborescens, enneaphylla, planisiliqua, sulphurea, surattensis; Senna arborescens. Tree, with numerous branches spreading in every direction, young ones irregularly angled; leaflets four to six pair, with an erect gland between each of the two to three lower pair, oval, broadest at or below the middle, the upper ones the largest, under side glaucous and slightly pubescent; stipules linear-subulate, falcate; racemes axillary, corymbiform, long-peduncled, erect, crowded near the ends of the branches, about half the length of the leaves; petals all nearly equal; anthers all fertile, equally long, the two lower on rather longer filaments than the others; legumes drooping, linear, straight, thin, the margin a little tumid; flowers large, sulphur, long-pedicelled; the pedicels subtended by an ovate caducous bract; flowering nearly all year. Cultivated in gardens. Bark and leaves prescribed in diabetes and gonorrhœa.——*Wild condray* (आरग्वध - áragvadha, San.; کچلورا - kachlorá, Hind.; ಕಾಡಕೊಂಡೆ - kádakonde, Can.; ಕಕ್ಕೆಮರ - kakkemara, Too.; കാട്ടുകൊന്ന - káttukonna, Mal.). Title from resemblance. San. from (araja, san. skin-disease + vadh, san. to kill) [common condray]. Can. from (kádu, can. wild + konde, can. cassia fistula, linn.). Too. from (kakke, too. cassia fistula, linn. + mara, too. tree) [common condray]. Mal. from (kátu, mal. forest + konna, mal. cassia fistula, linn.). Title otherwise Venezuela soap bark tree, Wight's inga. Botanically Pithecolobium [auragvadham] bigeminum, benth., leguminosæ [vricsham, 48]. Alias Inga bigemina, wightiana; Mimosa bigemina, lucida. Tree unarmed; leaves conjugately or bipinnated; pinnæ one to two pair, with a gland between each pair; leaflets two to three pair, ovate-lanceolate, accuminated, shining, with a gland between each pair; racemes panicled, terminal, many-flowered; flowers in small globose heads, white; legumes spirally twisted; flowering in hot season. Decoction of leaves, medicine for leprosy [cooshtam] and stimulant for growth of hair; hard and tough wood.——*Yellow condray* (ಸೀಮೆತಂಗೆಡಿ - símetangedi, Can.; కొండతంగేడు - kondatangédu, Tel.; മഞ്ഞക്കൊന്ന - mañňakkonna, Mal.; රවා - vá, Singh.; மஞ்சள்கொன்றை - manjalgonrai, Tam.). Title from color of flowers. Can. from (síme, can. foreign + tangedi, can. cassia auriculata, linn.). Tel. from (konda, tel. hill + tangédu, tel. cassia auriculata, linn.). Mal. from tamul. Tam. from (mañjal, tam. yellow + konrai, tam. cassia fistula, linn.). Tel. also (kurumbi), meaning clustering. Singh. also (aramaná). Tam. also (karungonrai), meaning black condray from heart-wood; (malaiyávirai), meaning hill + cassia auriculata, linn.; (shímaiyávirai), meaning foreign + cassia auriculata, linn. Title otherwise Foreign tungaid, Hill tungaid, Iron-wood [cassa, chowkmaram, dark vail, deccany deodar, foreign ilanjy, nauga champak], Manjal condray, Sumatra senna. Botanically Cassia [soovarnacam] siamea, lamk., leguminosæ [vricsham, 48]. Alias Cassia florida, sumatrana; Senna sumatrana. Small tree, every branch terminating in a large panicle of deep yellow blossoms; in flower nearly all year; common wild in jungles; also planted and ornamental. Sap-wood whitish, rather large; heart-wood dark-brown, nearly black, very hard; very durable; good fuel for locomotives.

CONDY (கொண்டி - kondi, *Tam.*). Stray cattle.——*Condy otty* (கொண்டியோட்டி - kondiyótti, Tam.). From (above + ótti, tam. driver). A class employed on the Cauvery channels, whose duty is that of keeping stray cattle off the channel and river-banks and off the fields.

CONGA (కొంగ - konga, *Tel.*; கொக்கு - kokku, *Tam.*). Any crane, stork or heron [adjutant bird, deerghachanchoocam, paddy bird]. Compare, where transl. is of first term:—Anastomus oscitans (gullákonga), shell; Ardeola leucoptera (guddikonga), blind; Ardetta cinnamomea (dósikonga), sinner; Buphus coromandus (svátikonga), rainy season; Butorides javanica (dósikonga), sinner; Ciconia leucocephala (shankumpdakonga), conch + neck; Herodias alba (málakonga), pariah; Herodias garzetta (nallamukkukonga), black + bill; Leptoptilos argala (pínugulakonga), corpse; Phœnicopterus roseus (púgonga), flower; Platalea leucorodia (gantemukkukonga), spoon + bill; Tantalus leucocephalus (errakálikonga), red + leg. See gloss. paragraphs. The Tamul Cooral has the following:—கொக்கொக்க கூம்பும்பருவத்து மற்றதன் குத்தொக்க சீர்த்த விடத்து—"At the time when "one should use self-control, let him restrain himself like a "heron; and let him, like it, strike when there is a favorable "opportunity." There is a Tamul proverb:—கடல்வற்றிக் கருவாடு தின்னலாமென்று உடல் வற்றிச் செத்ததாம் கொக்கு—"It is said that the stork died while waiting for the "ocean to dry, in the hope of getting a supply of dried fish."

CONGOO (கொங்கு - congu, *Tam.*). Means toddy. The country so called; otherwise Poozhy or country of dry fields. Ancient Hindoo kingdom comprising the modern Salem and Coimbatore districts. Existed from the commencement of the Christian era down to the end of the ninth century, when it was overthrown by the Chola kings of Tanjore and annexed to their dominions. To the east were the Chola and Paundyan kingdoms; and on the west, the Keralam. Two dynasties Ratta and Gunga are said to have ruled the country. The capital of the first was Scandapooram somewhere near Guzzelhutty pass, removed to Talacaud near Collegaul in Coimbatore district, in the third century. Jeinism and subsequently Sheivism was the prevailing religion of the kings, who seem to have had considerable intercourse with the west from the discovery of numerous coins of the Roman emperors. This kingdom was subsequent to Cheram. See vol. I (13), (129) [charitram]. There is a Tamul proverb:—கொங்கிலே குறுணி விற்கிறதை இங்கு எண்ணத் திற்கு—"Why remain here when grain sells cheap in the "Congoo country;" showing its fertility.——*Caungyam* (காங்கயம் - kángayam, Tam. kángyam *). From (kongu, tam. country so named + ayam, tam. ground).—"*a*" Deputy tahsildarry, Coimbatore district. Pay Rs. 70.—"*b*" Village, Deputy tahsildar's station; Coimbatore dist., Dharaupooram tal.; pop. 6,956; acres 13,847; lat. 11° 00′; long. 77° 36′; from Coimbatore E. 40 miles; from Dharaupooram N. 18½ miles; from Erode S.S.W. 26 miles; from Madras S.W. 230 miles; from Ootacamund E.S.E. 63 miles; from Pollachy N.E. 45 miles; from Suttimungalam S.S.E. 39 miles. Trace of ancient kingdom of Congoo [q.v.] remains in this name. Elevated on dry gravelly soil. Former head-quarters of district, and till 1874 of Sub-collector. Once famous for breed of cattle [maud]. Still noted for ponies. Busy market town. A mile S. is large Shiva temple.——*Conganan* (கொங்கணன் - konganan, Tam.). Very ancient Tamul philosopher and physician, native of Coimbatore country. Instructed by the Aryan missionary Agastyan on Pothigay [q.v.]; probably one of his first converts. Wrote against polytheism, Conganar nyaunam; and two treatises on medicine, Cadaycaundam and Goona vaugadam. Example from Nyaunam:—கடவுளோடொருவனுண்டே வேதமொன்றே காரணசற் குருதீட்சைதானுமொன்றே—யடைவுடனே யவனருளும் பதவியொன்றே யம்புவியின் மனுப்பிறவி யானதொன்றே—நடைவழியும் பலமனுவோர்க் கொன்

றேயல்லால் நால்வேதமறுசமய நடைக்கைவேருய்த்—திடமுடையதேவர்பலருண்டென்போர்கடிய்நரகுக்குள்ளாவர் திண்ணந்தானே—"There is but one God, there is "but one Veda, there is but one way of initiation by the good "spiritual guide, there is but one kind of bliss which he grants, "and there is but one genus amongst mankind upon the earth. "They who hold the contrary by asserting that there are four "Vedas and six sects and many gods, will surely enter the fiery "hell" [concan].——*Congoo desha rajakkal* (*கொங்குதேசராசாக்கள்* - konguthésarásákkal, Tam.). From (above + désha, san. country + rájá, san. king). A book describing the series of the Congoo or Chera rulers, from Veera roya chuckravurty to rajah Mulladevan. It contains distinct chapters on the Chola, Hoysala, and Vijianugger kingdoms, these rulers having been successively conquerors of the Congoo country.

CONICOPOLY (*கணக்கப்பிள்ளை* - kanakkappillai, *Tam.*). From (kanakku, tam. account + pillai, tam. title of the pillai caste). Caste-title. The corresponding teloogoo term is curnum. A village accountant. Now mostly used at Madras for a shipping clerk. See vol. I, 112.

CONIMERE (*கூனிமேடு* - kúnimédu, *Tam.*). From (kúni, tam. humped + médu, tam. mound). South arcot dist., Tindivanam tal.; pop. 1,933; acres 4,675; lat. 12° 05′; long. 79° 56′; from Cuddalore N.N.E. 27 miles; from Pondicherry N.N.E. 11 miles; from Tindivanam S.E. 19¼ miles; from the sea W. ½ mile. Factory established by East india company in 1682; firmaun [q.v.] for fortified settlement and liberty of trade obtained from Ramrauz on a present of 800 pagodas, 1688; withdrawn on the purchase of Fort St. David, 1698; ceded with the rest of the soobah of Arcot by treaty with Azeem ool dowla, 31st July 1801. The factory stood on a sand-hill about 500 or 600 yards from the sea and covered an area of about 400 feet square. The foundations are still in existence.

CONJEE (काञ्जिक - káñjika, *San.*; کانجی - kánjí, *Hind.*; గంజి - ganji, *Tel.*; *கஞ்சி* - kañji, *Tam.*). Means boilings in tamul. Starch. So the water in which rice or other starchy grains has been boiled. The article being used as invalid diet, the word is applied to such slops generally. There is a Tamul proverb:—*துழாவிக் காய்ச்சாதது கஞ்சியும் அல்ல, விசாரிக்கட்டாதது கலியாணமும் அல்ல*—"Conjee requires continued "stirring while boiling, and marriage requires careful consider-"ation before being entered on." Conjee is used in making paper and as a paste, also by weavers in preparing thread for the loom [nesavoo]; also by dyers [shauyam], bleachers, and washermen [dhoby]; sometimes by bricklayers, mixed with whitewash to increase adhesion. Distinguish from conjy.

CONJEEVERAM* (کنچی - kanchí, *Hind.*; *காஞ்சீப்புரம்* - káñjíppuram, *Tam.*). From (káñchí, san. abrus precatorius, linn. + pura, san. city). Sanscrit name (káñchípura), meaning shining city; also (mókshapurí), meaning emancipation + city; also (satyavratakshétra), the menoo, so called + sacred place, from the plain on which the town is built. Tamul name (kaççi); also (tirukkaççi); also (perumálkóvil), meaning vishnoo, the great god + temple, the last in use among the veishnavas. Kien-chi-pu-lo of Hwen thsang. Indigenous name is Cutchy, from which the Sanscrit is corrupted; meaning the heart-leaved moon-seed plant, tinospora cordifolia, miers [goolancha].——**(1)** Talook, Chingleput district. Tahsildar's pay Rs. 200. Area 514 square miles. Population 176,123. Languages Tamul, Teloogoo. W. of district. Bounded north by Trivellore talook, east by Sydapett and Chingleput talooks; and south and west by North arcot district. The general appearance is monotonous, there being only low conical hills on the north-east. The general level rises gradually, from the Palaur towards the north and west. There is an entire absence of wood, and scrub jungle is to be found in very small quantities. Along the northern bank of the river palmyra [q.v.], cocoanut [q.v.] and tamarind [q.v.] trees have been planted. The soil is generally inferior, being either stony or mixed with lime [choonam], gravel, soda [sowdoo] and laterite [q.v.]. Crops are those general in Sydapett and Chingleput, with the addition of indigo [q.v.]. The weaving [nesavoo] industry has been reduced by the competition of Manchester goods. Country cloths of all kinds are still manufactured. There is a considerable trade in manufactured brass [pittalay] and other metals [loham], as well as jewellery. There are also a good many indigo vats and godowns scattered over the talook, but this industry seems to be languishing. Coarse paper-making on a small scale is also carried on. The chief sources of irrigation are the Palaur and Corteliaur. The Palaur irrigation is by means of the usual flood and spring channels [q.v.] on both banks of the river in the south of the talook and by the Cumbacaul channel. Camping grounds:—Balchetty chuttram, Royajee chuttram and Shreepermatore. Petty zemindarries:—Agaram, Baulanallore, Bheemantaungal, Bheemapooram, Cariyamungalam, Cattagaram, Caundavellore, Cauranayputt, Cauranaytaungal, Chittore, Chowkantaungal, Conoor, Cotore, Jamoonamputt, Keevalore, Moothoocore, Nemmaily, Ooloondey, Periyantaungal, Shattiray, Shelayanore, Soomitrambaid, Tandalam, Tattanore, Todoocaud, Vallacottah, Vayalore, Veipore, Vullam, Yerayore. Places of archæological interest:—Aurpaukam, Conjeeveram, Cooram, Madooramungalam, Manimungalam, Mookkayalore, Muttavaid, Orattoor, Peroondore, Poollalore, Shreepermatore, Tennairy, Tirpacooly, Tripattycoondram, Vadakkapett, Yelayanaurvainore. Principal Trig. station, Malayaputt. The leading places, &c., in the talook are the following.——*Baulanallore* (*பாலநல்லூர்* - pálanallúr, Tam.). From (bála, san. proper name + nal, tam. good + úr, tam. village). Zemindarry, Village; pop. 556; acres 1,053; lat. of village 12° 55′; long. 79° 58′; from Conjeeveram N.E. 15 miles; from Sydapett S.W. 22 miles. Peshcush Rs. 455. Many Christians.——*Caundavellore* (*காந்தவேலூர்* - kándavélúr, Tam.). From (kánta, san. beautiful + vélúr, tam. town, so called). Zemindarry, Village; pop. 474; acres 2,200; lat. of village 12° 55′; long. 79° 55′; from Conjeeveram N.E. 12 miles; from Sydapett W. 25 miles. Peshcush Rs. 595. Noted for quarry stones.——*Cauranayputt* (*காரணைப்பட்டு* - káranappattu, Tam.). From (kár, tam. black + anai, tam. bund + pattu, tam. village). Zemindarry, Village; acres 197; lat. of village 12° 54′; long. 79° 59′; from Conjeeveram N.E. 15 miles; from Sydapett S.W. 22 miles. Peshcush Rs. 60. Formerly country residence of Collector of Chingleput.——*Cauranaytaungal* (*காரணைத்தாங்கல்* - káranaittángal, Tam.). From (kár, tam. black + anai, tam. bund + tángal, tam. pond). Zemindarry, Village; pop. 270; acres 436; lat. of village 13° 00′; long. 80° 02′; from Conjeeveram N.E. 20 miles; from Sydapett W. 17 miles. Peshcush Rs. 148.——*Chengalroyan chuttram* (*செங்கல்ராயன்சத்திரம்* - shengalráyansattiram, Tam. chengalráyanchattram *). From (shengalráyan, tam. proper name + sattra, san. choultry). Tam. also (uvvéri), meaning penance + tank. Village, Railway station; pop. 405; lat. 12° 56′; long. 79° 45′; from Conjeeveram, N. 6 miles; from Sydapett W. 36 miles. Poor pilgrims obtain provisions in this village on tickets.——*Cheyaur* (*செய்யாறு* - sheyyáru, Tam.). See sep. title.——*Conjeeveram* (*காஞ்சீப்புரம்* - káñjíppuram, Tam.). See below.——*Cotore* (*கோட்டூர்* - kóttúr, Tam.). From (kóttam, tam. agricultural tract + úr, village). Zemindarry, Village; pop. 1,369; acres 1,806; lat. of village 13° 00′; long. 79° 52′; from Conjeeveram N.E. 12 miles; from Sydapett W. 28 miles. Peshcush Rs. 1,509.——*Cumbacaul* (*கம்பக்கால்* - kambakkál, Tam.). From (kambai, tam. river so called + kál, tam. channel). Channel. Taken off the Palaur at the same anicut which supplies Cauverypauk tank in the North arcot district, about 25 miles west of Conjeeveram. Flows along a ridge which runs on the western and northern sides of the talook, and fills chains of tanks, sometimes two, three, and four deep on each side of its course. The total irrigation thus supplied supports a revenue of about Rs. 44,000. It is a native work, improved about thirty years ago, and there is a project restoring the entire native scheme, which included a branch running south-east across the Conjeeveram and Chingleput talooks, and which was designed to irrigate lands up to within a few miles of the coast near Tirporore.——*Daumal* (*தாமல்* - támal, Tam.). From (támarai, tam. lotus, nelumbium speciosum, willd.). Village; pop. 2,356; acres 4,591; lat. 12° 53′; long. 79° 39′; from Conjeeveram W.N.W. 8¼ miles; from Sydapett W. 43 miles. Westernmost village of the district. Large Shiva temple. Large tank.——*Keelcherry* (*கீழ்ச்சேரி* - kízhççéri, Tam.). From (kízh, tam. east + shéri, tam. village). Village; pop. 1,355; acres 649; lat. 13° 02′; long. 79° 54′; from Conjeeveram N.E. 16 miles; from Sydapett W. 25 miles. Inhabited by Roman catholic descendants of immigrants who came from Guntoor during famine of 1787 under Father Manente.——*Malayaputt* (*மலையப்பட்டு* - malaiyappattu, Tam.). From (malai, tam. mountain + pattu, tam. village). Trig. station; lat. 12° 54′ 51·70″; long. 80° 03′ 19·65″; height 468 feet; from Colatore N. 21 miles; from Conjeeveram E.N.E. 21 miles.——*Manimungalam* (*மணிமங்கலம்* - manimangalam, Tam.). From (mani, tam. beauty + mangala, san. prosperity). Village; pop. 1,767; acres 2,725; lat. 12° 55′; long. 80° 06′; from Conjeeveram N.E. 23 miles; from Sydapett S.W. 14 miles. One of the 16 pergunnahs of the old jagheer [q.v.] of Chingleput. A temple with apsidal gopooram [q.v.], Permaul coil and erect stone in front of it. Rajagopaul permaul temple.——*Mappaid* (*மப்பேடு* - mappédu, Tam.). From (má, tam. great + pédu, tam. village). Village, Government; pop. 2,101; acres 3,881; lat. 13° 02′; long. 79° 55′; from Conjeeveram N.E. 17 miles; from Sydapett W. 24 miles.——*Maugaral* (*மாகரல்* - mágaral, Tam.). From (má, tam. great + kazhal, tam. the bonduc creeper, cæsalpinia bonducella, flem.). Sanscrit name (mahákarapura), meaning mahacaran, the long-armed giant + town. Village, Government; pop. 1,488; acres 2,686; lat. 12° 43′; long. 79° 49′; from Conjeeveram S.S.E. 9 miles; from Sydapett W.S.W. 37 miles.——*Mosarwaukum* (*முசரவாக்கம்* - musaravákkam, Tam.). From (musiru, tam. large red ant + vákkam, tam. village). Village; pop. 2,099; acres 3,104; lat. 12° 52′; long. 79° 40′; from Conjeeveram W. 6 miles; from Sydapett W. 42 miles. Rich agricultural village on the great western trunk road. Site of an entrenched camp occupied by Hyder.——*Palaur* (*பாலாறு* - páláru, Tam.). See sep. title.——*Paranthoor* (*பறந்தூர்* - paranthúr, Tam.). From (parundu, tam. a kite + úr, tam. village). Sanscrit name (gridhrapura), meaning vulture + town. Village, Government;

pop. 1,471; acres 3,274; lat. 12° 57′; long. 79° 48′; from Conjeeveram N.N.E. 7¼ miles; from Sydapett W. 33 miles.——*Perambaukam* (பேரம்பாக்கம் - pérambákkam, Tam.). From (peru, tam. great + pákkam, tam. village). Village; pop. 1,415; acres 1,359; lat. 13° 02′; long. 79° 52′; from Conjeeveram N.N.E. 15½ miles; from Sydapett W. 27 miles.——*Poollalore* (புள்ளலூர் - pullalúr, Tam.). See sep. title.——*Shreepermatore* (ஸ்ரீப்பெரும்பூதூர் - shirípperumbúthúr, Tam.). See sep. title.——*Tirpacooly* (திருப்பக்குழி - tiruppakkuzhi, Tam.). From (tiru, tam. holy + pul, tam. a bird + kuzhi, tam. pit). Sanscrit name (jatáyutírt'ha), meaning jatauyoo, the sacred kite + place of sacred waters; also (gridhrasaras), meaning vulture + tank. Village, Government; pop. 1,582; acres 1,439; lat. 12° 53′; long. 79° 41′; from Conjeeveram W.N.W. 5¾ miles; from Sydapett W.S.W. 41 miles. Temple to Jatauyoo.——*Wallajahbad* (والاجاهباد - wálájáhbád, Hind.). See sep. title.——**(2)** Deputy tahsildarry, Chingleput district. Pay Rs. 100.——**(3)** Town, Municipality, Talook, special town magistrate, Sub-registrar's head-quarters, Place of pilgrimage, Railway station; Chingleput dist., Conjeeveram tal.; pop. 42,548; acres 2,276; lat. 12° 50′; long. 79° 46′; height 274 feet; from Arcot E. 27 miles; from Bangalore E. 140 miles; from Chingleput W.N.W. 20 miles; from Cuddalore N. 75 miles; from Madras W.S.W. 45 miles; from St. Thomas' mount W. 37 miles; from Sydapett W. 38 miles. One of the seven holy cities of India, called the Benares of the south. Second in antiquity to Surat. On the railway between Arconum and Chingleput, in a valley on route from Madras to Arcot. The town is five or six miles long; the streets are mostly broad, and planted on both sides with cocoanut and bastard cedar trees; many gardens and topes, under the shade of which weavers have their looms [nesavoo, tarry]. The Vaigavaty on the west contributes to fertility of valley. An inscription of Poolikeshy of the Chalookyan dynasty is to the effect that he conquered the Chola king and burned Conjeeveram. The date of this ruler is about 489 A.D. In fourteenth century became the capital of Tondaimundalam. After the fall of the Vijianugger family in 1644 was subject to Golcondah princes, and afterwards, passing under Mahomedan rule, became part of Arcot dominions. Captured by Clive from French in 1751; in same year, taken by Razah sahib; recaptured by Clive in 1752; in 1757, the French beaten off in an attack upon the pagoda set fire to the town; in 1758 British garrison was temporarily withdrawn on account of the expected advance of the French upon Madras, but was soon sent back with reinforcements; retaken from the French in 1759 and plundered by Hyder ally in 1780. Conjeeveram succeeded Carangooly as Collector's head-quarters in 1825 and remained so till 1830, the Collector's records and treasury remaining there for thirty years longer. There are three divisions in the place connected with religion; namely, Jeina canjy, Shiva canjy, and Vishnoo canjy. As to Jeina canjy there are a few houses on the west side of the river where there is a temple, containing a representation of Booddha. Hwen thsang speaks of it as the capital of Dravida ruled by the Chola dynasty, and a great Booddhist centre. About the eighth century began a Jeina epoch, and traces of this religion still exist in the neighbourhood. There is a local legend of a dispute between Booddhists and Jeinas, and the latter being crushed in oil-mills [gaunam]. According to popular belief there are ten thousand lingams [q.v.] here. They may be seen set up at every turn. The largest and oldest temple of Conjeeveram is to Shiva, and the object of worship there is the earth-lingam [puncha lingam]. This is the head-quarters of the Adweitam [q.v.] doctrine. The enclosure possesses some large gopoorams, several mantapams and a hall of 1,000 pillars. The great tower erected over the grand entrance is the highest building of the kind in India. There are two handsome porches in front of the great gopooram built by Krishna deva roya of Vijianugger. Between the vimaunam [q.v.] and the great gopooram [q.v.] is a very old stone building covered with inscriptions. The building was often made into a fort during the wars of the Carnatic. Hyder ally has left the mark of his cannon shot on the large doors of the eastern gate as well as on the tower and gateway itself. A smaller temple dedicated to Vishnoo under the name of Varadaraja sawmy is the richest and most important religious institution in Conjeeveram. It is the centre of the Vishishtaudweitam [q.v.] school of ethics. It has two enclosures, the inner one being closed to Europeans and unbelievers. The first gopooram is severe in outline and is not plastered over with figures of Hindoo mythology. It has a number of inscriptions. The third important temple is to Caumautchy, wife of Shiva, and is devoted to worship of material good and pleasure. Besides these there are Gajendra varada in Ashtabhooja agrahauram, Jwarahareeshwaran in good preservation and wonderfully rich in sculpture, Oolacalanda permaul, Keilausa nautan, apparently coeval with the shore temple at the Seven pagodas [q.v.] which it strongly resembles and older than any temple yet found in Conjeeveram, Anaicapatangauvoodaiyaur or Anaicapatangeshwaran, Veicoonta perumal, Matangeshwaran very old, Moocteshwaran, Cutcheshwaran or Cutchaleshwaran parts very old, Eirauvateshwaran and Tripoorauntaceshwaran, Pandava perumal with old vimaunam, Tricaleshwaran, and Lutchmaneshwaran. There is a large mosque marking burial place of a fakeer from Beejapore. The tanks of the town are highly sacred. The finest is Sarwa teertam on outskirts of town to south of Shiva temple. Its sides are studded with small pagodas. The great annual festival in May is attended by 50,000 pilgrims. Trade consists almost solely of grain, for which Conjeeveram is the emporium of a large extent of surrounding country both in Chingleput and North arcot; and cloth manufactured by the large weaver community. Two quarters of the town, Sheikhpett and Pillay polliem, are almost exclusively inhabited by weavers. The products of the looms consist chiefly of cotton handkerchiefs and native cloths for men and women. There is also a little silk-weaving. The cotton thread used is entirely English. The artificers of the town are clever workers in brass [pittalay] and copper [taumram]. They also turn out native jewellery of the usual kinds. The Scottish free church has a mission, and there is also a High school maintained by Patchiappa's charities. There is a Tamul proverb:—காஞ்சிபுரத்திற்குப் போனால்காலாட்டி உண்ணலாம்—"If you go to Conjeeveram you may eat without "labor;" meaning that there are so many choultries there.

CONJY (अश्वशाखोट - ashvashákhóta, *San.*; بن نیمبو - bannímbú, *Hind.*; గొలుగు - golugu, *Tel.*; கொஞ்சி - koñji, *Tam.*). Title from tamul. To be distinguished from conjee. San. from (ashva, san. horse + shákhóta, san. epicarpurus orientalis, blume). Hind. from (ban, hind. forest + nímbú, hind. citrus medica, linn., var. limonum, brandis). Hind. also (girgití), meaning blood sucker's root, from its fondness for it. Tel. also (gonjichettu); (kondagolugu), meaning hill-conjy. Tam. also (káttukkoñji), meaning wild conjy. Title otherwise Blood sucker root, Wild lemon. Botanically Glycosmis pentaphylla, correa, rutaceæ [vricsham, 32]. Alias Glycosmis arborea, chylocarpa; Limonia arborea, pentaphylla. Erect, unarmed shrub; leaflets three to five, oblong, entire or toothed; panicles contracted; petals broadly oval; filaments broader towards the apex and suddenly contracted below the anther; flowers small, white. Very common; smooth, roundish, red fruit, about the size of a cherry; wood bruised with water a specific in snake-bite; fruit edible.——*Foreign conjy* (कुंटी - kuntí, Mahr.; ಅಂಗಾರಕಗಿಡ - angárakagida, Can.; నాగగొలుగు - nágagolugu, Tel.; சீமைக்கொஞ்சி - shímaikkoñji, Tam.). Can. from (angáraka, san. fire + gida, can. plant); perhaps from red berries. Tel. from (nága, san. snake + golugu, tel. glycosmis pentaphylla, corr.). Tam. from (shímai, tam. foreign + koñji, tam. glycosmis pentaphylla, corr.). Title otherwise Andaman satin-wood, China box, Honey bush, Nauga conjy. Botanically Murraya [caroovaimboo] exotica, linn., rutaceæ [vricsham, 32]. A large handsome bushy shrub, with shining dark green foliage of pinnate leaves, leaflets six or eight, an inch or two long, alternate, obovate, rigid, and quite smooth; bears several times during the hot and rainy seasons, in great profusion, corymbs of not large white flowers, fragrant during day; bears in cold season numerous small red berries, not unlike holly; shrub resembles a box tree. Religious plant. Planted for ornament. Wood light-yellow, close-grained, very hard, apt to crack; resembles boxwood.——*Nauga conjy* (నాగగొలుగు - nágagolugu, Tel.). Same as Foreign conjy.

CONKY (కొంకి - kónki, *Tel.*; முறுவல்செடி - muruvalsedi, *Tam.*). Tam. from (muruval, tam. laugh + shedi, tam. plant), from bright leaves. Tel. also (embúdichettu); (kankiputri). Tam. also (kárindu), meaning black mimosa; (ilaççaikkettayilaiççedi), meaning bashfulness + destitute + plant. Title otherwise Bashful tree, Laughing plant, Lettuce tree, Shameless plant, Strumpet plant, West indian cock's-spur. Botanically Pisonia alba, spanoghe, nyctagineæ [vricsham, 105]. Alias Pisonia morindifolia. Ramous shrub, six or seven feet high; dense foliage of large, lanceolate, pale lettuce-green leaves; leaves keep green if in shade and become a pale yellow color if fully exposed to the sun. Another species is aculeata; tall woody climber; flowers small, greenish-white; flowering in march and april; common; bark and leaves a counter-irritant for swellings and rheumatic pains.

COO (कु - ku, *San.*). Prefix implying depreciation or low situation or deficiency. Earth, sin. As a verb means to sound indistinctly.——*Codandam* (कोदण्ड - kódanda, San.). From (ku, san. bent + danda, san. stick). A bow, especially the bow of Rama, which none but him can wield. Hindoo 2nd or pers. name. Common to both sexes. Appears as Codandaraman [peyar].——*Coobairan* (कुबेर - kubéra, San.). From (above + béra, san. body); of deformed body. πλοῦτος of Greeks. God of wealth, and regent of north. Originally the chief of evil spirits, afterwards the god of riches. Compare the legends of northern nations. He lives in a palace Alacay, and is borne in an aerial car Pooshpacam [q.v.]. His shacty [q.v.] is coobairy. See vol. I (78) [ashtadicpaulacan, matam].——*Coobairaucsham* (कुबेराक्ष - kubéráksha, San.). Coobairan + eye. Plant name common to:—Thespesia populnea; Cæsalpinia bonducella; Stereospermum suaveolens. See gloss. paragraphs.——*Coobairaucshy* (कुबेराक्षी - kubérákshí, San.). From (kubéra, san. the god + akshi, san. eye); from flower like coobairan's eyes. Botanically the Cæsalpinia genus, leguminosæ [vricsham, 48]. Robust erect trees, shrubs or woody prickly climbers; leaves large, abruptly bi-pinnate; flowers showy, yellow, in copious

axillary racemes; pod oblong or strap-shaped, thin and flat, or thick and sub-turgid, smooth but in sub-genus guilandina armed all over with wiry spines. The species best known to the natives are:—bonducella [bonduc], coriaria [divy divy], pulcherrima [gold mohur tree], sappan [q.v.], sepiaria [mysore thorn]. Other s. indian species indigenous or naturalized are:—digyna, mimosoides, nuga.——*Coogay* (கூகை - kúgai, Tam.). Dwarfed demons [cooly]. They form part of Shiva's ganam [q.v.]. Also name for a large hooting owl [ooloocam].——*Cooja* (کوزہ - kúzah, Hind.). An earthen bottle for water [goglet].——*Coojan* (कुज - kuja, San.). From (ku, san. earth + jan, san. to be born). Cf. bhowman. Planet Mars, ♂. Sidereal period of revolution [bhaganam] is 686d 23h 31m. Inclination to the ecliptic [craunty mundalam] is 1° 51′ [jyotisham].——*Coomadwaty* (ಕುಮುದ್ವತಿ - kumadvati, Can.). Can. also (kundáru), meaning jasmine river. Cf. Coondair. Tributary of the N. pinaukiny or Pennair; Colaur and Toomcore districts, Mysore, length about 30 miles; joins the Pennair near Hindoopore, Anantapore district. Also name for coondair [q.v.].——*Coomaran* (குமரன் - kumaran, Tam.). From (ku, san. grief + mri, san. to die); gladdener. The same as Comauran. Name of Soobramanyan.——*Coomary* (குமரி - kumari, Tam.). Means virgin [cunny]. Comorin.——*Coomary sherpan* (குமரிச்சேர்ப்பன் - kumariççérppan, Tam.). From (shérppu, tam. coast). A title of the Paundy kings.——*Coombharan* (कुम्भर - kumbhara, San.). From (above + bhara, san. supporting). Shiva, the earth supporter.——*Coomeroo* (कुमेरु - kuméru, San.). From (above + méru, san. the mountain); evil meroo [q.v.], because abode of the demons. The southern hemisphere [golam], or south pole [asoora dhroovam], a region where Yaman presides over the Asoorans and Deityans [soomeroo].——*Coomry* (ಕುಮರಿ - kumari, Can.). From (kumbari, mahr. hill slope of poor soil). A kind of dry cultivation [vellaumay] carried on in forests by hill tribes during the rainy season. The trees standing upon the spot selected are felled and burnt; after which the ground is cultivated with rice [paddy], raggy [q.v.], &c., and sometimes with cotton [q.v.] and tobacco [pogauk]. The same space is not cleared again for cultivation for eight or ten years. Jhoom of bengal, Ponam of malabar, Ponacaud of salem [cautcaud, coomaky]. See vol. I, 112.——*Coonby* (کنبی - kumbí, Hind.; ಕುಣ್ಬಿ - kunbi, Can.). The chief agricultural caste of the Deccan [q.v.] and concan [concan, jauty].——*Cooncoomam* (कुंकुम - kumkuma, San.). From (ku, san. to sound); from sound of dry petals. Same as Saffron.——*Coondam* (कुन्द - kunda, San.). From (ku, san. earth + dó, san. to cut); breaks through the earth in sprouting. Jasmine.——*Coondapore* (ಕುಂದಾಪುರ - kundápura, Can.). See sep. title.——*Coondarpy* (కుందర్పి - kundarpi, Tel.). From (kundamu, tel. the jasmine flower, jasminum pubescens, willd.). Village; Anantapore dist., Dharmavaram tal.; pop. 2,255; lat. 14° 17′; long. 77° 04′; from Anantapore S.W. 47 miles; from Dharmavaram W. 47½ miles. Poligar fort built on hill. An inscription relates that a Mussalman ruler received from Conaity naidoo the villages of Penoocondah, &c., and gave him, in return, part of the country of Coondarpy. Five very old temples in the town. Trig. station here in lat. 14° 18′ 02·77″; long. 77° 04′ 31·64″; height 2,996 feet; from Anantapore S.W. 46 miles; from Coondarpy village N. ½ mile; from Dharmavaram W. 47½ miles.——*Coopah* (कूप - kúpa, San.). Bottle [cooppy].——*Coopam* (കൂപം - kúpam, Mal.). From (above + ápa, san. water). Hollow. Cooparajyam, the second part of the Malabar coast. See vol. I (127) [charitram]. Extends from Payashwany to Poothooputnam on the Cotta river. Corresponds to ancient Colatnaud and to modern N. malabar. Other divisions are Keralam proper, Mooshicam, Tooloovam [cooum].——*Coopaty* (कुपति - kupati, San.). From (above + pati, san. master). A form of Shiva, the lord of the earth.——*Cooppy* (குப்பி - kuppi, Tam.). From (kúpi, san. bottle). Bottle [coopah].——*Cooralam* (कुरल - kurala, San.). See sep. title.——*Coorava* (കുരവ - kurava, Mal.). From (above + rava, san. sound); harsh sound. A shrill ululation produced by vibration of tongue between lips and teeth. By women at marriages, devil-dancing, &c.——*Coormam* (कूर्म - kúrma, San.). See sep. title.——*Coosava* (குசவ - kusava, obl.; குசவன் - kusavan, pers. sing.; குசவர் - kusavar, pers. pl., Tam.). From (ku, san. earth). Potmakers or brick [shengal] and tile [wode] burners. The corresponding terms are:—Hind. coomhaur; Tel. coommara; Can. coombaura; Mal. coosava. The coosavan is the potter of a village, and generally furnishes each house or family once with a set of earthenware gratis; the servants of the circar [q.v.], civil and military, when travelling on duty are supplied by him with pots [chatty], as they are by the toty [q.v.] with straw and firewood; when they depart, the pots, unless they have been used by persons of an inferior caste, are taken back. These people are in some parts held in repute as sorcerers; they worship the kiln [shoolay], and generally call themselves sheivites. The men dig the clay [calimunn]; then women carry it to the place where the wheel is fixed, where it is softened and tempered and put on the earthen wheel by the men; the wheel is horizontal and is generally spun round by a woman, the man moulding and shaping it with his hands, while the simple impetus serves for the formation of the vessel; a batch of pots is put in the kiln once in a couple of months or so; fuel being laid in the bottom, the pots are arranged over it, and the kiln is covered with earth to exclude the air and to keep in the vapour; while the pottery is in the furnace, worship is paid to a demon called choolay maudan [q.v.]; on the third day the ware is taken out. The women and girls carry large loads of pottery on their heads, secured with ropes, to the markets for sale. Numbers about 300,000 [balootah, jauty].——*Cóosham* (कुश - kusha, San.). From (above + shí, san. to strew); strewn on ground to sit upon.—"*a*" Sacrificial grass, which, on occasion of offerings made to the gods, is placed upon the ground as a seat for them, having its tips towards the east; also used at offerings to ancestors. Otherwise Darbhay [q.v.].—"*b*" The name of the fourth of the great insular continents or Dweepam [q.v.].—"*c*" Vishnoo had three sons; Cooshan, Lavan, and Manmatan [q.v.]. Cooshan was the first born to him in his incarnation [avatar] as Rama by his wife Seetay.—"*d*" Botanically the Eragrostis genus, graminaceæ [vricsham, 156]. Love grass. Hardy, handsome grasses distinguished by having inflorescence in compound or decompound panicles; glumes four to ten-flowered; seeds loose, two-horned, not furrowed. The species best known to the natives are:—bifaria [squirrel ginger], ciliaris [wild cumboo], ciliata [wild coraly], cynosuroides [darbhay], plumosa [shaumay grass]. Other s. indian species indigenous or naturalized are:—atropurpurea, cretacea, kœnigii, mangalorica, nigra, nutans, parviglumis, procera, punctata, stenophylla, tenella, viscosa.——*Cooshastaly* (కుశస్థలి - kushast'hali, Tel.). From (kusha, san. sacred grass + st'hali, san. wild tract). River; North arcot dist., Carvetnugger zemindarry, Narrainavaram division and Chingleput dist., Trivellore tal. Local name of Nagary. Rises near Pautagoonta. Runs east, between August and December. Crossed by railway bridge N. of Nagary railway station. Flows also through Chingleput and joins Corteliaur [q.v.].——*Cooshauvaty* (ಕುಶಾವತಿ - kusháváti, Can.; kushavati, Mys. Gov.). River. Two streams of this name, one a tributary of the Paupughny, the other of the Chitrauvaty. Colaur district, Mysore.——*Cooshtam* (कुष्ठ - kusht'ha, San.). See sep. title.——*Cooum* (کھاری - khári, Hind.; கூவம் - kúvam, Tam.). Title from (kúpa, san. a well). Hind. means brackish. Tamul because river issues from a well [coopam]. The name is mentioned in the Tamul devauram [q.v.] as the more common name of a sacred place of Shiva called Tirvitcolam. River in Chingleput and Madras district; lat. 13° 02′ to 13° 4′; long. 79° 50′ to 80° 20′. Rises at a village near Shreepermatore in Conjeeveram talook, Chingleput district, about 30 miles distant from Madras. Joined by the old Bungaur channel. Irrigates Cadambatore, Tinnanore and other villages in neighbourhood of railway, and from an anicut [q.v.] thrown across it at Corattore sends down a supply to Chembrambaukam tank through new Bungaur channel. It then irrigates Ayanambaukam, Vauyalanullore, and other villages of Sydapett talook, and flowing through the town of Madras, falls into the sea at the Marine villa in lat. 13° 4′ N.; long. 80° 20′ E. Within Madras town limits it expands and is to a great extent stagnant, having seldom volume enough to force its bar and receiving much of the sewage of the neighbourhood. About a mile from its mouth it divaricates, forming two nearly equal branches; the left or more northern, close to the point of parting, receiving a water course running from the north. After this accession the left branch flows by the southern rampart of Black town [q.v.] and subsequently by the south-west face of the fort. The right branch takes a direction first south, subsequently south-east, and both joining about 300 yards from the sea inclose what is called the island [q.v.]. Commercially the river is of little importance, except that the branches that encircle the island are the connecting link between the northern and southern sections of the Buckingham canal [q.v.]. The river is crossed by seven fine bridges in the Madras talook, viz., the Napier, the Wallajah, the Periamett, the Harris, the College, the Commander-in-Chief's and the Chintaudripett.——*Coova* (കൂവ - kúva, Mal.). From (kúvu, mal. to cry + kai, mal. stem); from hollow stems through which children blow bubbles. W. coast arrowroot. The different kinds in Malabar are:—Aunacoova, costus speciosus, sm.; Nyetticoova, curcuma angustifolia, roxb.; Malancoova, kœmpferia rotunda, willd., and Manyalcoova, curcuma longa, roxb.——*Coovid* (കൂവിട - kúvita, Mal.). From (kúvu, mal. to cry aloud + ita, mal. place). The distance at which a loud call is heard. A measure of distance = 6,666 yards. Compare coss, croe and crosham. Distinguish from covid.——*Cooy cooy* (കൂയികൂയി - kúyikúyi, Mal.). From the sound. Portuguese cucuya. A cry of warning.——*Cosalam* (कोसल - kósala, San.). From (ku, san. the earth + sal, san. to attain prominence). Two countries of this name. N. cosalam was an extensive kingdom including Ayodhyay, S. cosalam was the modern Berar province. One of Hwen thsang's nine southern kingdoms was Kiao sa-lo, perhaps the latter. See vol. I (117) [charitram].

COO (କୁ - ku, *Tel.*). The name of the Khonds [q.v.] among themselves. Compare Coyi similarly for the Gonds [q.v.].

COODA (குட - kuda, *Tam.*). From (kodu, tam. steep), referring to the steep ghaut [q.v.] which formed the W. line of

Tamul-speaking country; hence West [coda]. Cf. Congoo, Coorg.——*Coodagam* (குடகம் - kudagam, Tam.). Coorg [bhoogolashastram].

COODAH (குடா - kudá, *Tam.*). From (kudai, tam. to scoop). Gulf. Owing to the continuous shore, the only gulf of Southern india is Manaar [q.v.], separated from Palk's strait by the islands of Rameshwaram and Manaar and several rocks between them, called Adam's bridge [q.v.].

COODAL (கூடல் - kúdal, *Tam.*). From (kúdu, tam. to join). Junction. Grove, especially a thick grove of palmyra [q.v.] trees. Compare Cauv. Suffix in place names, as Bhawauny coodal, meaning the place where the bhawauny joins the cauvery. Ancient name for town of Madura.

COODAPA (కుడప - kudapa, *Tel.*). From (kudiyu, tel. to sink as in mud). Wet ploughing [paddy]. Opposite of gaddavary.

COODLIGY (ಕೂಡ್ಲಿಗಿ - kúdligi, *Can.*; కూడ్లిగి - kúdligi,* *Tel.*). From (kúdu, tel. junction).——**(1)** Talook, Bellary district. Tahsildar's pay Rs. 175. Area 863 square miles. Population 94,296. Language Canarese. S. of district. Bounded N. by Hurpanhully and Hospett talooks and Sundoor state, E. by Molacaulmooroo talook of the Mysore territory, S. by Cancooppa talook of the same territory, and W. by Hurpanhully and Hoovinhadgully talooks. On the N.E. the Comaurasawmy range is prolonged to the neighbourhood of Goodicottah. There are low hills all round the cusbah [q.v.] also. The highest point is Jarimaley. Three-quarters of the talook are waste. The red and mixed soils largely predominate; they are very poor and in consequence lightly assessed. Cholum [q.v.], tamarind [q.v.], chillies [q.v.], cocoanuts [q.v.], lamp-oil [q.v.], seeds and gram [q.v.], are sent to the Bellary markets, and jaggery [q.v.], to Moondrigy in Dharwar. A small quantity of rice [q.v.] is imported for the wealthier classes, chiefly from the Mysore districts. Good woollen cumblies [q.v.], are woven at Nimbalgherry. The Chinna hagary river, to be distinguished from the Hagary in the Bellary talook, flows through the west of the talook. Its water is not utilized in any way for irrigation. The principal sources of irrigation are the tanks of Choranore, Coodligy, Cottore, Hanshy, and Oojany. Camping grounds:—Choranore, Coodligy, Cottore, Goodicottah, Hoolikerey, and Nimbalgherry. Places of archæological interest:—Ambaly, Baivore, Bennicull, Cottore, Devalaupooram, Goodicottah, Hailya, Hoolicoontey, Oojany, Sangameshwaram, Shiranaickenhully, Sovainahully, Veerandroog. Principal Trig. station:—Jarimaley. The leading places, &c., in the talook are the following.——*Chinna hagary* (చిన్నహగరి - chinnahagari, Tel.). See sep. title.——*Choranore* (ಚೋರನೂರು - chóranúru, Can.). From (chóra, san. robber + úru, can. village). Village; pop. 1,584; acres 9,802; lat. 14° 55′; long. 76° 35′; from Bellary W.S.W. 30 miles; from Coodligy E. 10 miles. Large tank.——*Cottore* (కొత్తూరు - kottúru, Tel.). From (kotta, tel. new + úru, tel. village). Village; pop. 6,136; acres 8,707; lat. 14° 49′; long. 76° 16′; from Bellary W.S.W. 51¼ miles; from Coodligy W.S.W. 12 miles. Founded by a hermit, Basappa. Formerly Moonsif's court. A large tank. A place of pilgrimage for Lingayets. Cotton [q.v.] and silk [puttoo] weaving. Chief market place.——*Goodicottah* (గుడికోట - gudikóta, Tel.). From (gudi, tel. temple + kóta, tel. fort). Village; pop. 1,418; acres 14,192; lat. 14° 49′; long. 76° 40′; from Bellary S.W. 28 miles; from Coodligy E.S.E. 17¼ miles. Once the seat of a powerful poligar [q.v.]. Ruins of a fort and palace and fragments of sculpture.——*Hailya* (ಹೇಲ್ಯ - hélya, Can.). Village; acres 5,013; lat. 14° 51′; long. 76° 16′; from Bellary W.S.W. 49 miles; from Coodligy W.S.W. 11 miles. Inscription of a local dynasty near a mantapam [q.v.].——*Hanshy* (ಹನಿಶಿ - hanishi, Can.). From (panasa, tel. jack tree, artocarpus integrifolia, willd.). Village; pop. 1,345; acres 4,019; lat. 14° 57′; long. 76° 21′; from Bellary W.S.W. 43 miles; from Coodligy W.N.W. 5¾ miles. Contains a large tank.——*Jarimaley* (ಜರಿಮಲೆ - jarimale, Can.). See sep. title.——*Nimbalgherry* (నింబగిరి - nimbalagiri, Tel.). From (nimba, san. margosa tree, melia azadirachta, linn. + giri, san. hill). Village; pop. 1,160; acres 8,161; lat. 14° 42′; long. 76° 24′; from Bellary S.W. 47 miles; from Coodligy S. 14½ miles. Cumblies woven.——*Oojany* (ఉజని - ujani, Tel.). From (ut, san. intensive prefix + jaya, san. victory). Sanscrit name (ujjayaní). Village; pop. 2,999; acres 11,249; lat. 14° 43′; long. 76° 20′; from Bellary S.W. 51 miles; from Coodligy S.S.W. 14½ miles. Important tank. A place of pilgrimage. Seat of Lingayet [q.v.] chief Gooroo. Well built temple dedicated to Mowla siddheshwaran.——*Veerandroog* (ವೀರನದುರ್ಗ - víranadurga, Can.). From (víra, san. a hero + durga, san. fort). Sanscrit name (víradurga). Hill; lat. 14° 51′; long. 76° 26′; from Bellary W.S.W. 41 miles; from Coodligy S. 3¾ miles. Has a strong fort which Tippoo sultan unsuccessfully attacked.——**(2)** Village, Talook head-quarters; Bellary dist., Coodligy tal.; pop. 3,343; acres 5,494; lat. 14° 54′; long. 76° 26′; from Adony S.W. 78½ miles; from Bellary S.W. 39 miles; from Hospett S. 23 miles; from Hurpanhully E.N.E. 29 miles; from Madras W.N.W. 291 miles; from Tadpatry W.S.W. 108 miles.

COODOO (ಕುಡು - kudu, *Can.*). Means small [coor].—"*a*" Measure of capacity. 4 bullahs = 1 coodoo, 20 coodoos = 1 cundaga [alavay, 3 c]. [Approximate actual value, 1 coodoo = 560 cubic inches. Mysore. Same as Colagam. Compare Mercaul of Tinnevelly.—"*b*" Superficial measure. Same table [alavay, 2 c]. Approximate actual value, 1 coodoo = 3,200 square yards of dry land or 500 square yards of wet land. Land requiring a coodoo of seed.——*Coodoomy* (குடுமி - kudumi, Tam.). From (kudu, tam. narrow or small); to distinguish from conday which is the whole tuft of hair made into a knot at the top; this latter is generally met with in the aborigines. A tuft of hair left on the head, usually about a foot long knotted at the end. Used by Hindooized Tamulians and regarded as a sign of respectability. There is a Tamul proverb:—அரைத்து மீந்தது அம்மி சிரைத்து மீந்தது குடுமி—"After grinding "the stone remains; after shaving the head, the coodoomy "remains." In the Tamul poem, Shiva vaucyam, the coodoomy is opposed, along with other Hindoo practices, thus:—"The four "vedams, the sacrificial coosham [q.v.] grass, the coodoomy, the "ascetic's staff which Bramins carry; when born, were the "Bramin's cord [poonool] and the coodoomy born with you?" When the Bramins were brought by Parshooraman to the west coast their coodoomy was removed from the back to the front of the head to prevent their returning to their former home and people [conday, keraloputty, maryauday].——*Coodtay* (ಕುಡ್ತೆ - kudte, Can.); means narrow-mouthed vessel. Liquid measure. 2 coodtays = 1 cutcha seer [alavay, 4 c]. Approximate actual value, 1 coodtay = 10½ cubic inches. S. canara, for oil. Compare Gidda of Kistna and Vizagapatam.

COODRAT (قدرت - kudrat, *Ar.*). From (kadara, ar. to be strong). Power. Part of lacab; as Coodrat haleem, power of God [ism].

COODY (കുടി - kuti, *Mal.*; குடி - kudi, *Tam.*). Agricultural village, habitation. Suffix in place names, especially in Tanjore and Madura [goody]. Compare Caud, wild tract. Also an inhabitant.——*Coodicauval* (കുടിക്കാവൽ - kutikkával, Mal.). From (above + kával, mal. guard). Village watch system.——*Coodima* (കുടിമ - kutima, Mal.). General term for tenancy in Malabar, other than Adima [q.v.]. Occupation of an estate for a season, either under lease or mortgage [panayam] tenure. See vol. II, 105.——*Coodimaneer* (കുടിമനീർ - kutimanír, Mal.). From (above + nír, mal. water). The last stage before actual transfer of Jenm, in the W. coast system of mortgage or land-transfer. See Caranam and Otty.——*Coodippaka* (കുടിപ്പക - kutippaka, Mal.). From (above + paka, mal. enmity). Resentment by the whole family of a wrong done to a member.——*Coodisay* (குடிசை - kudisai, Tam.). Hut. Suffix in place names.——*Coodivauram* (குடிவாரம் - kudiváram, Tam.). From (above in sense of inhabitant + vára, san. share). The share of the produce from land or salt pans [ooppalam] assigned to the cultivator [mail vauram]. See vol. I, 112. Cf. Coy laubham on west coast.——*Coodiyaun* (குடியான் - kudiyán, Tam.). An inhabitant, especially one who has caste. Often short as Coody.——*Coodiyiroopp* (കുടിയിരിപ്പ - kutiyirippa, Mal.; குடியிருப்பு - kudiyiruppu, Tam.). From (above + iruppu, tam. abode). Inhabitant's residence. Quarter occupied by people of some one tribe or caste; thus Chetty coodiyiroopp, the chetties' quarter. Compare agrahauram and cherry. Specification in a deed of conveyance of permission to a tenant to reside on a rented or mortgaged estate, in which case he is entitled to remuneration for any buildings he may have erected when his tenancy ends. In Malabar, also two fanams paid by tenant for land taken up for houses.——*Coody ayacut* (குடி ஆயக்கட்டு - kudiáyakkattu, Tam.). From (áyakkattu, tam. total extent of land). The total of inhabitants of a village.——*Coody makkal* (குடிமக்கள் - kudimákkal, Tam.). From (above + makkal, tam. men). Village public servants [balootah].——*Coody maraumut* (குடிமராமத்து - kudimarámattu, Tam.). From (marammat, ar. repairs). Contribution of labor for petty repairs to irrigation work, which the ryots are bound to give by immemorial custom. There is a law now for enforcing it or collecting its value; not often applied. See vol. I, 112. Much the same as amjy [q.v.].——*Coody oodambadicay* (குடியுடம்படிக்கை - kudiyudambadikkai, Tam.). From (udanbadikkai, tam. contract). Same as puttah.——*Coody pillay* (குடிப்பிள்ளை - kudippillai, Tam.). From (pillai, tam. title of respect). A division of the Pariahs [q.v.]; generally barbers.——*Coody taram* (குடித்தரம் - kudittaram, Tam.). From (taram, tam. rate). Assessment according to individuals [ryotwarry], as opposed to lump village settlement [mottafeisal]. See vol. I, 112.

COOKOORAM (कुकुर - kukura, *San.*). From (kuk, san. to seize). Family Canidæ, digitigrada, carnivora, mammalia [sastanam, 12], of naturalists [jantoo]. Dog. Fore feet with five toes, the thumb raised; hind feet usually with four. Head more or less conical, and pointed in front, the jaws being produced; legs of nearly equal length. The tongue smooth. In domestic dogs there is often a fifth claw on the hind feet, but only connected by skin, and called the dew-claw. The skull partakes of the characteristics of both cat [poonay] and bear [richam]. The bark is peculiar to the domesticated dog [nye] and may have arisen in imitation of the tones of the human voice. The

wild dog only whines, howls and growls. It is probable that the domestic dog has descended from different species of wolf and jackal. The wild dog is called dhole. The pariah dog [pye] is merely a mongrel, run wild and half-starved. The poligar [q.v.] dog is an immense creature peculiar to the south [combay]. The dog is mentioned by the Hebrew scriptures always in terms of aversion; the Hindoos have not the same feeling, but Mahomedans treat it as unclean. The family contains the fox [lomree], jackal [q.v.], wild dog [dhole] and wolf [konye].

COOLAM (कुल - kula, *San.*). From (kul, san. to accumulate). A family. Cf. Gotram, the tribe. In natural history a family. For category, see Padaurtam; for elementary substance, see Dravyam; for matter, see Bhootam; for organic and inorganic, see Indriyam and Anindriyam; for organic kingdom, see Ganam [jantoo, vricsham]; for organic class, see Vargam; for organic order, see Santaunam; for organic family, see the present head; for organic genus, see Jauty; for organic species, see Bhaidam. Oopa prefixed to either of the above means a sub-head. For inorganic minerals, see Dhautoo.——*Coola bhrashta* (कुलभ्रष्ट - kulabhrashta, San.). From (bhrashta, san. fallen). A class of outcaste Bramins. Very few.——*Coolacurny* (كلكرنى - kulkarní, Hind.; ಕುಲಕರ್ಣಿ - kulakarni, Can.). From (above + karni, can. accountant). Village accountant [shanbogue]. See vol. I, 112. ——*Coola devatay* (कुलदेवता - kuladévatá, San.). From (above + dévatá, san. god). Household god. No house is supposed to be without its tutelary divinity, but the notion attached to this character is far from precise [matam].——*Coola parvatam* (कुलपर्वत - kulaparvata, San.). From (above + parvata, san. mountain); chief mountain. A system of seven chains of mountains in S. india according to Tamul geography:—Mahendram, Malayam, Sahyam, Shooctimat, Ricsham, Vindhyam, and Pauripautram. Mahendram is the eastern ghauts [q.v.]. Malayam, the hills of malabar proper, the south part of the western ghauts [q.v.]; sahyam, the northern parts of the western ghauts; shooctimat is doubtful; ricsham, the mountains of gondwana; vindhyam is here applied to the eastern division of the vindhyam mountains; pauripautram, or pauriyautram as it is frequently written, applies to the northern and western portions of the same range. Ptolemy has seven ranges, but his names are not in accord [bhoogolashastram, charitram]. See vol. I (4).—— *Coolashekharan* (कुलशेखर - kulashékhara, San.). From (above + shékhara, san. crown). Title of the Paundy and Travancore kings [charitram].——*Coolashekharaputnam* (குலசேகரப்பட்டணம் - kulaségarappattanam, Tam. kulasekharapatnam *). From (kulashékhara, san. pándya king, the family head + pattana, san. town).—"*a*" Deputy tahsildarry, Tinnevelly district. Pay Rs. 100.—"*b*" Town, Port, Deputy tahsildar's station; Tinnevelly dist., Tencaray tal.; pop. 15,924; acres 2,928; lat. 8° 24′; long. 78° 06′; from Madras S.S.W. 346 miles; from Ootangoody N.E. 22 miles; from Palamcottah S.E. 31 miles; from Shermadevy E.S.E. 39 miles; from Shreevillipoottore S.S.E. 81 miles; from Shreeveicoontam S.S.E. 20 miles; from Tinnevelly S.E. 33 miles; from Trichendore S.W. 8 miles; from Tuticorin S.S.W. 29 miles. On Gulf of Manaar, adjoining Manapaud point and more than 30 miles east-north-east of Cape comorin. The anchorage, although not good, is used by native craft. One of the trade centres of the district.——*Coolauchauram* (कुलाचार - kuláchára, San.). From (above + áchára, san. usage). Family usage [maryauday].——*Coolotoongan* (कुलोत्तुङ्ग - kulóttunga, San.). From (above + uttunga, san. lofty). Otherwise known as Rajendra, 1064—1113. One of the greatest of the Chola rulers. In A.D. 1064 conquered the whole of the Paundyan kingdom and for a time annexed it. Crushed the Pullavas of Conjeeveram [charitram].——*Cooly* (कुलि - kuli, San.). Means cluster, from fruits. Nightshade. Botanically the Solanum genus, solanaceæ [vricsham, 94]. Shrubs, herbs or small trees, spinous or unarmed, natives of hotter parts; leaves alternate or sub-opposite in equal pairs, entire lobed or pinnatifid; inflorescence terminal at first, but in the course of growth bending downwards to give place to a shoot; fruit a berry containing many seeds. The species best known to the natives are:—Ferox [elephant shoonday], indicum [indian nightshade], melongena [brinjaul], nigrum [indian hounds' berry], pubescens [rameshwaram shoonday], torvum [hill shoonday], trilobatum [prickly shoonday], tuberosum [potato], verbascifolium [shoonday], xanthocarpum [prickly brinjaul]. Other s. indian species indigenous or naturalized are:—Biflorum; Bigeminatum; Denticulatum; Dulcamara, otherwise bitter sweet, fellon wood, fellonwort, foxgrape, woody nightshade; shrubby twining plant, with scarlet, oval, bitter and juicy berries; gives to pharm. the dried young branches; alterative, diuretic, diaphoretic; officinal; berries poisonous; Giganteum; Gracilipes; thorny under-shrub, small; fruit collected by hakeems [q.v.] to be applied to otitis; eaten by natives; Wightii.

COOLAM (കുളം - kulam, *Mal.*; குளம் - kulam, *Tam.*). From (kuli, mal. to bathe). Tank, piece of water formed by damming up a valley or hollow between hills. Suffix in place names, especially in Madura and Tinnevelly [colam].——*Coolacaul hills* (குளக்கால்மலை - kulakkálmalai, Tam.). From (above + kál, tam. a channel + malai, tam. hill). Range of hills; Tinnevelly dist., Nangoonairy tal. and Travancore state. Accessible by steep paths from village of same name. To south the range breaks into several semi-detached mountains, some forested to the summit as that called Mahendragherry, others bare or covered with short grass. At southernmost part of higher ranges, Cape comorin, locally known as the Nose presents a mass of solid gneiss rock with a precipitous face turned towards the north of many hundred feet clear fall. It is conspicuous on fine days as far as Tinnevelly, 35 miles distant. There are several small coffee-estates in the more sheltered valleys of the higher elevations on the Tinnevelly side, and almost the whole of the western Travancore slopes of this range have been denuded of forest to make way for coffee [q.v.] between the elevations of 1,500 and 3,500 feet. A well-frequented bridlepath leads over into these estates from Tircooroongoody, and different points of the Tinnevelly side of the range are accessible by two other well-known paths starting from the same point. Another good path ascends the mountains from Panagoody, eight miles further south.

COOLEE (قلى - kulí, *Hind.*). From turkish. Slave. Distinguish from Cooly.

COOLITALAY (குழித்தலை - kuzhittalai, *Tam.* kulitalai *). From (kuzhi, tam. hollow land + talai, tam. field) [cooy, coozhy]. ——(1) Talook, Trichinopoly district. Tahsildar's pay Rs. 150. Largest in district. Area 901 square miles. Greatest length from N. to S. 44 miles, greatest breadth from E. to W. 23 miles. Population 243,700. Language Tamul. S.W. of district. Lies south of Cauvery, which forms its N. boundary and separates it from Moosiry talook. Bounded E. by Trichinopoly talook and Poodoocottah state, and S. by Madura district and Poodoocottah state, W. by Caroor talook of Coimbatore and Dindigul talook of Madura district. The S. portion of talook, consisting of zemindarry of Maroongapoory and thirty-two Government villages, comprised the old Manapauray talook, and was transferred from Madura to Trichinopoly in 1856. The northern and central portions are flat, while the west and south-west are hilly in parts and present a somewhat varied aspect. The wildest part of the talook, and, indeed, of the whole district, is the Cadavore zemindarry in the extreme S.W. Along the border of the Cauvery the prevalent soil is alluvial regar [q.v.], while in the southern parts of the talook it consists chiefly of red loam [shevvalmunn] and red sand interspersed with regar in the lowlying tracts. In the portion of the talook irrigated by the Cauvery the soil is very fertile, as it is enriched by river deposit. In the centre and south the soil is very poor and is impregnated with soda [munn cauram] and saltpetre [shorah]. The principal manufactures are cloth, coir [q.v.] ropes, and grass mats [boriyah]. Steel [wootz] is manufactured at Vencatanaickenputty. Glass bangles [gauzoo] at Valanaud in the Maroongapoory zemindarry. The principal sources of irrigation are the Amravatty, Cauvery and Maumoondy. The principal channels from the Cauvery are:—Cuttalay vycaul, Krishnaroyapooram naut vycaul, Mahadaunapooram vycaul, Mardoor naut vycaul and Nangapooram vycaul. There are 307 tanks. The two largest are Maravanore and Shivalore, both in Manapauray division, supplied from the Maumoondy. Camping grounds:—Covilputty and Toovarancoorchy on the Madura road; Cullputty and Veiramputty on the Dindigul road; Laulapett, Manapauray, Manavausy, and Poodoocottah on the Caroor road. Places of archæological interest:—Cadambar coil, Mahadaunapooram, Manapauray, Periyaputty, Ratnagherry, Shivauyam, Shoondakyepauray, Tircambiliyaur, Tirmookkoodal, Togamullay, Vettoovauttalay. The leading places, &c., in the talook are the following.——*Cadavore* (கடவூர் - kadavúr,* Tam.). From (kadavu, tam. gyrocarpus jacquini, roxb. + úr, tam. village). Tam. also (pillaimuzhungi), meaning child + devourer. Zemindarry, Village; pop. 3,830; area 154 square miles; lat. of village 10° 36′; long. 78° 15′; from Coolitalay S.S.W. 28½ miles; from Trichinopoly W.S.W. 37 miles. Zemindarry was formerly included in Madura district, and transferred to Trichinopoly in 1856. Zemindar is of Teloogoo extraction and of Tottiya naick caste. His family came from Gooty. The village is in south of zemindarry, and being in a horse-shoe shaped valley with only one outlet, situation is picturesque. Hills on Madura side rise to 2,000 feet. Present peshcush Rs. 13,410.——*Carooppore* (கருப்பூர் - karuppúr, Tam.). From (karuppu, tam. blackness + úr, tam. village). Village; pop. 1,863; acres 5,192; lat. 10° 30′; long. 78° 24′; from Coolitalay S.S.W. 30½ miles; from Trichinopoly S.W. 33 miles. ——*Cauvery* (காவேரி - kávéri, Tam.). See sep. title.—— *Coolitalay* (குழித்தலை - kuzhittalai, Tam.). See below.—— *Cuttalay* (கட்டளை - kattalai, * Tam.). From (kattu, tam. plenty + talai, tam. field). Village, Railway station; pop. 2,110; acres 2,696; lat. 10° 57′; long. 78° 14′; height 346 feet; from Coolitalay W. 16 miles; from Moosiry W. 18 miles; from Trichinopoly W. 36 miles.——*Keel pagoothy* (கீழ்ப்பகுதி - kízhappaguthi Tam.). From (kízh, tam. east + paguthi, tam. portion). Town; pop. 4,019. In Cadavore zemindarry.—— *Krishnaroyapooram* (கிருட்டிணராயப்புரம் - kiruttinaráyappuram, Tam.). Means krishnaroya's town. Village; pop. 3,346; acres 4,777; from Coolitalay W. 11 miles; from Trichinopoly W. 30 miles.——*Laulapett* (இலாலாப்பேட்டை - iláláppéttai, Tam. lálápet *). Means laulah's village. Village, Railway station; pop. 992; lat. 10° 57′; long. 78° 23′; height 317 feet; from Coolitalay W. 5½ miles; from Moosiry W. 7 miles; from

Trichinopoly W.N.W. 26 miles.——*Mahadaunapooram* (மகாதானபுரம் - magáthánappuram, Tam.). From (mahá, san. great + dána, san. gift + pura, san. town); the great gift to bramins by krishnaroya wodeyar of mysore. Tam. also (pazhaya-sengadam), meaning old + red + jungle. Town ; pop. 6,682 ; acres 8,462 ; lat. 10° 57′ ; long. 78° 22′ ; from Coolitalay W. 8½ miles ; from Trichinopoly W.N.W. 28½ miles. On R. bank of Cauvery. Large Shiva temple, remains of an extensive ruined camp near the town, and a well-constructed stone bathing-place assigned to a Chola king.——*Manapauray* (மணப்பாறை - manappárai, Tam.). See sep. title.——*Maroongapoory* (மருங்காப்புரி - marungáppuri, Tam. marungápuri *). From (maru, tam. fragrance + ká, tam. garden + puri, san. town). Zemindarry, Village ; pop. 1,163 ; 177 sq. miles ; lat. of village 10° 26′ ; long. 78° 28′ ; from Coolitalay S. 34 miles ; from Trichinopoly S.W. 32½ miles. Zemindarry. Was formerly attached to Madura district, and transferred to Trichinopoly district in 1856. No sunnud [q.v.] has been given to the zemindar [q.v.], so his estate is still an unsettled polliem [q.v.]. The zemindar is of Teloogoo extraction and of the Tottiya naick caste. His family is supposed to have come from Gooty. The town is small but picturesquely situated among low hills, and contains an interesting ruined palace belonging to the Zemindar. Zemindarry now under Court of Wards. Peshcush Rs. 20,586.——*Maumoondiyaur* (மாமுண்டியார் - mámundiyár, Tam.). See sep. title.——*Nangavaram* (நங்கவரம் - nangavaram, Tam.). From (nangai, tam. woman + varam, tam. town). Sanscrit name (ádimúla-samudra), meaning first + principal + tank ; name derived from an extensive tank, the bed of which has since been converted into wet fields. Village ; pop. 4,592 ; acres 7,935 ; lat. 10° 52′ ; long. 78° 36′ ; from Coolitalay E.S.E. 9 miles ; from Trichinopoly W.N.W. 11 miles. Large wet village.——*Poroondalore* (பொருந்தலூர் - porundalúr, Tam.). From (porundal, tam. success + úr, tam. village). Village ; pop. 2,154 ; acres 3,045 ; lat. 10° 41′ ; long. 78° 30′ ; from Coolitalay S. 17½ miles ; from Trichinopoly W.S.W. 20½ miles.——*Ratnagherry* (இரத்தினகிரி - irattinagiri, Tam.). See sep. title.——*Reddiyaputty* (இரெட்டியப்பட்டி - irettiyappatti, Tam.). From (reddi, tel. reddy caste + patti, tam. village). Town ; pop. 2,595 ; acres 2,057 ; lat. 10° 33′ ; long. 78° 24′ ; from Coolitalay S.S.W. 27½ miles ; from Trichinopoly S.W. 31 miles. A ruined fort of the Zemindar of Comauravaudy is situated to N. of Yelangacoorchy, hamlet of this village. Yelangacoorchy itself is a Mahomedan village where a weekly market is held.——*Shivalore* (சிவலூர் - shivalúr, Tam.). From (shival, tam. partridge + úr, tam. village). Town ; pop. 3,870 ; acres 5,137 ; lat. 10° 38′ ; long. 78° 29′ ; from Coolitalay S. 21 miles ; from Trichinopoly W.S.W. 23 miles. Large tank.——*Shivauyam* (சிவாயம் - shiváyam, Tam.). From (shiva, san. the god + ayam, tam. ground). Sanscrit name (shiválaya), meaning shiva temple. Village ; pop. 3,010 ; acres 9,029 ; lat. 10° 52′ ; long. 78° 28′ ; from Coolitalay S. 5 miles ; from Trichinopoly W. 20 miles. Old Shiva temple, and place of pilgrimage. Rock cut cave [ratnagherry].——*Shoondakyepauray* (சுண்டைக்காய்ப்பாறை - shundaikkáyppárai, Tam.). From (shundai, tam. solanum pubescens, willd. + káy, tam. fruit + párai, tam. rock). Sculpture on a rock, and rock-cut cave.——*Togamullay* (தோகைமலை - tógaimalai, Tam.). From (tógai, tam. peacock + malai, tam. hill) ; hill resembling peacock. Resorted to as a place of pilgrimage ; pop. 2,828 ; acres 3,360 ; lat. 10° 44′ ; long. 78° 29′ ; from Coolitalay S. 14½ miles ; from Trichinopoly W.S.W. 20 miles.——*Veiga nallore* (வைகநல்லூர் - vaiganallúr, Tam.). From (vaigai, tam. river so called + nal, tam. good + úr, tam. village). Town ; pop. 3,369 ; acres 4,109 ; lat. 10° 57′ ; long. 78° 29′ ; from Coolitalay N.W. ½ mile ; from Trichinopoly W.N.W. 20½ miles. Attached to Coolitalay.——*Veiyyamputty* (வையம்பட்டி - vaiyyambatti, Tam. vaiyampati *). From (vaiyyam, tam. bullock cart + patti, tam. village). Village, Railway station ; pop. 1,544 ; acres 3,214 ; lat. 10° 34′ ; long. 78° 24′ ; height 712 feet ; from Coolitalay S.S.W. 26½ miles ; from Trichinopoly S.W. 30½ miles. Weekly market on Saturday.——*Vetticootty* (வெட்டிக்குட்டி - vettikkutti, Tam.). From (vetti, tam. way + kattu, tam. dam) ; embankment village. Village ; lat. 10° 58′ ; long. 78° 20′ ; from Coolitalay W. 10¾ miles ; from Trichinopoly W.N.W. 30½ miles. Gave its name to a former talook [manapauray]. A hamlet of Shittalavye, the population of which is 1,959.——**(2)** Village, Head-quarters of Talook, District moonsif and Sub-registrar, Railway station, Head assistant collector's division ; Trichinopoly dist., Coolitalay tal. ; pop. 1,451 ; acres 577 ; lat. 10° 56′ ; long. 78° 29′ ; height 293 feet ; from Ariyalore W.S.W. 45½ miles ; from Madras S.W. 191 miles ; from Madura N.N.E. 72 miles ; from Moosiry S.W. 1¾ miles ; from Shreerungam W.N.W. 18½ miles ; from Trichinopoly W.N.W. 21 miles. On south bank of Cauvery. Itself only small village, but centre of three or four other villages which almost adjoin and together form a small town. The greater part of the land round the village is highly cultivated, and there are numerous clumps of cocoanut [q.v.], &c.

COOLITORA (കുഴിത്തുറ - kuzhittura, *Mal.*). From (kuzhi, mal. deep + tura, mal. ford) [cooy, coozhy]. Town, Tahsildar's station. Travancore state, Pudmanaubhapooram division, Vilvancode tal. ; lat. 8° 19′ ; long. 77° 15′ ; from Alleppey S.E. 99 miles ; from Cottayam S.S.E. 97 miles ; from Madras S.S.W. 385 miles ; from Nagarcoil W.N.W. 18 miles ; from Paravore S.S.E. 141 miles ; from Quilon S.E. 56 miles ; from Trivandrum E.S.E. 21 miles ; from the sea N. 7½ miles. Large Nayar town. Rock-cut temple sculptures and inscriptions. The Tamrapurny is also called after this village. Crossed by a large bridge.

COOLLAUDA (కుల్లాడ - kulláda, Tel.). From (kulála, san. potter + váda, tel. street). Village ; Ganjam dist., Goomsoor tal. ; pop. 1,975 ; acres 567 ; lat. 19° 59′ ; long. 84° 41′ ; from Chetterpore N.N.W. 48 miles ; from Russellcondah N.E. 3¾ miles. Former stronghold of the Goomsoor rajahs. Had once 5,000 houses and a strong mud fort, the ruins of which are still visible. Scene of a battle between zemindar Dhananjaya bhoonj and the English. Fort captured by the latter in May 1815. Curious overhanging sacred rock in neighbourhood called Baughdevy, or the tiger goddess. An oath taken at this rock is binding in any transaction. On the hill are two large stones fastened with iron pins. Also a temple and old palace overgrown with jungle.

COOLSOOM (کلثوم - kulsúm, *Ar.*). Plump. Name of the grand-daughter of the prophet [mahomed] and the sister of Hoossain [q.v.]. Common female alam ; as Coolsoom bee, alam + alaumat [ism].

COOLTEE (کلتهی - kulthí, *Hind.*). From (kulatthá, san. dolichos biflorus, linn.). Same as Madras horsegram.——*China cooltee* (چین کی کلتهی - chínkíkulthí, Hind.). Tam. means chinese bean. Same as Guar.

COOLY (ಕೂಲಿ - kúli, *Can.* ; కూలి - kúli, *Tel.* ; கூலி - kúli, *Tam.*). Hire. Also hired laborer. Distinguish from Coolee.——*Coolitchaicam* (കൂലിച്ചേകം - kúliççékam, Mal.). From (above + chékam, mal. service). The service under Coolitcham.——*Coolitcham* (കൂലിച്ചം - kúliççam, Mal.). In Malabar a tenure by which land is granted rent-free or on a low rent to Nayars on condition of armed service. See vol. I, 112.——*Cooliyaul* (ಕೂಲಿಯಾಳು - kúliyálu, Can. ; கூலியாள் - kúliyál, Tam.). From (above + ál, tam. laborer). A laborer ; generally short as cooly.

COOMAK (کمک - kumak, *Hind.*). From persian. Help.——*Coomaky* (ಕುಮಕಿ - kumaki, Can.). That which aids. In Canara a defined portion of forest, from which the proprietor of the village or estate has the privilege of supplying himself with wood for house-building, &c., with leaves and twigs for manure, fodder, &c. [cautcaud, coomry]. See vol. I, 112.

COOMBHAM (कुम्भ - kumbha, *San.*). From (kumb, san. to cover). Pot, water-jar. Sign Aquarius [raushy]. Measure of capacity. 20 dronams = 1 coombham [alavay, 3 f] ; approximate actual value, 1 coombham = 2 cubic feet, 1,280 cubic inches ; obsolete.——*Coombaura* (کمہار - kumhár, Hind. ; ಕುಂಬಾರ - kumbára, Can.). From (kumbha, san. pot + kri, san. to make). The corresponding terms are :- Tam. coosava ; Tel. coommara ; Mal. coosava. Canarese potters and indigo-dyers [jauty].——*Coombhaqcam* (कुम्भक - kumbhaka, San.). From (kumb, san. to cover). Power of suspending respiration to secure attention to divine and superhuman things [yogam].——*Coombhauraty* (कुम्भारति - kumbhárati, San.). From (above + áram, san. to leave). Sacred light waved before an idol.——*Coombha yony* (कुंभयोनि - kumbhayóni, San.). Means born in water-jar. Agastyan [jyotisham, nacshatram].——*Coomby* (पीलु - pílu, San. ; कुंभ - kumbha, Mahr. ; कुंबयो - kumbiyó, Conc. ; کمبهی - khumbí, Hind. ; کمبی - kumbí, Dec. ; ಗುಡ್ಡದಾಪ್ಪೆ - guddadaippé, Can. ; ದಡ್ಡಲ್ - daddal, Too. ; బుడదనేడి - budadanédi, Tel. ; പീലു - pílu, Mal. ; කහට - kahata, Singh. ; ஆவிமா - ávimá, Tam.). Title from deccany. San. from (píl, san. to check) [tooth-brush tree]. Hind. from (kumbhí, san. the tree). Can. from (gudda, can. hill + ippé, can. bassia longifolia, linn.). Mal. from sanscrit. Singh. means astringent ; from bark. Tam. from (ávam, tam. saffron, crocus sativus, linn. + má, tam. mangifera indica, linn.) ; from color of wood. San. also (kumbhí), meaning jug-fruit ; from apple-like fruits. Can. also (doddáladamara) ; (gongumara). Tel. also (budadarvi) ; (budadarmi) ; (budadarini) ; (dudippi) [raghota caper] ; (arayachettu). Mal. also (ukamaram), meaning strength + tree. Title otherwise Cahata, Carey's tree, Hill mohwah, Hindostany slow match, Myrtle bloom. Botanically Careya arborea, roxb., myrtaceæ [vricsham, 56]. Large tree ; leaves oval, serrulate, dentate ; flowers several, large, greenish white ; berry ovate, crowned with the segments of the calyx, four-celled, many-seeded ; calyx four-parted ; petals four. Tree flowers in april, generally when destitute of leaves ; fruit about size of an apple [seb], and has peculiar and unpleasant smell. Bark astringent ; flowers are given as a tonic in sherbet [q.v.] after child-birth. Bark is made into a coarse cordage and used by match-lockmen as slow match for guns ; also used for tanning [chamrah]. Gum [gond] forms with water a tolerably thick mucilage of a dark-brown color. Sap-wood whitish, large ; heart-wood dull red, sometimes claret-colored, very dark in old trees, even-grained, beautifully

mottled. Timber is tough, strong, and durable, close and even-grained, inferior to teak [q.v.] in its direct cohesive strength, admits of a fine polish, red colored, resembling mahogany; used for posts of houses and cart framing, and for the edging of wells, is well adapted for furniture and cabinet purposes, favorite wood in some parts for charcoal [adoopp kary]. Other common species are:—herbacea, sphærica.——*Coommara* (ಕುಮ್ಮರ - kummara, Tel.). From (kumbha, san. pot + kára, san. maker). Tel. potters and indigo dyers. The corresponding terms are:—Tam. coosava; Can. coombaura; Mal. coosavá [jauty].

COOMBLA (ಕುಂಬಳೆ - kumbale, *Can.*). Village, Port; South canara district, Cassergode talook; pop. 2,620; lat. 12° 36′; long. 74° 59′; from Bombay S.S.E. 444 miles; from Cassergode N.N.W. 8¾ miles; from Madras W. 360 miles; from Mangalore S. 19 miles; from Manjeshwar S.S.E. 7½ miles. On a bold peninsula in a lagoon [cauyal], separated from the sea by a sand-spit and communicating with it by a narrow channel, on which the village of Canipooram is situated. Town once considerable, now decayed. Formerly joined by a bridge to Canipooram. The rajah of Coombla, whose ancestors ruled the southern part of Tooloovam [q.v.] and who is now a Government pensioner, resides at a small distance. There is a fort built by the Ikkairy [q.v.] rajahs.

COOML (குமிழ் - kumizh, *Tam.*). Means a ball; from use of wood in ornamental knobwork. Same as Cashmere tree.——*Lowly cooml* (நிலக்குமிழ் - nilakkumizh, Tam.). Same as Small cashmere tree.

COON (கூன் - kún, *Tam.*). From (kúnu, tam. to curve). Hunchback [cobja].——*Coon paundyan* (கூன்பாண்டியன் - kúnbándiyan, Tam.). The last but one of the old line of Paundyan kings, so deformed [charitram, soondra paundy tevar].

COONCH (कुञ्च् - kuñch, *San.*). To be small. Cf. Cotchoo.——*Cooncham* (కుంచము - kuntsamu, Tel.). A measure of grain, about eight handfuls.—"*a*" Measure of capacity. 4 maunicas = 1 cooncham; 4 coonchams = 1 toom [alavay, 3 b]. Varies from 227½ to 980 cubic inches. Compare Cooroony and mercaul. Sometimes = chittah, or $\frac{1}{16}$th of pucka seer or 4⅜ cubic inches.—"*b*" Superficial measure. Land taking cooncham of seed, 20 coonchams = 1 pootty [alavay, 2 b]. Variable. See vol. I, 609; II, 511, 512, 513, 519.——*Coonjam* (குஞ்சம் - kuñjam, Tam.). Dwarfishness [cotchoo].——*Coonjan* (குஞ்சன் - kuñjan, Tam.). A dwarf [cotchan]. Familiarly Coonjy, Coonjoo for either sex. Hindoo 2nd or pers. name [peyar].

COONDAIR (కుందేరు - kundéru, *Tel.*). From (kundu, tel. to sink + éru, tel. river). From its low bed. Sanscrit name (kumudvatí), meaning water-lily, nymphæa lotus, linn. + possessor [coomadwaty]. River; Kurnool and Cuddapah districts. Rises on the western side of the Yerramala at the site of an ancient tank called Cocndoocheroo. Takes a northerly course for a short distance, winds round the Vandootla plateau into the Coondair valley, to which it gives its name, and flows in a southern direction with great rapidity and falls into the Pennair near Camalaupooram. It is not fordable in the rainy season for a few days. It is not at all navigable and runs for about seven months in the year. A bridge was built over it in 1864 at the place where it crosses the Kurnool-Cumbum high road.

COONDAM (कुण्ड - kunda, *San.*). From (kut, san. to burn); used in cooking. Pot [chatty].——*Coondan* (कुण्ड - kunda, San.). From (kut, san. to burn); as destroying reputation. The child of a woman by another man while her husband is living. Golacan is distinct, being the bastard child of a widow [jauty].——*Coondodaran* (कुण्डोदर - kundódara, San.). From (above + udara, san. belly). Attendant on Shiva. See vol. I (78) [matam].

COONDAPORE (ಕುಂದಾಪುರ - kundápura, *Can.* coondapoor *). From (kunda, san. jasminum pubescens, willd., epithet of vishnu + pura, san. town). Sanscrit name (kundapura), meaning same [coo].——**(1)** Talook, South canara district. Tahsildar's pay Rs. 150. Area 512 square miles. N. coast of district. Boundaries:—On the north, North canara under Bombay presidency; south, Oodipy talook; east, Mysore territory; west, Arabian sea. Coondapore and some other ports on sea-shore were in early part of sixteenth century seized by Portuguese, and the more inland tract was included within the Vijianugger raj until its overthrow in 1565. Subsequently this territory became part of state of Bednore, and Coondapore was one of the principal ports of the rajah; on the overthrow of the latter by Hyder ally in 1763 it became incorporated with his dominions, and when Tippoo in 1799 fell beneath the attack of the British it became part of the British district of North canara. On the partition of that district in 1860 it was temporarily attached to Bombay. The talook comprises a narrow and rugged tract of land between Western ghauts [q.v.] and sea, and is traversed by seven rivers, some of which are navigable. The ghaut [q.v.] slopes and the spurs running into the tract are clothed with dense forest. Soil generally fertile. Agriculture is the chief industrial pursuit of the people, the principal vegetable products being rice [q.v.], cocoanuts [q.v.] and areca-nuts [q.v.]. There are two sea-ports in the talook, one of which Coondapore gungolly has considerable trade, the chief articles of export being rice, paddy [q.v.], cocoanuts and salted fish, while the imports consist mostly of salt [ooppoo], dry grains [q.v.], oils [yennay] and cotton piece-goods. The cultivation is almost entirely dependant upon rains, of which the average fall is 150 inches. Places of archæological interest:—Beidore, Coondapore, Huttiyangady, Ooppoonda. Principal trig. stations:—Coondabhagavatygoodda, Goonjanagoodda. The leading places, &c., in the talook are the following.——*Barcelore peak* (ಬಸರೂರುಶಿಖರ - basarúrushikhara, Can.). See sep. title.——*Basroor* (ಬಸರೂರು - basarúru, Can.). See sep. title.——*Beidore* (ಬೈದೂರು - baidúru, Can.). See sep. title.——*Codachaudry* (ಕೊಡಚಾದ್ರಿ - kodachádri, Can.). See sep. title.——*Cody* (ಕೋಡಿ - kódi, Can.). Means outlet. Village; pop. 2,170; lat. 13° 25′; long. 74° 44′; from Coondapore S. 11 miles; from Mangalore N.N.W. 42 miles; from the sea E. ¼ mile. On peninsula between Coondapore backwater and sea. Has a brackish water lake with large fish.——*Collore* (ಕೊಲ್ಲೂರು - kollúru, Can.). See sep. title.——*Coonda bhagavatygoodda* (ಕುಂದಭಗವತಿಗುಡ್ಡ - kundabhagavatigudda, Can.). From (kunda, san. pit + bhagavati, san. goddess + gudda, can. hill). Trig. station; lat. 13° 42′ 09·68″; long. 74° 46′ 33·08″.——*Coondapore* (ಕುಂದಾಪುರ - kundápura, Can.). See below.——*Goonjanagoodda* (ಗುಂಜನಗುಡ್ಡ - gunjanagudda, Can.). From (gunja, san. abrus precatorius, linn. + gudda, can. hill). Trig. station; lat. 13° 47′ 13·68″; long. 74° 41′ 01·08″; height 116 feet; from Naugore S.E. 1¾ miles; from Coondapore N.N.W. 11 miles; from the sea E. 1¼ miles.——*Gungavully* (ಗಂಗವಳ್ಳಿ - gangavalli, Can.). See sep. title.——*Gungolly* (ಗಂಗೊಳಿ - gangóli, Can.). From (gangá, san. the ganges + ávali, san. range). Village, Port; pop. 1,142; lat. 13° 38′; long. 74° 43′; from Coondapore N.N.W. 1½ miles; from Mangalore N.N.W. 54 miles. Port of Coondapore. On the north bank near mouth of Coondapore river. Tippoo had a dock [dhony] here.——*Gurgat* (ಗರಗತ - garagata, Can.). River. Coondapore river. One of the five streams which forms Gungavully river.——*Harnaud* (ಹಾರ್ನಾಡು - hárnádu, Can.). From (háruva, can. bramin + nádu, can. country). A Maugauny or subdivision of Coondapore talook comprising 15 villages; pop 6,258.——*Hosangady* (ಹೊಸಂಗಡಿ - hosangadi, Can.). See sep. title.——*Hyderghur* (حيدر گڑھ - haidargarh, Hind.). See sep. title.——*Kirmooneshwar* (ಕಿರಿಮುನೇಶ್ವರ - kirimunéshvara, Can.). From (kirimuni, can. the name of the sage who founded the temple + íshvara, san. shiva). Halting place in village of Naugore; lat. 13° 46′; long. 74° 40′; from Coondapore N.N.W. 10 miles; from Mangalore N.N.W. 63 miles; from the sea E. ½ mile. The large Agrahauram [q.v.] was destroyed about 1790 A.D. by a band of Mahrattas under Baula row.——*Naickancuttey* (ನಾಯಿಕನಕಟ್ಟೆ - náyikanakatte, Can.). From (náyaka, can. proper name + katte, can. bund). Sub-port; pop. 966, is population of village in which situated; lat. 13° 49′; long. 74° 40′; from Beidoor S.S.E. 4 miles; from Bombay S.S.E. 360 miles; from Coondapore N.N.W. 13 miles; from Mangalore N.N.W. 66 miles; from the sea E. ⅜ mile. On the north of a creek about twelve miles below Hog island, and at the foot of the Collore ghauts leading to Mysore.——*Oppoonda* (ಉಪ್ಪುಂದ - uppunda, Can.). Village; pop. 2,638; lat. 13° 50′; long. 74° 47′; from Coondapore N.N.W. 15 miles; from Mangalore N.N.W. 69 miles; from the sea E. 1 mile.——*Shiroor* (ಶಿರೂರು - shirúru, Can.). See sep. title.——*Shuncara narayanam* (ಶಂಕರನಾರಾಯಣ - shankaranaráyana, Can.). From (shankara, san. happiness-giving shiva + náráyana, san. vishnu, the water-dweller). Village; lat. 13° 36′; long. 74° 54′; from Coondapore E.S.E. 12 miles; from Mangalore N. 51 miles; from the sea E. 12 miles. Large temple of Shuncaranarayanan. Car festival.——*Vadairhobly* (ವಡೇರಹೋಬಳಿ - vadérahóbali, Can.). From (odeya, can. lord + hóbali, can. division of a district). Village; pop. 1,726; lat. 13° 37′; long. 74° 44′; from Coondapore S. 1¼ miles; from Mangalore N.N.W. 52 miles; from the sea E. 1 mile.——**(2)** Town, Divisional and talook head-quarters; South canara district, Coondapore talook; pop. 3,617; lat. 13° 38′; long. 74° 44′; from Bangalore N.W. 198 miles; from Barcore N.N.W. 12 miles; from Bombay S. 376 miles; from Madras W. 380 miles; from Mangalore N. 53 miles; from Naickancuttey S.S.E. 13 miles; from Oodipy N.N.W. 20 miles; from Poottore N.N.W. 70 miles; from Soobramanyam N.W. 90 miles; from the sea E. 1½ miles. Light on the north side of the entrance to the river; red fixed; 3 miles range; flagstaff; guide to vessels making the port; exhibited from 1st October to 31st May. Town is on south of an estuary receiving five fresh-water rivers. The surrounding country is remarkably beautiful. The fort, probably built by Rajahs of Bednore and improved by Portuguese, still exists somewhat inland from village, and a strong, well-built redoubt on sea-face built by Hyder commands entrance to river. The town is healthy, but its trade is languishing. Rice is produced in the neighbourhood.

COONDOOR (كندر - kundur, *Ar.*). From (kundu, san. incense). Same as True olibanum.

COONGILYAM (குங்கிலியம் - kungiliyam, *Tam.*). From (guggila, san. dammer). Male frankincense, Saumbrauny [q.v.] being the female. Compare, where transl. is of first term:—Boswellia serrata, var. glabra (vellaikkungiliyam), white; Canarium strictum (karuppukkungiliyam), black; Pistacia lentiscus (púnaikkangungiliyam), cat's eye, from yellowish brown color; Vateria indica (vellaikkungiliyam), white. See gloss. paragraphs.

COONJARAM (कुञ्जर - kuñjara, *San.*). From (kuñja, san. tusk + rá, san. to give). Elephant [aunay, gajam].——*Coonjara-moodaiyone* (குஞ்சரமுடையோன் - kuñjaramudaiyón, Tam.). From (above + udai, tam. possession + ón, tam. personal termination). Vigneshwaran, the elephant-owner [gaja mookhan].

COONN (കുന്നു - kunnu, *Mal.*; குன்று - kunru, *Tam.*). From (kunnu, tam. to decrease) [coor]. Hill. Suffix in place names as Candamcoonn, meaning hill with the field. Prefix in place names, as Coonnamungalam, meaning prosperous hilly village.——*Connemow* (കുന്നുമാവു - kunnumávu, Mal.). From (above + mávu, mal. mango tree, mangifera indica, linn.). Village; Travancore state, Cottayam division; Paravore talook. Chief seat of Roman catholic bishop.——*Coondah* (ಕುಂದ - kunda, Can.; குந்தா - kundá, Tam. kundahs*). From (kunru, tam. hill).——"*a*" Division, Neilgherries. Area 101 square miles. Bounded north by Toudanaud, south by the Malabar district, east by Merkoonaud, west by the Malabar district. The division was considered part of Mysore territory till fall of Seringapatam in 1799 when it was annexed to Malabar. In 1863 it was transferred to Coimbatore. The division is much exposed to action of S.W. monsoon [caur]. The valleys are covered with evergreen sholahs [q.v.] and are very fertile; but the greater portion of the tract is composed of rocky ridges and sterile grassy hills. The Bhawany river intersects the division and the Coondah river skirts the northern boundary. Camping grounds at Avalanchey, Banghy tappaul and Sisparra. Places of archæological interest:—Avalanchey, Mailcoondah, Yenicullmund.—"*b*" Mountain range; Neilgherry dist., Coondah div.; pop. 1,411; between lat. 11° 11′ and 11° 20′; long. 76° 29′ and 76° 45′; from Ootacamund S.S.W. 7½ miles. A lofty ridge forming western wall of Neilgherry plateau. Summits are rocky and precipitous and in many parts rise almost perpendicularly several thousand feet from Nelambore country beneath. From extreme S.W. angle of district the range runs in a S. direction, rapidly decreasing in height, until it reaches Coimbatore gap, to S. of which rise Anamullay hills. The sides, covered at places with grass, slope down to the valley of the Coondah river, which separates this range from the rest of the tableland. The three highest points are Avalanchey peak, 8,502 feet; Bear hill, 8,353 feet; and Macoorty, 8,402 feet. The ground is broken and tea-planting is less developed than in rest of district. The Bhawauny rises in this range. The best large game shooting on the Neilgherries is here.—"*c*" River; Neilgherry dist., Coondah div. Called also Bigooly. Rises on E. face of Coondah range. Drains S.E. slopes of Dodabetta and S.E. slopes of Coondah range. Joins the Bhawauny.——*Coondram* (குன்றம் - kunram, Tam.). From (kunru, tam. to decrease). Hill; suffix in place names as Tircalicoondram [coonnam, goonam].——*Coondrimany* (குன்றிமணி - kunrimani, Tam.). From (kunri, tam. plant, abrus precatorius, linn. + mani, tam. seed). Seed of the plant Abrus precatorius, linn., used as goldsmith's weight. 4 nels or paddy grains = 1 coondrimany; 2 coondrimanies = 1 munjaudy [niray, 3 a]. Approximate actual value, 1 coondrimany = 1⅞ grains. Same as San. goonjam, Hind. goomchy or retty, Can. hauga, Tel. gooriginja, Mal. coonnycooroo. See vol. I, 609.——*Coondry* (குன்றி - kunri, Tam.). From (kunru, tam. to decrease); from small size. Same as Indian liquorice.——*Coonnam* (குன்றம் - kunram, Tam.). Hill; suffix in place names as Neycoonnam, meaning ghee + hill [coondram, goonam].——*Coonnoova* (குன்னுவ - kunnuva, obl.; குன்னுவன் - kunnuvan, pers. sing.; குன்னுவர் - kunnuvar, pers. pl., Tam.). From (kunru, tam. hillock). The predominant caste found on the Pulneys. They are Vellaular from the Coimbatore district. There are Eastern coonnoovar and Western coonnoovar. Amongst the Western coonnoovar the following custom prevails. When an estate is likely to descend to a female on default of male issue, she is forbidden to marry an adult, but goes through the ceremony of marriage with some young male child, or in some cases with a portion of her father's dwelling-house, on the understanding that she shall be at liberty to consort with any man of her caste to whom she may take a fancy, and her issue so begotten inherits the property which is thus retained in the woman's family. Cf. Maroomakkatoyem. The women wear a profusion of silver [velly] or brass [pittalay] or iron [auhan] bangles on their arms and legs; and rings through the dividing cartilage of the nose; and tie their cloths in peculiar manner, knotting it over the breast and fastening it with a bandage round the waist. The Coonnoovar profess Sheivism, but they worship a mountain god Vaulappan meaning deity of the sword [jauty].——*Coonoor** (ಕುನ್ನೂರು - kunnúru, Can.). From (kunna, san. small + úru, can. village).—"*a*" Deputy tahsildarry, Neilgherry district. Pay Rs. 100.—"*b*" Town, Municipality, Sanitarium, Deputy tahsildar's station; Neilgherry district, Paranginaud division; pop. 6,049; lat. 11° 20′; long. 76° 50′; height 5,954 feet; from Coimbatore N.N.W. 28 miles; from Devaulah E.S.E. 29 miles; from Kotagherry S.S.W. 7¼ miles; from Madras W.S.W. 264 miles; from Ootacamund S.E. 8¼ miles; from Pundalore E.S.E. 33 miles. For description, see vol. II, pp. 73–74 [hill-station].—"*c*" Ghaut; Neilgherry district, Paranginaud division. Projected some years after the construction of the Kotagherry ghaut. Completed in 1833. Starting from Mettapolliem, it runs six miles due west to Kullaur along the level, crossing in its course the Bhawauny and Kullaur streams. From Kullaur the ascent begins. The old road follows N. side of the gorges of Kartairy and Coonoor rivers, the distance from foot to Coonoor bridge at head of pass being nearly nine miles. The average gradient is about one in twelve, but towards the top the gradient is as steep as one in five, and in some places it is reversed. The new ghaut, completed in 1871, begins the ascent at Kullaur, and is 16 miles long. Its gradient is 1 in 18½ feet. It has thirty-two timber bridges, of spans varying from 12 to 70 feet. Its width is about 18 feet. It follows N. side of gorge for about 13 miles, crossing and recrossing the old ghaut at nine points. It then passes to W. side of gorge of Coonoor river, and meets old ghaut at bridge at the head of ghaut [q.v.]. There are twelve zigzags.—"*d*" River; Neilgherry district, Paranginaud division. Formed of three streams terminating in a wedge-like promontory at a point where the united waters break over the stony lip of the ghaut and rush down the gorge under the name of Coonoor river until it empties itself into the Kartairy river.

COONTA (కుంట - kunta, *Tel.*). From (kunda, san. a pit). Same as goonta [q.v.]. Small tank. Compare cottam.—"*b*" Square superficial measure. 32 coontas = 1 catty [alavay, 2b]. Very variable. 12 to 36 feet to the side. Generally considered a square rod [cshetra ganitam]. In Kistna $\frac{1}{64}$th of a cootchel. Compare Tel. goonta and Tam. coozhy. See vol. I, 609; II, 510, 511.——*Coontla* (కుంట్ల - kuntla, Tel.); plural locative form. Small tank. Suffix in place names; as Coilcoontla, meaning the tanks with the temple [goontla].

COONTAM (कुन्त - kunta, *San.*). Lance.——*Coontalam* (कुन्तल - kuntala, San.). From (above + lá, san. to take). Having the shape of spear-point. Ancient name for upland Canarese country [carnatic]; or the Deccan [q.v.] in the English sense. Here the Andhras, Chalookyas, Yaudavas, and other dynasties ruled till the Mahomedan conquest. Then the name fell into disuse, and was re-placed by Andhram, Carnataucam, and Maharashtram, derived from languages spoken by inhabitants [charitram].——*Coonty* (कुन्ति - kunti, San.). Otherwise Coontidevy. The mother of the Pandoos [mahabhaurat].

COONYAT (كنيت - kunyat, *Hind.*). From (koun, ar. to be). Surname of relationship; as when a person or a thing is described as the father [aboo], son [ibn], mother [oom], or daughter [bint], of some other person or object. Employed very often also fancifully, as the father of the universe, &c. Coonyats, from aboo are now often used as ordinary proper names [ism]. See vol. I (105), cl. (3).

COOPPA (కుప్ప - kuppa, *Tel.*; குப்பை - kuppai, *Tam.*). Tel. from (kúdu, tel. to bring together). Tam. from (kuvi, tam. to heap up). Mound, heap, stack of grain [coolam]. Forms Hindoo 2nd or pers. names, as Cooppammah, Cooppan, Cooppoonautan, Cooppoosawmy. Feminine Cooppy. Cooppoo, common to both sexes [peyar].——*Cooppacaud* (குப்பக்காடு - kuppakkádu, Tam.). From (above + kádu, tam. suffix denoting abundance). Country town in contradistinction to principal town.——*Cooppacutt* (కుప్పకట్టు - kuppakattu, Tel.). From (above + kattu, tel. a rule). Allowance of grain from the general heap given to village servants [calappady]. See vol. I, 112.——*Cooppam* (కుప్పము - kuppamu, Tel.; குப்பம் - kuppam, Tam.).—"*a*" A village of small houses and huts inhabited by people of the lower castes, such as fishermen, &c. This name extends along the coast between Poolicat and Point calimere and inland from Cuddalore as far as the Eastern ghauts [q.v.]. The group of pointed roofs is the chief feature. Suffix in place names as Munjacooppam, meaning saffron + village [cooray, goodem].—"*b*" Village, Deputy tahsildar's station, Railway station, Sub-registrar's station; North arcot dist., Cungoondy zemindarry; pop. 3,405; lat. 12° 45′; long. 78° 23′; height 2,237 feet; from Arnee W. 64 miles; from Chittore W.S.W. 60 miles; from Cungoondy W. 6 miles; from Madras W. 131 miles; from Ranipett W. 67 miles; from Tripatty S.W. 94 miles; from Vellore W. 55 miles. Largest place in zemindarry. Large weekly market.——*Cooppamainy* (हरितमञ्जरि - haritamañjari, San.; खोक्लि - khókli, Mahr.; कुंकिमफल - kumkmip'hala, Conc.; کپی کا جہاڑ - kuppiká-jhár, Dec.; ಕುಪ್ಪಿಗಿಡ - kuppigida, Can.; ಬಂಗಾರಕಾಯಿ - bangárakáyi, Too.; కుప్పంటి - kuppanti, Tel.; ଇନ୍ଦ୍ରମାରିଷ - indramaris, Oor.; കുപ്പമേനി - kuppaméni, Mal.; කුප්පමේනියා - kuppaméniyá, Singh.; குப்பைமேனி - kuppaiméni, Tam.). Title from tamul. San. from (harita, san. green + mañjari, san. cluster of blossoms); from greenish flowers. Dec. from tamul. Can. from (kuppe, can. rubbish heap + gida, can. plant). Too. from (bangára, too. gold + káyi, can. unripe fruit). Tel. from (kuppa, tel. dunghill + antu, tel. to adhere). Oor. from (indra, san. thunderer, the god + márisha, san. amarantus blitum, var. oleraceus, linn.); appears after rains. Tam. from (kuppai, tam. rubbish heap + méni, tam. beauty); dung-hill beauty; compare acalypha, meaning plant of no beauty. Tel. also (murukonda), meaning beauty + hill; (puppanti), by corruption; (murupindi), meaning beauty + flour; (kuppichettu), meaning dung hill + plant [anise]; (pindi). Tam. also (kuppaivéni), meaning rubbish heap + beauty; (tiruméni), meaning sacred + beauty; (kadukkan), meaning that which is severe; (púnaivanangi), meaning cat-worshipped plant, from attraction of root to cats; cf. catmint; (oduvadakki),

meaning boil + controller [tirye]. Title otherwise Cat plant, Indian acalypha, Rubbish plant, Three-seeded mercury. Botanically Acalypha [maumsicay] indica, linn., euphorbiaceæ [vricsham, 118]. Alias Acalypha spicata. Small annual common weed, widely distributed; 1-2 feet; leaves ovate-cordate, serrated, on long petioles; spikes axillary, as long as the leaves, male flowers uppermost, enclosed in a cup-shaped involucre opening on the inner side, striated, serrated; stamens eight to sixteen, styles three; capsules tricoccous, three-celled, one-seeded; flowers small, greenish; flowers all year. The root bruised in hot water is cathartic; leaves emetic, nauseant and expectorant, efficacious in catarrhal and bronchial affections of children, for british vinum ipecacuanhæ and senega.——*Cooppa manjal* (കുപ്പമഞ്ഞൾ - kuppamaññal, Mal.). Means rubbish heap + turmeric; from inferiority. Same as Monkey country saffron.——*Cooppay* (குப்பை - kuppai, Tam.). Heap [coolam]; suffix in place names; as Neycooppay, meaning ghee + heap.

COOR (കൂറു - kúru, *Mal.*). Share [coroo].——*Coorvaulcha* (കൂറ്വാഴ്ച - kúrvázhcha, Mal.). From (above + vázhuka, mal. to reign). The step or throne which the rajahs of Malabar ascend. Answers to puttam [q.v.] in Tamul. The share of Government entrusted to a subordinate prince of the ruling family in Malabar. See vol. II, 144.

COOR (కురు - kuru, *Tel.*; കുറു - kuru, *Mal.*; குறு - kuru, *Tam.*). Small, narrow, short, defective [coodoo, cora]. Cf. Coonn.——*Coondal* (கூந்தல் - kúndal, Tam.). From (kúr, tam. to be sharp pointed); anything long and flowing. Woman's hair. Also applied to the white tender cocoanut [q.v.] leaves, split and hung up as an ornament in making up toranams [q.v.] or festoons on occasions of festivals in temples and houses. Cf.:—Porana racemosa (turóbathaikkúndal), drowpady's hair.——*Coondal palm* (கூந்தற்பனை - kúndarbanai, Tam.). From numerous long and thin spadices. Same as Talipot.——*Coora* (కూర - kúra, Tel.). Pot herb [keeray]. Compare, where transl. is of first term:—Allmania nodiflora (pendlipeddakúra), marriage + large; Amarantus campestris (chirrikúra), small; Amarantus gangeticus (tótakúra), garden; Amarantus viridus (chilakalakúra), parrot; Corchorus acutangulus (gánugapindikúra), oil-cake; Ipomæa reniformis (elukachevikúra), rat + ear; portulaca oleracea (pappukúra), dholl. See gloss. paragraphs.——*Cooral* (குறள் - kural, Tam.). See sep. title.——*Cooraly* (குறளி - kurali, Tam.). From (kuru, tam. to grow short). Dwarf. There is a Tamul proverb:—கொடுத்ததைக் கொடுக்கும் குறளிப் பிசாசு—"The dwarf demon returns only that which had been given to "it." Jugglery is attributed to power of a dwarf demon, which, retaining the materials entrusted to it, gives them one by one to the juggler as he wants them [cooly, cootty shauttan, matam].——*Cooray* (கூரை - kúrai, Tam.). Means pointed. Thatch-roof. Suffix in place names; as Ilooppacooray, meaning tree, bassia longifolia, linn. + thatch-roof [cooppam, goodem].——*Coorcha* (కొరచ - koracha, Tel.). From being short of stature. A tribe almost peculiar to Ceded districts [q.v.]. Speak mixture of Teloogoo and Tamul. Compare Cooritchiya. Naturally bamboo color, but tanned darker by the sun; faces oval with prominent bones and something of a tartar appearance; figures of both sexes very ungainly; the men average 5 feet 3 inches, the women 4 feet 9 inches; men wear hair tied in a large knot [conday] on one side of top of head as seen in sculptured figures on old stone monuments; women wear strings of small red and white glass beads and shells round the neck and falling over the bosom, also as seen in old bas-reliefs. The males do poojah [q.v.] at no temple nor do they reverence Bramins. Coorchar live in portable huts of mats, interwoven from long grass, spread over a bamboo [q.v.] frame; men marry about eighteen with girls who have attained maturity, girls go to husband's house two months after marriage; when they die married people are burned, unmarried are buried naked. They carry salt [ooppoo] and grain from one market to another by droves of cattle [maud] and asses [gadah], and also make bamboo mats [boriyah] and baskets [tokrah]. They carry with them the framework of their hut [coodisay], and while one part of the tribe proceeds with the baggage animals, the others settle for a time and employ themselves in making mats and baskets and in begging and stealing. They often commit burglaries and dacoities [dacoity, jauty].——*Coorchaid* (కురుచేడు - kuruchédu, Tel.). From (above + chédu, tel. swamp). Village, Bellary-kistna state railway station; Nellore dist., Darshy division; pop. 2,421; lat. 15° 54′; long. 79° 37′; from Darshy N.W. 11½ miles; from Nellore N.N.W. 103 miles; from Ongole N.W. 41 miles. Seat of much trade. East is a temple of Caulahasteeshwaran built by Chola kings. Also an old stone fort. Vishnoo temple built or restored 150 years ago by zemindar of Vencatagherry. Yearly marriage [calyaunam] festivals are celebrated for nine days in Maugham [mausam] or February. Inside the fort is the Ameen's cutcherry [q.v.].——*Coorchy* (കുറിച്ചി - kuriççi, Mal.; குறிச்சி - kuriççi, Tam.). From (kurumai, tam. littleness). Village in coorinjy or brush-wood tract [cooroomporay]. Suffix in place names, especially in Arcot south, Tinnevelly and Trichinopoly; as Cullacoorchy, meaning thief + village. Prefix in place names; as Coorchimala, meaning hill country + mountain.——*Coorinjah* (குறிஞ்சா - kuriñjá, Tam.). From (kurumai, tam. shortness); as growing on hilly inferior soil. Same as Indian ipecacuanha.——*Coorinjy* (குறிஞ்சி - kuriñji, Tam.). From (kurumai, tam. littleness).—"*a*" Hilly tract covered with underwood [desham].—"*b*" Same as Common vengay.—"*c*" Red coorinjy is Gluta travancorica, bedd., anacardiaceæ [vricsham, 45]. Large tree; leaves crowded about the apex of the branches, alternate, entire, elliptic, attenuated at both ends, glabrous, petioles very short, ciliated, panicles terminal, and from the upper axils, crowded, canescent, shortly pubescent; calyx irregularly and slightly five-toothed, splitting irregularly and caducous; bracts ovate, cymbiform; petals five, imbricate; fruit depressed, transversely oblong, with a rough brownish rind. Valuable timber tree, very straight stem; wood reddish, fine grained, takes a good polish, and is well adapted for furniture.——*Cooritçhiya* (കുറിച്ചിയൻ - kuriççiya, Mal.). From (kuriççi, tam. hill-village). A primitive Malabar tribe. Compare Coorcha. See vol. II, 99.——*Coorivçy* (ಕುರಿವೆ - kurive, Can.). From (kuru, tam. narrow + váy, tam. mouth). A fish-trap basket made like mouse-trap, with narrowing entrance and springy bamboo [q.v.] spikes projecting inwards so as to prevent return.——*Coorlah* (కుర్లా - kurlá, Tel. kurla *). Zemindarry, Ganjam dist.; pop. 4,189; sq. miles 5; quit-rent, Rs. 5,427; lat. 19° 27′ 26″; long. 84° 44′ 17″; from Chetterpore W.N.W. 21 miles; from Russellcondah S.S.E. 32 miles.——*Cooroo* (കുറു - kuru, Mal.; குறு - kuru, Tam.). Small, short. Compare:—Andropogon muricatus (kuruvéru), small root; Flacourtia sepiaria (kurumulli), small thorn. See gloss. paragraphs.——*Cooroocam* (குறுக்கம் - kurukkam, Tam.). Means shortness. A land measure [alavay, 2]. Very variable, from ¾ acre to 7 acres.——*Cooroomullay* (குருமலை - kurumalai, Tam.). From (kurumai, tam. small + malai, tam. mountain). Sanscrit name (kurangagiri), meaning antelope + hill. Village, Hill; Tinnevelly dist., Ottapidauram tal.; pop. 1,790; 75 sq. miles; lat. 9° 04′; long. 77° 54′; from Ottapidauram N.W. 15½ miles; from Tinnevelly N.N.E. 27 miles; from the sea W. 33 miles. The hill is conserved by the Zemindar. Good game; antelopes [jinka], buck and deer. Wild cows [gowr] also plentiful.——*Cooroony* (కురుని - kuruni, Tel.; குறுணி - kuruni, Tam.). From (kurumai, tam. shortness).—"*a*" Measure of capacity. 2 cooroonies = 1 pathakk [alavay, 3 a]. See calam. Same as mercaul. Its mark is ௲. Compare cooncham.—"*b*" Superficial measure. 8 puddies = 1 cooroony; 21 cooroonies = 1 vithaicottay [alavay, 2 a]. Approximate actual value, 1 cooroony = 3,362 square feet. Same as mercaul. Compare Tel. cooncham, Mal. parrah. See vol. I, 609.——*Cooroopaum* (కురుపాము - kurupámu, Tel. kurupám*). From (kuru, tel. small + pámu, tel. snake). Zemindarry, Village; Vizagapatam dist., Parvatipore division; pop. 2,281; lat. of village 18° 51′; long. 83° 36′; from Parvatipore E.N.E. 10 miles; from Vizagapatam N.N.E. 82 miles. The zemindarry, with the exception of Goomahoondah which was added by Gopinauta deo of Parlakimedy about middle of eighteenth century, was granted to Sanyausy dora by Vishwambhara deo of Jeypore. Shivarama rauz of Cooroopaum joined in the rebellion against the Poosapauties, which broke out about period of establishment of first Chief in Council; and he attacked the company's troops on their advance into Jeypore in 1774. He and all his family subsequently arrested but set at liberty shortly before death of Vijayaram rauz in 1794 with a small pension for maintenance. The zemindarry was restored to the old family in 1796, and the permanent settlement of 1802 was made with Shivaraman's son, Chinna sanyausy rauz. Old fort in the village. Present peshcush Rs. 14,370.——*Cooroovay* (குருவை - kuruvai, Tam.). From (kurumai, tam. shortness). Inferior reddish paddy; shortest crop. Tanjore and Tinnevelly. Aroovathaun cooroovay means sixty days' crop; Caroom cooroovay means black; Cull cooroovay means stone, from hard grains; Matta cooroovay means coarse; Mye cooroovay means jet-black; Shem cooroovay means red [paddy].——*Cooroovy* (குருவி - kuruvi, Tam.). Any small bird [pitta].——*Coorpoo* (കുറുപ്പ് - kuruppu, Mal.). From (kurumpu, mal. fight); chief, a military title among nayars. Hindoo third name [coorumba, peyar].——*Coorumba* (குறும்ப - kurumba, Tam.). See sep. title.——*Coorvitchy* (குருவிச்சி - kuruviççi, Tam.). See sep. title.——*Coory* (കുറി - kuri, Mal.). See sep. title.——*Cootchoo* (तन्तुकाष्ठ - tantukásht'ha, San.; కుంచె - kunche, Tel.; കുഞ്ചം - kuñcham, Mal.; குச்சு - kuççu, Tam.). Title from tamul. San. means thread + stick. Tam. also (pávátti), meaning warp + slackener. Weaver's long brush, with which the warp [pauv] threads when laid out between trestles [muttay coothiray] are separated from one another, and starched to stiffen them [nesavoo].——*Coottam* (குற்றம் - kuttam, Tam.). See sep. title.

COORAL (குறள் - kural, *Tam.*). From (kurumai, tam. shortness) [coor].——**(1)** A metre of two lines; the first tetrameter, the second trimeter. This metre is species of the well known Venbah [q.v.]; one of two metres in which most Tamul classics are composed, the other being Vroottam [q.v.]. Instead of making first foot of first verse rhyme with that of second verse, which is rule, the poet often makes it rhyme with last foot of first verse.——**(2)** The chief Dravidian classic, author Tir-

vulloovan [q.v.]. The work has three parts, treating of virtue, wealth, and pleasure; the three chief objects of human existence, or the three poorooshaurtams [q.v.]. These three parts contain 133 chapters of ten distichs each, resembling the Sanscrit sootrams [q.v.]. The poem invokes, not Ganesh or Saraswaty [q.v.], but 'the everlasting god.' The chapter then following is in praise of rain [mazhay]; after which are discussed virtue and moral excellence. Then follow songs on the duties of husbands, wives, and children, again on love, hospitality, gratitude, patience, back-biting, benevolence, &c. The third part is erotic; though possibly with a secondary meaning. There is no trace in the Cooral of the mysticism of the modern Pooraunic system; of Bhacty [q.v], or exclusive enthusiastic faith in any one deity of the Hindoo pantheon; of exclusive attachment to any of the sects into which Hindooism has been divided since the era of Shuncaran [q.v.]; or even of acquaintance with the existence of any such sects. Beschi [veeramaumoony] translated the Cooral into Latin. The best commentary is by the Bramin Parimelazhagan. The Cooral is the real Tamul Dravidian ethical work as distinguished from such Hindooized works as Devauram [q.v.], Tirvauchacam [q.v.], &c. The following stanzas are specimens of the style:—பீலிபெய் சாகாடு மச்சிறுமப்பண்டஞ் சாலமிகுத்துப் பெயின்—"The axletree of a bandy "loaded only with peacocks' feathers will break if it be greatly "overloaded."—சிறைநலனுஞ் சீரு மிலரெனினு மாந்தருறைநிலத்தொ டொட்ட லரிது—"It is a hazardous thing "to attack men in their own country, although they may neither "have power nor a good fortress [cottay]."—பெருமைக்குமேனைச் சிறுமைக்குந் தத்தங் கருமமே கட்டளைக்கல்—"A man's deeds are the touch-stone of his greatness and "littleness."—அன்பறிவு தேற்ற மவாவின்மை யிந்நான்கு நன்குடையான் கட்டே தெளிவு—"Let the choice by a "king fall upon him who largely possesses these four things, "love, knowledge, a clear mind, and freedom from covetous-"ness."—குடிமடிந்து குற்றம் பெருகு மடிமடிந்து மாண்ட வுஞற்றி லவர்க்கு—"Procrastination, forgetful-"ness, idleness, and sleep; these four things form the ship "which is desired by those who are destined to destruction."—செயற்கை யறிந்தக் கடைத்து முலகத் தியற்கை யறிந்து செயல்—"Though you are acquainted with the theoretical "methods of performing an act, understand the ways of the "world and act accordingly."—சொல்லுதல் யார்க்கு மெளிய வரியவாஞ் சொல்லிய வண்ணஞ் செயல்—"To "say how an act is to be performed is indeed easy for any one, "but far difficult it is to do according to what has been said."—பொருள்கருவி காலம் வினையிடனோ டைந்து மிருடீர வெண்ணிச் செயல்—"Do an act after a due consideration "of the following five, viz., money, means, time, execution, and place."—உளரெனினு மில்லாரோ டொப்பர் களனஞ்சிக் கற்ற செலச்சொல்லாதார்—"Those who through fear of "the assembly are unable to set forth their learning in an "interesting manner, though alive, are yet like the dead."—இளைதாக முண்மரங் கொல்க களையுநர் கைகொல்லுங் காழ்த்த விடத்து—"A thorny tree should be felled while "young, for when it is grown it will destroy the hand of the "feller."—இருநோக் கிவளுண்க ணுள்ள தொருநோக்கு நோய்நோக்கொன் றந்நோய் மருந்து—"There are two "looks in the dyed eyes of this fair one; one causes pain, and "the other is the cure thereof."—மதியு மடந்தை முகனு மறியா பதியிற் கலங்கிய மீன்—"The stars have become "confused in their places, not being able to distinguish between "the moon and the maid's countenance."—இன்னா தினனில்லூர் வாழ்த லதனினு மின்னா தினியார்ப் பிரிவு—"Painful is it to live in friendless town, but far more painful "is it to part from one's lover."——(3) The later members of Madura college [q.v.] all made what are called impromptus in praise of Cooral. The following are examples, being an exact specimen of the Tamul panegyric style.—"*a*" Accauracany nutchman's stanza:—கலைநிரம்பிக் காண்டற் கினிதாகிக் கண்ணி னிலைநிரம்பு நீர்மைத்தெனினுந் தொலைவிலா வானூர் மதியந் தனக்குண்டோ வள்ளுவர்முப்பானுனயத்தின் பயன்—"The moon full of calay or illumination "pleases the external eye, in like manner as the Cooral full "of calay or knowledge pleases the intellectual eye. But "nevertheless she cannot be compared to Valloovar's produc-"tion; for she is neither spotless, nor does she retain her "form and splendour unchanged like it." Full of calay [q.v.] means full moon.—"*b*" Calattorekizhaun's stanza:—ஒருவரிருகுறளே முப்பாலினோதுந் தருமமுத நான்குஞ்சாலு மருமறைகளேந்துஞ் சமயநூலாறு நம்வள்ளுவனார் புந்திமொழிந்த பொருள்—"He who studies the two-"lined verses in the three divisions of Vulloovar's cooral will "obtain the four things; virtue, wealth, pleasure and eternal "happiness. For they contain the substance of the five "Vedams and the six systems of the sects." The five Vedams include Bhauratam, and the six systems [darshanam] are Saunkhyam, Yogam, Nyauyam, Veishaishicam, Poorva mimaumsam and Oottaramimaumsam.—"*c*" Capilan's stanza:—தினையளவுபோதாச் சிறுபுன்னீர்நீண்ட பனையளவுகாட்டும் படித்தான் மனையளகு வள்ளைக்குறங்கும் வளநாடவள்ளுவனார் வெள்ளைக்குறட்பாவிரி—"O king of the fertile "country where the birds reared in houses are lulled by the "women's songs! Vulloovar's cooral is short in words but "extensive in sense, even as in a drop of water on the blade of "the Tinay [q.v.] grass may be seen reflected the image of the "palm-tree."—"*d*" Marootwan damodaran's stanza contains at the same time a recipe for headache:—சீந்திநீர்க்கண்டந் தெறிசுக்குத்தேனளாய் மோந்தபின்யார்க்குந் தலைக்குத்தில் காந்தி மலைக்குத்துமால்யானை வள்ளுவர்முப்பாலாற் தலைக்குத்துத்தீர்வுசாத்தற்கு—"O king, who re-"sembles the huge elephant [q.v.] which thrust its tusk at the "mountain. All are relieved of their headache by smelling of "the Seendil salt, and sliced dry-ginger mixed with honey "[shahad]; but Shauttan was relieved of his own headache by "hearing the three parts of the Cooral recited." Seendil salt is produced from stalk of tinospora cordifolia [goolancha].—"*e*" Mathooray paulausriyan's stanza:—வெள்ளிவியாழம் விளங்கிரவிவெண்டிங்கள் பொள்ளெனநீக்கும் புறவிருளைத் தெள்ளிய வள்ளுவரின் குறள்வெண்பா வகிலத்தோருள்ளிருணீக்குமொளி—"The planets [graham] Venus "[shoocran], Jupiter [brihaspaty], Sun [sooryan] and Moon "[chundran] can swiftly dispel the darkness from the face of "the earth; but the Cooral of the learned Vulloovar can more "swiftly dispel the darkness from the hearts of men."—"*f*" Nappaulattan's stanza:—அறந்த கழியான்ற பொருடிரியின்பு சிறந்தநெய்செஞ்சொற்றீத்தண்டு குறம்பாவா வள்ளுவனா ரேற்றினார் வையத்து வாழ்வார்களுள்ளிருணீக்கும் விளக்கு—"Vulloovar has lit a lamp for dispelling "darkness from the hearts of those who live in the world; "having virtue for its bowl, wealth for its wick, pleasure "for its oil, the fire of expression for its flame, and the "short stanza for its stand."—"*g*" Paranan's stanza:—மாலுங் குறளாய் வளர்ந்திரண்டு மாணடியான் ஞாலமுழுதுநயந்தளந்தான் வாலறிவின் வள்ளுவருந் தங்குறள் வெண்பாவடியால்வையத்தாருள்ளுவவெல்லாமளந்தாரோர்ந்து—"Maul [q.v.] in his cooral or dwarfish incarnation "[avatar] measured the whole earth with his two expanded feet; "but Vulloovar has measured the thoughts of all mankind with "his verse of two short feet."—"*h*" Sheettalay shauttanaur's stanza:—மும்மலையு முன்னாடு முந்நதியு முப்பதியு மும்முரசுமுத்தமிழு முக்கொடியு மும்மாவுந் தாமுடைய மன்னர் தடமுடிமேற் றாரன்றோ பாமுறைதேர் வள்ளுவர்முப்பால்—"The three parts composed by Vulloovar are "each a garland on the crowns of the three kings, Cheran, Cholan "and Paundyan; who are respectively possessed of the three "mountains Colly [q.v.], Nery [q.v.], and Pothiyamullay [pothi-"gay]; the three countries Cheram [q.v.], Cholam [q.v.], and "Paundyam [q.v.]; the three rivers Porny [q.v.], Cauvery "[q.v.], and Veigay [q.v.]; the three cities Caroor [q.v.], "Warriore [q.v.], and Madura [q.v.]; the three kinds of drums "Mungala moorass, Vetti moorass, and Coday moorass; the three "dialects of Tamul colloquial, poetical, and dramatic; the three "banners Vittcody, Poolicody, and Meenacody; and the three "horses Canavuttam [q.v.], Paudalam [q.v.], and Coram [q.v.]." The names of each triad are here inserted [bhausahay].

COORALAM (कुरल - kurala, *San.*). From (ku, san. to sound) [coo]. Eagles. Aquilinæ, falconidæ [bheroondam], raptores, aves [pacshy, 2], of naturalists [jantoo]. Bill straight at base, and then greatly arched at tip, edges waved; nostrils in front of cere; tail long and large; tarsi long, inner toe and claw strongest. The species best known to the natives are shown below.——*Cauly cheel* (کالی چیل - kálíchíl, Hind.; నల్లగద్ద - nallagadda, Tel.; கரும்பருந்து - karumbarundu, Tam.). All mean black kite. Title otherwise Spotted eagle. Aquila nævia. Alias Aquila melanaetus, clanga, vittata. Adult, richly empurpled brown on scapulars. Paddy [q.v.] fields or tanks. Has a clanging cry, like the sound, 'jeb, jeb, jeb.'——*Gilherimar* (گلہری مار - gilehrímár, Hind.; ಅಲೆಗದ್ದೆ - alegadde, Can.; ఉడతగద్ద - udatagadda, Tel.; புன்செய்ப்பருந்து - punseypparundu, Tam.). Hind. from (gilehrí, hind. squirrel + már, pers. killer). Can. from (ale, can. to roam + gadda, tel. kite). Tel. from (udata, tel. squirrel + gadda, tel. kite). Tam. from (punsey, tam. dry land + parundu, tam. kite). Hind. also (bághátíjammash), meaning garden eagle. Title otherwise Dwarf eagle. Aquila pennata. Alias Aquila minuta; Butaquila strophiata; Spizaetus milvoides. Head and neck pale orange brown, some of the feathers lengthened, entirely brown, forming a rudimentary crest. Crows [caurvam] pursue it.——*Gootimar* (گوتیمار - gútímár, Hind.). Hind. from (gútí, hind. cocoon + már, hind. destroyer); from feeding on cocoons. Hind. also (jayadhá), meaning slender necked; (pahárítísá), meaning mountain buzzard. Title otherwise Long-legged eagle. Aquila hastata. Alias Limnaetus unicolor; Spizaetus punctatus. Adult, above glossy hair brown, most feathers tipped with white; throat and breast unspotted brown; breast, abdomen, pale fawn or yellowish white, closely barred with brown.——*Jammash*

(جمش - jammash, Dec.; బూరగ - búraga, Tel.). Dec. means bird of chase. Tel. from (bóru, tel. large + váyi, tel. mouth). Title otherwise Imperial eagle. Aquila imperialis. Alias Aquila bifasciata, chrysaetos, heliaca, mogilnik, nipalensis. Adult fine rich glossy dark brown, head and hind neck orange buff. Rare. ——*Kohassa* (کوهسا - kohsá, Hind.; ఆల - ála, Tel.; ஆலா - álá, Tam.). Hind. from (koh, pers. mountain + sá, pers. like). Tam. from (álam, tam. water); as water-bird. Title otherwise Grey-backed sea eagle. Haliætus leucogaster. Alias Blagrus leucogaster; Falco blagrus, dimidiatus, maritimus; Icthyactus cultrungis. Adult, head, neck and entire underparts pure white. Wings reach beyond the end of the tail, which is wedge-shaped. On coast, and larger rivers. Lives on sea snakes. Preys on the osprey [machrangah]. Natives say that when breeding it makes a ladder of fresh boughs with leaves to place the fish on, to keep them fresh.——*Machrangah* (مچھرنگا - machhrangá, Hind.; కొర్రమీనుగద్ద - korramínugadda, Tel.; விரால்அடிப்பான் - virá-ladippán, Tam.). Hind. from (maççhí, hind. fish + ranga, san. sport); fish-loving. Tel. from (korramínu, tel. ophiocephalus striatus + gadda, tel. kite). Tam. from (virál, tam. ophiocephalus striatus + adi, tam. to kill). Hind. also (maççhariya), meaning fish killer. Tel. also (hugguli), of Yerkalas. Title otherwise Osprey, Fish hawk. Pandion haliætus. Alias Pandion fluvialis, indicus. Head and nape white, feathers of the forehead and crown with dark brown stripes, upper plumage rich; hair brown; quills blackish; tail pale brown, with dark bars, whitish on the inner web; on coast, large rivers and tanks. Plunges from great height into the water.——*Mhorangy* (मोराङ्गीघार - mórángí-ghára, Mahr.; مہرنگی - muhrangí, Hind.; కుందేటిసాళ్వ - kundéti-sálva, Tel.; இராசாளி - irásáli, Tam.). Mahr. from (móra, mahr. peacock + anga, mahr. body + ghára, mahr. kite); from reddish body with white spots. Hind. from (muhr, hind. peacock + anga, mahr. body). Tel. from (kundélu, tel. hare + sálvamu, tel. hawk). Tam. from (rájá, san. king + áli, tam. tawny eagle). Nisaetus bonelli. Alias Aquila intermedia; Nisaetus grandis, niveus. Adult, above dark hair brown, with white about head and back of neck; beneath white. Hilly districts. Much on the wing. Preys on game.——*Sabcheer* (سبچیر - sabchír, Hind.; ಗುಮ್ಮ - gumma, Can.; నల్లపాములగద్ద - nallapá-mulagadda, Tel.). Hind. means crested hawk. Tel. from (nalla, tel. black + pámugadda, tel. serpent eagle). Hind. also (tilaíbáj), meaning spotted hawk. Tel. also (bottagenda), from ghond. Title otherwise Crested serpent eagle. Spilornis cheela. Specific from (chilla, san. bengal kite). Alias Buteo bacha, melanotis; Circaetus nipalensis, undulatus; Falco albidus; Hæmatornis undulatus. Adult, head black, feathers white on their basal portion, and for nearly two-thirds their length, showing a conspicuous full black and white crest; jungly countries.——*Saumpmar* (سانپ مار - sámpmár, Hind.; ಮಲ್ಪತರ್ - malpatar, Can.; పాములగద్ద - pámulagadda, Tel.; பாம்புப்பருந்து - pámbup-parundu, Tam.). Hind. from (sámp, hind. serpent + már, pers. killer). Tel. from (pámu, tel. snake + gadda, tel. kite). Tam. from (pámbu, tam. serpent + parundu, tam. kite). Title otherwise Common serpent eagle. Circaetus gallicus. Alias Circaetus brachydactylus. Adult, brown above and on the head, lower parts white, feathers all marked with broad stripes or spots. Head is large, full and puffy, plaintive scream. Usually solitary; chief food snakes [paumb] and lizards [chipkalee].——*Shahbauz* (شاہباز - sháhbáz, Pers. and Dec.; ಜುಟ್ಟುಭೈರಿ - juttubhairi, Can.; జుట్టుభేరి - dzuttubhéri, Tel.; குடுமிப்பருந்து - kudumipparundu, Tam.). Pers. from (sháh, pers. king + báz, ar. hawk). Can. from (jutta, can. crest + bhairi, can. falcon). Tam. from (kudumi, tam. hair-knot on the head + parundu, tam. kite); from long crest. Tam. also (kudumiyán), meaning the crested one. Title otherwise Crested hawk eagle. Limnaetus cristatellus. Alias Falco cirrhatus, lathami. Adult, deep black, tipped with white; head and neck fulvescent brown, upper plumage glossy hair brown; beneath the foreneck and breast pure white. Has a long crest.——*Wokhaub* (मोरघार - móraghára, Mahr.; عقاب - ukáb, Ar.; آله - álah, Pers.; عقاب - ukáb, Hind. and Dec.; సాళ్వము - sálvamu, Tel.; ஆளி - áli, Tam.). Title from deccany. Mahr. from (móra, mahr. peacock + ghára, mahr. vulture). Ar. from (akaba, ar. to pursue). Hind. from arabic. Tam. from (ál, tam. to rule). Ar. also (nasr). Title otherwise Tawny eagle. Aquila fulvescens. Alias Aquila punctata, fusca, nævioides, vindiana. Adult, tawny brown, head and throat dusky or almost black. Unknown in Malabar. Rare in Carnatic [q.v.]. Subsists by robbing other birds of prey. Shrill scream.

COORAUK (خوراک - khurák, *Hind.*). From (khurdan, pers. to eat) [coord]. Batta [q.v.] given by villagers to peons [q.v.] sent to collect Government dues.

COORBAUN (قربان - kurbán, *Ar.*; കുറുബാൻ - kurubán, *Mal.*). From (karaba, ar. to draw near); one who draws near to god. Sacrifice. Prefixed to an alam forms a lacab; as Coorbaun hoossain, the oblation of Hoossain. Mostly taken by Shiahs [ism]. The mass among Malabar syrian christians.

COORCHY (کرسی - kursí, *Hind.*). A seat. Base of a column. ——*Coorchy nauma* (کرسینامه - kursínámah, Hind.). From (above + námah, pers. list). List of those who sat on the throne, pedigree [vamsham].

COORD (خرد - khurd, *Hind.*). From (khurdan, pers. to eat) [coorauk]. Ate, the verb.——*Coordboord* (خردبرد - khurdburd, Hind.). From (above + burd, pers. took away). Embezzlement of public money.

COORG (क्रोडदेश - kródadésha, *San.*; کورگ - korak, *Hind.*; ಕೊಡಗು - kodagu, *Can.*; కొడుగు - kodugu, *Tel.*; കുടക് - kutaku, *Mal.*; குடகு - kudagu, *Tam.*). Title through hindostany. San. from (króda, san. hog + désha, san. country); from tradition that inhabitants had nails on hands and feet like a boar [soor]. San. also means hollow country or country of heights and hollows. San. also (brahmakshétra), meaning bramha, the god + holy place, site of bramha's penance; also (matsyakshétra), meaning fish + holy place, from tradition that vishnoo became incarnate in the fish [matsyam] in a tank here. Drav. from (kuda, tam. west) [coda, cooda]. Province under the Government of India, but occupied entirely by a Dravidian race. Lies between north latitude 11° 56′ and 12° 50′, and between east longitude 75° 25′ and 76° 14′. The following are the principal rivers:—Cauvery, Lutchmana teertam, Swarnauvaty. The following are the principal hills:—Benganaud, Bramhagherry, Cotey betta, Iggootappa coond, Maulamby mullay, Pooshpagherry, Somamullay, Tadyandamole. The following are the large towns:—Codlipett, Colepett, Fraserpett, Mercara, Shanivaursantey, Somavaurpett, Veerarajendrapett. The province is divided into the following talooks:—Kiggatnaud, Mercara, Nunjarajputna, Padinaulknaud, Yedenaulknaud, Yelsauvirasheemey. Each of these except part of Nunjarajputna and Yelsauvirasheemey talooks is divided into nauds, these being again sub-divided into graumams, and the graumams being composed of vargams or detached farms after the manner of the west coast. In the two talooks just named there are hoblies as in Mysore, these containing collections of regular villages. For further particulars regarding Coorg see vol. I, 25. The following are the principal places, &c., with vernacular identifications and etymologies.——*Ammattinaud* (ಅಂಮತ್ತಿನಾಡು - ammattinádu, Can.; ammattinad, Coorg Gov.). From (ambata, can. the wild mango, spondias mangifera, willd.). Naud in Yedenaulknaud talook. ——*Anjigairinaud* (ಅಂಜಿಗೇರಿನಾಡು - anjigérinádu, Can.; anjigerinad, Coorg Gov.). From (añjiga, can. fear + giri, san. mountain). Naud in Kiggatnaud talook.——*Armairy* (ಅರ್ಮೇರಿ - arméri, Can.; armeri, Coorg Gov.). From (arame, can. very small + éri, can. tank-bund). Village in Yedenaulknaud talook.—— *Barapoley* (ಬರಪೊಳೆ - barapole, Can.). From (bara, can. empty + pole, can. river). River in Kiggatnaud [belliapatam].——*Benganaud mullay* (ಬೇಂಗನಾಡಮಲೆ - bénganádamale, Can.). From (bége, can. wild fire + nádu, can. country). An offshoot from the Western ghauts, running in an easterly direction towards Mercara. The Benganaud and the Noorokal range make up with the Western ghauts the watershed of the upper basin of the Cauvery, a valley which between Mercara and Naulknaud is 15 miles broad.——*Bettayetnaud* (ಬೆಟ್ಟಯೆತ್ನಾಡು - bettayetnádu, Can.; bettyetnad, Coorg Gov.). From (betta, can. hill + yettu, can. bullock). Naud in Kiggatnaud talook. ——*Bhaugamundala* (ಭಾಗಮಂಡಲ - bhágamandala, Can.; bhagamandala, Coorg Gov.). From (bhágya, san. wealth + mandala, san. region). Village in Padinaulknaud talook, near the source of the Cauvery. Head-quarters of Tauvnaud.—— *Bilhauda hobly* (ಬಿಳಹಾದಹೋಬಳಿ - bilahádahóbali, Can.; bilahahobli, Coorg Gov.). From (bila, san. cave + hádi, can. road). Hobly in Yelsauvirasheemey talook.——*Bolloor* (ಬೊಳ್ಳೂರು - bollúru, Can.; bollur, Coorg Gov.). From (bólu, can. hollow + úru, can. village.). Village in Kiggatnaud talook.——*Boyikerey* (ಬೋಯಿಕೆರೆ - bóyikere, Can.; boyikere, Coorg Gov.). From (bóyi, can. fowler + kere, can. tank). Village in Mercara talook.——*Bramhagherry* (ಬ್ರಹ್ಮಗಿರಿ - brahmagiri, Can.; brahmagiri, Coorg Gov.). From (brahma, san. the god + giri, san. hill). Name borne by two hills, one at the source of the Cauvery, the other at the source of the Lutchmana teertam. The latter known in Mysore as Davasy betta.——*Cadanga mullay* (ಕಡಂಗಮಲೆ - kadangamale, Can.). From (kadangu, can. trench); from the defensive war-trenches of the Coorgs. Mountain lying west of Coorg.——*Cadyetnaud* (ಕಡಿಯೆತ್ತುನಾಡು - kadiyettunádu, Can.; kadyetnad, Coorg Gov.). From (kade, can. end + yettu, can. bullock). Naud in Padinaulknaud talook.——*Caggodloonaud* (ಕಗ್ಗೋಡ್ಲುನಾಡು - kaggódlunádu, Can. kaggodlunad, Coorg Gov.). From (kallu, can. stone + gódalu, can. a stall for cattle). Naud in Mercara talook.——*Chennayyancottah* (ಚೆನ್ನಯ್ಯನಕೋಟೆ - chennayyanakóte, Can.). From (chennayya, can. proper name + kóte, can. fort). Principal place in Yedenaulknaud talook.——*Codantora* (ಕೊಡಂತೊರೆ - kodantora, Can.). From (kódu, can. hill top + tore, can. a river). Pass.——*Comauradhaury* (ಕುಮಾರಧಾರಿ - kumáradhári, Can.). From (kumára, san. god of war + dhárá, san. stream). River rises in the west of Nunjarajputna talook and flows westwards into South canara.——*Coondada betta* (ಕುಂದದಬೆಟ್ಟ - kundadabetta, Can.). From (kundu, coorg, height); otherwise Hattore hill. Mountain.——*Cooshal nugger* (ಕುಶಾಲನಗರ - kushálanagara, Can.). From (khushhál, hind. joyous + nagara, san. town). Fort. Otherwise called Fraserpett.——*Cotey betta* (ಕೋಟೆಬೆಟ್ಟ - kótebetta, Can.; kotebetta, Coorg Gov.). From (kóte, can. fort). Mountain in Nunjarajputna talook.——*Cottore* (ಕೊಟ್ಟೂರು -

kottúru, Can.; kottur, Coorg Gov.). From (kotta, can. uppermost + úru, can. village). Village in Padinaulknaud talook. ——*Culla holey* (ಕಲ್ಲಹೊಳೆ - kallahole, Can.). From (kallu, can. stone + hole, can. river). River joining the Barapoley at about the Coorg frontier where the combined streams enter Malabar and debouch near Chiracal into the sea.——*Davasy betta* (ದವಸಿ ಬೆಟ್ಟ - davasibetta, Can.). From (davasa, can. corn). Mountain. The source of Lutchmana teertam.——*Fraserpett* (ಫ್ರೇಜರ್‌ಪೇಟೆ - p'hréjarpéte, Can.). See sep. title.——*Gadinaud* (ಗಡಿನಾಡು - gadinádu, Can.; gadinad, Coorg Gov.). From (gadi, can. boundary). Naud in Nunjarajputna talook.——*Gowdhully* (ಗೌಡ ಹಳ್ಳಿ - gaudahalli, Can.; gaudhalli, Coorg Gov.). From (gauda, can. village headman + halli, can. village). Village in Yelsauvirasheemey talook.——*Hanoomanbetta* (ಹನುಮಾನ್‌ಬೆಟ್ಟ - hanumánbetta, Can.). From (hanúmán, san. monkey god). Mountain lying to the west of Coorg.——*Hatgatnaud* (ಹತ್ತುಗಟ್ಟುನಾಡು - hattugattunádu, Can.; hatgatnad, Coorg Gov.). From (hattu, can. ten + gattu, can. pass + nádu, can. country). Naud in Kiggatnaud talook.——*Haulairy* (ಹಾಲೇರಿ - háléri, Can.). From (hálu, can. milk + éri, can. tank). Estate of the Coorg rajahs. Also a village.——*Hauringy* (ಹಾರಿಂಗಿ - háringi, Can.). Can. also (hattihole), meaning cattle-fold + river; (svarnávatí), meaning gold possessor. River. Separates the Mercara and Nunjarajputna talooks, and flows into the Cauvery.——*Hebbauley* (ಹೆಬ್ಬಾಳೆ - hebbále, Can.). From (hedda, can. big + bálé, can. plantain). One of the principal places in Nunjarajputna talook.——*Hoodikery cauntamorenaud* (ಹುಡಿಕೇರಿಕಾಂತಮೂರುನಾಡು - hudikérikántamúrunádu, Can.; hudikerikantmurnad, Coorg Gov.). From (hudi, can. dam + kéri, can, street + kánta, san. pleasing + múru, can. three + nádu, can. country). Naud in Mercara talook.——*Horamaley* (ಹೊರಮಲೆ - horamale, Can.). From (hora, can. outside + male, can. hill). Mountain.——*Horoor noorokkalnaud* (ಹೊರೂರುನೂರೊಕ್ಕಲ್‌ನಾಡು - horúrunúrokkalnádu, Can.; horurnurokkalnad, Coorg Gov.). From (hora, can. outside + úru, can. country + núru, can. hundred + okkala, can. family + nádu, can. country). Naud in Mercara talook.——*Hutty holey* (ಹಟ್ಟಿಹೊಳೆ - hattihole, Can.). From (hatti, can. cattle-fold + hole, can. river). River, otherwise Hauringy.——*Iggootappa coond* (ಇಗ್ಗುತಪ್ಪಕುಂಡು - iggutappakundu, Can.; iggutappakundu, Coorg Gov.). From (iggu, can. malayalam god + appa, can. father + kundu, coorg, height). Hill in Padinaulknaud talook. Near the Pauditora pass.——*Jambore* (ಜಂಬೂರು - jambúru, Can.; jambur, Coorg Gov.). From (jambu, san. rose-apple tree, eugenia jambos, linn. + úru, can. village). Village in Nunjarajputna talook.——*Jomamullay* (ಜೋಮಮಲೆ - jómamale, Can.). From (jóma, coorg, ox). Mountain. In Padinaulknaud talook; overlooks the Codantora pass.——*Kiggatnaud* (ಕಿಗ್ಗಟ್ಟುನಾಡು - kiggattunádu, Can.; kiggatnad, Coorg Gov.). From (kiri, coorg low + gattu, can, pass), Talook. In the south. Head-quarters at Hoodikery. Contains the following nauds:—Anjigairy, Bettayet, Hatgat, Moodgairy, Tauvalgairy. Principal place:—Baudaga.——*Lutchmana teertam* (ಲಕ್ಷ್ಮಣತೀರ್ಥ - lakshmanatírt'ha, Can.; lakshmantirtha, Coorg Gov.). From (lakshmana, san. brother of ráma + tírt'ha, san. holy water). Can. also (doddahole), meaning great + river. River, rises in Kiggatnaud talook. Called Doddaholey, chief river of South coorg, tributary of the Cauvery [aroovy].——*Mahadevapett* (ಮಹಾದೇವಿ ಪೇಟೆ - mahádévipéte, Can.). From (mahá, san. great + déví, san. goddess + péte, can. suburb); called after mahadevamma, the principal queen of dodda veera rajendra. Native portion of Mercara town.——*Mercara* (ಮಡಿಕೇರಿ - madikéri, Can.). See sep. title.——*Naulknaud* (ನಾಲ್ಕುನಾಡು - nálkunádu, Can.; nalknad, Coorg Gov.). From (nálku, can. four + nádu, can. village). Village in Padinaulknaud talook near the foot of Tadyandamole. The site of the principal country palace of the Coorg rajahs. ——*Naupocloo* (ನಾಪೊಕ್ಲು - nápoklu, Can.; napoklu, Coorg Gov.). Village. In north lat. 12° 19′; east long. 75° 43′, near the right bank of the Cauvery, or 9½ miles south-west of Mercara. Head-quarters of Padinaulknaud talook.——*Nidtad hobly* (ನಿಡ್ತದಹೋಬಳಿ - nidtadahóbali, Can.; nidtahobli, Coorg Gov.). From (nitta, can. long). Hobly in Yelsauvirasheemey talook.——*Noojicull* (ನೂಜಿಕಲ್ಲು - nújikallu, Can.). River. In the north of Padinaulknaud talook, drains the Sampaujy valley.——*Nunjarajputna* (ನಂಜರಾಜಪಟ್ಣ - nanjarájapatna, Can.; nanjarajpatna, Coorg Gov.). From (nanjarája, can. proper name + pattana, san. town).—"*a*" Talook to the north of Coorg proper. Head-quarters at Fraserpett. Contains the following nauds or hoblies:—Gadinaud, Mootnaud, Nunjarajputna hobly, Ramasawmy canavey hobly, Yedavanaud. Principal places:—Hebbauley, Moolsogey, Sirangala, Somavaurpett, Tarinore, &c.—"*b*" Hobly in Nunjarajputna talook.——*Padinaulknaud* (ಪಡಿನಾಲ್ಕುನಾಡು - padinálkunádu, Can.; padinalknad, Coorg Gov.). From (hadinálku, can. fourteen + nádu, can. country).—"*a*" Talook in the west. Head-quarters at Naupocloo. Contains the following nauds:—Benga, Cadyet, Cooyyangairy, Padinaulk, Tauv. Principal places:—Bhaugamundala, Colkerey, Coombla, Naupocloo, Nelabey, Yavacapaudy.—"*b*" Naud in Padinaulknaud talook.——*Pauditora* (ಪಾಡಿತೊರ - páditora, Can.). From (pádi, coorg, name of a village + tora, can. pass). Pass, two miles to the north-east of Tadyandamole. ——*Permauley mullay* (ಪೆರುಮಾಳೆಮಲೆ - perumálemale, Can.). From (perumál, can. vishnu, the great). Mountain lying west of Coorg.——*Pooshpagherry* (ಪುಷ್ಪಗಿರಿ - pushpagiri, Can.; pushpagiri, Coorg Gov.). From (pushpa, san. flower + giri, san. hill). Can. also (subrahmanyagiri), meaning soobramanyan, the god + hill. Hill in the north-west between Coorg and South canara. Called also Soobramanyam. 5,626 feet.——*Shanivaursantey* (ಶನಿವಾರಸಂತೆ - shanivárasante, Can.; shanivarsante, Coorg Gov.). From (sanivára, can saturday + sante, can. market). Can. also (hemmage), meaning great + loom. Town. In north lat. 12° 44′; east long. 75° 56′, 23 miles north of Mercara. Head-quarters of Yelsauvirasheemey talook.——*Siddheshwar* (ಶಿದ್ಧೇಶ್ವರ - shiddéshvara, Can.). From (siddha, san. sage + íshvara, san. god). Hill on the eastern frontier in Yedenaulknaud talook.——*Sirangala* (ಸಿರಂಗಲ - sirangala, Can.). One of the principal places in the Nunjarajputna talook.——*Somavaurpett* (ಸೋಮವಾರಪೇಟೆ - sómavárapéte, Can.; somvarpet, Coorg Gov.). From (sómavára, can. monday + péte, can. suburb). Can. also (nagarúru), meaning fortified town + village. Town in north lat. 12° 36′; east long. 75° 54′, in Nunjarajputna talook, on the main road, N.E. 14 miles of Mercara.——*Swarnauvaty* (ಸುವರ್ಣಾವತೀ - suvarnávatí, can.; suvarnavati, Coorg Gov.). From (suvarna, san. gold + vat, san. suffix of possession). River, a tributary of the Cauvery.——*Tadyandamole* (ತಡಿಯಂಡಮೋಲ್ - tadiyandamól, Can.; tadiandamol, Coorg Gov.). From (tadi, coorg, broad + ande, can. place + mólu, coorg, hill). Highest mountain in Coorg, 5,729 feet in the south-west of Padinaulknaud talook.——*Taley cauvery* (ತಲೆಕಾವೇರಿ - talekávéri, Can.). From (tale, can. head + kávéri, can. the river). Mountain. Source of the Cauvery.——*Tarinore* (ತರಿನೂರು - tarinúru, Can.). From (tari, can. rice land + úru, can. village). One of the principal places in Nunjarajputna talook. ——*Tauvalgairy moornaud* (ತಾವಳಗೇರಿ ಮೂರುನಾಡು - távalagérimúrunádu, Can.; tavalgerimurnad, Coorg Gov.). From (távale, can. convalescence + giri, san. mountain + múru, can. three + nádu, can. country). Naud in Kiggatnaud talook.——*Tauvnaud* (ತಾವುನಾಡು - távunádu, Can.; tavunad, Coorg Gov.). From (távu, can. refuge). Naud in Padinaulknaud talook.——*Titimaty* (ತಿತಿಮತಿ - titimati, Can.; titimati, Coorg Gov.). From (tati, can. good season + mati, can. wish). Village in Kiggatnaud talook. ——*Veera rajendrapett* (ವೀರರಾಜೇಂದ್ರಪೇಟೆ - vírarájéndrapéte, Can.). See sep. title.——*Yavacapaudy* (ಯವಕಪಾಡಿ - yavakapádi, Can.). From (yavaka, san. barley, hordeum vulgare, linn. + pádi, can. village). One of the principal places in Padinaulknaud talook.——*Yedavanaud* (ಯೆಡವನಾಡು - yedavanádu, Can.; yedavanad, Coorg Gov.). From (yeda, can. left side). Naud in Nunjarajputna talook.——*Yedenaulknaud* (ಯೆಡೆನಾಲ್ಕುನಾಡು - yedenálkunádu, Can.; yedenalknad, Coorg Gov.). From (yede, can. middle + nálku, can. four + nádu, can. country).—"*a*" Talook south of the Cauvery. Head-quarters at Veera rajendrapett. Contains the following nauds:—Ammatty, Beppoo, Yedenaulk. Principal places:—Ammatty, Aramarey, Caurmaud, Chennayancottah, Cooclore, Ketmalore.—"*b*" Naud in Yedenaulknaud talook.——*Yelsauvirasheemey* (ಯೇಳುಸಾವಿರಶೀಮೆ - yélusávirashíme, Can.; yelusavirshime, Coorg Gov.). Can. also (itterigashíme), meaning two + tax + country; from the district having once paid taxes to two parties the Coorg and the Mysore kings. The Seven thousand country, having reference to its revenue value. The most northern talook of Coorg. Head-quarters at Shanivaursantey. Contains the following hoblies:—Bilhauda, Codly, Nidtad. Principal places:—Doddacodly or Codlipett.

COORK (قرق - kurk, *Hind.*). Enclosure. To travel in coork is to travel with private menials separate from camp [derah].

COORMAM (कूर्म - kúrma, *San.*). From (ku, san. prefix of littleness + úrmi, san. speed); slow in motion [coo].——**(1)** The Chelonian or Tortoise order of reptiles [sarpy]. Reptiles with the bones of the thorax united into a carapace. The synopsis will be found under Sarpy. The following are brief notes on the families.—"*a*" *Testudinidæ* (स्थलकूर्मीयकुल - st'halakúrmíyakula, San.). From (st'halakúrma, san. land-tortoise). Land tortoises. Toes distinct; feet for walking, without web between the toes; shell very convex with horny shields; caudal shields united into one [aumay].—"*b*" *Emididæ* (जलकूर्मीयकुल - jalakúrmíyakula, San.). From (jala, san. water + kúrma, san. tortoise). Fresh-water tortoises. Toes distinct; feet for walking and swimming, with a web between the toes; shell more depressed with horny shield; caudal shields separate [aumay].—"*c*" *Trionycidæ* (त्रिणखकूर्मीयकुल - trinakhakúrmíyakula, San.). From (tri, san. three + nakha, san. claw + kúrma, san. tortoise). Fresh-water turtles. Toes distinct; feet for swimming, strongly webbed; shell covered with soft skin [cadal-aumay.]—"*d*" *Chelonidæ* (समुद्रकूर्मीयकुल - samudrakúrmíyakula, San.). From (samudra, san. sea + kúrma, san. tortoise). Marine turtles. Feet without distinct toes, fin-shaped [cadal-aumay].——**(2)** For insects see poochy, for fishes see matsyam, for batrachians see bhaicam, for birds see pacshy, for mammals see sastanam. A general conspectus of the fauna [jantoo] of s. india is given in vol. II, appendix IV.——**(3)** The second incarnation [avatar] of Vishnoo. Concerning this the Vishnoo pooraunam gives the following:—"The moony "Doorvausan, a portion of Shiva, cursed Indran the king of the "gods for having disrespectfully treated a garland of celestial "flowers which he had given him; in consequence of which

"thenceforward the three worlds and Indran lost their vigour; "all vegetable products, plants and herbs withered and died; "and all beings became devoid of steadiness, &c. Then, the "three regions being thus wholly divested of prosperity and "deprived of energy, the Daunavans and sons of Dity, the "enemies of the gods, who were incapable of steadiness, and "agitated by ambition, put forth their strength against the gods. "They engaged in war with the feeble and unfortunate divi-"nities; and Indran and the rest being overcome in fight, fled "for refuge to Bramha, who being unable to help them sent "them to Vishnoo; and he, after having been duly praised by "the gods, smiled upon the prostrate divinities and thus spake. "With renovated energy, oh gods, I will restore your strength. "Do you act as I enjoin. Let all the gods, associated with the "Asoorans, cast all sorts of medicinal herbs into the sea of milk; "and then taking the mountain Mandaram [q.v.] for the churn-"ing stick, the serpent Vausooky for the rope, churn the ocean "together for ambrosia; depending upon my aid. To secure "the assistance of the Deityans, you must be at peace with them, "and engage to give them an equal portion of the fruit of your "associated toil; promising them that by drinking the amritam "[q.v.] that shall be produced from the agitated ocean they "shall become mighty and immortal; whilst I will take care "that the enemies of the gods shall not partake of the precious "draught, but that they shall share in the labour alone. Being "thus instructed by the god of gods, the divinities entered into "alliance with the demons; and they jointly undertook the "acquirement of the beverage of immortality. They collected "various kinds of medicinal herbs, and cast them into the sea of "milk, the waters of which were radiant as the thin and shining "clouds of autumn. They then took the mountain Mandaram "for the staff and the serpent Vausooky for the cord, and "they commenced to churn the ocean for the amritam. The "assembled gods were stationed by Vishnoo at the tail of the "serpent; the Deityans and Daunavans at its head and neck. "Scorched by the flames emitted from his inflated hood, the "demons were shorn of their glory; whilst the clouds driven "towards his tail by the breath of his mouth, refreshed the gods "with reviving showers. In the midst of the milky sea, Vishnoo "himself, in the form of a tortoise, served as a pivot for the "mountain as it was whirled around. The holder of the mace "and discus was also present in other forms [mauyan] amongst "the gods and demons, and assisted to drag the monarch of "the serpent race, and in another vast body he sat upon the "summit of the mountain. With one portion of his energy, "unseen by gods or demons, he sustained the serpent king; and "with another, he infused vigour into the gods." From the ocean, thus churned, arose Dhanwantary, the physician of the gods, bearing in his hand the cups of Amritam, Lutchmy the spouse of Vishnoo, celestial nymphs, &c. A popular notion is widely diffused among a great variety of people that the world, composed of flat earth and vaulted firmament, with organic beings enclosed between and suspended in the midst of the waters, is exactly figured by a turtle or tortoise [aumay], composed of arched upper shell resting upon the lower plate, with the living animal between, floating in the sea. The triple arrangement is indicated by the three classes of Roman divinities, Dii cœlestes terrestres et inferni. The Coormam avatar [q.v.] is held in these pages to indicate the discovery of the use of the grape-vine [angoor, matam].

COOROOK (குருக்கு - kurukku, *Tam.*). Same as Bramhadand.

COOROOM (کروم - kurúm, *Hind.*). The metal chromium [loham]. See vol. II, 36.

COOROOMBRANAUD (കുറുമ്പ്രനാട് - kurumbranátu, *Mal.* kurumbranád *). From (kurumban, mal. hill-tribe so called + nátu, mal. country); country of the coorumbar [q.v.] who migrated into wynaud after the nayars came in. Talook, Malabar district. Tahsildar's pay Rs. 200. Area 538 square miles. Centre coast of district. Bounded north by Cottayam talook, east by Wynaud talook, south by Calicut talook, west by the Arabian sea. Soil of interior is generally red, much impregnated with laterite [q.v.]; gradually assumes a rich loam in parts cultivated with paddy [q.v.]; towards the coast it is brown loose earth. Comprises the old talooks of Cadatnaud and Cooroombranaud. About one-half under cultivation. Six amshoms [calicut] were transferred to Calicut talook. Rivers are Coottiyaudy, Mahé and Nadoovannore. Ferries are numerous. Dam at Paulayaud for the exclusion of salt water from the paddy cultivation lying above the dam; also a dam at Cauttampully in Panangaud amshom [q.v.]. Ayyanicada is an old one between Oollairy and Aricoolam amshoms. Places of archæological interest:—Badagara, Caurayaud, Chembra, Chervannore, Collam, Coottipooram, Cowntara, Eindalaçondah, Iringannore, Keelariyore, Meppayore, Moottangal, Panangaud, Ponmairy, Tirvangore, Vaulicherrycottah, Viyyore, Yedacherry, Yeraumala. Coorumbranaud was until late years a principality under its own chiefs, the last of whom became extinct in A.D. 1779 [charitram]. Principal trig. stations:—Nadoovauram, Poracaud. The leading places, &c., in the talook are the following.——*Agalapoya* (അകലാപ്പുഴ - akaláppuzha, Mal.). From (akala, mal. broad + puzha, mal. river). River. A broad backwater 16 miles long joining the Nadoovannore river at its mouth. Connected with the Coottiyaudy river by the Payoly canal one mile in length.——*Badagara* (വടകര - vatakara, Mal.). See sep. title.——*Cadatnaud* (കടത്തനാട് - katattanátu, Mal.). See sep. title.——*Caupaud* (കാപ്പാട് - káppátu, Mal.). See sep. title.——*Chombaula* (ചോമ്പാൽ - chombál, Mal.). From (chempu, mal. copper + ála, mal. workshop). Village, Port; lat. 11° 41′; long. 75° 36′; from Badagara N. 5¾ miles; from Bombay S.S.E. 515 miles; from Calicut N.N.W. 33 miles; from Mahé S.E. 2¾ miles; from Moottangal N.W. 3¼ miles. On the open coast. Basel evangelical mission started here in 1849; orphanage transferred from Cannanore in 1872; weaving establishment since 1883. The mission has out-stations at Badagara and Moorat.——*Collam* (കൊല്ലം - kollam, Mal.). See sep. title.——*Coottipooram* (കുറ്റിപ്പുറം - kuttippuram, Mal.). From (kutti, mal. boundary + puram, mal. beyond). Amshom; pop. 7,076; lat. 11° 41′; long. 75° 43′; from Badagara N.E. 8½ miles; from Calicut N.N.W. 30 miles; from the sea E. 9 miles. Ten miles north-east of Badagara, fortified palace of Cadatnaud porlattiry valiya rajah or senior rajah of Porlattiry dynasty at Cadatnaud.——*Coottiyaudy* (കുറ്റിയാടി - kuttiyáti, Mal.). See sep. title.——*Cotta* (കോട്ട - kótta, Mal.). See sep. title.——*Cottacull* (കോട്ടക്കൽ - kóttakkal, Mal.). From (kótta, mal. fort + kal, mal. suffix of place). Village, Port; pop. 5,252; lat. 11° 34′; long. 75° 39′; from Badagara S.S.E. 2½ miles; from Bombay S.S.E. 525 miles; from Calicut N.N.W. 24 miles; from Tricody N.N.W. 4¾ miles. At the mouth of the Cotta. Former resort of pirates, who captured all vessels not carrying the pass of the Cadatnaud rajah.——*Keelariyore* (കീഴരിയൂർ - kízhariyúr, Mal.). From (kízhu, mal. low + ariyúr, mal. small village). Amshom, Village; pop. 5,571; lat. 11° 29′; long. 75° 47′; from Calicut N.N.W. 17 miles; from Badagara S.E. 12 miles; from the sea E. 7½ miles. 15 miles south-east of Badagara; two rock-cut caves.——*Keelore* (കീഴൂർ - kízhúr, Mal.). From (kízhu, mal. low + úr, mal. village). Village; lat. 11° 32′; long. 75° 40′; from Badagara S.S.E. 5¾ miles; from Calicut N.N.W. 21 miles; from the sea E. 2 miles. Large annual cattle fair and festival in December.——*Mahé* (മയ്യഴി - mayyazhi, Mal.). See sep. title.——*Mailady* (മേലടി - mélati, Mal.). From (mél, mal. above + ati, mal. foot). Amshom, Village; pop. 9,526; lat. 11° 31′; long. 75° 39′; from Calicut N.N.W. 21 miles; from Badagara S.S.E. 6 miles; from the sea E. 1¼ miles. Ten miles from Quilandy. Shiva temple roofed with copper [taumram]. Festival and cattle [maud] market in Vrishchicam [mausam] or November-December.——*Moottangal* (മുട്ടുങ്കൽ - muttunkal, Mal.). From (muttu, mal. hindrance + kal, mal. rock); a nest of pirates. Amshom, Village, Port; pop. 5,075; lat. 11° 38′; long. 75° 37′; from Badagara N. 2¾ miles; from Bombay S.S.E. 520 miles; from Calicut N.N.W. 29 miles; from Chombaula S.S.E. 3¼ miles. Formerly haunt of pirates. Old temple with inscriptions.——*Nadaupooram* (നാദാപുരം - nádápuram, Mal.). See sep. title.——*Nadoovannore* (നടുവണ്ണൂർ - natuvannúr, Mal.). From (natu, mal. middle + van, mal. large + úr, mal. village). Village; pop. 2,605; lat. 11° 29′; long. 75° 49′; from Badagara S.E. 15 miles; from Calicut N. 16 miles; from the sea E. 11 miles. Head-quarters of old Cooroombranaud talook. Travellers' bungalow; market every Saturday.——*Nadoovauram* (നടുവാരം - natuváram, Mal.). From (natu, mal. centre + váram, mal. declivity). Trig. station; lat. 11° 44′ 12·62″; long. 75° 49′ 35·30″; height 4,557 feet; from Badagara N.E. 17 miles; from Coottiyaudy N.N.E. 6 miles; from the sea E. 18 miles.——*Pandacull* (പന്തക്കൽ - pantakkal, Mal.). From (pantal, mal. corr. from bandar, hind. harbour + kal, mal. suffix of place). Village. A detached French settlement belonging to Mahé.——*Payoly* (പയ്യോളി - payyóli, Mal. payóli *). From (payya, mal. the nád so called + oli, mal. beauty). Village, Canal; lat. 11° 31′; long. 75° 42′; from Badagara S.E. 7¼ miles; from Calicut N.N.W. 20 miles; from Quilandy N. 6 miles; from the sea E. 3½ miles. Travellers' bungalow on an eminence overlooking the river; weekly market on Monday. Lock on the canal, which connects Agalapoya backwater with Coottiyaudy river.——*Pooramala* (പുറമല - puramala, Mal.). From (puram, mal. outer + mala, mal. hill). Village, Hill; lat. 11° 04′; long. 76° 31′; from Badagara S.E. 69 miles; from Calicut E.S.E. 48 miles; from the sea E. 24 miles.——*Poracaud* (പുറക്കാട് - purakkátu, Mal.). From (puram, mal. outside + kátu, mal. forest). Trig. station; lat. 11° 28′ 33·07″; long. 75° 41′ 27·37″; height 260 feet; from Badagara S.S.E. 9¼ miles; from Keelariyore W.S.W. 5⅛ miles; from sea E. 1½ miles.——*Pynaud* (പയ്യനാട് - payyanátu, Mal.). From (payya, mal. flat + nátu, mal. country). Petty principality, Village. Part of the ancient kingdom of Collam annexed by the Zamorin [q.v.].——*Quilandy* (കൊയിലാണ്ടി - koyilánti, Mal.). See sep. title.——*Sacrifice rock* (വെള്ളിയാങ്കല്ല് - velliyánkallu, Mal.). See sep. title.——*Tooracherry* (തുറശ്ശേരി - turashshéri, Mal.). From (tura, mal. ford + shéri, mal. village). Village. Ford of the Poothooputnam river near Keelore. Boundary of different marriage customs, &c.——*Tricody* (തൃക്കോടി - trikkoti, Mal.). From (tri, mal. fortune + koti, mal. flag). Village, Port; lat. 11° 30′; long.

75° 40′; from Badagara S.S.E. 7 miles; from Bombay S.S.E. 530 miles; from Calicut N.N.W. 21 miles; from Cottacull S.S.E. 4¾ miles; from Cuddalore N. 2¼ miles.——*Yedacara* (എടക്കര - etakkara, Mal.). From (etam, mal. palace + kara, mal. village). Amshom, Town; pop. 5,908; lat. 11° 23′; long. 75° 49′; from Badagara S.E. 19 miles; from Calicut N. 10 miles; from Cannanore S.E. 42 miles; from Quilandy S.E. 6¾ miles; from the sea E. 4 miles. On the north of backwater. Population consist of Moplahs.——*Yedacherry* (എടച്ചേരി - etaççéri, Mal.). From (eta, mal. middle + chéri, mal. village). Lat. 11° 40′; long. 75° 40′; from Badagara N.E. 6 miles; from Calicut N.N.W. 30 miles; from the sea E. 5¾ miles. Five miles from Badagara. Ganapaty temple. Cadatnaud rajah maintains Bramin feeding-house.

COORTAH (کرتا - kurtá, *Dec.*). Loose shirt or under gown worn both by Hindoos and Mahomedans; reaching down to the ankles and put on by being thrown over the head. Instead of always having the slit or opening in the centre of the front, it has it not unfrequently on one side of the chest. It has no strings, but a button at its upper end [sheelay].——*Coortee* (کرتی - kurti, Hind.). Jacket reaching nearly to the waist and sometimes lower; has very short sleeves; worn by Mahomedan women [cunchaly, sheelay].

COORUMBA (കുറുമ്പ - kurumba, *Mal.*; குறும்ப - kurumba, *Tam.*). From (kuru, tam. short); from small stature [coor, cora]. Very ancient Dravidian shepherd tribe. Their language a rude Tamul.—"*a*" For Coorumba bhoomy see below. As a dominant race they had numerous petty principalities over the whole peninsula. Numerous sites attributed to them and still called Coorumbar cottam [q.v.] are to be met. The ruins of Coorumbar forts even are still visible, being heaps of mould. The power of the Coorumbar survived longest in the North carnatic [q.v.], particularly in the hills.—"*b*" The modern Coorumbar have lost all traces of their ancient civilization, and retain no recollection of their history. At the present day they are scattered through the districts of Malabar, Coimbatore, Cuddapah, Bellary, Tanjore, Trichinopoly, the Neilgherries, Mysore and Poodoocottah state. The most compact body occupy the slopes of the Neilgherries. The Coorumbar of North arcot district, who are the next best known, are foreigners from Mysore, the remnants probably of those who after peopling the country surrounding Conjeeveram, were ousted by the Cholas; they speak old Canarese; they tend only sheep and goats [aud], and weave the long wool of the former, called in the plains Coorumbaud.—"*c*" The members of this tribe, especially as shown on Neilgherries, are small in stature, have a spare form of body, with peculiar wedge-shaped face and obtuse facial angle, cheeks hollow, with prominent molars or cheek bones; slightly pointed chin; eyes moderately large and frequently blood-shot. Color of irides dark-brown; the nose has deep indentation at the root about 1¾ inches in depth, which is general, and when contrasted with the profile or line with the ridge of the nose and os frontis, it gives them a very peculiar expression of feature. The hair is long and black and is grown matted and straggling, somewhat wavy, and is sometimes tied into a knot [conday], with a piece of cord on the crown or back of the head, while the ends are allowed to be free and floating. They have scarcely any moustache or whiskers and a straggling scanty beard; occasionally one is met with full moustache, whiskers and beard. The women have much the same physiognomy as the men, somewhat softened in expression. The men seldom have any covering except the lungooty [q.v.]; some of the women have only a waist cloth, and others wear a square cloth which reaches from under the arms to the knee. Occasionally, when they can afford it, both men and women adopt the ordinary dress of natives. The women too, are fond of ornaments, and wear necklaces and nose rings, earrings, and bracelets of glass [gauzoo] and iron.—"*d*" The Coorumbar of the plains worship Shiva. Those on Neilgherries worship Cooribhattroyan or lord of sheep and the wife of Shiva under the name of Musny. Also a rough round stone under the name of Hiryadeva, setting it up either in a cave or in a circle of stones; to this they make poojah [q.v.], and offer cooked rice at the sowing time. They are dreaded as sorcerers.—"*e*" Hill Coorumbar are still shepherds by caste and occupation. Their villages are called mottas. These consist generally of only four or five huts made of mud and wattle with thatched roofs. The front of a house is sometimes whitewashed and ornamented with rude drawings of men and animals in red earth [cauvy] or charcoal [adoopp kary]. They store their grain in large oval baskets and for bottles they use gourds. They clear a patch round about the village and sow the ground with raggy [q.v.], tinay [q.v.] or keeray [maurisham]. They dig up roots [gaddah] for food and collect jungle produce, honey [shahad], resin [raul], gallnuts [mauchicoy], &c., which they barter with low country traders, and they are clever in catching game in nets. Hill Coorumbar occasionally take work on coffee [q.v.] plantations, and some earn a livelihood by officiating as priests to the Badagas. They are also employed as musicians at weddings feasts and funerals of the other tribes, where they play on clarionets [naugaswaram], drums [paray], tambourines, &c. They make baskets [tokrah] of rattan [q.v.] and milk vessels out of a joint of bamboo [q.v.], as well as nets. Their women do not labor in the fields, but confine themselves to the limited work of their households, fetching water, cooking, &c. Coorumbar profess some caste scruples, and will not eat with any tribe but the Badagas. They will accept uncooked food from Todahs though not from Kotar. They bury their dead [shavacaud]. They have no marriage ceremony; but occasionally, when two have been living together for some time, they will enter into an agreement, in the presence of friends, to remain united for life; and in a family where a succession of such unions has taken place, they will, once in two or three generations, perform a ceremony, and hold a festival in celebration of them. This is done by pouring pots of water over one another, the pairs seating themselves together for this purpose, the ablution commencing with the seniors. They then put on new cloths, and end the day in feasting.—"*f*" Coorumbar of the plains wear coarse woollens and occasionally engage in cultivation [vellaumay]. These, like the Pariahs, enjoy some privileges which seem to have come down to them from a time when they were occupants of the land who had to be propitiated by immigrant tribes. In some parts of Mysore a Coorumban is required to turn the first furrow for the farmer in spring. On the Neilgherry plateau the Todah, who exacts a tribute in token of superiority from all the other cultivating classes, himself presents an offering of the first fruits to the hill Coorumbar.—"*g*" The following stories are told of the Coorumbar and the new settling Moodelliars and Vellaular. The Coorumbar constructed low wicket gates to their gardens, so that the new comers must be forced to bow on entering. But the Moodelliars and Vellaular instead of entering head foremost put their feet in first, and thus treated the Coorumbar with contempt. It was the custom of the Coorumbar, that, if one of their people died, the whole family should have the head shaved. One of the seniors of the tribe of Coorumbar died, and by custom the whole tribe at one time sat down to have their heads shaved. At the instigation of the Moodelliars and Vellaulars a barber charged his associates each to kill his man, which they did by cutting his throat as he was shaved. The women, thus suddenly widowed, had a great pile of fire kindled, into which they leaped and died.—"*h*" Numbers about 120,000 for whole Presidency. See vol. I (141); II, 54, 66, 109 [jauty].——*Coorooba* (ಕುರುಬ - kuruba, Can.). Canarese form of Coorumba. The aboriginal cultivators of South canara. Also found in the Balaghaut [q.v.]. They worship Junjappa, a box supposed to contain the garments worn by Krishnan. The Haley coorooba do not weave blankets [cumbly]; the Handey coorooba section, who take service in towns, is regarded as the highest of the race; the Maisa coorooba are the lowest in rank. Betta coorooba or hill cooroobas are met with chiefly in forests along south-western boundary of Mysore and among hills at foot of Neilgherries; they earn a livelihood by felling timber, at which they are very expert; they are a diminutive race, the men being about 5 feet 2 inches in height, but they are very active and capable of enduring great fatigue [jauty].——*Cooroom poray* (குறும்பொறை - kurumborai, Tam.). From (kurum, tam. short + porai, tam. hill). A village in a hilly country [coorchy].——*Coorumba bhoomy* (குறும்பப்பூமி - kurumbappúmi, Tam.). Formerly the country down the sea-coast from Pennair to Palaur, and across peninsula from Coromandel [q.v.] to Malabar coast [q.v.]. The Coorumba bhoomy of the east coast Coorumbas had twenty-four forts, between the Pennair and Palaur and extending inland a considerable distance. This country was taken possession of by Athonday, the illegitimate son of ruler called Coolotoonga cholan and the conquered country went henceforth by the name of Tondaimundalam. See vol. I (141).——*Coorumbaud* (குறும்பாடு - kurumbádu, Tam.). Means coorumban's sheep. A particular kind of sheep [aud].——*Coorumbiyattiry* (കുറുമ്പിയാതിരി - kurumpiyátiri, Mal.). From (kurumpora, mal. the hilly district of kurumbranád to the east of calicut + tiri, mal. holy, title). Title of the Calicut zamorin's family [charitram].——*Coorumboo* (குறும்பு - kurumbu, Tam.). From (kuru, tam. short); deficient in fertility. Village of arid tract [paulay].——*Coorumbranaud* (കുറുമ്പ്രനാട് - kurumbranátu, Mal.). Means coorumba + country. Hilly district to north-east of Calicut. See sep. title.

COORVITCHY (குருவிச்சி - kuruviççi, *Tam.*). From (kuru, tam. small + iççi, tam. ficus tsiela, roxb.); from size and resemblance [coor]. Botanically the Ehretia genus, boragineæ [vricsham, 92]. Tropical trees or shrubs with paniculate or corymbose flowers, usually white; fruit is a berry-like drupe with two or four stones each containing a single seed. The species best known to the natives are shown below.——*Prickly coorvitchy* (ಕೊಡ್ಲಿಮುರ್ಕಮರ - kódlimurkamara, Can.; బొక్కడి - bokkadi, Tel.). Title from acutely serrate leaves. Can. from (kodli, can. hatchet + murku, can. break + mara, can. tree). Tel. also (pótubokada), meaning male + the plant; (donkaburra) (bokkudu) [indian pennywort]. Botanically Ehretia [coorvitchy] acuminata, br., boragineæ [vricsham, 92]. Alias Ehretia serrata. Tree; leaves alternate, oblong, and broad lanceolate, acutely serrate, smooth; calyx five-cleft; corolla five-parted; panicles terminal, and from the exterior axils; flowers small, greenish-white, fragrant, numerous, aggregate in somewhat remote sub-sessile fascicles; drupes round, pulpy, red when ripe; found in some gardens; an introduction from northern bengal.——*Rough coorvitchy* (پالے کا جہاڑ - pálekájhár, Hind. and Dec.; ಎಣ್ಣೆಬುಡಿಗೆಗಿಡ - ennebudigegida, Can.; బాపనబూరి - bápanabúri, Tel.; හින්ටඹල - hintambala, Singh.; குருவிச்சி - kuruviççi, Tam.). Title from

roughness of leaves. Hind. from (pálá, hind. nutriment + jhár, hind. tree). Can. from (enne, can. oil + budige, can. small earthen vessel + gida, can. plant). Tel. from (bápana, tel. bramin + búri, tel. wheaten cake). Singh. from (hín, singh. small + tambala, singh. colocasia antiquorum, schott.). Tel. also (pittapisinika), meaning bird + maba buxifolia, pers.; (telladzuvvi), meaning white + ficus tsiela, roxb. Tam. also (kuruviççai). Title otherwise Box-leaved coorvitchy. Botanically Ehretia [coorvitchy] buxifolia, roxb., boragineæ [vricsham, 92]. Alias Cordia retusa. Large ramous shrub or very small tree; leaves alternate, fascicled, sessile, reflexed, cuneiform, very scabrous, shining; peduncles axillary, two to six-flowered; pedicles very short; flowers small, white; calyx five-parted, segments lanceolate; corolla campanulate, five to six-cleft; berry succulent, red, quadrilocular; nuts two; common in dry barren places. Root has sweetish warm taste in fresh state; root is medicinally an alterative, especially for venereal affections; considered antidote to vegetable poisons; in pharm. but non-officinal, like elm bark; fruit eaten by lower classes.——*Smooth coorvitchy* (दत्रंग - datranga, Mahr.; دترنگا - datrangá, Hind.; ಕಪ್ಪುರ - kappura, Can.; ఆడబుక్కుడు - ádabukkudu, Tel.; ମୋସୋନିଆ - mosoniya, Oor.). Title from leaves. Mahr. from (danta, san. ivory + ranga, san. color); from greyish white wood. Hind. from mahratta. Tel. from (áda, tel. female + bukkudu, tel. the plant ehretia). Tel. also (peddapuliméra), meaning large + the tree, so called; (páladantamu), meaning white + ivory; (shiragadamu). Title otherwise Paula dantam. Botanically Ehretia [coorvitchy] lævis, roxb., boragineæ [vricsham, 92]. Alias Ehretia punctata; Beurreria lævis. Tree; leaves short-petioled, ovate or oval, quite entire, pubescent below at the axils of the nerves, otherwise glabrous; corymbs lateral or sub-axillary, dichotomous, many-spiked; pedicels slightly hairy; calyx deeply five-cleft; corolla subrotate; stamens exserted; flowers small, white; flowering from october to february. Has a bilocular four-seeded berry, which eaten; also inner bark in times of much scarcity; wood greyish-white, hard, tough, durable.

COORY (കുറി - kuri, *Mal.*). From (kuru, mal. small) [coor, cora]. Mark. Lottery. Short for Chungauticoory.——*Cooricalyaunam* (കുറിക്കല്യാണം - kurikkalyánam, Mal.). From (above + kalyánam, mal. marriage). An entertainment given under Chungauticoory.——*Coorimooppan* (കുറിമൂപ്പൻ - kurimúppan, Mal.). From (above + múppan, mal. head). The president of the Chungauticoory.——*Cooripp* (കുറിപ്പ് - kurippu, Mal.). A memorandum [chit].

COOSAM (कञ्चुक - kañchuka, *San.*; سانپکی جالی - sámpkíjálí, *Hind.*; ಕುಪ್ಪಸ - kuppasa, *Can.*; కాసము - kásamu, *Tel.*; പാമ്പിഞ്ചട്ട - pámbiñchatta, *Mal.*; பாம்புச்சட்டை - pámbuççattai, *Tam.*). San. from (kañch, san. to bind). Hind. from (sámp, hind. snake + jálí, hind. integument). Tel. contraction for (kuppasamu, tel. a long jacket). Mal. and tam. means snake + jacket. Snake skin. Kept with valuable cloths to prevent damage. Used in medicine [cobra].

COOSAMBAH (कुसुम्भ - kusumbha, *San.*). From (kus, san. to embrace); from flowers yielding a fast red dye. Same as Bastard saffron.

COOSHKY (خشکی - khushkí, *Hind.*). From (khushk, pers. dry). Unirrigated land [metta, poonjah].

COOSHTAM (कुष्ठ - kusht'ha, *San.*; جزام - juzám, *Ar.*; کوڑ - kor, *Hind.*; ಕುಷ್ಠ - kushtha, *Can.*; కుష్ఠము - kusht'hamu, *Tel.*; കുഷ്ഠം - kusht'ham, *Mal.*; குட்டம் - kuttam, *Tam.*). From (ku, san. bad + st'ha, san. spot) [coo]. Greek ἐλεφαντίασις. Skin disease, especially Leprosy or lepra arabum. The mild form of leprosy appears at first in faint spots, of a brownish red tint, little elevated above level of sound skin and attaining size of the palm of the hand; commonly permanent and unchanged for many years, other symptoms then supervening; but usually they increase in size, become more raised and acquire a deeper tint. They blend with neighbouring patches, so that large surfaces of trunk or limbs become involved, and then their originally circular form is less evident. After a time the patches are extremely tender to touch, and an itching sensation and slight scabbiness attends them. Then they lose their feeling, especially in the centre which becomes depressed, and thus an annular aspect is acquired, the interior portion being pale, harsh, and dry and the hairs upon it blanched; enlargement of patches takes place, chiefly by additions at circumference of pre-existing spots. The contagion of true leprosy is sluggish; liable to be endemic on sea coast or estuaries, with those who live much on putrid fish and intermarry closely. The following are considered useful in leprosy:—chaulmoogra oil [q.v.], madaur root [yercum], vallauray [indian pennywort], cashew-nut oil [cashew], gurjan oil [q.v.], wood oil [q.v.], arsenic [paushaunam], and corrosive sublimate [shavveeram]. In Bhavishya oottara pooraunam, eight varieties of cooshtam are mentioned, viz.:—blisters on feet; deformity of generative organs; cutaneous fissures; elephantiasis; ulcers; coppery blotches, lepra maculosa; black leprosy or lepra græcorum of the highest degree of scabbedness, a universal canker of the whole body; and white leprosy or lepra mosaica. The following are varieties of cooshtam recognized at present day.——*Alausaca cooshtam* (अलसककुष्ठ - alásakakusht'ha, San.). Mild form in which tubercles are large, of a red color and very itchy.——*Capaula cooshtam* (कपालकुष्ठ - kapálakusht'ha, San.). Means potsherd. Black and purplish patches resembling broken pieces of a black earthen vessel.——*Caroom cooshtam* (கருங்குட்டம் - karunguttam, Tam.). Black leprosy.——*Caucanaca cooshtam* (काकनककुष्ठ - kákanakakusht'ha, San.). From (kákanantiká, san. the plant, abrus precatorius, linn.). Red and black spots.——*Charma dala cooshtam* (चर्मदलकुष्ठ - charmadalakusht'ha, San.). From (charma, san. skin + dala, san. petal). Mild form, red spots.——*Dadroo cooshtam* (दद्रुकुष्ठ - dadrukusht'ha, San.). From (dadru, san. herpes). Patches are elevated, black, round, and spreading.——*Dadroomundala cooshtam* (दद्रुमण्डलकुष्ठ - dadrumandalakusht'ha, San.). From (dadru, san. herpes + mandala, san. round). Patches are of a slightly dark reddish color, itchy, spreading and elevated into tubercles.——*Gaja charma cooshtam* (गजचर्मकुष्ठ - gajacharmakusht'ha, San.). From (gaja, san. elephant + charma, san skin). Ichthyasis simplex.——*Kilausa cooshtam* (किलासकुष्ठ - kilásakusht'ha, San.). From (kila, san. to become white). Resembling white leprosy; the skin becomes spotted without producing ulcers.——*Kitima cooshtam* (किटिमकुष्ठ - kitimakusht'ha, San.). Patches of a dark yellow color, like the cicatrices of healed ulcers.——*Neer cooshtam* (நீர்க்குட்டம் - nírkkuttam, Tam.). Water leprosy; with discharge of matter.——*Owdoombara cooshtam* (औदुम्बरकुष्ठ - audumbarakusht'ha, San.). From (udumbara, san. fig, ficus glomerata, miq.). Livid blotches resembling the ripe fig [anjeer].——*Paumay cooshtam* (पामाकुष्ठ - pámákusht'ha, San.; சொறிசிரங்கு - shorisirangu, Tam.). San. from (pámá, san. itches). Tam. from (shori, tam. to scratch + shirangu, tam. scab). Herpes, scab.——*Peroom vyaudhy cooshtam* (பெருவியாதிக்குட்டம் - peruviyáthikkuttam, Tam.). From (peru, tam. great + vyádhi, san. disease). Causing the dropping off of the fingers, toes, &c.——*Poondareeca cooshtam* (पुण्डरीककुष्ठ - pundaríkakusht'ha, San.). Means white lotus, nelumbium speciosum, willd. Patches are pale red in the centre, with dark dull red edges, and resemble the petals of the lotus [nelumbo], when exposed to the sun.——*Ricsha jihva cooshtam* (ऋक्षजिह्वकुष्ठ - rikshajihvakusht'ha, San.). From (riksha, san. bear + jihvá, san. tongue). Patches are shaped like the tongue of a bear [ricsham]; hard and red round their edges, dark in the centre.——*Sidhma cooshtam* (सिध्मकुष्ठ - sidhmakusht'ha, San.). From (sidhma, san. a blotch). Small, white, coppery or red spots, which spread over large surfaces accompanied with a thin mealy dust; lepra vulgaris.——*Veipaudicay cooshtam* (वैपादिकाकुष्ठ - vaipádikákusht'ha, San.). From (vipadá, san. misfortune). Sores form in hands and feet, about the nails, accompanied with small tubercles of a red color.——*Vellay cooshtam* (வெள்ளைக்குட்டம் - vellaikkuttam, Tam.). White leprosy. White albaras of the Arabians, and λεύκη of the Greeks.——*Vispota cooshtam* (विस्फोटकुष्ठ - visp'hótakusht'ha, San.). Means boil. Eruptions are of a dark yellow or red color, and the skin is dry and thin.——*Yeca cooshtam* (एककुष्ठ - ékakusht'ha, San.). From (éka, san. singular). There is no perspiration, and the patches are very large and of a dark brown color, and oblong, like the scales of a fish and rough like an elephant's skin. Ichthyasis.

COOSINY (కుశిని - kushini, *Tel.*; குசினி - kusini, *Tam.*). From french cuisine. A cook room. Coosinicauran is a cook.

COOSOOR (قصور - kusúr, *Hind.*). From (kasr, ar. defect). Deficiency.

COOST (قسط - kust, *Ar.*). Ar. from sanscrit. Same as Costum.

COOT (കൂട്ടം - kúttam, *Mal.*). From (kúdu, tam. to assemble). Assemblage. In Malabar a collection of houses, containing five-hundred or six-hundred persons whose members form a voluntary assembly. The coot formerly answered many purposes:—Nadoocoot, for arbitration; Nayautcoot, for hunting; Yogacoot, for meditation; Nizhalcoot, under shade of a tree to discuss tara [q.v.] affairs; Padacoot, for war. See vol. II, 104. In the Laccadive islands there are periodical coots for killing the rats which infest the cocoanut [q.v.] trees [maryauday].——*Coottaula* (കൂട്ടാല - kúttála, Mal.). From (above + ála, mal. shed). Naudvauly's house in Malabar.——*Coottauly* (கூட்டாளி - kúttáli, Tam.). From (áli, tam. possessor). Partner in business.

COOT (कुट् - kut, *San.*). To divide.——*Cootaury* (कुठारी - kut'hárí, San.). An elephant goad [ancoosham].——*Coottacam* (कुट्टक - kuttaka, San.). Algebra [beejaganitam, catapayaudy].

COOTAM (कूट - kúta, *San.*; కూటం - kútam, *Tel.*; കൂടം - kútam, *Mal.*; கூடம் - kúdam, *Tam.*). Peak. Suffix in hill names; as Agastyacootam, meaning agastyan + peak; Tricootam, meaning three + peak.

COOTB (قطب - kutb, *Hind.*). From (kataba, ar. to draw together). A pivot, axis. The pole star [al rooccabah], according to which the Kibla [q.v.] is constructed in Mahomedan mosques [musjid]. The highest title of Mahomedan saints. Part of lacab; as Cootb ood deen, the pole star of the faith [ism]. ——*Cootb shahy* (قطب شاهی - kutbsháhí, Hind.). From (above + sháh, pers. royal title). Branch of Bahmany dynasty, which after the dismemberment in 1489 A.D., established itself at Golcondah. Founded by Cootb ool moolk, tarafdar [q.v.] of Telingana [q.v.], who assumed the royal title in 1512. It lasted till 1687, when Golcondah was taken by the Moghul emperor Aurungzeeb [charitram]. See vol. I (149); II, 252.

COOTCHEL (కుచ్చెల - kuççela, *Tel.*). From (kuççe, tel. heap). A heap of cut corn. A land-measure in the Northern circars [q.v.] yielding such a heap = 8 gorroos or 1,000 coontas [alavay, 2b]. Approximate actual value, 1 cootchel = 25 acres.

COOTHIRAY (குதிரை - kuthirai, *Tam.*). From (kuthi, tam. to jump). Horse [ghorah].——*Coothiraymookh* (ಕುದುರೆಮುಖ - kuduremukha, Can.). From (kudure, can. horse + mukha, san. face); from its appearance at sea. Called Somsha parvat near Somsha in Mysore. Hill, South canara dist., Ooppinangady tal. Peak of Western ghauts [q.v.] on boundary between Cadoor district of Mysore and South canara. Conspicuous landmark to sailors. Can be ascended from west by a bridlepath. Bungalows. Trig. station in lat. 13° 07′ 42·85″; long. 75° 18′ 23·85″; height 6,215 feet; from Poottore N.N.E. 26 miles [hill-station]. ——*Muttay coothiray* (மட்டைக்குதிரை - mattaikkuthirai, Tam.). From (mattai, tam. palm-stem + kuthirai, tam. horse). Trestle for preparing the warp [pauv] in weaving [cootchoo, nesavoo].

COOTKEE (कटुका - katuká, *San.*; خربق هند - kharbakihind, *Ar.*; خربق هندی - kharbakihindí, *Pers.*; کٹکی - kutkí, *Hind.*). Title from hindostany. San. from (katu, san. pungent). Ar. from (kharbak, ar. hellebore + hind. ar. indian). San. also (róhíní), meaning red plant. Hind. also (pakhánbed), meaning gentian root. Title otherwise Bitter root. Botanically Picrorhiza kurrooa, benth., scrophularineæ [vricsham, 95]. Perennial; flowers sessile, deep blue, in dense spikes; fleshy-rooted plant allied to speedwell; imported. Root intensely bitter tonic and antiperiodic; substituted for british gentian, calumba [q.v.] and cinchona [koinah] bark; in pharm. non-officinal. No other common species here.——*Black cootkee* (कटुरोहिणी - katuróhiní, San.; कुटकी - kutakí, Mahr.; कटुकरोहिणी - katukaróhiní, Conc.; خربق اسود - kharbakiaswad, Ar.; خربق سیاه - kharbakisiyáh, Pers.; کٹکی - kutkí, Hind.; کالی کٹکی - kálíkutkí, Dec.; ಕಟುಕರೋಹಿಣಿ - katukaróhini, Can.; కటుకరోహిణి - katukaróhini, Tel.; കടുകരോഹണി - katukuróhani, Mal.; කළුරණ - kalúrana, Singh.; கடுகுரோகணி - kadugurógani, Tam.). Title from color of root. San. from (katu, san. pungent + ruh, san. to grow). Mahr. from (katukí, san. the plant). Ar. from (kharbak, ar. hellebore + aswad, ar. black). Pers. from (kharbak, ar. hellebore + siyáh, pers. black). Hind. from (katukí, san. the plant) [shaumay]. Dec. from (kálí, hind. black + kutkí, hind. hellebore). Can., &c., from sanscrit. San. also (krishnabhédá), meaning black + sort; (liptángí), meaning having the body anointed; (matsyapittá), meaning fish + bile; (shakuládaní), meaning eaten by fishes. Mal. also (katukirámani), by corruption. Tam. also (kadurógini). Title otherwise Bear's-foot, Black hellebore, Christiana, Christmas rose, Christ's wort, Fish bile, Giant christmas rose, Large-flowered hellebore, Nepaul hellebore. Botanically Helleborus niger, linn., ranunculaceæ [vricsham, 1]. Alias Helleborus altifolius, grandiflorus. Herbaceous plant, native of nepaul; large white rose-like flowers and a black root, with nauseous acrid taste; roots as occurring are in pieces four to six inches long, black all through their substance, externally of a greyish color, with numerous joints; used by farriers [naulbund] as purge for horses [ghorah], cautiously among hakeems [q.v.] as drastic cathartic in mania. The english stinking hellebore is helleborus fœtidus, willd. White hellebore or veratrum album is a different plant.

COOTOOMBAM (कुटुम्ब - kutumba, *San.*). From (kuti, san. house). Household. Family, or wife and children. Avibhacta cootoombam is the hindoo undivided family [avibhactam].

COOTT (കൂത്ത് - kúttu, *Mal.*). Dance.——*Coottooparamba* (കൂത്തുപറമ്പ - kúttuparamba, Mal. kúttaparamba *). From (above + paramba, mal. high ground).—"*a*" Deputy tahsildarry, Malabar district. Pay Rs. 70.—"*b*" Town, Deputy tahsildar's station; Malabar dist., Cottayam tal.; lat. 11° 50′; long. 75° 36′; from Calicut N.N.W. 42 miles; from Cannanore E.S.E. 14 miles; from Cottayam E. 1 mile; from Madras W.S.W. 330 miles; from Malapooram N.N.W. 62 miles; from Manantoddy W. 29 miles; from Palghaut N.W. 102 miles; from Ponnany N.N.W. 75 miles; from Tellicherry N.E. 7¼ miles; from the sea E. 10 miles. Public bungalow [q.v.]; old fort in ruins; large meidaun [q.v.] on high road to Periya pass.

COOTTAM (குற்றம் - kuttam, *Tam.*). From (kurai, tam. to be imperfect) [coor, cora]. Fault. The ten faults or improprieties to be avoided by every writer are according to the Nunnool:—paucity of words; prolixity; tautology; contradiction; the use of inappropriate words; ambiguity; too great simplicity; irrelevancy; unequalness; unmeaningness. For beauties of composition see heading Azhagoo.——*Coottavauly* (குற்றவாளி - kuttaváli, Tam.). From (áli, tam. possessor). A criminal.

COOTTAM (குட்டம் - kuttam, *Tam.*). Literally depth. Also means small, young [cootty]. Tank; suffix in place names as Aunaicoottam, meaning elephant + tank.——*Coottaudan* (കുട്ടാടൻ - kuttátan, Mal.). From (kuttanátu, mal. the low land near ambalappuzha). A Malabar paddy. Black and white varieties as usual [paddy].——*Coottiyaudy* (കുറ്റിയാടി - kuttiyáti, Mal. kuttiyádi *). From (kutti, mal. small + átu, mal. country). Village, Pass. River; Malabar dist., Cooroombranaud tal.; pop. 4,893; lat. 11° 39′; long. 75° 48′; from Badagara E.N.E. 12 miles; from Calicut N. 27 miles; from the sea E. 13 miles. Once a strong military post. Jumma musjid [q.v.]. The pass leads from head of the navigable waters of Cotta river into N. wynaud. At first made for military purposes in connection with Pychy rajah's rebellion. Only practicable for foot-passengers and beasts of burden. Coottiyaudy river is navigable from Badagara up to 30 miles. Large quantities of timber are floated to Yelattore and Badagara.——*Cootty* (കുട്ടി - kutti, Mal.; குட்டி - kutti, Tam.). Small [coottam].—"*a*" Term of familiar address to boys and girls in family. Also suffix in Tamul proper names as Annacootty, meaning elder brother + little one. Pariah proper name [peyar]. A term applied by Numboories to their east coast Puttar servants [boy].—"*b*" Plant first term. Ex., joining two genera, where translation is of second term:– Epicarpurus orientalis (kuttippilá), artocarpus integrifolia; Limonia acidissima (kuttivilá), feronia elephantum; Sponia wightii (kuttippilá), artocarpus integrifolia. See gloss. paragraphs.—"*c*" Means stump of wood; vessel made by scooping it out. Liquid measure [alavay, 4 c, d]. For oil. Varies from 105 to 175 cubic inches. Same as tcony.—"*d*" Also stake to mark limit, hence boundary, and prefix in place names as Coottipooram, meaning boundary + town. Coottinell is an allowance in grain made by proprietors for keeping up the fences and enclosure of an estate.——*Cootty shauttan* (குட்டிச்சாத்தான் - kuttiççáttán, Tam.). From (above + shástá, san. punisher). A goblin invoked in juggling tricks. See vol. I (81) [cooly, cooraly, matam].

COOVAH (کوا - kuá, *Hind.*). Subterranean passage in fort.

COOY (കുഴി - kuzhi, *Mal.*; குழி - kuzhi, *Tam.*). A square measure [coozhy], considerable variety in different places. Also a pit, especially in which a cocoanut [q.v.] tree is planted; whence in Malayalam planting trees. See vol. I, 609; II, 518. ——*Cooyicaunom* (കുഴിക്കാണം - kuzhikkánam, Mal.). See sep. title.——*Cooyicoor* (കുഴിക്കൂറു - kuzhikkúru, Mal.). From (above + kúr, mal. share). The profit to which the tenant is entitled under Cooyicaunom [chamayam].——*Cooyivett* (குழிவெட்டு - kuzhivettu, Tam.). From (above + vettu, tam. to dig). Earth work, digging at so much per pit.——*Cooyivila* (കുഴിവില - kuzhivila, Mal.). From (above + vila, mal. price). Value of the planted trees.

COOZHAY (கூழை - kúzhai, *Tam.*). Short [coor].——*Coozay paumb* (گیڈھا سانپ - gídhásámp, Hind.; கூழைப்பாம்பு - kúzhaippámbu, Tam.). Hind. from (gídhá, hind. dwarf + sámp, hind. snake). Tam. from (kúzhai, tam. short + pámbu, tam. snake). Hind. also (chhotásámp), meaning little snake. Terms co-extensive with the family Calamaridæ, ophidii colubriformes, ophidia [sarpam], reptilia [sarpy, 15], of naturalists [jantoo]. The Dwarf snakes or Calamaridæ are very small; always found on the ground, beneath stones, fallen trees, or turf; their food chiefly of insects and worms; they themselves fall an easy prey to other snakes, especially to the Bungaur [q.v.] and hill cobra [q.v.]; they never bite. The following are the South indian species:—"*a*" Aspidura copii. Scales in seventeen rows; brownish above, minutely dotted with black; series of pairs of black spots runs along the back; twenty-six pairs of spots on the trunk; belly white, marbled with black.—"*b*" Calamaria leucocephala. Black above; head, neck, the two outer series of scales, and the lower parts white.—"*c*" Geophis microcephalus. Alias Rhabdosoma microcephalum. Scales in thirteen series; brown; back with three more or less distinct series of small dark spots; blackish band with whitish edges along each side of the body, more distinct towards and on the tail than anteriorly; oblique yellowish streak behind angle of the mouth; belly nearly uniform brownish black, only margin of scutes remaining whitish.—"*d*" Macrocalmus lateralis. Brown; dark-brown band, enclosing a regular series of whitish dots, runs along the side, bordering the belly; back with two series of indistinct brownish-black spots; irregular series of very small black dots along each side of the belly, which is whitish; blackish subcaudal band.——*Coozhay vaulan* (கூழைவாலன் - kúzhaiválan, Tam.). Tam. from (above + vál, tam. tail). The term may be considered co-extensive with the family Uropeltidæ, ophidii colubriformes, ophidia [sarpam], reptilia [sarpy, 14], of naturalists [jantoo]. Have short tail; bear some resemblance to the Typhlopidæ [domoouh]; live under ground; conical head, gene-

rally very stout neck, rigid body, short, strong, and posteriorly shielded tail, adapted for burrowing; head always narrower than the neck, which is generally slightly swollen and the thickest part of the trunk; nasal large; eye very small; do not attain to a considerable size; they are by no means scarce, but escape observation from their peculiar mode of life; in order to collect them it is necessary to dig for them to a depth of 4 feet; they are viviparous; live on insects and worms. The following are the South indian species:—"*a*" Melanophidium wynaudense. Alias Plectrurus wynaudensis. Black; posterior two-thirds of belly irregularly black and white.—"*b*" Plectrurus guntheri. Purple above, each scale with a lighter margin; belly yellow, color rising up on the sides in triangular markings, which are alternate with similar markings of black, purple spots sometimes joining those of the other side by narrow stripes crossing the belly.—"*c*" Plectrurus perrotetii. Uniform brownish or blackish.—"*d*" Rhinophis pulneyensis. Alias Plectrurus pulneyensis. Brownish-black; yellow band from the labials runs along each side of the front part of the body; spots sometimes extend across the belly; yellow band along each side of the tail.—"*e*" Rhinophis sanguineus. Alias Rhinophis microlepis. Uniform black above; belly with the three outer series of scales scarlet, many of the scales and ventral shields having a black spot; caudal shield black, with yellow median streak and with red outer margin; large black spot on lower side of the extremity of the tail.—"*f*" Silybura beddomii. Brown; each scale on the sides with a pair of whitish dots; each ventral shield with a small whitish spot; yellowish line along the side of the neck; vent and tip of the tail yellow.—"*g*" Silybura bicatenata. Black above and below, each scale on the back with a yellowish margin; yellow band along each side of the body; lower parts entirely black.—"*h*" Silybura brevis. Brown above; lower part of sides and the belly yellowish, densely marbled with brown; sides of throat yellowish, immaculate; lower part of the tail black, with broad white band on each side.—"*i*" Silybura elliotti. Alias Coloburus ceylanicus; Siluboura ceylanica, nilgherriensis; Uropeltis ceylanicus. Blackish brown above and below; narrow yellowish streak runs from the angle of the mouth along each side of the neck; sometimes irregular small yellowish spots along the sides and on the back; lower part of the tail completely encircled by a yellow band.—"*j*" Silybura macrolepia. Black; broad, irregular, yellowish band along each side of the front part of trunk; traces of a similar narrow band are visible along the sides of the body; yellow band along each side of the lower part of the tail.—"*k*" Silybura ocellata. Ground color of male yellowish olive, darker towards head and tail; female dull brownish; young dark purplish brown; all with series of yellow, black-edged ocelli; series of irregular, transverse, yellow, black-edged spots along each side of the belly; belly brownish.—"*l*" Silybura shorttii. Black; numerous irregularly disposed scales are white; irregular white band from angle of mouth along each side of the front part of trunk; yellowish band along each side of tail.

COOZHY (കുഴി - kuzhi, *Mal.*; குழி - kuzhi, *Tam.*). Pit [cooy]. Superficial measure. 100 coozhies = 1 cawny [alavay, 2 a]. Approximate actual value, 1 coozhy = 576 square feet; but very variable. Compare Tel. goonta, Tam. gooly. See vol. I, 609; II, 506, 507, 509.——*Coolitalay* (குழித்தலை - kuzhittalai, Tam.). See sep. title.——*Coolitora* (കുഴിത്തുറ - kuzhittura, Mal.). See sep. title.——*Maundavar coozhy* (மாண்டவர்க் குழி - mándavarkkuzhi, Tam.). From (mándavar, tam. dead men + above). Ancient kistvaens. They contain earthen jars, with fragments of human bones in earth [aursham, mady moottaur tauzhy, paundicoozhy].

COPAL (चन्द्रस - chandrasa, *Mahr.*; سندروس - sandrús, *Ar.*; چندرس - chandras, *Hind.*). Title is mexican term for gum resins generally [googal]. Natives connect it with Gopaulan or Krishnan. Mahr. from (chandra, san. moon + rasa, san. juice); being a white gum [gond]. Used in America specially for gum-resin of Hymenæa gum trees. Indian copal is piney dammer [q.v.]. American copal occurs in yellow flat fragments while Indian copal is in round colorless masses. American copal, imported from south america through bussorah, is employed by bandy-makers for preparing a varnish; resembles amber so much that jewellers make it into necklaces, &c., passed off as amber [karbah]. Australian or New zealand copal is Dammara australis.

COPE (కోపు - kópu, *Tel.*). Mercantile house [aurang, bankshaul].——*Copedaur* (కోపుదారుడు - kópudárudu, Tel.). From (above + dár, pers. suffix of possession). A warehouse-keeper. A contractor for long-cloths [cape merchant].

COPPER MOUNTAIN (ತಾಂಬ್ರಬೆಟ್ಟ - támbrabetta, *Can.*). Can. also (jóladaráshi), meaning heap of cholum [q.v.], from shape. Sanscrit name (támrakúta), meaning copper peak. Hill; Bellary dist., Bellary tal.; lat. 15° 03′ 45″; long. 76° 55′ 45″; from Bellary S.S.W. 6¾ miles. Highest point of Mincherry range, which is four miles south of Bellary. So called because Hyder ally worked the ore here.

COPPRAY (کھوپرا - khoprá, *Hind.*; کھوپرےکی بٹی - khoprekíbattí, *Dec.*; ಕೊಬ್ಬರಿ - kobbari, *Can.*; కొబ్బెర - kobbera, *Tel.*; കൊപ്പര - koppara, *Mal.*; கொப்பரை - kopparai, *Tam.*). Dry kernel of cocoanut [cobbary].

CORA (ಕೊರ - kora, *Can.*; కోర - kóra, *Tel.*). Small [coor]. Defective. Narrow, sharp, rude.——*Coraga* (ಕೊರಗ - koraga, Can.). Means a low set of people. A prædial tribe found in South canara. Their traditions there are that an abyssinian brought an army from anantapore, of which they formed a part; the army was at first victorious, but afterwards being defeated the coragar were driven into the forests. They are physically strong, with a forehead of moderate size, and black skin. In former times they were slaves. There are three clans; the Andey coraga, Vastra coraga, and Sappoo coraga [jauty]. Under Hindoo rule, the Andey coragar were considered so unclean that they were not permitted to spit on the ground, but had a pot suspended from the neck into which they expectorated. The Vastra coraga clan wear the shrouds taken from the dead. The Sappoo have leaves as a covering. The tribe follow makkala santauna.——*Coraly* (ಕೋರಲಿ - kórali, Can.). See sep. title.——*Coramboo* (குரம்பு - kurambu, Tam.). From (kuru, tam. small + varambu, tam. ridge). A dam of sand, brushwood, loose stones, &c., running out from the bank of a river, sloping diagonally for a long distance upstream, to turn the river water into a channel [q.v.] for irrigation; the fall being made less than that of the river the water is delivered higher than it could be direct from the river. Also simply bund [q.v.] in rice-field [anay].——*Coraputt* (కోరాపట్టి - kórápatti, Tel.). From (kórá, tel. rude + patti, tel. village).—"*a*" Division; Vizagapatam district; language Ooriya. Boundaries:—E. Calahundy and Royagada and Parvatipore divisions; S. Pottinghy division; W. Padair and Mulkangherry divisions; N. Jeypore and Nowrungapore divisions.—"*b*" Deputy tahsildarry, Vizagapatam district, pay Rs. 200.—"*c*" Village, Head-quarters of Special assistant agent, Superintendent and Assistant superintendent of Police and Deputy tahsildar; Vizagapatam dist., Jeypore zemindarry, Coraputt magisterial division; pop. 163; lat. 18° 48′; long. 82° 46′; from Jeypore S.E. 11 miles; from Madras N.N.E. 422 miles; from Narsapatam N. 78 miles; from Parvatipore W. 46 miles; from Vizagapatam N.N.W. 85 miles; from Vizianagram N.W. 65 miles. A healthy, well-laid town on an open rolling plateau. Head-quarters of Agency police reserve. Granted to Government free of charge for this purpose by the late Maharajah.——*Corava* (குறவன் - kuravan, Tam.). The corresponding terms are:—Tel. and Can. yerkala, Mal. corava. Wandering tribe closely connected with the Coorumbar [q.v.]. They are darker than most natives in complexion. They worship a goddess called Polairamma. They march with tents [derah], hawking goods and telling fortunes; deal largely in salt [ooppoo], which they carry from the salt-pans [ooppalam] on the coast into the interior, returning with grain; some make boxes and baskets of bamboo [q.v.] twigs, and palmyra [q.v.] leaves; others breed pigs [soor] and donkeys [gadhah]; others collect honey [shahad] and other jungle produce; those that reside in madras town sell leaves called carepauk [curry-leaf tree] used as a curry [q.v.] stuff. Polygamy is common; and if a man owe money to his neighbour, he pledges his wife or daughter to his creditor, who may either live with them or transfer them to another person; on the release of the debtor, he reclaims his wife and any children that may have been born in the interval. The Coravar bury their dead [shavacaud]. There is a Tamul proverb:—குரங்குப் பிணமும் குறப் பிணமும் கண்டவர் இல்லை—"No one ever saw the dead "body of a monkey, or the corpse of a Coravan." There is a tamul proverb:—குறத்தி பிள்ளை பெற்றால் குறவன் காயம் தின்பான்—"If the wife of a Coravan is brought to "bed, her husband takes the prescribed stimulant;" this is in jest, but in fact the wife makes her husband taste the medicine lest her rivals should poison her. Also a Malayalam proverb:—കുരങ്ങു ചത്ത കുറവൻ—"A Coravan whose monkey is dead;" meaning one who has lost his livelihood, rearing up monkeys and exhibiting them to public being one of their occupations. Numbers about 60,000. The following are some principal subdivisions:—Bajantry corava, from (bajantri, hind. musician); also called jangama corava; bellary and canara, residing in small tents or in grass huts outside the walls; they will not labor; the men are musicians, and with their women make grass screens or tatties [q.v.]; at harvest times they beg and pilfer from the reapers; the women tattoo the arms and foreheads of the hindoo women; they marry when the bride and bridegroom are about eighteen years of age; polygamy is allowed, and they live virtuously, never prostituting their children; they keep in their houses idols of the figure of hanooman [q.v.], and mark their foreheads with the marks of the veishnava sect. Cashby corava, from (kasbí, hind. prostitute); also agaurypaulwauley, sitters at the door of their tents; differ in appearance from bajantry coravar, resemble in figure and countenance the teloogoo people; found throughout deccan [q.v.]; are basket-makers and sell brooms; but their chief subsistence is from their young women, one of whom from their earliest infancy they devote to the gods; the goddess to whose service their lives are dedicated is maddalamma, also hoolijeeva, near bellary, and chetwye, a divinity made by sprinkling red lead [sendoor] on the tarwar tree, the cassia auriculata [tungaid]; the devoted women sometimes bear children, who are admitted into the caste; the colors

seen amongst them vary from the fairness of the bramins to that of the darkest of the shoodra races; no one can read or write; they abstain only from cow's flesh and pork; the women dress with the cholee [q.v.] or bodice and saury [q.v.]; they are rarely permitted to reside inside towns, or only then at some ruined spot remote from respectable people; they bury their dead, and place the deceased's usual food at the head of the grave, auguring most favorably if it be eaten by a crow and next if by a cow, if rejected by crow and cow they deem the deceased to have lived a depraved life and fine the surviving relatives. Caukka corava, from (kákka, mal. crow); in travancore; they eat crows. Patra corava, from the dancing girls having bells on their feet and ankles [jauty].——*Coray* (கோரை - kórai, Tam). See sep. title.——*Corcapilly* (دکهنی ببول - dakhaníbabúl, Hind.; کرکاپلی - korkápalí, Dec.; ಸೀಮೆಹುಣಿಸೆ - símehunise, Can.; ಚಕ್ಕುಲಿಮರ - chakkulimara, Too.; సీమచింత - símachintа, Tel.; കുർക്കമ്പുളി - kúrkkampuli, Mal.; கொறுக்காய்புளி - korukkáyppuli, Tam.). Title from tamul. Hind. from (dakhaní, hind. deccan + babúl, hind. acacia arabica, willd.). Dec. from tamul. Can. from (síme, can. foreign + hunise, can. tamarindus indica, linn.). Tel. from (síma, tel. foreign + chinta, tel. tamarindus indica, linn.). Mal. from (kúrkka, mal. sharp + puli, mal. sour, tamarindus indica, linn.). Tam. from (kurukku, tam. to shrink + káy, tam. fruit + puli, tam. tamarind tree); from fruit. Can. also (chaklimara). Tel. also (símachinduga), meaning foreign + albizzia odoratissima, benth. Title otherwise Foreign tamarind, Manilla tamarind, Sappan fruit tree, Sweet babool, Sweet-fruited inga. Botanically Pithecolobium [auragvadham] dulce, benth., leguminosæ [vricsham, 48]. Alias Inga dulcis; Mimosa dulcis. Tree, 30 feet; extreme branches pendulous, armed with short straight thorns; leaves bigeminate; leaflets oblong, very unequal-sided; petiole shorter than the leaflets; pinnæ and leaflets each one pair; flowers capitate, heads shortly peduncled, racemose, the racemes panicled; legumes irregularly turgid, much twisted; seeds glabrous, smooth, half imbedded in a firm whitish edible pulp; flowers small, yellowish-greenish; flowering in january and february; cultivated and common; in general appearance resembles the english hawthorn. The spaniards introduced the tree to the e. indies from mexico. Pulp of fruit eatable. Good hedge plant; coppices well; oil from flattened black seeds, of the consistence of castor [aumanac] oil, light-colored. Wood hard, coarse grained and brittle, of a reddish brown color, when sawn emits an unpleasant odour. Used for country carts, packing boxes, and the pannelling of doors.——*Corindah* (चिलारी - chilárí, Mahr.; కొరింద - kórinda, Tel.; ഇഞ്ച - iñcha, Mal.; வெள்ளிண்டு - vellindu, Tam.). Title from teloogoo. Tel. means thorny mimosa. Mal. from (chinna, mal. cleaning pod); (ínna), by corruption whence the word being joined with soap pod wattle [q.v.]. Tam. from (vellai, tam. white + indu, tam. mimosa species); from wood. Mal. also (attu), meaning bruised; soft bark used for washing body after bruising. Title otherwise Angular-stalked acacia. Botanically Acacia [cantalum] intsia, willd., leguminosæ [vricsham, 48]. Specific name from malayalam. Alias Acacia cæsia; Mimosa intsia. A procumbent or climbing shrub; branches angled, armed with recurved prickles; pinnæ five to eight pair, leaflets about nine pair, linear-oblong; petioles armed with recurved prickles on the under side, with a large convex gland near the base, and a small one between each of the one to three last pairs of pinnæ; panicles large, terminal; peduncles three to four together, heads of flowers globose; legumes broadly-linear, flat and thin; flowering in rainy season. Large thorny climbing shrub, hedge plant. Bark used in dyeing [shauyam] with morinda [dyeing mulberry], or lac [q.v.], giving brightness; fresh leaves also. Wood white, soft, porous. The hill variety is cæsia, otherwise gray acacia.——*Cority* (కొరితి - koriti, Tel.). Tel. from (kóra, tel. sharp); from spines. Tel. also (sálichettu), (alasále), (gortichettu), (gortidonka). Botanically Plecospermum spinosum, trecul., urticaceæ [vricsham, 119]. Alias Batis spinosa. Small straggling tree or sub-scandent shrub; common. Used for hedges. Wood greyish-white, with a small bright orange-yellow heart-wood, which is very hard; in the heart-wood the pores are filled with a yellow resinous substance; wood used to give a yellow dye [shauyam] with californian cinchona [lodh] and turmeric [country saffron]. No other common species here. ——*Corote* (കോരോത്ത് - kórótt, Mal.). Adjectival form from (kóra, mal. cyperus juncifolius, rottl.). Village; Malabar dist., Wynaud tal.; lat. 11° 45′; long. 75° 56′; from Calicut N.N.E. 34 miles; from Manantoddy W.S.W. 8½ miles. In Tondarnaud amshom, place of considerable trade, chiefly in hands of Moplahs; travellers' bungalow; two temples Tondarcottah and Bhagavaty cauv; two mosques Corottangaudipully and Corottpoothiyapully. ——*Corra* (కొర - korra, Tel.). Means small grain. Same as Tinay.——*Corteliaur* (கொற்றலையாறு - korttalaiyáru, Tam. kortalayár *). From (kórai, tam. cyperus genus + talai, tam. place + áru, tam. river). Cf. Coray. Sanscrit name (kushas-t'halí), meaning coosham grass, eragrostis cynosuroides, retz. + land [cooshastaly]; also (vriddhakshíranadí), meaning old + milk + river. River; N. Arcot dist., Wallajah tal. and Chingleput dist., Ponnairy and Trivellore tals. Rises in surplus from calingula [q.v.] of Cauverypauk tank in North arcot. Swelled by accretions from tanks of Wallajah talook, and by the Mahendrauddy and Tappoor, it flows through the Trivellore and Ponnairy talooks. At Keshavaram it is crossed by an anicut [q.v.] which throws water down the old Bungaur channel. It then runs in a north-easterly direction to Pattrapermatore, near which it is joined by the Trittany and Nagary [cooshastaly]. At Velliyore tambrapaukam it is again tapped by an anicut for the supply of Cholavaram and Red hills tanks, and again by Seemaupooram anicut it fills large tanks of Minjoor, Vulloor, &c. It then falls into Ennore backwater about 12 miles north of Madras. Chief source of Madras [q.v.] water supply. See vol. II, 92. It is said that at one time the bed of the present Corteliaur was occupied by the Palaur. It was the delay caused by a sudden fresh in the Corteliaur that led to the destruction of General Baillie's column by Hyder ally in 1780 [poollalore].

CORADAH (کلڈا - koldá, *Hind.*; కొరడా - koradá, *Tel.*; കൊരട - koratá, *Mal.*).—"*a*" A long whip [chowk] of cotton [q.v.] rope, about an inch and-a-half in diameter at the thick end, where it is grasped, and tapering to a point at the other extremity; about 9 feet long. Formerly in use under Mahomedan governments.—"*b*" Mittah, Village; Ganjam dist.; 34 sq. miles; lat. of village 19° 56′; long. 84° 20′; from Balligooda S.E. 29 miles; from Chetterpore W.N.W. 60 miles.

CORAH (کورا - korá, *Hind.*). Means brown. Unbleached cotton cloth. Undyed silk [puttoo].

CORAKKAN (கோரக்கன் - kórakkan, *Tam.*). From (gó, san. cow + raksh, san. to protect); cowherd. One of the nine siddhar [q.v.], who acquired supernatural powers by intense austerities. Versed in poetry, medicine, and chemistry. Ganjah is called Corakkar mooly or Corakkan's drug. Compare Gorakha chincha or Gorakha's tamarind [baobab].

CORAL TREE (मन्दार - mandára, *San.*). From (mand, san. to be beautiful) [white mountain ebony]. Title from flowers. Botanically the Erythrina genus, leguminosæ [vricsham, 48]. Tropical trees and tuberous herbs, with clusters of very large, long flowers, which are usually of the brightest red; frequently stems are defended by stiff prickles; leaves are trifoliate, with long stalks; pods mostly long, narrow and round with red seeds used for necklaces. The species best known to the natives are shown below. The term includes also plants from genera bombax, breynia, zanthoxylum.——*Black coral tree* (കരിമുരിക്ക - karimurikku, Mal.). From glossy black seeds. Same as Rhetsa. ——*Common coral tree* (पारिजात - páriјáta, San.; मन्दार - mandára, Mahr.; पंगिरो - pangiró, Conc.; پانگرا - pángrá, Hind. and Dec.; دوڈپ - dudap, Malay; ಕೆಂಪುವಾರ್ಜಿಪ್ಪೆಮರ - kempuvárjippemara, Can.; ಪೊಂಗರೆಮರ - pongaremara, Too.; బార్జము - bárjamu, Tel.; ଚଳୋଧୋନ - chalodhona, Oor.; മുരിക്ക - murikku, Mal.; එරබදු - erabadu, Singh.; முருக்கம் - murukkam, Tam.). San. from (pári, san. ocean + jan, san. to be produced) [coormam, coral jasmine]. Mahr. from (mand, san. to be beautiful). Can. from (kempu, can. red + várjippemara, can. the tree). Tel. from sanscrit. Tam. from (murugu, tam. beauty). San. also (madaja), meaning produced from intoxication; (palitamandára), meaning grey + the plant. Hind. also (farad); (paltmandar), from sanscrit; (panjírá). Can. also (páriváladamara); (hongara); (pongara); (háliv́anamara). Tel. also (bádidamu); (bádamu); (bádisechettu), meaning adze + tree; (bádchamu); (mahámeda); (muççikarra), meaning mootchy's wood. Mal. also (mullumurikku), meaning thorn + the tree; (karimurikku), meaning black + the tree; (kalyánamurikku), meaning auspicious + the tree; from beauty of flowers. Tam. also (kalyánamurukkam); (muççimaram), meaning mootchy tree, useful to mootchies in toy work; (shavusayam). Title otherwise Bastard teak [palaus], Moorkkam wood tree, Mootchy wood tree, Red bean. Botanically Erythrina [coral tree] indica, lamk., leguminosæ [vricsham, 48]. Alias Erythrina corallodendron, cuneata, orientalis. Tree, 10-30 feet, armed with prickles; petioles and leaves unarmed; leaves pinnately trifoliolate; leaflets glabrous, entire, the terminal ones broadly cordate; racemes terminal, horizontal; calyx spathaceous; contracted and five-toothed at the apex; corolla papilionaceous; vexillum about three times shorter than the calyx, and four times longer than the alæ; petals of keel distinct; stamens monadelphous, with the sheath entire at the base, thence diadelphous with the tube split; legumes six to eight-seeded; flowers scarlet. A stiff-looking tree; bears in march at the ends of its stems handsome clusters of the large, brilliant, flowers, being quite destitute of leaves at the time; has a dark-brown gum [gond]. The fresh bark has a smooth grey suber, and bears small fissured corky lenticels arranged in perpendicular rows; on rubbing off the thin suber a green surface is exposed; the outer portion of the bark is granular and brittle, the inner consists of numerous layers of liber cells interlaced so as to form an open network; the bark has a disagreeable flavor, but is not bitter. The flowers have no scent; there is a Tamul proverb:—பொற் பூவின் வாசனையும் முருக்கம் பூவின் வாசனையும் சரி—"The smell of a flower "made of gold and that of the moorkkam flower are alike, both "beautiful but odourless;" there is another:—வித்தை அற்றவன் அழகு வாசனை இல்லா முருக்கம்பூப்போல—"The "beauty of the unlettered is like the inodorous moorkkam "flower." The trifoliate leaf is taken to be symbolical of the trinity [trimoorty]; the centre leaflet representing Vishnoo, its

right bramha, its left Shiva. Bark used medicinally, being antibilious, febrifuge, anthelmintic and useful as a collyrium in ophthalmia; leaves applied externally to disperse venereal buboes, and to relieve pain on the joints. Young tender leaves eaten in curries; flowers much eaten by squirrels [anil], and crows [caurvam] and other birds feed on the insects which resort to the tree. Tree used in malabar for support of the betel [q.v.] vines; from being armed with numerous prickles, it serves as hedge-plant; dried flowers on being boiled yield a red dye [shauyam]; bark yields a fibre; ashes used as mordant [cauram]. Wood called mootchy wood is light and soft, does not warp or split; varnished toys from northern circars [q.v.] are made of this wood [condapully]; also for cowry [q.v.] boxes, and sword sheaths; also for rafts, and is hollowed out into canoes [munjy]. ——*Cotton coral tree* (ഉന്നമുരിക്ക - unnamurikku, Mal). From red flowers and cottony fibres of pods. Same as Red cotton tree. ——*Devil coral tree* (पारिभद्र - páribhadra, San.; යකැරබදු - yakerabadu, Singh.). Title from prickles. San. from (pári, san. ocean + bhadra, san. happy); beautiful tree from the ocean [coormam]. Singh. from (yak, singh. devil + erabadu, singh. the coral tree, erythrina indica, lamk.). Botanically Erythrina [coral tree] ovalifolia, roxb., leguminosæ [vricsham, 48]. Tree, armed with prickles; leaflets oval; petioles armed; vexillum obcordate; racemes terminal, horizontal; flowers very large, scarlet, variegated with orange, sulphur and dark purple. Found in cuttack.——*Poolah coral tree* (अरुणी - aruní, San.; سرسرونی - sursaruní, Hind.; ಗಂಡುಪಚ್ಚೆರಿ - gandupaççeri, Can.; పగడపుచెట్టు - pagadapuchettu, Tel.; പവിഴപ്പൂല - pavizhappúlá, Mal.; பவழப்பூலா - pavazhappúlá, Tam.). San. from (aruna, san. red); from berries. Can. from (gandu, can. male + paççeri, can. the tree, so called). Tel. from (pagadamu, tel. coral + chettu, tel. tree). Tam. from (pravála, san. coral + púlá, tam. the plant, phyllanthus multiflorus, willd.); from berries. Can. also (kádu-nugge), meaning wild moringa pterygosperma, gærtn.; (kempu-huligida), meaning red + tiger + plant. Tel. also (errapuru-gudu), meaning red + tree, phyllanthus multiflorus, willd. Tam. also (shigappuppúlá), meaning red + the plant. Title otherwise Poolah shrub, Red poolah, Wild moringa. Botanically Breynia rhamnoides, müller, var. genuina, euphorbiaceæ [vricsham, 118]. Alias Melanthesa rhamnoides; Phyllanthus rhamnoides, vitisidæa; Rhamnus vitisidæa. Shrub; leaves oval, rounded at the apex, acute at the base, glabrous; peduncles axillary, the inferior ones paired, male, upper ones solitary, female, about the length of the petiole; fruit embraced by the short calyx; berries globose, bright red, mealy when ripe; flowers small, greenish; flowering nearly all the year; native of coromandel coast [q.v.]. Dried leaves smoked like tobacco [pogauk] for swollen tonsils; leaves are used in discussing tumors, especially carbuncles, applied warm with castor-oil; bark of root mixed with long pepper [q.v.] and ginger [q.v.] drunk as a tonic. Cattle eat leaves. Employed for ornamental hedges. Wood white and durable, employed by hill tribes for various economical purposes. No other common species here.——*Thorny coral tree* (ಕಿಚಿಗೆ - kichige, Can.; ముల్లుమోదుగ - mullumóduga, Tel.; முள்முருக்கம் - mulmurukkam, Tam.). Tel. from (mullu, tel. thorn + móduga, tel. butea frondosa, roxb.). Tam. from (mul, tam. thorn + murukkam, tam. erythrina indica, lamk.). Botanically Erythrina [coral tree] stricta, roxb., leguminosæ [vricsham, 48]. Tree armed with white prickles; petioles rarely prickly; leaves unarmed, terminal; leaflet reniform-cordate, pointed; calyx spathaceous, entire, acute, short; vexillum about ten times longer than the calyx and twice the length of the keel; keel much longer than the wings, its petals uniting; stamens monadelphous, with the sheath entire at the base, diadelphous upwards; racemes terminal, horizontal; legume two to three-seeded; flowers large, dark purple scarlet; western ghauts; flowering in march.——*White coral tree* (मन्दार - mandára, San.; पांगार - pángára, Conc.; پانگرا - pángrá, Hind.; ముల్లుమోదుగ - mullumóduga, Tel.; வெள்ளைக்கலியாணமுருக்கம் - vellaikkaliyánamurukkam, Tam.). Title from flowers. San. from (mand, san. to be beautiful). Tel. from (mullu, tel. thorn + móduga, tel. butea frondosa, roxb.). Tam. from (vellai, tam. white + kaliyánamurukkam, tam. coral tree, erythrina indica, lamk.). Hind. also (dauldhak), meaning white, butea frondosa, roxb. Tel. also (munimóduga), meaning demon + butea frondosa, roxb.; from prickles. Botanically Erythrina [coral tree] suberosa, roxb., leguminosæ [vricsham, 48]. Tree, with corky deeply-cracked bark; branches unarmed, except at the insertion of the petioles; stipules lanceolate; petioles pubescent, prickly; leaves unarmed; leaflets tomentose below, terminal one rhomboid and acuminated, occasionally reniform and rounded; calyx tubular, two-lipped; vexillum much longer than the calyx and more than twice the length of the keel; keel cordate, many times longer than the small wings, its petals united; stamens monadelphous; racemes axillary, sometimes terminal, spreading; legume two to three-seeded; flowers large, whitish rose scarlet; circars [q.v.]; flowering in march and april.

CORALY (ಕೊರಲಿ - korali, *Can.*). Means small [cora] grain. Same as White tinay.——*Wild coraly* (ಕಾಡುನವಣೆಹುಲ್ಲು - kádunavanehullu, Can.). Can. from (kádu, can. wild + navane, can. panicum italicum, linn. + hullu, can. grass). Can. also (kádukambuhullu), meaning wild + pennisetum spicatum, delile + grass; from emarginate hairs. Botanically Eragrostis [cooshami] ciliata, nees, graminaceæ [vricsham, 156]. Alias Poa ciliaris. Culms erect, rigid, smooth, 1-2 feet; leaves pubescent at the mouth of the sheaths; panicle columnar, 2-4 inches, hairy at the insertion of the branches; spikelets six to twelve-flowered, outer valve three-nerved, cuspidate, margins ciliated; seed obovate-globose, smooth, dark-colored; dry barren ground. Cattle eat it.

CORAM (கோரம் - kóram, *Tam.*). From (ghóra, san. terrible). Horse. Cf. vol. I (125).

CORANDY (குறண்டி - kurandi, *Tam.*). From (kurandu, tam. to be crumpled or coiled); from slender branches spreading and taking root. Botanically the Lepidagathis genus, acanthaceæ [vricsham, 101]. Generic character similar to barleria [nail dye], but habit of plant is different; native of elevated, dry, barren ground, all over coromandel [q.v.]; flowers, rainy and cold season; capsules burst as in barleria. The species best known to the natives are shown below. Another species is scariosa.——*Lowly corandy* (भुईतेरडा - bhuítéradá, Mahr.; ಗಂಟುಕಾಲುಗಡ್ಡೆ - gantukálugadde, Can.; கீழ்க்குறண்டி - kízhkkurandi, Tam.). Mahr. from (bhúmi, san. ground + téradá, mahr. impatiens balsamina, linn.). Can. from (gantu, can. knot + kálu, can. black + gadde, can. root). Tam. from (kízh, tam. low + kurandi, tam. lepidagathis genus). Tam. also (karappánbúndu), carpang + shrub; as useful in carpang [q.v.]. Title otherwise Carpang plant. Botanically Lepidagathis [corandy] cristata, willd., acanthaceæ [vricsham, 101]. Stem suffruticose, diffuse, and with the linear lanceolate leaves, glabrous; spikes capitate-congested, conglomerated near the root, on the branches axillary, woolly; bracteas and bracteoles conformable, oblong, mucronate; calyx four-parted, segments mucronately aristate, the inferior one bifid; flowers small, rose-colored; flowering in the cold season. ——*Milk corandy* (பாக்குறண்டி - pákkurandi, Tam.). Tam. from (pál, tam. milk + kurandi, tam. the thorny shrub, lepidagathis). Botanically Lepidagathis [corandy] pungens, nees, acanthaceæ [vricsham, 101]. Stem shrubby, very ramous; leaves spinously dentate; spikes binate or ternate, capitately congested, axillary, villous; dorsal bracteæ ovate, and like the fertile ones and bracteoles oblong-lanceolate, rigid, spinous at the apex; calyx four-parted, segments mucronate, spinulose, the inferior one bifid at the apex.

CORAY (मुस्ता - mustá, *San.*; తుంగ - tunga, *Tel.*; കോര - kóra, *Mal.*; கோரை - kórai, *Tam.*). Title from tamul. San. from (mus, san. to destroy); medicinal. Tam. from (kurn, tam. small). Sedges and bulrushes. Botanically the Cyperus genus, cyperaceæ [vricsham, 155]. Stem triangular, leafy at the base; spikelets in two rows, imbricated, in clusters or heads, with a leaf-like involucre under them; glumes several in each spikelet, with one flower in each; seed without bristles; roots of several species tuberous, edible, aromatic. The species best known to the natives are shown below. Other s. indian species indigenous or naturalized are:—Arenarius, stem long. Aristatus, triquetrous culm. Articulatus, culm terete. Atroferrugineous, culm, slender, erect, smooth. Castaneus, culms triangular. Cephalotes, creeping; culm triangular. Dehiscens, culm one-leaved at the base, triquetrous above. Difformis, culm triquetrous. Distans, culm triangular, glabrous. Haspan, culm triquetrous at base, sometimes sheathed and leafless, or leafy. Mucronatus, creeping; culms terete. Nilagiricus, root ascending, fibrous; culm, smooth, thin. Niveus, culm slender, triangular. Oryzeticola, culm lofty. Pennatus, greenish-glaucous; culm trigonal, leafy at the base. Petræus, root cæspitiferous; culms very low. Polystachyus, culm triangular, leafy at the base. Procerulus, smooth. Pumilus, culm leafy at the base. Punctatus, culms triangular. Pusillus, culm terete. Racemosus, firm and tall culm. Retzii, culm triquetrous, smooth, leafy at the base. Seminudus, leafless. Squarrosus, leaves linear. Tenuiflorus, root creeping; culm triquetrous, leafy below. Tenuispica, root cæspitiferous; culms erect. Tortuosus, smooth triangular culm. Tuberosus, root tuberous; culm triangular, leafy at the base. Verticillatus, culm leafy. Vulgaris, culms triangular. Wightii, culm flaccid; root fibrous.——(1) *Common sedge* (मुस्तक - mustaka, San.; मोथा - mót'há, Mahr.; भद्रमुष्टि - bhadramushti, Conc.; ساب - sáb, Ar.; موتها - mothá, Hind.; کوریک جھار - korekájhár, Dec.; ಭದ್ರಹುಲ್ಲು - bhadrahullu, Can.; ತಾರಿಪಂತಿ - táripanti, Too.; తుంగ - tunga, Tel.; മുത്തന - muttanna, Mal.; කලාඳුරු - kalánduru, Singh.; கோரை - kórai, Tam.). San. from (mus, san. to destroy). Mahr. from sanscrit. Hind. from sanscrit. Can. from (bhadra, san. prosperous + hullu, can. grass). Mal. from sanscrit. San. also (dhanakúta), meaning wealth + heap; (bhadramustaka), meaning excellent + the grass, strictly cyperus pertenuis, roxb.; (gundrá), meaning protecting; (kaivartikamustá), meaning fisherman + the grass. Hind. also (baránágarmothá), meaning large, cyperus pertenuis, roxb. Can. also (koranárigadde); (gókinagaddi); (abdahullu), meaning sea grass. Tel. also (bhadratungamuste); (bhadramuste); (tungamuste); (parivellamu); (púrigaddi), meaning thatch grass; (bhadratunga), meaning prosperous + the plant; (skákhatunga), meaning branch + the plant. Mal. also (karimuttanna), meaning the black + the grass; (pottappullu), meaning worthless grass.

Tam. also (shilandiyarisi), meaning spider + rice; (ambutham), meaning water + to give; (shadámáñji), meaning bushy hair + pulp of fruit [jatamansy]. Title otherwise Indian papyrus, Small sedge, Spider sedge, Toonga. Giving Coray [nalam, straight sedge] root, Shilandy flour. Botanically Cyperus [coray] rotundus, linn., cyperaceæ [vricsham, 155]. Alias Cyperus bicolor, bulbosus, hexastachyus, hydra, litoralis, procerus, var. benghalensis, jemenicus, tetrastachyus. Culms 2-4 inches high, semiterete, three-cornered; root bulbous, tunicate, with bulbiferous fibres; spikelets linear-lanceolate, acuminate, ten to sixteen-flowered, alternate in the apex of the culm, lower two double; scales ovate-lanceolate, acuminate; style trifid; seed oblong, three-cornered, involucre with alternate leaflet; two lower ones longer than the spikes; leaves filiform, all radical, far sheathing. In sandy situations on coromandel coast [q.v.] becomes a troublesome weed in the gardens; tuber has an agreeable fragrance and an aromatic balsamic bitter taste; natives use it at festivals, powdering it up and sprinkling powder on the images. Tubers are used medicinally as stimulant, diaphoretic, stomachic and tonic; veidyans recommend decoction in fevers, and where there is a tendency to dropsy, in quantity of half a cupful twice daily; quoted in pharm. but non-officinal. Cattle eat the greens; pigs eat the tubers; the latter can be used as flour in times of scarcity, and eaten roasted or boiled having then the taste of potatoes [q.v.]. Tubers used by perfumers on account of fragrance, giving an essential oil. With the grass mat manufacturers make the common floor mats called Coray poy, staining them like those made of the caldera bush [screw-pine].——*Creeping grass sedge* (ഊർപ്പുൽ - úrppul, Mal.; ஊர்ப்புல் - úrppul, Tam.). Tam. from (úr, tam. to creep + pul, tam. grass). Botanically Cyperus [coray] pangorei, rottb., cyperaceæ [vricsham, 155]. Alias Papyrus pangorei. Next to Rotundus, the most important species. Root, perennial; culms 3-6 feet, naked, obsoletely three-sided, smooth; leaves consisting of two or three sheaths embracing the base of the culms; umbels decompound; umbellets subsessile; involucre about four-leaved, one or two longer than the umbel; spikelets alternate, many-flowered; seeds elliptically triangular; common in ditches and borders of tanks. Mats common at calcutta are made from this grass; when green, they are split into three or four pieces, which on drying contract sufficiently to bring the margins in contact or to overlap each other; in this state they are woven.——*Demon sedge* (రక్కిసతుంగ - rakkisatunga, Tel.). Tel. from (rakkisa, tel. she devil + tunga, tel. cyperus rotundus, linn.); from being the largest species on coromandel coast. Botanically Cyperus [coray] roxburghii, an. ab. e., cyperaceæ [vricsham, 155]. Alias Cyperus elatus. Umbel decompound and supra-decompound, contracted; rays elongated, compressed and trigonal, fascicled and umbelled from many fastigiate cylindric sub-sessile spikes; spikelets imbricated, linear, ebracteolate twelve to sixteen-flowered; scales closely imbricated, embracing, roundish-ovate, obtuse with a small mucro; caryopsis oblong, three-cornered, acute at both ends, smooth; leaflets of the many-leaved involucre twin, outer ones largest and with the radical leaves broad; involucels narrow, shorter than the umbellet; culm triquetrous, angles rough above, sides concave.

——*Fisherman's sedge* (कैवर्तिमुस्तक - kaivartimustaka, San.; പാറപ്പുല്ല് - párappullu, Mal.). Title from being found on sea shore. San. from (kaivarta, san. fisherman + mustaka, san. cyperus rotundus, linn.). Mal. from (pára, san. shore + pul, mal. grass). Title otherwise Lofty cyperus. Botanically Cyperus [coray] venustus, r. br., cyperaceæ [vricsham, 155]. Culm triquetrous, leafy at the base, glabrous; leaves three-nerved, flat, scabrous at the margin; umbel compound, many-rayed, rays somewhat digitately branched at the apex; involucre five-leaved, very long; spikes spicately arranged in long branches, patent, narrow linear, compressed, ten to sixteen-flowered; scales keeled and boat-shaped, ovate, mucronate, lineolate; style exserted; achenium oblong, slightly arched, externally convex-angular, very finely dotted, a half shorter than the scale.——*Flood sedge* (پتی - patí, Hind.; జలతుంగ - jalatunga, Tel.; പൊട്ടപ്പുല്ല് - pottappullu, Mal.). Title from binding banks from floods. Tel. from (jala, san. water + tunga, tel. cyperus rotundus, linn.). Mal. from (potta, mal. worthless + pul, mal. grass). Mal. also (íra), meaning moist. Botanically Cyperus [coray], puncticulatus, vahl., cyperaceæ [vricsham, 155]. Alias Cyperus bacha, inundatus, procerus. Tall; culm triangular, glabrous; leaves stiff, keeled flat, somewhat scabrous on the margin and keel; umbel decompound, somewhat eight-rayed, large, diffuse; rays bracteately three to five-cleft, branches many-spiked; spikes spicately arranged, much spreading, broadly linear, twenty to twenty-six flowered; involucre three-leaved, very long; scales roundish-elliptic, shortly mucronate, keeled; stamens two; achenium obliquely sub-cordate, compressed at the sides, dotted and slightly scabrous, bright chestnut, shorter by half than the scale. Helps to bind banks from rapidity of water in streams.

——*Indian matting sedge* (గొడ్డుతుంగ - goddutunga, Tel.; කලෙහි - kalehi, Singh.). Tel. from (goddu, tel. beast + tunga, tel. cyperus rotundus, linn.). Botanically Cyperus [coray] corymbosus, rottb., cyperaceæ [vricsham, 155]. Alias Cyperus, tegetus. Culm triangular, leafless, sheathing at the base, glabrous; umbel compound, corymbiform, somewhat seven-rayed, longer rays brachiately branched; involucre somewhat four-leaved, twice exceeding the umbel; leaflets flat, scabrous at the margin; spikes four to twelve, spicately fascicled, patent, linear, compressed, twelve to thirty-two flowered; scales oblong, rounded emarginate at the apex, keeled and boat-shaped, five-nerved, rusty, keel green; achenium oblong, triquetrous, nearly three times shorter than the scale; wings of the rhacheola slowly becoming rusty and loosening. Floor mats [boriyah] are largely made of this.——*Large sedge* (పెద్దశాక - peddasháka, Tel.). Tel. from (pedda, tel. large + sháka, tel. cyperus rotundus, linn.). Botanically Cyperus [coray] umbellatus, burm., cyperaceæ [vricsham, 155]. Root fibrous; culms erect, 4-6 feet, smooth, bluntly angled, leafy at the base; leaves long, one equalling the culm; involucre three to six-leaved, leaflets unequal, the largest 2-3 feet; umbel decompound, with many unequal rays; spiklets numerous, spiked, alternate, three to four-flowered; seed elliptic, triangular.——*Straight sedge* (नागरमुस्तक - nágaramustaka, San.; नागरमोथा - nágaramót'há, Mahr.; سعد - sud, Ar.; مشك زمين - mushkizamín, Pers.; ناگرموتها - nágarmothá, Hind.; ناگرموته - nágarmotah, Dec.; ಕೊನ್ನಾರಿಗಡ್ಡೆ - konnárigadde, Can.; కోలతుంగ - kólatunga, Tel.; കോര - kóra, Mal.; கோரை - kórai, Tam.). San. from (nagara, san. town + mustá, san. cyperus rotundus, linn.); from being found near calcutta. Pers. from (mushk, pers. musk + zamín, pers. land). Hind. and dec. from sanscrit. Can. from (kora, can. short + náru, can. smell + gadde, can. root). Tel. from (kóla, tel. straight + tunga, tel. cyperus rotundus, linn.). Mahr. also (laválá). Can. also (kommarigadde). Tam. also (muttakkásu). Title otherwise Calcutta sedge. Botanically Cyperus [coray] pertenuis, roxb., cyperaceæ [vricsham, 155]. Alias Mariscus cyperus. Culm 3-4 feet, trigonal above; leaves few, radical, shorter than the culm; umbel compound and decompound; involucre nearly equalling the umbel; spikelets lanceolate, many-flowered; caryopsis three-cornered. Root is cordial, stomachic, and desiccant; also regarded as diaphoretic and diuretic; quoted in pharm. but non-officinal; root also aromatic and used for perfuming the hair.——*Striped sedge* (ಬಿಳಿಜಂಬುಹುಲ್ಲು - bilijambuhullu, Can.; വരപ്പുല്ല് - varappullu, Mal.). Can. from (bili, can. white + jambu, can. reed for thatch + hullu, can. grass). Mal. from (vara, mal. stripe + pul, mal. grass). Title otherwise Fox-tail cyperus. Botanically Cyperus [coray] alopecuroides, rottb., cyperaceæ [vricsham, 155]. Culms triangular, glabrous; leaves flat, scabrous on the margin; umbel decompound, about nine-rayed, rays very unequal, umbellets three to seven-rayed, partial rays densely covered with spikes on every side, forming elongated cylindrical compound spikes; involucre three to five-leaved, longer than the umbel, partial about eighteen-flowered; scales broad-elliptic, mucronate, obsoletely seven-nerved; western coast.——*Tail sedge* (ದಬ್ಬೆಜಂಬುಹುಲ್ಲು - dabbejambuhullu, Can.; ഈറ - íra, Mal.; වල්හිරි - valhíri, Singh.). Title from thin stalks. Can. from (dabbe, can. thin slip + jambu, can. sedge or reed + hullu, can. grass). Mal. means moist. Botanically Cyperus [coray] iria, linn., cyperaceæ [vricsham, 155]. Iria from malayalam. Culm triquetrous, glabrous; leaves flat, flaccid, rough on the margins; umbel six to eight-rayed; involucre very long, three to four-leaved; rays very unequal, branched and fascicled at the apex; spikes linear-compressed, eight to twenty-flowered, flowers distant; scales rounded, obovate-emarginate, very shortly mucronate, five-nerved; achenium elliptic, triangular, mucronate, as long as the scale. Yields fibre.——*Thorny sedge* (മുള്ളൻപുല്ല് - mullanpullu, Mal.). Mal. from (mullu, mal. thorn + pul, mal. grass). Botanically Cyperus [coray] pygmæus, rottb., cyperaceæ [vricsham, 155]. Alias Cyperus diffusus. Culms cæspitose, triangular, glabrous, leafy at the base; leaves longer than the culm, keeled and flat, scabrous at the margin; heads of flowers solitary, ovate-globose, glomerate, sometimes in threes or fours; involucre four to seven-leaved, very long; spikes lanceolate, ten to sixteen to twenty-four flowered; scales oblong, acutely mucronate, convex and keeled, three-nerved; achenium oblong, terminated by the persistent style, convex and obtusely angled externally, brownish, one-third shorter than the scale.

——*Water sedge* (జలతుంగ - jalatunga, Tel.). Tel. from (jala, san. water + tunga, tel. cyperus rotundus, linn.). Botanically Cyperus [coray] procerus, vahl., cyperaceæ [vricsham, 155]. Alias Cyperus tenuiflorus. Culm triquetrous, leafy at the base; leaves longer than the culm, keeled, spongy and thickish; umbel compound, many-rayed, rays brachiately branched above, flexuose; spikes spicately arranged, distichous, much spreading, linear, compressed, many-flowered; involucre three-leaved, leaflets scabrous on the margin and keel, one very long; scales ovate, elliptic, rounded at the apex, nine-nerved, keeled and navicular, pale-chestnut; achenium obovate, triangular; a half shorter than the scale.——*Wet land sedge* (ವಶುಮಾನಿಹುಲ್ಲು - vusumánihullu, Can.; తాలితుంగ - tsalitunga, Tel.). Can. from (ose, can. charmed + hullu, can. grass). Tel. from (tsali, tel. cold + tunga, tel. cyperus rotundus, linn.); from growing in moist soil. Botanically Cyperus [coray] compressus, linn., cyperaceæ [vricsham, 155]. Leaves glabrous, flat, longer than the triangular culm, younger ones serrulated on the margin; umbel one to six-rayed, rays three to six spiked at the top, very unequal, one almost undeveloped; involucre three to six-leaved, very long; spikes lanceolate and linear, compressed, twenty-four to thirty-six flowered; scales keeled, acute and mucronate,

many-nerved, green; achenium obovate, triquetrous, one-third the length of the scale.——(2) *Coraiyaur* (கோரையாறு - kóraiyáru, Tam.). From (kórai, tam. reed, cyperus + áru, tam. river). River; Tanjore dist., Munnargoody and Tritrapoondy tals. Branch of Vennaur. Source 2 miles N.W. of Needamungalam; course S.E. running from June to December; navigable below Moottoopett; crossed by three bridges.

CORINGA (కోరంగి - kórangi, *Tel.*). Means small cardamoms. Sanscrit corruption (kurangam), meaning a stag, after the golden stag in ramayanam. Kalingou of Pliny. Allosygne of others.—"*a*" Town, Port, Sea custom superintendent's station; Godavery dist., Cocanada division; pop. 4,517; lat. 16° 48′; long. 82° 16′; from Cocanada S. 9¾ miles; from Coonavaram E.S.E. 82 miles; from Ellore E.N.E. 74 miles; from Inzaram N.N.E. 6¾ miles; from Madras N.N.E. 283 miles; from Narsapore E.N.E. 43 miles; from Rajahmundry E.S.E. 33 miles. South of the estuary of the Coringa river. At the entrance is a bar with 12 or 14 feet of water at spring tides. Within the bar the depth is from 2½ to 4 fathoms. The lighthouse on the mainland, 4¾ miles from Cocanada, warns vessels off the Godavery shoals; white; fixed. 14 miles range; visible from all directions seaward; masonry tower, horizontal alternate bands of black and white. Trig. station; lat. 16° 49′ 09·93″; long. 82° 23′ 07·84″. Early Dutch settlement, and once the greatest seaport and ship-building centre on the coast, but owing to the extension of the delta seaward now of little commercial importance. Being situated on a low site near the coast it has frequently been subjected to inundations by the sea and to the effects of hurricanes and storms. The rising of the sea in May 1787 was so high that vessels were drifted as far inland as Rajahmundry. In 1802 there was a dock [dhony] for the repair of ships of the Royal navy. Still frequented by native craft and ship-building yards are at work in the hamlet of Tullaraiv. Considerable business with Rangoon and Moulmein is still carried on by small vessels.—"*b*" River; Godavery dist., Cocanada division. The branch of the Godavery opening into Coringa bay.

CORJY (ಕೊರ್ಜಿ - korji, *Can.*; ఖోర్జం - khórjam, *Tel.*). Otherwise written Corge.—"*a*" Measure of capacity. 42 moodies = 1 corjy [alavay, 3 c]. Approximate actual value, 1 corjy = 1,764 pucka seers or 44 Indian maunds, or 70 cubic feet, 520 cubic inches. Compare Garce.—"*b*" Madras town cloth measure. A bale. 20 tauns or pieces = 1 corjy [alavay, 1 c].

COROMANDEL (சோழமண்டலம் - shózhamandalam, *Tam.*). From (shózham, tam. the kingdom + mandala, san. region). Land of the cholas. The name occurs on the temple inscription of Tanjore and in an inscription of A.D. 1101 at a temple to Varauhasawmy near Seven pagodas [q.v.], and is still quite current. Cf. Eelamundalam or ceylon, Chera mundalam, Tondaimundalam, &c. The Portuguese first gave the name to the east coast, and since then common with sailors. In San Bartolomeo it appears as Ciola mandala [coast].——*Coromandel ebony* (آبنوسِ دکنی - ábnúsidakhaní, Hind.). See sep. title.——*Coromandel gooseberry* (कर्मरङ्ग - karmaranga, San.; कमरख - kamarakha, Mahr.; कंबल - kamrbala, Conc.; کمرکھ - khamrak, Hind. and Dec.; بلمبنگ منیس - blimbingmanis, Malay; ದಾರೆಹುಳಿ - dárehuli, Can.; ದಾರೆಪುಳಿ - dárepuli, Too.; తమరతము - tamaratamu, Tel.; ചതുരപ്പുളി - chaturappuli, Mal.; தமரத்தை - tamarattai, Tam.). Title from habitat and flavor of fruit. San. from (karma, san. work + ranga, san. desire), making food palatable. Hind. and dec. from sanscrit. Malay from (blimbing, malay, averrhoa bilimbi, linn. + manis, malay, sweet). Can. from (dáre, can. edge + huli, can. tamarind); from angular fruit. Mal. from (chatura, san. square + puli, mal. tamarindus indica, linn.); from angular fruit. Tam. from (tamaram, tam. lac); from yellowish fruit. Mahr. also (karambala). Hind. also (mítkákamaranga), sweet carambola. Tel. also (karamonga). Tam. also (shagadam). Title otherwise Caramba, Carambola, Carambola apple, Country gooseberry, Curmrung, Sweet blimbing. Botanically Averrhoa [lavaly] carambola, linn., geraniaceæ [vricsham, 31]. Specific name from sanscrit. Tree, 15–20 feet; leaves slightly sensitive, alternate, unequally pinnated; leaflets ovate, acuminated, two to five pair on small petioles; calyx glabrous; stamens five; flowers disposed in short racemes arising from smaller branches on the trunk; corolla five-petalled, campanulate; petals yellowish purple; fruit acutely five-angled, with a smooth yellowish rind; seeds with aril. Fruit rather larger than hen's egg; previous to becoming quite ripe possesses a flavor somewhat between that of sorrel and a green gooseberry; when perfectly ripe, semi-transparent and of a fine rich amber, contains a large quantity of quadroxalate of potash, has a strong and agreeable scent as nearly as possible like that of quince [bedauna], as well as a peculiar flavor. Leaves, root, and fruit used as cooling medicine. Fruit eaten, preserved and pickled; leaves are a good substitute for sorrel [sour auray]. Unripe fruit astringent and used as a mordant [cauram]; juice used in removing iron moulds from linen; leaves are good fodder. Wood light red, hard, close-grained. There is a small variety having fruit smaller by about half; when ripe of a deep-green color and not nearly so handsome a fruit, without the acidity of the ordinary kind, but also entirely without its fine flavor. No other common species here.——*Coromandel red wood* (ناتکا چندن - nátkáchandan, Hind.). Same as Soymida.

COROMANDEL (கருமணல் - karumanal, *Tam.*). Title Dutch or Anglo-indian corruption by analogy with the real Coromandel; for which see above. Tam. from (karu, tam. black + manal, tam. sand). Town; Chingleput dist., Ponnairy tal.; pop. 4,639; acres 9,513; lat. 13° 27′; long. 80° 21′; from Ponnairy N.E. 11 miles; from Sydapett N. 30 miles. Lies opposite Poolicat. One of oldest Dutch settlements on East coast, and mentioned as early as 1499 by Italian travellers. Some half-deserted European bungalows still remain. The inhabitants at present are fishermen. There is also a thriving ship-building [dhony] yard for native craft.

COROO (కోరు - kóru, *Tel.*). Share [coor]. Coroo graumam is a Ryotwar [q.v.] or Government village, as one in which the circar [q.v.] shares; as opposed to inam [q.v.], shrotriem [q.v.], and zemindarry [q.v.] villages. Sangoroo, from (sagamu, tel. half) is a half share.

CORROO (కుర్రు - kurru, *Tel.*). From (kúru, tel. to collect). Small hamlet. Suffix in place names, as Keshana corroo meaning keshanna's hamlet.

CORUNDUM (कुरुविन्द - kuruvinda, *San.*; کرند - kurand, *Hind.*; కురివిందము - kurivindamu, *Tel.*; കുരുവിന്ദം - kuruvindam, *Mal.*; குருந்தம் - kurundam, *Tam.*). Title from hindostany. Also called Adamantine spar. A sort of sapphire [neelam], as including the grey and darker-colored opaque crystallized specimens. Greenish color. Pure alumina, crystallizing in the hexagonal system. Sapphire and ruby [laul] are forms of corundum, and emery is a granular variety, mixed with magnetite or hæmatite. This stone is, with the exception of the diamond [vajram], the hardest substance known [coorvinda cull, ratnam]. See vol. II, 38.

CORUNGA (கழங்குக்காய் - kazhangukkáy, *Tam.*). Tam. from (kazhagu, tam. game + káy, tam. fruit); from use of nut as marbles by boys. Same as Bonduc nut.

COSHAM (कोश - kósha, *San.*). From (kush, san. to embrace). A registry of village lands, a dictionary [acarauthy, nigantoo]. Also sheath of a plant [vricsham], seed-vessel, cocoon [peelah]. Also one of the five sheaths [puncha cosham] to the soul [autmam] in philosophy [vedauntam].

COSS (क्रोश - krósha, *San.*). From (krush, san. to cry out). Indian league. 2,000 baums = 1 coss; 4 coss = 1 gow [alavay, 1 e]. Approximate actual value, 1 coss = 2¼ miles. Cutcha coss is half of pucka. In Mysore the Sultauny coss is about 4 miles. Same as San. crosham, Hind. croe, Can. hardaury, Tel. pargoo. See vol. I, 609; II, 505.

COSTUM (कुष्ठ - kusht'ha, *San.*; قسط - kust, *Ar.*; کوست - kost, *Pers.*; کوٹ - kút, *Hind.*; پچک - pachak, *Dec.*; గోష్టము - góshtamu, *Tel.*; கோட்டம் - kóttam, *Tam.*). Title from sanscrit. San. from (ku, san. bad + st'ha, san. spot). Ar., &c., from sanscrit. San. also (kósht'ha); (káshmíra), meaning cashmere plant [arabian costum]. Hind. also (kustitalkh), meaning bitter costus. Tel. also (changalikóshtamu). Greek κόστος. There was κόστος ἀραβικὸς, white, best of all; κόστος ἰνδικὸς, dark; and κόστος συριακὸς, pale yellow. Title otherwise Costus [eagle wood], Coost. Botanically Saussurea lappa, clarke, compositæ [vricsham, 74]. Alias Aplotaxis lappa; Aucklandia costus. The root is imported; has a pungent, aromatic taste, with odour resembling orris root, which natives call by same name. Has been used in hindoo medicine from earliest ages. Is narcotic when smoked and aromatic and stimulant internally. Is a valuable perfume and is a preservative to woollen cloths; exported to china, where reduced to powder and burnt in temples. Two varieties of this root are recognised according to their taste as sweet and bitter. Another species is Candicans. The present genus is distinct from Arabian costum [q.v.].

COT (கட்டில் - kattil, *Tam.*). From (kattu, tam. to bind). A bedstead [cuttil]. It is universal as a sea-term; used in the south; answers to north indian charpoy [q.v.].

COTAUR (కొట్టారు - kot'háru, *Tel.*; கொட்டாய் - kottáy, *Tam.*). From (kódu, tam. to bend); from slope. A pent-house for cattle [cottye, pandaul]. A depôt for the sale of salt [ooppoo].

COTCHOO (കൊച്ചു - koççu, *Mal.*). Small [coonch, coonjam].——*Cotchan* (കൊച്ചൻ - koççan, Mal.). Lad [coonjan].——*Cotchilitty* (दद्रुमारि - dadrumári, San.; കൊച്ചിലച്ചിപ്പുല്ല് - koççilaççippullu, Mal.; கொச்சிலித்திப்புல் - koççilittippul, Tam.). Title from malayalam. San. from (dadru, san. ringworm + mári, san. killer). Mal. from (koççu, mal. small + ila, mal. tender + pullu, mal. grass). Tam. from malayalam. Title otherwise Dauby dooby, Ringworm killer [chakondah]. Botanically Xyris indica, linn., xyridaceæ [vricsham, 140]. Annual, 1 foot; leaves radical, ensiform, on one edge slit into a sheath for the scape, pointed, smooth; head globular; scales roundish; scape naked, round, striated, the length of the leaves, each supporting a round, flower-bearing head; calyx three-leaved; petals three, unguiculate, with oval crenate borders, just rising

above the scales; flowers bright yellow. Considered of great medicinal virtue on the malabar coast [q.v.]; juice of leaves mixed with vinegar [caudy] applied externally in itch; leaves and root boiled in oil applied in leprosy [cooshtam]. Gives fibre. There are other species:—anceps, lappacea, nilagiriensis, oryzetorum, pauciflora, walkeri.

COTE (कोट - kóta, *San.*; کوٹ - kot, *Hind.*; కోట - kóta, *Tel.*). From (kut, san. to curve). Fort. Suffix in place names; as Dhauracote, meaning stream + fort; Srungavarpoocote, meaning peak + town + fort [kota].——*Cotappa condah* (కోటప్పకొండ - kótappakonda, Tel.). From (kótappa, tel. shiva + konda, tel. hill). Hill of Coteshwaran, a name of Shiva. Sanscrit name (kotéshvaragiri), meaning shiva, hill-lord + mountain. Mountain, Place of pilgrimage; Kistna dist., Narsarowpett tal. The shrine upon the hill is modern. It is 600 feet above the plain, and is approached by a winding flight of stone steps. Festival at new moon [amavausyay] in February, attended by about 60,000 persons, at which there is considerable trade in timber. Trig. station in lat. 16° 09′ 09·73″; long. 80° 04′ 47·49″; height 1,588 feet; from Narsarowpett S. 6 miles.——*Cotepaud* (కోటపాడు - kótapádu, Tel.). From (above + pádu, tel. village). Village, Head-quarters of Jeypore maharajah's ameen [q.v.]; Vizagapatam dist., Jeypore division; pop. 3,257; lat. 19° 09′; long. 82° 22′; from Jeypore N.W. 27 miles; from Vizagapatam N.W. 116 miles. Formerly head-quarters of a Deputy tahsildar. Eighteen old mud forts. Small temple on an island in a lake, temple on the edge of the lake, a stone image of a goddess, and a Mahomedan tomb. The lake is semi-circular in shape and is a mile long and about two furlongs broad. Dug in the name of Damayanty, wife of Nalan, after whom it is called Damayanty saras. The town is the centre of a vast tract of wet paddy [q.v.] cultivation.——*Cotiote* (കോട്ടയത്ത് - kóttayatt, Mal.). Adjectival form of Cottayam.——*Cotta* (കോട്ട - kótta, Mal.). Means fort. River; Malabar dist., Cooroombranaud tal.; lat. 11° 34′ N.; long. 75° 39′ E. From a fort commanding entrance to the sea. Formerly haunt of pirates. Drains heavy mass of virgin forest on W. slopes of Wynaud ghauts, and for its length discharges more than usual quantity of water. Navigable at all seasons for boats for 20 miles to Coottiyaudy. Length about 46 miles. The water communication on this river is linked on the north with Badagara by the Badagara canal, and on the south by the Payoly canal, with the extensive natural backwater [cauyal] communication of the Agalapoya river.——*Cottah* (कोट - kóta, San.; کوٹا - kotá, Hind.; కోట - kóta, Tel.; കോട്ട - kótta, Mal.). Fort. Suffix in place names; as Poodoocottah, meaning new + fort [cottay, kota].——*Cottaur* (കോട്ടാർ - kóttár, Mal.). From (kótta, mal. fort + áru, mal. river). Greek κοττιάρα μητρόπολις. Town, Head-quarters of Sub-magistrate and District moonsif; Travancore state, Pudmanaubhapooram division, Agasteeshwaram tal.; pop. 19,968; lat. 8° 10′ N.; long. 77° 29′ E.; from Sooshindram N.W. 2 miles; from Alleppey S.E. 116 miles; from Cottayam S.S.E. 115 miles; from Madras S.S.W. 387 miles; from Nagarcoil S. 1¼ miles; from Paravore S.S.E. 157 miles; from Quilon S.E. 75 miles; from Trivandrum E.S.E. 39 miles; from the sea N. 5¼ miles. Large Bramin village known as Vaudeshwaram with old Shiva temple. Mentioned by Ptolemy as in the country of the Ἄϊοι; also mentioned, as παραλία in the Periplus, identical in part with South travancore. Cottora of Pliny and Cottara of the Peutinger tables; not to be confounded with Cottonara [cadatnaud]. The greatest commercial town in South travancore. Ancient pagoda [q.v.] with inscription of Paraucrama paundyan. St. Francis Xavier's church in heart of town where is a festival every year. Weaving colony. Situated on main road to Tinnevelly through Aramboly pass [ghaut].——*Cottauram* (കൊട്ടാരം - kottáram, Mal.). From (above + agára, san. house). Palace; branch of a covilagam [q.v.] of a rajah's family in Malabar.——*Cottay* (कोट - kóta, San.; கோட்டை - kóttai, Tam.). Fort. Suffix in place names as Armoogamcottay, meaning proper name + fort [cote, cottah, kota]. The Tamul Cooral has the following:—இருபுனலும் வாய்ந்த மலையும் வருபுனலும் வல்லரணும் நாட்டிற் குறுப்பு—"The constituents of a kingdom are the two waters "[mazhay, neer], from above and below, well situated hills and "an indestructible fort [kila]."——*Cottayam* (കോട്ടയം - kóttayam, Mal.). See sep. title.——*Cottay peak* (கோட்டை - kóttai, Tam.). Means fort. Mountain; Madura and Tinnevelly dists., Travancore state, Periyacoolam tal.; Trig. station; lat. 9° 31′ 14·30″; long. 77° 26′ 41·40″; height 6,617 feet; from Madura S.W. 56 miles; from Periyacoolam S.S.W. 42 miles. Peak of Western ghauts [q.v.] at junction of Madura and Tinnevelly boundaries.——*Cotwaul* (کوتوال - kotwál, Hind.). From (above + wál, hind. lord). Chief officer of police. Under native governments the cotwaul exercised magisterial power [inam, killadar]. Cotwaul chauvady was the cotwaul's court.

COTT (கொத்து - kottu, *Tam.*). Cluster. Suffix in place names as Vadacott, meaning north cluster. Also prefix in plant names as Cottavaray, meaning cluster bean [guar]. Cottvaunam is freckled or mackerel sky.

COTTA (కొత్త - kotta, *Tel.*). New.——*Cottapatam* (కొత్తపట్నము - kottapatnamu, Tel. kottapatam *). From (above + pattana, san. town). Port, Head-quarters of Superintendent of Customs and Sub-magistrate and Sub-registrar; Nellore dist., Ongole tal.; pop. 5,653; acres 16,603; lat. 15° 27′; long. 80° 12′; from Eetamookkala N.E. 6¼ miles; from Madras N. 159½ miles; from Nellore N. 69½ miles; from Ongole E.S.E. 8¾ miles; from Paudarty S.S.W. 1¾ miles. Originally built as addition to village of Alloor. Northernmost and largest port in the district. Carries on an extensive trade by sea in grain, oil-seeds [yennay], and other produce of the Cumbum and Doopaud tracts. The sea-borne trade is however to a large extent diverted to the Buckingham canal [q.v.] which is 1½ miles from the town. Population chiefly Comaties. Salt [ooppoo] manufactory.——*Cottapettah* (కొత్తపేట - kottapéta, Tel.). From (above + péta, tel. suburb).—"*a*" Deputy tahsildarry, Godavery district, Pay Rs. 70.—"*b*" Village, Deputy tahsildar's station; Godavery dist., Amalaupooram tal.; lat. 16° 43′; long. 81° 56′; from Amalaupooram N.W. 12 miles; from Cocanada S.W. 28 miles; from Coonavaram S.S.E. 71 miles; from Ellore E. 51 miles; from Madras N.N.E. 267 miles; from Narsapore N.E. 20 miles; from Rajahmundry S.S.E. 21 miles; from the sea N. 22 miles. Hamlet of Palivela.

COTTAH (கோட்டை - kóttai, *Tam.*).—"*a*" Measure of capacity. 21 mercauls = 1 cottah [alavay, 3 a]. Approximate actual value, 1 cottah = 7 cubic feet. Tinnevelly. Varies with mercaul. Compare Calam.—"*b*" Superficial measure. 21 mercauls = 1 cottah [alavay, 2 a]. Approximate actual value, 1 cottah = 1·62 acres. Same as dhaunyacottay and vithaicottay. Compare Tel. garce or veesam of Vizagapatam, Tam. cawny. See vol. I, 609; II, 519.

COTTAM (కొట్టము - kottamu, *Tel.*; கோட்டம் - kóttam, *Tam.*). From (kódu, tam. to bend). A cow-house. Division of country in early Dravidian history. Applied to a Coorumba fort in Coorumba bhoomy [q.v.] in ancient tondaimundalam province. See vol. I (141). Suffix in place names as Manavore cottam. ——*Cottacaraiyaur* (கொட்டக்கரையாறு - kottakkaraiyáru, Tam.). From (kottam, tam. cow-stall + karai, tam. bank + áru, tam. river). River; Madura dist., Ramnaud zemindarry. Wide and rapid stream formed by junction of two rivulets that enter district on west near Cokkarney. Flows into Rajasingamungalam lake, the superfluous waters of which are conveyed by a channel [q.v.] issuing from a large calingula [q.v.] on the northern bank. This channel runs in an east-south-easterly course five miles, crosses the high road by Armoogam cottah, and flows south-east nearly two miles; thence it pursues an east-south-east course towards Cunnanyendal, runs south-east from that village about a mile, separates into two branches on the west of the high road, and communicates with the sea by two mouths about a mile distant from each other.——*Cottagam* (கோட்டகம் - kóttagam, Tam.). Tank. Suffix in place names; as Pannaycauran cottagam, meaning husbandman's tank.

COTTAMULLY (கொத்தமல்லி - kottamalli, *Tam.*). Corruption from (kustumburu, san. the plant). Same as Cassibor.

COTTAUN (आकाशवल्ली - ákáshavallí, *San.*; आकाशवेल - ákáshavéla, *Mahr.*; کتان کاپر - katánkáper, *Hind.*; کتانکاجہار - katánkájhár, *Dec.*; رمبوت پوتری - rambutputri, *Malay*; ಬೆಳುಬಳ್ಳಿ - béluballi, *Can.*; పాచితీగ - páchitíga, *Tel.*; ആകാശവള്ളി - ákáshavalli, *Mal.*; கொத்தான் - kottán, *Tam.*). Title from tamul. San. from (ákásha, san. sky + valli, san. creeper); from parasitic growth. Malay from (rambut, malay, hair + putri, malay, princess). Can. from (bélu, can. a kind of insect + balli, can. creeper). Tel. from (páchi, tel. moss + tíga, tel. creeper). Tam. from (kottam, tam victory); from curing virtues. Mahr. also (amaravéla), meaning sky + creeper. Hind. also (ákásbel), meaning sky-creeper. Tel. also (antaravalli), meaning growing in mid air + creeper; (núlutíga), meaning thread + creeper; (sítammapógunúlu), meaning seetay, the goddess + mother + yarn; cf. Seeta's knot. Tam. also (erumaikkottán), meaning buffalo + the plant; (indiravalli), meaning indran + creeper, air creeper; (nandai), meaning to dissolve; medicinal. Title otherwise Air plant, Air-creeper, Leafless creeper, Princess's hair, Moss creeper, Seeta's yarn, Thread creeper. Botanically Cassytha filiformis, linn., lauraceæ [vricsham, 111]. Alias Caladium cochin-chinense; Cassytha aphylla; Volutella aphylla. Parasitic leafless thread-like plant found twisting round branches of trees; spikes lateral, ascending; calyx three-leaved; segments very small, round; petals three, larger than the clayx; flowers small, white, rather remote; bracteas three-fold, embracing the fructification; fruit a drupe with a one-seeded nut, round. The juice mixed with sugar [q.v.] is applied to inflamed eyes; whole plant pulverised and mixed with dry ginger [q.v.] and butter is used in the cleaning of inveterate ulcers. Plant put as a seasoning into butter-milk [mor], especially by bramins in south. Juice mixed with gingelly [q.v.] oil is employed in strengthening roots of hair. For moodacottaun or palsy curer see Oolinja.

COTTAY (बीज - bíja, *San.*; گٹھلی - guthlí, *Hind.*; ಬೀಜ - bíja, *Can.*; విత్తు - vittu, *Tel.*; അണ്ടി - anti, *Mal.*; கொட்டை -

kottai, *Tam.*). Nut, kernel, or large seed [pazham]; one of the Dravidian terms for plant products added to the word root [vricsham].——(1) The following are two key-lists of the edible nuts of s. india; further information must be traced in the glossary paragraphs through the small-type cross-references at end of this volume; see also vricsham, 7, for the method of expressing the products, &c., of plants in the dravidian languges.—"*a*" Aleurites triloba, lumbang nut; Anacardium occidentale, cashew; Arachis hypogæa, ground nut; Artocarpus incisa, ratadel; Artocarpus integrifolia, bread-fruit; Avicennia officinalis, ooppata mangrove; Bauhinia racemosa, small-flowered mountain ebony; Buchanania latifolia, chironjee; Cocos nucifera, cocoanut; Coffea arabica, coffee; Euryale ferox, makhanah; Juglans regia, walnut; Nelumbium speciosum, sacred lotus; Nymphæa lotus, red indian water-lily; Nymphæa stellata, blue indian water-lily; Pistacia vera, pistachio nut; Prunus amygdalus, almond; Semecarpus anacardium, marking-nut tree; Sterculia fœtida, bastard poon; Sterculia urens, false tragacanth; Terminalia belerica, belleric myrobalan; Terminalia catappa, country almond; Terminalia chebula, chebulic myrobalan; Trapa bispinosa, water caltrops.—"*b*" Almond, prunus; Bread-fruit, artocarpus; Caltrops, trapa; Cashew, anacardium; Chironjee, buchanania; Cocoanut, cocos; Coffee, coffea; Country almond, terminalia; False tragacanth, sterculia; Ground nut, arachis; Lotus, nelumbium; Lumbang nut, aleurites; Makhanah, euryale; Mangrove, avicennia; Marking nut, semecarpus; Mountain ebony, bauhinia; Myrobalan, terminalia; Pistachio nut, pistacia; Poon, sterculia; Ratadel, artocarpus; Walnut, juglans; Water-lily, nymphæa.——(2) Compare also the following non-edible nuts:—Adhatoda vasica, malabar nut; Areca catechu, betel nut; Cæsalpinia bonduc, bezoar nut; Cæsalpinia bonducella, corunga nut; Calophyllum wightianum, keena nut; Carum bulbocastanum, great earth nut; Corypha umbraculifera, talipot nut; Entada scandens, lady-nut; Jatropha curcas, physic nut; Moringa pterygosperma, bennut; Randia dumetorum, emetic nut; Sapindus trifoliatus, soap nut; Strychnos nux vomica, vomit-nut; Strychnos pattatorum, water filter nut; Terminalia citrina, gall nut.——(3) For oil nuts and seeds see Yennay.

COTTAYAM (കോട്ടയം - kóttayam, *Mal.*). From (kótta, mal. fort + akam, mal. within) [cote].——(1) The northern division of Travancore, divided into eleven talooks. Has more than a third of population of whole state, some 900,000.——(2) Talook; Travancore state, Cottayam division; pop. 64,958. Greatest length, N. to S. 10 miles. Greatest breadth, E. to W. 20 miles. Sub-divided into seven pravertics and containing eighty-one caras or villages. Bounded N. by Yaittoomanore and Meenachel talooks, E. by Chungacherry and Meenachel talooks, S. by Chungacherry and Ambalapoya talooks, and W. by Vembanaud lake and Shertala talook. In some places hilly, in others low with paddy-fields. Soil is productive. The principal industries are coppray [q.v.], coir [q.v.], pepper [q.v.], dry ginger [q.v.], and molasses [jaggery]. Irrigated by Meenachel river. ——(3) Town, Head-quarters of Division and Tahsildar; Travancore state, Cottayam division, Cottayam talook; pop. 14,607; lat. 9° 36′; long. 76° 33′; from Alleppey E.N.E. 14 miles; from Bombay S.S.E. 680 miles; from Cochin S.E. 31 miles; from Madras S.W. 350 miles; from Nagarcoil N.W. 113 miles; from Paravoro S.S.E. 43 miles; from Quilon N. 47 miles; from Trivandrum N.N.W. 80 miles; from the sea E. 14 miles. On Meenachel river in the middle of fine scenery, about eight miles to the interior of the eastern bank of the Vembanaud backwater [cauyal], along which it extends for some distance. It crowns the bank of a large navigable stream and is on the main road to Peermaid. Former head-quarters of the Cottayam rajahs. Almost wholly inhabited by Syrian christians, who form a thriving community. Head-quarters of the Church mission society since 1816. Cross with Pahlava [q.v.] inscription in the old church, tablet with Pahlava inscriptions, and Syrian copper plates. Manufacture of molasses. Lately become of importance, as all trade from Madura country by Peermaid pass over ghauts [q.v.] is carried here, and thence by boats through backwaters to Alleppey. There are celebrated native physicians here.——(4) Talook, Malabar district, Tahsildar's pay Rs. 175. Area 462 square miles. Comprises the old talooks of Cottayam and Tellicherry. North centre coast of district. Bounded north by Chiracal, east by Coorg and Wynaud, south by Wynaud and Cooroombranaud, and west by the sea. The country, 8 miles in a parallel with the coast, is composed of open ridges between the cultivated valleys. A few eminences are wooded. There is very little flat land beyond a belt along the coast about Tellicherry and cultivated valleys. Whole eastern portion is one dense wood with a few cultivated spots to the foot of the ghauts [q.v.]. In island of Dharmapatam only flat ground is that under wet cultivation and marsh, rest is undulating ground falling in cliffs towards the sea. Opposite is a rocky island, called Grove island. About half a mile west of Tellicherry is a ridge of rocks which affords shelter for craft. Cangote forest belongs to Government. The soil in some parts towards the coast is brown and sandy; on the rising grounds in interior it is rich and gravelly; the cultivated valleys a brown loam; towards mountains and in forests rich and black; productions are rice [paddy] of different kinds, cocoanut [q.v], betel [q.v.], areca-nut [q.v.], cardamom [q.v.], pepper [q.v.] in great quantities and dry grains [q.v.] of sorts. Cottayam is celebrated for its pepper crops. Iron [auhan] is found but not worked. Cloths of inferior sorts are made. In Nittore, suburb of Tellicherry, weaving is carried on by Basel mission. Arrack [q.v.], jaggery [q.v.], oil [yennay] from coppray [q.v.] and other nuts are manufactured. Copper [taumram] vessels are manufactured at Tellicherry and at Mattanore in Pychy amshom. Eighty square miles under cultivation. Places of archæological interest:—Cannavam, Cathirore, Coottooparamba, Cottayam, Cullye, Dharmapatam, Keelore, Manattana, Meilanjenm, Nittore, Paunore, Peringalam, Pinaroy, Poottore, Shivapooram, Tellicherry, Tirvangaud, Tricaniyore and Triprangottore. Principal trig. station:—Dharmapatam. The leading places, &c., in the talook are the following.——*Bramhagherry* (ബ്രഹ്മഗിരി - brahmagiri, Mal.). See sep. title.——*Candamcoonn* (കണ്ടകുന്ന് - kantamkunnu, Mal.). From (kantam, mal. field + kunnu, mal. hill). Village; pop. 10,641; lat. 11° 52′; long. 75° 38′; from Tellicherry N.E. 10 miles; from Calicut N.N.W. 44 miles; from the sea E. 16 miles.——*Cangote* (കണ്ണവം - kannavam, Mal.). See sep. title.——*Cathirore* (കതിരൂർ - katirúr, Mal.). From (katir, mal. spike of corn + úr, mal. village). Amshom, Village; pop. 9,933; lat. 11° 47′ N.; long. 75° 35′ E.; from Calicut N.N.W. 40 miles; from Tellicherry N.E. 4 miles; from the sea E. 4¾ miles. Head-quarters of the British troops during the Cotiote rebellion, 1796–1805. Two rock-cut caves. Formerly seat of Tahsildar and subsequently of District moonsif. ——*Chauvacherry* (ചാവശ്ശേരി - chávashshéri, Mal. chávacheri *). From (chával, mal. cock + shéri, mal. village). Amshom, Village; pop. 4,150; lat. 11° 57′; long. 75° 39′; from Calicut N.N.W. 49 miles; from Tellicherry N.E. 16 miles; from the sea E. 20 miles. Moplah bazaar [q.v.] and palace to the north. Culloor temple and Paulote mosque [musjid].——*Codoly* (കൊടുവള്ളി - kotuvalli, Mal.). From (kotu, mal. steep + valli, mal. village); from a fort of that name at the mouth of the river. Otherwise Tellicherry river. River. Rises on the western slopes of the Wynaud ghaut.——*Coottooparamba* (കൂത്തുപറമ്പ - kúttuparamba, Mal.). See sep. title.——*Cotiote* (കോട്ടയത്ത് - kóttayatt, Mal.). See sep. title.——*Cottayam* (കോട്ടയം - kóttayam, Mal.). See below.——*Cottiyore* (കൊട്ടിയൂർ - kottiyúr, Mal.). From (kóttam, mal. temple + úr, mal. village). Village, Place of pilgrimage; lat. 11° 52′; long. 75° 54′; from Calicut N. 42 miles; from Tellicherry E.N.E. 26 miles; from the sea E. 34 miles. Annual festival in April-May. Shiva temple called Trichercoonn. On road from Manattana to Wynaud.——*Cullye* (കല്ലായി - kalláyi, Mal.). From (kal, mal. stone + azhi, mal. river mouth). Mal. also (karinnóttukalláyi), meaning cullye of caringode, to distinguish it from calicut cullye. Amshom, Village, Port; pop. 6,666; lat. 11° 43′; long. 75° 34′; from Bombay S.S.E. 510 miles; from Calicut N.N.W. 34 miles; from Mahé N.W. ¾ mile; from Talye S.E. 2½ miles; from Tellicherry S.E. 4 miles. Inside the bar of the Mahé river, which can be entered by small sized country craft. Contains two caves cut out of laterite [q.v.]. Also Parimatam temple and Cullye mosque. There is little coasting trade. A land customs station of the French settlement frontier.——*Dharmapatam* (ധർമ്മടം - dharmmatam, Mal.). See sep. title.——*Iritty* (ഇരിട്ടി - iritti *, Mal.). Meaning dark from the shade of trees. River. Rises in Perambaudy ghaut in Coorg. Is crossed by a large iron girder bridge.——*Irvenaud* (ഇരുവൈനാട് - iruvainátu, Mal.). From (iru, mal. two + vazhi, mal. line + nátu, mal. country); this tract of land was formerly governed by the numbiyaur, but belonged to the colattiry rajahs and hence the name. Village.——*Manattana* (മണത്തണ - manattana, Mal.). From (mana, mal. nambúri house + tanal, mal. shade). Amshom; pop. 4,190; lat. 11° 55′; long. 75° 48′; from Calicut N. 45 miles; from Tellicherry E.N.E. 21 miles; from the sea E. 28 miles. Twenty-eight miles from Tellicherry and 8 from Cangote; once a military post. Redoubt on the summit of a low hill.——*Meilanjenm* (മൈലാഞ്ജന്മം - mailánjanmam, Mal.). From (mailán, mal. a family of that name in malabar + janmam, mal. a freehold). Amshom, Village; pop. 3,154; lat. 11° 44′; long. 75° 34′; from Calicut N.N.W. 37 miles; from Cottayam S.S.W. 5¾ miles; from Tellicherry E. 2½ miles; from the sea E. 1½ miles. Two rock-cut sepulchral caves. Part is included in the Tellicherry municipality.——*Meroompoya* (മെരുമ്പായി - merúmpáyi, Mal.). From (meruvam, mal. game + páyu, mal. to run). Name in the first part of its course. Otherwise Anjarcundy and Dharmapatam, lower down, called after those villages. River. Rises in Periya ghaut and after a course of 40 miles divides into two branches forming the island of Dharmapatam near Tellicherry.——*Paunore* (പാനൂർ - pánúr, Mal.). From (pána, mal. water pot + úr, mal. village). Amshom, Village; pop. 9,374; lat. 11° 46′; long. 75° 38′; from Calicut N.N.W. 37 miles; from Tellicherry E. 6½ miles; from the sea E. 7 miles. Seven miles from Tellicherry, formerly seat of District moonsif; populous Moplah village; ruins of an old fort. Sub-registrar's station.——*Periya peak* (പേരിയശിഖരം - périyashikharam, Mal.). From (periya, mal. great + shikhara, san. peak). Mountain. Pass leading into Cottayam talook; wheeled traffic.——*Pychy* (പഴശ്ശി - pazhashshi,

Mal.). See sep. title.——*Smuggler's pass* (ഗുഡ്ഡച്ചുരം - gúd-hachuram, Mal.). See sep. title.——*Talye* (തലായി - taláyi, Mal.). From (tala, mal. head + azhi, mal. river mouth). Village, Port; from Tellicherry S.E. 1½ miles. Small port on the open coast.——*Tellicherry* (തലശ്ശേരി - talashshéri, Mal.). See sep. title.——*Yelara* (ഏഴറ - ézhara, Mal.). From (ézhu, mal. seven + ara, mal. store room). Village, Port; also called Agaram. At the mouth of a small stream, the bar of which cannot be crossed even by small craft. The English factors at Tellicherry had a warehouse here for collecting pepper [q.v.].——**(5)** Town; Malabar dist., Cottayam tal.; pop. 7,227; lat. 11° 49′; long. 75° 35′; from Calicut N.N.W. 42 miles; from Cannanore E. 12 miles; from Tellicherry N.E. 6¼ miles; from the sea 8¼ miles. Contains palaces of Cottayam rajahs; temple known as Trikyecoonn. The rebel Pychy rajah belonged to one of the branches of the Cottayam family. There are three mosques, called Chervancherry musjid, Cotiote jumma musjid, Moothi-yanga jumma musjid [q.v.].

COTTON (قطن - kutn, *Ar.*). Wool or down surrounding seeds of various plants.——*American cotton* (قطن امریکہ - kutniam-ríkah, Hind.; சீமைப்பருத்தி - shímaipparutti, Tam.). Tam. means foreign + cotton. Title otherwise Barbadoes cotton, Bourbon cotton, Egyptian cotton, Foreign cotton, Georgian cotton, Long-stapled cotton, Mexican cotton, New orleans cotton, Sea island cotton, West indian cotton. Botanically Gossypium [carpausy] barbadense, linn., malvaceæ [vricsham, 25]. Alias Gossypium javanicum, nigrum, racemosum. A glabrous annual, stem erect, much branched; leaves, rotund ovate, sub-cordate, less than one-third cut into three to five lobes, or only angled, the upper ones entire; lobes ovate to lanceolate, oblong, acute, sinus almost rounded; inflorescence solitary flowered, extra axillary; bracteoles broadly ovate, cordate, not united together, at the base deeply laciniated; flowers yellow, often almost white, rarely fully expanding; capsule ovate-conic, acute, three to four locular, six to nine-seeded; seeds black, glabrous below the floss. Long fine easily separable cotton; fruits the whole year; uses precisely the same as herbaceum.——*Bengal cotton* (قطن بنگالہ - kutnibangálah, Hind.). Botanically Gossypium [carpausy] neglectum, tod., malvaceæ [vricsham, 25]. A large bush, chiefly grown as a field crop, and sometimes seen not more than 18 inches high; leaves, three, five, seven-lobed, but extra tooth in sinus less distinct and lobes more linear and simply acute, rarely bristle-tipped; densely coated with long spreading hairs, and, if hybridised with herbaceum, var. wightianum [indian cotton], having stellate hairs as well; stipules broad, linear; infloresence on short lateral branches, two to four-flowered; flowers yellow with purple centre or yellow with purple tinge; bracteoles very large with greatly elongate lateral ears but in shape above ovate acute, toothed; ovary pointed, boll of cotton sometimes elongating from the capsule so as to resemble a kidney-cotton; seed with green velvet below the floss. Constituting to a large extent the so-called Bengals of commerce. For hybrids of this species, see the remarks under Indian cotton. May itself be only a hybrid between arboreum [tree cotton] and herbaceum [indian cotton]. Another sub-arboreous species is Peruvian cotton [q.v.].——*Flowering cotton* (பூப்பருத்தி - púpparutti, Tam.). From similar flowers. Same as Portia.——*French cotton* (قطن فرانسیس - kutnifránsís, Hind.). Cotton in fruit of Calotropis gigantea [yercum].——*Golden silk cotton* (درخت کتیرۂ ہندی - darakhtikatírahihindí, Pers.; پیلی کپاس - pílíkapás, Hind.; پیلی کپاس کا جہاڑ - pílíkapáskájhár, Dec.; ಅರಸಿನಬೂರಗ - arasinabúraga, Can.; కొండగోగు - kondagógu, Tel.; କଣ୍ଟୋପଲାଶ - kontópalás, Oor.; ശീമപ്പഞ്ഞിമരം - shímap-paññimaram, Mal.; ඇලඉඹුල් - elaimbul, Singh.; கோங்கு - kóngu, Tam.). Title from color of flowers. Pers. from (darakht, pers. tree + katírah, pers. tragacanth + hindí, pers. indian), from use of gum as substitute. Hind, from (pílí, hind. yellow + kapás, hind, gossypium herbaceum, linn.), from flowers. Can. from (arasina, can, turmeric + búraga, can. bombax malabaricum, dec.). Tel. from (konda, tel. hill + gógu, tel. hibiscus cannabinus, linn.). Mal. from (shíma, mal. foreign + paññi, mal. cotton + maram, mal. tree). Singh. from (ela, singh. white + imbul, singh. eriodendron anfractuosum, dec.). Tam. means large tree [red-cotton tree]. Hind. also (katírá), meaning tragacanth [false kateerah, kateerah]; (hindíkatíra), meaning indian tragacanth. Tel. also (kong). Tam. also (kóngilavu), meaning the tree + the silk cotton, bombax malabaricum, dec.; (tanakku) [odul tree, tanakk]. Title otherwise False tragacanth tree, Hill hemp, Kateerah gum tree [velvail], Leaf-bellows tree, Yellow-flowered cotton. Botanically Cochlospermum gossypium, d.c., bixineæ [vricsham, 14]. Alias Bombax gossypium. Tree, 50 feet; leaves palmately five-lobed, lobes acuminated, quite entire, upper-side becoming glabrous; under tomentose; sepals five, oval-oblong, unequal, at length reflexed, the two exterior ones smaller; petals five emarginate, unequal-sided; capsules shortly obovate; seeds numerous, somewhat reniform; flowers large, yellow, panicled; peduncles somewhat joined at the base. Flowers appear in february or march when destitute of leaves; flowers are followed by a five-lobed capsular fruit, as large as a goose egg, which separates into two layers, showing a whitish membranous endocarp and numerous seeds the size of a small pea [calauyam] enclosed in long cottony fibres. Clear white gummy substance exudes from every part of the tree if broken, called gum kateerah [q.v.]; this is one of the country or false tragacanths; it is generally in large vermicular pieces, transversely fissured, and showing a tendency to split up into flat scales sometimes in large flat pieces like tragacanth; when moistened it swells up into a bulky transparent jelly, which may be diffused in a large quantity of water, but is only very sparingly soluble; its solution in water is neutral; the portion insoluble in water yields with alkalies [cauram] a thick mucilage of a pinkish color, which is not precipitated by acids [tezaub]; it has three varieties, white, red and black; black the worst; the red or intermediate employed for medicinal purposes. Gum kateerah is used as a demulcent in coughs. Cotton from seeds used for stuffing pillows, &c.; gum [gond] used in shoe-making; seeds give an oil. Wood extremely soft, grey; no heart-wood. Gum-kateerah comes also from Eriodendron anfractuosum, dec. [silk cotton], and Sterculia urens, roxb. [false kateerah]. No other common species here.

——*Hedge cotton* (युग्मफला - yugmap'halá, San.; اترن کی بیل - utrankíbel, Hind.; جٹو - jutup, Dec.; ಉಗುರುಸುತ್ತುಬಳ್ಳಿ - uguru-suttuballi, Can.; దుష్టుపుచ్చెట్టు - dushtupuchchettu, Tel.; ଉତ୍ତୁରୁରି - uttururi, Oor.; വേലിപ്പരുത്തി - vélipparutti, Mal.; මඩහඟු - madahangu, Singh.; வேலிப்பருத்தி - vélipparutti, Tam.). Title from being a hedge-plant bearing fruit with cottony fibres inside. San. from (yugma, san. couple + p'hala, san. fruit); fruits appear in pairs. Hind. from (utran, hind. the plant + bel, hind. creeper). Dec. means matted, from bristly pods. Can. from (uguru, can. finger nail + suttu, can. round + balli, can. creeper); useful in whitlow. Tel. from (dushtu, tel. corruption from dzuttu, tel. hair-tuft + chettu, tel. plant); bearing bristly pods [kakrasinghy]. Mal. from (véli, mal. hedge + parutti, mal. cotton, gossypium herbaceum, linn.). Tam. similar. San. also (yugap'halá), meaning double-fruited. Hind. also (sagowání); (jutak), meaning hair-knot. Can. also (juttu-veballi), meaning hair-knot + creeper; (hálkoratiga). Tel. also (jittupuchettu), meaning hair-knot + plant, distinguished from Seeta's knot; (gurutichettu). Tam. also (uttámaní), meaning best + odour; ironical as it is with a fœtid scent; (uttamathálí), meaning best + convolvulus genus; (aççánimúli), meaning linch pin + plant; (kudagaram). Title otherwise Dog's bane, Hair-knot plant, Linch pin plant, Ootran, Whitlow plant. Botanically Dæmia extensa, r. br., asclepiadeæ [vricsham, 88]. Generic from arabic. Alias Asclepias echinata; Cynanchum cordifolium, extensum. Twining, shrubby; leaves roundish-cordate, acuminated, acute, auricled at the base, downy, glaucous beneath; stamineous corona double; outer one ten-parted, inner one five-leaved; peduncles and pedicles elongated, filiform; margins of corolla ciliated; flowers in umbels, pale green, purplish inside; follicles ramentaceous; has a fœtid scent; common weed of coromandel coast [q.v.]. The whole plant has emetic and expectorant virtues, much used in diseases of children; decoction of leaves anthelmintic; juice of fresh leaves in asthma; juice of leaves mixed with choonam [q.v.] in rheumatism; leaves quoted in pharm. but non-officinal. Very fine strong fibre [naur], like flax twine [alsee].——*Indian cotton* (कर्पासी - karpásí, San.; कापूस - kápúsa, Mahr.; काप्पुसु - káppusu, Conc.; قطن - kutn, Ar.; پنبہ - pambah, Pers.; کپاس - kapás, Hind. and Dec.; کپس - kapas, Malay; ಹತ್ತಿ - hatti, Can.; ପାର୍ଟି - parti, Too.; ప్రత్తి - patti, Tel.; କପା - koppa, Oor.; പരുത്തി - parutti, Mal.; කපු - kapu, Singh.; பருத்தி - parutti, Tam.). San. from (kri, san. to do); as being useful. Mal. from tamul. Singh. from sanscrit. Tam. from (pari, tam. to preserve); as being useful. San. also (mághani), meaning produced in maugham [mausam] or february; (anagniká), meaning cultivated; (tundikéri), meaning useful in face diseases [indian caper]. Mahr. also (dévakápúsa), meaning god + gossypium. Ar. also (kurfus), from sanscrit. Tam. also (uppambarutti), meaning to swell + cotton; (tálipparutti), meaning the creeper so called + cotton; (venbarutti), meaning white cotton; (uttiri); (panju). Title otherwise Common cotton, Country cotton, Herbaceous cotton, Indian lint, Native cotton, Short-stapled cotton, Thread cotton. Botanically Gossypium [carpausy] herbaceum, linn., malvaceæ [vricsham, 25]. Alias Gossypium indicum.—" *a* " The following is botanically the typical herbaceum :—perennial and bushy in the warmer areas, annual where killed by winter; stems erect, sparsely hairy, branches spreading, the bush sub-pyramidal; leaves pale green, thick, leathery, and larger and broader than in the variety wightianum, see below, half segmented into three to five, often seven lobes; lobes ovate-rotund, constricted below, the middle one acuminate, all shortly bristle-tipped; upper surface reticulate, pubescent, with longer hairs on the veins and felted below when young with bifid or trifid not stellate hairs, margins ciliate; stipules linear lanceolate, those nearer the peduncles shorter and broader; flowers longer than the bracteoles, petals obovate, unequally cuneate, yellow, with a large purple patch, slightly united together below; peduncles about half the length of the petioles; bracteoles ovate sub-obtuse, cordate, inciso-dentate, the entire portion sub-rotund, united to each other below, in texture thinner and more numerously veined than in indian cotton; capsule ovate-rotund four to five-celled, cells six to seven-seeded, seeds ovate, beaked at the hilum; under-velvet or fuzz as it is often called short, firmly adhering, whitish-grey; wool

fairly long and white. The following is its variety wightianum, which is the chief form here practically found :—stems erect, somewhat hairy, branches spreading and ascending; leaves when young densely matted, with short, thick, stellate hairs, which fall off in patches leaving a few scattered all over both surfaces; ovate-rotund, almost obsoletely cordate, three to five, rarely seven-lobed, lobes ovate, oblong, acute, constricted at the base into the rounded sinus which in the young leaves rises up as a fold; stipules on the peduncles almost ovate, the others linear-lanceolate acuminate; flowers yellow with a deep purple patch at the base, becoming reddish on the outside on passing maturity; bracteoles small, slightly united at the base, ovate cordate, acute, shortly toothed; peduncles erect in flower, recurved in fruit, one-fourth the length of the petioles; capsule small, ovate acute, four-celled, with eight seeds in each cell; seeds small, ovate, sub-rotund, velvet very short and firmly adhering, wool white or whitish-red. There are an indefinite number of hybrids ranging to the typical herbaceum on the one side and to the sub-arboreous neglectum [bengal cotton] on the other side. The plant varies in height, seldom exceeding 2 or 3 feet; flowers succeeded by a capsule, which when ripe bursts open, presenting a mass of white filaments, and these after separation from the seed which is size of a small pea [calauyam], form the vegetable wool or cotton of commerce. The seeds are round, dark-brown and about the size of black pepper [q.v.]; if examined soon after the removal of the cotton, they are clothed with greyish down; their kernel is greenish, albuminous and slightly sweet in taste. The seeds contain a large proportion of oil [yennay], but the remains of the fibre [naur] adhere with such tenacity to the seed that it absorbs the whole of the oil expressed, from which it cannot be separated without much difficulty; the varieties of cotton with loose seeds, such as peruvian cotton [q.v.] have not this objection. Root has little taste or smell.—"*b*" *σινδόνες*, muslins [q.v.]; *ὀθόνια*, plain cottons; *περιζώματα*, sashes; *ζῶνα σκιωταί*, sashes striped with different colors; *πορφύραι*, purple cloth; and *σινδόνες μολόχινια*, muslins of the color of mallows, were exported in arrian's time from southern india to all the ports on the arabian and east african coasts; cotton was first imported into england from india in 1783.—"*c*" From the point of view of commercial growths so called there are four kinds of indian cotton in this presidency, viz., Tinnevelly, Westerns, Cocanadas, and Salems. Tinnevelly growth comes from tinnevelly district and southern portion of madura; Westerns come from bellary, anantapore and portions of kurnool and cuddapah; Cocanadas come from the kistna district. Salem growth comes from salem and coimbatore districts. Tinnevelly growth is the most valuable of these, it has a strong though not particularly long staple and a very pure white color, it is in demand among spinners in europe for mixing with american cotton [q.v.]. Westerns have been sub-divided into westerns proper and northerns, the latter being the chief cotton of cuddapah and kurnool; the staple of western proper is rough, but fairly long and strong and of a good white, but, owing to imperfections in cleaning, always contains broken leaf; that of northerns is silkier, and has a slightly reddish tinge. Cocanadas have a staple fairly long, strong, and silky; it takes dyes more readily than other growths. Salem growth is inferior, and is used in adulterating tinnevelly growth.—"*d*" For cultivation purposes, there are two forms of indigenous cotton usually grown, depending on south-west and north-east monsoons [q.v.] respectively. In northern circars [q.v.] known merely as poonausa [q.v.] pratty and peira [q.v.] pratty, or early and late cotton. They are in teloogoo generally white and red, and in tamul ookkam meaning swelling and naudam meaning country. Late cotton is grown on irrigated lands in the ganjam district; in all other districts, the crop is grown on dry or unirrigated lands and is often sown with dry grains [q.v.]. The white or ookkam kind is sown in black cotton soil [carisal, regar]; it lasts from six to twelve months; the tinnevelly and western growths are mainly from this variety. The red or naudam variety is grown generally on red or gravelly soils [sevval munn] and lasts from three to four or five years; salem growth is mostly from this variety; the inferior cottons of the presidency belong to naudam. Besides these, small quantities of various quite exotic cottons are grown in certain localities; but such are not herbaceum. In cultivation the shrub requires little care; cultivation dry as above said and depends solely on rainfall; ground prepared in south in chittray or april or else veiyaushy or may, on coromandel in ashaudham or july; ploughing and manuring; seed sown in south in arpisy or october, on coromandel in shrauvanam [mausam] or august; mostly sown with either varagoo [q.v.], dholl [common dholl] or raggy [q.v.] in separate drills, every sixth being cotton; the grain crop is first harvested, and the cotton then alone occupies the field; the cotton seed is specially prepared before being sown by being rubbed in cow-dung [shauny] and then well dried in the sun, and it requires to be sown at once afterwards; sown broadcast; the seedlings appear between the third and seventh day; when they are three weeks old, the plantation is hand-weeded, which process is repeated two or three times during growth of plant; frequently when the seedlings are but a fortnight old, a plough is run through the field to loosen the earth as well as to facilitate the removal of weeds; the plant generally begins to flower about the fourth, and to ripen its fruit at about the sixth month of its growth, but in some rare instances, this does not take place until the eighth month. The cotton crop is remarkably liable to the attacks of numerous insects, especially aphides and larvæ of moths [patingah], and to one or more fungous parasites; rats [ely], squirrels [anil], mice [shoondely], and other larger animals are destructive. As the pods ripen and burst, the cotton is picked at intervals of three or four days; the crop continues to be gathered for a period of two months. The produce thus collected is next freed from seed; this operation is conducted by means of a charka [rautnam]; the cotton, as brought in from the field, is freed, to a certain extent, of its capsules, stalks, leaves, &c., and then submitted to the charka; in most districts the cotton is previously spread out on a common charpoy [q.v.] or country cot [q.v.] and beaten with switches, when a portion of the minute particles of earthy or other extraneous matter still adhering falls through; this beating or thrashing is also intended to loosen the wool from the seed, in order to facilitate the operation of ginning; the operation of ginning is generally performed by females, who hold the seed in the left hand to feed the cylinders, and with the right simultaneously turn the charka; a woman, by manual labor alone can clean only about four pounds of cotton, whereas with the charka she can free from about twenty-five to thirty pounds in a day of ten hours. The following is the native method of packing:—to a strong perpendicular wooden post, a cross piece like the balance of a scale is suspended, the post being partly buried in the ground; to the cross piece, a bag of cumbly [q.v.] or gunny [q.v.] is attached intended as a covering to the bale; from five to six maunds [q.v.] of cotton are now thrown in and compressed by men, who jump into the gunny and stamp down the cotton with their feet; from six to ten men are sometimes thus employed, while others are engaged in bringing the sides of the covering together, and securing them by sewing; in some places the gunny bags are hung by three ropes from the roof of the house, a fourth also attached to the roof hangs free in the centre, to which the men stamping the cotton hold on; these bales vary in size and shape according to the mode by which they are to be conveyed to the nearest market for export, which may be by either pack bullocks or carts. The great proportion of the cotton produced in the ceded districts [q.v.] and kurnool is sent to madras for export; some also sent to bombay; the cotton produced in godavery, kistna, and nellore is sent to cocanada and to madras; the produce of southern districts is exported from tuticorin.—"*e*" The chief use made of cotton in medicine is as a local application to burns, in which it proves serviceable chiefly by excluding the air and maintaining an equable temperature; it has also been applied, on this principle, to erysipelatous and inflamed surfaces; substituted for british lint and tow. Decoction of cotton root is however demulcent; native practitioners prescribe this in cases of strangury and gravel; dose, half a tea-cupful or more twice daily. Oil also medicinally a demulcent. The gum [gond] which exudes from the stem is diuretic. The young leaves and shoots are prescribed for children in dysentry, colic, and hysterics. Seeds increase the secretion of milk, also said to be antidote to snake-poison. Gives to pharm., officinal, collodion, collodium; preparation of gun cotton with ether and rectified spirit, used as application to wounds, ulcers, skin diseases, &c.—"*f*" Cotton seed cake is a valuable food for cattle and also an excellent manure. Oil is used for burning in lamps. Gun cotton is a preparation of cotton which is steeped in sulphuric [gandhac tezaub] and nitric acid [shorey ka tezaub], washed in water several times, and then dried in a water bath, leaves no ash when exploded by heat.—"*g*" Cotton generally is used for the same purposes as hemp [kinnab], flax [alsee], hair and wool [pushm] are in England. The woven texture forms the clothing of the whole population, besides being used in a thousand different ways for carpets [shatranjee], tents [derah], screens [purdah], pillows, curtains, ropes, nets, red cotton wool, &c.—"*h*" There are a great many varieties of cotton goods in the market, whose value depends on the length, strength, and fineness as well as softness of the material, the chief distinction being between the long and short stapled. The kinds of cotton cloths, proceeding from coarse to fine are:—dungry, calico, madapollem, muslin; see each head. For figured cottons see Chintz [banolah, chintz, poonjam, potee, tauga]. In the godavery district excellent cloths are still made at ooppauda, near cocanada, and in the villages about neelapully and narsapore; tent cloth of superior quality is also manufactured in the villages near rajahmundry; in nellore fine shirtings are made at covoor, and pocket handkerchiefs [roomaul], and, when ordered, muslins suitable for ladies' dresses; exceedingly fine muslins are made at yaipalgoonta in the oodayagherry talook, and strong tent cloths at cundoocore; fine cloths are made in the talooks of goodoor, raupore, nellore and cauvaly; handkerchiefs are specially woven at valaparla in the ongole talook, and curtain cloths at gundavaram, toorimerla and nidimooshily in the nellore talook; dyeing [shauyam] is done at several places in the cundoocore, ongole and nellore talooks; the betilla is a certain kind of white east indian chintz made at masulipatam, and known under the name of organdi [q.v.]; cotton carpets [shatranjee] of large size for houses and tents and of a smaller size for the native troops are made at adony, whence they are exported in large quantities to all parts of southern india; colored stuffs are not, as in europe, printed by means of wooden blocks, but painted with a brush made of coir [q.v.], which approaches near to horse-hair, becomes very elastic, and can be formed into any shape the painter chooses; the colors employed are indigo [q.v.],

indigofera tinctoria, linn.; curcuma or indian saffron [country saffron], a plant which dyes yellow, and gum-lac [q.v.], together with some flowers, roots, and fruits which are used to dye red. ——*Jungle cotton* (वनभेंडा - vanabhéndá, Mahr.; جنگلی کپاس - janglíkapás, Hind. and Dec.; పిల్లిమంకెన - piliyamankena, Tel.; ഊരൻ - úran, Mal.; ஓட்டுத்துத்தி - óttuttutti, Tam.). Title from fine fibre. Mahr. from (vana, san. wild + bhénda, mahr. hibiscus esculentus, linn.). Hind. from (janglí, hind. wild + kapás, hind. gossypium herbaceum, linn.). Tel. from (pilla, tel. small + mankena, tel. pentapetes phœnicea, linn.). Mal. from (úru, mal. to creep). Tam. from (ódu, tam. shell + tutti, tam. abutilon indicum, g. don.). Hind. also (banakrá), meaning forest calotropis gigantea, r. br., from fibre. Tam. also (óttatti), meaning shell fig. Title otherwise Angular-leaved urena, Shell tootty. Botanically Urena lobata, linn., malvaceæ [vricsham, 25]. Generic name from malayalam. Herbaceous; leaves roundish, with three or more short obtuse lobes, more or less velvety, five to seven-nerved, with one to three glands on the nerves; segments of involucel five, oblong-lanceolate, equal to the expanded calyx; carpels densely pubescent, echinate; flowers middle-sized, rose-colored; flowering in august to october; common in waste places during the rain. Abounds in strong fibres, substitute for flax [alsee]. There is a variety scabriuscula. Other common species are:—repanda, sinuata.——*Nakchiknee silk cotton* (मधुमालति - madhumálati, San.; نك چهكنى - nakchhikní, Hind. and Dec.; పాలకూర - pálakúra, Tel.; വട്ടക്കാക്കക്കൊടി - vattakkákkakkoti, Mal.; කිරිඅඟුණ - kirianguna, Singh.; பாலை - palai, Tam.). Title from hindostany; and fibre passes for cotton. San. from (madhu, san. sweet + málati, san. the plant, jasminum grandiflorum, linn.). Hind. from (nák, hind. nose + chhikní, hind. sneezing); from use in colds and eye diseases to cause sneezing. Tel. from (pála, tel. white + kúra, tel. pot-herb). Mal. from (vatta, mal. round + kákkakkoti, mal. the creeper, echites macrophylla, r. h.). Singh. from (kiri, singh. white + anguna, singh. hoya genus). Tam. from (pál, tam. milk) [dita, edible paulay, eve's apple, ground paulay, monkey face paulay, nauga champak, pauchonty, paula indigo, paulay silk cotton, tellicherry bark]. San. also (dugdhiká), meaning milk plant. Tel. also (dúdipála), meaning cotton + the plant [needle paulay]. Tam. also (kodippálai), meaning milk creeper; (kurinjákkírai), meaning creeper so called, gymnema sylvestre, r. br. + vegetable; from expectorant character. Title otherwise Twining swallow-wort. Botanically Dregea volubilis, benth., asclepiadeæ [vricsham, 88]. Alias Apocynum tiliæfolium; Asclepias volubilis; Hoya viridiflora. Twining; leaves ovate or cordate, acuminate, membranaceous, glabrous on both sides; corolla glabrous, segments ovate, acutish; leaflets of the staminal crown flat above, obovál, very obtuse, inner angle short, obtuse; follicles divaricate, thick, obtuse, rusty farinaceous; flowers smallish, green, inodorous; flowering march till may. Rambling membranaceous-leaved plant with insignificant, green, inodorous flowers; native of malabar. Leaves are applied to boils and abscesses; leaves quoted, non-officinal, in pharm.; roots and tender stalks are emetic and expectorant. Gives good fibre [naur] whence name. No other common species here.——*Paulay silk cotton* (പാല - pála, Mal.; கருடப்பாலை - karudappálai, Tam.). Title from milky juice and fibre. Mal. from (pál, mal. milk). Tam. from (garuda, san. braminy kite + pálai, tam. milky plant); from antidote to poison. Cf. Dita. Tam. also (pálai), meaning milk plant [dita, edible paulay, eve's apple, ground paulay, monkey face paulay, nakchiknee silk cotton, nauga champak, pauchonty, paula indigo, tellicherry bark]. Title otherwise Braminy kite paulay, India-rubber paulay. Botanically Cryptostegia grandiflora, r. br., asclepiadeæ [vricsham, 88]. Alias Nerium grandiflorum. Shrub; leaves opposite, elliptic, bluntly acuminated, shining above, minutely reticulated with brown beneath; calyx five-parted, segments lanceolate with undulated margins; corolla funnel-shaped, tube furnished with five enclosed narrow bipartite scales inside, covering the anthers, being opposite them; stamens enclosed; stigmas globosely conical; corymbs trichotomous, terminal; flowers large, reddish purple; follicles divaricate, acutely triquetrous. Large, over-spreading, and extensively-growing, scandent plant, throwing out twig-like stems of great length, bearing in pairs oblong, pointed, smooth, deep-green leaves, from three to four inches long; large, bell-shaped, bright rich-purple flowers; flowering all year. Yields a fine strong fibre resembling flax [alsee], which may be spun into the finest yarn; the milky juice gives a moderate caoutchouc [pauchonty], for rubbing out pencil-marks. No other common species here.——*Peruvian cotton* (పైడిపత్తి - paidipatti, Tel.). Tel. from (paidi, tel. gold + patti, tel. cotton plant); from color of flowers. Title otherwise Brazil cotton, Chain seed cotton, Kidney cotton, Maranham cotton, Pernambuco cotton. Botanically Gossypium [carpausy] barbadense, linn., var. acuminatum, roxb., malvaceæ [vricsham, 25]. Sub-arboreous; leaves, three to five-lobed, lobes divergent, ovate, acute, the middle one slightly the longest; flowers large, bracteoles broadly ovate, deeply cordate and glandular at the base; capsule ovate, acuminate, cells eight to ten-seeded, black glabrous except the long white wool. The seeds adhere together in a very peculiar manner; the cotton is easily and completely separable, milk-white, and of a long staple, but it is harsh and woolly to the touch. Gives fibre; seeds being easily separable from cotton give an oil by expression.——*Red-cotton tree* (शाल्मली - shálmalí, San.; सावरी - sávarí, Mahr. and Conc.; رگت سینبل - ragatsembal, Hind.; کانٹونکا کھتیان - kántonkákhatiyán, Dec.; ಕೆಂಪುಬೂರಗ - kempubúraga, Can.; ಮುಳ್ಳಾಲ - mulláła, Too.; బూరుగు - búrugu, Tel.; ଶିମୁଳି - simuri, Oor.; പൂള - púla, Mal.; කටුඉඹුල් - katuimbul, Singh.; முள்ளிலவு - mullilavu, Tam.). Title from reddish hue of the cotton when new. San. from (shál, san. to shine); beautiful when in flowers without leaves [silk-cotton tree]. Mahr. and conc. from sanscrit. Hind. from (rakta, san. blood + sembal, hind. silk cotton). Dec. from (kántá, hind. thorn + khatiyán, hind. eriodendron anfractuosum, dec.). Can. from (kempu, can. red + búraga, can. silk-cotton tree). Too. from (mullu, too. thorn + ála, too. silk-cotton tree). Tel. from (bura, tel. large). Oor. from sanscrit. Singh. from (katu, singh. thorny + imbul, singh. eriodendron anfractuosum, dec.). Tam. from (mul, tam. thorn + ilavu, tam. silk-cotton tree). San. also (púraní), meaning filling up, as used in stuffing pillows; (kukkutavandaka), meaning cock + praiser, from red flowers; (raktapushpá), meaning red + flowered [galangal]; (mócha), meaning liberating; (kantakidruma), meaning thorny tree; (st'hiráyu), meaning long-lived, cf. Silk cotton; (yamadruma), meaning tree of infernal regions, because it makes a great show of flowers but produces no fruit to eat. Mahr. also (kántésámvarí), meaning thorny silk-cotton tree. Hind. also (kántísemal), meaning thorny silk cotton. Dec. also (kántonkásemal), meaning thorny silk cotton; (lálkhatiyán), meaning red silk cotton. Can. also (mullubúraga), meaning thorny silk cotton; (mullelavu), meaning thorn + silk-cotton tree. Tel. also (mundlabúrugu), meaning thorn + the tree; (kondabúrugu), meaning hill + the tree; (pinnabúrugu), meaning small + the tree. Oor. also (bouro). Mal. also (mullilavu), meaning thorny silk-cotton tree; (unnamurikku), meaning cotton + erythrina indica, lamk. Tam. also (kóngu), meaning large tree [golden silk cotton]. Title otherwise Cock's comb silk cotton, Cotton coral tree, Kapok fibre tree, Malabar semul, Mocharas gum tree, Poola, Red semul, Red silk cotton, Seven-leaved silk cotton, Shaulmaly, Thorny silk cotton, Yama's silk cotton. Botanically Bombax malabaricum, dc., malvaceæ [vricsham, 25]. Alias Bombax ceiba, heptaphylla; Salmalia malabarica. Salmalia from sanscrit.—"*a*" Gigantic tree; trunk straight, often 80 or 100 feet to the first bough, of great girth, generally furnished with very large buttresses; armed with thorns on the bark; leaves divided into finger-like portions rising from one point; large red flowers appearing while the tree is without leaves in the hot season, followed by large pods containing white hairs resembling cotton, but wanting in the property of spinning into a thread [nool].—"*b*" The seeds are about the size of black pepper [q.v.], brown, smooth and roundish, with a very small and short but distinct ridge on one side of the hilum. The young fruits form part of mahratta buds [q.v.]. The bark of the stem or trunk varies much in appearance according to the age and size of the plant from which it is taken; that from the trunk of a well grown up tree after it begins to blossom is externally brown, rough, scaly and often covered with some short and blunt prickles, and internally reddish-brown, it is quite odourless and possesses no particular taste; the root bark is covered with a thin and ash-colored epidermis, and is deep or reddish-grey internally, it is also devoid of taste and smell; the extract of bark is dark in color and slightly saltish in taste, and odourless; the resemblance it bears to the mocharas, for which see below, is so great that if it is made to dry in any of the forms of the latter, it will pass for it, but it does not keep dry, its deliquescence and saline taste depending upon the large quantity of salt it contains. The root is long, fleshy, and whitish, brittle; this is not as sometimes said in error the soofaid moosly [q.v.], but the semul moosly [q.v.]. No gum [gond] is produced from stem on making incisions however deep, but a very small quantity is exuded spontaneously from time to time. This or mocharas [q.v.] has at least three varieties in the bazaar [q.v.]. The first variety occurs in very irregular, nodular, smooth, opaque, light or pale-brown pieces with internal cavities; the cavities are generally small and numerous, but sometimes few and large; in the latter case, the pieces often assume the appearance of a shell. The second is a mere sub-variety of the first and the only difference between them is that the pieces in the former are very hard, heavy, dark-brown and cannot be reduced to powder without great difficulty; they are sometimes so smooth that they shine, and possess but few cavities. The third and most common variety consists of very irregular, angular and hard fragments or pieces of various size and of a dark or dirty brown color. The drug in all its varieties is odourless and possesses an astringent and demulcent taste; when placed in water it swells up to a considerable size, and some tannin enters into solution, the insoluble portion resembles tragacanth [kateerah]. As regards the production of mocharas, if the plant is not very large, the exudation is only very small and occasional; the matter exuded is for some days at the beginning yellowish red or of flesh color, and then assumes a brownish hue; after some months it gradually acquires the form described above in the first variety; the second variety is produced in the same way if the plant is much larger and older; when the tree is very large and older than sixty or seventy years, the exudation of the resin [raul] occurs every year soon after the rainy season; a large quantity of thick, brown and viscid fluid

flows spontaneously from a natural crack, fissure, or wound in the bark of the stem or large branch and collects on the ground; when dry, this forms the most common and abundant kind of mocharas in the bazaar, described above as the third variety; mocharas is the product of diseased action in the cells of the bark; whilst the third variety is the cheapest and most common, the first is the most efficacious as a drug. A dark brown but clear oil is obtained by expression from the seeds.—" c " Parts medicinally used are the gum, seeds, dry young fruit, tap-root of the young plant, bark, cotton; the young fruit is more common and abundant than the gum. In physiological actions:—the gum is astringent and demulcent; the seeds nutrient and demulcent; the young fruit stimulant-diuretic, tonic, aphrodisiac, expectorant, and exercises beneficial influence over membrane of genito-urinary organs; the tap-root [semul moosly] is demulcent, tonic, slightly diuretic, and aphrodisiac; the bark is demulcent, diuretic, tonic, and slightly astringent; the cotton is employed externally for its mechanical properties of softness and elasticity in padding splints and covering burned and inflamed surfaces, &c. Preparations:—of the gum are simple and compound powder, compound powder being mocharas, bengal-kino [q.v.], opium [aphainam] and dry pulp of emetic-nut [q.v.]; of the seeds, emulsion; of the dry young fruits, simple powder, prepared after removing stalks; of the tap-root, simple powder, by pulverizing dry slices of the tap-root; of the bark, decoction and extract. Doses:—of the simple powder of the gum, from twenty to forty grains; of the compound powder of the gum from sixteen to thirty-two grains; of the seeds, from two to three drachms; of the powder of the fruit, from thirty grains to one drachm; of the powder of the tap-root, from forty to eighty grains; of the decoction, from one to two fluid ounces; of the extract, from seven to fifteen grains. Substituted:—the gum for kino, rhatany and log-wood; the seeds for tragacanth, sweet-almonds [baudam] and copaiba; the young fruit, tap-root and bark, for pareira brava [indian pareira], broom tops, phosphorus, cantharides, calumba [q.v.], gentian [chiretta] and spiritus ætheris nitrosi. The mocharas is in pharm., but not officinal.—" d " Leaves and twigs lopped for fodder; flower buds eaten as pot-herb. The cotton which surrounds the seeds is sometimes used for stuffing cushions and quilted bed covers [rizye], being very light and soft; useless for textile purposes. Wood white when fresh cut, turning dark on exposure; very soft, perishable; no heart-wood; no annual rings; not durable, except under water when it lasts tolerably well; used for planking, packing-cases and tea boxes, toys, scabbards, fishing-floats, water conduits, and the lining of wells; makes a poor fuel; used for avenue planting [shaulay].—" e " A white flowering variety of tree much rarer than the red. No other common species of the genus here. Compare in other genera:—Cochlospermum gossypium (arasinabúraga), yellow red-cotton tree; Eriodendron anfractuosum (bilibúraga), white red-cotton tree.——*Red-cotton wool* (پوتی - potí, Hind.; ಕೆಂಪುಹತ್ತಿ - kempuhatti, Can.; ఎర్రప్రత్తి - errapratti, Tel.; செம்பஞ்சு - shembañju, Tam.). Title otherwise Shempunjy, Potee. Round red cake of cotton. An inferior kind of this is the cotton impregnated with red coloring matter of prickly pear [q.v.]; better kind is made by impregnating the cotton with the coral jasmine [q.v.] flower, nyctanthes arbor-tristis; the best of all is from bastard saffron [q.v.] or safflower, carthamus tinctorius. When this article is soaked in water, the latter becomes red ink [mashy].——*Silk cotton* (शाल्मली - shálmalí, San.; पान्ढरसांवरी - pándhrasámvarí, Mahr.; سفید سیمبل - sufedsembal, Hind.; کھتیاں - khatiyán, Dec.; کپوک - kapuk, Malay; ಬಿಳಿಬೂರಗ - bilibúraga, Can.; ఆల - ála, Too.; బూరగ - búraga, Tel.; മുള്ളില്ലാപ്പൂള - mullilláppúla, Mal.; ඉඹුල් - imbul, Singh.; இலவம் - ilavam, Tam.). Title from silky wool of fruit. San. from (shál, san. to shine) [red-cotton tree]. Mahr. from (pándhara, mahr. white + sámvarí, mahr. red-cotton tree, bombax malabaricum, dec.); from white flowers. Hind. from (sufed, hind. white + sembal, hind. bombax malabaricum, dec.). Dec. means cotton. Can. from (bili, can. white + búraga, can. red-cotton tree). Mal. from (mullu, mal. thorn + illá, mal. not having + púla, mal. red-cotton tree). San. also (móchá), meaning setting free gum; (chiráyu), meaning long living, Cf. Red-cotton tree; (shvétashálmali), meaning white silk cotton, from the flowers. Hind. also (túlá-per), meaning silk-cotton tree. Mal. also (paññimaram), meaning cotton tree; (púla), red-cotton tree. Singh. also (púraná), meaning filling, perhaps from cotton used to stuff bed. Title otherwise Cabbage wood, Capook, Ceiba cotton, God tree, Ilavam, Kapok floss, Khatian, Stuffing cotton, White cotton, White semul, White silk cotton, White tree cotton. Botanically Eriodendron anfractuosum, dc., malvaceæ [vricsham, 25]. Alias Bombax pentandrum; Ceiba pentandra; Eriodendron orientale; Gossampinus rumphii. Large deciduous tree, 50–60 feet; trunk prickly at the base; branches growing out horizontally from the stem, three from one point; leaflets five to eight, quite entire, or serrulated towards the point, lanceolate, mucronate, glaucous beneath; petals five, united at the base, filaments jointed at the base, each bearing two to three versatile anfractuose anthers; style crowned with a five to six-cleft stigma; capsule five-celled five-valved; cells many-seeded; seeds smooth, black, embedded in very fine silky cotton; flowers white, springing from the branches. Common, planted about villages and temples; leaves fall during the cold season; grows rapidly and is very ornamental; has a black and opaque pseudo-gum called Khatian [q.v.] gond, which is like that of the moringa [q.v.]. Very young fruits, demulcent and astringent in medicine; part of mahratta buds [q.v.]; a solution of the gum is given in conjunction with spices in bowel-complaints; bark is astringent, used to suppress vomiting. The large stems are hollowed out to form canoes; the cotton obtained from the pods is only of use for stuffing pillows and cushions; the texture is too loose to admit of its being spun and used in fabrication of cloth; as it easily catches fire it is put in tinder boxes and employed in the preparation of fire works [baunam]; an oil is extracted from the seeds of a dark-brown color; in s. canara fibre extracted suitable for paper. A soft almost worthless wood, used for toys, floats, and such purposes. Compare common coral tree. There is a Tamul proverb:—இலவு காத்த கிளி ஆனேன்—"I am "like the parrot that waited for the silk-cotton pod"; spoken of one disappointed; a parrot on seeing a green pod on a silk-cotton tree believed it would ripen into fruit, when it burst and the cotton was blown away.——*Thorny silk cotton* (முள்ளிலவு - mullilavu, Tam.). From prickles. Same as Red-cotton tree.——*Tree cotton* (देवकापूस - dévakápúsa, Mahr.; دیو کپاس - deukapás, Hind.). Mahr. and hind. from (déva, san. god + kárpása, san. gossypium); from being grown about temples and hermitages. Botanically Gossypium [carpausy] arboreum, linn., malvaceæ [vricsham, 25]. Arborescent, cultivated in gardens only or near temples; not a regular field crop; leaves, five to seven-lobed with an extra tooth in the left side sinus or both sides of the central lobe; thick, leathery, sub-glabrous or with short, abortively stellate hairs on the leaves and longer hairs on the petioles and young stems; lobes bristle-tipped; petiole long, rigid; stipules falcate; inflorescence axillary, generally one-flowered; peduncle about three-fourths the length of the petiole, but jointed above the middle, bearing a small leaf and two stipules at the joint; flowers small, purple, a little less than twice the length of the bracteoles; bracteoles medium-sized, base with round ears, apex ovate, acute toothed or sub-entire; ovary rounded; seeds with greyish black velvet underneath the floss. Its cotton is used only for making turbans [puggry]. Oil for burning in lamps. For sub-arboreous species see Bengal cotton and Peruvian cotton.——*Yama's silk cotton* (यमद्रुम - yamadruma, San.). Same as Red-cotton tree.——*Yellow cotton* (پیلی کپاس - pílíkapás, Hind.). From yellow flowers. Same as Golden silk cotton.

COTTYE (கொட்டாய் - kottáy, *Tam.*). From (ködu, tam. to bend); from slope. Shed [cotaur, pandaul].——*Cottye ootsavam* (கொட்டாயுற்சவம் - kottáyurchavam, Tam.). Means shed + feast. Tabernacle feast held at various pagodas [pundigay, 6d]. Special celebration at Shreerungam, in a large and decorated pandaul erected for the occasion. This ends in Mooccoty yecaudashy [q.v].

COTY (कोटि - kóti, *San.*). From (kut, san. to bend). Point. End of a bow. Edge, border. The complement of an arc to 90°. Compare Bhoojam. Also one of the sides of a right-angled triangle [trikonam]. Crore [q.v.], as an extreme number. Suffix in proper names as Dhanacoty, he who has a crore of wealth. Prefix in proper names; as Cotilingam, crore of lingams. Also by itself Pariah proper name of both sexes [peyar].——*Cotijyay* (कोटिज्या - kótijyá, San.). From (above + jyá, san. bow-string, sine). The cosine of an angle in a right-angled triangle.——*Cotipully* (కోటిపల్లి - kótipalli, Tel.). From (kóti, tel. border + palli, tel. a village). Tel. also (gókavaram-raghudévapuramu), to distinguish from rajahmundry raghoodevapooram. Sanscrit name (kótip'hali), meaning crore + good fruits; from high sanctity.—" a " Deputy tahsildarry, Godavery district. Pay Rs. 100.—" b " Village, Deputy tahsildar's station, Place of pilgrimage; Godavery district, Ramchendrapooram talook; pop. 2,509; lat. 16° 41′; long. 82° 04′; from Cocanada S.W. 22 miles; from Coonavaram S.E. 78 miles; from Ellore E. 60 miles; from Madras N.N.E. 268 miles; from Narsapore N.E. 28 miles; from Rajahmundry S.E. 28 miles; from Ramchendrapooram S. 9¾ miles. Considered sacred. On left bank of Gowtamy-godavery. Belongs to Maharajah of Vizianagram. Only portion of district which belongs to him, with the exception of a few yards of land at Rajahmundry on which there is a small Beiraugy's shed. Numerous ancient temples. Every twelfth year the feast of Pooshcaram [pundigay, 6d]. Great festival at Shivarautry [pundigay, 6a].——*Shooddha coty* (शुद्धकोटि - shuddhakóti, San.). From (shuddha, san. pure + above). The sine of an angle in a right-angled triangle.

COUNTRY (देश - désha, *San.*; ناٹ - nát, *Hind.*; ನಾಡು - nádu, *Can.*; నాడు - nádu, *Tel.*; നാട് - nátu, *Mal.*; நாடு - nádu, *Tam.*). Indigenous as opposed to Sheemay or foreign [seema], implying that the Indian article resembles the European article named. Especially plant first term; see below; these are the commonest, but a great many more might be added.——*Country aconite* (ناٹ کا بچھناگ - nátkábachhnág, Dec.). Same as Wild bachnaug.——*Country almond* (நாட்டுவாதங்கொட்டை - náttuváthamkottai, Tam.). Fruit of the Catapang tree.——*Country bean* (शिंबिक - shimbika, San.; वाल - vála, Mahr.;

بلر - ballar, Hind. and Dec.; ಅವರೆ - avare, Can.; ಅಬರೆ - abare, Too.; అనుము - anumu, Tel.; ବାଇଲୋ - báilo, Oor.; മൊച്ച - moçça, Mal.; மொச்சை - moççai, Tam.). San. from (sham, san. to pacify). Can. from tamul. Tam. from (moççu, tam. sheep-smell); from smell of seeds. San. also (sitashimbika), meaning white bean; (shvétashimbika), meaning white bean. Mahr. also (pávatá). Hind. also (chhotásem), meaning small dolichos lablab, linn.; (semkíphallí), meaning the dolichos pod; (lobia), meaning vigna catiang, endl. Can. also (holadavare), meaning field + bean, dry crop; (chilávari); (tammegida). Tel. also (tellachikkudu), meaning white + the plant; (chikkudu); (adavichikkudu), meaning forest + the plant; (anapuchikkudu), meaning bean + the plant; (káruchikkudu), meaning forest + the plant. Mal. also (vellavara), meaning white bean. Tam. also (avarai), meaning generally garden variety; (vellavarai), meaning white + the plant; (káttumoççai), meaning forest + the plant; (karuppumoççai), meaning black + the plant; (vellaimoççai), meaning white + the plant. Title otherwise Ballar [cow gram], Black-seeded bean, Egyptian kidney-bean, Hyacinth bean, Japan lablab, Lablab, Purple hyacinth bean, White hyacinth bean. *Botanically* Dolichos [shimby] lablab, linn., leguminosæ [vricsham, 48]. Specific name from arabic. Alias Dolichos albus, benghalensis, cultratus, cuspidatus, ensiformis, ignosus, mungo, purpureus, racemosus, spicatus, tetraspermus; Ensiformis sinensis; Lablab bengalensis, cultratus, leucocarpus, lignosus, microcarpus, nankinicus, niger, perennans, purpureus, vulgaris; Phaseolus tetraspermus. Wide-twining perennial or in cultivation annual herb; leaves pinnately trifoliolate; leaflets entire; racemes axillary, elongated; pedicles short; corolla papilionaceous; calyx bibracteolate, campanulate, tubular four-cleft; legume broadly scimitar-shaped, gibbous below the apex, and ending abruptly in a straight or recurved cuspidate point; seeds longitudinally oval, of various colors; flowers red, purple, or white; the stems attain a length of 16–20 feet; the recurved flat oblong pod is $1\frac{1}{2}$ to 2 inches long by $\frac{1}{2}$ to $\frac{3}{4}$ inch broad; two to four-seeded; the seed is a sort of round bean; the whole plant has in field cultivation a very disagreeable smell. Cultivated dry in any good soil; ground prepared in summer months, after rain, a selected spot being hand-hoed, weeds removed; dried leaves are burnt on the spot and ashes mixed with soil; seed sown a month or so later, either by hand or broadcast; under growth weeds are cleared and ground watered every few days; ashes and cow-dung applied as manure; pandauls [q.v.] raised for support of the plants; plant attains a height of over a foot, when the leaves become yellow and fall off; the pods however are generally gathered when young, those for seeds only being left to become full ripe; the pods can be plucked three months after sowing; the pods are dried in the sun for three days after which they are beaten or trodden and the seeds collected; the seeds are afterwards sifted and dried; average price fifteen imperial seers one rupee. When young and tender, seeds are good substitutes for french beans [lobyah]; being cheap are much eaten by poorer classes; they are not palatable, but reckoned wholesome; cattle are fed with the seed; haulms are given as fodder; cultivated about the doors of the natives, form arbours. Several varieties differing in color of seeds and forms of legumes. Compare also:—Arachis hypogæa, underground bean; Cæsalpinia bonduc, molucca bean; Canavalia ensiformis, sword bean; Ceratonia siliqua, locust bean, st. john's bean; Dolichos biflorus, two-flowered bean; Entada scandens, match-box bean; Erythrina indica, red bean; Glycine javanica, japanese bean; Glycine soja, soy bean; Mucuna monosperma, negro-bean; Mucuna pruriens, horse-eye bean; Nelumbium speciosum, egyptian bean; Phaseolus grahamianus, graham's bean; Phaseolus lunatus, country haricot bean; Phaseolus vulgaris, haricot bean; Prosopis glandulosa, texas mesquit-bean; Prosopis pubescens, screw bean; Psophocarpus tetragonolobus, goa bean; Pyrus aucuparia, quick bean; Semecarpus anacardium, malacca kidney bean; Strychnos ignatii, st. ignatius bean; Vigna catiang, runner bean. See gloss. paragraphs.——*Country borage* (पाषाणभेदी - páshánabhédí, San.; पत्थरचूर - patt'harchúr, Mahr.; కర్పూరవల్లి - karpúravalli, Tel.). Title from resemblance, as to hairy leaves. San. from (páshána, san. stone + bhid, san. to break); useful in gravel. Mahr. from (prastara, san. stone + chúrn, san. to powder); useful in gravel. Tel. from (karpúra, san. camphor + vallí, san. creeper); from smell of leaves and flowers. Botanically Coleus aromaticus, benth., labiatæ [vricsham, 103]. Alias Coleus amboynicus, crassifolius; Plectranthus amboynensis, aromaticus. Shrub, 2–3 feet; branches tomentosely pubescent, or hispid; leaves petiolate, broad, ovate, crenated, rounded at the base, or cuneate, very thick, hispid on both surfaces, or clothed with white villi, very fragrant, floral leaves hardly equal in length to the calyx; racemes simple; whorls twenty to thirty-flowered or more; calyx tomentose; tube of corolla about twice as long as the calyx, defracted at the middle; throat dilated; lower lip a little dilated, boat-shaped; flowers smallish, pale blue, very aromatic. Low growing wide-spreading herb; stem fruticose at the base; solid succulent leaves; native of the moluccas; common in gardens, but rarely flowers. Expressed juice, powerful carminative, given for colic of children. Leaves eaten and mixed with articles of food. The species barbatus is cultivated in gardens for the roots, which are pickled. Osmirrhizon is used by hindoo females to scent their hair. Other species are:—malabaricus, parviflorus.

——*Country chiretta* (براچراتہ - barácharáitah, Hind.). Same as Purple chiretta.——*Country cotton* (कार्पासी - kárpásí, San.). Same as Indian cotton.——*Country french beans* (کھرسنبل - kharsanbal, Hind.). Same as Country lobyah.——*Country gall nut* (కరక - karaka, Tel.). Tel. from (kara, tel. stain); fruit stains finger black and used in making ink [mashy]. Same as Chebulic myrobalan.——*Country gooseberry* (அருநெல்லி - arunelli, Tam.). Tam. from (aru, tam. minuteness + nelli, tam. emblic myrobalan); from small size. Same as Brazil cherry.——*Country horse-radish* (முருங்கை - murungai, Tam.). Same as Moringa.——*Country ipecacuanha* (جنگلی پکوان - janglípikván, Hind.). Same as Indian ipecacuanha.——*Country lavender* (उत्पलभेद - utpalabhéda, San.; कपूर्लि - kapúrli, Mahr.; साविरसम्बार - sávirasambára, Conc.; پنجریکا پتہ - panjeríkáper, Hind.; پنجریکا جہار - panjeríkájhár, Dec.; ದೊಡ್ಡಪತ್ರೆಬಳ್ಳಿ - doddapatreballi, Can.; ಸಂಬಾರಬಳ್ಳಿ - sambáraballi, Too.; కర్పూరవల్లి - karpúravalli, Tel.; കാട്ടുകൂർക്ക - káttukúrkka, Mal.; ගල්කපපරවල්ලිය - galkapparavalliya, Singh.; கற்பூரவல்லி - karppúravalli, Tam.). Title from similarity to borago officinalis which has hairy leaves. San. from (utpala, san. fleshless + bhid, san. to break), probably cures emaciation. Hind. from (panjerí, hind. caudle + per, hind. tree). Can. from (dodda, can. large + patri, san. leaf + balli, can. creeper). Too. from (sambára, too. spicery + balli, too. creeper). Tel. from (karpúra, tel. camphor + valli, san. creeper) [country borage]. Mal. from (kátu, mal. forest + kúrkka, mal. the plant). Singh. from (gal, singh. stone + karppúravalli, tam. the plant), common among rocks. Tam. from (karpúra, san. camphor + valli, san. creeper); from smell. San. also (ajapáda), meaning sheep + foot; (induparní), meaning moon + leaf, from white round leaf; (karpúravallí), meaning camphor + creeper; (válukâ), meaning sand plant. Ar. also (vardiafrásiún). Hind. also (sitákápanjerí), meaning seeta's caudle. Dec. also (ajwánkápattá), meaning carum copticum, benth. + leaf. Can. also (patriballi), meaning leaf-creeper; (kuruvéluballi), meaning fragrant grass creeper. Tel. also (karavéru), meaning the plant + root; (ómamuákuchettu), meaning carum copticum, benth. + leaf + plant, from similarity; (rógachettu), meaning disease + plant; (pindibanda), meaning flour + rock; as being able to powder rock. Mal. also (karppúravalli); (chómara); (kúrkka); (patukúrkka), meaning rough + the plant. Title otherwise Ajwaun-leaf creeper, Camphor creeper, Caudle plant, Moon-leaf creeper, Seeta's caudle, Thick-leaved lavender. Botanically Anisochilus carnosus, wall., labiatæ [vricsham, 103]. Alias Anisochilus crassus; Lavandula carnosa; Plectranthus carnosus, crassifolius, dubius, strobiliferus. Herbaceous pot plant; stem erect, tetragonal; leaves petiolate, ovate-roundish, crenated, cordate at the base, thick, fleshy, tomentosely villous on both surfaces; spikes on long peduncles; calyx with upper lip, with ciliated edges, lower lip truncate, quite entire; corolla bilabiate, upper lip bluntly three to four-cleft, lower lip entire; flowers lilac. Plant yields a volatile oil. Fresh juice from leaves mixed with sugar [q.v.] and gingelly [q.v.] oil, is a cooling liniment for the head; leaves and stems in infusion are a mild expectorant. Other species are:—dysophylloides, eriocephalus, scaber, sericeus, suffruticosus.——*Country liquorice* (گمچی - gumchí, Dec.). Same as Indian liquorice.——*Country mallow* (துத்தி - tutti, Tam.). Same as Tootty.——*Country radish* (मूलक - múlaka, San.; मुळा - mulá, Mahr.; मुळंगि - múlangi, Conc.; فجل - fujl, Ar.; ترب - turb, Pers.; مولی - múlí, Hind.; ملی - mullí, Dec.; لوبك - lobak, Malay; ಮುಲ್ಲಂಗಿ - mullangi, Can.; ಮುಲ್ಲೆಂಗಿ - mullengi, Too.; ముల్లంగి - mullangi, Tel.; കനകപ്പാല - kanakap-pála, Mal.; முள்ளங்கி - mullangi, Tam.). San. from (múla, san. root), from officinal part. Ar. from (fajala, ar. thick). Pers. means earth. Hind. from sanscrit. Can. from (mullu, can. thorn). Mal. from (kanaka, san. gold + pála, mal. milk-plant). Tam. from (mul, tam. thorn), thorn-like. San. also (vrittatrina), meaning round grass. Can. also (múlangi); (mugabíja). Tam. also (rádismulangi), meaning radish root; (shivappumullangi), meaning red + radish. Greek ῥαφανὶς ἀγρία; Latin raphanus. Title otherwise Charlock, Indian radish. Botanically Raphanus sativus, linn., cruciferæ [vricsham, 10]. Alias Raphanus radicula, rotundus, oblonga, according to shape.—"*a*" Annual herb of the cabbage [kobee, sarshapam] family; unknown wild; bears purplish flowers; root grows to an enormous size, sometimes as large as a man's leg, rising partly above ground like a stem; it is pale red or white colored without the pleasant pungency of the english plant but mild and tender. The seeds are roundish, reddish-grey or reddish-brown, vary in diameter from a half to one line, odourless and mucilaginous in taste. The root and seeds yield with water a milky distillate, from which a small quantity of oil may be obtained by rectification; it is colorless, heavier than water, and has the taste but not the smell of radishes; the oil contains sulphur [gandhac]; it forms a white precipitate with corrosive sublimate [shavveeram], and yellow with bichloride of platinum [goorootwam]; it dissolves with tolerable facility in water. Seeds diuretic, laxative and lithontriptic; roots used for urinary and syphilitic diseases. Leaves are a vegetable; young pods used for pickling, a substitute for

capers [q.v.]; root eaten cooked or raw; oil from seeds used in cooking. Several varieties.—"*b*" Wild country radish so called in vernaculars, otherwise wall radish, wild endive, wild radish, wild tobacco, is laggera aurita, schultz-bip., compositæ [vricsham, 74]; alias blumea aurita, conyza aurita; annual herbaceous or somewhat shrubby plant, flower small, yellow; smells strongly of turpentine [carpoora teilam], found particularly along the walls in old buildings and in graveyards. There is another species of laggera called pterodonta.—"*c*" Compare also:—Daucus carota (kempumullangi), red country radish; and (pattsamullangi), yellow country radish; Sonchus oleraceus (káttumullangi), forest country radish. See gloss. paragraphs. ——*Country sarsaparilla* (ناٹ کاعشبہ - nátkáushbah, Dec.). Same as Indian sarsaparilla.——*Country sorrel* (चुक्र - chukra, San.; حماض - hummáz, Ar.; ترشہ - turshah, Pers.; چوکا - chúká, Hind.; چکہ - chukkah, Dec.; ಸುಕ್ಕೆಸೊಪ್ಪು - sukkesoppu, Can.; చుక్కకూర - tsukkakúra, Tel.; ඇඹුල් - suri, Singh.; சுக்கங்கீரை - shukkangírai, Tam.). San. means sourness. Ar. from (hamz, ar. acid). Pers. from (tursh, pers. acid). Hind. from sanscrit. Can. from (sukki, can. insipid + soppu, can. greens). Tel. from (chukra, san. the plant + kúra, tel. pot-herb). Tam. from (shukkam, tam. species of bryonia + kirai, tam. vegetable). San. also (amlavétasa), meaning sour, calamus rotang, linn.; (chukriká), meaning sour [sour auray]; (shatavédhí), meaning piercing a hundred, from curing hundred diseases. Ar. also (habakikhúrásání), meaning khorassan mint. Dec. also (chukkekíbhájí), meaning country sorrel greens. Tel. also (pullaprabba), meaning sour rattan. Singh. also (katutampalá). Title otherwise Bladder-dock, Bladder sorrel, Mint of khorassan. Botanically Rumex vesicarius, linn., polygonaceæ [vricsham, 110]. Stem low, branched; leaves somewhat fleshy, petioled, ovate or deltoid, obtuse or acutish, usually cuneate-attenuate from a cordate or sub-hastate base, uppermost ones narrower; racemes simple or panicled, leafless; fascicles two to five-flowered, remote; pedicels one-flowered or generally bearing two flowers at the top, connate at the back; valves very large, entire, very unequal, calliferous or almost naked; grows in fields during rains; medicinally cooling and aperient, and to certain extent diuretic; eaten raw and as pot-herb [keeray]. Other common species are:—dentatus, nepalensis, wallichii.——*Country walnut* (నాటుక్రోటు - nátuakrótu, Tel.). Lumbang nut.

COURTALLAM (குற்றாலம் - kuttálam, * *Tam.*). Title from sanscrit. Sanscrit name (triktúáchala), meaning three + peak + mountain; also (trikúta), meaning three + peak; also (drutikshétra), meaning drooty, the sage + sacred place; also (kuddála), meaning mountain ebony, bauhinia variegata, linn., from the name of the tree in the shiva temple. Village, Sanitarium. Place of pilgrimage; Tinnevelly dist., Tencaushy tal.; pop. 1,095; acres 1,324; lat. 8° 56′; long. 77° 19′; from Tencaushy W.S.W. 3¼ miles; from Tinnevelly W.N.W. 32 miles. On the Chittaur. Although only 700 feet above sea-level, Courtallam receives the south-west monsoon [caur] through an opening in the ghauts [q.v.] and possesses the climate and flora [vricsham] of a much higher elevation. The valley allows an easy communication between the Carnatic [q.v.] and Malabar. There are several bungalows and good roads in all directions. Very sacred temple with some good sculpture and a number of inscriptions. The lingam [q.v.] is to Coottaulanauta sawmy. Mantapams [q.v.] and choultries [q.v.] for visitors. Festival in August when Hindoos come to bathe. Celebrated three waterfalls. The lowest is Vadavaroovy, the northern fall. It consists of two falls, the united height of which is about 180 feet. The upper pool of this fall is called Pongoo maucadal, the boiling great sea, the depth of which is 38 feet. The second fall is Champakautavy teertam, the sacred bathing place of the Champak [q.v.] forest. The third is Tainaroovy, the honey fall. The highest fall is 2,000 feet above the sea. The average temperature of the water is 72° to 75° and invalids derive great benefit from bathing in it. The bathing place is under a shelving rock, affording a natural shower-bath. The spices cultivated at Courtallam were introduced in 1800 [aroovy, hill-station].

COURTNEY (కుడతని - kudatani, *Tel.*). From (kúdu, can. junction + ani, tel. border). Sanscrit name (kumárapura), meaning town of the son-god, who destroyed a giant. Village, Railway station; Bellary dist., Bellary tal.; pop. 4,866; acres 19,356; lat. 15° 13′; long. 76° 48′; height 1,577 feet; from Bellary W.N.W. 11 miles. A large decayed village of considerable antiquity. Contains a good tank and the remains of a strong fort. There is a curious hill composed of scoriæ about three miles beyond this place, close to the Antapore pass, on the right of the road, about fifty feet high and four hundred feet in circumference. The summit is rounded and the surface partially covered with patches of dry grass, from which crop out masses of tufaceous scoriæ. It sounds hollow when trodden on. Either volcanic or remains of an ancient furnace. The local tradition is that the mound is composed of the ashes of an enormous raucshasan whose funeral pile it was. Still another account makes it to be the ashes of a funeral pile raised over the corpses of soldiers killed in battle. Courtney was formerly an important Jeina stronghold, but one of the principal basties [q.v.] is now occupied by Sheiva images, while another has been converted into a mosque [musjid], and a third forms the mutt [q.v.] of a Jangam priest. The large image of one of the Teertancarahs [q.v.] is seen cast outside the western gate, with its feet buried in the soil. According to tradition, a Chola king built a number of temples here and dug wells. Numerous inscriptions on stone in the Haleycannada character, headed by representations of the lingam [q.v.], the sun and the moon, and mutilated sculptures are seen scattered about the ruins of the old fort. Travellers' bungalow.

COVELONG (کولم - kollam, *Hind.*; கோவளம் - kóvalam, *Tam.*). Means a headland. Sanscrit name (nityakalyánapura), meaning daily marriage city. According to Bramins the native goddess is Comalammah. Also called Saudat bunder, or auspicious port, so called by Anwaroddeen [q.v.] the first nawaub of Arcot who built a fort there in 1745. Village, Port, Canal; Chingleput dist., Chingleput tal.; pop. 2,044; acres 486; lat. 12° 47′; long. 80° 18′; from Arcot E. 62 miles; from Chingleput E.N.E. 19½ miles; from Cuddalore N.E. 80 miles; from Madras S. 20 miles; from Sadras N.N.E. 20 miles; from Sydapett S.S.E. 17 miles. On the Coromandel coast [q.v.]. One of the earliest European settlements and formerly of strategical importance. The approach from the south and south-east is dangerous in consequence of a rocky shoal projecting upwards of a mile into the sea in that direction. In ancient times it was a town of a cautham [q.v.] or 10 miles, including Covelong, Tiravadam and Mauvellipore. See Seven pagodas. Going to ruin, it became a wilderness. Mahomedan accounts state that it was a shahar [q.v.] or great town, with many suburban adjuncts. They say a dead body of a holy person came ashore here enclosed in a chest with a writing that the body should be given a tomb [durgah], which was done. A mosque [musjid] was built in days of Nawaub Saudat oollah khan over tomb. Covelong was a Dutch settlement, and the Imperial east india company of Ostend built a fort, which has disappeared. The ruins now in existence belong to the Saudat bunder fort. Occupied in 1750 by the French by stratagem. In 1752 French garrison surrendered to Clive. The fortifications were then blown up. Covelong possesses a Roman catholic church, alms-house [lungarkhana], and orphanage founded and supported by grants from the DeMonte family, formerly rich merchants of Madras. The salt pans [ooppalam] to the west of the village are large, and there is some export trade in this article. Excellent oysters [anly] are found here.

COVID (കോവിടം - kovitam, *Mal.*). From covado, portuguese word for cubit. Cloth measure 15, 27, or 36 inches. Distinguish from Coovid.

COVOOR (కోవూరు - kóvúru, *Tel.*). From (kóyarádzu, tel. proper name + úru, tel. village). Village; Nellore dist., Nellore tal.; pop. 5,893; acres 5,546; lat. 14° 30′; long. 80° 02′; from Nellore N. 3½ miles; from the sea W. 13½ miles. One Coya raus while on pilgrimage to Benares encamped at this place, and afterwards built the village. Two temples of Codanda ramasawmy and Mullicarjoonasawmy, with annual festivals. An agricultural centre on the northern bank of the Pennair on the Nellore trunk road. Noted for manufacture of white handkerchiefs [roomaul] and turbans [puggry]. Good laterite [q.v.] stone is quarried.

COWITCH (कन्दुरा - kandurá, *San.*; کواچھ - kaváchh, *Hind.*; దురదగొండి - duradagondi, *Tel.*). Title from hindostany. San. means pungent, itching. Hind. from (kapikachhu, san. the plant). Tel. from (durada, tel. itching + gondi, tel. wretch). San. also (katóla). Tel. also (surutichettu). Cf. Pappily. Botanically the Mucuna genus, leguminosæ [vricsham, 48]. Well known in tropical countries from the character of seed-pods which are thickly covered with stinging hairs easily detached and causing irritation if they fall on body; all are twiners or tall climbers, with trifoliate leaves and long stalked often pendulous racemes of large purple white or yellow flowers, rising singly or in clusters from gland-like swellings; the pods are thick and leathery. The species best known to the natives are shown below. With natives also includes a Tragia.——*Buffalo cowitch* (గేదెదూలగొండి - gédedúlagondi, Tel.). Tel. from (géde, tel. buffalo + dúlagondi, tel. mucuna pruriens, dc.). Tel. also (tillakáda). Botanically Mucuna [cowitch] atropurpurea, dc., leguminosæ [vricsham, 48]. Alias Carpopogon atropurpurea. Perennial; leaflets ovate, acuminated; racemes drooping, long-peduncled, sometimes compound; pedicels long, slender, compressed; calyx-segments broadly-ovate, obtuse; legume oblong-oval, deeply furrowed along the sutures, obliquely plaited, two or sometimes one-seeded, copiously covered with brown stinging hairs; seed oval, more convex on the one side, and there furnished its whole length with the linear hilum; flowers large, dark-purple; flowering in february and march.——*Common cowitch* (आत्मगुप्ता - átmaguptá, San.; कुहिली - kuhilí, Mahr.; खवल्यावालि - khavalyávâli, Conc.; کواچھ - kaváchh, Hind.; کاچکری - káchkurí, Dec.; ಕಾಡವರೆ - kádavare, Can.; நாயிசொனகுபல்லி - náyisonaguballi, Too.; దూలగొండి - dúlagondi, Tel.; କାଇଞ୍ଚ - kaincho, Oor.; നായ്ക്കുരുണ - náykkuruna, Mal.; ආචාරියපලු - áchâriyápalu, Singh.; பூனைக்காலி - púnaikkáli, Tam.). San. from (átman, san. self + gup, san. to protect); having hidden properties. Hind. from (kapikachhu, san. the plant). Can. from (kádu, can. wild + avare, can. bean, dolichos lablab, linn.). Too. from (náyi, too. dog + sonagu, too. writhing + balli, too. creeper). Tel. from (dúla, tel. itching + gondi, tel.

wretch). Oor. from (kapikachhu, san. the plant). Mal. from (náya, mal. dog + kuruna, mal. the plant, jasminum pubescens, willd.). Singh. from (áchâriyá, singh. blacksmith + palu, singh. joint). Tam. from (púnai, tam. cat + kál, tam. foot); from grey hairs. San. also (kapikachhu), meaning monkey's itch; (markatí), meaning relating to monkey [indian burr]; (právrishâyaní), meaning growing in rainy season; (vánarí), meaning pertaining to monkey, from tawny hair on pod. Mahr. also (kavachakuirí), meaning armour + cowhage. Hind. also (kivánchh); (goncha). Dec. also (kánchkurí) [caunjory]. Can. also (turachi) [caunjory]; (náyisonaguballi), meaning dog + writhing + creeper. Tel. also (pilliadugu), meaning cat + foot; (tótadúlagondi), meaning garden + the plant. Mal. also (chorivalli), meaning itch creeper. Tam. also (púnaiyavarai), meaning cat + the plant, dolichos; (púnaippidukkan), meaning cat's testicles; from hairy pods. Title otherwise Cat bean, Cowhage, Donkey's eye, Flea plant, Horse-eye bean, Monkey's itch. Botanically Mucuna [cowitch] pruriens, dc., leguminosæ [vricsham, 48]. Alias Carpopogon pruriens; Dolichos pruriens; Mucuna prurita, utilis; Stizolobium pruriens. Annual, twining; branches pubescent or slightly hairy; leaves pinnately trifoliolate; leaflets ovate, upper side glabrous, under sprinkled with adpressed silvery hairs; racemes shorter than the leaves, drooping; pedicels shorter than the calyx; calyx cleft to the middle, white with adpressed hairs, segments broad-lanceolate; corolla papilionaceous; vexillum cordate, incumbent on the alæ, alæ oblong-linear, sometimes slightly cohering, keel straight below, slightly falcate in the upper part, terminated by an acute beak; legume slightly curved like an S; densely clothed with rigid stinging hairs, six-seeded; flowers large, dark purple, papilionaceous; common lofty climbing herb; flowering in the cold season. Root in infusion is given in cholera [vaunty bhaidy]; syrup thickened with the hairs till it is of the consistence of honey [shahad], is anthelmintic; the leaves are applied to ulcers, and the beans are aphrodisiac; a vinous infusion of the pods is remedy for dropsy; the seed absorbs the poison of scorpions; gives to pharm. hairs of pod, mucuna, mechanical anthelmintic, officinal. Pod eaten like any other bean [shimby].——*Elephant cowitch* (ఏనుగదూలగొండి - énugadúlagondi, Tel.; കാകവള്ളി - kákavalli, Mal.). Title from size. Tel. from (énuga, tel. elephant + dúlagondi, tel. mucuna pruriens, dec.). [negro-bean cowitch]. Mal. from (kákka, mal. crow + valli, mal. creeper). Tel. also (peddadúlagondi), meaning large + the plant, mucuna pruriens, dc. Botanically Mucuna [cowitch] gigantea, dc., leguminosæ [vricsham, 48]. Alias Carpopogon giganteum; Dolichos giganteus; Stizolobium giganteum. Climbing, perennial; leaflets ovate, acute adult ones glabrous; flowers almost umbellate, at the apex of long pendulous peduncles; pedicels long, slender; three lower segments of the calyx short, tooth-like, the other very short; legumes linear-oblong, deeply furrowed along the sutures, not plaited, armed with stiff, stinging hairs, three to six-seeded; seeds oval; flowers large, sulphur-colored. Bark, pulverised and mixed with dried ginger [q.v.] and other ingredients, rubbed over parts affected by rheumatism.——*Negro-bean cowitch* (मोतीकुहिली - mótíkuhilí, Mahr.; ಅನಿಪೆಬಳ್ಳಿ - anipeballi, Can.; ఏనుగదూలగొండి - énugadúlagondi, Tel.; பெரியதெள்ளுக்காய்ச்செடி - periyathellukkáyççedı, Tam.). Mahr. from (mótí, mahr. pearl + kuhilí, mahr. cowhage plant, mucuna pruriens, dec.). Can. from (anipe, can. negro bean + balli, can. creeper). Tel. from (énuga, tel. elephant + dúlagondi, tel. the plant, mucuna pruriens, dec.) [elephant cowitch]. Tam. from (periya, tam. big + tellu, tam. flea + káy, tam. fruit + shedi, tam. plant); highly irritating pods. Mahr. also (songarvi). Botanically Mucuna [cowitch] monosperma, dec., leguminosæ [vricsham, 48]. Alias Carpopogon monospermum; Mucuna anguina. Perennial; leaflets ovate, pubescent when young; racemes short, somewhat corymbiform, short-peduncled, drooping; pedicels long; lowest calyx-segments long-pointed, the others very short; legumes semi-oval, deeply furrowed along the sutures, obliquely plaited, one-seeded, covered with stinging hairs; seed kidney-shaped; flowers large, dark-purple; flowering in cold season. Pod eaten.——*Small cowitch* (చిన్నదూలగొండి - chinnadúlagondi, Tel.). Same as Small caunjory.

COWKAB (كوكب - kaukab, *Hind.*). Star [nacshatram].——*Cowkab i bakht* (كوكب بخت - kaukabibakht, Hind.). Means star of prosperity. Jehaungeer's large silver coin. Weight 50 tolahs.——*Cowkab i saad* (كوكب سعد - kaukabisaad, Hind.). Means auspicious star. Jehaungeer's small silver coin. Weight 5 tolahs.——*Cowkab i tauly* (كوكب طالع - kaukabitáli, Hind.). Means star of fortune. Jehaungeer's maximum silver coin. Weight 100 tolahs [naunyam].

COWLE (قول - kaul, *Hind.*). From (kála, ar. to say). A promise on the part of a superior. Especially a document granted to holder of land, specifying special terms of tenure. The special agreement is generally to pay a small but increasing rent for land for a certain number of years when it becomes liable to the same rent as other cultivated lands; sometimes to hold land for a term, subject to not touching trees thereon. See vol. I, 112.——*Cowl beera* (قول بيرة - kaulbírah, Hind.). From (above + biráh, hind. betel). Betel of contract. Mahomedan ceremony of giving betel [q.v.] to the nearest male relative of a girl at the time of betrothment, to obtain his consent.——*Cowle bazaar* (కౌలుబజారు - kaulubadzáru, Tel.). From (above + bázár, pers. market). Village; pop. 25,987, including cantonment. Suburb of Bellary containing the finest military market in Southern india.——*Cowledar* (قولدار - kauldár, Hind.). From (above + dár, pers. holder). A ryot [q.v.] holding lands on cowle. See vol. I, 112.

COWM (قوم - kaum, *Hind.*). Mahomedan sect. There are four principal called after their respective founders.——*Hambalee* (حنبلى - hambalí, Hind.). Hambalites, from founder Ibne hambal, chiefly found at Baghdad, in Arabia.——*Hanafee* (حنفى - hanafí, Hind.). Hanifites, from founder Aboo haneefa, found in Turkey and Usbec tartary; also all over India; comprising persons from four tribes Syed [q.v.], Sheikh [q.v.], Moghul [q.v.], and Pataun [q.v.].——*Malakee* (مالكى - málikí, Hind.). Malekites, from founder Malik bin ins, most prevalent in Barbary and other parts of Africa.——*Shahfayee* (شافعى - sháfaí, Hind.). Shafeites, from founder Aboo abdoollah shahfayee; frequent in Southern india; comprising the Navayats [q.v.] and Lubbays [q.v.].

COWNDINYAN (कौण्डिन्य - kaundinya, *San.*). A divine sage and originator of a gotram [q.v.].——*Cowndinyanuddy* (కౌండిన్యనది - kaundinyanadi, Tel.). From (above + nadí, san. river). Otherwise Goodiyattam river. River; North arcot dist., Goodiyattam, Poonganore, Pulmanair tals. Receives in Goodiyattam talook the surplus of the Dundapully tank, fed by a Mysore river and several other streams and falls into the Palaur.

COWRAVA (कौरव - kaurava, *San.*). From (kuru, san. ruler so named). The descendants of Cooroo [mahabhaurat]. An inferior race in the Peninsula are known as Cooroos; and Teloogoo pariahs are by some called Cowrava jauty. There has been some confusion between the Hindoo and Dravidian terms.

COWRY (كوڑى - kaurí, *Hind.*; గవ్వ - gavva, *Tel.*; கவடி - kavadi, *Tam.*). From (kaparda, san. shell used as a coin). Tam. also (palagarai). A small shell, the Cypræa moneta of naturalists. Small, white, or yellow kinds found on the shores of the Laccadive and Maldive islands, &c. The commoner kinds still pass current as coin in payment of fractional parts of a pice in the Ceded districts [q.v.]. There is a Hindostany proverb:— غريب كو كوڑى اشرفى هى—"A cowry is a gold mohur [q.v.] to "a pauper." A currency table is as follows:—26 cowry = 1 damree; 1 damree = 3 daums; 25 daums = 1 pice. But the pieces are mostly imaginary. With cowries the women of the lower orders form bracelets and other ornaments. Also sewed like buttons on their dress by Brinjarry women. The title-word is also another form of Cauvady [q.v.], by corruption.

COWSHIKY (కౌశిక - kaushika, *Tel.*). From (kaushika, san. sage of that name). River; Godavery dist., Amalaupooram tal. Branches off from the Gowtamy near Mundapully and falls into the sea near Bendamoorlunka after flowing through Amalaupooram, Gangalcoorroo, Indoopully, &c. Not navigable. Dry during part of year.

COY (కాయ - káya, *Tel.*; കായ - káya, *Mal.*; காய் - káy, *Tam.*). Unripe fruit [pazham]. Plant second term. Ex., where transl. is of first term:—Acacia concinna (chínikkáya), cleaning; Anamirta cocculus (pollakkáya), blister; Averrhoa bilimbi (puliççakkáy), sour; Benincasa cerifera (parangikkáy), portuguese; Capsicum annuum (milagáy), pepper; Cucumis melo, var. momordica (peddakáya), large; Cucurbita maxima (arasánikkáy), king; Grewia microcos (kottakka), kernel; Lagenaria vulgaris (gubbakáya), round. See gloss. paragraphs.——*Coy dhaunyam* (காய்த்தானியம் - káyttániyam, Tam.). From (above + dhánya, san. grain). Pulses, all sorts of seeds contained in pods or legumes [dholl]. Distinguished from cathir dhaunyam or ear grain or cereal [dhaunyam].

COY (കൊഴു - kozhu, *Mal.*). Ploughshare [caur].——*Coy laubham* (കൊഴുലാഭം - kozhulábham, Mal.). From (above + lábha, san. profit). A tenant's profit after deducting, expenses of cultivation and proprietor's share. Cf. Coodivauram.——*Coyoovan* (കൊഴുവൻ - kozhuvan, Mal.). From (above + an, mal. suffix, having). A tenant.——*Coy panayam* (കൊഴുപണയം - kozhupanayam, Mal.). From (above + panayam, mal. mortgage). Another name for Caripanayam, usufructuary mortgage [panayam].——*Coy punnam* (കൊഴുപണം - kozhupanam, Mal.). From (above + panam, mal. money). Two fanams given by tenant to proprietor in exchange for a piece of iron, typifying the ploughshare, concurrently with a deed by which he engages to improve the produce of the estate that he temporarily occupies.

COYI (కోయి - kóyi, *Tel.*): The name of the Gonds among themselves. Compare Coo similarly for the Khonds.

COZHY (கோழி - kózhi, *Tam.*). Means cock. Another name of Warriore; and Cozhy vendan is a chola king as ruler of Warriore. Gives its name to coins [naunyam], figure of cock stamped. For the gallinaceous fowl see Moorghy and Jungle fowl.

CRAB OIL PLANT (परुष - parusha, *San.*; كرپا - karapa, *Malay*; කඩොල් - kadol, *Singh.*; கண்டலங்காய் - kanda-

langáy, *Tam.*). Title corruption from malay. San. means knotted. Tam. from (kandal, tam. rhizophora + káy, tam. fruit); from resemblance of fruits. Title otherwise Indian wooden pomegranate. Botanically Carapa moluccensis, lam., meliaceæ [vricsham, 36]. Alias Carapa obovata; Xylocarpus granatum. Generic from malay. Tree; leaves abruptly pinnated, leaflets two-pair, elliptical, obtuse, entire; calyx four-cleft; petals four, reflexed; stamen tube eight-cleft at the apex, the segments two-parted; style short, with a broad concave stigma; fruit spherical, six to twelve-seeded, the pericarp splitting into four valves; seeds angled, with a spongy integument; flowers small, yellowish; native of malabar, common. Fat expressed from seeds. Gives a clear, brown, brittle resin [raul]. Oil used as hair-oil and for burning purposes. Wood white, turning red on exposure, hard; used for house-posts, handles of tools, wheel spokes, boats; stands brackish water better than saul [q.v.].

CRAMAM (क्रम - krama, *San.*). From (kram, san. to move). Motion. Order, regularity. Crama vazhakk or dauvah [q.v.] is regular suit. In astronomy declination [craunty].——*Cramajyay* (क्रमज्या - kramajyá, San.). From (above + jyá, san. sine). The sine of a planet's declination. Paramaupama cramajyay, from (paramápama, san. the greatest declination) is the sine of planet's greatest declination [crauntijyay, jyotisham].

CRANGANORE (കൊടുങ്ങല്ലൂർ - kotunnallúr, *Mal.*). From (kóta, mal. west + kóvil, mal. palace + úr, mal. village) [coda, cooda]; western capital of the cheras, probably distinguishing it from caroor their eastern capital. Mal. also (allúr), meaning dark village, formed perhaps by analogy after caroor, the eastern capital of the cheras; also (kurumbálaya), meaning coorumba deity + temple. Sanscrit name (mahádévapura), means city of shiva the great god; also (kótilingapurí), means crore + phallic emblem of shiva + town; also (shríkótarapurí), means prosperity + cave + town. Greek μούζιρις; from mooyiricode which is the old name of krishnancottah, just opposite to cranganore. Muziris primum emporium Indiae of Pliny.—"*a*" Talook, Cochin state; pop. 20,950. Boundaries:—north Moocoondapooram talook, east Moocoondapooram talook and Travancore territory, south Ayicottah river, west the sea. The talook forms the territory of the Cranganore chief. The line of the Rajahs is still extant. They found their claim to this territory as having been granted to their family by Cherma permaul, the chief of whose guard was their ancestor. The affairs are managed by Cochin. Principal places:—Ayicottah and Cranganore.—"*b*" Town, Talook head-quarters, Port; Cochin state, Cranganore tal.; pop. 10,011; lat. 10° 12′; long. 76° 15′; from Bangalore S.W. 211 miles; from Bombay S.E. 648 miles; from Calicut S.S.E. 75 miles; from Cannanore S.S.E. 126 miles; from Chittoor S.W. 50 miles; from Cochin N. 16 miles; from Ernacolum N.N.W. 16 miles; from Madras S.W. 341 miles; from Mangalore S.E. 207 miles; from Paliport N.N.E. 5 miles; from Trichore S. 22 miles; from Tripoontora N.N.W. 20 miles. Pliny says:—"To those bound for India, it is most convenient to depart "from Okelis. They sail thence with the wind Hipyalus in forty "days to the first emporium of India, Muziris, which is not a "desirable place to arrive at on account of pirates infesting the "neighbourhood, who hold a place called Nitrias, while it is not "well supplied with merchandize. Besides, the station for ships "is at a great distance from the shore, and cargoes have both to "be landed and to be shipped by means of small boats. There "reigned there when I wrote this Caelobothras [keralapootran]. "Another port belonging to the nation is more convenient, "Neacyndon, which is called Becare [cullada]. There reigned "Pandion [paundyan] in an inland town far distant from the "emporium called Modura [madura]. The region however from "which they convey pepper to becare in boats formed from "single logs is Cottonara [cadatnaud]." The Periplus says:—"To the kingdom under the sway of Keprobotras [keralapoot-"ran] Tundis [cadaloondy] is subject, a village of great note "situate near the sea. Mouziris, which pertains to the same "realm, is a city at the height of prosperity, frequented as it is "by ships from Ariakê and Greek ships from Egypt. It lies near "a river at a distance from Tundis of five hundred stadia, whether "this is measured from river to river or by the length of the "sea voyage, and it is twenty stadia distant from the mouth "of its own river. The distance of Nelkunda [cullada] from "Mouziris is also nearly five hundred stadia, whether measured "from river to river or by the sea voyage, but it belongs to a "different kingdom, that of Pandion. It likewise is situate near "a river and at about a distance from the sea of one hundred and "twenty stadia." Ariake is the Mahratta country [maharashtram]. Cranganore is situated on the Alwye river, which has a bar at the entrance, with 5 or 6 feet of water; inside there are 14 or 16. Till 1314, when Vypeen harbour was formed, Cranganore was the only opening in the backwater [cauyal] and outlet for the Periyaur and it must at that time have been the best harbour on the coast. The traditions of Jews, Christians, Bramins, and of the Keraloputty, agree in making Cranganore the residence of the Permauls and of the first resort of western shipping. It was the seat of government of Cherma permaul, A.D. 341, and the earliest settlement of Jew and Christian immigrants. Jews now there claim to have been residents since A.D. 378. The section of Jews known as White jews, claim a peculiar connection with Cranganore. According to their account, their ancestors escaped from Jerusalem at the time of its final destruction, and the descendants of the fugitives made their way to the west coast of India, where, in the year of the world 4250 or 490 of the Christian era, the local ruler granted them a settlement at Cranganore, where they were joined by others of their nation, and in which place they remained about a thousand years; but, as one of their number stated, "discord arising "among ourselves, one of our chiefs called to his assistance an "Indian king, who came upon us with a great army, destroyed "our houses, palaces and strongholds, dispossessed us of Cranga-"nore, killed part of us, and carried part into captivity." The present Jewish synagogue is two centuries old. Christians have been here during the whole of the Christian era. Cranganore is prominent in all narratives earlier than the sixteenth century, especially in connexion with the Malabar christians, and it was the site of one of the seven churches founded by St. Thomas and the first place at which he labored, about A.D. 52. The names of the seven churches were Cauyal, Collam, Cottacauyal, Cranganore, Gokkamungalam, Niraunam, Paulore. In all of these except Cauyal and Cranganore, churches still exist. A colony of Syrian christians then settled here in A.D. 345, and their establishment continued to prosper until they invoked the aid of the Portuguese in 1502. The latter forced the greater part of them to acknowledge the authority of the Papal see which is exercised by the Bishop of Cranganore and Vicar-general of Malabar. Cranganore was already in decay when the Portuguese arrived. They eventually established themselves with a strong fort in 1523, which they enlarged in 1565 and which the Dutch took from them in 1662. The Dutch purchased the site from the Cranganore rajah, lost it to Tippoo in 1776, recaptured it in 1778, but sold it again in 1789 to Tippoo. The fort was dismantled by Tippoo's troops in 1790, and there is now hardly a trace of it left. The place was ceded to the British at the general pacification which closed the war provoked by the Sultan's attack on Travancore. The present town consists of two villages, Mettala and Lakmaleshwaram. In the latter are the ruins of old pagodas [q.v.]. Amongst others is that of Bhagavaty, where the feast of Bharany [pundigay, 5c] is held in March. The remains of the ancient watch-tower, and the palace of the titular rajah of Cranganore, are of interest. A Portuguese tomb, dated A.D. 1551, was lately discovered here. Shuncaracharry [shuncaran], the Sheiva reformer, was born near here.—"*c*" Backwater; Cochin state, Cranganore tal.; lat. between 10° 12′ and 10° 15′; long. 76° 15′ and 76° 17′; from Cranganore E. 1 mile. Is the estuary of the Carvanore river.

CRAUCA (క్రాక - kráka, *Tel.*). From (kragu, tel. to become hot). Heat. Suffix in place names; as Bramhanacrauka, hot place inhabited by bramins. Generally near a rock or hill.

CRAUNTY (क्रान्ति - kránti, *San.*). From (kram, san. to go). Astronomical declination [cramam]. The declination of a celestial body is its distance from the equinoctial [naudy mundalam]; if the body is on the north side of the equinoctial, it has north declination; but if on the south side, south declination. Or, it is the arc of a celestial meridian, or circle of declination, contained between the object and the equinoctial. The equinoctial being merely the projection of the terrestrial equator [niracsham], declination corresponds with terrestrial latitude [acsham]. Parallels of declination are small circles parallel with the equinoctial.——*Crauntam* (क्रान्त - kránta, San.). From (kram, san. to go). Conjunction [sangamam]. The Crauntam of any planet [graham] is when it is in conjunction with the moon [chundran], as the time of new moon [amavausyay] is the sun's own Crauntam. Mars [coojan], Saturn [shany], Rahoo ☊ [q.v.] and Kait ☋ [q.v.], have a bad influence in Crauntam, and mark unlucky days. The other planets have also their Crauntam, but being innoxious they are not noticed in the Punchaungam [q.v.].——*Crauntijyay* (क्रान्तिज्या - krántijyá, San.). From (above + jyá, san. sine). The sine of the declination [cramajyay].——*Craunty bhaugam* (क्रान्तिभाग - krántibhága, San.). From (above + bhága, san. part). The declination of a point of the ecliptic.——*Craunty coty* (क्रान्तिकोटि - krántikóti, San.). From (above + kóti, san. complement). Co-declination.——*Craunty mundalam* (क्रान्तिमण्डल - krántimandala, San.). From (above + mandala, san. great circle). The ecliptic. That is to say the great circle representing the sun's apparent but the earth's real path of annual revolution [bhaganam] in the heavens. The plane of the earth's orbit [cacsham] is inclined to the plane of the equator [naudy mundalam] at an angle, called the obliquity of the ecliptic, of 23° 27½′. The ecliptic is divided into twelve equal parts, of 30 degrees each, called signs [raushy]; a belt in the heavens extending 8 degrees on each side of the ecliptic is the solar zodiac [raushy chuckram]. The point of the ecliptic where the sun crosses from the south to the north side of the equator is the first point of Aries; and where it crosses from the north to the south side, the first point of Libra. These are also the equinoctial points [craunty pautam], occurring about 21st of March and 23rd of September, when days and nights are of equal length throughout the world. The real constellations [nacshatram] have to be distinguished from the artificial signs of the zodiac or ecliptic, for, owing to a slow motion of the

equinoctial points produced by the attraction of the sun, moon, and planets, upon the spheroidal figure of the earth, the longitude [sauyanam] of the fixed stars is increased at the present rate of about 50·1 seconds annually, the equinox having a retrograde motion from east to west to that amount. This is precession of equinoxes [ayanaumsham], and a complete revolution occupies 25,868 years. About 2,000 years ago the position of the vernal equinox [maishauyanam] coincided with the constellation Aries [maisham], but on account of precession this point is now in the actual constellation Pisces [meenam]. It is still customary to call the point of the spring equinox the first point of Aries. The autumnal equinox [toolauyanam] is similarly the first point of Libra [toolaum]. Cf. mausam (1), b. The obliquity of the ecliptic is considered by Hindoos to be constantly 24°; it is somewhat surprising that those who were able to discover though imperfectly the precessional variation, for they make it 54 seconds, should not have suspected the diminution of the obliquity.——*Craunty pautagaty* (क्रान्तिपातगति krántipátagati, San.). From (above + páta, san. falling + gati, san. going). Literally the motion of the nodes of the ecliptic; precessional variation.——*Craunty pautam* (क्रान्तिपात - krántipáta, San.). From (above + páta, san. falling). The nodes of the ecliptic, or the equinoctial points [jyotisham].

CREYAT (کریات - kiryát, *Dec.*). Title corruption from (kiráta, san. mountaineer), as growing on hills. Same as Chiretta.

CROE (کروہ - kroh, *Hind.*). From (krósha, san. the distance). Same as coss.

CRONNAUD (క్రొన్నాడు - kronnádu, *Tel.*). From (krotta, tel. new + nádu, tel. country). Old name of Amravatty country.

CRORE (کرور - karor, *Hind.*). From (kóti, san. the number) [coty]. 100 lakhs [q.v.] of anything or 10 millions. In Persia, the crore is only five lakhs, 500,000. Crory was a collector of revenue with Mahomedans.

CROREMUND (ಕ್ರೂರಮಂದು - krúrmandu, *Can.*). From (kurumai, tam. littleness + úr, tam. village + mande, can. fold). Village, Neilgherry dist., Todanaud division; lat. 11° 24′; long. 76° 38′; from Ootacamund W. 7½ miles. On the Pycarrah river. Bungalow, built in January 1862, is in ruins.

CROSHAM (क्रोश - krósha, *San.*). From (krush, can. to cry). Distance at which a cry may be heard [coovid]. Indian league. 2,000 dandams = 1 crosham; 4 croshams = 1 yojanam [alavay, 1 f]. Approximate actual value, 1 crosham = 2¼ miles. Same as Hind. coss, croe, Can. hardaury, Tel. pargoo.

CROW (کوا - kavvá, *Hind.*). Prefix [caurvam].——*Crow creeper* (अपराजिता - aparájitá, San.; शंखपुष्पी - shankhapushpí, Mahr.; शंखपुष्पि - shankapushpi, Conc.; نبات بیخ حیات - nabátibíkhihayát, Ar.; درخت بیخ حیات - darakhtibíkhihayát, Pers.; کوا تھینتھی - kavváthenthí, Hind.; گھٹی کی جڑ کا جھاڑ - ghuttíkíjarkájhár, Dec.; ಶಂಖಪುಷ್ಪ - shankhapushpa, Can.; ಶಂಕ - shanka, Too.; దింటెన - dintena, Tel.; ശംഖപുഷ്പം - shankhapushpam, Mal.; කටරොළු - katarolu, Singh.; காக்கணம் - kákkanam, Tam.). Title from dark flowers. San. from (a, san. negative prefix + paráji, san. to be defeated). Mahr. from (shankha, san. conch + pushpa, san. flower). Ar. from (nabát, ar. tree + bíkh, ar. root + hayát, ar. life). Pers. from (darakht, pers. tree + bíkh, ar. root + hayát, ar. life). Hind. from (kavvá, hind. crow + thenthí, hind. ball).* Dec. from (ghuttí, hind. purgative + jar, hind. root + jhár, hind. tree). Can. from (shankha, san. conch + pushpa, san. flower). Mal. from (shankha, san. conch + pushpa, san. flower), from shape of flowers. Tam. from (kákkai, tam. crow + anangu, tam. beauty); from crow dark flowers. San. also (gavákshí), meaning cow's eye; (rómavallí), meaning hair creeper; (vrishapádí), meaning bull-footed; (khadiraká), meaning firm; (aparájiká), meaning unconquered; (nílagirikarní), meaning blue + mouse ear; (girikarní), meaning mouse ear. Mahr. also (gókarni), meaning cow's ear. Ar. also (mázariúnihind), meaning indian daphne mezereum, linn.; from its diuretic and purgative properties. Hind. also (aprájita), meaning unconquered; (visnukrantí); (khágin), meaning female corby; (sufedaparájitá), meaning white variety. Dec. also (phíkekíjarkájhár), meaning insipid root tree. Tel. also (nalladintena), meaning black + the plant; (telladintena), meaning white + the plant. Mal. also (shankunkuppi), meaning conch + bottle; (kákkanámkodi); (áral). Singh. also (nilkatarolu), meaning blue + crow creeper; (sudukatarolu), meaning white + crow creeper. Tam. also (kákkattán), meaning crow [kaladana]; (karuvilai), meaning blackness + to grow; (karisanni); (káválai), meaning fruit + gynandropsis pentaphylla, dec.; (karudakkóvai), meaning braminy kite + cephalandra indica, naud., cf. Braminy kite caper; (karudathondai), meaning braminy kite + indian caper; (vellaikkákkattán), meaning white + the plant. Title otherwise Blue mouse ear, Braminy kite caper, Bull's foot, Conch flower, Cow's ear, Cow's eye, Crow's beak, Hair creeper, Indian daphne, Life root tree, Mouse ear, Mussel-shell creeper, Wing-leaved clitoria. Botanically Clitoria ternatea, linn., leguminosæ [vricsham, 48]. Alias Clitorea spectabilis; Lathyrus spectabilis; Ternatea vulgaris. Climbing herbaceous plant; calyx five-cleft; leaves unequally pinnated; leaflets two to three pairs, oval or ovate; stem pubescent, peduncles short, axillary, solitary, one-flowered; bracteoles large, roundish; flowers resupinate; legumes slightly pubescent, one-celled, many-seeded; flowers white or blue; flowering all year; common in woods of malabar. The fresh root is white, fleshy, often one inch or more in diameter, but pieces the size of a quill are preferred, it has an acrid taste; the root bark is soft, thick and fibrous and easily separated; the central portion of the root is composed of very large pitted vessels easily visible to the naked eye. The seeds are rather more than two-eighths of an inch long and resemble vetch seeds; they are mottled green and black; the testa is hard and contains two cotyledons made up of relongated thin-walled cells full of large starch granules; they have an acrid, bitter taste. Flower sacred to doorga [q.v.]. Seeds cathartic; the powder of the roasted seeds in drachm doses is a good purgative, substituted for british rhubarb and jalap [q.v.]; root demulcent, diuretic, and laxative; the fresh root or root-bark, in doses from one to two drachms, in infusion, relieves the irritation of the bladder and urethra and acts at the same time as a diuretic and laxative; the root is given in substance ground into powder in cases of croup, it sickens and sometimes produces vomiting, the dose is half a pagoda [q.v.] weight for a child of two or three years old; gives to pharm. seed and root-bark, non-officinal. A blue-dye is procured from corollas, but not permanent. There are three or four varieties:—one with flowers deep indigo blue; one azure blue; one pure white; one with double flowers. No other common species here.——*Crow pheasant* (चकोर - chakóra, San.; تذرج - tazraj, Ar.; تدرو - tadrau, Pers.; مہوکھا - mahokhá, Hind.; ಕಳ್ಳಿಕಾಗಿ - kallikági, Can.; జెముడుకాకి - jemudukáki, Tel.; ചെമ്പോത്തു - chempóttu, Mal.; கள்ளிக்காக்கை - kallikkákkai, Tam.). Title from appearance. San. from (chak, san. to be satisfied). Can. from (kalli, can. milk-hedge + kági, can. crow). Tel. from (jemudu, tel. euphorbia tirucalli, l. + káki, tel. crow). Mal. from (chem, mal. red + póttu, tam. indian cuckoo). Tam. from (kalli, tam. euphorbia tirucalli, l. + kákkai, tam. crow). Tam. also (shembugam). Title otherwise Coucal. Centropus rufipennis centropodinæ, cuculidæ [cokam], scansores, insessores [pacshy, 15], of naturalists [jantoo]. Alias Centropus bubutus, castanopterus, philippensis, pyrrhopterus. Whole head, neck, lower back, upper tail-coverts, and all under-parts richly empurpled black; tail glossed with green; upper part, back and wings bright deep rufous bay; legs black; very common; call is a 'whoot,' repeated slowly; when alighting on a tree, it raises its tail over its back. Lesser indian coucal is Centropus viridis; rare.

CROWNCHAM (क्रौञ्च - krauñcha, *San.*). From (kruñch, san. to move crookedly); from peculiar motion. Heron [paddy bird] or curlew [deergha chanchoocam].——*Crownchateev* (கிரௌஞ்சத்தீவு - kirauñjattívu, Tam.). From (above + tívu, tam. island). Sanscrit name (krauñchadvípa), meaning the same. Island; Tinnevelly dist., Ottapidauram tal.; lat. 8° 46′; long. 78° 14′; from Ottapidauram S.E. 16 miles; from Tinnevelly E. 35 miles. Has on it remains of a fort and other buildings. Is within the harbour of Tuticorin near the Devil's point.

CSHANAM (क्षण - kshana, *San.*). Means a glance. Twinkling of the eye. Measure of time. 2 ghaticams or indian hours = 1 cshanam or double hour, 30 cshanams = 1 dinam or day. Approximate actual value, 1 cshanam or double hour = 48 English minutes. Same as moohoortam [caulam, 2]. Same term appears also in other values.

CSHATRAM (क्षत्र - kshatra, *San.*). From (kshi, san. to govern). Dominion.——*Cshatriya* (क्षत्रिय - kshatriya, San.). The χατριαῖοι of Ptolemy, who located them towards Rajpootana. The second or military and regal caste of the Aryans [q.v.]. Said represented in modern times in a way by Rajpoots [q.v.]. Said to have been produced from the breast or arms of Bramha. Their duty was to protect the earth, the cattle, and Bramins. Kings, governors, and all intrusted with civil and military affairs in general belonged to the Cshatriya caste. Parshooraman vowed that he would extirpate the whole Cshatriya race, and thrice seven times, says the Vishnoo pooraunam, he cleared the earth of them; a legend which intimates probably a violent and protracted struggle between the Bramins and Cshatriyas for domination in India. Some northern zemindars call themselves Cshatriyas. Bhatrauz, Bondily, Condarauz, Rauz, are classes who claim a Cshatriya origin [jauty].

CSHAYAM (क्षय - kshaya, *San.*). From (kshi, san. to wane). Waning.——*Cshaya samvatsaram* (क्षयसंवत्सर - kshayasamvatsara, San.). From (above + samvatsara, san. year). A lunisolar year with two intercalary months and one expunged month [mausam].——*Cshaya tity* (क्षयतिथि - kshayatit'hi, San.). From (above + tit'hi, san. day). An expunged lunar day [tity].

CSHEERAM (क्षीर - kshíra, *San.*). From (ghas, san. to eat). Milk [paul, sheer].——*Csheericay* (क्षीरिका - kshíriká, San.). Means milky tree. Monkey-face plants. Botanically the Mimusops genus, sapotaceæ [vricsham, 82]. Large milky juiced trees with thick entire smoothed leaves and clusters of small white often sweet smelling flowers thought to resemble face of monkey; the fruits are globose or ellipsoid with one or two hard smooth seeds marked with a small egg-shaped scar; several

species yield hard, durable and very heavy timber. The species best known to the natives are:—elengi [ilanjy], hexandra [monkey-face paulay], kauki [edible paulay], roxburghiana [jointed paulay].

CSHETRAM (क्षेत्र - kshétra, *San.*). From (kshi, san. to dwell). Soil; field; superficies; plane figure in geometry; place; body [shareeram]; sacred place [teertam]; in malayalam temple. ——*Cshetra ganitam* (क्षेत्रगणित - kshétraganita, San.). From (above + ganita, san. calculation). Geometry. Sixth book of a well-known Ganitam or mathematics. It treats of superficial measurements or land measuring, of the terms used in the science of measures, of the mode of measuring, of casting up accounts, and of allowances to be made in measuring, &c.—"*a*" The fundamental measure is the inch [ungoolam]. Twelve of these inches are one jaun [q.v.] or span. Sixty-four jauns are one gada or bamboo. Four gadas by which is understood one square bamboo is a coonta [q.v.]. The following is a table showing the sub-divisions of the coonta expressed as mere aliquot parts:—

1 Coonta, or say 4,000 country square feet, is equal to	2 Ara coontas.
	4 Pautica.
	8 Paraca coontas.
	16 Veesam coontas.
	32 Ara veesam coontas.
	64 Cawny veesam coontas.
	128 Ara cawny coontas.
	256 Para cawny coontas.

To find the number of coontas in a square, add the number of bamboos of two opposite sides, multiply the amount by that of the two other opposite sides likewise added together, and divide the product by four; the quotient will be the number of coontas which the square contains; or take half the amount of two of the opposite sides, and multiply it by half the amount of the two others, the product will be the number of coontas. The following is a table for finding out the area of a piece of ground below the size of a coonta:—

Length of the field.	Breadth.	Area.
½ bamboo or 32 feet	½ bamboo or 32 feet is	1 pautica coonta or ¼ coonta.
½ Do. 32 „	¼ Do. 16 „	1 paraca coonta or ⅛ coonta.
½ Do. 32 „	⅛ Do. 8 „	1 veesam $\frac{1}{16}$ coonta.
½ Do. 32 „	$\frac{3}{16}$ Do. 12 „	1 Do. ara coonta or $\frac{3}{32}$.
½ Do. 32 „	$\frac{1}{16}$ Do. 4 „	1 ara veesam $\frac{1}{32}$.
¼ Do. 16 „	¼ Do. 16 „	1 veesam $\frac{1}{16}$.
¼ Do. 16 „	$\frac{1}{16}$ Do. 4 „	1 cawny $\frac{1}{64}$.
¼ Do. 16 „	$\frac{1}{64}$ Do. 1 „	1 para cawny $\frac{1}{256}$.
¾ Do. 48 „	¾ Do. 48 „	9 veesam coontas $\frac{9}{16}$.
¾ Do. 48 „	$\frac{3}{16}$ Do. 12 „	2 veesam coontas and 1 cawny coonta or $\frac{9}{64}$.
¾ Do. 48 „	⅛ Do. 8 „	1 veesam coonta and 2 cawny coontas or $\frac{6}{64}$.
¾ Do. 48 „	$\frac{1}{16}$ Do. 4 „	3 cawny coontas or $\frac{3}{64}$.
¾ Do. 48 „	$\frac{3}{64}$ Do. 3 „	2 cawny coontas and 1 para cawny coonta or $\frac{9}{256}$.
¾ Do. 48 „	$\frac{1}{32}$ Do. 2 „	6 para cawny coontas or $\frac{6}{256}$.
¾ Do. 48 „	$\frac{1}{64}$ Do. 1 „	3 para cawny coontas or $\frac{3}{256}$.
¾ Do. 48 „	$\frac{1}{128}$ Do. ½ „	1½ Do. $\frac{3}{512}$.
$\frac{3}{16}$ Do. 12 „	$\frac{3}{16}$ Do. 12 „	9 Do. $\frac{9}{256}$.
⅛ Do. 8 „	⅛ Do. 8 „	1 cawny coonta or $\frac{1}{64}$.
$\frac{1}{16}$ Do. 4 „	$\frac{1}{16}$ Do. 4 „	1 para cawny coonta or $\frac{1}{256}$.
$\frac{1}{64}$ Do. 1 „	$\frac{1}{64}$ Do. 1 „	1 gocara cawny coonta or $\frac{1}{4096}$.

Dwisamam is a quadrilateral figure where two sides are of equal and two others of different lengths; for this multiply the longest of the four sides by either of the adjoining sides, do the same with the two remaining sides; add the products; half this sum is the area required. Vishamam is a quadrilateral, all the sides of which are of different lengths; for this add the two smallest sides, and multiply half their amount by the longest, the product is the area. Samam is an equilateral parallelogram; for this take half the length of two opposite sides, and multiply it by half the amount of the other sides; the product will be the area required. Ayatam is an oblong rectangle; calculate this as for samam. Trisamam is a quadrilateral, three sides of which are of equal lengths; calculate this as for samam and the next, mookonam. Mookonam is a triangle, of which there are three different kinds; in this multiply the base by half the perpendicular height or the perpendicular height by half the base, the product is the area. Valayaucrity is the circle [chuckram, mundalam]; in this multiply the diameter by three, the product will be the circumference [paridhy]; multiply half the circumference by the radius, the product is the area; or multiply the circumference by the diameter, deduct a fourth part of the product, the remainder is the area. Maddalaucrity and damaroocaucrity are drum-shaped figures, like drums with convex and concave sides respectively; for these double the diameter going through the middle, add to it the diameter of the two extremities, divide the amount by four, multiply the quotient by the diameter of the length, the product gives the area. Ardha chundricay is the crescent moon; for this add the chord [chaupam] to the greatest width of crescent, multiply the amount by the same width, half the product is the area. Chunk [q.v.] is the conch figure; for this deduct half the amount of the short diameter from the long diameter, square the remainder; do the same with half of the short diameter, and add the two products together; multiply the amount by three; divide this product by four; the quotient is the area. Locoony [q.v.] is a piece of ground in the middle of a field, and for some reason to be deducted from the whole; if these be quadrilaterals, measure them according to the rules already given, and deduct them from the field in which they are comprised; the same rule applies to the velicoony or piece of ground lying on one or more sides, and to be deducted.—"*b*" The following is a common table in teloogoo country for beeja pramaunam or seed measure showing the amount ordinarily taken by one pootty [q.v.] or 7½ acres of land, and the produce thence ordinarily arising:—

Name of crop.	Quantity of seed.	Produce.
Sugar-cane	19 Candies.	1000 Mds. of sugar.
Common chilly	4 Coonchams.	30 Candies.
Telinga potato	7 Candies.	70 „
Country saffron	9 „	90 „
Sweet potato	9 „	80 „
Paddy	60 Coonchams.	30 „
Cholum	3 „	25 „
Raggy	5 „	20 „
Gingelly	5 „	15 „
Indian cotton	12 „	30 „
Shaumay	5 „	15 „
Bajrah	5 „	20 „
Green gram, black	12 „	10 „
Black gram	10 „	10 „
Green gram	12 „	6 „
Country bean	10 „	5 „
Aumanac	10 „	8 „
Bengal gram	10 „	6 „
Madras horse gram	12 „	8 „
Guar	10 „	5 „

—"*c*" The following are the number of plants generally found on one pootty or 7½ acres of land:—tobacco [pogauk], 1,200; cocoanut [q.v.], 400; mango [q.v.], 200 [ganitam, shastram].

CSHITY (क्षिति - kshiti, *San.*). From (kshi, san. to dwell). Earth [bhoomy].——*Cshitijam* (क्षितिज - kshitija, San.; افق - ufak, Hind.). From (above + jan, san. to be born). Horizon. The sensible horizon is a plane conceived to touch the earth at the point where the observer is situated, and meeting the celestial sphere [golam] in a circle; but when the observer is elevated above the earth's surface, the limit of his view is the visible or apparent horizon; and the angle between the visible and sensible horizons is the dip. A great circle of the sphere passing through the centre of the earth, and parallel with the sensible horizon, is the rational horizon. To the horizon circle, which is the only apparent one, almost all the celestial motions are referred; it is the common termination of day and night; and it marks out the times of the rising and setting of the sun and stars [jyotisham].

CUBBALDROOG (ಕಬ್ಬಾಲ್ದುರ್ಗ - kabbáladurga, *Can.*). Hill-fort in Malvully talook, Mysore district. Formerly used as a penal settlement under Hindoo and Mussalman dynasties on account of its pestilential climate; now uninhabited.

CUBBANY (ಕಬ್ಬನಿ - kabbani, *Can.*; കബ്ബനി - kabbani, *Mal.*) From sanscrit. Sanscrit name (kapiní), meaning ape river; also (kapilá), meaning reddish brown river. River. Tributary of Cauvery. Rises in W. ghauts [q.v.] and flowing easterly through Mysore district falls into Cauvery near Narsapore. The confluence is of great sanctity. Two tributaries feed it from south, the Noogoor and Goondal. It is perennial, averaging from 150 to 200 yards in width. It and tributaries drain nearly whole of N. and S. wynaud, but beds being rocky and shallow no traffic beyond floating timber.

CUDDALORE (گولر - gúlár, *Hind.*; கூடலூர் - kúdalúr, *Tam.*). From (kúdal, tam. junction + úr, tam. village); junction of the paravanaur and the guddilam. Also called Tegnapatam. Mahomedan name (islámábád), meaning safety + city. The European fort is Fort St. David.——**(1)** Talook, South arcot district. Tahsildar's pay Rs. 225; area 448 square miles; pop. 337,303. Language Tamul. E. coast of district. Boundaries:—north, French territory and Villoopooram talook; east, Bay of Bengal; south, Chidambaram talook; west, Vriddhauchellam and Tricalore talooks. Physical aspect generally flat. There are sandy ridges on the sea coast and high lands of laterite [q.v.] formation from Capper hill westward. Soils, black clay, black loamy, black sandy, red loamy, red sandy, and arenaceous loamy and arenaceous sandy [munn]. Weaving [nesavoo], indigo [q.v.] and ground-nut [q.v.] trade are principal industries. Irrigation by Ponniaur, Guddilam, river channels, and Permaul tank. Camping ground, Vadacott on the Madras-Combaconam trunk road. Includes the mittahs of Alaginuttam, Chennappanaickenpolliem, and Nadooveeraputt. Places of archæological interest:—Cuddalore, Fort St. David, Manantavilandapoottoor, Panrooty, Teertanagary, Tircanteshwaram,

Tirmauncooly, Tirpapooliyore, Tirvendipooram, Trivetty, Tyaugavully, Vengadampett, Yeydanore. Principal Trig. stations:—Guddenguddy, Keelmaumputt, Morandicooppam, Ramapooram, Tirmauncooly, Vengadampett, Vullum. The leading places, &c., in the talook are the following.——*Alaginuttam* (அழகிநத்தம் · azhaginattam, Tam.). From (azhagi, tam. handsome woman, epithet of a village goddess + ñattam, tam. village). Mittah; pop. 423; acres 1,285; lat. 11° 48′; long. 79° 44′; from Cuddalore N.W. 7 miles; from the sea W. 7 miles. Peshcush Rs. 2,103.——*Capper hill* (கேப்பர்மலை - képparmalai, Tam.). See sep. title.——*Chennappa naicken polliem* (சென்னப்பநாயக்கன்பாளையம் - shennappanáyakkanbálaiyam, Tam.). From (shennappanáyakkan, tam. proper name + pálaiyam, tam. fortified village). Mittah; acres 4,568; lat. 11° 44′; long. 79° 40′; from Cuddalore W. 9¾ miles; from the sea W. 11 miles. Weaving industry and cloth manufacture. Peshcush Rs. 3,991.——*Coodicaud* (குடிக்காடு - kudikkádu, Tam.). From (kudi, tam. inhabitant + kádu, tam. forest). Village; acres 1,547; lat. 11° 41′; long. 79° 48′; from Cuddalore S.S.W. 2½ miles; from the sea W. 1 mile. Salt factory.——*Coorinjipaudy* (குறிஞ்சிப்பாடி - kuriñjippádi, Tam. kurinjipádi *). From (kuriñji, tam. coorinjah tree, tylophora asthmatica, w. & a. + pádi, tam. village). Town; pop. 4,597; acres 1,733; lat. 11° 33′; long. 79° 38′; from Cuddalore S.W. 16 miles; from the sea W. 12 miles. Weaving industry and weekly market.——*Cuddalore* (கூடலூர் - kúdalúr, Tam.). See below.——*Fort. St. David* (தேவனாம்பட்டணம் - tévanámbattanam, Tam.). See sep. title.——*Guddenguddy* (கட்டங்குடி - kattangudi, Tam.). From (gadda, can. bank + kudi, tam. village). Trig. station; lat. 11° 40′ 07·35″; long. 79° 44′ 14·45″; from Cuddalore S.W. 6¼ miles; from Ramapooram S. 1½ miles; from the sea W. 5 miles.——*Guddilam* (கடிலம் - kadilam, Tam.). See sep. title.——*Keelmaumputt* (கீழ்மாம்பட்டு - kizhmámbattu, Tam.). From (kízh, tam. east + mámbattu, tam. the village). Trig. station; lat. 11° 42′ 23·23″; long. 79° 38′ 7·82″; height 290 feet; from Cuddalore W. 12 miles; from Poothoopolliem W. 12 miles; from the sea W. 13 miles.——*Malattaur* (மலட்டாறு - malattáru, Tam.). See sep. title.——*Morandicooppam* (மோழாண்டிக்குப்பம் - mózhándikkuppam, Tam.). From (mózhándi, tam. proper name + kuppam, tam. village). Trig. station; lat. 11° 40′ 16·15″; long. 79° 37′ 22·74″; height 335 feet; from Cuddalore W.S.W. 13 miles; from Alagappasamoodram S. ½ mile; from the sea W. 13 miles.——*Munjacooppam* (மஞ்சக்குப்பம் - mañjakkuppam, Tam.). See sep. title.——*Nadooveeraputt* (நடுவீரப்பட்டு - naduvírappattu, Tam.). From (nadu, tam. middle + víran, tam. proper name + pattu, tam. village). Mittah [q.v.] village; pop. 4,878; lat. 11° 43′; long. 79° 40′; from Cuddalore W. 10½ miles; from the sea W. 11 miles. Includes Chennappanaickenpolliem, one of old farms granted to Company in 1762 as jagheer [q.v.] by the Nawaub of Carnatic [q.v.].——*Nellicooppam* (நெல்லிக்குப்பம் - nellikkuppam, Tam. nellikuppam*). From (nelli, tam. emblic myrobalan tree, phyllanthus emblica, linn. + kuppam, tam. village). Railway station, Mussalman place of pilgrimage; pop. 1,112; acres 370; lat. 11° 46′; long. 79° 43′; height 48 feet; from Cuddalore W.N.W. 7½ miles; from the sea W. 8 miles. Has a European sugar [q.v.] factory and a distillery of country arrack [q.v.].——*Panrooty* (பண்ருட்டி - panrotti, Tam.). See sep. title.——*Paravanaur* (பரவனாறு - paravanáru, Tam.). See sep. title.——*Parvatipooram* (பார்வதிப்புரம் - párvathippuram, Tam.). From (párvatí, san. the mountain deity so called + pura, san. town). Sanscrit name (uttarañánachidambara), meaning future + wisdom + the town so called. Place of pilgrimage; pop. 1,021; acres 2,505; lat. 11° 33″; long. 79° 35″; from Cuddalore S.W. 20 miles; from the sea W. 15 miles.——*Ponniaur* (பெண்ணையாறு - pennaiyáru, Tam.). See sep. title.——*Poothoopolliem* (புதுப்பாளையம் - puthuppálaiyam, Tam.). From (puthu, tam. new + pálaiyam, tam. fortified village). Lat. 11° 45; long. 79° 48′; from Cuddalore N.N.W. 2½ miles; from the sea W. 1¾ miles. Suburb of Cuddalore.——*Ramapooram* (இராமப்புரம் - irámappuram, Tam.). From (ráma, san. proper name + pura, san. town). Trig. station; lat. 11° 42′ 47·50″; long. 79° 45′ 24·74″; height 183 feet; from Cuddalore W. 3¾ miles; from Ramapooram N.E. 2 miles; from the sea W. 4¼ miles.——*Random shot* (குண்டுக்கிராமம் - kundukkirámam, Tam.). See sep. title.——*Singarcoil* (சிங்கர்க்கோவில் - shingarkkóvil, Tam.). From (shingam, tam. the lion + kóvil, tam. temple); temple of vishnoo, the lion-man god. Place of pilgrimage; pop. 824; acres 353; lat. 11° 52″; long. 79° 50″; from Cuddalore N. 10 miles; from the sea W. 2¼ miles.——*Teertanagary* (தீர்த்தனகரி - tírttanagari, Tam.). From (tírt'ha, san. place of sacred waters + nagarí, san. city). Village, Place of pilgrimage; pop. 1,392; acres 1,504; lat. 11° 34′; long. 79° 43′; from Cuddalore S.S.W. 12 miles; from the sea W. 5½ miles. Old Shiva temple with inscriptions.——*Tirmauncooly* (திருமாணிக்குழி - tirumánikkuzhi, Tam.). From (tiru, tam. holy + máni, tam. phallic emblem + kuzhi, tam. pit). Tam. also (mánikkuzhi), meaning same. Village; pop. 1,302; acres 1,048; lat. 11° 44′; long. 79° 44′; from Cuddalore W.N.W. 6½ miles; from the sea W. 7 miles. Hamlet of Tirvendipooram. Very ancient Shiva temple elaborately sculptured with inscriptions. Trig. station; lat. 11° 44′ 7·76″; long. 79° 43′ 56·34″; height 192 feet; from Cuddalore W.N.W. 5½ miles; from Tirmauncooly E. ½ mile; from the sea W. 6½ miles.——*Tirpapooliyore* (திருப்பாப்புலியூர் - tiruppáppuliyúr, Tam.). From (tiru, tam. holy + páthiri, tam. the trumpet-flower tree, stereospermum chelonoides, dec. + puli, tam. tiger + úr, tam. village). There is still an old pauthiry [q.v.] tree known as stala vricsham in the shiva temple. Tam. also (páthirippuliyúr), meaning same; also (tiruppáppúr), by corruption; also (páthirikkuppam), meaning same; distinguished from (kuppam), short for munjacooppam. Sanscrit name (pátalapura), meaning trumpet-flower tree + town. Village, Place of pilgrimage and Railway station; acres 1,308; lat. 11° 45′; long. 79° 47′; height 19 feet; from Cuddalore N.W. 3 miles; from the sea W. 3 miles.——*Tirvendipooram* (திருவேந்திப்புரம் - tiruvéndippuram, Tam. tiruvendípuram *). From (tiru, tam. sacred + véndan, tam. king + pura, san. town). Sanscrit name (ahíndrápura), means serpent + king + town. Village, Place of pilgrimage; pop. 2,784; acres 1,499; lat. 11° 45′; long. 79° 45′; from Cuddalore W.N.W. 4½ miles; from the sea W. 5½ miles. One of the villages of the old Tirvendipooram farm granted 1750 by Nawaub Mahomed ally as jagheer [q.v.] to Company. Firmaun [q.v.], from Moghul confirming the grant by way of inam [q.v.], 12th August 1765. Old Vishnoo temple with inscriptions.——*Trivetty* (திருவதி - tiruvathi, Tam.). See sep. title.——*Tyaugavully* (தியாகவல்லி - tiyágavalli, Tam.). From (tiyágan, tam. shiva, the giver + valli, tam. shepherd village). Village, Place of pilgrimage; pop. 1,392; acres 3,610; lat. 11° 37′; long. 79° 47′; from Cuddalore S.S.W. 6¾ miles; from the sea W. 1½ miles. Ancient Shiva temple buried in sand.——*Veerapermanullore* (வீரப்பெருமாநல்லூர் - vírapperumánallúr, Tam.). From (virapperumán, tam. proper name + nalla, tam. good + úr, tam. village). Village; pop. 3,641; acres 2,249; lat. 11° 47′; long. 79° 29′; from Cuddalore W.N.W. 23 miles; from the sea W. 24 miles.——*Vellaur* (வெள்ளாறு - veĺláru, Tam.). See sep. title.——*Veloodaiyanputt* (வேலுடையான்பட்டு - véludaiyánbattu, Tam.). From (vél, tam. spear + udaiyán, tam. possessor + pattu, tam. village). Soobramanyan's village. Place of pilgrimage; pop. 1,495; acres 2,822; lat. 11° 36′; long. 79° 34′; from Cuddalore W.S.W. 19 miles; from the sea W. 17 miles.——*Vengadampett* (வெங்கடாம்பேட்டை - vengadámbéttai, Tam.). From (vengadan, tam. name + péttai, tam. suburb). Trig. station; lat. 11° 36′ 55·01″; long. 79° 38′ 37·18″; height 218 feet; from Cuddalore S.W. 14 miles; from Vaigacollay S.S.E. 1¾ miles; from the sea W. 10 miles.——*Vullam* (வல்லம் - vallam, Tam.). From (val, tam. hillock). Trig. station; lat. 11° 39′ 22·58″; long. 79° 33′ 40·60″; height 317 feet; from Cuddalore W.S.W. 17 miles; from Nadoocooppam S.S.E. 1¼ miles; from the sea W. 18 miles.——**(2)** Town, Head-quarters of district and talook, Railway station; South arcot dist., Cuddalore tal.; pop. 47,355; acres 2,827; lat. 11° 43′; long. 79° 49′; height 19 feet; from Chidambaram N.N.E. 23 miles; from Madras S.S.W. 99 miles; from Pondicherry S.S.W. 16 miles; from Porto novo N. 16 miles; from Tindivanam S.S.E. 36 miles; from Tricalore E.S.E. 41 miles; from Vriddhauchellam E.N.E. 33 miles. On the backwater connecting the Guddilam and Paravanaur, close to sea. The municipality embraces the Old town or Cuddalore proper, Fort St. David, Bandipolliem, Devanamputnam, Munjacooppam, Poothoopolliem, Tirpapooliyore, and nine smaller villages. The residences and offices of the Collector and Judge are in Munjacooppam, which with Fort St. David constitutes European quarter. The river mouths having silted up, only native craft can come up to the town; but good anchorage in 6 to 8 fathoms can be obtained in the roads 1½ miles from shore. Light on cross-trees of flagstaff; lat. 11° 43′ 0″; long. 79° 46′ 15″; red, fixed, 5 miles; visible from all directions seaward; a guide to the anchorage. In 1682, the Company opened negotiations with the Khan of Jinjee to settle here. The first building was erected in 1683, and in the following year a formal lease was obtained for the site of the present port and the old fortress. During the next ten years trade increased so rapidly that the Company erected Fort St. David and rebuilt their warehouses. In 1702 the whole of the fortifications were rebuilt. On the fall of Madras in 1746, the British administration withdrew to Cuddalore, which was soon afterwards twice unsuccessfully besieged by the French under Dupleix. In the same year Commodore Barnet, commanding the English squadron, died at Cuddalore. In 1749 the Jesuits were expelled from the settlement as spies in the French service. In 1752 the head-quarters of the Presidency were removed from here to Madras. In 1755, Lord Clive was in command at Cuddalore. In 1758 the French occupied the town and stormed and destroyed the fort. In 1760, after the battle of Wandiwash, it was retaken by a British detachment. In 1782 it again fell into the hands of the French and their ally Tippoo sultan, by whom the fortifications were sufficiently renewed to enable it to withstand in the following year a siege and several assaults. During the siege a drawn battle was fought in the roadstead between the French and English fleets. On the 1st February 1785 Cuddalore was formally restored to the British under the treaty of Versailles, and in 1801 included in the cession of the Carnatic [q.v.]. A street in Cuddalore is called after Clive. At Munjacooppam is

the old garden house built in 1738 where the Governors and Deputy governors of Fort St. David formerly had their residence; now occupied by the Collector. Cuddalore carries on a large inland trade with Madras in indigo, oils and sugar, which are manufactured locally; and it exports by sea great quantities of grain. Laterite [q.v.] for making roads is quarried in the neighbourhood. The following are the travelling distances by road from Cuddalore to different places:—

To	Viâ	Miles and Furlongs.

CUDDAPAH (కడప - kadapa, *Tel.*). Means threshold. Sanscrit name (kripánagara), meaning cripay, proper name + town. Hind. name (neknámábád), meaning necnamkhan + town. Greek καρίγη.——**(1)** Revenue district; situated inland; between 13° 26′ and 15° 14′ N. lat., and between 77° 54′ and 79° 31′ E. long.; bounded N. by Kurnool district, E. by Nellore district, S. by North arcot district and Mysore state, W. by Mysore state and Anantapore district; square miles 8,722; pop. 1,272,072; language Teloogoo. Contains rivers Cheyair, Chitrauvaty, Coondair, Paupughny, Pennair, and Saglair. Mountains, Eastern ghauts [q.v.], Palcondah hills and Sheshachellam hills. The whole area of the district is represented by the following sub-areas:—Budwail talook, Cadiry talook, Cuddapah talook, Jummalmudoogoo talook, Madanapully talook, Poolivendla talook, Poollampett talook, Proddootore talook, Royachoty talook, Sidhout talook, and Voilpaud talook. For general administrative purposes the district is distributed between the following revenue and magisterial officers, who have their head-quarters at the places shown. The pay set opposite the subordinate officers gives the grade of the corresponding charge:—Collector, Cuddapah; Sub-collector, Madanapully, in charge of Cadiry, Madanapully, Royachoty and Voilpaud talooks; Head assistant collector, Cuddapah, in charge of Proddootore, Jummalmudoogoo and Poolivendla talooks; General deputy collector, Sidhout, in charge of Budwail, Sidhout and Poollampett talooks; General charge deputy collector, Cuddapah, in charge of Cuddapah talook. Tahsildars, Budwail, Rs. 150; Cadiry, Rs. 175; Cuddapah, Rs. 225; Jummalmudoogoo, Rs. 200; Madanapully, Rs. 175; Poolivendla, Rs. 175; Poollampett, Rs. 200; Proddootore, Rs. 175; Royachoty, Rs. 175; Sidhout, Rs. 150 and Voilpaud, Rs. 175. Deputy tahsildars, Camalaupooram, Rs. 70, range situated in the north and west of Cuddapah talook; Chitwail, Rs. 70, range situated in the east of the Poollampett talook; and Peelair, Rs. 70, range situated in the east of the Voilpaud talook. Sub-magistrate, Cuddapah, Rs. 100, jurisdiction extending over Cuddapah town. Similarly judicial officers:—Judge, Cuddapah; District moonsifs, Cuddapah with jurisdiction extending over the whole of Cuddapah talook and 58 villages of Poolivendla talook and 62 villages of Royachoty talook; Proddootore with jurisdiction extending Proddootore, Jummalmudoogoo, Budwail and the remaining half of Poolivendla; Nundalore with jurisdiction extending Sidhout and Poollampet talooks; Madanapully with jurisdiction extending Madanapully, Cadiry, Voilpaud talooks and the remaining half of Royachoty talooks. Similarly Public works officers:—Executive engineer, Cuddapah, Budwail, Sidhout, and Jummalmudoogoo. Contains Registration sub-districts, Budwail, Cadiry, Chitwail, Cuddapah, Jummalmudoogoo, Madanapully, Peelair, Poolivendla, Poollampett, Proddootore, Royachoty, Sidhout, Voilpaud. Contains Forest ranges, Budwail, Cadiry, Codoor, Cuddapah, Madanapully, Proddootore, Rajampett, Royachoty, Sidhout, Voilpaud. Contains one Municipality, Cuddapah. Contains District board; and Talook boards, Proddootore embracing Proddootore and Jummalmudoogoo, talooks, Poolivendla embracing Poolivendla talook, Sidhout embracing Sidhout and Budwail talooks, Poollampett embracing Poollampett talook, Cuddapah embracing Cuddapah talook, Cadiry embracing Royachoty and Cadiry talooks, Madanapully embracing Madanapully and Voilpaud talooks. The following general references should be made to the preceding volumes:—general geography, I (1) to (29); general ethnology, I (29) to (109); general history, I (110) to (188); physical geography, II, 1; meteorology, II, 3; geology, II, 8; fauna, II, 21; flora, II, 26; mineralogy, II, 29. The following references in the preceding volumes will furnish details special to the district:—latitudes and longitudes, II, 47; particulars about towns, II, 48; comparative population, II, 172; location of revenue officers, II, 382; revenue settlement of the district, II, 409; registrar's and sub-registrar's stations, II, 420; rain-guage stations, II, 428; police divisions, II, 431; maps published, II, 436; survey topographical lists, II, 443; hospitals and dispensaries, II, 447; missionary stations, II, 455; head-quarter stations of gazetted officers, II, 461; incidence of taxation, II, 463; weights and measures of the district, II, 510. A special gazetteer account of the whole district is given at II, 74. For the detailed topography of the district, reference should be made to the talook notices in the present volume, viz.:—Budwail, Cadiry, Cuddapah, Jummalmudoogoo, Madanapully, Poolivendla, Poollampett, Proddootore, Royachoty, Sidhout, Voilpaud.——**(2)** Talook, Cuddapah district. Tahsildar's pay Rs. 225. Area 764 square miles. Population 137,520. Language Teloogoo. Centre of district. Lies along either bank of Pennair. Bounded south and east by Palcondahs, north partly by Lunkamalas and partly by artificial boundaries from Proddootore and Budwail talooks, west by artificial limits alone from Poolivendla talook. Includes the old division of Jummalmudoogoo and Proddootore talooks, Chennore and Camalaupooram. The Cuddapah valley is a basin completely shut in by hills on three sides, the Lunkamala and Sheshachellam ranges spreading from the eastern confines of the talook along its northern and south-eastern boundaries respectively. These hill ranges are both covered with large timber. The talook lies beyond the limit of the black cotton soil [regar] which overspreads the western talooks of the district. The prevailing soil is alluvial, overlying to no great depth beds of argillaceous slates [cullpalagay]. The soil is not generally good, and is often rendered worthless by profusion of saltpetre [shorah], common salt [ooppoo], and soda [sowdoo], which all occur in efflorescence. The well-known diamond [vajram] sandstone is a feature of interest. This formation is the diamond-yielding quartzites, or altered sandstones [manal cull]. These beds occur very generally in the Ceded districts [q.v.], and at Bunganapully in Kurnool district and are systematically mined for diamonds. The Cuddapah mines however are only shallow pits, dug in the débris and gravel at the foot of the hill range above Canoopurty and Chennore. The local beds of kankar [q.v.] are of extreme usefulness. Rice [paddy] and indigo [q.v.] are alternately grown under tanks. Cuddapah indigo has obtained a reputation as the best in S. india, and commands in the home markets about eight annas per pound more than Madras indigo. It is extracted from the plant steeped when green. Cholum [q.v.] is the staple dry grain [q.v.], and cotton [q.v.] is also widely grown. Cuddapah melons [common melon] deserve notice; they are cultivated in the river beds in March and April. The bulk of indigo and cotton is purchased by resident merchants and brokers; but some also is sent to Madras. Grain is but little exported; supplies, especially of wheat [geung], &c., are drawn largely from the sub-division of the district. Most of the large towns are engaged wholly in trade of agricultural produce, especially indigo. Chief industry is weaving of coarse cloths. The Pennair traverses the talook from west to east, and receives within its limits the Coondair from the north near Camalaupooram, the Paupughny from the south below the same town, and the Boggair with several confluents due north of Cuddapah town. Irrigation consists of river channels [q.v.], spring channels, Cuddapah-kurnool irrigation canal, tanks and wells. Places of archæological interest:—Animela, Booggalpulley, Camalaupooram, Chennore, Chintacommadinney, Chintalaputtore, Cocatam, Codoor, Commaddy, Coppole, Cuddapah, Hanoomangootty, Indoocore,

Nundimundalam, Ooppalore, Ooratore, Ootcore, Pandillapully, Panchikelapaud, Paulgherry, Pedda cheppully, Peddanapaud, Pooshpagherry, Potladoorty, Pydicaulwa, Sadipiraula, Sambatore, Sankatipulley, Shiddhareddy bhaucarapett, Shivaulapulley, Talpanore, Tappotla, Vedoorore, Veldoorty, Vulloor, Yellatore, Yerragoodipaud. The leading places, &c., in the talook are the following.——*Accauyapully* (అక్కాయపల్లి - akkáyapalli, Tel.). From (akkayya, tel. proper name + palli, tel. village). Village; pop. 1,040; acres 278; lat. 14° 29′; long. 78° 52′; from Cuddapah south ½ a mile.——*Animela* (అనిమెల - animela, Tel.). From (ani, tel. battle + ila, tel. ground). Village; pop. 2,845; acres 9,453; lat. 14° 28′; long. 78° 33′; from Cuddapah W. 20¾ miles. Temple of Sangameshwaran on high ground at the junction of the Mogamoorair and the Paupughny. Never completed. Four other old temples.——*Booggawunka* (బుగ్గవంక - buggavanka, Tel.). See sep. title.——*Camalaupooram* (కమలాపురము - kamalápuramu, Tel.). See sep. title.——*Cauzypett* (قاضی پیٹھ - kázípeth, Hind.; కాజీపేట - kájípéta, Tel. kázipet *). From (kází, ar. proper name + péta, tel. suburb). Village; pop. 1,833; lat. 14° 39′; long. 78° 49′; from Cuddapah N.N.W. 12 miles.——*Chennore* (చెన్నూరు - chennúru, Tel.). From (chennu, tel. beautiful + úru, tel. village). Village; pop. 4,279; acres 4,448; lat. 14° 34′; long. 78° 51′; from Cuddapah N. 5¾ miles. On Pennair, on route from Cuddapah to Hyderabad. Ferry station. Old temples. Large stretch of wet cultivation under Kurnool-cuddapah canal. Noted for melons.——*Chintacommadinney* (చింతకొమ్మదిన్నె - chintakommadinne, Tel.). From (chinta, tel. tamarind tree, tamarindus indica, linn. + komma, tel. branch + dinne, tel. mound). Village; pop. 3,084; acres 14,977; lat. 14° 26′; long. 78° 50′; from Cuddapah S.W. 4¼ miles. In the hamlet of Cottapettah a grand festival of goddess Gungammah.——*Commaddy* (కొమ్మద్ది - kommaddi, Tel.). From (komma, tel. branch + maddi, tel. terminalia arjuna, bedd.). Village; pop. 2,027; acres 8,599; lat. 14° 33′; long. 78° 29′; from Cuddapah W. 26 miles. Old stone fort.——*Coondair* (కుందేరు - kundéru, Tel.). See sep. title.——*Cotlore* (కోట్లూరు - kotlúru, Tel.). From (kottu, tel. store house + úru, tel. village). Village; pop. 2,148; acres 6,725; lat. 14° 37′; long. 78° 47′; from Cuddapah N.N.W. 10 miles.——*Cuddapah* (కడప - kadapa, Tel.). See below.——*Krishnapooram* (కృష్ణాపురము - krishnápuramu, Tel.). From (krishna, san. the god + pura, san. town). Village, Railway station, Canal terminus; pop. 231; acres 158; lat. 14° 29′; long. 78° 49′; height 435 feet; from Cuddapah W.N.W. 2⅜ miles.——*Lunkamala* (లంకమల - lankamala, Tel.). See sep. title.——*Naugapootla* (నాగపుట్టల - nágaputtala, Tel.). From (nága, san. snake + putta, tel. ant hill). Ghaut [q.v.]. In the Palcondah hills [palcondah].——*Ooppalore* (ఉప్పులూరు - uppulúru, Tel.). From (uppalamu, tel. salt marsh + úru, tel. village). Village; pop. 1,777; acres 9,379; lat. 14° 36′; long. 78° 26′; from Cuddapah W.N.W. 30 miles. Former residence of a poligar [q.v.]. Three temples.——*Palcondah* (పాలకొండ - pálakonda, Tel.). See sep. title.——*Paulgherry* (పాలగిరి - pálagiri, Tel.). From (pálu, tel. milk + giri, san. mountain). Village; pop. 4,567; acres 13,916; lat. 14° 28′; long. 78° 29′; from Cuddapah W. 25 miles. Two old temples. Vijianugger inscriptions.——*Paupughny* (పాపఘ్ని - pápaghni, Tel.). See sep. title.——*Pauta cuddapah* (పాతకడప - pátakadapa, Tel.). From (páta, tel. old + kadapa, tel. the town). Village; pop. 1,969; acres 1,826; lat. 14° 30′; long. 78° 52′; from Cuddapah N.E. 1½ miles. Large agricultural suburb of Cuddapah.——*Pedda cheppully* (పెద్దచెప్పల్లి - peddacheppalli, Tel.). From (pedda, tel. large + chennu, tel. beautiful + palli, tel. village). Village; pop. 2,068; acres 2,135; lat. 14° 33′; long. 78° 40′; from Cuddapah W.N.W. 13½ miles. Near the Paupughny. Vishnoo temple. Watered by spring channels [q.v.].——*Pennair* (పెన్నేరు - pennéru, Tel.). See sep. title.——*Pooshpagherry* (పుష్పగిరి - pushpagiri, Tel.). From (pushpa, san. flower + giri, san. mountain). Village, Hill; lat. 14° 36′; long. 78° 48′; height 756 feet; from Cuddapah N.N.W. 8¾ miles. Hamlet of Cotlore. On the Pennair about two miles from the anicut newly constructed by the Irrigation and Canal company. Of great sanctity. Pagoda [q.v.] on a hill. Festival towards the end of April lasting eight days. Pilgrims bathe in the river and walk round the hill, six or seven miles in circumference.——*Puttoor* (పత్తూరు - pattúru, Tel.). From (patti, tel. cotton + úru, tel. village). Village; pop. 2,773; acres 15,109; lat. 14° 39′; long. 78° 49′; from Cuddapah N.N.W. 11½ miles. Old temple of Indranautasawmy. Two other temples. Chola kings built six shrines and a mantapam [q.v.] south of the temple of Gadaudhara sawmy.——*Soorya comauroola canama* (సూర్యకుమారులకనమ - súryakumárulakanama, Tel.). From (súrya, san. the sun + kumára, san. son + kanama, tel. pass); from a local ruler. Ghaut [q.v.] in the Palcondah hills.——*Vulloor* (వల్లూరు - vallúru, Tel.). From (val, tam. hillock + úru, tel. village). Village; pop. 3,189; acres 3,631; lat. 14° 34′; long. 78° 46′; from Cuddapah N.W. 9¼ miles. On the Bellary road. Large number of mosques [musjid] and temples and old fort. Noted for paddy [q.v.].——*Wonootlacona* (వానూతలకోన - vónútalakóna, Tel.). From (vána, tel. rain + núyi, tel. spring + kóna, tel. ravine). Village, Place of pilgrimage; lat. 14° 26′; long. 78° 40′; from Cuddapah W.S.W. 13½ miles. Remarkable on account of its spring and the temple dedicated to Narsimhasawmy in the hamlet of Chinna dausaripully.——*Yerragoodipaud* (ఎర్రగుడిపాడు - erragudipádu, Tel.). From (erra, tel. red + gudi, tel. temple + pádu, tel. village). Village; pop. 1,171; acres 3,223; lat. 14° 37′; long. 78° 39′; from Cuddapah W.N.W. 17 miles. Vijianugger inscription.——*Yerragoontla* (ఎర్రగుంట్ల - erraguntla, Tel.). From (erra, tel. red + gunta, tel. pond). Village, Railway station; pop. 1,362; acres 3,379; lat. 14° 38′; long. 78° 35′; height 547 feet; from Cuddapah N.W. 22 miles. Station for Proddootore. Former residence of a poligar. Good lime-stone [choonam cull] quarry.——**(3)** Deputy tahsildarry, Cuddapah district. Pay Rs. 100.——**(4)** Town, Municipality, Collector's, Judge's, Divisional and talook head-quarters, Railway station; Cuddapah dist., Cuddapah tal.; pop. 17,379; acres 1,075; lat. 14° 29′; long. 78° 52′; height 454 feet; from Madanapully N.N.E. 68 miles; from Madras N.W. 137 miles; from Sidhout W. 10 miles. On north bank of Boggair in the Pennair valley, six miles south of latter river. Being enclosed on three sides by bare sandstone hills, it is one of the hottest towns in the district, the mean temperature in the shade from March to July being 79° F. The native town is unhealthily situated and squalidly built. Place of importance under Vijianugger its immediate rulers being the chiefs of Chitwail. Fort improved towards the close of the sixteenth century by Necnam khan who accompanied Meer joomla, vizier [q.v.] of the Mahomedan king of Golcondah, in his expedition into the Balaghaut [q.v.] and Carnatic [q.v.]. Necnam khan was left in charge of the Chennore talook, and annexed the lands and fortresses of Budwail, Cumbum, Gundicote, Jummalmudoogoo and Sidhout, which were under poligars tributary to the Vijianugger rajahs. He built the present city on the site of the encampment of Meer joomla's army. It was at first called Necnamabad, but subsequently took that of the ancient Hindoo village adjoining, viz., Karipah coil. Compare vernacular at head. The town was taken by Mahomed coolee cootb shah of Golcondah in A.D. 1589, who broke the idol of the great temple and sacked the city. Afterwards ruled by Afghaun nobles under the Adil shahy and Cootb shahy [q.v.] sovereigns of Beejapore and Golcondah. It was not till the beginning of the eighteenth century, when the Nawaub of Cuddapah had absorbed the whole of the Balaghaut except Gooty, and had extended his conquests to the Baramahaul [q.v.] that Cuddapah appeared as the capital of a separate kingdom. In 1817 made the head-quarters of the district and in 1821 a military cantonment. The cantonment was abolished in 1868. Four mosques [musjid] about 300 years old. Parts of the Nawaub's palace have been utilized as a treasury and jail. Two large tanks near the town. Large temple of Vencateshwarasawmy, the Tripatty deity, in the suburb. Hindoos from the country north of Cuddapah make a point of visiting the Devoony cuddapah temples or Vencateshwaran's lower temples, before proceeding to the Tripatty temple or Vencateshwaran's upper temple. The railway was opened in 1868. Trade consists chiefly in the export of indigo and cotton. Principal industry is weaving of coarse cloth. The following are the travelling distances by road from Cuddapah to different places :—

To	Viâ	Miles and Furlongs.	
Bangalore ...	Goolcheroo ghaut, Royachoty, Madanapully and Hoscote.	156	4

CUFNEE (کفنی - kafní, *Hind.*). From (kafan, ar. a shroud). Hind. also (alfá). Cloth about fifteen feet long, and a yard wide; in the centre of its breadth a slit is made through which the head is passed, where a collar is sewed on; one-third of the cloth hangs behind reaching down to the calf of the leg, and two-thirds before; the superfluous quantity in front is tucked up by means of the cummerbund [q.v.], which at the same time forms a sort of bag to receive the contributions of the charitable [sheelay].——*Cufnee choory* (کفنی چڑیا - kafníchiryá, Hind.; کفنی چڑی - kafníchurí, Dec.; ಕೊಗ್ಗರನೆಹಕ್ಕಿ - koggaranehakki, Can.). Title from deccany. Hind. from (kafní, hind. fakeers' coat + churí, hind. bird); from sitting posture as if dressed in a fakeer's coat. Can. from (koggara, can. stooping + hakki, can. bird). Trogonidæ family, fissirostres, insessores, aves [pacshy, 6], of naturalists [jantoo]. The species best known is Harpactes fasciatus, alias Trogon malabaricus. Note like the mewing of a cat [poonay].

CULL (शिला - shilá, *San.*; शील - shíla, *Mahr.*; حجر - hajar, *Ar.*; سنگ - sang, *Pers.*; پتھر - patthar, *Hind.*; پھتر - phattar, *Dec.*; بتو - batu, *Malay*; ಕಲ್ಲು - kallu, *Can.*; ಕಲ್ಲು - kallu, *Too.*; రాయి - ráyi, *Tel.*; കല്ലു - kallu, *Mal.*; ගල - gala, *Singh.*; கல் - kal, *Tam.*). San. from (shi, san. to sharpen). Mahr. from sanscrit. Ar. from (hajara, ar. to resist). Hind. from (prastara, san. flat surface). Stone.——**(1)** The stones now in general use for building and for decorative and domestic purposes are granite [caroom cull], marble [shalavay cull], basalt [caroom palingoo cull], hornblende [shalavay cull], augite, laterite [q.v.], sandstone [manal cull], and steatite [sowcaura cull]. The modes of quarrying are various, by fire, wedges, and gunpowder. Stratified rocks generally split in the direction of the strata; so that the surface of separation show only the surfaces of the seam. But in the laminæ of the Balaghaut [q.v.] gneiss the case is different; on the surfaces of the laminæ are seen the strata, and their seams along the surface of the split, and therefore its direction is at an angle with that of the seams themselves. The natives have availed themselves of the peculiarity this gneiss has of splitting in a direction opposite to that of the strata, to obtain laminæ of any thickness. On the convex surface of the gneiss they light a fire, the intensity of which is proportionate to the thickness of the slab to be obtained; and after having kept it up for a certain length of time they extinguish it, and pour cold water on the heated surface of the rock. This sudden refrigeration producing an instantaneous contraction of the heated portion of the rock, extending as deep as the heat had penetrated, it is detached at that depth from the parent rock, and the laminæ are easily removed, and cut in as many pieces as required. The curvature of these laminæ being the segment of a very large circle, in the small dimensions they are generally cut they appear nearly straight, and are used for all architectural purposes, as columns, door-posts, steps, &c. Another and very different method is used to split granite, porphyry [dhoomra cull], green stone [putchay cull], or other unstratified rocks. This consists in making several square perforations, little more than an inch deep, with a hammer and a steel punch, in the rock, in a line and in the direction it is to be split. This done, the workmen put wedges in the holes, and strike on them with force, until the granite breaks. Blasting by gunpowder is much more modern than either of the above. The size of some of the stones in the ancient temples is very remarkable. The gateway of Shreerungam near Trichinopoly is built of single blocks of granite, each upwards of 40 feet in length; and at Humpy there are stones weighing from 20 to 30 tons, which have been raised to the height of at least 15 or 20 feet. The principles employed were probably the inclined plane, the lever, and manual labor. The word cull is a suffix in place names, as Namcull, meaning mark + rock; Goontacull, meaning quarry + stone; Varacull, meaning stripe + rock. Also prefix in place names, as in Cullore, meaning stone + village.——**(2)** The following general classification of lithology is adopted in this work:—*Igneous rocks.*—Granitic group or Granite, syenite, &c.; Trappean group or Trap, green stone, &c.; Volcanic group or Basalt, lava, &c.—*Aqueous rocks.*—Sand group or Sand stone, conglomerate, &c.; Clay group or Clay, shale, &c. Lime group or Limestone, &c.—*Metamorphic rocks.*—Sub-crystalline family—Arenaceous group or Quartzite, &c.; Argillaceous group or Clayslate, &c.; Calcareous group or Altered limestone, &c.; Crystalline family—Quartzose group or Quartz rock, gneiss, &c.; Argillaceous group or Schists, &c.; Calcareous group or Crystalline limestone, &c.——**(3)** Igneous rocks are such as are believed to have undergone fusion. For purposes of this work, these are divided into granitic, trappean, and volcanic.—*Granitic group.*—This group embraces those irregularly crystallized rocks which consist of some proportion of the minerals, quartz, felspar, mica, and hornblende. First, granite [caroom cull], which typically is a ternary compound of quartz, felspar, and mica. Second, syenite; also a ternary rock of quartz, felspar, and hornblende. And lastly, varieties of these, in which one or other of the constituent minerals is replaced by others allied to them, such as epidote, tourmaline [q.v.], talc, or chlorite. There is not however always this ternary aggregation of the minerals. One or other may be absent when the rock becomes a binary form, as binary granite, &c. While the crystalline arrangement of the different minerals may be such that a descriptive term is necessary to distinguish the rock, as in the case of graphic granite when the minerals are arranged after the manner of a written character, or porphyritic syenite, &c., when one or more constituents are scattered in crystals or crystalline masses at intervals throughout a more uniform mass or paste of the other minerals. The granitic rocks are also distinguished as being rich in silica or quartz, both free and in combination.—*Trappean group.*—This includes those rocks which come under the general term Trap [padicutt cull]. The traps are generally compact granular crystalline aggregates of the minerals felspar and hornblende, and according to the preponderance of one mineral over the other, may be divided into felspathic traps, i.e., felsites or felstones and hornblendic traps, i.e., green stone, diorite, &c.; while there are intermediate varieties according to the arrangement of the minerals, or the introduction of some other constituent, or allied mineral. With some developments of trap are often found associated a set of rocks which must have been the mechanical accompaniments of the igneous action at the time, or the ejected dust and ashes, &c.; and these come under the general term Trappean ash. The term trappean is adopted to include such rocks as are intermediate between those of the granitic and volcanic groups.—*Volcanic group.*—The Lavas and their accompanying Volcanic ash come under this head; as do all the other igneous rocks which are made up of augite and felspar. With the preponderance of either of these are the two divisions of Trachytes and Dolerite respectively; and there are intermediate varieties.——**(4)** Aqueous rocks are deposited by water, in contradistinction to igneous rocks, the formation of which has been due to heat. For purposes of this work, these are divided into clay, lime, and sand—*Clay group.*—This includes the Clays and Shales, or those rocks which show a plastic tendency, and which contain alumina in their constitution, thus possessing a soapy feel to the touch.—*Lime group.*—This includes such rocks as are made up of lime, or mainly of that mineral. The terms sandstone and conglomerate are applied when the rock is made up of finely comminated particles, or pebbles, &c., of limestone; so that the names Calcareous sand stone, and Limestone conglomerate or Conglomeratic limestone are met with. Limestones have been formed mechanically, chemically, or organically; but always in water as a general rule, and they are therefore aqueous rocks.—*Sand group.*—This includes such rocks as are made up of siliceous sand; either extremely coarse with large pebbles and gravel, when there is a conglomerate or pudding stone; or containing angular fragments of rock, forming what is called a breccia; or altogether made up of coarse or large-grained and angular sand, when the rock is termed a grit; or consisting of ordinary sand, fine or coarse, when there is a sand stone [manal cull].——**(5)** Metamorphic rocks are those which have undergone a change of structure and become crystalline. The term is especially applied to sedimentary formations, which, through the agency of heat or chemical action, have acquired crystalline structure. For purposes of this work, they are divided into the sub-crystalline family, arenaceous, argillaceous, and calcareous, and the crystalline family, quartzose and argillaceous.—*Sub-crystalline family. Arenaceous group.*—This includes such rocks as have belonged to the sand group of the aqueous division; but which have since been metamorphosed and now go by the general name quartzite.—*Argillaceous group.*—This includes such rocks as are supposed to have belonged to the clayey group of the aqueous division; and which come under the general term Slate [cull palagay].—*Calcareous group.*—This

includes such rocks as have been ordinary limestone; and which may come under the general term Sub-crystalline Limestone, or Altered limestone in contradistinction to the true crystalline limestone of the crystalline family of metamorphic rocks.—*Crystalline family. Quartzose group.*—This includes such rocks as are mainly made up of the mineral quartz and which appear to have been originally Sand stones, or, at any rate, members of that group; as also rocks which are of a more variable constitution, though still showing the original siliceous elements, these last coming under the general term Gneiss.—*Argillaceous group.*—This includes such metamorphic rocks as are supposed to have been originally Clays, or Clay-slates, with their varieties and which come under the general term Schist.——**(6)** Common compound.—"*a*" Plant first term often joining two genera. Sometimes from habitat on rocky ground, sometimes from hardness of fruit, wood, &c., though this often happens from former. Ex., where transl. is of second term:—Alangium lamarckii (kallumávu), mangifera indica; Bauhinia tomentosa (kallattimara), ficus glomerata; Canna indica (kalvázhai), musa paradisiaca; Sebastiana chamælea (kallámanakku), ricinus communis; Smilax ovalifolia (kaltámara), nelumbium speciosum; Solanum verbascifolium (kallatti), ficus glomerata; Thespesia populnea (kallál), ficus bengalensis. See gloss. paragraphs.—"*b*" Fish first term, generally from living in rocky river beds. Ex., where transl. is of second term:—Discognathus lamta (karguravai), ophiocephalus genus; Eleotris butis (kallára), polynemus indicus; Homaloptera brucei (kargendai), barbus genus; Mastacembelus armatus (kalláral), rhynchobdella aculeata; Minous monodactylus (karbiláççai), ostracion genus. See gloss. paragraphs.—"*c*" Mammal first term. From habitat. Ex., where transl. is of second term:—Leggada platythrix (kallelaka), mus genus.——**(7)** The following are terms with Cull prefixed.——*Cullada* (കല്ലട - kallata, Mal.). From (above + ata, mal. block). Mal. also (kannétti), meaning eye + beauty. Greek Νελκύνδα; the point being Βακάρη.—"*a*" Village; Travancore state, Quilon division, Quilon and Coonnatore tals.; lat. 9° 02′; long. 76° 44′; from Coonnatore S. 2½ miles; from Quilon N.E. 10 miles; from Trivandrum N.N.W. 41 miles; from the sea E. 11 miles. The Cannetty of the Keraloputty. It is divided into Eastern cullada or Kizhakk cullada, and Western cullada or Padinyaur cullada; the former is in Coonnatore talook and has a population of 6,622, and the latter is in Quilon talook and has a population of 4,498. Nelkunda is mentioned by various authors under varying forms of the name. It is Melkunda in Ptolemy, who places it in the country of the Aii. In the Peutingerian table it is Nincylda, and in the Geographer of Ravenna, Nilcinna. At the mouth of the river on which it stands was its shipping port Βακάρη now represented by Markary lat. 12° N. The Periplus mentions exports and imports only at the two ports of Barugaza and Nelcynda. Fine muslins and ordinary cottons are the principal commodities of the first; tortoise-shell [zabl], precious stones [ratnam], silk [puttoo], and pepper [q.v.] of the second; the pepper was brought from Cottonara [cadatnaud].—"*b*" River; Travancore state, Quilon division, Putnapooram, Coonnatore and Quilon tals. Formed principally by union of five large streams issuing from ghauts [q.v.], but swelled by numerous others as it proceeds westward. Its branches as they pass through the more hilly parts descend by a succession of cataracts, of which Meenmooty is the most remarkable. The banks till it reaches Cullada village rise boldly from its stream, which flows over a sandy bed, whose varying breadth in some places expands to nearly three hundred yards. The course is generally north-west and it terminates in the Ashtamoody estuary near Quilon by several months. Length, 70 miles. Putnapooram, Mahanuddy, and Coonnatore are towns on its bank. Not much used for cultivation. Navigable for about 25 miles from the coast, but difficult. During rains, boats can ascend to Putnapooram. The large tributary streams that flow into the Cullada transport the timber cut on their banks.——*Cullanay* (கல்லணை - kallanai, Tam.). From (above + anai, tam. bund). Another name for Rama's bridge [adam's bridge].——*Cullcary* (جھوٹا کوئلا - jhútákoelá, Hind.; ارڠ تانه - arángtanah, Malay; సీమబొగ్గు - símaboggu, Tel.; കൽക്കരി - kalkari, Mal.; கற்கரி - kargari, Tam.). Title from tamul. Hind. from (jhútá, hind. false + koelá, hind. coal). Malay from (aráng, malay, charcoal + tanah, malay, earth). Tel. from (síma, tel. foreign + boggu, tel. charcoal). Mal. from tamul. Tam. from (kal, tam. stone + kari, tam. charcoal). Anthracite. Otherwise Blind coal, Glance coal. An aqueous rock. Coal [nilakary] deprived of most of its volatile ingredients, and consisting almost wholly of carbon [kary], with a shining surface, burning without flame. See vol. II, 32.——*Cullcootaca* (ಕಲ್ಲುಕುಟುಕ - kallukutuka, Can.). From (kuttu, can. to strike). Stone-cutters in Canara. Speak mahratta and canarese. They assert that they are descendants of vishwa carman; belong to the punchaulas [q.v.]. Dark, middle-sized and strong [cull tutcha].——*Cullhutty* (ಕಲ್ಹಟ್ಟಿ - kalhatti, * Can.). From (above + hatti, can. village). Village; Neilgherry dist., Todanaud division; lat. 11° 29′; long. 76° 42′; from Ootacamund N.N.W. 5½ miles. On the Seegore ghaut, three miles below its head. Halting place. The bungalow commands a fine view of the waterfall. Oranges [q.v.], apples [seb], peaches [shaft auloo], and pears [amrood] thrive. Near Cullhutty was an ancient fort called Mullaycotey or hill fort said to have been possessed by the Wodeya of Oommatore, a feudatory to the empire of Vijianugger but who on the decline of that kingdom became independent. The Oommatore chief was in 1613 subdued by the Mysore ruler, Rajah wodeyar, and his dominions then became part of Mysore kingdom. There are still living near Mullaycotey beydar or huntsmen, whose ancestors were in the service of the Oommatore chief as tax-gatherers. The falls at Cullhutty, 170 feet high, are picturesque. Also a river, a continuation of the stream running out of the Ootacamund lake; before it reaches Seegore it is joined by another small stream from Marlemund. Also a Coffee [q.v.] estate, Todanaud, Neilgherries, just below the Travellers' bungalow; 110 acres. Another just below the waterfalls; 64 acres. Fruit estate, north of the Cullhutty stream and close to the waterfalls; 6 acres. Cullhutty mullay is an estate, Moonanaud amshom, S.E. wynaud from Pundalore N. 1 mile; 175 acres [aroovy].——*Cullicote* (ಕಲ್ಲಿಕೋಟ - kallikóta, Tel. kallikót *). From (above + kóta, tel. fort). Ancient zemindarry, Village; Ganjam dist., Ganjam tal., Deputy tahsildars' range; pop. 62,066; square miles 213; lat. 19° 28′ N. to 19° 49′ N.; long. 84° 57′ to 85° 14′ E.; lat. of village 19° 36′; long. 85° 08′; from Chetterpore N.N.E. 18 miles; from Russellcondah E.S.E. 38 miles. On the northern boundary of the Presidency, adjoining Banpur country in Orissa. The family founded by one Rama boya. Poorshottama gajapaty deo, King of Orissa, confirmed him as zemindar of the talook in A.D. 1374. At a later period the zemindar kept Mahrattas out of the district and obtained title of Mardaraja deo. Occupied by British troops in 1769, and again from 1771 to 1775. The adjoining talook of Atagadah was bought in 1854 and now forms part of estate. Soil very fertile. Stretching along western shore of Chilka lake, possesses great natural advantages. The zemindar's residence is 15 miles from Rambha, in a basin surrounded and almost touched by adjacent hills. Peshcush Rs. 18,975. Revenue Rs. 19,000.——*Cullnaur* (शंखपलिता - shankhapalitá, Mahr.; حجر کتان - hajarikatán, Ar.; پنبهٔ کوهی - pambahikohí, Pers.; پتھر کا نار - patthar kánár, Hind.; ಕಲ್ನಾರು - kalnáru, Can.; ಕಲ್ನಾರು - kalnáru, Too.; రాతినార - rátinára, Tel.; கல்நார் - kalnár, Tam.). Title from tamul. Ar. from (hajar, ar. stone + katán, ar. flax). Pers. from (pambah, pers. cotton + koh, pers. mountain). Hind. from (patthar, hind. stone + nár, hind. fibre). Can. from (kallu, can. stone + náru, can. fibre). Tel. from (ráyi, tel. stone + nára, tel. fibre). Tam. from (kal, tam. stone + nár, tam. fibre). Asbestos. Otherwise Amianthus, Earth flax, Mountain flax. An igneous rock. Magnesian fossil found in Mysore, &c.; its texture is delicately fibrous, its color flaxen, and its fibres flexible. The ligniform asbestos in external appearance resembles wood, its fibres are somewhat rigid, and its color is a dusky brown. Has the quality of resisting fire; the silky filaments, when mixed with oil, may be woven into a fire-proof cloth.——*Cullore* (ಕಲ್ಲೂರು - kallúru, Tel.). From (above + úru, tel. village).—"*a*" Village, Polliem; North arcot dist., Chundragherry tal.; pop. 265; acres 23,028; lat. 13° 33′; long. 79° 02′; from Chittore N.N.W. 24 miles; from Chundragherry W. 22 miles. Peshcush Rs. 4,060. Site of the source of the Daumalcheroo.—"*b*" Pass; North arcot dist., Chundragherry tal. In Eastern ghauts [q.v.], leading from lowland talooks to those above ghauts [q.v.]. It runs along the Daumalcheroo valley and through the Cullore polliem to the Cuddapah district. Along it passes the trunk road between Madras and Cuddapah.——*Cull palagay* (ಕಲ್ಲಿನಹಲಿಗೆ - kallinahalige, Can.; రాతిపలక - rátipalaka, Tel.; കല്പലക - kalpalaka, Mal.; கற்பலகை - karbalagai, Tam.). Means stone + slab. Slate. A fissile non-crystalline argillaceous rock, the planes of separation in which are not due to bedding, but to cleavage. The term is popularly applied to hardened shales, which are bedded, not cleaved; and to schists, which are crystalline.—*Cullpauty* (കല്പാത്തി - kalpátti, Mal.). From (above + pátti, mal. trough); from rocky bed of the river.—"*a*" Village; Malabar dist., Palghaut tal.; lat. 10° 47′; long. 76° 41′; from Calicut E.S.E. 66 miles; from Palghaut N. 2 miles. The most important of the nineteen separate settlements or Graumams of the Bramin community called Puttar who belong to this talook. Forms part of Palghaut municipality.—"*b*" River; Malabar dist., Palghaut tal. The most important of the rivers intersecting the talook. Locally called Nelanuddy. Takes its source at Chentaumaracoolam in hills north of Walayaur. Unites with Cunnaudy river near Parly railway station, and with Colangode river a little further on.——*Cull poo* (రాతిపువ్వు - rátipuvvu, Tel.; கற்பூ - karbú, Tam.). Means flower stone. Any fossil or organic remains, animal or vegetable, imbedded in rocks.—*Cullroyamullay* (கல்ராயன்மலை - kalráyanmalai, * Tam.). From (kaláyan, tam. name of a local poligar + malai, tam. mountain). Range of hills; S. arcot, Salem dists., Ahtoor tal.; pop. 6,038; lat. 11° 38 to 12° 04′ N.; long. 78° 32′ to 78° 52′ E.; from Ahtoor N. 4 miles; from Salem E. 21 miles. The principal part of the group is in Ahtoor talook. East of the Tennaunday mullays and separated from them by the Cottapputty pass. Inhabited principally by Malayaulies. The range has no general name among the natives, but every principal division bears a different appellation. The extreme southern and south-west part is known as the Periya or Great cullroyen; this is the loftiest part of the range. The low western part is known

as Chinna or Little cullroyen. The north-east end has the name Coorumbagownda mullay. The hills are divided into the five poliputs of Aryagownden, Chinna cullroyen, Coorumbagownden, Jadaygownden, and Periya cullroyen. These again are sub-divided into nauds. Periya cullroyen jagheer contains Keelnaud, about 20 square miles, in which are the Codicullaur, Sholaiyaur, Varattaur, Vellapaurayaur, and Vellaur rivers; the principal peaks are Aviyaraumanmullay, Chinna tripattymullay and Deetchagirymullay. Aryagownden jagheer contains the Sholaiyaur and Vellapaurayaur rivers and Vadakmullay and Yairimullay peaks. Chinna cullroyen jagheer contains the Periyaur and Vellaur rivers and the Condacullmullay, Deetchagirymullay, and Tencullmullay peaks. Periya cullroyen jagheer contains the Oopporaur river and the Aviyaraumanmullay peak. The hills were formerly held by petty native chiefs, who recklessly denuded the slopes. Cary raman pagoda on the Periya cullroyens is held in high esteem by the Malayaulies, and strangers are required to uncover their feet on approaching it.——*Culltutcha* (கற்றச்சன் - kattaççan, Tam.). From (taççan, tam. artisan). Tamul stone cutters [cullcootaca].——*Cullvettybazaar* (കൽവെട്ടിബജാർ - kalvettibajár, Mal.). From (kalvetti, mal. stone cutter + bázár, hind. bazaar). Village; Cochin state, Cochin tal.; lat. 9° 57′; long. 76° 17′; from Ernacolum S.W. 3 miles; from the sea E. ½ mile. Chief native quarter of Cochin, mostly Moplahs. Narrowly escaped destruction by fire on New year's day 1876, and again on 4th January 1889. The canal of this name is about six miles long. Starting from Cullvetty it joins the river at Cullancherry. Owing to silting, through navigation is possible only during monsoons.——*Cull wodda* (ಕಲ್ಲೊಡ್ಡ - kallodda, Can.). From (odda, can. the caste). Stonemason woddas [q.v.].——(8) The following are the different kinds of Cull.——*Caroom cull* (నల్లరాయి - nallaráyi, Tel.; കരിങ്കല്ല - karinkallu, Mal.; கருங்கல் - karungal, Tam.). Vernacular means black stone. The only general term for granitic rocks, though these are often light-colored and variegated. Granite, the first of the igneous rocks rich in silica composed of felspar quartz, and mica. The felspar almost always orthoclase; a second felspar, usually oligoclase, being frequently present also. In some forms of granite the mica absent; then it becomes aplite or pegmatite. Granite is one of the most common rocks in S. india, and is met with both in strata and unstratified. The best granite quarries are at Bangalore, Sadras, Cuddapah, Vizagapatam and Bellary. The prices vary in different localities, according to the cost of labor and the hardness of the stone. There is a variety of green stone [putchay cull] resembling the white stone of Scotland which is much used for building and ornamental purposes in Madras; it occurs in many parts here and is known as fire stone or grey granite. It is hard and durable, but more expensive than true granite from the greater labor of quarrying and cutting the blocks. Ornamental granites of bright colors occur in several localities. Those of Salem, Chittore and Seringapatam are flesh-colored, red, green, yellow and grey. Those of Arcot and Goodoovancherry are pure white. The Bellary and Bangalore syenites are red, grey, and white with the colors blended in about equal proportions. Some of the pale-grey granites and pegmatites or binary granites of Southern india contain a large proportion of felspar which leads to their decay. The carvings at Conjeeveram, Sadras and Chidambaram have lost their sharpness from this cause; while, on the other hand, those at Tadpatry, Vontimittah, Hirey toombal, and other places in the Ceded districts [q.v.], are nearly as sharp as when first executed. In a few temples and Mahomedan tombs, the most richly cut pillars and ornaments are hewn out of basalt, augite, or basaltic hornblende. The best specimens of this kind of carving are at Vellore, Seerah, Tinnevelly, Humpy, Adony and Anagherry. The carvings have often a polished surface resembling black marble, or hornblende [shalavay cull], but they are so hard as to strike fire with steel. Many of the temples of Southern india are constructed of granite. Its preservation, and the sharpness of its carvings testify to its great durability; and the age of these buildings is constantly under-estimated. In addition to the general use of this material for building and religious sculptures, the natives occasionally make domestic articles of it, such as round millstones, pestles and mortars, door-posts, lintels, &c. For gneiss which passes by insensible gradations into granite, natives have no separate term.——*Caroom palingoo cull* (கரும்பளிங்குக்கல் - karumbalingukkal, Tam.). From (karum, tam. black + palingu, tam. crystal + kal, tam. rock). Tam. also (mégavarnakkal), meaning cloud + color + stone. Basalt, a volcanic rock. Composed of augite and labradorite, often with olivine in disseminated grains. The term is chiefly applied to the hard, black, crystalline form of dolerite, and especially to that variety of the rock which exhibits prismatic structure.——*Caureeya cull* (నల్లసీసము - nallasísamu, Tel.; காரீயக்கல் - káríyakkal, Tam.). Means black lead stone. Graphite. A form of carbon [kary], occurring pure or mixed with more or less iron oxide, in crystalline rocks. See vol. II, 32.——*Cauvy cull* (కావిరాయి - káviráyi, Tel.; காவிக்கல் - kávikkal, Tam.). Means red ochre stone. Red chalk. A mineral dye. The essential ingredient is peroxide of iron [auhan], whether as an anhydrous red hæmatite or the hydrated brown and yellow limonites [cauvy, sheemay choonam].——*Choonam cull* (சுண்ணம்புக்கல் - shunnámbukkal, Tam.). Limestone [kankar, shookkaun cull].——*Coolancull* (سنگریزه - sangrezah, Pers. and Hind.; పలుకురాయి - palukuráyi, Tel.; கூழாங்கல் - kúzhángal, Tam.). Title and Tam. from (góla, san. sphere + kal, tam. stone). Hind. from (sang, pers. stone + rezah, pers. fragment). Tel. from (paluku, tel. piece + ráyi, tel. stone). Shingle. Loose pebbles, especially those on the sea-shore.——*Coorvindacull* (కురువిందరాయి - kuruvindaráyi, Tel.; குருவிந்தக்கல் - kuruvindakkal, Tam.). From (kuruvinda, san. emery). Grey flint. An aqueous rock. A grey, heavy, and nearly pure silicious fossil usually found in nodules, particularly in Salem district. It is collected and pounded by stone-cutters, who with it in conjunction with seed lac [q.v.] and by means of heat, prepare an aggregate, hard grindstone, with which they cut into regular shapes many valuable stones, less hard than the grey flint itself, such as copals, cornelians, jaspers, agates, &c. Other stones of a harder nature, such as the diamond, ruby, emerald and sapphire can only be cut by the diamond [corundum, ratnam].——*Dhoomra cull* (தாமிரக்கல் - támirakkal, Tam.). From (dhúmra, san. dark red). Porphyry. An igneous rock composed of a compact finely crystalline mass, in which large crystals of felspar are imbedded. A porphyritic granite, syenite, green stone, &c., is a rock in which the felspar is in large distinct crystals.——*Manal cull* (ಉಸುವುಕಲ್ಲು - usuvukallu, Can.; ఇసుకరాయి - isukaráyi, Tel.; மணற்கல் - manargal, Tam.). Sand stone, a rock composed of sand cemented together. An aqueous rock. Near Tadda and Podily in Nellore there are beds of white sand stone of superior working quality, and a valuable building material. At Shreepermatore and at Vriddhauchellam there are immense beds of another kind, used by natives for rice mills and grindstones. At Sadras there is one of the finest quarries in the Presidency; the grindstones made from which are equal to those imported from England. At Pannambauray in Tinnevelly district there is a sort of bath stone valuable for building. The Godavery anicut [q.v.] is built of a sharp grained sand stone of a bluish color and variable in hardness and durability; exposure hardens the surface of this stone probably from the lime [choonam] which it contains. The Kistna anicut is built of a coarser description of sand stone blended with gneiss and containing grey quartz and garnets of a light pinkish color, but not valuable. This rock occurs in large inclined strata lying loosely upon each other, it is easily quarried, and is a handsome building material, but being very brittle, it is not susceptible of a finely chiseled surface. The specific gravity of this stone is 157 lb. per cubic foot.——*Mauvayira cull* (மாவயிரக்கல் - mávayirakkal, Tam.). From (má, tam. flour + vayiram, tam hardness). Felspar. A group of minerals, one or the other species being a principal constituent of almost all igneous rocks. Orthoclase, albite, oligoclase, and labradorite are felspars; all consist of double silicates of alumina and one or more alkalies [cauram] or alkaline earths [sowdoo], and crystallize in the oblique or anorthic system.——*Ooray cull* (कष - kasha, San.; محك - mihakk, Ar.; معيار - miyár, Pers.; کسوٹی - kasotí, Hind.; بتوجي - batuuji, Malay; ಒರೆಗಲ್ಲು - oregallu, Can.; ಒರೆಕಲ್ಲು - orekallu, Too.; ఒరగల్లు - oragallu, Tel.; ഉരക്കല്ല - urakkallu, Mal.; உரைகல் - uraigal, Tam.). San. from (kash, san. to rub). Ar. from (hakka, ar. to rub). Pers. from (ará, ar. to measure). Hind. from sanscrit. Malay from (batu, malay, stone + uji, malay, to assay). Tel. from (orayu, tel. to rub + kallu, tel. stone). Tam. from (urai, tam. to rub + kal, tam. stone). Touch stone. Lat. lapis lydius. A silicious fossil black, smooth, and somewhat glossy. Introduced into S. india from the more northern and western tracts of India. Used by gold and silversmiths for ascertaining the purity and exact color of metals [loham]; the stone is first well rubbed with the metal to be tried, it is then pressed against a dark-colored wax [mom], and on this it leaves a small portion of the metal from which the whole is judged.——*Padicutt cull* (మెట్టునాప - mettunápa, Tel.; படிக்கட்டுக்கல் - padikkattukkal, Tam.). Means step stone. The German trap, which also means stair; a name originally applied to tabular green stone and basaltic rocks, from their frequently occurring in hills with step-like terraces on the sides; subsequently used for all igneous rocks not distinctly granitic.——*Palingoo cull* (स्फटिक - sp'hatika, San.; بلور - billaur, Hind.; స్ఫటికపురాయి - sp'hatikapuráyi, Tel.; பளிங்குக்கல் - palingukkal, Tam.). San. from (sp'hat, san. to split). Crystal. A mineral [dhautoo] or salt [ooppoo] having regular polyhedral structure. All crystalline forms known are divided into six systems:—the cubical or isometric; the pyramidal, dimetric, or tetragonal; the prismatic, trimetric, or orthorhombic; the hexagonal or rhombohedral; the monoclinic or oblique; and the triclinic or anorthic [vencull].——*Parookkay cull* (గులకరాయి - gulakaráyi, Tel.; பருக்கைக்கல் - parukkaikkal, Tam.). Gravel. Loose pebbles, with or without sand.——*Paroomanal cull* (பருமணற்கல் - parumanargal, Tam.). From (paru, tam. big + manal, tam. sand + kal, tam. stone). Grit. A sand stone in which the grains of quartz are angular.——*Putchay cull* (ಪಚ್ಚೆಕಲ್ಲು - paççekallu, Can.; పచ్చరాయి - pattsaráyi, Tel.; பச்சைக்கல் - paççaikkal, Tam.). Green stone. A general name for igneous rocks, composed principally of felspar and hornblende. Certain plutonic rocks containing augite are also

called green stones.——*Sarpaunga cull* (సర్పశిలాయి - pámunvanneráyi, Tel.; சருப்பாங்கக்கல் - sharuppángakkal, Tam.). The mottled appearance of rock resembling serpent's skin [coosam]. Serpentine. A mineral, usually of a greenish color, consisting of hydrous silicate of magnesia. Or a rock composed of the mineral in a more or less pure state. See vol. II, 39.——*Shalavay cull* (مرمر - marmar, Hind.; తలవరాయి - tsalavaráyi, Tel.; சலவைக்கல் - shalavaikkal, Tam.). Dravidian means cold stone. Any stone which when polished feels specially cold to the touch; generally applied to marble, that is to say to the finer and more crystalline forms of limestone [choonam cull] capable of being polished. Black marble and black and white marble exist in the Ceded districts [q.v.]; a greenish kind veined with black exists in the Bababooden [q.v.] mountains in the Western ghauts [q.v.]; and a grey and dirty white sort, variegated with black and coarse grained on the surface exists in the Tinnevelly district. At present the manufacture in the article is insignificant and confined to small miscellaneous articles for domestic use. The term is also applied to hornblende, a silicate of various bases, usually lime [choonam], magnesia or iron [auhan], or combinations of these with each other, part of the silica being often replaced by alumina; the crystallization is oblique; hornblende is an important constituent of many igneous rocks, such as syenite, diorite, &c.; hornblende is formed into images [shilay] and ornaments for public buildings.——*Shaunay cull* (शाण - shána, San.; سلی کا پتھر - sillíkápatthar, Hind.; సానరాయి - sánaráyi, Tel.; ചാണ - chána, Mal.; சாணைக்கல் - shánaikkal, Tam.). Hone, whetstone [tripatty cull].——*Shemboo tee cull* (செம்புத்தீக்கல் - shembuttíkkal, Tam.). From (shembu, tam. copper + tí, tam. fire + kal, tam. stone). Copper pyrites. Sulphide of copper [taumram] and iron [auhan], containing, when pure, 34·6 per cent. of copper, crystallizing in the pyramidal or tetragonal system.——*Shencull* (செங்கல் - shengal, Tam.). Means red stone. Brick. See Shengal.——*Shory cull* (బొంతరాయి - bontaráyi, Tel.; சொறிக்கல் - shorikkal, Tam.). Tel. from (bonda, tel. fissure + ráyi, tel. stone) [vettoocull]. Tam. from (shori, tam. rough + kal, tam. stone). Laterite [q.v.].——*Sookkaun cull* (సున్నపురాయి - sunnapuráyi, Tel.; சுக்கான்கல் - shukkángal, Tam.). Limestone [choonam cull, kankar].——*Sowcaura cull* (سنگ جراحت - sangijaráhat, Hind.; బలపపురాయి - balapapuráyi, Tel.; சவுக்காரக்கல் - shavukkárakkal, Tam.). Pers. from (sang, pers. stone + jaráhat, pers. wound). Tel. from (balapamu, tel. pot stone + ráyi, tel. stone). Tam. means soap + stone. Tam. also (mákkal), meaning flour + stone [balapam]. Soap stone. Otherwise steatite. A metamorphic rock. Has a soft and greasy feel; is of a yellowish white or greenish gray color; sometimes spotted or veined; with little lustre or transparency; is composed of silica, magnesia, alumina, oxide of iron, and water in various proportions; is soft enough to be easily cut, but is tough and hardens by exposure; is used for carving small models of buildings, making boxes, trays, or other ornaments. At Kurnool and Salem and near Mysore there are very fine white soap stones, and near Chittore there is a valuable description, similar to the Cornish serpentine, procurable in large blocks and suitable for many statuary and other similar decorative purposes; there is a quarry of good pot stone at the Nagary hills. When oiled this stone resembles in a great degree black marble [shalavay cull]. In its laminated form this is Abruck [q.v.]. See vol. II, 39.——*Tavalay cull* (தவலைக்கல் - tavalaikkal, Tam.). From (tavalai, tam. frog). Iron stone. Any ore of iron [auhan].——*Teecull* (అగ్నిశిల - agnishila, Tel.; தீக்கல் - tíkkal, Tam.). Means fire stone. Pyrites. Several sulphides of metals [loham] are thus termed; iron pyrites, copper pyrites, &c. Used alone generally signifies iron pyrites [auhan].——*Teetatty cull* (अग्निप्रस्तर - agniprastara, San.; حجرالنار - hajarunnár, Ar.; آتش زنه - átishzanah, Pers.; چقماق - chakmák, Hind.; بتوافي - batuapi, Malay; ಚಕಮುಕಿಕಲ್ಲು - chakamukikallu, Can.; ಚಕಮುಕಿಕಲ್ಲು - chakamukikallu, Too.; చకిముకిరాయి - chakimukiráyi, Tel.; தீத்தட்டிக்கல் - títtattikkal, Tam.). San. from (agni, san. fire + prastara, san. stone). Ar. from (hajar, ar. stone + nár, ar. fire). Pers. from (átish, pers. fire + zanah, pers. emitter). Hind. from turkish. Malay from (batu, malay, stone + api, malay, fire). Can. from hindostany. Tel. from (chakimuki, tel. the noise produced by striking flint against steel + ráyi, tel. stone). Tam. from (tí, tam. fire + tattu, tam. to strike + kal, tam. stone). Flint. An aqueous rock. Siliceous concretion, usually translucent and tolerably homogeneous, occurring in chalk [sheemay choonam] or limestone [choonam cull]. See vol. II, 40.——*Tripatty cull* (తిరుపతిరాయి - tirupatiráyi, Tel.; திருப்பதிக்கல் - tiruppathikkal, Tam.). An inferior species of novaculite, or house stone, of a dark green color. Occasionally to be met with, particularly near Tripatty. Used by barbers for sharpening razors [shaunay cull].——*Ven cull* (తెల్లరాయి - tellaráyi, Tel.; வெண்கல் - vengal, Tam.). Means white stone. Tam. also (palingukkal), meaning crystal + stone [palingoo cull]. White translucent quartz. Pure silica, crystallizing in the hexagonal system. Found in large, cracked, shapeless masses. In the state of powder, rubbed over fine choonam [q.v.] work to give it lustre and durability. A species called fat quartz is employed in Mysore in making glass [cunnaudy].——*Vettoo cull* (బొంతరాయి - bontaráyi, Tel.; வெட்டுக்கல் - vettukkal, Tam.). Title and Tam. from (vettu, tam. to cut + kal, tam. stone). Tel. from (bonda, tel. hole + ráyi, tel. stone) [shory cull]. Laterite [q.v.].——**(9)** For precious stones see Ratnam; for archæological remains see Aursham.

CULLACOORCHY (கள்ளக்குறிச்சி - kallakkuriççi, Tam., kallakurchi *). From (kallan, tam. thief + kuriççi, tam. village) [cullan].——**(1)** Talook, South arcot district; Tahsildar's pay Rs. 175; lat. 11° 33′ to 12° 05′ N.; long. 78° 40′ to 79° 15′; area 868 square miles; pop. 240,181. Language Tamul. S.W. of district. Bounded:—north, Trinomallee talook; east, Tricalore talook; south, Vriddhauchellâm talook and Ahtoor talook of Salem district; west, Ootancaray and Ahtoor talooks of Salem district. Physical aspect is rocky intercepted by jungle streams. Soil sandy and clayey. Agriculture, weaving and petty trade in sundry articles and wood. Irrigation by tanks, anicuts [q.v.], wells and channels [q.v.]. Places of archæological interest:—Bramhacoondam, Rishivandyam, Rowta nullore, Shuncaraupooram, Tirvarungam, Tyaugadroog, Varanjaram. The leading places, &c., in the talook are the following.——*Aryagownden* (அரியக்கவுண்டன்மலை - ariyakkavundanmalai, Tam.). After a person of that name. Zemindarry, Hills; pop. 892; lat. 11° 53′; long. 78° 43′; from Cuddalore W. 74 miles; from Cullacoorchy N.W. 22 miles. Zemindarry is inhabited exclusively by Malayaulies. Considerable trade in wood carried on with the plains.——*Bramhacoondam* (பிரம்மக்குண்டம் - pirammakkundam, Tam.). From (brahma, san. the god + kunda, san. sacrificial pit of fire). Pop. 1,346; acres 573; lat. 11° 59′; long. 78° 58′; from Cuddalore W.N.W. 60 miles; from Cullacoorchy N.N.W. 17 miles. White vibhooty [q.v.] found here is said to be the ashes of the sacred fire made by Bramha.——*Chinna salem** (சின்னச்சேலம் - shinnaççélam, Tam.). From (shinna, tam. small + shélam, tam. town of that name). Tam. also (shélam). Village; pop. 6,091; acres 4,984; lat. 11° 38′; long. 78° 55′; from Cuddalore W.S.W. 60 miles; from Cullacoorchy S.W. 9 miles; from Salem E. 50 miles. On the route from Salem to Cuddalore. Coarse strong cloths extensively manufactured.——*Chittalore* (சித்தலூர் - shittalúr, Tam.). From (shittal, tam. cloth + úr, tam. village). Pop. 2,172; acres 3,211; lat. 11° 41′; long. 79° 07′; from Cuddalore W. 46 miles; from Cullacoorchy E.S.E. 8¾ miles. Annual festival on the birthday of Ancaulamman [q.v.]. Mahomedan sacred place with mosque [musjid] containing the tomb of Shah abbaus barauny, a Syed fakeer [q.v.]. At the Buckreed [q.v.] a number of fakeers assemble.——*Congaroya polliem* (கொங்கராயப்பாளையம் - kongaráyappálaiyam, Tam.). From (kongu, tam. the country + rájá, san. king + pálaiyam, tam. fortified village). Pop. 3,007; acres 3,524; lat. 11° 39′; long. 79° 08′; from Cuddalore W.S.W. 45 miles; from Cullacoorchy S.E. 10 miles. North are dolmens [coday cull] formed of granite [caroom cull], one or two of which are large enough to give shelter to 200 people.——*Coorumbagownden* (குரும்பக்கவுண்டன்மலை - kurumbakkavundanmalai, Tam.). After a person of that name. Zemindarry, Hills; pop. 2,503; lat. 11° 53′; long. 78° 53′; from Cuddalore W. 63 miles; from Cullacoorchy N.W. 13 miles. Zemindarry inhabited by Malayaulies and hill-men. Wood trade with the plains is extensively carried on. The hills lie between 11° 51′ and 12° 1′ N. lat. and 68° 42′ and 78° 55′ E. long.——*Cullacoorchy* (கள்ளக்குறிச்சி - kallakkuriççi, Tam.). See below.——*Cullroyen* (கல்ராயன் - kalráyan, Tam.). See Cullroyamullay.——*Gomookhanuddy* (கோமுகநதி - kómuganathi, Tam.). See sep. title.——*Jadaygownden* (சடையக்கவுண்டன்மலை - shadaiyakkavundanmalai, Tam.). After a person of that name. Zemindary, Hills; pop. 3,082; lat. 11° 45′; long. 78° 51′; from Cuddalore W. 65 miles; from Cullacoorchy W. 12 miles. Zemindarry inhabited by Malayaulies. Trade in wood with the plains.——*Manimooctah* (மணிமுத்தா - manimuttá, Tam.). See sep. title.——*Mayoor nuddy* (மயூரநதி - mayúranathi, Tam.). From (mayúra, san. peacock + nadí, san. river). Sanscrit name (mayúra), means peacock [mayil]. River. Tributary of the Manimooctah. At the confluence is an old and famous Shiva temple.——*Moosamanaur* (முசமனாறு - musamanáru, Tam.). From (mu, tam. three + shaman, tam. equal + áru, tam. river). River. Large jungle stream. Rises in the Cullroyens and falls into the Ponniar. Irrigates a few villages in Cullacoorchy talook.——*Paukambaudy* (பாக்கம்பாடி - pákkambádi, Tam.). From (pákkam, tam. agricultural district + pádi, tam. village). Pop. 944; acres 2,248; lat. 11° 33′; long. 78° 52′; from Cuddalore W.S.W. 64 miles; from Cullacoorchy S.S.W. 15 miles. Palmyra [q.v.] jaggery [q.v.] manufactured.——*Ponniaur* (பெண்ணையாறு - pennaiyáru, Tam.). See sep. title.——*Rishivandyam* (இருசிவந்தியம் - irusivandiyam, Tam.). From (rishi, san. sage + vandya, san. fit to be worshipped). Pop. 2,124; acres 2,903; lat. 11° 49′; long. 79° 08′; from Cuddalore W.N.W. 45 miles; from Cullacoorchy E.N.E. 10¼ miles. Old and large Shiva temple.——*Shuncaraupooram* (சங்கராபுரம் - shangarápuram, Tam.). From (shankara, san. shiva, the pleasure giver + pura, san. town). Pop. 1,453; acres 629; lat. 11° 53′; long. 78° 57′; from Cuddalore W.N.W. 58 miles; from Cullacoorchy N.N.W. 11 miles. Cattle-breeding centre. Old Shiva temple.

——*Torsalore* (தொறசலூர் - torasalúr, Tam.). From (toru, tam. cattle herd + shál, tam. abundance + úr, tam. village). Village; pop. 1,070; acres 2,730; lat. 11° 46′; long. 79° 07′; from Cuddalore W. 47 miles; from Cullacoorchy E.N.E. 7 miles. Slippers manufactured.——*Tyaugadroog* (தியாகத்துருக்கம் - tiyágatturukkam, Tam.). See sep. title.——(2) Town, Head-quarters of talook; South arcot dist., Cullacoorchy tal.; pop. 3,816; acres 1,980; lat. 11° 41′; long. 79° 00′; from Chidambaram W.N.W. 54 miles; from Cuddalore W. 54 miles; from Madras S.W. 128 miles; from Tindivanam S.W. 57 miles; from Tricalore S.S.W. 22 miles; from Vriddhauchellam N.W. 30 miles. Remains of a small fort, the site of which is now held on puttah [q.v.].

CULLAN (ಕಳ್ಳ - kalla, *Can.*; కల్లుడు - kalludu, *Tel.*; கள்ளன் - kallan, *Tam.*). From (kal, tam. to steal). Means a thief. Hill tribe or Pariah proper name. Feminine Cully [peyar]. Also a tribe now chiefly inhabiting part of country east of Madura, and found scattered throughout Tinnevelly, Salem, Tanjore, Chingleput and Coimbatore districts. Called Collery in the old English writers. In ancient times inhabited whole country from Trichinopoly to Cape comorin. In recent history these people sided with the Mahomedans and the British against the French. Their hereditary chieftain is the Rajah or Tondiman of Poodoocottah. The tradition among them is that they and the Maravar of Ramnaud are from the same stock. Like the Maravar they take Tevar [q.v.] as tribal title. A common title also is Ambalacaurar [q.v.] or palace servants. Nominally of the Sheiva sect, they are mostly devil-worshippers. They usually bury their dead [shavacaud]. They have a first and second marriage like the Maravar. Divorce and remarriage of widows are allowed. Marriage of near relatives is usual. The Western cullar of Madura are polyandrists. It constantly happens there that a woman is the wife of either ten, eight, six, or two husbands, who are held to be fathers jointly and severally of any children that may be born of her. Many Cullar practise circumcision. The tribal weapon is the boomerang [collery stick]. The tribe is sub-divided into numerous minor communities distinguished by family titles such as the following:—Calacooday, Caudavaroya, Caulingaroya, Malavaroya, Mauthooraur, Menautroya, Panniconda, Ponnapoonda, Pullavaroya, Raujauly, Shervaicauran, Shirnautroya, Sholaga, Sholangateva, Tanjiroya, Tengonda, Tondiman, Vaundaiyan, Vunniya. There is a Tamul proverb:—கதிர் நூல் குறைந்தாலும் கள்ளச்சி கழுத்து நூல் குறையாது—"Though the thread on the spindle diminishes, that on the neck "of a Culla woman does not;" because she is never without a husband. And another:—வெள்ளாளன் மாடே மாபு கள்ளர் திருட்டே திருட்டு—"Of all ranks that of the "Vellaulan is foremost, of thefts that of the Cullan is notorious." Number about 400,000. As plant first term cullan means false or imitative. Ex.:—Kœmpferia rotunda (kallakúve), false curcuma augustifolia; Sida rhombifolia, var. retusa (kallangadalegida), false cicer arietinum. See gloss. paragraphs.——*Culla cammattam* (കള്ളക്കമ്മട്ടം - kallakkammattam, Mal.). From (above + kammattam, mal. coinage). Counter-feit coin [naunyam].——*Cullacoorchy* (கள்ளக்குறிச்சி - kallakkuriççi, Tam.). See sep. title.——*Cullasarakk* (கள்ளச்சரக்கு - kallaççarakku, Tam.). From (above + sharakku, tam. goods). Smuggled goods [sarakk].

CULLAUDAN (கல்லாடன் - kalládan, *Tam.*). From (kal, tam. to learn + ádu, tam. to play). One of the forty-eight professors of the Madura college [q.v.]. He composed a treatise on grammar [lacshanam] and rhetoric called Cullaudam. It is exceedingly difficult. There is a Tamul proverb:—கல்லாடம் படித்தவனோடு மல் ஆடாதே—"Do not contend with him "who has studied cullaudam."

CULLY (கள்ளி - kalli, *Tam.*). Same as Milk hedge, euphorbia sp. Also plant second term in other genera. Ex., where transl. is of first term:—Bryophyllum calycinum (viranakkalli), ulcer; Kalanchoe laciniata (malaikkalli), hill; Opuntia dillenii (mullukalli), thorn; Plumeria acutifolia (perungalli), large; Sarcostemma intermedium (kodikkalli), creeper; Soymida febrifuga (shurakkalli), fever. See gloss. paragraphs.

CUM (کم - kam, *Hind.*). From persian. Deficient. Low.——*Cum bakht* (کم بخت - kambakht, Hind.). From (above + bakht, ar. fortune). Unfortunate.——*Cumbaury* (ಕಂಬಾರಿ - kambári, Tel.). From (above + bhára, san. burden). A sub-renter.——*Cumbhurty* (کم بهرتی - kambhartí, Hind.; ಕಂಭರ್ತಿ - kambharti, Can.; కంభర్తి - kambharti, Tel.). From (above + bhartí, hind. full assessment). Land whose assessment is fixed below the full or bhurty [q.v.] standard of assessment [inam]. See vol. I, 112.——*Cummishara* (کم شرح - kamsharah, Hind.). From (above + sharah, ar. rate). Reduction to a lower grade.——*Cummy* (کمی - kamí, Hind.). From persian. Deficiency, decrease.——*Cumzarf* (کم ظرف - kamzarf, Hind.). From (above + zarf, ar. vessel or capacity). Base; a term of abuse.——*Cumzaut* (کم ذات - kamzát, Hind.). From (above + zát, pers. race). Low-born; a term of abuse.

CUM (கம் - kam, *Tam.*). Labour.——*Cumbala* (கம்பள - kambala, obl.; கம்பளத்தான் - kamalattán, pers. sing.; கம்பளத்தார் - kambalattár, pers. pl. Tam.). From (kambalam, tam. agricultural country). Otherwise Tottiya. An agricultural caste, sub-division of the vadoogar, descendants of a tribe from north of vijianugger; occupied western parts of madura kingdom beginning of sixteenth century; these enlisted largely in military service under naick rulers, but under british government they settled down to agricultural life. In dress, they love bright-colored handkerchiefs [roomaul], which they wear round their heads; the women wear several rows of red glass beads round their necks and a profusion of metal and earthenware bangles [gauzoo] round their arms. They are veishnavites; both men and women are specially addicted to magic and are regarded with awe; they cure snake-bites by incantations. They are uncommonly industrious and energetic and are great proficients in the art of reclaiming waste-lands. Numbers about 27,000 [jauty].——*Cumban* (கம்பன் - kamban, Tam.). From cumba, naud the country of his birth. Author of Tamul ramayanam [q.v.]. Posthumous son of a ruler of Cumba naud, who was assassinated. Born in poverty at Tirvilandore. Brought up by one Siddayyan of Vennainullore. Later on Rajendra chola invited him to Warriore. The Ramayanam being in Sanscrit, Cumban, Ottacoottan, and other court poets, undertook to imitate it in Tamul. Cumban's was best. Varagoona paundyan of Madura then invited him. There he composed Saraswaty antaudy [q.v.] in thirty stanzas in praise of Saraswaty [q.v.] Cumban's ramayanam consists of 12,016 stanzas, arranged in five books. Other works are Caunchy pooraunam, Caunchy pillay tamul, Chola cooravanjy, Shilay yezhoopatt and Yair yezhoopatt. His son Ambicaupaty, carrying on an intrigue with the king's daughter, was impaled alive, and he died after having lingered on the stake for a couple of days, repeating incessantly the subjoined verse:—எரியுதெரியுதென்னுள்ளீரலைப்பற்றி யெரியுதவியுதில்லை யென்செய்வேன் பொறியரவ நஞ்சிலேதோய்ந்த நளினவிழிப்பெண்ணணங்குதெருத்தெருவிட்டதெருப்பு—"What can I do? The fire which the "divine damsel with venomed eyes has kindled in my heart "burns within me, it burns without extinguishing." Cumban effected his escape into the Paundyan country, whence he sent to the king the following stanza:—வில்லம்பு சொல்லம்பு மேதினியிலிரண்டுண்டு வில்லம்பு சொல்லம்பை வெல்லாது வில்லம்பு பட்டதென்மார்பிற் பார்வேந் தேயுன்கிளையைச் சுட்டதடா வென்வாயிற்சொல்—"There are two kinds of arrows on earth, of which one is shot "out from the bow, and the other from the mouth. O king! "thine arrow from the bow has hit my breast, but mine, the "word of my mouth, has burnt up thy race." After his flight he was reduced to poverty. He died aged sixty at Nattarasancottay in Ramnaud, and was buried there in a sitting posture. His grave forms an object of pilgrimage. The earth thence is given to stupid children.——*Cumma* (కమ్మ - kamma, Tel.). Sub-tribe of the Balijes, now often agricultural. Besides Vishnoo the Cummavaur worship Gungay. Numbers about 800,000; mostly in North arcot, Kistna, and Nellore.——*Cummara* (కమ్మర - kammara, Tel.). Ironsmith. The corresponding terms are:—Can. cummaura, Mal. peringollan, Tam. colla. Distinguish from Cummaulan.——*Cummattam* (கம்மத்தம் - kammattam, Tam.). From (kammam, tam. labor). A grant of a village for a wife's private expenses, generally for betel [q.v.]. Also land which a zemindar [q.v.] or inamdar keeps in his own hands, cultivating by laborers. See vol. I, 112.——*Cummaulan* (கம்மாளன் - kammálan, Tam.). From (kam, tam. smithery + ál, tam. to rule). The Sanscrit is Punchaula [q.v.].—"*a*" The five-fold guild of Tamul artisans. Distinguish from Balootah or set of village public servants; also from Cummara and Cumsaula. See vol. I (67) for the five classes composing the Cummaular or Punchaular in different languages. They take the title of Acharry, teacher, priest; also of Puttan, a corruption of Bhattan; also in the south, of Vishwa bramin.—"*b*" In religion they like the weaver classes are divided into three sects, viz., Sheiva, Veishnava and Lingayet; but those professing the Veishnava faith are comparatively very few. The self-called Vishwa bramins are mostly Sheiva sect, worshipping also Caumautchy amman, Cauly, and village gods. All Cummaular wear threads, and in large towns where they are congregated in communities, have their own priests to officiate at marriages and funerals [carmauntaram, shavacaud]. Cummaular are quiet and respectable men, but they have an aversion to Bramins, and have their own gooroo or family priest and their own books. They have as an idol a figure like a sitting Booddha. Some say they are the descendants of Booddhists, partially converted under persecution to an ostensible Braminism.—"*c*" They form the chief of the left-hand castes [yidangay]. Most bury their dead in a sitting posture; to obtain which, as death comes on, they raise the upper part of the body against a wall, to which by a peg or nail they secure the head. The veishnava artisans burn their dead. The malayalam artisans practise polyandry, with one wife to three or four brothers.—"*d*" The following is a legend about the Cummaular. In the town of Manda anciently the Cummaular lived closely united together; and were employed by all ranks of men, as there were no artificers besides them. They feared and respected no king, which offended certain kings, who combined against them, taking with them all kinds of arms. But as the fort in which the Cummau-

lar lived was entirely constructed of loadstone [cauntam], this attracted and drew the weapons away from the hands of the assailants. The kings then promised a great reward to any who should burn down their fort. No one dared to do this. At length the courtezans [devadausy] of a temple engaged to effect it and took the pledge of betel [q.v.] and areca [q.v.], engaging thereby to do so. The kings greatly rejoicing, built a fort opposite, filled with such kind of courtezans, who by their singing attracted the people from the fort. One of these at length succeeded in extracting from a young man the secret, that if the fort were surrounded with varagoo [q.v.] straw set on fire, it might be destroyed. The king accordingly had this done; and in the burning down of the fort, many of the Cummaular lost their lives; some took to ships belonging to them, and escaped by sea. In consequence there were no artificers in that country. Those taken in the act of endeavouring to escape were beheaded. One woman of the tribe, being pregnant, took refuge in the house of a Chetty, and escaped, passing for his daughter. From a want of artificers, who made implements for weavers, husbandmen and the like, manufactures and agriculture ceased, and great discontent arose in the country. The king being of clever wit, resorted to a device to discover if any of the tribe remained to remedy the evils complained of. This was to send a piece of coral [moongah], having a fine tortuous aperture running through it, and a piece of thread to all parts of the country, with promise of great reward to any one who should succeed in passing the thread through the coral. None could accomplish it. At length the child that had been born in the Chetty's house undertook to do it; and, to effect it, he placed the coral over the mouth of an ant-hole, and having steeped the thread in sugar, placed it at some little distance. The ants [choomtee] took the thread and drew it through the coral. The king seeing the difficulty overcome, gave great presents, and sent much work to be done, which the child under the counsel and guidance of its mother performed. The king sent for the Chetty and demanded an account of this young man, which the Chetty detailed. The king had him plentifully supplied with the means of making ploughshares [caur], and having him married to the daughter of a Chetty, gave him grants of land for his maintenance. He had five sons, who followed the five different branches of work of the Cummaular tribe. The king gave them the title of Punchaular; down to the present day there is an intimate relation between these five branches, and they intermarry with each other; while as descendants of the Chetty tribe, they wear the poonool [q.v.] or caste-thread of that tribe. Those of the Cummaular that escaped by sea are said to have gone to China [q.v.].

CUMBLY (कम्बल - kambala, *San.*; کمل - kammal, *Hind.*; ಕಂಬಳಿ - kambali, *Can.*; కంబళి - kambali, *Tel.*; കമ്പിളി - kampili, *Mal.*; கம்பளி - kambali, *Tam.*). San. from (ka, san. body + val, san. to cover). A coarse woollen blanket. Cumblies are woven in almost every district of the wool [pushm] of the country. The wool is spun by hand; the yarn is sized with the juice of the common squill; the woof is beaten with a hand batten [atchoo] in the way that sailors adopt in forming mats for protecting riggings, no reed being used. A finer description of cumbly, of which the sepoy [q.v.] cloaks were formerly made, is manufactured in Bellary district. Mysore cumblies are of superior quality, in black and white colors. Most cumblies are made in pieces of two or three feet broad and five or six or more long and most are coarse, of a dark or black color. The better kind are larger and finer, and striped or spotted black and white [nesavoo].

CUMBOO (கம்பு - kambu, *Tam.*). From (kanu, tam. joint); from jointed culms. Any culmed stalk. Generally means Bajrah.——*Cumboo grass* (கம்பம்புல் - kambambul, Tam.). Title from resemblance. Tam. from (kambu, tam. pennisetum spicatum, delile + pul, tam. grass). Title otherwise Stalk grass. Botanically Panicum [priyangoo] grossarum, linn., graminaceæ [vricsham, 156]. Spike compound; common ones, six to twelve, secund-flowered, alternate; spikelets solitary, ovate, glabrous, sub-sessile; neuter floret two-valved; caryopsis oblong, transversely wrinkled; culm creeping; leaves ovate-lanceolate, softly pubescent.——*Mady cumboo* (మడుపుకర్ర - madupukarra, Tel.; மடிக்கம்பு - madikkambu, Tam.). Tel. from (madutsu, tel. to fold + karra, tel. stick). Tam. from (madi, tam. to fold + kambu, tam. stick). Warp-beam [nesavoo].

CUMBUM* (کهم - khamam, *Hind.*; కంభము - kambhamu, *Tel.*). From (kambhadu, tel. proper name).——**(1)** Talook, Kurnool district. Tahsildar's pay Rs. 150. Area 1,056 square miles. Population 117,602. Language Teloogoo. Average breadth, 25 miles; length, 85. E. of district. Bounded N. by Marcapore talook, W. by Nullamullays, E. by Veligondas, S. by Budwail talook of Cuddapah district. Nearly half area covered with hills and jungles, offshoots of Nullamullays. Several gorges were closed by native rulers, and reservoirs formed. Chief is Cumbum tank. A few miles south of Cumbum, the valley is crossed by crest of water-shed between Goondlacumma and Saglair. Nundicanama ghaut [q.v.] and Muntraula canama pass lead across the Nullamullays. Red and loamy soils prevail. About 1,500 acres of black soil near Giddalore in the south. Principal products are paddy [q.v.], yellow cholum [q.v.], arika [khoda millet], corra [tinay], sadza [bajrah], dholl [q.v.], wheat [geung], bengal-gram, horse-gram [q.v.] and castor-oil seeds [aumanac]. Cotton [q.v.] and indigo [q.v.] formerly cultivated. Garlic [lussoon] in Toorimilla valley. Principal rivers are Goondlacumma, Saglair, and Zampalair, which rise in Nullamullays. Cumbum tank, largest in district, covers more than 4 sq. miles. Others are Caucarla and Comaravole. The Yenoomoolair in S. is utilized by channels built by Zemindar runga reddy about A.D. 1750. Places of archæological interest:—Allinagaram, Anoomoonapully, Ardaveed, Aucveed, Basineypully, Baudinauyanipully, Bogole, Bolloopully, Comaravole, Commanore, Cottacote, Cumbum, Daddavauda, Dwaurcacherla, Giddalore, Goodimittah, Jallivaury poollalcheroo, Krishnamshettipully, Mallaupooram, Mocshagoondam, Moondlapaud, Narsimhoonipully, Nemilygondam, Nullagoontla, Ooyyaulavauda, Piticauyagoondla, Podillacondapully, Potavaram, Raucherla, Rauzoopollem, Reddicherla, Rowtampully, Salcalaveed, Sarwireddipully, Sooravarapully, Tauticherla, Toorimilla, Yadavully, Yerrabollem, Yidamacull. Principal Trig. stations:—Bheiranicondah, Cuttoolacondah. The leading places, &c., in the talook are the following.——*Aucveed* (ఆకువీడు - ákuvídu, Tel.). From (áku, tel. leaf + vídu, tel. town). Village; pop. 3,155; acres 9,598; lat. 15° 34′; long. 78° 59′; from Cumbum W. 11 miles; from Kurnool E.S.E. 62 miles. Ancient weapons discovered in the valley.——*Basineypully* (బసినేపల్లి - basinépalli, Tel.). From (basava, can. bull + palli, tel. village). Village; pop. 1,959; acres 4,408; lat. 15° 27′; long. 79° 11′; from Cumbum S. 10 miles; from Kurnool E.S.E. 77 miles. E. are two dolmens [coday cull]. S. deserted Veerabhadran [q.v.] temple. On hill deserted temple of Lutchmy [q.v.]. A third deserted temple of Obleshwarasawmy near which are inscriptions.——*Bestavaurpettah* (బేస్తవారపుపేట - béstavárapupéta, Tel.). From (béstavāramu, tel. thursday + péta, tel. suburb); from its market on Thursdays. Village; pop. 1,633; acres 549; lat. 15° 33′; long. 79° 09′; from Cumbum S. 2 miles; from Kurnool E.S.E. 72 miles. Comaties carry on trade with coast districts.——*Bheiranicondah* (భైరవునికొండ - bhayiravunikonda, Tel.). From (bhairáva, san. shiva, the fearful + konda, tel. hill). Trig. station; lat. 15° 37′ 41·94″; long. 79° 02′ 16·61″; height 3,048 feet; from Bogole W.N.W. 3½ miles; from Cumbum W.N.W. 8 miles.——*Cottacote* (కొత్తకోట - kottakóta, Tel.). From (kotta, tel. new + kóta, tel. fort). Village; pop. 826; acres 3,555; lat. 15° 19′; long. 78° 54′; from Cumbum S.W. 25 miles; from Kurnool S.E. 63 miles. Fort by Chenchalamma runga reddy ancestor of Nossam poligars. Battle fought in 1779. The place also figured during the last conflict with Hyder. Mosque [musjid] in E. of village [moondlapaud].——*Cumbum* (కంభము - kambhamu, Tel.). See below.——*Cuttoolacondah* (కత్తులకొండ - kattulakonda, Tel.). From (katti, tel. sword + konda, tel. hill). Hill. Trig. station in lat. 15° 47′ 19·94″; long. 78° 52′ 17·61″; height 2,848 feet; from Boyalpully N.W. 9 miles; from Cumbum N.W. 23 miles.——*Daddavauda* (దద్దవాడ - daddaváda, Tel.). From (daddamu, tel. temple + váda, tel. village). Village; pop. 2,136; acres 4,968; lat. 15° 23′; long. 79° 03′; from Cumbum S.S.W. 16 miles; from Kurnool E.S.E. 70 miles. Inscriptions of Warrangal dynasty.——*Giddalore* (గిద్దలూరు - giddalúru, Tel.). From (gidda, tel. cow + úru, tel. village). Village, B.K.S. railway station; pop. 2,631; acres 5,367; lat. 15° 23′; long. 78° 58′; from Cumbum S.W. 19 miles; from Kurnool E.S.E. 66 miles. On Saglair at E. flank of Nullamullays between Cumbum and the Nundicanama pass. Temple of Pautaula naugeshwarasawmy in a cave, and Vishnoo temple on hill, both ancient. Ruined fort defending the approach to Cumbum. Three inscriptions at Pautaula naugeshwarasawmy.——*Goondlacumma* (గుండ్లకమ్మ - gundlakamma, Tel.). See sep. title.——*Jallivaury poollalcheroo* (జల్లివారిపుల్లలచెరువు - dzallivári-pullalacheruvu, Tel.). From (dzallivâru, tel. a family so called + pullalacheruvu, tel. reed tank so called). Village; pop. 1,603; acres 3,014; lat. 15° 32′; long. 78° 59′; from Cumbum W.S.W. 12 miles; from Kurnool E.S.E. 62 miles. Former seat of Poligar [q.v.]. Remains of ancient fort. In neighbourhood is the water-fall of Nemilygondam, where Goondlacumma issuing from plateau of Goondlabramheshwar makes sudden descent into plains. At the foot is large pool. Litigation settled on its banks by swearing over its waters. One who perjures himself after bathing would be immediately stung by wild bees [tainee] to death. Temple to Rungasawmy.——*Krishnamshettipully* (కృష్ణంశెట్టిపల్లి - krishnamshettipalli, Tel.). From (krishnamshetti, tel. proper name + palli, tel. village). Village; pop. 1,895; acres 3,550; lat. 15° 22′; long. 78° 55′; from Cumbum S.W. 21 miles; from Kurnool E.S.E. 63 miles. At E. entrance of Nundicanama pass. Temple of Bheemeshwara sawmy. A mile west is inscription.——*Mocshagoondam* (మోక్షగుండము - mókshagundamu, Tel.). From (móksha, san. salvation + gundamu, tel. a pit). Sanscrit name (muktéshvara), meaning absolution + lord. Shrotriem village; pop. 1,365; acres 12,749; lat. 15° 27′; long. 79° 07′; from Cumbum S.S.W. 8¾ miles; from Kurnool E.S.E. 72 miles. On road to Cumbum. Seat of native astrologers who calculate the punchaungams [q.v.]. E. is Shiva temple on hill called Moocteshwaram, where Shivarautry [pundigay, 6a] is held.——*Moondlapaud* (ముండ్లపాడు - mundlapádu, Tel.). See sep. title.——*Nullamullay* (నల్లమల - nallamala, Tel.). See sep. title.——*Nundicanama* (నందికనుమ - nandikanama, Tel.).

See sep. title.——*Ooyyaulavauda* (ఉయ్యాలవాడ - uyyálaváda, Tel.). From (uyyála, tel. a swing + váda, tel. village). Place of hanging. Village; pop. 2,465; acres 5,861; lat. 15° 13′; long. 78° 56′; from Cumbum S.S.W. 29 miles; from Kurnool S.E. 70 miles. In 1847 a disturbance was caused by Narsimha reddy, pensioned poligar [q.v.] of this place and grandson of Jayaram reddy the last powerful zemindar [q.v.] of Nossam. He unsuccessfully attacked Coilcoontla treasury and sheltered himself in hill forts of Yerramalas and Nullamullays. At Giddalore he gave battle to Lieutenant Watson and killed the Tahsildar of Cumbum. He then escaped into the Nullamullays, and was subsequently captured near Persomala in Coilcoontla talook and hanged. His head was kept hung in the fort on the gibbet till 1877. Inscription dated A.D. 1385 of Vijianugger dynasty.——*Poollalcheroo* (పుల్లలచెరువు - pullalacheruvu, Tel.). From (pulla, tel. reed + cheruvu, tel. tank). Tel. also (mádanapullalacheruvu), meaning maudana, proper name + village, so called. Village; pop. 1,552; acres 3,852; lat. 15° 30′; long. 78° 58′; from Cumbum W.S.W. 14 miles; from Kurnool E.S.E. 62 miles. Poligar of this place descended from Baupa naidoo mentioned under Baswapore. In 1779 he was expelled by Hyder and fled to the Carnatic [q.v.]. He again took possession of his district in 1791 and received sixteen additional villages from the Nizam's officers. On the transfer of the district to the Company, these sixteen villages were resumed and the peshcush [q.v.] of the old ones raised. As the Poligar refused to come to terms with Munro, he was expelled. The family has since been pensioned.——*Rauvipaud* (రావిపాడు - rávipádu, Tel.). From (rávi, tel. peepul tree, ficus religiosa, linn. + pádu, tel. village). Village; pop. 2,587; acres 2,564; lat. 15° 35′; long. 79° 12′; from Cumbum E. 3 miles; from Kurnool E.S.E. 75 miles. On the Goondlacumma. Sanitarium from Cumbum. Vishnoo temple.——*Saglair* (సగిలేరు - sagiléru, Tel.). See sep. title.——*Toorimilla* (తురిమిళ్ల - turimilla, Tel.). From (turu, can. cow + milli, tel. hamlet). Village; pop. 2,726; acres 4,998; lat. 15° 31′; long. 79° 02′; from Cumbum W.S.W. 9 miles; from Kurnool E.S.E. 65 miles. On Goondlacumma. Two miles distant is Sharabheshwarasawmy temple with inscription. Hermitage of the rishy Jamadagny. Visited at Shivarautry [pundigay, 6a]. Old temple between this and Aucveed, called Paupa vimochanam, with inscriptions.——*Veligonda* (వెలిగొండ - veligonda, Tel.). See sep. title.——*Yenoomoolair* (ఎనుములేరు - enumuléru, Tel.). From (enumu, tel. buffalo + éru, tel. river). River. Tributary of Goondlacumma.——*Zampalair* (జంపలేరు - dzampaléru, Tel.). From (dzammu, tel. bulrush, typha elephantina, roxb. + éru, tel. river). River. Tributary of Goondlacumma.——(2) Town, Head-quarters of Tahsildars, Revenue divisional officer, D.P.W. sub-divisional officer, B.K.S. railway station; Kurnool district, Cumbum talook; pop. 5,914; acres 2,903; lat. 15° 35′; long. 79° 09′; from Kurnool E.S.E. 72 miles; from Madras N.N.W. 188 miles; from Nundial E.N.E. 42 miles; from Pyaupaly E.N.E 93 miles. Country around formerly part of Vijianugger kingdom and of that of Audhra kings of Warangal. Cumbum was capital of a sub-division of Balaghaut in the south of Cuddapah, governed by a Naick poligar, tributary to Vijianugger, from whom it was taken by Necnam khan of Cuddapah and subsequently by Hyder. A company of invalid sepoys [q.v.] was stationed here till 1859, when it was removed and a detachment of sowars [q.v.] or mounted police maintained till 1866. The town, though surrounded by wet cultivation, was not unhealthy till 1866, when a malarious form of fever appeared and decimated the population. Large tank, W. of town, by bund 57 feet high across the Goondlacumma between two hills, has a circumference of 13 miles and an area of four square miles. Repaired by Varada rajamma, a wife of Krishna deva royel. The fort was dismantled some years ago. In the town is mosque [musjid] built of remains of a temple. Chief market place resorted to by traders from Guntoor and Pulnaud, who import chillies [q.v.], tobacco [pogauk], saffron [country saffron], salt [namak, ooppoo], &c. The following are the travelling distances by road from Cumbum to different places:—

CUMMER (کمر - kamar, *Hind.*). Loins.——*Cummerbund* (کمربند - kamarband, Hind.). From (above + band, pers. band). Waist-band or sash. Chiefly used by the Mahomedans; the manner in which the dhoty [q.v.] is worn by the Hindoos rendering it less necessary in their case. Hindoos however use it in full dress. Ornamentation is confined to the ends, into which colored threads, and occasionally gold, are introduced [sheelay]. Habitually worn in an ornamental form by domestic servants, peons [q.v.], and irregular troops.——*Cummer cooshye* (کمرکشائی - kamarkushái, Hind.). From (above + kushádan, pers. to loosen). Loosening the girdle. Fees once exacted by guards for allowing a prisoner [keidy] the liberty of undressing.——*Cummerputty* (کمرپٹی - kamarpattí, Hind.). From (above + pattí, hind. band). A simple flat ring about an inch and a half broad, which encircles the waist, and curved at the ends where they are hooked [zewar].

CUMPA (కంప - kampa, *Tel.*). Dried brambles; bush.——*Cumpacottah* (కంపకోట - kampakóta, Tel.). From (above + kóta, tel. fort). A hedge of dry thorns round a village as a defence, a sort of abattis.——*Cumpajitta* (కంపజిట్ట - kampajitta, Tel.). From (kampa, tel. bush + jitta, tel. bird). Grass-warblers, or Reed-warblers. Calamoherpinæ, sylviadæ [calacuntam], dentirostres, insessores, aves [pacshy, 23], of naturalists [jantoo]. The species best known to the natives are shown below.—"*a*" Large cumpajitta is Acrocephalus brunnescens. Alias Acrocephalus arundinaceus; Malacocircus abnormis. A winter visitant. Clings strongly to stalks of grain. Harsh clucking kind of note.—"*b*" Red cumpajitta otherwise Paddy field warbler is Acrocephalus agricolus. Paddy [q.v.] fields in cold weather. Migratory going north to breed.—"*c*" Small cumpajitta called podnah in hindostany, also tiktiky, is Acrocephalus dumetorum. Alias Acrocephalus montanus; Salicaria arundinacea; Sylvia montana. Note a sharp titick titick, resembling sound made by a flint and steel.

CUMPLY (ಕಂಪಲಿ - kampali, Can. kampli *). From (kampiliráya, can. proper name).—"*a*" Deputy tahsildarry, Bellary district. Pay Rs. 70.—"*b*" Town, Deputy tahsildar's station; Bellary dist., Hospett tal.; pop. 10,529; acres 5,839; lat. 15° 25′; long. 76° 39′; from Adony W.S.W. 48 miles; from Bellary N.W. 27¾ miles; from Hospett N.E. 17¾ miles; from Hurpanhully N.E. 59¼ miles; from Madras W.N.W. 292 miles; from Tadpatry W.N.W. 99 miles. On the Toongabudra, 7 miles, from an important anicut [q.v.]. Old fort in ruinous state but densely populated. Its position is strong with river in front, and wet cultivated ground intersected by aqueducts in rear. Built by one of the Naicks of Bellary feudatory to Vijianugger, and was besieged by Hanoomappa naick of Bellary without success, after he had defeated the Vijianugger rajah in the plain of Cumply. Industries are weaving, especially of silk [puttoo] cloths; and the manufacture of wooden colored toys. Market once a week.—"*c*" Range of hills; Bellary district, Hospett talook.

CUMQUOT (قمقوت - kumkot, *Hind.*). Title from (kinkú, chinese, golden orange). Title otherwise Golden orange. Botanically Citrus [jambeeram] japonica, rutaceæ [vricsham, 32]. Small tree, native of Japan and China. Fruit resembles a diminutive orange [q.v.] about the size of a litchy [q.v.]. Preserve is made from it by Chinese.

CUMR (قمر - kamr, *Ar.*). Moon. The Mahomedan astrology call it the celestial messenger and fix its orbit [cacsham] in the first heaven. One born under the influence of this planet [graham] is supposed to be a gambler, a liar, subject to diseases, &c. Part of lacab; as Cumr oon nissa, moon of ladies; Cumr ood dowla, moon of the empire [ism].——*Cumr ood deen* (قمرالدين - kamruddín, Hind.). From (above + dín, ar. religion). The first Soobahdar [q.v.] of the Deccan [q.v.]. See vol. I, 9.

CUMSAM (कंस - kamsa, *San.*). Bell metal [cunts].——*Cumsaula* (కంసాల - kamsála, obl.; కంసాలి - kamsáli, pers. sing.; కంసాలులు - kamsálulu, pers. pl., Tel.). Teloogoo goldsmith caste or guild. Distinguish from Cummaulan. The corresponding terms are:—Can. acasauly, Tam. and Mal. tattaur [jauty].

CUNCAULAN (கங்காளன் - kungálan, *Tam.*). From (kankála, san. skeleton). Shiva, the wearer of bones. Cuncauly is Bhadracauly as wife of Cuncaulan.

CUNCHA (కంచ - kancha, *Tel.*). A hedge. Hence a government pasture farm, as enclosed [maita].——*Cunchacacherla* (కంచకచెర్ల - kanchakacherla, Tel.). From (above + cherla, tel. village). Greek κονταkόσσνλα. Village; Kistna dist., Nundigauma tal.; pop. 1,547; acres 7,290; lat. 16° 41′; long. 80° 26′; from Masulipatam N.W. 60 miles; from Nundigauma S.E. 9¼ miles. Close to diamond [vajram] mines of Partiaul.

CUNDAM (खण्ड - khanda, *San.*; കണ്ടം - kantam, *Mal.*; கண்டம் - kandam, *Tam.*). From (khand, san. to divide). Portion. Suffix in place names; as Eivailicundam, meaning five + hedge + portion.——*Cundaga* (ಖಂಡಗ - khandaga, Can.). From (khanda, san. portion). A measure = 4 punchacams [q.v.].—"*a*" Bazaar weight. 10 toolaums = 1 cundaga [niray, 2 c]. Approximate actual value, 1 cundaga = 205 lbs., 11 oz.,

and 7 drs. Compare Tel. cuntlam, Tam. pothy.—" b" Measure of capacity. 40 bullahs = 1 cundaga [alavay, 3a, c]. Approximate actual value, 1 cundaga = 5 cubic feet and 1,510 cubic inches. In Bellary there is a very much larger wholesale cundaga of 5,376 pucka seers or 211 cubic feet, and 1,712 cubic inches. Compare Cullum of N. arcot, S. arcot and Chingleput. See vol. I, 609; II, 508, 509.——*Cundigay* (கண்டிகை - kandigai, Tam.). Field-division. Suffix in place names.——*Cundy* (గండి - gandi, Tel.; കണ്ടി - kanti, Mal.). Pass; suffix in place names; as Bondacundy, meaning stocks + pass [gundy]. A piece of ground. Suffix in place names as Anjarcundy, meaning five + half + ground.

CUNDAN (கந்தன் - kandan, *Tam.*). Tam. form of Scandan; the god of war. Non-bramin second name. Cundasawmy is very common [peyar].——*Cundoocore* (కందుకూరు - kandukúru, Tel.). See sep. title.

CUNDANORE (కందనూరు - kandanúru, *Tel.*). From (kandena, tel. grease + úru, tel. village). Because carts conveying stone to Alampore temple were formerly greased here. Ancient form of the name of Kurnool.

CUNDAUYAM (కందాయము - kandáyamu, *Tel.*). Fixed portion of tax payable at a certain time So rent paid in money as distinguished from rent paid in kind. See vol. I, 112.

CUNDOO (കണ്ടു - kantu, *Mal.*; கண்டு - kandu, *Tam.*). From (kan, mal. to see). Seen.——*Cundezhoott* (കണ്ടെഴുത്തു - kantezhuttu, Mal.). From (above + ezhuttu, mal. writing). Record of actual produce.——*Cundookrishy* (കണ്ടുകൃഷി - kantukrishi, Mal.). From (above + krishi, san. tillage). The home farm of a ruling power [havelly]. See vol. II, 289.——*Cundoomoothal* (கண்டுமுதல் - kandumuthal, Tam.). From (above + muthal, tam. stock). Actual produce.

CUNDOOCORE (కందుకూరు - kandukúru, *Tel.* kandukúr *). From (kandudu, tel. skanda, the god + úru, tel. village) [cundan]. Sanscrit name (skandapurí), meaning the god scandan + town. ——**(1)** Talook, Nellore district. Tahsildar's pay Rs. 175. Area 787 square miles. N. centre coast part of district. Boundaries:—N. Ongole talook, Podily division; E. Bay of Bengal; S. Cauvaly talook; W. Canigherry talook. Lat. 14° 57′ to 15° 30′ N.; long. 79° 40′ to 80° 09′; E. Choondy zemindarry in west is separated from talook by a range of hills running north and south for about 15 miles; of considerable elevation and slopes covered with dense jungle. Every village has a handsome tope [q.v.]. Laterite [q.v.] abundant and largely used for building purposes. Consists of extensive plains devoted to dry crop cultivation on a superior soil. The tract lying between the lower reach of the Moosy and Palair river in the centre is of superior regady [regar]. In the villages along the coast line the soil resembles that of the coast villages of Ongole talook, and is sandy. In the north-west and extreme west it is stony and sterile. Noted for good sheeting cloths; also for dyed cloths. In Paricondapaud boxes, toys, chairs, &c., are made. Manufacture of good indigo [q.v.]. Earthen bangles [gauzoo] manufactured in some villages. Great charities performed by Cotamma, a Caupoo widow at Oolavapulley. Intersected by the Munnair, Palair and Yelicair. The principal tanks are Caraid, Mautsavaram and Mopaud. Camping grounds:—Bitragoonta, Cundoocore, Goodlore, Mautsavaram, Oolavapulley, Ramapatam, Wogore. Places of archæological interest:—Anantasaugaram, Choondy, Condamoottsoopollem, Cundoocore, Goondlapollem, Jillellamoody, Lingasamoodram, Maulecondah, Mautsavaram, Ramapatam, Shaunampoody, Shingaroyacondah. Principal trig. stations:—Cancherla, Choondy, Daritippa, Goorayagoonta, Jendaltippa, Lutchmeepooram, Netvauripollem, Paujerla peddatippa, Poolipaud, Ramapatam beacon, Tettoo, Yeloorpaud. The leading places, &c., in the talook are the following.——*Binginipully* (బింగినిపల్లి - binginipalli, Tel.). From (binga, can. gold color + palli, tel. village); from vishnoo, the gold-colored god. Village; pop. 1,933; acres 3,147; lat. 15° 13′; long. 80° 07′; from Cundoocore E. 11 miles; from Nellore N. 53 miles. Till recently a large salt export station. Temples of Ramalingasawmy and Chennakeshavasawmy. Tank.——*Buddepoody* (బద్దెపూడి - baddepúdi, Tel.). From (baddamu, tel. boundary + púdi, tel. village). Village; pop. 1,091; acres 3,850; lat. 15° 08′; long. 79° 58′; from Cundoocore S.S.E. 6½ miles; from Nellore N. 46½ miles; from the sea W. 9 miles. 5 miles east of the route from Nellore to Guntoor. Formerly gave its name to a talook and also to a range of the Public works department. Two temples of Shiva and Vishnoo. Fair trade in indigo.——*Caraid* (కరేడు - karédu, Tel.). See sep. title.——*Caumeypully* (కామేపల్లి - kámépalli, Tel.). From (kámayya, tel. proper name + palli, tel. village). Village; pop. 1,741; acres 4,028; lat. 15° 21′; long. 79° 52′; from Cundoocore N.N.W. 10½ miles; from Nellore N. 62 miles; from the sea W. 19 miles. In Choondy zemindarry. Residence of Appa cavy, a famous Teloogoo scholar and poet, 500 years ago. Temple of Vengopaulsawmy. Betel [q.v.] gardens. Tank.——*Chelamchaila* (చలంచేల - chalamchéla, Tel.). From (chalama, tel. spring + chénu, tel. field). Village; pop. 1,179; acres 12,839; lat. 14° 59′; long. 79° 59′; from Cundoocore S. 16½ miles; from Nellore N. 36 miles; from the sea W. 7½ miles. A dense jungle. Tank. Large stone image of Nundy [q.v.] held in high veneration specially in cases of difficult delivery. Temples of Keshava sawmy and Shuncarasawmy.——*Choondy* (చుండి - tsundi, Tel.). See sep. title.——*Cuncherla* (కంచెర్ల - kancherla, Tel.). From (kanche, tel. hedge + cherla, tel. village). Trig. station in lat. 15° 05′ 33·77″; long. 79° 43′ 49·47″; height 571 feet; from Cundoocore W.S.W. 16 miles; from Timmareddipollem W. 3 miles; from the sea W. 24 miles.——*Cundoocore* (కందుకూరు - kandukúru, Tel.). See below.——*Daritippa* (దరిటిప్ప - daritippa, Tel.). From (dari, tel. border + tippa, tel. mound). Trig. station in lat. 15° 00′ 36·47″; long. 79° 57′ 40·10″; from Cundoocore S. 14 miles; from Pippallavauripollem N.W. 3½ miles; from the sea W. 9 miles.——***Dauva** goodore* (దావగూడూరు - dáva-gúdúru, Tel.). From (dáva, vulg. for dóva, tel. way + gúdúru, tel. place so called). Village; pop. 838; acres 2,133; lat. 15° 19′; long. 79° 59′; from Cundoocore N.N.E. 7¾ miles; from Nellore N. 59½ miles; from the sea W. 10½ miles. Temple of Chennakeshavasawmy. Formerly gave its name to a talook. ——*Goodlore* (గుడ్లూరు - gudlúru, Tel.). From (guddu, tel. egg + úru, tel. village). Village; pop. 2,039; acres 10,813; lat. 15° 04′; long. 79° 57′; from Cundoocore S. 10½ miles; from Nellore N. 43 miles; from the sea W. 10 miles. Good trading town. Ruined fort formerly held by a Poligar [q.v.]. An old temple of Chennakeshavasawmy. In the tank called Lingamgoonta there are the remains of an old palace built by a former rajah for his concubine.——*Goorayagoonta* (గురయగుంట - gurayagunta, Tel.). From (guravayya, tel. proper name + gunta, tel. pond). Trig. station; lat. 15° 2′ 4·43″; long. 80° 0′ 52·72″; from Chennayapollem W.N.W. 6½ miles; from Cundoocore S.S.E. 13 miles; from the sea W. 5½ miles.——*Ilavara* (ఇలవర - ilavara, Tel.). From (iluvaramu, tel a hut). Sanscrit by corruption (ilvalapurí), meaning ilvalan, the giant + town. Village; pop. 1,591; acres 4,276; lat. 15° 22′; long. 79° 52′; from Cundoocore N.N.W. 11½ miles; from Nellore N. 64 miles; from the sea W. 19 miles. Temple of Lutchmy narrainsawmy.——*Jendaltippa* (జెండలటిప్ప - jendalatippa, Tel.). From (jéndra, tel. a caste + tippa, tel. mound). Trig. station; lat. 15° 5′ 11·59″; long. 80° 2′ 55·71″; from Cundoocore S.E. 11 miles; from Ramapatam N.W. 3¾ miles; from the sea W. 3 miles.——*Lingasamoodram* (లింగసముద్రము - lingasamudramu, Tel.). From (lingamma, tel. proper name + samudra, san. ocean). Tel. also (tsundilingasamudramu), meaning choondy, the place + lingasamoodram, the place, as distinguished from lingasamoodram in cauvaly. Village; pop. 4,316; lat. 15° 06′; long. 79° 46′; from Cundoocore S.W. 14 miles; from Nellore N.N.W. 47½ miles; from the sea W. 21½ miles. Coral [moongah] and pearl [moty] merchants. ——*Lutchmeepooram* (లక్ష్మీపురము - lakshmípuramu, Tel.). From (lakshmí, san. the goddess + pura, san. town). Trig. station; lat. 15° 0′ 4·15″; long. 80° 0′ 46·82″; from Cundoocore S.S.E. 15 miles; from Siripooram N. 4 miles; from the sea W. 5¾ miles. ——*Maulecondah* (మాలెకొండ - málekonda, Tel.). From (mále, tel. dwelling + konda, tel. hill). Sanscrit name (mályádri), meaning garland + mountain. Village, Hill, Place of pilgrimage; lat. 15° 11′; long. 79° 41′; from Cundoocore W.S.W. 17 miles; from Nellore N.N.W. 55 miles; from the sea W. 28 miles. 3¾ miles W.N.W. of Choondy. Ancient temple dedicated to Vishnoo, as Lutchmy narsimhasawmy. Visited every Saturday, and persons who have vows to perform, feed the visitors. Hill considered a place of great sanctity. Formerly surrounded by dense jungle. Mantapam [q.v.] supported by fourteen pillars constructed by Mullayya reddy and a stone tank at the foot of the hill. Another temple in Lutchmakkapett dedicated to Lutchmy. Inam [q.v.] was granted in the time of Atchoota deva roya.——*Mautsavaram* (మాచవరము - mátsavaramu, Tel.). From (mátsamma, tel. proper name meaning great lakshmí + pura, san. town). Sanscrit name (mahálakshmípura), meaning great + lutchmy the goddess + town. Village; pop. 1,883; acres 4,129; lat. 15° 08′; long. 79° 56′; from Cundoocore S. 6 miles; from Nellore N. 47 miles; from the sea W. 11 miles. Large tank. Trade in cattle. On a small hill 1 mile north of village there was a temple demolished by a Mahomedan invasion. Old temple of Mullicarjoonan. Stone statues.——*Mooshy* (ముశి - mushi, Tel.). See sep. title.——*Moottiaulpaud* (ముత్యాలపాడు - mutyálapádu, Tel.). See sep. title.——*Munnair* (మన్నేరు - manneru, Tel.). See sep. title.——*Netvauripollem* (నేతివారిపాలెము - nétivváripálemu, Tel.). From (nétiváru, tel. family name, ghee family + pálemu, tel. fortified village). Trig. station; lat. 15° 22′ 44·22″; long. 79° 51′ 06·23″; height 190 feet; from Cundoocore N.N.W. 13 miles; from Ilavara W. 1½ miles; from the sea W. 20 miles.——*Nundanavanam* (నందనవనము - nandanavanamu, Tel.). From (nandana, san. pleasing + vana, san. grove). Village; pop. 1,156; acres 3,173; lat. 15° 18′; long. 80° 02′; from Cundoocore N.E. 8 miles; from Nellore N. 58½ miles; from the sea W. 7½ miles. Temple of Vencateshwarasawmy.——*Ooppalpaud* (ఉప్పలపాడు - uppalapádu, Tel.). From (uppalamu, tel. salt marsh + pádu, tel. village). Village; pop. 2,058; acres 2,923; lat. 15° 10′; long. 79° 48′; from Cundoocore W.S.W. 10 miles; from Nellore N.N.W. 51 miles; from the sea W. 21 miles. Noted for its breed of cattle [maud].——*Palair*

(పాలేరు - páléru, Tel.). See sep. title.——*Palcore* (పలుకూరు - palukúru, Tel.). From (paluku, tel. echo + úru, tel. village). Village; pop. 2,371; acres 7,377; lat. 15° 16′; long. 79° 59′; from Cundoocore N.E. 4¾ miles; from Nellore N. 56 miles; from the sea W. 9 miles. Five old temples. One large tank.——*Pamoor* (పామూరు - pámúrú, Tel.). See sep. title.——*Paucala* (పాకల - pákala, Tel.). See sep. title.——*Paujerla peddatippa* (పాజెర్ల పెద్దతిప్ప - pájerlapeddatippa, Tel.). From (pájerla, tel. place so called, meaning snake village + pedda, tel. large + tippa, tel. mound). Trig. station; lat. 15° 3′ 57·30″; long. 80° 0′ 39·89″; from Cundoocore S.S.E. 11 miles; from Potoolore N.E. 2 miles; from the sea W. 5½ miles.——*Poolipaud* (పులిపాడు - pulipádu, Tel.). From (puli, tel. tiger + pádu, tel. village). Trig. station; lat. 15° 14′ 22·63″; long. 80° 01′ 04·04″; height 126 feet; from Cundoocore E.N.E. 5½ miles; from Palcoorpett S.E. 2¾ miles; from the sea W. 7 miles.——*Ramapatam* (రామయ్యపట్నము - rámayyapatnamu, Tel.). See sep. title.——*Rauvore* (రావూరు - rávúru, Tel.). From (rádzu, tel. a class of people + úru, tel. village). Village; pop. 1,759; acres 3,997; lat. 15° 01′; long. 80° 04′; from Cundoocore S.S.E. 15½ miles; from Nellore N. 39¼ miles; from the sea W. 1¾ miles. Large tank. Bhatrauzool or flattering beggars live here.——*Sangameshwaram* (సంగమేశ్వరము - sangaméshvaramu, Tel.). From (sangama, san. confluence + íshvara, san. lord); from shiva's temple at the junction of the palair and the makkair. Hill and temple; lat. 15° 21′ 10″; long. 79° 46′ 13″; from Cundoocore N.W. 15 miles; from Nellore N.N.W. 63¾ miles; from the sea W. 25½ miles. Temple of Sangameshwara sawmy with an annual festival in February.——*Shingaroyacondah* (శింగరాయకొండ - shingaráyakonda, Tel.). See sep. title.——*Tettoo* (తెట్టు - tettu, Tel.). Means stone fence. Trig. station; lat. 15° 2′ 43·26″; long. 80° 3′ 4·89″; from Cundoocore S.E. 13 miles; from Ramapatam W.N.W. 2½ miles; from the sea W. 3 miles.——*Vennore venkannapollem* (వెన్నూరువెంకన్నపాలెము - vennúruvenkanapálemu, Tel.). From (vennúruvenkanna, tel. proper name + pálemu, tel. fortified village). Village; pop. 2,131; acres 912; lat. 15° 23′; long. 79° 58′; from Cundoocore N. 11 miles; from Nellore N. 63½ miles; from the sea W. 13 miles. Noted for breed of cattle. Tank. Temple of Gopaulsawmy, festival held in April.——*Yelicair* (ఎలికేరు - elikéru, Tel.). See sep. title.——*Yeloorpaud* (ఏలూరుపాడు - élúrupádu, Tel.). From (élu, tel. to reign + úru, tel. village + pádu, tel. waste); from high site. Trig. station; lat. 15° 0′ 55·00″; long. 80° 2′ 25·07″; from Chennayapollem W.N.W. 4 miles; from Cundoocore S.S.E. 15 miles; from the sea W. 3½ miles.——**(2)** Town, Head-quarters of Tahsildar and Sub-registrar; Nellore district, Cundoocore talook; pop. 7,577; acres 17,773; lat. 15° 13′; long. 79° 57′; from Madras N. 146 miles; from Naidoopett N. 88½ miles; from Nellore N. 53 miles; from Ongole S.S.W. 23 miles; from the sea W. 12 miles. Large and flourishing commercial town. Remains of an old fort constructed during the fowjdarry [q.v.] of Malik aslam khan. Remains of another fort wholly under cultivation, west of the village, built during reign of Krishna deva royel. Very old temples of Someshwaran and Janardanan. Five old mosques [musjid], all with inams. In a pond there is a seven-headed tomb, for seven warriors slain in a battle at Allinugger, alias Gundavaram, Nellore talook, whose headless corpses dropped here from the backs of their horses [ghorah] flying from the battle field. This is supported by an inam [q.v.] and yeomiah [q.v.]. There is also a Durgah [q.v.] in honor of the saint Shah jehaungeer. Festival of Ancamma celebrated once in three years about July. Noted for breed of cattle.

CUNGOONDY (కంగుండి - kangundi,* *Tel.*). From (kanama, tel. valley + gondi, tel. corner) [canama].——**(1)** Zemindarry, North arcot. Area 346 square miles. Length from N.W. to S.E. about 25 miles; breadth about 18 miles. Population 54,052; Language, Teloogoo. S.W. of district. Bounded north-west by Mysore; north-east by Pulmanair; and south and south-east by Salem. The estate long with present Zemindar's family, probably a creation of Vijianugger dynasty, whose princes settled in neighbourhood. Hyder ally threw one of the poligars into jail at Seringapatam; and Tippoo placed a garrison in the town of Cungoondy. The Company seized the fort in 1792, but restored it in 1794. It formed portion of the Krishnagherry division of the Baramahaul [q.v.]. In 1816 it was attached for arrears and settled. Peshcush [q.v.] was about Rs. 23,000. The greater part of zemindarry lies above ghauts [q.v.]. The soil is poor gravelly loam, which gets more fertile in the north-east parts near Pulmanair talook. Lime [choonam], building stones [cull], and iron [auhan] are the only known mineral [dhautoo] products. The gold region of Colaur is just to the west of Cungoondy. The Cooroobas [q.v.] breed sheep and weave cumblies [q.v.]. Others raise Mysore bullocks [maud], and Cungoondy used once to furnish animals for use in the artillery. The Palaur passes through the estate from north-west to south-east in a rocky bed of no great breadth. It frequently comes down in flood, when owing to the great fall its course is very impetuous and it is for the time impassable. The sources of irrigation are chiefly tanks. Wells are infrequent, and spring channels [q.v.] unknown. The zemindar divides his country into three talooks:—the Byle seema or open country of the north-west; the Chettoo seema or wooded country of the middle; and the Canama kinda seema below the ghauts on the south-east. Places of archæological interest:—Cungoondy, Toommishy. The leading places, &c., in the zemindarry are the following.——*Cooppam* (కుప్పము - kuppamu, Tel.). See sep. title.——*Cungoondy* (కంగుంది - kangundi, Tel.). See below.——*Palaur* (பாலாறு - páláru, Tam.). See sep. title.——*Ramanaickanpett* (రామానాయకంపేట - rámánáyakampéta, Tel.). From (rámanáyakudu, tel. proper name + péta, tel. suburb). Village; pop. 1,244; lat. 12° 40′; long. 78° 35′; from Chittore S.W. 53 miles; from Cungoondy S.E. 10¼ miles.——**(2)** Sub-magistracy, North arcot district. Pay Rs. 100.——**(3)** Village, Hill; North arcot dist., Cungoondy tal., Zemindarry; pop. 652; lat. 12° 46′; long. 78° 29′; from Arnee W. 57 miles; from Chittore S.W. 54 miles; from Madras W. 127 miles; from Ranipett W. 61 miles; from Tripatty S.W. 89 miles; from Vellore W. 48 miles. At the foot of a precipitous hill, fortified and formerly of great strength but now dilapidated. Once chief place in the zemindarry but lately almost depopulated. Zemindar's palace. The droog is in lat. 12° 46′; long. 78° 29′; from Cungoondy S. ¼ mile, ascended by flight of steps in bad order; half way up is a cave filled with the bones and horns of cattle.

CUNJOOMULLAY (கஞ்சமலை - kañjumalai, *Tam.*). From (kánchana, san. gold + malai, tam. mountain); so called on account of gold washings made here. Sanscrit name (káñchanagiri), meaning same. Hill; Salem district, Salem talook; A hog backed and detached hill, otherwise known as the shark's fin, famous for its stores of magnetic iron [cauntam]. The Porto novo iron [auhan] company obtained its ores here. Trig. station in lat. 11° 36′ 58·63″; long. 78° 06′ 04·47″; height 3,238 feet; from Salem W.S.W. 7¾ miles.

CUNN (கண் - kan, *Tam.*). Eye. In vocative is term of endearment.——*Cungaunam* (கண்காணம் - kangánam, Tam.). From (above + kán, tam. to see). A watch over fields and produce on behalf of Government.——*Cungauny* (கண்காணி - kangáni, Tam.). An inspector of crops. The village grain measurer; in some places his place is supplied by the Toty. Often used of one who takes native laborers to the coffee [q.v.] estates of Ceylon [inam].——*Cunnan* (കണ്ണൻ - kannan, Mal.; கண்ணன் - kannan, Tam.). The fair-eyed one. Vishnoo. Familiarly Cunnoo. Non-bramin, Hindoo 2nd or pers. name. Feminine Cunny [peyar].——*Cunnaudy* (दर्पण - darpana, San.; آئینه - áinah, Pers. and Hind.; كاچ - kacha, Malay; ಕನ್ನಡಿ - kannadi, Can.; ... - kannadi, Too.; అద్దము - addamu, Tel.; കണ്ണാടി - kannáti, Mal.; கண்ணாடி - kannádi, Tam.). San. from (drip, san. to light). Pers. from (áhan, pers. iron; from being used in its manufacture). Malay from (kacha, san. brilliancy, from kach, san. to shine). Tel. from (abda, san. glass). Tam. from (kan, tam. eye + ádi, tam. mirror). Glass ὕαλος ἀργή, glass of a coarse kind was exported from Egypt to the west coast according to the Periplus; but glass of an inferior quality is made in several parts of Southern india. The manufacture is confined entirely to small phials and women's bracelets [gauzoo]. On the Mysore plateau the frit employed for making glass is composed of one part of fat quartz [ven cull] and six parts of a kind of coarse soda [munn cauram]. To give glass a green tinge, to the frit are added a further quantity of prepared soda, an iron ore, a red oxide of iron, and a proportion of calcined copper [taumram]; all which materials being mixed and put into the crucible and properly disposed in the furnace, the fire is kept up for nine days and nine nights. To give glass a red tinge, to the frit are added an additional proportion of prepared soda and a quantity of a certain red ore; after which the whole are fused together for fifteen days and fifteen nights. To make blue glass, to the frit are added a further proportion of soda, calcined copper, a quantity of powdered iron ore and a blue substance which may be smalts. To give glass a yellow color, it is enamelled with the melted calces of lead [ceyam], tin [tagaram] and zinc [tootnaug]. In the Poodoocottah country, where glass rings are made of a superior quality to those of mysore, the frit is prepared by adding to fine river sand [manal] a very strong solution of the alkaline earth oovar munn [q.v.] which contains much soda [munn cauram]; this mixture is formed into lumps, which are dried and then fused for many hours together; in order to make glass a certain quantity of poongauram [q.v.] is added to the powdered frit, and the whole fused together for many hours. Bhoota cunnaudy, from (bhúta, san. demon), meaning anything great and superhuman, is a microscope. Doora drishty cunnaudy, from (dúra, san. distance + drishti, san. sight) is a telescope. Mookha cunnaudy, from (mukha, san. face) is a looking glass. Mookkoo cunnaudy, from (múkku, tam. nose) are spectacles. Nilay cunnaudy, from (nilai, tam. fixed) is a mirror. Sooryacaunta cunnaudy, from (súrya, san. sun + kánta, san. that which loves) is a burning glass.——*Cunnimay* (கண்ணிமை - kannimai, Tam.). From (above + imai, tam. to twinkle). Wink. Dravidian measure of time. 60 cunnimays = 1 vinaudy [caulam, 1]. Approximate actual value, 1 cunnimay = ·4 english second. Same as nimisham, caushta calay, and vipalam [caulam, 6].——*Cunnoor* (கண்ணூறு - kannúru, Tam.). From (above + úru, tam. touch, evil). Evil-eye. There is a Tamul proverb:—கல்

எறிக்குத் தப்பிஞலும் கண் எறிக்குத் தப்பக் கூடாது— "Though one may escape the cast of a stone, he cannot escape "the glance of an evil-eye." To avert this as regards fruits [pazham], &c., in a garden, it is common to put up some object of attraction as a water-pot white-washed, inverted on a stump, and dotted with black spots, &c. In some enclosures grotesque images are seen.

CUNNAUN (கன்னன் - kannán, *Tam.*). From (kan, tam. brass-work). The corresponding terms are :—Tel. cantsara, Can. bogaura, Mal. mooshaury. Cummaulan or artisan caste; work in mixed metals [loham], such as brass [pittalay], &c.

CUNNY (கன்னி - kanni, *Tam.*). Maiden. Cunniyammaul is Parvaty [comaury, comorin, coomary].

CUNTLAM (కంట్లము - kantlamu, *Tel.*). A bullock load. Bazaar weight [niray, 2b]. Approximate actual value, 1 cuntlam = 200 lbs. In Cuddapah a wholesale weight of cotton [q.v.]; 60 maunds or 13 cwts. 44 lbs. of raw cotton or 15 or 3 cwts. 39 lbs. of cleaned. Compare Cundaga, Pothy.

CUNTS (कांस्य - kámsya, *San.*; پچرس - pachras, *Hind.* and *Dec.*; ڬڠس - gangsa, *Malay*; ಕಂಚು - kanchu, *Can.*; ಕಂಚಿ - kanchi, *Too.*; కంచు - kantsu, *Tel.*; ഓട് - ótu, *Mal.*; வெண்கலம் - vengalam, *Tam.*). Title from teloogoo [cumsam]. San. from (kam, san. to love). Hind. from (pánch, hind. five + rasa, san. mineral); mixture of several metals, strictly a metallic alloy of copper, brass, tin, lead and iron. Malay, &c., from sanscrit. Mal. from (oti, mal. to break), brittle. Tam. from (ven, tam. white + kalam, tam. vessel). Mixed metal [loham], bell-metal, queen's metal; any amalgam of zinc [tootnaug] and copper [taumram].

CUPPAL (കപ്പൽ - kappal, *Mal.*; கப்பல் - kappal, *Tam.*). Ship [dhony] or foreign [q.v.]; corresponding to sheemay [q.v.]. Plant first term. Ex., joining two genera, where transl. is of second term :—Alhagi maurorum (kappattumba), leucas indica; Anacardium occidentale (kappalmávu), mangifera indica; Ananas sativus (kappaççakka), artocarpus integrifolia; Capsicum annuum (kappalmulaku), piper nigrum; Ipomæa batatas (kappalkizhannu), root; Pimenta acris (kappalmulaku), piper nigrum. See gloss. paragraphs.

CUPPATRAULA (కప్పత్రాళ్ల - kappatrálla, *Tel.*). From (kappu, tel. roof + rayi, tel. stone). Village; Kurnool district, Putticondah talook; pop. 1,999; acres 9,613; lat. 15° 35′; long. 77° 40′; from Kurnool W.S.W. 33 miles; from Putticondah N.E. 16½ miles. Former seat of a powerful poligar [q.v.]. Family now pensioned. Hill fort. Amethystine quartz in the hills. Annual festival at hill temple from 15th to 23rd Maugham [mausam] or February.

CURCAS (كركس - karkas, *Hind.*). Same as Wild aumanac.

CURNUM (కరణము - karanamu, *Tel.*). From (karana, san. doing); hence clever. Village accountant [inam]. San. grauma caranam or cauyast; Tam. conicopoly; Can. shanbogue; Mal. menon; Hind. patwarry; Ar. canoongo. In the Tamul country usually a Shoodra, and takes the title of Pillay; in the Teloogoo country usually a Bramin. A village clerk who keeps the accounts [kanak] of cultivation [vellaumay], and registers everything connected with it, and whose duties are remunerated either by a grant of land or certain small shares [merah] or perquisites from the crops of the village, or by a money allowance from Government. In the early days of the East india company this class were their brokers, agents, and interpreters [doobash]. There is a Tamul proverb :—இடைக்கணக்கன் செத்தான், இனிப் பிழைப்பான் நாட்டான்—"the curnum middleman "is dead, henceforth the peasant may prosper." And another :—எழுத்துக்குப்பால்மாறின கணக்கனும் உடுக்கைக்குப் பால்மாறின தாசியும் வருத்தம் அடைவார்—"the curnum "who neglects his accounts, and the dancing girl [dausy] who is "careless about her dress, will come to trouble." And another :—கணக்குக்குஞ்சையும் காக்கைக்குஞ்சையும் கண்ட இடத்தலே கண்ணைக்குத்து—"bore through the eyes of a "young curnum and a young crow [caurvam] wherever you find "them;" both bad. See vol. I (67); II, 229.——*Curneccam* (కరణీకము - karaníkamu, Tel.). The office of curnum.——*Curnum putty* (కరణంపట్టి - karanampatti, Tel.). From (patti, tel. list). Tax levied on village curnums in certain zemindarries in proportion to the merah [q.v.] enjoyed by each.——*List curnum* (లిస్టుకరణము - lístukaranamu, Tel.). Whose name is recorded as employed by Government. See vol. I, 112.

CURRA (కఱ్ఱ - karra, *Tel.*). Stain from juice, or stick from straight slender stem. Plant first term. Ex., where transl. is of second term :—Acacia pennata (karrachíka), acacia concinna; Cyperus dilutus (karratunga), cyperus rotundus; Desmodium pulchellum (karraantinta), desmodium diffusum; Manihot utilissima (karrapendalamu), dioscorea; Rhynchosia velutina (karraulava), dolichos biflorus. See gloss. paragraphs.

CURRY (व्यञ्जन - vyañjana, *San.*; سالنا - sálná, *Hind.*; ಕಡಿ - kadi, *Can.*; కూర - kúra, *Tel.*; കൂട്ടൻ - kúttan, *Mal.*; கறி - kari, *Tam.*). Title from tamul. Tam. from (kari, tam. to eat by biting). San. from (vyañj, san. to anoint). Tel. from (kúdu, tel. to mix). Mal. from (kúttu, mal. to mix). A bit, a morsel, a chip, &c. A dish made originally of sour milk [paul], with salt [ooppoo], pepper [q.v.], turmeric [country saffron], and other spices, and eaten with rice [q.v.] or pulse [dholl]. As now prepared for Anglo-indians, meat or vegetables [keeray] are used instead of the sour milk [chutney, poppadam, vadagam]. Made up curry powder [masaulay] is composed of many substances, turmeric being the principal ingredient; coriander [cassibor] seeds and black pepper are the ingredients next in importance, while small quantities of cayenne pepper [q.v.], cardamoms [q.v.], cumin [jeerah] and fenugreek [maitee] are also indispensable; ginger [q.v.], cloves [lavangam] and allspice [china pepper] are sometimes added. The following are two key-lists of the condimentary curry ingredients of S. india; further information must be traced in the glossary paragraphs through the small-type cross references at end of this volume; see also vricsham, 7, for the method of expressing the products, &c., of plant in the dravidian languages.—"*a*" Allium cepa, onion, bulb; Allium sativum, garlic, bulb; Andropogon schœnanthus, lemon grass, leaf; Apium graveolens, celery, root and petioles; Bassia longifolia, common mohwah, oil; Borassus flabelliformis, palmyra, jaggery, nut and toddy; Brassica campestris, sub-species campestris, colza, leaf, oil and seed; Brassica campestris, sub-species napus, rape, leaf, oil and seed; Capsicum annuum, common chilly, fruit; Capsicum frutescens, shrubby chilly, fruit; Capsicum grossum, caffrie chilly, fruit; Capsicum minimum, bird's-eye chilly, fruit; Capsicum nepalense, nepaul chilly, fruit; Carum carui, caraway, seed; Carum copticum, ajwaun, seed; Carum roxburghianum, ajmood ajwaun, seed; Caryota urens, bastard sago palm, toddy and jaggery; Cassytha filiformis, air plant, leaf; Cinnamomum iners, country cinnamon, bark and leaf; Cinnamomum tamala, cassia cinnamon, bark, leaf and bud; Cinnamomum zeylanicum, ceylon cinnamon, bark and leaf; Citrus aurantium, var. bergamia, bergamot orange, rind; Cocos nucifera, cocoanut, toddy, vinegar, jaggery, oil and cocoanut water; Coriandrum sativum, coriander, seed and green plant; Crocus sativus, saffron, stigmas; Cucumis sativus, common cucumber, oil of seed and young fruit; Cuminum cyminum, cummin, seed; Curcuma longa, turmeric, tuber; Elettaria cardamomum, cardamom, capsule; Eriodendron anfractuosum, silk-cotton tree, young fruit; Eugenia caryophyllata, clove tree, flower bud; Ferula narthex, asafœtida, gum; Fœniculum vulgare, indian fennel, leaf and seed; Garcinia cambogia, malabar gamboge, fruit; Garuga pinnata, garooga, fruit; Illicium anisatum, star anise, fruit; Lepidium sativum, cress, seed and green plant; Loranthus longiflorus, gooloom, bark; Mangifera indica, mango, kernels and dried fruit; Mentha piperita, peppermint, leaf; Mentha pulegium, pennyroyal; Mentha sativa, indian peppermint, leaf; Mentha viridis, spearmint, leaf; Moringa pterygosperma, indian horse radish, leaf, flower, pod and root; Murraya kœnigii, curry-leaf tree, leaf; Myristica fragrans, common nutmeg, nutmeg and mace; Myristica malabarica, malabar nutmeg, fruit; Nigella sativa, small fennel, seed; Ocimum basilicum, sweet basil, leaf or whole plant; Origanum marjorana, marjoram, leaf; Papaver somniferum, opium poppy, seed; Peucedanum graveolens, dill, seed; Phœnix sylvestris, wild date, toddy; Phyllanthus distichus, brazil cherry, fruit; Phyllanthus emblica, emblic myrobalan, fruit; Pimenta acris, pimento, leaf and berry; Pimpinella anisum, anise, seed; Piper betel, betel pepper, leaf; Piper chaba, chaab pepper, fruit; Piper cubeba, cubeb pepper, dried berry; Piper longum, long pepper, berry; Piper nigrum, black pepper, dried berry; Pteroselinum sativum, parsley, leaf; Saccharum officinarum, sugar-cane, jaggery and sugar; Sesamum indicum, gingelly, oil; Spondias mangifera, hog plum, fruit and leaf; Tamarindus indica, tamarind, fruit and leaf; Terminalia catappa, country almond, oil; Thymus vulgaris, thyme, leaf; Trigonella fœnum-græcum, fenugreek, green plant and seed; Vitex trifolia, water notchy, fruit; Zanthoxylum alatum, tejbul, fruit; Zanthoxylum rhetsa, rhetsa, fruit; Zingiber officinale, ginger, rhizome.—"*b*" Air plant, cassytha; Ajwaun, carum; Aniseed, pimpinella; Asafœtida, ferula; Basil, ocimum; Brazil cherry, phyllanthus; Caraway, carum; Cardamom, elettaria; Celery, apium; Chilly, capsicum; Cinnamon, cinnamomum; Clove tree, eugenia; Cocoanut, cocos; Colza, brassica; Coriander, coriandrum; Country almond, terminalia; Cress, lepidium; Cucumber, cucumis; Cummin, cuminum; Curry-leaf tree, murraya; Date, phœnix; Dill, peucedanum; Fennel, fœniculum, nigella; Fenugreek, trigonella; Gamboge, garcinia; Garlic, allium; Garooga, garuga; Gingelly, sesamum; Ginger, zingiber; Gooloom, loranthus; Hog plum, spondias; Horse radish, moringa; Lemon grass, andropogon; Mango, mangifera; Marjoram, origanum; Mohwah, bassia; Myrobalan, phyllanthus; Notchy, vitex; Nutmeg, myristica; Onion, allium; Orange, citrus; Palmyra, borassus; Parsley, pteroselinum; Pennyroyal, mentha; Pepper, piper; Peppermint, mentha; Pimento, pimenta; Poppy, papaver; Rape, brassica; Rhetsa, zanthoxylum; Saffron, crocus; Sago palm, caryota; Silk-cotton tree, eriodendron; Spearmint, mentha; Star anise, illicium; Sugar-cane, saccharum; Tamarind, tamarindus; Tejbul, zanthoxylum; Thyme, thymus; Turmeric, curcuma.——*Curry-leaf tree*

(सुरभिनिम्ब - surabhinimba, San.; कर्हिनिम्ब - karhinimba, Mahr.; करबेवु - karabévu, Conc.; کریاپات - kariyápát, Hind.; کری پاك - karepák, Dec.; ಕರಿಬೇವು - karibévu, Can.; ಬೇಸೊಪ್ಪು - bésoppu, Too.; కరివేప - karivépa, Tel.; ବାସଙ୍ଗ - básang, Oor.; കരുവേപ്പു - karuvéppu, Mal.; කරපිංච - karapiñcha, Singh.; கருவேம்பு - karuvémbu, Tam.). Title as used in curries, but really a corruption of tamul. San. from (surabhi, san. fragrant + nimba, san. neem tree, melia azadirachta, linn.). Hind. from (kariyá, hind. black + pát, leaf), from color of leaf. Dec. from hindostany by corruption. Can. from (kari, can. black + bévu, can. the neem tree). Too. from (bé, too. to cook + soppu, too. leaf). Tel. from (kari, tel. black + vépa, tel. the neem tree). Tam. from (karumai, tam. blackness + vémbu, tam. margosa tree, melia azadirachta, linn.). San. also (krishnanimba), meaning black neem; (krishnapatra), meaning black leaved; (kaidarya), meaning juice + praised [marootham]; (kálasháka), meaning black vegetable. Mahr. also (jhirang); (jiraní); (karépáka). Hind. also (bursanga); (harri); (katním); (simbolí); (kareaphal); (kariphalli). Dec. also (karnivím), meaning bitter neem. Tel. also (karépákuchettu); (karimpákuchettu). Title otherwise Black neem, Carepauk tree, Citron wort, Fragrant neem, Kikuel oil tree [tooth-brush tree], Simbolee oil tree. Botanically Murraya [caroovaimboo] kœnigii, spr., rutaceæ [vricsham, 32]. Alias Bergera kœnigii; Nimboo meloides. Nimbo, from (nimba, san. margosa). Small tree with pinnate leaves; leaflets alternate, ovate, acuminate, pubescent, somewhat serrated; panicles corymbiform, terminal; calyx five-cleft; petals five, spreading; berry one-celled, one-seeded; flowers small, white; common in jungles and much cultivated in native gardens; whole plant has peculiar odour; flowers in hot season. The roots spread widely and send up numerous suckers; they have a thick soft bark, the parenchyme of which is loaded with oil globules and has an agreeable odour and taste like fresh ginger [q.v.]; the leaves yield to distillation a small quantity of volatile oil resembling that obtained from bael [q.v.] leaves. Root medicinally laxative; bark and roots stimulant and used externally in eruptions, and in infusion to check vomitings in cholera [vaunty bhaidy]; tender leaves boiled in milk [paul], bruised, and applied as a poultice, to bites of poisonous animals; fresh leaves eaten raw in dysentery; infusion of toasted leaves stops vomiting; substituted for british peppermint [poodeenah] oil; leaves generally stomachic and tonic; leaves, bark and root quoted in pharm., non-officinal. Leaves used for seasoning curries, and mixed in curry pastes; retain their flavor when dry. Pulp of fruit gives a white juice, which blackens the skin like walnuts [acroot]; a yellow, clear, and transparent oil is procured from seeds, known as simbolee oil. Wood greyish-white, hard, durable. No other common species here.

CURTA (కర్త - karta, Tel.; കർത്താവ് - karttáv, Mal.; கர்த்தா - karttá, Tam.). From (kri, san. to do). An agent, husband, proprietor, heir, managing member of a family. Also one of the five supreme deities in augamam [q.v.] philosophy.——*Curtavkkal* (கர்த்தாக்கள் - karttákkal, Tam.). Plural form. Title of the Naick rulers at Madura.

CURTS (خرچ - kharch, Hind.). Plural (ikhráját). From (kharaja, ar. to issue forth). Expense of any kind; a cess levied on cultivators to provide for expenses; debit side of an account. Curtsdar, debtor; Curtskhah, creditor. Compare Compradore.

CUSBAH (قصبه - kasbah, Hind.). From (kasab, ar. a tract). Market town, principal village.

CUSCUS (वीरण - vírana, San.; वाळा - válá, Mahr.; भाणावळो - bhánávaló, Conc.; اسیر - usír, Ar.; خس - khas, Pers. and Hind.; بالا - bálá, Dec.; اکرونگی - akarwangi, Malay; ಲಾವಂಚ - lávancha, Can.; ಮುದ್ಯಲ - mudyala, Too.; వట్టివేరు - vattivéru, Tel.; രാമച്ചം - ráma¢¢am, Mal.; සවැන්දරා - savandará, Singh.; வெட்டிவேர் - vettivér, Tam.). Title from persian. San. from (víra, san strong); from scent [false ginger]. Malay from (akar, malay, scandent plant + wangi, malay, fragrant). Tel. from tamul. Mal. from (lámajjaka, san. the grass) [lemon grass]. Tam. from (vettu, tam. to cut + vér, tam. root); in tanjore and south always connected with cooroovair or coleus osmirrhizon. San. also (ushíra), meaning root in demand; (bahumúla), meaning many roots; (ranapriya), meaning battle + liking; (víratara), meaning very strong; (lámajjaka), meaning destroying sap. Ar. also (izkhar). Pers. also (bíkhiwálá), meaning great root. Hind. also (khaskhas); (usir). Can. also (mudjvala), meaning to adorn + tail; (báladahullu), meaning tail + grass; (kasuvuhullu); (nesehullu), meaning to jump + grass; (kádukaridappasajjehullu), meaning wild + black + thick + bed + grass. Tel. also (avurugaddi); (nallavattivéru), meaning black + cuscus + root, properly coleus osmirrhizon; (tellavattivéru), meaning white + cuscus + root; (vidavalivéru); (vákila); (kasavu), meaning grass. Mal. also (vettivér), meaning cut root. Singh. also (savandana); (savanna). Tam. also (vilámi¢¢amvér), from sanscrit; (vizhalvér), meaning excellent + root; (viranam), meaning heroic. Title otherwise Khas-khas, Vettivair. Botanically Andropogon [beard grass] muricatus, retz., graminaceæ [vricsham, 156]. Alias Agrostis verticillata; Anatherium muricatum; Andropogon aromaticus, festucoides, squarrosus; Phalaris zizainia, zizanoides; Rhaphis muricata; Vetiveria odorata. Vetiveria from tamul. Root perennial, fibrous; culms numerous, smooth, slightly compressed at the base, 4–6 feet; leaves bifarious near the base, narrow, erect; florets in pairs, awnless, male and hermaphrodite, the former pedicelled, latter sessile. Tufted grass, consists of many long, spongy, brown fibres; common on coast; abundantly in rich moist ground; the lowest part of the culms, with or without a portion of its roots, is cut; contains a resin [raul], and some volatile oil which is difficult to extract. Infusion of root is gentle stimulant, and makes drink in fevers; reduced to powder, roots given for bile in bilious affections; and, mixed with milk, externally as cooling applications to skin irritations; in pharm. non-officinal. Cattle will not eat the grass, except when quite young. Roots have fragrant odour, especially when moistened; used for manufacture of screens or blinds [tatty], being interwoven with wicker work which, applied to doors and windows during hot weather and moistened, give out fragrant odour and cool the apartment; the culm is used for thatching.——*Black cuscus* (ಕರಿಲಾವಂಚ - karilávancha, Can.). Title from color of root. Same as Ibharancoosha.

CUSH (کش - kash, Pers.). From (kashídan, pers. to draw). Suffix in compounds; as Peshcush, first + drawn, first charge.

CUSTOMER (ஆயக்காரன் - áyakkáran, Tam.). Tam. from (áya, san. revenue + káran, tam. possessor). In old books the native official who exacted customs duties [sayer].

CUSTOORY (कस्तूरि - kastúri, San.; مشك - mishk, Hind.). San. from (ka, san. head + stu, san. to praise). San. also (mriganábhi), meaning deer + navel; (nábhi), meaning navel; (mushka), meaning scrotum.—"*a*" Title otherwise Musk. Moschus of chemists. The inspissated and dried secretion from the preputial follicles of moschus moschiferus, which animal however is not represented in s. india; in its recent state, it has the consistence of an electuary of a reddish brown color; but by being kept, it becomes dry and crumbly; odour powerful and peculiar, bitterish heavy taste; when of rather light-brown color, and granulated, it is impure; if dark, homogeneous and divided in many parts by a thin cuticle, it is of good quality; musk is adulterated either by dried blood or asphaltum [shilajit]; factitious musk may be made by digesting together rectified oil of amber, one part with nitric acid [shorey katezaub], four parts, to be afterwards well washed in water; smell similar to that of musk or ambergris [meenamber], and may be substituted for them as medicine. Medicinally stimulant and antispasmodic; used in the low stages of febrile diseases as a stimulant and in various nervous affections as an antispasmodic; in veterinary practice a scruple with two drachms of gentian [chiretta] given daily to horses [ghorah] suffering from rheumatism or cold. The chief Indian musk-scented animal is the so-called musk rat [q.v.] in reality a shrew, but its odorous secretion is not utilized. Compare also Civet and Musk rat.—"*b*" Proper name common to both sexes. Custoorirungan means vishnoo with musk mark on forehead [peyar].—"*c*" Plant first term. From fragrance. Ex.:—Acacia farnesiana (kastúritumma), musk babool; Hibiscus abelmoschus (kastúribenda), musk bendy; Jasminum pubescens (kastúrimallige), musk jasmine; Triphasia trifoliata (kattúriyelumi¢¢ai), musk lime. See gloss. paragraphs.

CUTCH (काता - káta, Mahr.; كاٹ - kát, Hind.; کتها - katthá, Dec.; کچو - kachu, Malay; ಕಾಚು - káchu, Can.; ಕಾಚು - káchu, Too.; కాచు - kátsu, Tel.; കാത്തു - káttu, Mal.; காசுக்கட்டி - kásukkatti, Tam.). Title from malay. Mahr. from (kvát'ha, san. decoction); extract by boiling. Hind. from (kvát'ha, san. extract). Can., &c., from (kásu, can. to boil). Mal. from hindostany. Tam. from (káy¢¢u, tam. to boil + katti, tam. lump); inspissated lump by boiling. Mah. also (káshikkatti). Tam. also (kattakkámbu), from (gátahgambir, malay, gambier gum); (kásu). Also called Black catechu, Pegu catechu. Catechu nigrum of chemists. Formerly called Terra japonica, or Terra catechu; as believed to be mineral. Now only Pale cutch or gambier [q.v.] retains this name. Product of Acacia catechu, willd., leguminosæ [catechu] and other plants. Four principal kinds are found in the Madras market. First, the dark colored Catechu nigrum, from Acacia catechu; second, Catechu pallidum, imported from Singapore, the product of Uncaria gambier, roxb. [gambier]; third, a dark catechu from Areca catechu, linn. [areca]; fourth, white catechu, grey or pale brown externally and white internally, also known as Hyderabad catechu. There is cutch also from Acacia suma [white sundra] and sundra [sundra].

CUTCHA (کچا - ka¢¢á, Hind.). Crude; in contradistinction to pucka, complete. When there are different measures or weights of same name, the smaller is cutcha. So also green, unripe. Also current, not closed. A cutcha-built house is one built with unburnt bricks [shengal], and clay [calimunn] for mortar [cauray].——*Cutcha seer* (کچاسیر - ka¢¢áser, hind.). From (above + ser, hind. seer). Small seer. Bazaar weight. 8 pollums = 1 cutcha seer; 5 cutcha seers = 1 viss [niray, 2 c, e]. Approximate actual value, 1 cutcha seer = 9⅔ oz. Used in every district except Malabar and Tinnevelly. In Kurnool it is equal to 8¼ oz. In Bellary it is 8 oz. and 10½ drams. See vol. I, 609; II, 506, 507, 509.

CUTCHAM (கச்சம் - ka¢¢am, Tam.). Tortoise [aumay, coormam].——*Cutthaleshwaran* (கச்சாலேசுவரன் - ka¢¢álésa-

varan, Tam.). From (kaççálai, tam. the tortoise shrine in conjeeveram + íshvara, san. lord). Epithet of Shiva. Hindoo 2nd or pers. name. Familiarly Cutchay, Cutchoo, Cutchauloo. The short forms are applied to females also. Cutchan is the tortoise catcher or eater, Pariah proper name [peyar].

CUTCHERRY (کچہری - kachehrí, *Hind.*). From (kutsita, san. bad + hri, san. to take); from dealing with petty criminal cases. A revenue or police office; or its estabiishment. Cutcherrycull or stone of office is name given to some old stone monuments [aursham].

CUTCHY (கச்சி - kaççi, *Tam.*). Means the heart-leaved moonseed plant, tinospora cordifolia, miers [goolancha]. Native name of Conjeeveram. Changed by Bramins into Canjy.——*Cutchinaud* (கச்சிநாடு - kaççinádu, Tam.). Same as Cunchinaud. One of the two ancient talooks into which Calastry zemindarry was divided; the other being Calastry.

CUTT (కట్టు - kattu, *Tel.*; കെട്ട് - kattu, *Mal.*; கட்டு - kattu, *Tam.*). Dam. Suffix in place names as Pullicutt, meaning village + dam. As a verb means to bind, construct or pay.——*Cuddauyam* (కడ్డాయము - kaddáyamu, Tel.). From (kattu, tel. to bind). Compulsory work.——*Cutla* (కట్ల - katla, Tel.). Locative plural form. Suffix in place names; as Motacutla, meaning rude + embankment.——*Cutla paumb* (کٹان کا سانپ - kattánkásámp, Hind.; కట్లపాము - katlapámu, Tel.; കട്ടുവരിയൻ - kattuvariyan, Mal.; கட்டுவிரியன் - kattuviriyan, Tam.). Hind. from (kattu, tel. ring + sámp, hind. snake). Tel. from (kattu, tel. band + pámu, tel. snake). Mal. and Tam. from (kattu, tam. band + viriyan, tam. a viper). Snake with rings. Odontomus nympha, colubridæ [paumb], ophidii colubriformes, ophidia [sarpam], reptilia [sarpy, 17], of naturalists [jantoo].——*Cutlay* (కట్లె - katle, Can.; கட்டளை - kattalai, Tam.). From (kattu, tam. to bind). Rule. Measure. Goldsmith's weight. 24 cutlay pagodas = 1 pollum [niray, 3 a]. Approximate actual value, 1 cutlay pagoda = 56 grains. Compare Hind. miscal, Tel. kurruckvarahah, Tam. varauhan.——*Cutnam* (కట్నము - katnamu, Tel.). From (kattu, tel. to pay). Present made to superiors; present by relations to each other at the time of a marriage [bhet, nuzzer, wolfa].——*Cuttachootta* (కట్టచుట్ట - kattatsutta, Tel.). From (kattu, tel. band + tsutta, tel. coil). Terms co-extensive with the family Oligodontidæ, ophidii colubriformes, ophidia [sarpam], reptilia [sarpy, 16], of naturalists [jantoo]. The Oligodonts have the head nearly always with symmetrical arrow-shaped markings. The following are the known species in Southern india:—"*a*" Oligodon affinis. Small. Scales in seventeen rows; body brownish grey; back crossed by about thirty-eight short black streaks; belly white, with sub-quadrangular black spots, both colors being distributed in nearly equal; Anamullay hills.—"*b*" Oligodon brevicauda. Scales in fifteen rows; body greyish violet; a band runs along the vertebral line; ground-color of the belly the same as of the upper parts, with black quadrangular spots; sub-caudals whitish; Anamullay mountains.—"*c*" Oligodon elliotti. Scales in fifteen rows; Madras.—"*d*" Oligodon fasciatus. Scales in fifteen rows; body brownish olive; trunk with about twenty-seven broadish, brown, black-edged cross-bands, each slightly interrupted by a narrow yellow vertebral line; belly whitish, with small brown spots, more numerous on the sides than in the middle.—"*e*" Oligodon modestus. Scales in fifteen rows; brown spot below eye; body uniform greyish brown; belly white, with quadrangular black spots.—"*f*" Oligodon spilonotus. Scales in fifteen rows; head with symmetrical brown, black-edged markings; back with eight-shaped brown, black-edged transverse spots; distant from one another; lower parts uniform white.—"*g*" Oligodon spinipunctatus. Scales in seventeen rows.—"*h*" Oligodon subgriseus. Scales in fifteen rows. Back with numerous cross streaks, formed by the black edges of some of the scales, and interrupted by three more or less distinct, narrow whitish lines, one of which runs along the vertebral line; belly uniform white; southern parts of peninsula.—"*i*" Oligodon sub-punctatus. Body greyish, dorsal series of round black spots edged with white; belly whitish; coast of Malabar.—"*j*" Simotes bicatenatus. Of fierce habits, but harmless; has scales in nineteen rows; light brownish, with three rather indistinct dark longitudinal bands, one along the back; belly yellowish; sub-caudals nearly uniform yellowish.—"*k*" Simotes binotatus. Alias Xenodon dubium. Scales in seventeen rows; head with three angular white, black-edged cross bands; back with a series of pairs of square, brownish-grey, black-edged; lower parts uniform white; Coast of Malabar.—"*l*" Simotes russellii. Alias Coluber arnensis, monticolus, russellii; Coronella russellii. Scales in seventeen rows; brownish olive, with the bands on the head very distinct; body with well-defined black, white-edged cross bands; belly uniform white.—"*m*" Simotes trilineatus. Scales in seventeen rows; body reddish brown above and below, with three longitudinal bands; one runs along the vertebral line and is yellowish; the others are white, bordering the sides of the belly.—"*n*" Simotes venustus. Alias Xenodon venustum. Scales in seventeen rows; ground-color greyish or reddish brown, with three series of rounded black, yellow-edged spots; belly white, with quadrangular black spots, both colors being distributed in equal proportions.——*Cuttil* (കട്ടിൽ - kattil, Mal.). From (kattu, mal. to bind). Bedstead [cot]. Cuttil staunom, from (st'hána, mal. place) is property given by a Nayar to his wife and children [maroomakkatoyem].——*Cuttingia* (కట్టింగ్య - kattingyá, Tel.). Village, Mittah, Ghaut; Ganjam dist., Bodagooda tal., Maliah division; pop. 550; lat. 19° 41′; long. 84° 14′; from Balligooda S.S.E. 38 miles; from Chetterpore W.N.W. 56 miles. West of Bodagooda. Small mittah [q.v.] paying a quite-rent of 50 rupees. The mittahdar was formerly a feudal dependent of the Bodagooda rajahs. In consequence of a contest in 1807 between the Cuttingia sirdar [q.v] assisted by the Chief of Sooradah, and the Godapore and Bodagooda zemindars assisted by the Shergadah people, a sunnud [q.v.] was granted to Cuttingia. Fort of the Taut [q.v.] rajah of Cuttingia. Ghaut from Sooradah viâ Meercote to Bammoonigaum, the most direct route to centre of Chinna kimedy maliahs.——*Cuttiwaukum* (கத்திவாக்கம் - kattivákkam, Tam.). From (kattu, tam. dam + pákkam, tam. village); from being near the mouth of the corteliaur. Village; Chingleput dist., Sydapett tal.; pop. 4,359; acres 1,177; lat. 13° 13′; long. 80° 23′; from Madras N. 12 miles; from Poolicat S. 14 miles; from Sydapett N.N.E. 15¾ miles; from the sea W. ½ mile. Commonly known as Ennore, though that village is at the north bank of the backwater. A fishing village on a backwater into which falls the Corteliaur, and through which runs the Buckingham canal [q.v.] connecting with Madras. Being once a favorite resort of Europeans from Madras it has several European bungalows, but the place is chiefly notable for the extensive salt-pans in its neighbourhood. In 1769 Hyder encamped near this.——*Cuttoo* (ಕಟ್ಟು - kattu, Can.; కట్టు - kattu, Tel.; கட்டு - kattu, Tam.). From (kattu, tam. to bind). A rule, tie, band.——*Cuttoobuddy* (కట్టుబడి - kattubadi, Tel.). From (above + badi, tel. suffix meaning state). A favorable quit-rent [jody] on lands given to public servants, especially in zemindarries [inam].——*Cuttoobuddy buntrote* (కట్టుబడి బంట్రోతు - kattubadibantrótu, Tel.). From (kattubadi, tel. the tenure, so called + bantrótu, tel. peon). Peons who are paid for their services by grants of land subject to quit-rent only [inam]. They are divided into Grauma cuttoobuddy and Jangicuttoobuddy. The former are strictly village servants, and are required to perform service throughout the year. The latter are only called out for service on emergent occasions. See vol. I, 112.——*Cuttoo goottagay* (கட்டுக்குத்தகை - kattukkuttagai, Tam.). From (above + kuttagai, tam. lease). Joint renting.——*Cuttoo togay* (கட்டுத்தொகை - kattuttogai, Tam.). From (above + togai, tam. total). Grand total.——*Cuttooviriyan* (కట్టెడ - katteda, Tel.; கட்டுவிரியன் - kattuviriyan, Tam.). Band viper. Name applied to all small banded snakes [viriyan].

CUTTACAUMBOO (கத்தக்காம்பு - kattakkámbu, *Tam.*). Means gatah gambier [q.v.], from malay. Areca [q.v.] nut cutch [q.v.] chewed with betel-leaf [paun].

CUTTALAY (धामा - dhámá, *Mahr.*; కచ్చెలి - kaççeli, *Tel.*; கத்தலை - kattalai, *Tam.*). The genus Sciæna, sciænidæ, acanthopterygii, teleostei, pisces [matsyam, 12], of naturalists [jantoo]. The species best known to the natives are shown below.——*Black cuttalay* (నల్లకచ్చెలి - nallakaççeli, Tel.; ବୋଟାହଲ - botahl, Oor.; கருங்கத்தலை - karungattalai, Tam.). Tel. from (nalla, tel. black). Tam. from (karumai, tam. blackness). Sciæna [cuttalay] coitor, sciænidæ, acanthopterygii, teleostei [matsyam, 12], of naturalists. Alias Bola coitor; Corvina coitor, nalla-katchelee; Johnius coitor; nalla-katchelee from teloogoo. Snout scarcely overhanging jaws but prominent and swollen superiorly, upper jaw somewhat longer; scales cycloid on snout and below eyes, elsewhere ctenoid; lateral-line makes a gradual curve, and above commencement of anal becomes straight, its tubes give off a single branch on either side; colors silvery shot with gold and purple, upper half of first dorsal blackish; soft dorsal, caudal, and anal dark externally, whilst last fin has darkish basal band; larger rivers, descending to sea at seasons; attains a foot.——*Gray cuttalay* (سفید کتالے - sufedkattále, Hind.; வெள்ளைக்கத்தலை - vellaikkattalai, Tam.). Tam. from (vellai, tam. white). Sciæna [cuttalay] albida, sciænidæ, acanthopterygii, teleostei [matsyam, 12], of naturalists. Alias Bola coibor; Corvina albida, neilli. Jaws equal in front, or upper slightly longer, cleft of mouth slightly oblique; three pores across front of snout; free edge of skin of snout with five orifices and slight lateral lobe; bluntish knob below symphysis of lower jaw behind base of which is large open pore; short barbel between central pore and anterior lateral one, and very minute one at posterior pore; scales cycloid on head, elsewhere ctenoid, fine ones covering bases of soft and anal, and in adult whole of caudal fin; those anterior to base of first dorsal fin are much smaller than those posteriorly; lateral-line becomes straight opposite the anal fin; colors silvery, with light streak along each row of scales, first dorsal in young with black interspinous membrane, but only having black outer edge in adult; second dorsal stained gray at upper third; dark bluish mark on opercles, most distinct in young; ventral, anal, and caudal yellowish; sea; common, but not in esteem for table; 3 feet.——*Rusty cuttalay* (துருக்கத்தலை - turukkattalai, Tam.). Tam. from (turu, tam. rust). Sciæna [cuttalay] belengeri, sciænidæ,

acanthopterygii, teleostei [matsyam, 12], of naturalists. Alias Corvina belengeri, lobata; Johnius belengeri; Sparus. Snout rounded, overhanging upper jaw which is in advance of lower; cleft of mouth almost horizontal; snout with three open pores across base; free edge of skin has one central and a second opening on either side dividing it into four lobes; five rather small open pores on lower jaw; scales form a thick covering for the base of the soft dorsal fin; lateral-line curves to opposite end of anal where it becomes straight, at first indistinct; tubes with one or two branches; colors dark-gray, dorsals, anal, and caudal almost black; dark blotch on opercle; some specimens much lighter; sea; common on western coast.——*Striped cuttalay* (ಚಾರಿಕಲ್ಲಕಚ್ಚೆಲಿ - tsárikallakaççeli, Tel.; കത്തല - kattala, Mal.; வரிக்கத்தலை - varikkattalai, Tam.). Title from broad black stripes. Tel. from (tsára, tel. stripe + kalla, tel. false). Mal. from (kal, mal. stone + tala, mal. head). Tam. from (vari, tam. stripe). Tam. also (kuruvai), meaning short fish; (kurungattalai), meaning small sciæna genus. Sciæna [cuttalay] maculata, sciænidæ, acanthopterygii, teleostei [matsyam, 12], of naturalists. Alias Corvina maculata; Johnius maculatus; Perca sarikullah. Sarikullah from teloogoo. Upper jaw overlapping lower, and being itself overhung by the snout; transverse row of four pores across snout, free edge of skin with five orifices and a lateral lobe; central pore below mandibular symphysis; scales ctenoid, except on cheeks; lateral-line curves to below middle of soft dorsal when it proceeds straight, tubes have usually a single branch on either side; colors silvery-gray, abdomen whitish, cheeks tinged golden; five broad black bands, sometimes interrupted, extend over back, first from nape passes backwards and downwards, and shortly after crossing lateral-line abruptly terminates; second commencing opposite from fifth to seventh dorsal spines passes backwards and downwards, terminating opposite middle of ventral fin; third arising opposite second and third dorsal rays or between two dorsal fins passes downwards parallel to second band; fourth commences below centre of second dorsal and descends to lateral-line; fifth taking same course is below last few dorsal rays; occasionally there is a sixth over free portion of tail; upper two-thirds of first dorsal stained black, becoming more indistinct with age; caudal slightly tinged black, other fins yellowish; sea; a foot in length; not good eating.——*White cuttalay* (తెల్లకచ్చెలి - tellakaççeli, Tel.; வெள்ளைக்கத்தலை - vellaikkattalai, Tam.). Tel. from (tella, tel. white). Tam. from (vellai, tam. white). Sciæna [cuttalay] miles, sciænidæ, acanthopterygii, teleostei [matsyam, 12], of naturalists. Alias Corvina celebica, dorsalis, miles, sampitensis, soldado, wolfii; Holocentrus miles; Johnius celebicus, miles; Labrus teila katchelee; Pseudosciæna miles; Tella katchelee from teloogoo. Cleft of mouth moderately oblique; snout not overhanging jaws which are of about equal length anteriorly, or the upper slightly longer; scales cycloid on head and chest, ctenoid on remainder of body; lateral-line becomes straight above hind edge of anal, its tubes arborescent posteriorly; colors grayish darkened with green along back, becoming white on sides and abdomen, sometimes a small brown spot in front of each dorsal ray; outer edges of fins in some specimens dark, except ventral which is white; sea; 2 feet.

CUTTY (కత్తి - katti, *Tel.*; கத்தி - katti, *Tam.*). From (krit, san. to cut). Knife. Cutticauran is a toddy-drawer. Cutti-chatty are toddy drawer's knives and pots. Cunnamcutty is a burgler's tool.——*Cuttimandoo* (కత్తిమందు - kattimandu, Tel.; கத்திமருந்து - kattimandu, Tam.). Tel. from (above + mandu, tel. medicine); from serving as a cement to fix knives into handles. Title otherwise Caoutchouc plant, Cement plant, Knife-mending plant. Botanically Euphorbia [milk hedge] cattimandoo, w. ell., euphorbiaceæ [yricsham, 118]. Specific name from teloogoo. Shrub or small tree; stem erect, five-sided, with prominent repand angles; stipulary thorns paired, short, subulate; leaves sessile, succulent, deciduous, obovate, sub-cuneate, cuspidate, glabrous; peduncles crowded, three-flowered, middle one usually sterile, and lateral one fertile, flowering after the fall of the leaf. Abounds in milky sap, of nature of gutta-percha [q.v.], which after being boiled and formed into cakes or cylinders, becomes resinous or brittle. Fresh milk employed as outward application in rheumatism. Hardened milk employed as cement for fixing knives into handles and other similar purposes, which is effected by heating it; articles may easily be moulded by the hand from it [pauchonty].——*Cuttipanam* (കത്തിപ്പണം - kattippanam, Mal.). From (above + panam, mal. money). Tax on toddy-drawing.——*Cuttiry* (కత్తెరదొంగ - katteradonga, Tel.). Tel. from (kattera, tel. scissors + donga, tel. thief). Pick-pocket.

D (ड - ḍa, द - da, *San.*; ڈ - ḍál, د - dál, *Hind.*). The cerebral. San. epithet of shiva. Hind. in arithmetic 4; the fourth day of the week [vauram], Wednesday; the planet [graham] Mercury [boodhan]; the sign [raushy] Leo [asad, simham].

DABBILY (డబ్బిలి - dabbili, *Tel.*). Knave; term of abuse.

DABKY (دبکی - dabki, *Hind.*; పురిడిపిట్ట - puridipitta, *Tel.*; ଗୁନ୍ଦ୍ରୁ - gundru, *Oor.*). Hind. means squatter. Tel. from (puridi, tel. quail + pitta, tel. bird). Tel. also (chinnadábapitta), meaning small + quarrel + bird; (telladábapitta), meaning white + quarrel + bird. Title otherwise Button quail. Turnix sykesii, turnicinæ, tinamidæ, rasores [pacshy, 34], of naturalists [jantoo]. Alias Turnix variabilis, dussumierii. Most diminutive game-bird of S. india. Flushed with great difficulty. Low plaintive moan of a single note.

DACOIT (ڈکیت - dakait, *Hind.*; தீவட்டிக்கள்ளன் - tívattikkallan, *Tam.*). From (dákná, hind. to shout); because dacoits call out at the entrance of the village they are about to plunder, to terrify villagers. Tam. from (tívatti, tam. torch + kallan, tam. robber). A member of a gang of dacoity robbers. By law, to constitute dacoity, there must be five or more in the gang committing the crime [deevatticollay].

DACSH (दक्ष् - daksh, *San.*). To be able.——*Dacshan* (दक्ष - daksha, San.). Very ancient mythological personage. An avatar [q.v.] of Bramha [q.v.]. His head was cut off by Veerabhadran [q.v.], and on the intercession of the gods was replaced by that of a he-goat. He had many daughters of whom twenty-seven became the wives of the moon [chundran], forming the lunar asterisms [nacshatram], and others the wives of Cashyapan [q.v.], becoming by him the mothers of gods, demons, men and animals [adity, matam]. See vol. I (71).——*Dacshinacharry* (दक्षिणाचारी - dakshináchári, San.). From (dakshina, san. right-hand + áchára, san. conduct). Division of the Shauctas [q.v.], followers of the right-hand or purer ritual. The left-hand are Vaumacharries. See vol. I (87).——*Dacshina dhroovam* (दक्षिणध्रुव - dakshinadhruva, San.). South pole or dhroovam [q.v.].——*Dacshina golam* (दक्षिणगोल - dakshinagóla, San.). Southern sphere. Dacshina golaurdham is southern hemisphere [golam].——*Dacshina gungay* (दक्षिणगङ्गा - dakshinagangá, San.). From (dakshina, san. south + gangá, san. the ganges). Ganges [gungay] of the south, especially Cauvery.——*Dacshinam* (दक्षिण - dakshina, San.).—"*a*" Right side, as distinguished from left. Compare dexter and δεξιός.—"*b*" South. δαχιναβάδης of Periplus. The Aryans coming from the west applied term to country on their right hand. In like manner country before them became poorvam or east, and the inhabitants poorvyas or easterns; another word for east (práchi) supplied the Greeks with name πρασία for people of Gangetic valley. Thus dacshinam came to mean Southern india. Compare the Anglo-indian word Deccan [q.v.].—"*c*" Prefix in place names as Dacshina caushy, meaning southern benares.——*Dacshina mandotcham* (दक्षिणमन्दोच्च - dakshinamandóççá, San.). Southern apsis [mandotcham]. Perihelion.——*Dacshina moorty* (दक्षिणामूर्ति - dakshinámúrti, San.). From (dakshina, san. south + múrti, san. image). Agastyan [q.v.], as dwelling in Pothigay [q.v.] in the south. Shiva facing south in his malevolent aspect [aulamareadavool]. Hindoo 2nd or pers. name [peyar].——*Dacshinaupata janmauna* (दक्षिणापथजन्मान - dakshinápat'hajanmána, San.). From (dakshina, san. south + pat'ha, san. road + janma, san. birth). South indian aborigines, dravidians.——*Dacshinaurnavam* (दक्षिणार्णव - dakshinárnava, San.). From (dakshina, san. south + arnava, san. sea). The southern ocean, meaning ocean round Ceylon [q.v.].——*Dacshinauyanam* (दक्षिणायन - dakshináyana, San.). Southward progress. Northern solstice [ayanam].——*Dacshinauyana poonyacaulam* (தட்சணாயனபுண்ணியக்காலம் - tadchanáyanappunníyakkálam, Tam.). Means northern solstice [ayanam] + auspicious time. Same as Audy pundigay.——*Dacshinay* (दक्षिणा - dakshiná, San.; ദക്ഷിണ - dakshina, Mal.). Means right. A gift made to Bramins.

DAEMIA (دیمیہ - dímia, *Ar.*). Hedge cotton [q.v.] shrub.

DAF (دف - daf, *Hind.*; డప్పు - dappu, *Tel.*). A large flat drum or tambour without cymbals [paray, sangeetam, tappattay].

DAFA (دفعہ - dafa, *Hind.*). From (dafa, ar. to impel); coming of a party of men to a place at once. Section. Turn. A band of policemen usually twelve [duffedar, taundah].

DAGAH (دغا - daghá, *Hind.*). From persian. Fraud.——*Dagahjauda* (دغا جہار - dagháhjhárá, Hind.). From (jhárá, hind. search). Account of lands clandestinely sown.——*Daghah bauz* (دغاباز - daghábáz, Hind.; దగాబాజి - dagábáji, Tel.). From (báz, pers. player). A sharper [pashapa].

DAGLAH (دگلہ - daglah, *Hind.*). From (dhágá, hind. thread + ghálná, hind. to put in). A quilted jacket with long loose sleeves and open cuffs [sheelay].

DAGOBA (देहगोप - déhagópa, *San.*). From (déha, san. body + gup, san. to hide). Word came through the singhalese. A conical erection surmounting relics inside Booddhist topes. Common in Ceylon. Corresponds to a relic monument which is still erected in Thibet over the body or the ashes of the Llamas. The dagoba is a later development of the sepulchral tumulus of the earlier races [aursham, paundicoozhy, tope].

DAHR (دهر - dahr, *Hind.*). From (dahra, ar. to befal). World, nature, eternity.——*Dahree* (دهری - dahrí, Hind.). Those who believe in eternity of matter and deny the existence of a creator, materialists.

DAKOREE (वरटा - varatá, *San.*; زنبور - zumbúr, *Ar.* and *Pers.*; ڈکوری - dakorí, *Dec.*; تابون - tábuwan, *Malay*; ಕಣಜದಹುಳ - kanajadahula, *Can.*; ಕೊಂಡೊಲು - kúndolu, *Too.*; కందిరీగ - kandiríga, *Tel.*; കടന്നൽ - katunnal, *Mal.*; குளவி - kulavi, *Tam.*). Title from deccany. San. from (vri, san. to encircle); as wheeling round [varatam]. Ar. from (zumbar, ar. to walk proudly). Dec. from (dák, hind. sting). Can. from (kanaja, can. granary + hula, can. insect). Tel. from (kandu, tel. to blister + íga, tel. fly). Mal. from (katu, mal. fierce). Tam. from (kozhuthu, tam. to hollow out). Wasp. Co-extensive with family sphegidæ, hymenoptera, holometabola, insecta [poochy], of naturalists [jantoo]. Distinguished by its metallic lustre. Introduces its eggs into the body of the pupa of some other insect, which it thrusts into key holes and other apertures of houses, and encloses the whole with moistened earth. The young parasite, after undergoing its transformations, gnaws its way into light, and emerges a four-winged fly. The Ampulex compressa, which drags about cockroaches [jhingoor] into which it has implanted its eggs, belongs to this family.

DALADAY (දළදා - daladá, *Singh.*). From (dala, singh. tooth + dá, singh. relic). The left canine tooth of Booddha, the most highly venerated relic among the Booddhists, now at Candy in Ceylon [dagoba].

DALAM (दल - dala, *San.*). From (dal, san. to be divided) [dholl]. Army.——*Dalavoy* (தளவாய் - talaváy, Tam.). From (above + vah, san. to lead). A military commander, or minister of state, title still borne by ministers of Mysore and Travancore. Answers to the Mussalman diwaun [q.v.].——*Dalavoy saitoopaty* (தளவாய்சேதுப்பதி - talaváysethuppathi, Tam.). Commander + title. Otherwise Sadeiyakka tevar, the third Saitoopaty [q.v.] of Ramnaud; 1635-1645. Deposed by his younger brother Tumby [bettana] on his attempting to proclaim his adopted son Raghoonaut tevar as his successor. Restored in 1640. Murdered by Tumby five years after restoration. See vol. I (124) [charitram].

DALAY (തല - tala, *Mal.*; தலை - talai, *Tam.*). From (st'hala, san. place) [talam]. Place. Suffix in place names; as Aulandalay, meaning place of the banyan [q.v.] tree [talay].

DALLAUL (دلال - dallál, *Hind.*). From (dalla, ar. to point out). A broker [doobash].

DALOYET (ڈھلیت - dhalait, *Hind.*). From (dhál, hind. shield). An armed attendant. Superior class of peons [q.v.] attached to the person of a chief European officer [duffedar].

DAM (दम् - dam, *San.*). To subdue.——*Damam* (दम - dama, San.). The power by which the organs [indriyam] and faculties are kept in subjection [yogam].——*Damayanty* (दमयन्ती - damayantí, San.). From fascinating men. The heroine of Neishadam [q.v.].——*Dammoo* (దమ్ము - dammu, Tel.). From (dama, san. mud). Moisture. Suffix in place names; as Varidammoo, meaning paddy + moisture.——*Damodaran* (दामोदर - dámódara, San.). From (dáma, san. cord + udara, san. belly). Krishnan tethered as a child by a cord round his belly. Nonbramin Hindoo 2nd or pers. name [peyar].——*Damodaraputnam* (தாமோதரப்பட்டணம் - támótharappattanam, Tam.). From (dámódara, san. krishna, proper name + pattana, san. city). Village, Port; Madura dist., Ramnaud zemindarry; lat. 9° 47′; long. 79° 07′; from Madras S.S.W. 240 miles; from Madura E.S.E. 63 miles; from Paushiputnam S.S.W. 1½ miles; from Ramnaud N.N.E. 32 miles; from Toudy N.E. 4½ miles. On Palk's straits [jalasand].

DAMAROO (डमरु - damaru, *San.*). From (dam, san. imitative + ri, san. to give). A kettle drum [paray, sangeetam]. Damarcam, similar, is the drum of Shiva [dindimam]. Damaroocaucrity is a drum-shaped figure in geometry [cshetra ganitam].

DAMASHOY (داماساهی - dámásáhí, *Hind.*). From (dámásáh, hind. merchant's name); who dying insolvent distributed all his property in just proportion among his creditors [curtskhah]. Proportionate distribution.

DAMBAM (डम्भ - dámbha, *San.*). From (dambh, san. to cheat). Hypocrisy, vain show. Dambacharry vilausam, from (vilásam, san. play), is a Tamul drama by Vishwanautan; plot from real life, to ridicule the life of a fop.

DAMMA (دمه - dammah, *Hind.*). From (dam, pers. breath). Asthma in horses [ashwarogam, ghorah].

DAMMER (यक्षधूप - yakshadhúpa, *San.*; डामर - dámara, *Mahr.*; ڈامر - dámar, *Hind.*; دمر - damar, *Malay*; ಗುಗ್ಗುಳ - guggula, *Can.*; ರಾಳ - rála, *Too.*; గుగ్గిలము - guggilamu, *Tel.*; ചെഞ്ചല്യം - cheñchalyam, *Mal.*; දුම්මල - dummala, *Singh.*; குங்கிலியம் - kungiliyam, *Tam.*). Title from malay, where it means generically resin [raul]. San. from (yaksha, san. the demi-god + dhúpa, san. incense). Mahr. from hindostany. Hind. from malay. Can. from (gud, san. to preserve); useful in nervous diseases [googal]. Too. from (ri, san. to go). Mal. from (chem, mal. red + cháyilyam, mal. vermillion) [shangarf]. A hard, dark-colored, brittle, resinous substance [gond, raul], which exudes from trees of Dammara genus in the Eastern islands and New zealand, whence imported here. Used when melted for spreading over packages, as substitute for pitch [keel, zift]. Indigenous dammers are from other trees; see below.——*Amboyna dammer* (انبونہ کا ڈامر - ambúnahkádámar, Hind.). Dammer proper from amboyna [q.v.]; see above.——*Australian dammer* (استریلیہ کا ڈامر - ástreliyákádámar, Hind.). Dammer proper from new zealand; see above.——*Black dammer* (राळधूप - ráladhúpa, Mahr.; کالا ڈامر - káládámar, Hind. and Dec.; ಮಂದಧೂಪ - mandadhúpa, Can.; నల్లరోజనము - nallarójanamu, Tel.; തെള്ളി - telli, Mal.; கருப்புக்குங்கிலியம் - karuppukkungiliyam, Tam.). Title from shining black resin; in contrast to the white dammer tree, vateria indica, linn., which is in these pages called piney dammer [q.v.]; in the north however the article which goes by the name of black dammer is the product of shorea robusta, gærtn. [common saul]; see saul dammer. Mahr. from (rálá, mahr. the resin + dhúpa, san. incense). Hind. from (kálá, hind. black + dámar, hind. resin). Can. from (manda, san. slow + dhúpa, san. incense). Tel. from (nalla, tel. black + rójanamu, tel. probably corruption of english rosin). Mal. from (teli, mal. to sift); sifted resin, from its transparency. Tam. also (karuppudámar), meaning black dammer. Resin of Canarium [caunary] strictum, roxb., burseraceæ [vricsham, 35]. Large tree; young parts densely clothed with rusty-colored pubescence; leaflets nine to fifteen, stalked, ovate or ovate-lanceolate, acuminated, at length serrulate-ciliate, hairy; abundant in all the moist ghaut [q.v.] forests on west coast to 4,000–4,500 feet, never seen in dry forests; brilliant crimson foliage; flowers early in the year. Resin [raul] from incisions in trunk is transparent and of a deep brownish yellow or amber color, when held between the eye and the light, but when adhering to the tree has a bright shining black appearance; is a true copaline resin [copal]; is found in large stalactitic masses; insoluble in cold, but partially soluble in boiling alcohol with the addition of camphor [q.v.]; when powdered readily soluble in oil of turpentine [ganda firoza]; emits a more resinous smell and burns with more smoke than white or piney dammer. Quoted in pharm. but non-officinal; a substitute for burgundy pitch in making plasters. Used for many small purposes, as in the manufacture of bottling-wax [mom]; its solution in turpentine forms a tolerable varnish [rangh]; when submitted to destructive distillation it yields about 78 per cent. of oil, resembling that obtained from common colophony; a considerable article of trade with some hill tribes.——*Burmah dammer* (برمے کا ڈامر - barmekádamar, Hind.). Another name for Poonyet [q.v.].——*Cowdee dammer* (کوڑی ڈامر - kaurídámar, Hind.). Same as Australian dammer.——*Dhoona dammer* (धुनाडामर - dhúnádámara, Mahr.). Means sounding dammer, from sound of incense smoke. Same as Saul dammer.——*Dhoop dammer* (धूपडामर - dhúpadámara, Mahr.). Means incense dammer, from use Same as White dammer in either of its applications.——*East indian dammer* (ولایتی ڈامر - viláitídámar, Hind.) Dammer proper from molucca, borneo, java, sumatra, &c.; see above.——*Green dammer* (ہرا ڈامر - harádámar, Hind.). Same as Tambaga dammer.——*Indian dammer* (ناٹ کا ڈامر - nátkádámar, Hind.). Term applied to either Black, Piney, or Saul dammers.——*Piney dammer* (कुन्दुर - kundura, San.; चन्द्रस - chandrasa, Mahr.; سندروس - sandrús, Ar.; چندروس - chandrús, Hind.; چندرس - chandras, Dec.; ಬಿಳಿಗುಗ್ಗಿಳ - biliguggila, Can.; ಲೋಭಾನ - lóbhána, Too.; తెల్లగుగ్గిలము - tellaguggilamu, Tel.; വെള്ളക്കുന്തുരുക്കം - vellakkunturukkam, Mal.; குந்துருக்கம் - kundurukkam, Tam.). Title piney, from (payan, mal. gum-yielding tree, vateria indica, linn.). San. from (kundu, san. gum olibanum) [coondoor]. Mahr. from arabic. Can. from (bili, can. white + guggila, can. dammer). Too. from (labana, ar. juice). Tel. from (tella, tel. white + guggilamu, tel. dammer). Mal. from (vella, mal. white + kunduruka, san. gum olibanum). Tam. from (kunduruka, san. gum olibanum). San. also (dhúpa), meaning incense [dhoop dammer]. Mal. also (pantam), meaning tied, probably from use as torch light [deevatty]. Title otherwise Gum animi, Indian copal, Piney tallow, White dammer. Resin of Vateria indica, linn., dipterocarpeæ [vricsham, 24]. Native of Ceylon and Malabar. Known to ancients, but wrongly included by them under the mineral σανδαράκη or realgar [manoshilay]. On wounding the bark of tree a white pellucid fragrant acrid and bitter honey-like resin [raul] exudes, which in the sun becomes yellow and brittle, and looks like amber; insoluble in water; when powdered dissolves in turpentine [gandafiroza]; half-petrified is superior to that obtained from living trees. This dammer is found in bazaar [q.v.] in two forms:— First, large compact and very hard lumps of all shapes, varying externally from bright orange to dull yellow, and internally from light green to light yellow, green predominating; has a shining

vitreous fracture, and greatly resembles amber [karbah]; more soluble in alcohol and burns with less smoke, and gives out more fragrant smell, than black dammer [q.v.]. Second small or large masses of a cellular structure, of a shining appearance, and a balsamic odour; greatly inferior to the first sort.——*Poonyet dammer* (پونیت ڈامر - punyatdámar, Hind.). Same as Burmah dammer.——*Raul dammer* (राळडामर - ráladámara, Mahr.). Same as Saul dammer.——*Rock dammer* (ಕಲ್ಲುಗುಗ್ಗಿಲ - kalguggila, Can.; ಕಲ್ಲುರಾಳ - kalluråla, Too.; ഉറപ്പിൻപശ - urappinpasha, Mal.; உரப்புப்பிசின் - urappuppisin, Tam.). Title from being found in rock-like masses. Can. from (kallu, can. stone + guggila, can. dammer). Too. from (kallu, too. stone + rála, too. dammer). Mal. from (urappu, mal. the tree + pasha, mal. gum). Tam. from (urappu, tam. hardness; applied to the tree, hopea odorata, roxb. + pisin, tam. gum). Resin of Hopea odorata, roxb. [caung].——*Saul dammer* (राल - rála, San.; राळ - rála, Mahr.; قنقهر - kankahar, Ar.; لعل معبری - lalimabarí, Pers.; رال - rál, Hind. and Dec.; دمر بتو - damarbatu, Malay; കുങ്കില്യം - kunkilyam, Mal.; குங்கிலியம் - kungiliyam, Tam.). Title from being obtained from saul [q.v.] tree. San. from (ri, san. to go); applied to resins [raul] which disappear on combustion. Pers. from (lal, pers. resin + mabar, ar. coromandel coast). Malay from (damar, malay, dammer + batu, malay, stone). Mal. from tamul. Tam. from (gud, san. to preserve); useful in nervous diseases [googal]. San. also (ashvakarnaniryása), meaning the tree, shorea robusta, gærtn. + gum; (sálavéshta), meaning shorea robusta, gærtn. + exudation; (sálaniryása), meaning shorea resin; (sarjaniryása), meaning shorea resin. Mahr. also (dhúna), meaning sounding resin, from sound of incense smoke [dhoona dammer]. Resin of Shorea robusta, gærtn. [common saul].——*Tambaga dammer* (തമ്പകഡാമർ - tampakadámar, Mal.). Resin of tambaga saul.——*White dammer* (سفید ڈامر - sufeddámar, Hind.; اجلا ڈامر - ujládámar, Dec.; வெள்ளைக்குங்கிலியம் - vellaikkungiliyam, Tam.). Hind. from (sufed, hind. white + dámar, hind. dammer). Dec. from (ujlá, hind. white + dámar, hind. dammer). Tam. from (vellai, tam. white + kungiliyam, tam. dammer). Term applied either to Dammer proper or to Piney dammer.——*Yellow dammer* (कोङ्कणधूप - kónkanadhúpa, San.; पांढरीविशेष - pándharívishésha, Mahr.; विशेषधूप - vishéshadhúpu, Conc.; کندر - kundur, Ar., Pers. and Hind.; فرنگی عود کا جہار - farangíúdkájhár, Dec.; دمر - damar, Malay; ಗುಗ್ಗುಳ - guggula; Can.; గుగ్గిలము - guggilamu, Tel.; മഞ്ഞക്കുങ്കില്യം - mañňakkunkilyam, Mal.; குந்துருக்கம் - kundurukkam, Tam.). San. from (kónkana, san. the country so called + dhúpa, san. smoke). Mahr. from (pándhara, san. white + vishésha, mahr. frankincense). Conc. from (vishésha, san. special + dhúpa, san. incense). Pers. from arabic. Dec. from (farangí, hind. foreign + úd, ar. frankincense + jhár, hind. tree). Can. and tel. from (guggula, san. dammer). Mal. from (maňña, mal. yellow + kunkilyam, mal. dammer). Tam. from (kunduruka, san. olibanum) [indian olibanum, piney dammer]. San. also (yakshadhúpa), meaning demi-god + incense; (kundu) [coondoor]. Dec. also (farangíkundur), meaning foreign incense. Can. also (sámbráni), meaning frankincense [saumbrauny]. Tel. also (andugu), meaning burning + tree; (p'harangisámbráni), meaning european + incense; (tellaguggilamu), meaning white + dammer. Mal. also (parankisámpráni). Tam. also (vellaikkungiliyam), meaning white + dammer. Title otherwise Concany resin, Country resin, Doopada [piney tree], Googal, Indian resin, White frankincense. Resin of Boswellia [olibanum] serrata, var. glabra, roxb., burseraceæ [vricsham, 35]. Alias Boswellia balsamifera, glabra; Canarium balsamiferum; Chloroxylon dupada. Dupada, from (dhúpadá, san. incense giving). Tall erect tree covered with greenish ash-colored bark; leaves alternate, unequally pinnate, at the extremities of the branchlets; leaflets six to ten pairs, opposite, broadly lanceolate, obtuse, serrated, glabrous; flowers numerous, on short pedicels, small, white; calyx small, five-toothed; petals five; capsule three-angled, three-celled, three-valved; seeds solitary, surrounded by a membranaceous wing; racemes simple, terminal, fascicled, shorter than the leaves. The fragrant gum resin is same as that of indian olibanum [q.v.] but dries quicker. With wood oil [q.v.], this gum resin [googal] makes a useful coarse varnish [rangh] for doors, windows, &c.; also as a pitch [keel] in dock-yards and by farriers [naulbund] for certain plasters; melted with gingelly [q.v.] oil, is used for covering corks in bottles to preserve them from white-ants [q.v.]; khonds [q.v.] and ooriyas [q.v.] make the leaves into eating plates, and roll up tobacco [pogauk] in them as a cheroot [q.v.]. Wood is heavy, hard and durable.

DANDAM (दण्ड - danda, *San.*). From (dand, san. to punish). A stick; a pole, as a measure of length [kole]; a column of troops [pataulam], army [dalam]; an uninterrupted series; oar of a boat; pole of a banner [dhwajam] or tent [derah].—"*a*" A linear measure, equivalent to fathom. 4 hastams = 1 dandam; 2,000 dandams = 1 crosham [alavay, 1 f.] Approximate actual value, 1 dandam = 6 feet. Same as Hind. baum, Can. bauroo, Tel. niloovoo, Mal. and Tam. maur.—"*b*" Measure of time. 60 vicalays or indian minutes = 1 dandam or indian hour; 60 dandams = 1 dinam or day [caulam, 6]. Approximate actual value, 1 dandam = 24 english minutes. Same as San. ghaticam [caulam, 4, 5], Tam. nauzhy, nauzhigay [caulam, 1].——*Dandacam* (दण्डक - dandaka, San.). From (danda, san. an uninterrupted series). Ancient forest lying between Godavery and Nerbudda. Rama and Seetay's adventures transferred here. Dandacaurанyam is the same [charitram].——*Dandaca naud* (தண்டகநாடு - tandaganádu, Tam.). Part of Yeyil cottam in the ancient Tondaimundalam. In the present Conjeeveram talook, Chinglepnt district.——*Dandapauny* (தண்டபாணி - tandabáni, Tam.). From (danda, san. stick + páni, san. hand). Shiva or Vishnoo with staff in hand. Familiarly Dandoo. Hindoo 2nd or pers. name [peyar].——*Dandla* (దండ్ల - dandla, Tel.). From (dandu, tel. army). Locative pl. Suffix in place names; as Velidandla, meaning outer army.——*Dandoo* (தண்டு - tandu, Tam.). Means staff. Familiar contraction of Dandapauny or Shiva, the staff-handed god; also Soobramanyan. Hindoo 2nd or pers. name [peyar]. Also means army. Moon dandoo is vanguard and pin dandoo is the rear. There is a Tamul proverb:—தண்டுக்கு போனால் இரண்டில் ஒன்று—"If you go into the army, one "of the two" is certain; life or death.——*Dandy* (दण्डी - dandí, San.; ڈنڈی - dandí, Hind.).—"*a*" Any one who bears a staff. Especially religious mendicants, of the order founded by Shuncaracharry [shuncaran]; these are divided into ten classes, each of which is distinguished by a peculiar name, as Teertam a sacred water, Aushramam an order, Giry a hill, which is added to the proper name of the individual as Poorshottamagiry; they are hence known collectively as the Dashnamy [q.v.], or ten-named gosains [gosain, matam].—"*b*" Also a rower, a boatman.—"*c*" Also a hammock-shaped conveyance for travellers, slung on a pole with straps for the feet and back, and carried by two bearers, suited for hill travelling.—"*d*" Also one of the sixty-three devotees [aroopatt moover] of shiva, who is said to have been born blind and afterwards to have received sight.

DANT (दन्त - danta, *San.*). From (dá, san. to cut). Tooth So ivory. Physiological characteristics of this are that transverse sections of the dentine show lines of different colours or striata proceeding in the arc of a circle and forming by their decussations minute curvilinear lozenge-shaped spaces. South indian ivory when first cut looks whiter than african, but is more apt eventually to become yellow [elephant]. Vegetable ivory is name given to osseous albumen in the nut of a dwarf south american palm, the phytelephas macrocarpa; these nuts called corossos are used by turners in imitation of elephant ivory. Dant is also frequent plant second term. Ex., where transl. is of first term:—Adhatoda vasica (vájídanta), horse; Argemone mexicana (brahmadanti), bramin; Baliospermum montanum (nágadanti), serpent; Ehretia lævis (páladantamu), white; Heliotropium indicum (nágadanti), serpent; Musa paradisiaca (guchhadantika), cluster of flowers. See gloss. paragraphs.——*Danta shatham* (दन्तशठ - dantashat'ha, San.). Tooth + rogue; from being bad for teeth from acidity. Plant name common to:—Diospyros embryopteris; Feronia elephantum; Oxalis corniculata. See gloss. paragraphs.——*Paula dantam* (పాలదంతము - páladantamu, Tel.). Meaning white + ivory, from wood. Same as Smooth coorvitchy.

DAR (دار - dár, *Pers*). From (dáshtan, pers. to keep). Suffix of possessor or agent; as Jagheerdar, jagheer + owner.

DAR (در - dar, *Hind.*). In.——*Darobast* (دروبست - darobast, Hind.). From persian. All, whole, altogether [hama].——*Darwauja* (دروازہ - daryázah, Hind.). From (váz, pers. open). A gateway [dwauram].——*Darwillah* (درینولا - darínwilá, Hind.). From (above + ín, pers. this + wilá, ar. time). In this connection; phrase used in official papers to connect the substance of the paper with the salutation with which it usually opens.——*Daryaft* (دریافت - daryáft, Hind.). From (above + yáft, pers. finding). Investigation [taniky].

DARBHAY (दर्भ - darbha, *San.*; दर्भ्या - darbhyá, *Conc.*; داب - dáb, *Hind.*; کشا - kushá, *Dec.*; ದರ್ಭೆ - darbhe, *Can.*; ದರ್ಭೆ - darbhe, *Too.*; దర్భ - darbha, *Tel.*; ആറ്റുദർഭ - áttudarbha, *Mal.*; කුසතණ - kusatana, *Singh.*; தருப்பை - taruppai, *Tam.*). Title from sanscrit. San. from (drí, san. to tear); from leaf margins acutely serrate. Conc. from sanscrit. Mal. from (áru, mal. river + darbha, san. the grass). Singh. from (kusha, san. the grass + trina, san. grass). San. also (kusha), meaning earth-strewn, from being strewn on ground and sat upon during devotion or sacrifice; (pavitra), meaning purifier; (kut'ha), meaning adhering to finger. Hind. also (kúthá). Can. also (kushadarbha), meaning sacrificial grass. Tel. also (áshvaláyanadarbha), meaning the sage + the plant; (kushadarbha). Tam. also (nákkaruttánbul), meaning tongue + to cut + grass; alluding to legend that serpents greedily licked the amritam that had fallen upon darbhay and had their tongues forked. Title otherwise Coosha grass, Cutting grass, Daub, Meadow grass, Sacrificial grass, Thatch grass [naunal], Tongue grass [haleem]. Distinguish from Doob or Doorvay, which is Cynodon dactylon, pers. [hurrially]. Botanically Eragrostis [coosham] cynosuroides, retz., gramineæ [vricsham, 156]. Alias Briza bipinnata; Imperata arundinaceæ; Poa cynosuroides. Root creeping;

culm stout, reed-like, clothed at the base with withered sheaths; leaves rigid, flat, or the younger root ones convolute, elongated, nearly a foot long; raceme compound, close, elongated, branches scattered, dense, racemose; spikelets sessile, secund, distichous, nine to fifty-flowered; florets lanceolate, ovate, shining. Coarse grass, common in dry ground; culms straight round and smooth, one to three feet in height; leaves long and numerous, with sharp points, and margins acutely sawed downwards; its long roots keep it fresh throughout the year. Especially holy, and in demand in votive offerings and religious ceremonies [coosham]; it is then strewed upon the altar, or held by bramins in their hands whilst repeating the ritual; it is also placed on the ground with its tips to the east, as a seat for the idols; in the shrauddham [q.v.], the funeral cake [pindam] is placed on darbhay grass, and before offering it, water in which white flowers and sandal [q.v.] paste are immersed is poured on the cake; a dying hindoo, when no hopes of his surviving remain, should be laid on a bed of darbhay in the open air, with other ceremonies [shoodcaud]. The following is from the 4th vedam:—"thee, o darbhay, the learned proclaim a divinity not "subject to age or death; thee they call the armour of indran, "the preserver of regions, the destroyer of enemies; a gem "that gives increase to the field; at the time when the ocean "resounded, the clouds murmured, and lightnings flashed, then "was darbhay produced, pure as a drop of fine gold." Has medicinally diuretic and stimulant properties; produces an excellent rope fibre. The intellect of a clever man is said to be sharp as the point of a darbhay leaf.——*Bramha's darbhay* (ब्रह्मदर्भा - brahmadarbhá, San.). Same as Ajwaun.——*Wild darbhay* (ಕಾಡುದಬ್ಬೆಹುಲ್ಲು - kádudabbehullu, Can.). Can. from (kádu, can. wild + dabbehullu, can. split grass, eragrostis cynosuroides, retz.). Title otherwise Barn-yard grass, Cock's shin grass. Botanically Panicum [priyangoo] crus galli, linn., graminaceæ [vricsham, 156]. Alias Echinachloa crus corvi, crus galli; Oplismenus crus galli; Panicum crus corvi. Culms filiform, creeping at the base, above nearly erect; leaves soft, downy; spikes compound, alternate, secund; flowers imbricated in two rows; glumes and outer paleæ of the neuter floret hispid, awned or mucronate. Found on pasture lands, middle-sized, delicate, and rare; will not make hay, but cattle eat it.

DARD (درد - dard, *Pers.*). Pain.——*Dard mondah* (درد مونڈھا - dardmondhá, Hind.). Means shoulder-pain. Bad shoulder in horses [ashwarogam, ghorah].

DAROGHAH (داروغہ - dárúghah, *Hind.*). A Mongol word. A superintendent of any department, as salt, stamps, &c.

DARSHAM (दर्श - darsha, *San.*). From (drish, san. to see). Sight. New moon [amavausyay].——*Darshanam* (दर्शन - darshana, San.). From (drish, san. to see). Demonstration. And so system of philosophy. The six recognised systems or Shad darshanam are:—Nyauyam of gowtaman, Veishaishicam of canaudan, Saunkhyam of capilan, Yogam of patanjaly, Poorva mimaumsam of jeiminy, Oottara mimaumsam or Vedauntam of veda vyausan. All these ascribed to celebrated rishies had once adherents; now only vedauntam remains in s. india, where considered the orthodox sheiva philosophy. In the hands of Shuncaracharry [shuncaran] vedauntam became Adweitam [q.v.] pursued by Sheiva smartas, in the hands of Madhwacharry [q.v.] it became Dweitam [q.v.] pursued by Veishnava madhwas, in the hands of Ramaunoojacharry [q.v.] it became Vishishtandweitam [q.v.] pursued by Veishnava shree veishnavas. A detailed account of the seven main propositions of early Braminical philosophy, of the six concrete philosophies which grew out of them, and of the three developments of Vedauntam, has already been given in the foot-note on the History of Hindoo religion at vol. I (74). Darshanam with lay Hindoos generally means simply performance of religious duties, visiting temples, seeing or reverencing idols, &c. Sarwa darshana sangraham [q.v.] is name of a treatise on the fifteen systems of philosophy, by Maudhayacharry [matam]. Darshanam is also a short term for Ardrah darshanam [q.v.].

DARSHY (దరిశి - darishi, *Tel.* darsi *). From (dari, tel. border) [darty].——**(1)** Zemindarry, Deputy tahsildar's division, Nellore. Pay Rs. 100. Area 616 square miles N.W. inland, part of district. Bounded:—north by Vinoocondah talook of Kistna district; east by Ongole talook; south by Podily division; west by Marcapore talook of Kurnool district. A flat tract of black cotton land [regar], diversified by abrupt steep bare rocky hills of gneiss. These hills spring from the dead level of the plain and rise steeply to a height of several hundred feet. They are few in number in the eastern part of the division but numerous in the west. There are patches of jungle in places but the general character of the country is bare. Soil is regar clay diversified in places by red loam and red sand. Coarse cloths and cumblies [q.v.] are to some extent manufactured. Lands are generally irrigated by tanks and wells. There are no river anicuts [q.v.] or other important irrigation works. Best camping grounds:—Indlacheroo and Potlapaud. Bellary-Kistna railway passes through north of division; there are stations at Coorchaid and Donacondah. Places of archæological interest:—Bheemavaram, Bodanampaud, Boddicoorapaud, Chendalore, Coorchaid, Cotapully, Cotcherlacote, Cullore, Darshy, Donacondah, Gungavaram, Maurella, Moollamore, Naidoopollem, Polavaram, Poleypully, Potacamore, Potlapaud, Rajampulley, Salivendra Sammantapoody, Shivarampooram, Somavarapaud, Taullore Toommidelapaud, Tummalore. Principal trig. stations are:—Chendalore, Pidacaltippa. The leading places, &c., in the division are the following.——*Chendalore* (చెందలూరు - chendalúru, Tel.). From (chandrappa, tel. proper name + úru, tel. village). Village; pop. 2,565; acres 8,227; lat. 15° 48′; long. 79° 38′; from Darshy W.N.W. 5¾ miles; from Nellore N.N.W. 96 miles; from Ongole N.W. 36 miles. A commercial place. Unboiled saltpetre [shorah] or sowdoo [q.v.] is made here; average 20 candies [q.v.] a year. This village with its tank was founded or restored by Bollapulley chundrappa naidoo during the reign of Chola kings. East are the two temples of Shiva as Chennamulleshwarasawmy and Vishnoo as Chennakeshwarasawmy. Yearly marriage [calyaunam] festival, and occasional processions of the idols on special days. Trig. station in lat. 15° 47′ 13·10″; long. 79° 40′ 00·63″; height 1,377 feet; from Basireddipollem E. 2½ miles; from Darshy W.N.W. 4 miles.——*Coorchaid* (కురుచేడు - kuruchédu, Tel.). See sep. title.——*Cotapully* (కోటపల్లి - kótapalli, Tel.). From (kóta, tel. fort + palli, tel. village). Village; lat. 15° 49′; long. 79° 32′; from Darshy W. 14 miles; from Nellore N.N.W. 160 miles; from Ongole W. 43 miles. Inscriptions near a ruined temple.——*Cotcherlacote* (కొచ్చెర్లకోట - koççarlakóta, Tel.). From (kotta, tel. new + cheruvu, tel. tank + kóta, tel. fort). Village; pop. 1,536; lat. 15° 50′; long. 79° 23′; from Darshy W. 23 miles; from Nellore N.N.W. 104 miles; from Ongole W.N.W. 51½ miles. Old fort founded by Gajapaty maharajah, son of Mullicarjoona ganapaty, who afterwards retired to Calingam [q.v.], from which place his son Mookkanty ruled. Captured by Prataupa roodran of Warangal and remained in the possession of these rulers for 24 years subsequently falling under the Vijianugger rulers. Three inscriptions dated A.D. 1310, 1533 and 1135. Sowdoo [q.v.] manufactured here, average 80 candies a year. East and west are the temples of Shiva as Ramalingasawmy and Vishnoo as Varadarajasawmy. Yearly festival performed for the latter nine days [navaunicam]. The Goondlacumma runs on the west of the village and turns towards the north.——*Darshy* (దరిశి - darishi, Tel.). See below.——*Goondlacumma* (గుండ్లకమ్మ - gundlakamma, Tel.). See sep. title.——*Mooshy* (ముశి - mushi, Tel.). See sep. title.——*Pidacaltippa* (పిడకలతిప్ప - pidakalatippa, Tel.). From (pidaka, tel. cowdung cake + tippa, tel. mound). Trig. station in lat. 15° 49′ 45·16″; long. 79° 45′ 51·50″; height 484 feet; from Darshy N.N.E. 5 miles; from Toommachintala E. 4 miles.——*Poleypully* (పోలేపల్లి - pólépalli, Tel.). From (póli, tel. proper name + palli, tel. village). Village; lat. 15° 53′; long. 79° 28′; from Darshy N.N.W. 18 miles; from Nellore N.N.W. 104¾ miles; from Ongole W.N.W. 48¼ miles. Copper-plate inscription of A.D. 1536.——*Potacamore* (పొతకమూరు - potakamúru, Tel.). From (potakamu, tel. necklace jewel + úru, tel. village); from its beautiful situation. Village; pop. 3,611; lat. 15° 44′; long. 79° 49′; from Darshy E.S.E. 6½ miles; from Nellore N. 89½ miles; from Ongole N.W. 24 miles. A commerical place. Fort and trench, now in ruins, on the west. A large tank on the north. The Dornaul vaug [q.v.] on the south. Vishnoo temple. Inside the fort is the Ameen's cutcherry [q.v.]. Marriage festival of Chennakeshwarasawmy and Mulleeshwarasawmy, celebrated in Jyeshtam [mausam] or june, lasts nine days.——*Taullore* (తాళ్లూరు - tállúru, Tel.). From (tádi, tel. palmyra tree, borassus flabelliformis, linn. + úru, tel. village). Village; lat. 15° 44′; long. 79° 56′; from Darshy E. 14 miles; from Nellore N. 88¾ miles; from Ongole N.W. 19 miles. Inscription of A.D. 1579.——**(2)** Town, Head-quarters of Deputy tahsildar and Ex-officio Sub-registrar, Hospital; Nellore dist., Darshy division; pop. 2,526; lat. 15° 46′; long. 79° 43′; from Madras N.N.W. 188 miles; from Naidoopett N. 126½ miles; from Nellore N.W. 93 miles; from Ongole N.W. 30 miles. Connected by roads with Podily and Addanky. The water supply is very bad and gives guinea worm [naudy vranam].

DARTY (దర్తి - darti, *Tel.*). Corruption of (dari, tel.). Border, or nearness. Cf. Darshy. Suffix in place names; as Paudarty, meaning confines of the jungle.

DARYAH (دریا - daryá, *Hind.*). Sea [samoodram]. Plant first term. Ex.:—Gracilaria lichenoides (daryákákañjál), sea weed; Lodoicea seychellarum (daryákánárel), sea cocoanut. See gloss. paragraphs.——*Dargah bahaudurghur* (دریا بہادر گڑھ - daryábahádurgarh, Hind.). From (above + bahádur, pers. haidar so called + garh, hind. fort). Island; South canara dist., Oodipy tal.; pop. nil; lat. 13° 20′; long. 74° 43′; from Mangalore N.N.W. 34 miles; from Oodipy W. 4 miles. About half a mile from the mainland. Small coasters find shelter under its lee from north-westerly gales. Ruins of fortifications by Hyder ally and Tippoo.

DAS (दश - dasha, *San.*; دس - das, *Hind.*). Latin decem. Ten.——*Dasbandam* (దశబంధము - dashabandhamu, Tel.). From (above + bundh, san. to bind). Abatement of one-tenth of the revenue on account of compensation for some public work, as the construction of a tank, &c. [inam]. See vol. I, 112.—

Dasha daunam (दशदान - dashadána, San.). From (above + dána, san. gift). Ten gifts to Bramins made in the last extremity as a pass-port to the other world. Or occasionally when a daughter is given in marriage [maryauday].——*Dashagreevan* (दशग्रीव - dashagríva, San.). From (above + gríva, san. neck). The ten-necked Ravanan [q.v.]; his ten necks were probably provinces.——*Dasham* (दश - dasha, San.). Ten.——*Dasha moolam* (दशमूल - dashamúla, San.). From (above + múla, san. root). Medicine. Compound decoction [kwautam] prepared from the roots of ten plants:—Ægle marmelos, corr. [bael]; Desmodium gangeticum, dec. [shaulicay]; Gmelina arborea, linn. [cashmere tree]; Oroxylum indicum, vent. [pajanely]; Premna integrifolia, linn. [moonnay]; Solanum indicum, linn. [indian nightshade]; Solanum xanthocarpum, sch. and wendl. [prickly brinjaul]; Stereospermum suaveolens, dec. [pauthiry]; Tribulus terrestris, linn. [nerinjy]; Uraria lagopoides, dec. [orila].——*Dashamy* (दशमी - dashamí, San.). Tenth day of a lunar fortnight [pacsham]. Lunar festival [pundigay, 3e] occurring twice in every lunar month [vijaya dashamy].——*Dashnamy* (दशनामी - dashanámí, San.). Ten-named; from the ten chief branches into which the sect is divided. See Gosain, Dandy.

DAS (दस् - das, *San.*). To destroy.——*Dasyoo* (दस्यु - dasyu, San.). In the vedas, evil beings, enemies of the gods and men [dausan]. Used for men and not for demons in the Eitareya bramhanam, in Menoo, and in the Mahabhaurat. Applied later to the dark Dravidians, &c., met by the Aryans. More general terms are the very ancient Deityan [q.v.], the less ancient Asooran [q.v.], and the comparatively recent Raucshasan [q.v.].——*Dausan* (दास - dása, San.). From (dás, san. to hurt) [dasyoo]. Demon, barbarian, slave. In Anglo-indian, Doss. A servant. Often used in composition to form a name; as Bhagwan dausan, the slave of God; compare the use of the Mussalman Ghoolaum. Common name among lower orders; familiarly Dausoo. Dausappan is another form [peyar]. Also a general name applied in the vedas to evil beings or demons [deityan], hostile to the human race and to indran; it is opposed there to aryan [q.v.].——*Dausarapada* (ದಾಸರಪದ - dásarapada, Can.). From (above + pada, san. verse). Sacred moral songs generally in Canarese by Poorandara dausan, Canacadausan and others, and recited by devotees of Vishnoo. The following is specimen of the Canacadausan:—ಅಡವಿಯೊಳಗಾಡುವ ಮೃಗಜಾತಿ ಪಕ್ಷಿಗೆ ಯಾರಿಗೆ ಯಾರಾ ರವನು ಯಿತ್ತವರು ಪಾರೋ—ಪಡದ ಜನನಿಯು ದೆರಡಿ ಸ್ವಾಮಿ ಹೊಣೆಗಾರಾಗಿ ಬಿಡದೆ ರಕ್ಷಿಸಿದಳೆ ಸಂದೇಹ ಬೇಡಾ—"Who daily feeds the beasts of "forests? Doubt not therefore that God will protect and bring "us up, just as the mother who begot us would."——*Dausary* (ದಾಸರಿ - dásari, Tel.). Dravidian form of Dausan. Vishnoo mendicant. Wear an upright white line on the forehead, and sound a conch [chunk] shell and a small gong [q.v.] or bell. The caste, like Sautaunies, is reinforced by idle members of lower Shoodra classes, who, being branded by the gooroos of Tripatty and other shrines, become thereby Dausaries. They wander about singing hymns to an accompaniment upon a stringed instrument or upon a drum called tappoo. Some Shoodra castes engage them to chant in front of the corpse at funerals, and many, accompanying bands of pilgrims travelling to Tripatty, stimulate religious excitement by singing sacred songs. A few called Yeroodandy take young bulls that have been devoted to a sawmy [q.v.] and teach them to perform tricks. Some Dausaries exhibit the Panda sairvay [q.v.] performance, which consists in being possessed by the spirit of a deity and beating themselves on the body with a flaming torch [pandam]. They wear as a distinction a garland of toolsy [q.v.] seeds. Every Dausary is a Tengalay [q.v.]. They have six divisions, called Balije, Janapa, Pully, Vulloova, Gungeddoola, and Golla dausaries, which neither eat together nor intermarry. Beyond prohibiting widow remarriage they have no social restrictions. Numbers about 35,000 [jauty].——*Dausary pitta* (ದಾಸರಿಪಿಟ್ಟ - dásaripitta, Tel.). Means mendicant + bird; striped bird. Bird name common to:—Leucocerca albofrontata; Pomatorhinus horsfieldii. See gloss. paragraphs.——*Dausy* (தாசி - tási, Tam.). The feminine of dausan. A woman dedicated to a temple. Properly Dévadausy; which see. Numbers about 50,000.

DASHT (دشت - dasht, *Pers.*). Forest. Plant second term. Ex.:—Andropogon martini (gaznahidashtí), forest nettle; Sida rhombifolia, var. retusa (shambalídidashtí), forest fenugreek. See gloss. paragraphs.

DAST (دست - dast, *Hind.*). Hand.——*Daskat* (دستخط - dastkhat, Hind.). From (above + khat, pers. writing). Handwriting, signature [keiyoppam].——*Dastah* (دستہ - dastah, Hind.). A quire of paper.——*Dastak* (دستک - dastak, Hind.). Noise produced by the clapping of hands. A summons, passport.——*Dastauna* (دستانہ - dastánah, Hind.). From (ánah, pers. suffix of resemblance). Gloves of leather [chamrah], cloth, &c. [sheelay].——*Dastaur* (دستار - dastár, Hind.). Turban [puggry].——*Dastavaiz* (دستاویز - dastáviz, Hind.). From (above + áviz, pers. hanging). Document.——*Dastgheer* (دستگیر - dastgír, Hind.). From (above + gír, pers. holder). Protector. Title of the highest of Mahomedan saints [abdool cawder]. His other titles are Azam, Cawder, Ghouse, Jeelauny, Mahboob. Mohee ood deen; see each of those heads. Common alam; as Dastgheer beg, alam + alaumat [ism].

DATURA (धत्तूर - dhattúra, *San.*; تاتوره - tátúrah, *Pers.*; دھتورہ - dhatúrah, *Hind.*; دھتورا - dhatúrá, *Dec.*; ಉಮ್ಮತ್ತ - ummatta, *Can.*; ఉమ్మెత్త - ummetta, *Tel.*; ഉമ്മത്ത - ummatta, *Mal.*; අත්තන - attana, *Singh.*; ஊமத்தை - úmattai, *Tam.*). Title from sanscrit through hindostany. San. from (dhús, san. to embellish + túri, san. thorn-apple). Hind. and dec. from sanscrit. Tel. from (unmattá, san. the insane plant). Tam. from (unmad, san. to madden); from virtue of plant. Tam. also (ilagam) from shining flowers. Title otherwise Thorn-apple. Botanically the Datura genus, solanaceæ [vricsham, 94]. Annual, soft-wooded, single-stemmed shrubs; natives of india; narcotic and poisonous; flowers large and white; fruit, a capsule of numerous seeds, about size of a walnut [acroot]. The species best known are shown below. The term also includes an Argemone and a Xanthium.——*Burdock datura* (अरिष्ट - arishta, San.; शंकेश्वर - shankéshvara, Mahr.; حسك صغير - hasaksaghír, Ar.; خسک خرد - khasakikhurd, Pers.; چھوٹا گوکھرو - chhotágokhrú, Hind. and Dec.; తలనొప్పిచెట్టు - talanoppichettu, Tel.; மருளூமத்தை - marulúmattai, Tam.). Title from resemblance. San. means perfect [neem, soap-nut tree]. Ar. from (hasak, ar. caltrops, tribulus terrestris, linn. + saghír, ar. small), from small bristly germs. Pers. from (khasak, pers. caltrops, tribulus terrestris, linn. + khurd, pers. small). Hind. from (chhotá, hind. small + gokhrú, hind. tribulus terrestris, linn.). Tel. from (tala, tel. head + noppi, tel. ache + chettu, tel. plant). Tam. from (marul, tam. bewilderment + úmattai, tam. datura). Tel. also (verritalanoppichettu), meaning mad + headache + plant; (párshvapuchettu), meaning side + plant, as being cure for headache on one side; (marulamátangi), meaning intoxication + she-devil; (marulatíga), meaning intoxication + creeper, from the idea that the traveller treading upon the plant becomes intoxicated and loses his way. Greek ξάνθιον. Title otherwise Burdock, Burrweed, Confusion creeper, Ditchbur, Headache plant, Indian xanthium, Lesser burdock, Louse-burr, Small burdock. Botanically Xanthium strumarium, linn., compositæ [vricsham, 74]. Alias Xanthium indicum, orientale. Involucre fruit-bearing; oval, pubescent between the prickles and at the base of the beaks; beaks hooked at the apex; flowers small, white; common on the road-sides in most parts of the country, flowering in february and march; rank weed-like plant. Whole plant diaphoretic and sedative in decoction [kwautam]; oil used in medicine and burned. No other species here.——*Downy datura* (धुस्तूर - dhustúra, San.; ماثل - másil, Ar.; سادہ دھتورا - sádahdhatúrá, Hind.; తెల్లఉమ్మెత్త - tellaummetta, Tel.; ഉമ്മത്ത - ummatta, Mal.; வெள்ளையூமத்தை - vellaiyúmattai, Tam.). Title from appearance. San. from (dhús, san. to embellish + túri, san. thorn-apple). Hind. from (sádah, hind. white + dhattúra, san. thorn-apple). Tel. from (tella, tel. white + ummetta, tel. thorn-apple, datura). Mal. from (unmad, san. to be mad). Tam. from (vellai, tam. white + úmattai, tam. thorn-apple plant); from flowers. Botanically Datura metel, linn., solanaceæ [vricsham, 94]. Specific name from arabic. Grows wild everywhere; properties similar to other species.——*Europe datura* (சீமையூமத்தை - shimaiyúmattai, Tam.). Title otherwise Apple of Peru, Common thorn-apple, Devil's-trumpet, Dewtry, Jamestown weed, Stink-weed, Stramonium. Botanically Datura stramonium, linn., solanaceæ [vricsham, 94]. Not found here. There is however a variety Tatula, so called from the Persian, with purple flowers.——*Foreign datura* (فرنگی دھتورا - farangídhatúrá, Hind.). From being introduced from america, and from having bristly fruits like datura. Same as Bramhadand.——*Purple datura* (कृष्णधत्तूर - krishnadhattúra, San.; कालोदुतुरो - kálóduturó, Conc.; ماثل اسود - másiliaswad, Ar.; ماثل سیاہ - másilisiyáh, Pers.; اودہ دھتورا - údahdhatúrá, Hind.; کالا دھتورا - káládhatúrá, Dec.; کاچو بنگ - káchubung, Malay; ಕರಿಉಮ್ಮತ್ತೆ - kariummatte, Can.; கருப்பெ - kariumbe, Too.; నల్లఉమ్మెత్త - nallaummetta, Tel.; കരിയുമ്മത്ത - kariyummatta, Mal.; කළුඅත්තන - kaluattana, Singh.; கருவூமத்தை - karuvúmattai, Tam.). Title from color of flowers. San. from (krishna, san. black + dhattúra, san. thorn-apple). Conc. from (kála, san. black). Ar. from (másil, ar. datura plant + aswad, ar. black). Pers. from (siyáh, pers. black). Hind. from (údah, hind. purple). Dec. from (kálá, hind. black). Can. from (kari, can. black + ummatte, can. datura). Too. from (kari, can. black + umbe, too. datura). Tel. from (nalla, tel. black + ummetta, tel. thorn-apple). Mal. from (kari, mal. black + ummatta, mal. thorn-apple). Singh. from (kalu, singh. black + attana, singh. thorn-apple). Tam. from (karumai, tam. blackness + úmattai, tam. thorn-apple). San. also (kálahémika), meaning black thorn-apple; (mahâshat'ha), meaning great + wicked; (krishnónmattá), meaning black thorn-apple; (rájadhúrta), meaning king + cheat; (kanaka), meaning gold; (rájadhattúra), meaning king thorn-apple; (bhrántá), meaning maddening; (krishnapushpá), meaning black blossomed; (shiva), meaning auspicious [chebulic myrobalan]; (krúradhúrta), meaning cruel cheat; (sachiva), meaning companion, from usefulness; (krúradhattúra), meaning cruel thorn-apple; (snigdhá), meaning

cooling; (vishárati), meaning poison + enemy. Ar. also (másimiaswad), meaning black datura. Pers. also (tátúrahisiyáh), meaning black datura. Hind. also (láldhatúrá), meaning red datura; (gharbhúlí), meaning house-forgetting. Malay also (rotikubung). Mal. also (nílaummatta), meaning black thorn-apple. Tam. also (úthávúmattai), meaning violet + thorn-apple plant; (ponnúmattai), meaning gold + thorn-apple plant. Greek στρύχνος μανικός. Title otherwise Asiatic datura, Foolish plant, Indian datura, Indian hose in hose, Indian thorn-apple, Insane plant, King rogue, Mad plant, Oblivion plant, Purple thorn-apple. Botanically Datura fastuosa, linn., solanaceæ [vricsham, 94]. Alias Datura hummata; Stramonium fastuosum. Hummata, from (ummatta, mal. datura genus). Annual, 2–3 feet; leaves ovate, acuminated, repandly toothed, unequal at the base, and as well as the stem smooth; stamens enclosed; fruit prickly; calyx five-lobed. Leaves are of a heavy odour, and mawkish, faintly bitter, nauseous taste; fruit, a capsule, size of a walnut [acroot], containing seeds; seeds are brownish or black, flattened, kidney-shaped, without odour except when bruised, and have a bitter weakish taste, poisonous; large blossoms, white tinged with purple, resemble in form three or four large extinguishers projecting one slightly out of the other; sweet-scented at night; flowers all year; grows wild on waste lands; very common; the best known thorn-apple. Seeds were used by priests of delphi and other ancient oracles to produce prophecies; flower is here sacred to mahadevan [q.v.], and whole plant regarded with awe. All parts medicinal; fresh leaves bruised used in poultices for sedative action; leaves in oil rubbed on body in itch or rheumatism; in asthma dried leaves may be smoked like tobacco [pogauk]; seeds used in tincture as anodyne and antispasmodic, very dangerous if incautiously used; powdered root used by hakeems [q.v.] in epilepsy; in very small doses a few seeds with root of anacylus pyrethrum [akalkarah] and cloves [lavangam] are chewed as an aphrodisiac; an alkaloid, daturina, from the seeds, is now substituted for belladonna, in ophthalmic practice; leaves and seeds quoted in pharm. but not officinal. Seeds used to render liquor more intoxicating, being burned upon charcoal [adoopp kary] with vessels inverted to catch the smoke; seeds also used in powder for same purpose, being more powerful thus; put into food to intoxicate persons it is designed to rob, frequently with sweetmeats [halwah], curries [q.v.], &c.; also sometimes used by ganjah-smokers mixed with ganjah [q.v.].——*White datura* (उन्मत्ता - unmattá, San.; धोतरा - dhótará, Mahr.; दुतुरो - duturó, Conc.; مائل ابیض - másiliabyaz, Ar.; مائل سپید - másilisupíd, Pers.; سادہ دھتورا - sádahdhatúrá, Hind.; اجلا دھتورا - ujládhatúrá, Dec.; ಬಿಳಿಉಮ್ಮತ್ತೆ - biliummatte, Can.; ಉಂಬೆ - umbe, Too.; తెల్లఉమ్మెత్త - tellaummetta, Tel.; ഉമ്മത്ത - ummatta, Mal.; සුදුඅත්තන - suduattana, Singh.; வெள்ளையூமத்தை - vellaiyúmattai, Tam.). Title from color of flowers. San. from (unmad, san. to be mad). Mahr. and conc. from (dhattúra, san. the white thorn-apple). Ar. from (másil, ar. datura plant + abyaz, ar. white). Pers. from (másil, ar. datura plant + supíd, pers. white). Hind. from (sádah, hind. white + dhattúra, san. thorn-apple). Dec. from (ujlá, hind. white + dhattúra, san. thorn-apple). Can. from (bili, can. white + ummatte, the plant). Tel. from (tella, tel. white + ummetta, tel. datura). Singh. means white datura. Mal. from (unmatta, san. insane). Tam. from (vellai, tam. white + úmattai, tam. thorn-apple) [downy datura]. San. also (mátula), meaning unequalled, from being the most powerful narcotic; (kanaka), meaning gold; (dhúrta), meaning wicked; (kanakapushpá), meaning golden blossomed; (kanakakantakap'hala), meaning golden thorn-apple; (shivapriyá), meaning dear to shiva; (shyámá), meaning dark-colored [tinay]; (kanakónmattá), meaning golden thorn-apple; (kitava), meaning cheat; (madana), meaning maddening [common emetic nut]; (móhana), meaning depriving of consciousness; (unmóhin), meaning confounding; (shaivashékhara), meaning shiva's crest jewel; (shat'ha), meaning a rogue. Ar. also (másimiabyaz), meaning white datura. Pers. also (tátúrahisupíd), meaning white datura. Hind. also (sufeddhatúrá), meaning white datura. Botanically Datura fastuosa, linn., var. alba, solanaceæ [vricsham, 94]. Alias Datura alba, metel, stramonium. Shrub; leaves ovate-acuminate, repand-dentate, unequal at the base, smooth; stem herbaceous; capsules nodding, covered with prickles; flowers very large, white; flowering all year. A strong narcotic though not so virulently poisonous as the simple fastuosa. ——*Yellow datura* (پیلا دھتورا - píládhatúrá, Hind.). From yellow flowers and fruits similar to datura. Same as Bramhadand.

DAU (दा - dá, *San.*). To give.——*Dadny* (دادنی - dádní, Hind.). From (dádan, pers. to give). Money advanced to contractors, &c.——*Daunam* (दान - dána, San.). Gift. Suffix in place names; as Devadaunam, meaning god's gift.——*Dauyam* (दाय - dáya, San.). Gift, inheritance. Native writers treat inheritance as an aspect of partition [bhaugam]; the reason being that the normal state of property is that of being joint property, and the amount of interest which each member has in the property is only the share which he would be entitled to in the event of a partition. Remembering this limitation the following description of Hindoo inheritance is applicable. All legitimate sons, living in a state of union with their father at the time of his death, succeed equally to his property, real and personal, ancestral and acquired. In former times, the right of primogeniture prevailed to a certain extent. The right of representation is also admitted as far as the great grandson; and the grandson and great-grandson, the father of the one and the father and grandfather of the other being dead, will take equal shares with their uncle and grand-uncle respectively. Indeed the term pootran or son has been held to signify, in its strict acceptation, a grandson and great-grandson. An adopted son is a substitute for a son of the body, where none such exists, and is entitled to the same rights and privileges. In default of sons, the grandsons inherit, in which case they take per stirpes, the sons however numerous of one son, taking no more than the sons however few of another son. In default of sons and grand-sons, the great-grandsons inherit; in which case they also take per stirpes, the sons, however numerous, of one grandson taking no more than the sons, however few, of another grandson. They will take the shares to which their respective fathers would have been entitled had they survived. In default of sons, grandsons, and great-grandsons in the male line, the inheritance descends lineally no farther, and the widow inherits according to the law as current in Bengal, whether her late husband was separated, or was living as a member of an undivided family [avibhacta cootoombam]; but, according to other schools, the widow succeeds to the inheritance in the former case only, an undivided brother being held to be the next heir. If there be more than one widow, their rights are equal. Inheritance taken as an actual process can only apply to property which was held in absolute severalty by its last male owner. Further, a person so inheriting becomes the point of departure for a new coparcenary, so that the property soon falls again under the laws of partition. Inheritance under a will [wasyat] is a novelty among the Tamulians. However wills are recognized by the courts with the restriction that the testators cannot bequeath property which they were incompetent to alienate during their lifetime. The principle of property devolving to a man's male child or children is on the West coast called Makkatoyem, as opposed to Maroomakkatoyem in Malabar and Aliya santauna in Canara, or the principle of property passing to the children, male or female, of the sister; see those headings. For Mahomedan inheritance see Vaurs [maryauday].——*Dutt* (दत्त - datta, San.). See sep. title.

DAUB (ڈاب - dáb, *Hind.*). A list [dufter, zaubitah]. Physician's recipe. A sword belt.

DAUB (داب - dáb, *Hind.*). From (darbha, san. the grass). Same as darbhay. Distinguish from Doob.

DAUBY DOOBY (दद्रुमारी - dadrumárí, *San.*). Title from bengalee. San. means ringworm killer; from virtue. Same as Cotchilitty.

DAUCHEPULLY (దాచేపల్లె - dáchépalle, Tel. dáchépalle). From (tátsu, tel. snake + palle, tel. village). Village, Tahsildar's station; Kistna dist., Pulnaud tal.; pop. 2,823; acres 8,299; lat. 16° 36′; long. 79° 47′; from Bezwada W. 58 miles; from Guntoor W.N.W. 52 miles; from Madras N. 242 miles; from Masulipatam W.N.W. 96 miles; from Vinoocondah N. 37 miles. Old fort built by Condaveed reddies. The Naugilair flows past town, and is unfordable for some hours after rain. Temple called Naickraul's goody. Oldest inscription is in the Naugeshwarasawmy temple, A.D. 1213. There are remains of old forts in the neighbourhood, chiefly at Oblapully near Gaumalpaud, where are also some small temples with carved stones and inscriptions dated A.D. 1222, 1290 and 1459.

DAUD (داد - dád, *Hind.*). From (dadru, san. herpes); as curing herpes. Plant first term. Ex.:—Ammannia baccifera (dádmárí), itch killer.

DAUDAH (دادا - dádá, *Hind.*). Grandfather. Lacab. Sometimes taken by fakeers, as Daudah shah, alam + alaumat [ism].

DAUKKAL (داخل - dákhal, *Hind.*). From (dakhl, ar. entrance). Registration, entry.——*Dauklah* (داخلہ - dákhilah, Hind.). A receipt for payment.

DAUM (دام - dám, *Hind.*). From (dramma, san. drachma). 1/30 seer [q.v.]. A Mahomedan copper coin equivalent to about ½ penny; now obsolete. In the reign of Acbar, 40 daums were reckoned to a rupee; in that of Alumgheer, 46⅓; at later periods, 80 and 90. Much the same as peisa. To "care a dam" meant originally nothing but this and was not slang language [damree, dirhem].——*Damree* (دمڑی - damrí, Hind.; దమ్మిడి - dammidi, Tel.). From (dramma, san.). Greek δράχμη. Copper coin. 12 damrees = 1 anna [naunyam, 2 e]. Approximate actual value, 1 damree = 1 pie. Same as Hind. pie, Tel. roowa, Tam. cash. Used for any very small copper coin [daum, dirhem]. See vol. I, 609.

DAUMALCHEROO (దామల్ చెరువు - dámalcheruvu, *Tel.*). From (támara, tel. lotus, nelumbium speciosum, willd. + cheruvu, tel. tank).—"*a*" Village; North arcot dist., Chundragherry tal.; lat. 13° 28′ N.; long. 79° 5′ E.; from Chittore N. 19 miles; from Chundragherry W.S.W. 20 miles. In S.E. of talook and at entrance of valley leading to Cullore ghaut. Large tank. Considerable trade.—"*b*" Pass. By this Shivajee made his first descent upon the Carnatic [q.v.] in 1676. Here in 1740, Dost ally, the Nawaub [q.v.], was killed in battle with the

Mahrattas. During Hyder's invasion of Carnatic in 1780-81, it formed the main route for supplies of his troops. An earthen embankment crosses the road and continues over the hills on either side. It extends to Tripatty on one side and to Yelagherry in Salem on the other, and was built by Chola kings to mark their boundary.—"c" River; North arcot dist., Chundragherry tal. Rises in Cullore polliem, flows down ghaut [q.v.], and passes for a short distance along the west of Chundragherry talook into Chittore talook, where it is known as the Poyney.

DAUN (دان - dán, *Pers.*). From (dánistan, pers. to know). Suffix denoting knowledge; as Kadr daun, merit + knower.——*Daunish* (دانش - dánish, Hind.). Wisdom.——*Daunishmund* (دانشمند - dánishmand, Hind.). From (above + mand, pers. possessive particle). The wise. Mahomedan servant's name [ism].

DAUR (दारु - dáru, *San.*; دار - dár, *Hind.*). From (dri, san. to split). Tree [droomam].—"*a*" Plant first term, often joining two genera. Ex., where transl. is of second term:—Berberis aristata (dáruharidrá), curcuma longa; Rubia cordifolia (dárhald), curcuma longa.—"*b*" Compare also where transl. is of first term:—Cedrus deodara (dévadáru), divine [deodar]; Cordia myxa (bhúkampadáruka), earthquake; Morinda umbellata (pítadáru), yellow. See gloss. paragraphs.——*Darhald* (دارهلد - dárhald, Hind.). Means wood turmeric, from yellow root and wood. Berberry wood, whether from stem or root.

DAUR (دار - dár, *Hind.*). House.——*Daur ool caraur* (دارالقرار - dárulkarár, Hind.). From (above + karár, ar. everlasting). Third Mahomedan heaven of pure musk [custoory].——*Daur ool jalaul* (دارالجلال - dáruljalál, Hind.). From (above + jalál, ar. majesty). First Mahomedan heaven of pearls [moty].——*Daur oos salaam* (دارالسلام - dárussalám, Hind.). From (above + salám, ar. peace). Second Mahomedan heaven of ruby [laul] and garnet [tamrah].

DAUVAH (دعوى - daví, *Hind.*). From (daú, ar. to claim). A claim, law-suit [firyaud].

DAVOOD (داؤد - dáúd, *Hind.*). From hebrew, beloved. David. Common alam; as Davood ally, double alam; Davood bee, alam + alaumat [ism]. Compare:—Chrysanthemum coronarium (gulidáúdí), david's flower.——*Davood khan* (داؤد خان - dáúdkhán, Hind.). Alam + pataun suffix. General of Zoolfacar khan and Nawaub [q.v.] of Carnatic [q.v.] in 1701. See vol. I (170).

DAWAULY (دوالی - duálí, *Hind.*). From (duál, pers. a leather strap). String round loins, to which lungooty [q.v.] is attached [tusma]. Cf. Cummerbund.

DAWK (ڈاک - dák, *Hind.*). Relays of men or cattle for the conveyance of letters, post, palankeens, &c., along a road [anchey meeda]. Thence the mail or letter-post [anchey]. To travel dawk is to travel with relays of bearers. A dawk bungalow [q.v.] is a travellers' rest-house [moosaufer khana] at the end of a stage [majil]. Dawk gharry is a stage carriage [tappaul].

DAYEE (धात्री - dhátrí, *San.*; دائی - dáí, *Hind.*; దాది - dádi, *Tel.*; தாதி - táthi, *Tam.*). San. from (dhé, san. to suck). Midwife. Wet nurse [amah, ayah].

DECAMALLEE (डिकामाली - dikámálí, *Mahr.*; خون خام - khúnikhám, *Pers.*; ڈکامالی - dikámalí, *Hind.*; ಡಿಕ್ಕಾಮಲ್ಲಿಮರ - dikkámallimara, *Can.*; ಡಿಕ್ಕಾಮಲ್ಲಿ - dikkámalli, *Too.*; చిన్నకారింగువ - chinnakáringuva, *Tel.*; കൊലലാകട - kolalákada, *Singh.*; கும்பைமரம் - kumbaimaram, *Tam.*). Title from hindostany. Pers. from (khún, pers. blood + khám, pers. raw). Hind. from mahratta, meaning juicy. Tel. from (chinna, tel. small + káru, tel. wild + inguva, tel. asafœtida, ferula narthex, boiss.). Can. also (bikkegida), meaning flesh + plant. Tel. also (tellamanga), meaning white + randia dumetorum, lamk.; (káringuva), meaning wild + asafœtida, from similar gum-resin [hill emetic nut]; (chiribikki), meaning small + gardenia latifolia, ait.; (chittamatta), meaning small stem; (garaga) [bair]; (tellakáringuva), meaning white + wild + asafœtida, ferula narthex, boiss. Tam. also (kambippisin), meaning wiry gum, being always mixed with twigs, applies to product; (kambalippisinmaram), meaning woollen cloth + gum + tree. Title otherwise Cumby resin tree, Gum yielding gardenia, White emetic nut. Botanically Gardenia [gandharajah] lucida, roxb., rubiaceæ [vricsham, 71]. Alias Gardenia resinifera. Small tree, unarmed, with resinous buds; leaves short-petioled, oblong or oval or obovate, obtuse or bluntly pointed, glabrous, bright shining olive-green, with simple parallel nerves and prominent veins; limb of calyx with five divisions, sprinkled on the inside with stoutish bristles; corolla hypocrateriform; tube long, striated; limb five-partite, divisions as long as, or a little shorter than, the tube; berry drupaceous, even, oblong, crowned with the calyx; nut very hard, thick, and long, with two parietal receptacles; flowers somewhat terminal, solitary shortly pedicelled, large, three or more inches across, pure white, fragrant; flowering in march and april; found throughout presidency, particularly in dry jungles in elevated parts of the country. A yellow gum-resin [googal] from buds and wounds in bark occurs in the form of very hard earthy-looking masses of a dull olive-green color; the odour is peculiar and offensive; though something like myrrh [q.v.]; it is never found pure, being always mixed with twigs and other impurities; like gum elemi [q.v.]. Gum-resin is antispasmodic and insecticide; possesses nearly similar virtues to myrrh; more active as external application; employed, dissolved in spirits, for cleaning ulcers. Gardenia gummifera, linn. f., alias gardenia arborea is a small tree or large shrub, found in similar localities to gardenia lucida, roxb.; flowers somewhat terminal, solitary, shortly pedicelled, large, pure white, fragrant; flowering in march and april; wood yellowish-white, hard, close-grained; might serve as a substitute for boxwood; the total want of pubescence, structure of the stipules, length of the calyx, and sharpness of its divisions, distinguish lucida from gummifera.

DECCAN (दक्षिण - dakshina, *San.*; دکهن - dakhan, *Hind.*; దక్కనము - dakkanamu, *Tel.*; தக்கணம் - takkanam, *Tam.*). Means south [dacshinam]. Properly India south of the Vindhya range, the Peninsula of the British. Taken in this sense, it comprehends the valley of the Nerbudda, the narrow tract of lowland forming a belt round the coast of the peninsula, and the vast expanse of triangular tableland, which, resting on each side upon the Eastern and Western ghauts [q.v.], is supported at its base by the Sub-Vindhyan range, termed the Sautpoora mountains. The Deccan was formerly an island, the Vindhya range being its northern shore, and the sea flowing over Hindostan to the foot of the Himalayas. The Deccan in the terminology of the English signifies only the elevated tract situated between the Nerbudda and Kistna rivers. Deccan has been often applied also politically to specific states, e.g., by the Portuguese in sixteenth century to Mahomedan kingdom of Beejapore, and in more recent times by English to state of Hyderabad.——*Deccany* (دکهنی - dakhaní, Hind.). Literally, southern. Hindostany as spoken in S. india. Though also written in the Persian character, this variety of Oordoo [q.v.] retains a much larger proportion of Indian, as opposed to Persian words, and is altogether more archaic in its grammatical forms than the language of the north. A certain proportion of its peculiarities must be ascribed to its separate development, as the tongue of Mahomedan colonies severed for some centuries from their original country. See vol. I (60) [bhaushay].——*Deccany grass* (ساوان - sáván, Hind.). Title from place of growth. Same as Shaumay.——*Deccany hemp* (انباڑا - ambárá, Hind). Title as distinguished from bengal hemp [sunn]. Same as Hemp bendy.

DEECSH (दीक्ष - díksh, *San.*). To prepare for sacrifice [yanyam].——*Deecshitan* (ದೀಕ್ಷಿತ - díkshita, Can.). One who is initiated for making sacrifice. Title of Bramin priests, especially temple priests, at Chidambaram. Hindoo third name [peyar].

DEEN (دين - dín, *Hind.*). From (dána, ar. to submit) [dyaunat]. The faith. The practical part of Islam, consisting of recital of the kalima [q.v.], prayer [namauz] and ablution, and fasting [roza], which are incumbent upon all Mussalmans; and alms [zakaut] and haj [q.v.], which are enjoined upon those who can afford them [islam]. The cry of excited Mahomedans, is Deen, Deen! Part of lacab; as Faseeh ood deen, polished in religion [ism].——*Deenah* (دينا - díná, Hind.). Faithful. Mahomedan servant's name [ism].

DEENAM (दीन - dína, *San.*). Poor.——*Deenadayaul* (தீனதயாளு - tínathayálu, Tam.). From (above + dayálu, san. merciful). One who is compassionate towards the poor. Epithet of any deity. Hindoo 2nd or pers. name [peyar].

DEENAUR (دينار - dínár, *Hind.*). From latin denarius through arabic. An old gold coin equivalent to modern 2½ rupees, formerly used by Mahomedans. The term is now used for any gold coin [dirhem, naunyam].

DEEP (दीप् - díp, *San.*). To shine.——*Deepam* (दीप - dípa, San.). Lamp. So a festival [pundigay, 6d] with illuminations [bhadra deepam, caurtigay deepam, lakshu deepam, vishnoo deepam].——*Deepauvaly* (దీపావళి - dípávali, Tel.; தீபாவளி - tíbávali, Tam.). From (dípa, san. lamp + ávalí, san. row). Lunar festival [pundigay, 6d], subject to intercalation. Kept on the fourteenth lunar day [tity] of the waning moon in seventh lunar month Aushweejam [mausam] between 15th October and 14th November. In Bengal it is Cauly poojah. Compare Holy or Cauman pundigay in early spring. The following is a Hindostany proverb:—آدهے گاؤں دوالی آدهے گاؤں پهاگ—"One half the "village plays Deepauvaly, and the other half Holy;" half the village is at feud with the other half. In Malabar Deepauvaly is regarded as the new moon [amavausyay] in Toolaum [mausam] or October. The chief observance is an oil-bath early in the morning, which is considered equivalent to bathing in the Ganges. Fireworks [baunam] and crackers are also used in large quantities and guns are fired. New clothes are put on. This feast is a relic of fire-worship [bhoota chatoordashy, maryauday, naraca chatoordashy, yama tarpanam].——*Deepdandam* (दीपदण्ड - dípadanda, San.). From (dípa, san. lamp + danda, san. stick). Lamp-bearing pillar.——*Deepdaun* (ديپدان - dípdán, Hind.). From (dípa, san. lamp + dána, san. giving). Offering of a lamp to an idol.——*Deeptaucsham* (दीपाक्ष - díptáksha, San.).

From (above + aksha, san. eye); from glittering eyes. Cat family. Felidæ, digitigrada, carnivora, mammalia [sastanam, 9], of naturalists [jantoo]. The animals of the cat family have the smallest number of molars, and hence their jaws are short and strong; the head is rounded, and the limbs powerful. Their teeth are particularly cutting. All are essentially carnivorous, and they are the type of the tribe and order. Their footfall is noiseless, from the thick pads with which the under surface of their feet is furnished. To preserve their claws sharp, they are habitually kept withdrawn between the tôes, by the action of an elastic ligament which acts on the last joint of each toe, bending it upwards. When the animal is about to strike, the flex or tendons pull down this last phalanx and the claw is thus exerted. Their fur is usually dense and short. Their limbs are of moderate length and very powerful, and they can take astonishing bounds. Their vision is adapted for night as well as for day, and all are nocturnal in habits, or nearly so. Their sense of hearing is very acute, and their long whiskers are delicate organs of touch. The tongue is furnished with rough papillæ, directed backwards and somewhat recurved. The clavicle is rudimentary, and imbedded among the muscles. They usually take their prey by suddenly springing on it from a concealed spot, and if they fail in seizing it rarely pursue. They are generally solitary, but occasionally hunt in families. The cat tribe comprises the following animals:—Cheetah [q.v.], Domestic cat [poonay], Fishing tiger cat [meencolly poonay], Jungle cat [q.v.], Leopard or smaller pard [kerkal], Leopard cat [shivingy poonay], Indian lynx [caracal], Panther or larger pard [honiga], Rusty spotted cat [poolly poonay], Tiger [pooly]. The lion [simham] belongs to this tribe, but no longer exists in Southern india.

DEERGHA CHANCHOOCAM (दीर्घचंचुक - dírghachañchuka, San.). From (dírgha, san. long + chañchu, san. bill). Ibises. Tantalidæ family, cultirostres, grallatores, aves [pacshy, 47], of naturalists [jantoo]. Divided into the following sub-families:—Tantalinæ, bill very large, thick, rounded, smooth; legs long. Plataleinæ, bill very broad, flat, and depressed. Anastomatinæ, bill very thick, stout, coarse, gaping in the middle. Ibisinæ, bill long, thin, curved; differ from previous by long, slender, curved, and channelled beaks; and are called curlews here; breeding on trees, feeding their young till full grown. The species best known to the natives are shown below.——*Black ibis* (کالا بزا - kálábazá, Hind.; నల్లకంకణము - nallakankanamu, Tel.; கருநாரை - karunárai, Tam.). Title from color of head. Hind. from (kálá, hind. black + bazá, hind. ibis). Tel. from (nalla, tel. black + kankanamu, tel. kind of bustard). Tam. from (karumai, tam. blackness + nárai, tam. heron). Title otherwise Black curlew, King curlew, Warty-headed ibis. Geronticus papillosus, ibisinæ.——*Glossy ibis* (کیوری - kewari, Hind.; తాటికంకణము - tátikankanamu, Tel.). Title from plumage. Tel. from (tádu, tel. palmyra, borassus flabelliformis, linn. + kankanamu, tel. kind of bustard). Falcinellus igneus, ibisinæ. Alias Falcinellus bengalensis. Flies in flocks, rapidly in form of wedge. ——*Pelican ibis* (ڈوک - dok, Hind.; ఎర్రకాలికొంగ - errakálikonga, Tel.; കരിനാര - karinára, Mal.; செங்காநாரை - shengánárai, Tam.). Title from appearance. Tel. from (erra, tel. red + kálu, tel. leg + konga, tel. crane). Mal. from (kari, mal. black + nára, mal. heron). Tam. from (shem, tam. red + kál, tam. leg + nárai, tam. heron). Tantalus leucocephalus, tantalinæ. Alias Tantalus gangeticus. Plumage white; quills and tail richly glossed green black; legs fleshy red. Stalks about shallows with bill in the water, partially held open.——*Shell ibis* (शंखबक - shankhabaka, San.; گونگلا - gonglá, Hind.; గుల్లకొంగ - gullakonga, Tel.; വെള്ളനാര - vellanára, Mal.; நத்தைக்குத்திநாரை - nattaikkuttinárai, Tam.). Title from feeding on molluscs. San. from (shankha, san. conch shell + baka, san. heron). Tel. from (gulla, tel. shell + konga, tel. crane). Mal. from (vella, mal. white + nára, mal. heron). Tam. from (nattai, tam. snail + kuttu, tam. to pick + nárai, tam. heron). Anastomus oscitans, anastomatinæ. Alias Anastomus albus, typus. Lives chiefly on molluscs [chippy].——*Spoon-bill ibis* (چمچا بزا - chamchábazá, Hind.; గంటెముక్కుకొంగ - gantemukkukonga, Tel.). Title from shape of bill. Hind. from (chamchá, hind. spoon + bazá, hind. ibis). Tel. from (gante, tel. spoon + mukku, tel. bill + konga, tel. crane). Platalea leucorodia, plataleinæ. Frequently in company with white ibis.——*White ibis* (سفید بزا - sufedbazá, Hind.; ಬೆಳ್ಳಕಂಕ - kanka, Can.). Title from color of hind parts. Hind. from (sufed, hind. white + bazá, hind. ibis). Threskiornis melanocephalus, ibisinæ. Alias Ibis macei, bengala, religiosa, stricticollis. Head and neck nude, black; rest white.

DEER'S FOOT (ہرن پادی - haranpádí, Hind.). Title from form of leaf. Hind. from (harina, san. deer + páda, san. foot). Title otherwise Corn bindweed. Botanically Convolvulus [tauly] arvensis, l., convolvulaceæ [vricsham, 93]. Stem slender, prostrate or twining, striated, angled; leaves narrow-sagittate, sub-auricled; sepals ovate-obtuse; capsule smooth; peduncles one to two-flowered, with two small bracts; flowers rose-colored, fragrant; common in the black soil [regar] of the deccan [q.v.].

DEH (دہ - deh, Hind.). A village [graumam].——*Dehaut* (دیہات - dehát, Hind.). From arabic. Plural of deh. An entire village held as inam [inam].——*Dehjhaurah* (دہجھارا - dehjhárá, Hind.). From (above + jhárá, hind. examination). An account showing the number of houses, shops, cattle, population, looms, ploughs, &c., of which a town or village consists.——*Dehwaur* (دہوار - dehwár, Hind.). From (above + wár, pers. according to). Village by village.

DELLY (ഏഴിമല - ézhimala, Mal.). Means rat-hill; because infested by rats. Sanscrit name (saptashaila), meaning seven hills. Otherwise Yaimullay. Portuguese travellers styled the hill Monte d'Eli; hence the corruption into Delly, &c.—"*a*" Mountain, Malabar district, Chiracal talook. A detached hill forming prominent landmark visible 27 miles at sea. There are creeks on either side, the junction of which make it an island. Once a noted place for sea-pirates. The first Indian land seen by Vasco da Gama [cannanore]. A project set on foot for the construction of a harbour [toray] was abandoned on account of expense. The shore is bold and safe to approach, there being 7 and 8 fathoms at 1 and 2 miles' distance, 20 and 22 fathoms at 2 or 2½ leagues' distance; and at 15 leagues' distance abreast the mount soundings are lost. This is the narrowest part of the channel between the main and Laccadive islands, the distance being 27 leagues between Yeliculpainy bank and Mount delly. Abreast of this headland there is frequently a drain of current to the southward, with a short confused swell, the effect of brisk north-westers, which greatly prevail here. Modern fort built on a bluff projecting into the sea by the Portuguese, from whom it was taken by the Dutch. Acquired by the French by purchase from the Chiracal rajah on 24th February 1754. Surrendered to English according to terms of capitulation of Mahé, dated 10th February 1761. Taken by Sirdar khan, Tippoo's general, 1779. Restored to English by treaty of Mangalore, dated 11th March 1784. Much large game, samber [q.v.], panthers [honiga], &c.—"*b*" River; Malabar dist., Chiracal tal. Rises in ghaut [q.v.] mountains; lat. 12° 15′; long. 75° 22′, and loses itself in a number of creeks to east and north-east of the mount. One or more of these join the Neeleshwar and the chief stream flows south and enters sea in angle of the bay formed immediately to south of mount itself. The sluggish water is favorable to crocodiles [mugger]. Total length 30 miles.—"*c*" Trig. station; Malabar dist., Chiracal tal.; lat. 12° 01′ 37·04″; long. 75° 14′ 40·51″; height 720 feet; from Cannanore N.W. 16 miles; from Maudye W. 4½ miles; from the sea E. 1 mile.

DENCANICOTTAH (ಡೆಂಕಣಿಕೋಟೆ - denkanikóta,* Can.). From (denkani a corruption of dakshina, san. southern + kóta, san. fort) [dacshinam, deccan].—"*a*" Deputy tahsildarry, Salem district. Pay Rs. 70.—"*b*" Town, Deputy tahsildar's station, Hills; Salem dist., Oossoor tal.; pop. 4,355; acres 2,772; lat. 12° 32′; long. 77° 50′; from Madras W.S.W. 170 miles; from Namcull N.N.W. 94 miles; from Oossoor S. 14¾ miles; from Salem N.N.W. 65 miles; from Tripatore W. 53 miles; from Yercaud N.N.W. 59 miles. To the west of Dencanicottah proper, which is on a hill, is the fort and fort pettah, also on an eminence; a valley with a tank lying between. The fort commands the approaches from Kelamungalam, Tully and Oossoor. A large portion has been dismantled. Dencanicottah proper is well laid out. Besides the town proper, and the fort pettah, there is the Tair [q.v.] or Car pettah about half mile south-east round the tank and temple of Bettroya sawmy and mostly occupied by votaries of the temple. The place is feverish. There is a large colony of Iyengar bramins in the old pettah [q.v.], and there are also many Mussalmans and Chetties. Trade in dry grains [q.v.], especially raggy [q.v.]; silk-worms [puttoo] were formerly bred. Rough pottery [chatty] is produced to a great extent. The Lumbaudies have their home in the Dencanicottah jungles. The Iroolar also frequent these jungles. Sandal-wood [q.v.] and atchah [q.v.] wood abound in the hills. The hills contain the finest forest in the district. Formerly gave its name to a talook [q.v.]. Ceded to the British in 1792. The camping grounds are Shoolagherry, Oossoor, Oodenapully.

DENGUE (ڈینگ - deng, Hind.; ಕೀಲಮ್ಮ - kílamma, Can.; కీళ్లమ్మవారు - kíllammavárú, Tel.; முடக்குமாரி - mudakkumári, Tam.). Title from the spanish. Hind. from spanish. Can. from (kilu, can. joint + amma, can. goddess of small-pox). Tel. from (kilu, tel. joint + ammavárú, tel. goddess). Tam. from (mudakku, tam. to bend + mári, tam. epidemic). Hind. also (joronkábukhár), meaning joint + fever. Fugitive and erratic epidemic rheumatism, with fever [jwaram]. West indian term, but lately used here.

DEODAR (देवदारु - dévadáru, San.; देवदार - dévadára, Mahr.; صنوبر هند - sanobarihind, Ar.; صنوبر هندی - sanobarihindí, Pers.; دیودار - deodár, Hind.; دیودارو - deudárú, Dec.; ದೇವದಾರಿ - dévadári, Can.; దేవదారి - dévadári, Tel.; ദേവതാരം - dévatáram, Mal.; දේවදාර - dévadára, Singh.; தேவதாரி - tévathári, Tam.). Title from sanscrit through hindostany [deo, deva]. San. from (déva, san. god + dáru, san. tree) [cheer, deccany deodar, large neeroory]. Ar. from (sanobar, ar. fir, abies excelsa, dec. + hind, ar. indian). Pers. from arabic. Hind., &c., from sanscrit. San. also (suradru), meaning divine tree. Ar. also (shajaratideudár),

meaning deodar tree. Pers. also (darakhtideudár), meaning deodar tree. Hind. also (kilankáper), meaning kilan tree; (nashtar), meaning lancet. Can. also (gunduguragi). Title otherwise Deodar cedar, Deodar pine, Devadauram, Fountain tree, Himalayan cedar, Indian cedar, Indian sanobar, Lancet tree, Sacred indian fir, Sooradauroo. Botanically Cedrus deodara, loud., coniferæ [vricsham]. Alias Abies deodara; Pinus deodara. Specific name from sanscrit, through hindostany. The great cedar of the Himalayas. Large tree, coma pyramidal, large, branches verticillate, lower ones somewhat hanging down, upper ones spreading, all pendulous at the apex; léaves spreading or pendulous at the top of the shortened branchlets, somewhat thirty-fasciculately collected, shortish, straight, stiffish, somewhat quadrangular, sides slightly compressed, green, bluntishly mucronate at the apex; male aments solitary, erect, oblong, acute; antheriferous bracts stalked, ovate above, rounded and denticulate at the apex; cones solitary, erect on a short branchlet or on a two-cleft branchlet twin, oval or oval-oblong, very obtuse, not umbilicate; scales numerous, imbriçated, somewhat woody; bracts small, much shorter than the scale; nuts obovate, narrowed at the base, shorter than the obovate-triangular wing. Yields a coarse fluid kind of turpentine [ganda firoza], called kelonkatel, used as a stimulant to foul ulcers and skin diseases, and in leprosy [cooshtam]; quoted in pharm. but non-officinal. Ashes used as mordant [cauram]. Wood durable. For the Cedar of lebanon see Arzah. Compare also:—Acrocarpus fraxinifolius, pink cedar; Bischoffia javanica, var. genuina, red cedar; Cedrela toona, east indian cedar, moulmein cedar, singapore cedar, white cedar; Cedrus atlantica, african cedar, silver cedar; Chickrassia tabularis, bastard cedar, jamaica cedar; Erythroxylon monogynum, red cedar; Guazuma tomentosa, bastard cedar; Melia azedarach, bastard cedar, white cedar; Soymida febrifuga, bastard cedar, red cedar. See gloss. paragraphs.——*Deccany deodar* (देवदारु - dévadáru, San.; देवदारु - dévadáru, Conc.; دیودار - deudár, Hind.; دیوداروٗ - deudárú, Dec.; ದೇವದಾರು - dévadáru, Can.; ದೇವದಾರು - dévadáru, Too.; దేవదారు - dévadáru, Tel.; ദേവദാരു - dévadáru, Mal.; දේවදාර - dévadára, Singh.; தேவதாரம் - tévatháram, Tam.). San. from (déva, san. god + dáru, san. tree); a medical fragrant tree [cheer, deodar, large neeroory]. Hind., &c., from sanscrit. San. also (amarabhúruha), meaning god + tree. Hind. also (nátkádeudár), meaning country cedar. Can. also (adavigóranti), meaning jungle + lawsonia alba, lamk.; (kuruvakamara), meaning lawsonia alba, lamk. Tel. also (adavigóranta), meaning forest + nail-dye plant, lawsonia alba, lam. Tam. also (shemmanatti), meaning red + that which has smell, from flesh-colored fragrant wood; (shembuliççai), meaning red + sour, from red wood and sour leaves; (káttuççandanam), meaning forest + santalum album, linn. Title otherwise Bastard sandal, Indian sethia, Iron-wood [cassa, chowkmaram, dark vail, foreign ilanjy, nauga champak, yellow condray], Jungle nail dye, Malabar cedar, Red-wood, Shemmanatty wood. Botanically Erythroxylon monogynum, roxb., lineæ [vricsham, 28]. Alias Erythroxylon indicum, sideroxyloides; Sethia indica. Small tree; petals five; leaves alternate, obovate or oblong, obtuse, cuneate at the base, feather-nerved, reticulated with veins, under side pale; pedicels axillary, one to three, about twice as long as the petiole, one-flowered; calyx five-lobed; styles combined nearly to the apex, longer than the stamens; drupes oblong, triangular, three-celled, two of the cells small, abortive, and without seeds; flowers small, greenish; flowering nearly all year; native of malabar; grows in dry jungles. Young leaves and tender shoots medicinally refrigerant; bruised and mixed with gingelly [q.v.] oil are applied as liniment to head; bark occasionally administered in infusion as tonic; substituted for anthemis, cascarilla and pot. acet.; leaves possibly contain some principle like erythroxylon coca, lam. [coca]; wood in powder used for sandal-wood [q.v.]; in famine time leaves eaten by starving poor. Empyreumatic oil or wood-tar of a reddish brown color is procured from the wood, used for preserving wood employed in construction of native boats [munjy]; timber flesh colored and excellent, of small size, known as bastard sandal, being used as substitute for sandal-wood.——*English deodar* (சீமைதேவதாரி - shímaithévathári, Tam.). Same as Cheer.——*Jambool deodar* (جمبول دیودار - jambuldeudár, Hind.). Same as Ashocam.——*Neeroory deodar* (देवदारु - dévadáru, San.). Title from similar appearance. Same as Large neeroory.

DERAH (ڈیرا - derá, *Hind.*; గుడారము - gudáramu, *Tel.*; തമ്പു - tambu, *Mal.*; கூடாரம் - kúdáram, *Tam.*). Tent. Their use has long been known to some of the wandering tribes; of a sort more like the old Roman tent than the Arab shamyauna [q.v.]. The following are different parts of tents, or kinds of tents as known to Europeans.——*Bechoba* (بے چوبہ - bechobah, Hind.). From (be, hind. without + chob, hind. pole). A tent without a pole. The peaked roof is made by a folding frame, on the umbrella principle.——*Canaut* (قنات - kanát, Hind.). The vertical side wall of a tent. Generally separate and attached all round as soon as the roof is pitched.——*Chick* (چق - chik, Hind.). From turkish. A hanging screen made of split bamboos [q.v.], fastened together in parallel lines by perpendicular strings, and sometimes painted [tatty].——*Dochoba* (دو چوبہ - dochobah, Hind.). From (do, hind. two + chob, pers. pole). Double-poled tent of oblong shape.——*Dosootee* (دو سوتی - dosútí, Hind.). From (do, hind. two + sút, pers. thread). A native made drill cloth, the threads of which are double; used for the outer covering of tents.——*Durbar ka derah* (دربار کا ڈیرا - darbárkáderá, Hind.). Tent used on durbar [q.v.] occasions.——*Durree* (دری dari, Hind.). Carpet of country-made cotton [q.v.] cloth resembling drill, but colored [shatranjee].——*Fly* (سقف - sakf, Hind.). From (sakafa, ar. to cover in). The roof of a tent, sometimes single, sometimes double.——*Fowj ka derah* (فوج کا ڈیرا - faujkáderá, Hind.). Army, tent.——*Gadah* (گاڑا - gárá, Hind.). Coarse thick cloth.——*Hatrah* (ہتھوڑا - hatorá, Hind.). From (háth, hind. hand + torná, hind. to break). Mallet.——*Kharwah* (کھاروا - khárwá, Hind.). A coarse red cotton cloth.——*Khaum* (کھام - khám, Hind.). Tent-pole.——*Khootee* (کھوٹی - khútí, Hind.). Peg.——*Maij ka derah* (میز کا ڈیرا - mezkáderá, Hind.). From (mez, hind. table). Mess tent.——*Nowcar ka derah* (نوکر کا ڈیرا - naukarkáderá, Hind.). Servant's tent.——*Pakwaun ka derah* (پکوان کا ڈیرا - pakwánkáderá, Hind.). Cooking-tent.——*Paul* (پال - pál, Hind.). From (pá, san. to protęct). A small tent with two light poles, a ridge bar, and steep sloping sides; the walls, if any, are very short, often not more than 6 inches high. Sometimes a second ridge above carries a second roof over the first; this makes a common shooting tent.——*Purdah* (پردہ - pardah, Hind.). A curtain.——*Pyekhana ka derah* (پائیخانہ کا ڈیرا - páikhánahkáderá, Hind.). Necessary tent.——*Rowty* (راوٹی - ráutí, Hind.). A tent on the principle of the Paul but much higher and with canauts which have doors in them. Sometimes used to mean thereby the ordinary Paul.——*Saleetah* (شلیتا - shalítá, Hind.). Canvas sack [gunny] for packing different parts of the tent.——*Saumaun ka derah* (سامان کا ڈیرا - sámánkáderá, Hind.). Baggage tent.——*Shamyauna* (شامیانہ - shámiyánah, Hind.). From (sháh, pers. royal + miyánah, pers. centre). An awning or flat-roofed tent used by civil officers to hold their office or by natives for their zenanas [q.v.]. In the former case there are often no walls, it being pitched in front of the ordinary pyramidal tent.——*Shikar ka derah* (شکار کا ڈیرا - shikárkáderá, Hind.). Hill tent.——*Soorauk* (سوراخ - súrákh, Hind.). Eyelet.——*Sowar paul* (سوار کا ڈیرا - sawárkáderá, Hind.). Tent for a mounted soldier.——*Sywaun* (سائبان - sáibán, Hind.). From (sáyah, pers. shade + bán, pers. keeper). Side prolongations of the fly of a tent.——*Tabaila ka derah* (طبیلے کا ڈیرا - tabelekáderá, Hind.). Stable tent.——*Yek choba* (ایک چوبہ - ekchobah, Hind.). From (ek, hind. one + chob, pers. staff). Single-poled tent, the ordinary square tent.

DERVISH (درویش - darvísh, *Hind.*). From (dar, pers. door + áviz, pers. hanger on). Foreign term for a Mahomedan religious mendicant. There are several orders of Dervishes; the chief in S. india are Cawdiriya, Chishtiya, Madauriya, Nakshbundiya, Rafayee. Term fakeer [q.v.] generally substituted [calandar].

DESHAM (देश - désha, *San.*; دیس - des, *Hind.*). From (dish, san. to point). Point of the compass [dic, disay]. Country. Suffix in place names; as Bramhadesham. The following particulars are given by the Calpastaunam [q.v.] incidentally to medical matters; but see also the five-fold division below. All countries are situated either high, low or middle.—"*a*" The first, Jangala desham, is a high mountainous country, in which shrubs are thorny and trees very large. Salt water found by digging deep. The air clear and serene, and horizon [cshitijam] appears at an immense distance. The natives usually thin and fond of home. Adversity affects them, and the few disorders they are subject to are chiefly nervous [vautam].—"*b*" The second is Anoopa desham, or low country. A luxuriant appearance proceeding from general verdure and abundance of tanks, which are covered with Nautsoo or Utricularia stellaris, linn. Numberless fish. The whole is encompassed by high mountains. Trees large, and the plain is studded with palmyras [q.v.] and date trees [kharjooram]. The inhabitants are subject to catarrhal and hæmorrhoidal disorders, to obstructions in the abdomen, and to swollen legs. They are in general indolent, large, and have a soft flesh. The phlegm disorders [sheetam] prevail. The plants growing in such countries yield plentiful juices, but mostly sweet.—"*c*" The third country, Sandhauranam, approaches according to its position either the one or the other. And is either Jangala saudhauranam or Anoopa saudhauranam. The best medicines may be procured in this kind of country, provided attention is paid to the weather [caulam] and the season of the year.——**(1)** *Desha cauval* (தேசக்காவல் - tésakkával, Tam.). From (above + kával, tam. guarding). System of guarding a tract of country against marauders. Desha cauvalgar was the equivalent of a poligar [q.v.].——*Deshacoyma* (ദേശക്കോയ്മ - déshakkóyma, Mal.). From (above + kóyma, mal. authority). Same as Deshavauly.——*Desha hasheel* (దేశహాశీలు - déshaháshílu, Tel.). From (above + háshílu, mahr. duty). Inland duty.——*Deshast* (ದೇಶಸ್ಥ - déshast'ha, Can.). From (above + st'há, san. to stay). Class of bramins originally from the Mahratta country. Speak Mahratta. Divided into Smartas

[q.v.], and Madhwas [jauty].——*Deshaudhicaury* (ദേശാധികാരി - déshádhikári, Mal.). From (above + adhikári, san. headman). The headman of a Deshom.——*Deshauntaram* (देशान्तर déshántara, San.). From (above + antara, san. space). Foreign country. The distance of any two meridians [raikhay] on the surface of the earth [bhoomy], or longitude; the governments of different nations fix one meridian and reckon the others; as half round the globe [golam] is 180 degrees, the greatest longitude a place can have is 180 E. or W. For celestial longitude see Dhroovacam and Sauyanam.——*Deshavauly* (ദേശവാഴി - déshavázhi, Mal.). From (above + vázhu, mal. to reign). Military chief of a Deshom [q.v.]. The number of Nayars or fighting men attached to a Deshavauly was from twenty-five to hundred; if it exceeded the latter number, he ranked as a Naudvauly [q.v.].——*Deshcoolacurny* (దేశకులకర్ణి - déshakulakarni, Tel.). From (above + kulakarni, can. accountant). Formerly a district accountant, compiling from village accountants [curnum].——*Deshmookh* (దేశముఖ్యుడు - desamukhyudu, Tel.). From (above + mukhya, san. chief). Same as Deshpandya.——*Deshom* (ദേശം. - désham, Mal.). From (dish, san. to point out). In Malabar a hamlet, a sub-division of an amshom [q.v.], which is again a sub-division of a talook [q.v.]. See vol. II, 103. Stands also for the proprietary possession of a village and the rank derived from it.——*Deshpandya* (దేశపాండ్య - déshapándyá, Tel.). From mahratta. A revenue head of a district under the old Governments [inam].——*Deshyam* (देश्य - déshya, San.). Primitive Teloogoo words, such as (gurram) a horse, (kannu) an eye, (illu) a house, and so forth; which like corresponding English words are considered primeval and not to be traced to any root. A sub-division of this class is Anya deshyam, or local. Thus the words (polati), (toyyali), (melata), and many other words for woman; (rautu) a soldier, (reddi) a farmer, (gidda) a bullock, (muduca) old, (bittari) beauty, (bittali) naked, and many more; some of which are supposed to be Tamul and others Cannadam.——*Deshye* (దేశాయి - désháyi, Tel.). From (désha, san. country + adhi, san. over). Same as Deshpandya.——**(2)** The following are the five kinds of country according to the Dravidians, with their characteristics.——*Coorinjy* (குறிஞ்சி - kuriñji, Tam.). From (kurumai, tam. shortness); hilly tract. The chief of the tracts are styled porooppan [q.v.], verpan [q.v.], and shilamban [q.v.]; the peculiar deity is scandan [q.v.]; the employments of its people are sowing mountain paddy [q.v.], watching millet [q.v.], collecting honey [shahad], digging of roots [gaddah], &c.; its water is mountain streams; its melody is coorinjy punn; its drum [paray] is tondagam; its birds are parrots [totah] and peacocks [mayil]; its flowers are known as november-flower [wild bachnaug], &c.; its trees are vengay [common vengay], coorinjy maram, sandal [q.v.] tree, teak [q.v.], aquila [eagle-wood], ashocam [q.v.], poon [q.v.]; its inhabitants are coravar, caunavar, coorattiyar; its lute is coorinjy yauzhtiram; the food of its inhabitants are bamboo rice [moongil arisy], mountain rice [eivana nel], tinay [q.v.], bulbous roots, honey, &c.; its villages are known by the name of shiroocoody [q.v.]; its beasts are tiger [pooly], bear [ricsham] elephant [q.v.], lion [simham], &c.——*Marootham* (மருதம் - marutham, Tam.). Agricultural tract. The chiefs of the district are styled ooran [q.v.] and kizhavan [q.v.]; the peculiar deity is indran [q.v.]; its inhabitants are the ploughmen and the labourers, their employments being ploughing, sowing, reaping, celebrating festivals, &c.; its water is rivers and canals; its birds are the heron [paddy bird], swans [hamsam], indian nightingale, ducks [badak], &c.; its beasts, cattle [maud], &c.; the food of the inhabitants is shumbah [q.v.] rice [q.v.], &c.; its plants are the ape face-flower plant [ilanjy], the lotus [nelumbo], the water-lily [q.v.], &c.; its trees are the marootham [murdah], terminalia, the caunchy [q.v.] and the vanjy [goolancha]; the villages are called peroor [q.v.] and moothore [q.v.].——*Moollay* (முல்லை - mullai, Tam.). Woodland or sylvan tract. The chiefs are styled cooroomporay [q.v.] naudan and tondral [q.v]; its peculiar deity is krishnan [q.v.]; the inhabitants are cowherds and shepherds, their occupations being feeding cows, grappling with bulls, dancing hand in hand, &c.; their food is shaumay [q.v.], varagoo [q.v.], and pulses [dholl]; its waters are jungle streams; its birds are jungle fowls [q.v.], &c., and the beasts are the stag and the hares [mosal]; the plants are the november-flower, or jasminum trichotomum, heyne, the vanamullicah, jasminum angustifolium, vahl., &c. [jasmine]; the trees are chiefly cassia [condray] and memecylon edule, roxb. [cassa]; and its villages are styled paudy [q.v.].——*Neydal* (நெய்தல் - neydal, Tam.). From (ney, tam. to be unctuous); from nature of earth. Maritime tract. The chiefs are styled shairpan [q.v.] and poolamban [q.v.]; the ruling deity is varoonan [q.v.]; its inhabitants are fishermen and salt makers, &c.; their occupations being fishing and salt-making, &c.; their food is fishes, lobsters, &c.; its water is sea water or salt water; the birds are water-crow [caukkay], &c.; the beasts are the soorah [q.v.] fish, squalus carcharias; the plants are pandanus odoratissimus, linn. [screw-pine], and aumbal, nymphæa alba, linn. [indian water-lily], &c.; the trees are the silk-cotton tree [q.v.], &c.; and its villages are styled pattinam and paukam [q.v.].——*Paulay* (பாலை - pálai, Tam.). From (pál, tam. whiteness, bleakness). Arid or desert tract. The rulers of the desert tract are styled caulay; its peculiar deity is doorga [q.v.]; its inhabitants are the veyda [q.v.] caste, their occupations being mostly plundering; the food is plunder on which they mainly subsist; its water is well-water; the birds are the dove [capotam], kite [chillam], and eagle [cooralam]. The plants are poolah [q.v.], paulay [q.v.] and cally [q.v.]; the beasts are wild dogs [dhole]; the trees are the coorah, webera corymbosa, willd., l. [tirauna], and the marah or white cadamboo, Barringtonia racemosa, blume [common indian oak], and the villages of the arid tracts are styled coorumboo [q.v.].

DEVA (देव - déva, *San.*). From (div, san. to shine) [deo, dinam]. Greek θέος, Latin deus.—"*a*" A secondary god in the Aryan mythology. Mortals possessed of some merit reside in the form of devas in the Devalocam, but when their merit [carmam] is exhausted they must again be born on earth as men or animals, or go to a place of suffering in hell [naracam] for the expiation of previous demerit [samsauram]. The devas are divided into four classes, or vagays, or ganams, with a vasoo [q.v.] or chief for each crore [q.v.] of devas therein. Thus there are:—first Dwaudashauditvan, the twelve audityans [q.v.], literally suns, their class numbering with them 120,000,000; secondly Yecaudasharoodran, the eleven roodrans [q.v.], their class comprising in all 110,000,000; thirdly Ashta vasoos, the eight vasoos, their class including themselves containing 80,000,000; fourthly Ashwinies [q.v.] who are the two physicians of the gods and chiefs of a class containing 20,000,000. There are thus 33 crores, or 330 milions of devas; the 33 crores of gods is a common expression. The term Shiva ganam is frequently used of a single celestial of Shiva's paradise [keilausam], especially with reference to one sent down on earth to bear a human or other form; and either as a punishment for a crime or to accomplish some purpose. The plaster figures outside the gopoorams [q.v.] of temples [coil] and the rows of figures bending on one knee to Shiva in the sculptures at the seven pagodas [q.v.] are devas of this class. Of the devas few only are known by names, but here and there paintings exhibiting various stories concerning them are found in the houses of the opulent. See vol. I (73), (78).—"*b*" The Tamuls always use the term Devan monotheistically. The following are from the Vausishtam [alvandar]:—*தீவினையெல்லா மறுத்து மங்கலமெல்லாமுதவுந் தேவபூசை, யாவதெனக்கேட்டலுமே யருள்செய்வான் றெய்வந்தானியாதென்றேற்றிற், கேவலமே வரியல்ல வரனல்ல பூதவுடற்கிடைத்ததல்லமோவுமன மன்றடியு முடிவுமில்லாச் செயப்படாவுணர்வே தேவம்.*—"When Vasishtan [q.v.] asked Shiva, what is "the divine worship which will remove all misery and produce "all happiness? Shiva graciously declared; to teach you what "the deity is, know that that which alone is, that which is not "Vishnoo, nor Shiva, nor anybody formed of the five elements "[bhootam], nor the ceasing mind; but that which is the self-"existing uncreated wisdom without beginning and without end, "that is the deity."—*தேகமுதற் பிரிவுகளாய்ச் சிறியனவாம் பொருள்களிலத் தெய்வமுண்டோ, பாகமறப் பணதியற வடிமுடிவற்றுள வுணர்வே பரமபோத, மாகவிஞ லதுதெய்வ மருச்சித்தற் குரித்தாகு மறிவிலாத, மூகருக்கு வடிவுமுதலருச்சனையே யியல்பென்று மொழியுமன்றே.*—"Is this deity in the multifarious bodies "[shareeram] of insignificant objects? No. That which is "infinite wisdom, immeasurable, inoperative, without beginning "and without end; that is the deity, which is worthy of worship. "But to the ignorant, the worship of images and forms is "natural." Avvay, the Tamul poetess says:—*தெய்வமொருவனேயென்று வுணரவல்லார்கு, அருவினைகளைந்தமறும்.*—"They who are able to understand that there is one "only God, will lose their deep rooted five sinful actions" [matam].—"*c*" Plant first term denoting excellence. Ex., joining two genera, where transl. is of second term:—Canna indica (dévakéli), musa paradisiaca; Pimpinella anisum (dévaduru), cuminum cyminum; Plumeria acutifolia (dévaganagalu), nerium odorum; Randia uliginosa (dévatámalle), jasminum sambac. See gloss. paragraphs. There are many others where the genus is the same.——*Deo* (ديو - deu, Hind.; ଦେଓ - divó, Oor.). From (déva, san. god). A divinity [deva]. Ooriya title.——*Deodar* (ديودار - deudár, Hind.). See sep. title.——*Deva bramin* (దేవబ్రాహ్మణుడు - dévabráhmanudu, Tel.). Title of certain of the carpenters' caste in contradistinction to the Go-bramins or cow bramins. Cf. Vishwa bramin.——*Deva darshanam* (देवदर्शन - dévadarshana, San.). From (above + darshana, san. seeing). Visiting an idol. Particularly such a visit paid by the bride and bridegroom, with their friends, at a particular period after their marriage [maryauday].——*Devadattan* (தேவதத்தன் - tévathattan, Tam.). From (above + dá, san. to give); god-given. Name of the conch shell of Arjoonan. Often used in grammatical examples and then equivalent to any one or a certain person [peyar].——*Devadauram* (देवदारु - dévadáru, San.). From (above + dáru, san. tree); from fragrant resin of the genus. Fir, Pine-tree. Botanically the Pinus genus, coniferæ [vricsham]. Trees, generally confined to the northern hemisphere; leaves evergreen and sharp-pointed; wood generally very resinous, not homogeneous, consisting of alternate layers of soft and spongy

spring wood and of hard and darker colored autumn wood; indian species have a distinct heart-wood. For the resinous products see Keel, Carpoora teilam, and Ganda firoza. The species best known to the natives are:—longifolia [cheer], pinea [chalgozah]. The anglo-indian term Deodar [q.v.] is for cedrus deodara and erythroxylon monogynum, conifers. The natives give the name to some other plants also.——*Devadausan* (தேவதாசன் - téva-thásan, Tam.). From (above + dása, san. slave). Slave of the deity. Proper name [peyar].——*Devadausy* (தேவதாசி - téva-thási, Tam.). From (above + dási, san. slave).—"*a*" The dancing girls of Swargam [q.v.], the world of the gods. The most celebrated among them are Menakay, Oorvashy, Rambhay, and Tilottamay.—"*b*" The official name of the girls who are devoted to dancing in the Shiva and Vishnoo temples. Cf. the ἱερόδουλοι of Corinth. Every temple, according to its size, entertains a set of them to the number of eight, twelve, or more; they perform their religious duties at the temple to which they belong twice a day, morning and evening; they are also obliged to assist at all public religious ceremonies; at private entertainments they come for payment [nautch]. They are reared to this life from their infancy; they are taken from any caste, and are not unfrequently of respectable birth; the life to which the daughter is destined brings no disgrace on the family; until recently in the native population these women were the only females who were allowed to learn to read. The dancing girl caste have special laws for adoption [dutt] and inheritance [dauyam]; a dancing girl can adopt a daughter, with the permission of the authorities of the pagoda [q.v.] to which she belongs; the property descends in the female line first, and then to males as in other castes; in the failure of issue, the property goes to the pagoda to which she belongs as a rule, it is seldom that these women have children of their own. In some places there exists two kinds of dancing girls, the dancing women differing from the pagoda dancers; these are distinguished as dausy and devadausy. Dancing girls, when performing, are accompanied by two men singers, who while singing also play the cymbals [jaulry]; one or more old women join in the song, and clap their hands during the performance; these are generally dancing girls who have given up the profession from age or other causes; the accompaniment is usually from a drone [tootty] and clarionet [naugaswaram]; their songs comprise praises in honor of the several idols. Nautches are given at marriage ceremonies and feasts, and on other public occasions; among zemindars are of almost daily occurrence; dancing girls frequently receive valuable presents in money, shawls, gold bangles or rings, which are bestowed on them during performance. Devadausies are without exception prostitutes; they receive a fixed allowance out of the temple endowment [devadauyam]; some are the concubines of one of the priests or of some native of consideration, while others are common women, as are all who do not serve in the temple; they are not allowed to marry. Their male children usually call themselves moodellies [q.v.] and pillays [q.v.], if in good circumstances; and have no difficulty in acquiring a proper position in society; the female children are generally brought up to the trade of the mothers; it is customary with a few castes to present their superfluous daughters to the pagodas with a view to their being brought up as dausies [bhògam, jauty].——*Devadauyam* (தேவதாயம் - tévatháyam, Tam.). From (above + dáya, san. a gift). Lands or allowances for the support of a devastaunam [devasom, inam].——*Devadiga* (ದೇವಡಿಗ - dévadiga, Can.). From (above + adiga, can. slave). Menial servant who performs out-door services at temples. Numbers about 20,000 [jauty].——*Devagherry* (దేవగిరి - dévagiri, Tel.). From (above + giri, san. mountain). Hill; Vizagapatam district, Jeypore zemindarry, Royagada magisterial division. Circular hill without much jungle. Five deep pools of pure water on top. Also cave containing lingams [q.v.] and a garden with plaintain [q.v.] trees. Largely resorted to on Shivarautry [pundigay, 6a]. Situated near Calyaunasingapooram.——*Devaky* (देवकी - dévakí, San.). The mother of Krishnan. Devaky meindan, from (maindan, tam. son) is Vishnoo.——*Devamany* (देवमणि - dévamani, San.). From (above + mani, san. jewel). Shiva.——*Devamboo* (தேவாம்பு - tévámbu, Tam.). From (above + ambu, san. water). Water of the gods; the Ganges. Hindoo 2nd or pers. name. Also common with baptized Native christians [peyar].——*Devanagry* (देवनागरी - dévanágarí, San.). From (above + nagara, san. a city). Character in which Sanscrit is usually written [baulbund, nagry].——*Devanaickam* (தேவநாயகம் - tévanáyagam, Tam.). From (above + náyaka, san. lord). Epithet of any superior deity, especially of indran. Feminine Devanaicky. Hindoo 2nd or pers. name. Common among non-bramins. Also among Native christians [peyar].——*Devanna* (ದೇವಣ್ಣ - dévanna, Can.). From (above + anna, can. elder brother). Hindoo 2nd or pers. name [peyar].——*Devarbetta* (ದೇವರಬೆಟ್ಟ - dévarabetta, Can.). From (above + betta, can. hill). Hill; Neilgherry district, Todanaud division, Trig. station; lat. 11° 23′ 22·18″; long. 76° 34′ 11·07″; height 8,371 feet; from Ootacamund W. 12 miles; from Macoorty peak N.N.E. 1½ miles.——*Deva roya* (దేవరాయ - dévaráya, Tel.). From (above + rájá, san. king). Rajah of Vijianugger of the Harihar dynasty A.D. 1406–1412. Distinguish from Krishna-deva roya [q.v.].——*Devarsinga permaun* (தேவர்சிங்கப்பெருமான் - tévarsingapperumán, Tam.). From (above + simha, san. lion + perumán, tam. lord). Shiva who is a lion of the gods.——*Devasahauyam* (தேவசகாயம் - tévasagáyam, Tam.). From (above + saháya, san. companion). Hindoo 2nd or pers. name. Common among non-bramins. Also among Native christians [peyar].——*Devashikhaumany* தேவசிகாமணி - tévasigámani, Tam.). From (above + shikhá; san. the crest + mani, san. gem). Hindoo 2nd or pers. name. Common among non-Bramins. Also among Native christians [peyar].——*Devasholah* (ದೇವರಶೋಲೆ - dévarashóle, Can.). From (above + shóle, can. a plantation). Village, Hill; Neilgherry district, Merkoonaud division; lat. 11° 19′; long. 76° 43′; height 7,417 feet; from Coonoor W.S.W. 9 miles; from Ootacamund S. 6¼ miles. The hill is one of the principal eminence on the Neilgherries, half way between Mailcoondah and Dodabetta. Connected with Ootacamund by a driving road. Formerly clothed with thick forest of which a large portion has been cleared and planted. The cinchona [koinah] estate here on E. face of the hill has 1,000 acres. Devasholahbett is another name for Snowdon.——*Devasom* (ദേവസ്വം - dévasvam, Mal.). See sep. title.——*Devastaunam* (देवस्थान - dávast'hána, San.). From (above + t'hána, san. place). A temple; also land or allowances for the support of a temple [devadauyam, devasom, inam].——*Devatay* (देवता - dévatá, San.). Benign spirits governed by Indran. Properly the inhabitants of the North pole [soomeroo]; for the devatays are said to have sunshine when the deityans [q.v.] have darkness and vice versâ. The evil spirits are pishauch.——*Devaujee* (దేవాజి - déváji, Tel.). From (above + aji, tel. master). Madhwa second name. Familiarly Devoo [peyar].——*Devaulah* (ദേവാല - dévála, Mal. deväla *). From (above + álaya, san. abode). Sanscrit name (dévâlaya), meaning same. Village, Head-quarters of Head assistant collector up to March 1889 when they were transferred to Pundalore. Public bungalow; Neilgherry district, Wynaud S.E. division; lat. 11° 29′; long. 76° 26′; from Coimbatore N.W. 53 miles; from Coonoor W.N.W. 29 miles; from Goodalore W.S. W. 8 miles; from Madras W.S.W. 290 miles; from Ootacamund W.N.W. 21 miles. Four miles from head of Carcoor ghaut [q.v.] on high road to Vythery. Weekly market. Was of considerable importance during early period of gold mining speculations. Most houses now empty. Three miles west on the W. slopes of mountains are a large number of ancient mining shafts, 70 or 80 feet deep, and sometimes so close together that it is dangerous to walk through the jungle. Old forest trees are to be seen growing out of them.——*Devaunga* (ದೇವಾಂಗ - dévánga, Can.; దేవాంగ - dévánga, obl.; Tel.). From (above + anga, san. body), from a tradition of divine origin. Otherwise Jendravar. Weavers. The Devaungas are divided into Canarese and Teloogoo. The canarese wear the lingam [q.v.]; the hereditary chiefs are called yejmaun, these take cognizance of all caste offences; the whole of the class can intermarry; they are allowed a plurality of wives whom they purchase from their parents; the wives are not shut up, nor are they divorced, except for adultery; they eat no animal food nor use any intoxicating substance, except as a medicine; they bury the dead [shavacaud]. The teloogoo devaungas are divided into two sects, veishnava and sheiva, but both sects intermarry, the wife always adopting the religion of the husband; the widows were formerly expected to bury themselves alive with their husbands' bodies, this caste are allowed to eat animal food; but not to drink spirituous liquors; they offer sacrifices to the shacties [q.v.]. Numbers about 140,000; chiefly in Coimbatore, Godavery, Salem and Vizagapatam [jauty].——*Devauram* (देवार्ह - dévárha, San.; தேவாரம் - téváram, Tam.). From (above + arh, san. to adore). Collection of songs in tamul extolling the 1,008 Sheiva pagodas [q.v.], of which songs 574 are extant. Later than Tirvauchacam [q.v.]; composed chiefly by Nyauna sambandhan [q.v.], a native of Shiyally, near Chidambaram, with his disciples Soondran [q.v.] and Appan [q.v.]; these three held the most distinguished place amongst the sixty-three [aroopatt moover] devotees of Shiva. The Tirvauchacam and Devauram together are called Tamul vedam [tirvye mozhy]; opposed to jeinism [bhaushay, cooral].——*Devautidevan* (देवातिदेव - dévátidéva, San.). From (above + ati, san. intensive + above). God of gods. Epithet of Vishnoo and of Shakya moony.——*Devayaunay* (தெய்வயானை - teyvayánai, Tam.). Tam. by corruption from (daiva, san. divine + yánai, tam. elephant); supposed to be brought up by eirauvatam [q.v.], the divine elephant [q.v.]. Wife of Soobramanyan.——*Devendran* (देवेन्द्र - dévéndra, San.). From (above + indra, san. lord). Otherwise Indran [q.v.]. ζεύς of Greeks; Jupiter tonans of Romans; Osiris of Egyptians. The chief of the secondary gods. In the vedas the ruler over the deities of the atmosphere, not of heaven. He afterwards came to be considered the lord of all the gods and retained that place until the notion of the trimoorty [q.v.] came into being. Strabo describes the Hindoos as worshippers of Jupiter pluvius, meaning Indran. He was later also regent of the east quarter [ashtadicpaulacan]. His weapon is the vajram [q.v.] or thunderbolt. His paradise is Swargam [q.v.], which is modelled according to the court of a Hindoo king. To it great numbers of people limit their aspirations, higher degrees

being promised to ascetics. He is represented in S. india with four arms and hands. With two of these he holds a lance; in the third he holds the Vajrauyoodham, or thunderbolt, the fourth is empty. The Vajrauyoodham, which makes persons invincible, he gives to those who practise austerities in his honor. On his head he wears a crown; in his hairlocks, pearls [moty] and precious stones [ratnam]; and on his ears, neck, breast, arms, and feet, ornaments of various descriptions. From his shoulders garlands hang down, and his seat is an exalted throne [simhausanam]. His whole body is full of eyes, said to be owing to the curse of the Rishy gowtaman, but meaning originally the stars of the firmament. He has the following among other names:—Ayiran cunnan or the thousand-eyed; Cary vauhanan or he that has the elephant as his vehicle; Maigha vauhanan or he who has the clouds as his vehicle; Pauca shausanan or conqueror of the giant Paucan; Poorhootan or the much invoked; Poorohitan or priest; Shoonauseeran or the leader of the celestial hosts; Vajrapauny or holder of the thunder-bolt; Vaunore comaun or king of the celestials; Vailvikvendan, or lord of sacrifice; Vinmoozhoothauly or ruler of the whole sky [matam].——*Devicapooram* (தேவிகாப்புரம் - tévigáppuram, Tam.). From (déviká, san. goddess + pura, san. town); called after parvaty. Jagheer village; North arcot dist., Arnee jagheer; pop. 2,334; lat. 12° 30′; long. 79° 18′; height 801 feet; from Arnee S.S.W. 12 miles; from Chittore S.S.E. 50 miles. Noteworthy for its temples. Most important, dedicated to Brihadambah, is in town. That of her spouse, Canacagireeshwaran, crowns the adjacent hill. The former was built by Chola rajah tondiman chuckravurty, who began his mission of temple building here. Second in importance only to Trinomallee. The goddess is one of the four brought into existence by Bramha.——*Devicottah* (தீவுக்கோட்டை - tívukkóttai, Tam.). From (tívu, tam. island + kóttai, tam. fort). Sanscrit name (dévíkóta), meaning doorga, the goddess + fort; also (bánapura), meaning baunan, the asooran + town; also (shónitapura), meaning baunan, the red asooran + town; also (ushávana), meaning ooshay, the daughter of baunan + garden; also (kótivarsha), meaning edge + country; also (kóttavipura), meaning town of doorga or town of the mother of baunan. Village, Tanjore dist., Shiyally tal.; pop. 8,451; lat. 11° 22′; long. 79° 51′; from Madras S. 122 miles; from Shiyally N.N.E. 10 miles; from Tanjore N.E. 60 miles; from Tranquebar N. 24 miles. On small island at mouth of Coleroon. The entrance of the river is difficult and dangerous of access from the Coleroon shoal, which stretches 4 or 5 miles to the south-east. Taken by the English, 1749. Ceded in 1749, with thirty-one surrounding villages, to the English by Rajah Prataup sing, on condition of his receiving military aid whenever required. Fortress abandoned by the English garrison in 1758 on the fall of Fort St. David to Lally and the approach of a large French force. Evacuated by the French in 1760 after Coote's victory at Wandiwash, and regarrisoned by the English. Included in the old Cuddalore district about 1787. Ruined fort said to have been built by a Chola rajah; formerly a mile in circumference with walls 18 feet high.——*Deviputnam* (தேவிப்பட்டணம் - tévippattanam, Tam.). From (déví, san. goddess + pattana, san. city). Sanscrit name (navapásháṇa), meaning nine stones representing the navagraham or nine planets [graham]. The stones are near the sea. Town, Port, Place of pilgrimage; Madura dist., Ramnaud zemindarry; pop. 3,905; lat. 9° 28′; long. 78° 56′; from Madras S.S.W. 264 miles; from Madura E.S.E. 59 miles; from Moodiapatam N. 3½ miles; from Ramnaud N.N.E. 8¾ miles; from Tirpaulancoody S. 5½ miles. Connected with Madura and Ramnaud by a road. One of the most holy bathing-places in S. india. Old Amman temple south of town, and large musjid [q.v.]. Also Shiva and Vishnoo temples. Formerly from this place to Tirpoollauny existed the Poorauranyam forest.——*Devy* (देवी - déví, San.; தேவி - tévi, Tam.). Feminine of deva.—"*a*" The goddess Parvaty. Specially in the war of amazons and devas against the asoorans. The episode in the Marcandeya poorаunam, known as Sapta shaty as containing seven hundred shlocams, or Devy mahautmyam [q.v.], narrates the wars of Devy with Shoombhan, Nishoombhan, Mahishausooran, and their hosts of asoorans. Devy is also a name used by the shactibhactans in their mysteries; the same as the Latin Bona dea.—"*b*" Title to deities and Madhwa females especially. Hindoo third name [peyar].—"*c*" Phrase used for the small-pox [ammay].—"*d*" Moodevy is elder goddess or elder sister of lutchmy [q.v.] and is the goddess of misfortune; see sep. title.——*Dewal* (देवालय - déválaya, San.; ديول - deval, Hind.; దేవళము - dévalamu, Tel.). From (déva, san. god + álaya, san. house). Hindoo temple in which an idol is placed [coil, pagoda].

DEVASOM (देवस्व - dévasva, *San.*; ദേവസ്വം - dévasvam, *Mal.*). From (déva, san. god + sva, san. wealth) [deo, deva]. **——(1)** Territorial property attached to a temple [devadauyam, devastanam].**——(2)** The following are the principal Devasoms in North malabar, with the talook indicated.——*Cadalye* (കടലായി - kataláyi, Mal.), Chiracal.——*Calarivaudacull* (കളരിവാതുക്കൽ - kalarivátukkal, Mal.), Chiracal.——*Caunkole* (കാങ്കോൽ - kánkól, Mal.), Chiracal.——*Caunyarangaud* (കാഞ്ഞിരങ്ങാട് - kaññirannátu, Mal.), Chiracal.——*Chaulyle* (ചാലയിൽ - chálayil, Mal.), Chiracal.——*Chercoonn* (ചെറുകുന്ന - cherukunnu, Mal.), Chiracal.——*Collat vishaurical* (കൊല്ലത്ത് വിഷാരിക്കൽ - kollattvishárikkal, Mal.), Cooroombranaud.——*Cottiyore* (കൊട്ടിയൂർ - kottiyúr, Mal.), Cottayam.——*Maudye cauv* (മാടായിക്കാവ് - mátáyikávu, Mal.), Chiracal.——*Oorpilatchicauv* (ഊർപ്പിഴച്ചിക്കാവ് - úrppizhaççikkávu, Mal.), Chiracal.——*Payyannore* (പയ്യന്നൂർ - payyanúr, Mal.), Chiracal.——*Payyavore* (പയ്യാവൂർ - payyávúr, Mal.), Chiracal.——*Perlacherry* (പെരളശ്ശേരി - peralashshéri, Mal.), Chiracal.——*Ramantaly* (രാമന്തളി - rámantali, Mal.), Chiracal.——*Taliparamba* (തളിപ്പറമ്പ - talipparamba, Mal.), Chiracal.——*Tirvangaud* (തിരുവങ്ങാട് - tiruvannátu, Mal.), Cottayam.——*Trichambaram* (തൃച്ചംബരം - triççambaram, Mal.), Chiracal.——*Vayattore* (വയത്തൂർ - vayattúr, Mal.), Chiracal.——*Yedacaud* (എടക്കാട് - etakkátu, Mal.), Chiracal.**——(3)** The following are similarly the principal Devasoms in South malabar.——*Caricaud* (കരിക്കാട് - karikkátu, Mal.), Yernaud. *Cautchancoorchy* (കാച്ചാങ്കുറിശ്ശി - káççánkurishshi, Mal.), Palghaut.——*Chamravuttam* (ചമ്രവട്ടം - chammravattam, Mal.), Ponnany.——*Cherpalcherry cauv* (ചെർപ്പുളശ്ശേരിക്കാവ് - cherppullashshérikkávu, Mal.), Valavanaud.——*Codicoonnat* (കൊടിക്കുന്നത്ത് - kotikkunnattu, Mal.), Ponnany.——*Culleycoolangara yaimore bhagavaty* (കല്ലേക്കുളങ്ങരഏമൂർഭഗവതി - kallékkulanaraémúrbhagavati, Mal.), Palghaut.——*Gooroovayore* (ഗുരുവായൂർ - guruváyúr, Mal.), Ponnany.——*Irinyaulacode coodal maunicam* (ഇരിങ്ങാലക്കുടക്കൂടൽ മാണിക്കം - irinnálakkutakútal-mánikkam, Mal.), Moocoondapooram.——*Munjairy coonnat* (മഞ്ചേരികുന്നത്ത് - mañchérikunnattu, Mal.), Yernaud.——*Niroomgythacottah* (നിറുകൈതക്കോട്ട - nirumkaitakkótta, Mal.), Yernaud.——*Panavanna* (പനവണ്ണ - panavanna, Mal.), Valavanaud.——*Paracaut cauv* (പരക്കാട്ട് കാവ് - parakkáttukávu, Mal.), Palghaut.——*Permanna* (പെരുമണ്ണ - perumanna, Mal.), Calicut.——*Polore* (പോലൂർ - pólúr, Mal.), Calicut.——*Poottoore* (പുത്തൂർ - puttúr, Mal.), Calicut.——*Pullavore* (പല്ലാവൂർ - pallávúr, Mal.), Palghaut.——*Pundalore* (പന്തലൂർ - pantalúr, Mal.), Yernaud.——*Rampooram* (രാമപുരം - rámapuram, Mal.), Valavanaud.——*Shreevalyanaud cauv* (ശ്രീവളയനാട്ട് കാവ് - shrívalayanáttukávu, Mal.), Calicut.——*Talee* (തളി - tali, Mal.), Calicut.——*Tirmandhauncoonn* (തിരുമാന്ധാംകുന്ന - tirumándhánkunnu, Mal.), Valavanaud.——*Tirnavoya* (തിരുനാവായി - tirunáváyi, Mal.), Ponnany.——*Tirvaipra* (തിരുവേഗപുരം - tiruvégapuram, Mal.), Valavanaud.——*Tirvannore* (തിരുവണ്ണൂർ - tirvannúr, Mal.), Calicut.——*Tirvaulattore* (തിരുവാലത്തൂർ - tiruválattúr, Mal.), Palghaut.——*Tirvillamala* (തിരുവില്ലാമല - tiruvillámala, Mal.), Talapully.——*Tricalangottore* (തൃക്കലങ്ങോട്ടൂർ - trikkalannóttúr, Mal.), Yernaud.——*Tricalayore* (തൃക്കളയൂർ - trikkalayúr, Mal.), Yernaud.——*Tricandiyore* (തൃക്കണ്ടിയൂർ - trikkantiyúr, Mal.), Ponnany.——*Tripauvalore* (തൃപ്പാവലൂർ - trippávalúr, Mal.), Palghaut.——*Triprangode* (തൃപ്രങ്ങോട - triprannótu, Mal.), Ponnany.——*Tripriaur* (തൃപ്രയാർ - triprayár, Mal.), Ponnany.——*Trishivaperoor vadaknautan* (തൃശ്ശിവപ്പേരൂർവടക്കുന്നാഥൻ - trishshivappérúrvatakkunát'han, Mal.), Trichore.——*Trittaula* (തൃത്താല - trittála, Mal.), Ponnany.

DEVAUNGA (वनमानुष - vanamánusha, *San.*; شرمندی بلی - sharmindíbillí, *Hind.*; ಅಡವಿಮನುಷ್ಯ - adavimanushya, *Can.*; ಚೆಂಗೆಕುಳಿ - chíngekuli, *Coorg*; దేవాంగిపిల్లి - dévángipilli, *Tel.*; തേവാങ്കം - tévánkam, *Mal.*; උනහපුලුවා - unahapuluvá, *Singh.*; தேய்வாங்கு - téyvángu, *Tam.*). Title from tamul; distinguish from devaunga, weaver, under deva. San. from (vana, san. wild + mánusha, san. man). Hind. from (sharmindí, hind. bashful + billí, hind. cat). Can. from (adavi, can. forest + manushya, san. man). Tam., &c., from (téyvu, tam. emaciation + anga, san. body). Can. also (bálegappe), meaning plantain frog; (nidu-gappe), meaning long frog. Title otherwise Lemur or slender loris. Loris gracilis, lemuridæ, quadrumana, mammalia [sastanam, 2], of naturalists [jantoo]. Alias Stenops gracilis. The light-colored variety of the loris in Ceylon has a spot on its forehead, somewhat resembling the naumam [q.v.] worn by Veishnavites, and so called the Naumadham. Lemurs are also natives of Madagascar. They have given their name to Lemuria, the submerged continent which once lay between Madagascar and South india. From the slowness of its movements the Lemur is also called the Indian sloth. Found in most forests but difficult to observe owing to small size and nocturnal habits. Lives almost entirely in trees. The fur is soft, dense, and woolly. The nostrils, unlike those of either group of monkeys [bandar], have a curved opening, and the tail is never prehensile. The

extremities of the lemur differ remarkably from those of the monkeys in having a long, sharp, curved claw on the first finger of the hinder pair, and generally in the broad, flat character of the nails of the other fingers. The form of the face is somewhat fox-like in the prolongation of the muzzle and affords a physiognomical character which will be readily recognised. It is not common on the Malabar coast. Its eyes are a remedy for certain diseases of the eyes among the Tamul doctors; also used as love potions. A thin person is called a Devaunga. The lemur occurs also in Ceylon. There is a link between the lemurs and the bats [vavvaul] in the Galæopithecus or flying lemur. The limbs of these animals are connected with a membrane as in the flying squirrels [paravayanil] and flying foxes [q.v.]. They have not however been found in India. The Nycticebus tardigradus or slow-paced lemur is also not found here.

DEVIL'S GOAD (भूतांकुश - bhútánkusha, *San.*; गणसूर - ganasúra, *Mahr.*; భూతాలభైరి - bhútálabhairi, *Tel.*). Title from being powerful remedy. San. from (bhúta, san. devil + ankusha, san. iron goad). Tel. from (bhúta, san. devil + bhairi, hind. hawk). Botanically Croton [ghantabeejam] oblongifolius, roxb., euphorbiaceæ [vricsham, 118]. Tree; younger branches with the young leaves and inflorescences covered sparingly with yellowish scales; stipules stiff, subulate; leaves more or less elliptic or ovate or obovate, toothed or entire, acute at both ends, below at the base biglandulose; racemes abounding in flowers; bracts one to three-flowered; segments of the female calyx triangular-lanceolate, of the male pale at the margin and densely scurfy; stamens ten to twelve; filaments woolly near the base; styles once deeply bipartite; capsules sub-globose, covered with scurfy scales; flowers small, green; flowering in march; anamullays and malabar near coast. The root is twisted, often somewhat flattened, bark thickish, externally light-brown and scaly, internally yellowish, mottled with brown, substance compact and resinous, odour highly aromatic, taste peppery and camphoraceous. Seeds purgative; gives to pharm. non-officinal oil of seeds, like croton [jamalgota] oil. Wood whitish to yellow, close-grained, moderately hard; liable to crack in seasoning.

DHADAY (ಧಡೆ - dhade, *Can.*; ధడియము - dhadiyamu, *Tel.*). Bazaar weight. 2 viss = 1 dhaday; 4 dhadays = 1 maund [niray, 2c]. Approximate actual value, 1 dhaday = 6 lbs. 4 oz. avoirdupois. Same as Hind. dhurrah. Vol. I, 609; II, 506, 510, 516.

DHAN (धन् - dhan, *San.*). To move.——*Dhanak* (دهنک - dhanak, Hind.). From (dhanushka, san. a small bow). Narrow ribbon with five to seven strands of gold [pon] in the web; used for bodices [cholee].——*Dhanoor mausam* (धनुर्मास - dhanurmása, San.). Ninth solar month, i.e., between 14th December and 11th January when the sun is in sagittarius [dhanoos]. Hence the offerings to idols and the feastings in that month. Solar observance [pundigay, 2]. This is otherwise called Shoonyamausam or empty month, as no marriages and other good actions should then be performed. Hindoos rise very early in the morning, bathe in cold water and worship the idol with offerings of pongal and fruits, before sunrise. The same course is pursued in temples every day of the month. The last day of the month is Bhogy pundigay, the first of the next month being the grand Pongal [q.v.] feast [maryauday].——*Dhanoos* (धनु - dhanu, San.). A bow; sagittarius, the ninth zodiacal sign [raushy].——*Dhanwantary* (धन्वन्तरि - dhanvantari, San.). From (dhanvan, san. bow + tar, san. move); moving in a curve; epithet of the sun. The physician of the gods holding ambrosia [amritam, coormam] in his hands. Sanscrit treatises on medicine bear his name, Tamul treatises that of Agastyan.

DHAR (धर - dhara, *San.*). From (dhri, san. to bear) [dhau]. Support; restraint.——*Dharan* (धर - dhara, San.). Bearer or supporter. Suffix in proper names as Gungaudharan or Shiva, supporter of the ganges [peyar].——*Dharanicottah* (ధరణికోట - dharanikóta, Tel.). From (dharaní, san. earth + kóta, san. fort). Tel. also (dípáladinne), meaning lamp + mound. Sanscrit name (dhanakataka), meaning wealth + fort. Greek πιτύνδρα. Village; Kistna dist., Suttenapully tal.; pop. 1,489; acres 6,374; lat. 16° 35′; long. 80° 23′. The well-known old fort 1 mile west of the Booddhist tope [q.v.] at Amravatty on the Kistna. In the fort are two old temples with inscriptions and other remains. The fort was built in time of Jeinas by a king name Mookkanteshwaran, a name appearing variously as Mookkanty rajah and Mookkanty pullava [amravatty]. Has a ferry.——*Dharany* (धरणी - dharaní, San.), Earth [bhoomy].——*Dharaupooram* (தாராபுரம் - tárappuram, Tam.). See sep. title.——*Dharmacurta* (धर्मकर्ता - dharmakartá, San.; ధర్మకర్త - dharmakarta, Tel.). From (dharma, san. charity + kartá, san. doer). The chief manager or trustee of a pagoda [q.v.].——*Dharmadausan* (தருமதாசன் - tarumathásan, Tam.). From (dharman, san. duty + dása, san. servant). Slave of duty. Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Dharmalingam* (தருமலிங்கம் - tarumalingam, Tam.). From (dharma, san. proper name + linga, san. emblem of shiva). Shiva as worshipped by dharman or dharmarajan. Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Dharmam* (धर्म - dharma, San.). From (dhri, san. to hold) [dhauray]; that which is to be held fast. Ordinance; charity; religious merit [aram]; justice. One of the four objects of existence; the other three being:—artam, wealth; caumam, pleasure; mocsham, absolution. Generally includes faith [bhacty] and works [carmam].——*Dharman* (தருமன் - taruman, Tam.). God of death; Yoodhishtiran, the mythological hero. Hindoo 2nd or pers. name; also suffix in proper names. Feminine Dharmy [peyar].——*Dharmapatam* (ധർമ്മടം - dharmmatam, Mal.). From (dharma, san. charity + pattana, san. town).—"*a*" Amshom, Port, Island; Malabar dist., Cottayam tal.; pop. 6,411; acres 3,840; lat. 11° 46′; long. 75° 30′ from Bombay S.S.E. 504 miles; from Calicut N.N.W. 41 miles; from Tellicherry N.W. 2¼ miles. Dehfattan of Ibn batuta, Darmaftan of the Tohfat ool moojauhideen, Tormapatani of Varthema. An island. Amshom [q.v.] lying in river of same name, immediately north of Tellicherry. The Anjarcundy river splits into two branches as it approaches the sea, and the land lying between them and the sea forms the island. Formerly belonged to the kingdom of Colattiry but ceded to the English in 1734. Taken by the Rajah of Chiracal in 1788 but retaken in 1789. Old redoubt and an old rock-cut cave. One of the earliest Arabic mosques [musjid], now entirely demolished.—"*b*" River; Malabar dist., Cottayam tal. Rises in Wynaud and falls into the sea 3 miles north of Tellicherry.—"*c*" Trig. station; Malabar dist., Cottayam tal.; lat. 11° 45′ 59·76″; long. 75° 30′ 09·82″; height 112 feet; from Tellicherry N.W. 2½ miles; from the sea E. ¼ mile.——*Dharmapoory* (தருமபுரி - tarumappuri, Tam.). See sep. title.——*Dharmaraja cull* (தருமராசாக்கல் - tarumarásákkal, Tam.). From (dharmarájá, san. lord of justice, epithet of booddha + kal, tam. rock). Otherwise Adam's Peak, also called by the Arabs Er-rahoon, Mountain, Ceylon; 7,350 feet above sea. A hollow on the summit is said by Bramins to be foot-step of Shiva; by Booddhists, of Booddha; by Chinese, of Fo; by Mahomedans, of Adam [collam, condaveed]. The peak is visible 60 leagues to seaward. Foot mark on a flat stone near a pool of water is the object of pilgrimage. There are other models of feet in different parts of island. The kadam rasool or foot print of prophet is another foot print on a hill at Secunderabad.——*Dharma rajan* (धर्मराजा - dharmarájá, San.). From (dharma, san. justice + rájá, san. king). A name of Yaman in his beneficent form. He is the king of justice, whose countenance the virtuous only see; the wicked see him as the king of the infernal regions. Pullies worship in temples dedicated to Dharma rajan. In these are found the images of the Pandava Yoodhishtiran or Dharma rajan and his four brothers Bheeman, Arjoonan, Nacoolan, and Sahadevan, of Drowpady, of Krishnan, and occasionally of the really indigenous Potrauz. At the great annual festival in honor of Dharma rajan or the local god or goddess, people walk over burning coals in order to testify their purity of mind. The worship of Dharma rajan is in opposition to Rama the hero among the Bramins. Bramins have nothing to do with these temples. Among rock temples of Mauvellipore [seven pagodas] are the raths or monolithic temples of the five Pandavas and of their wife Drowpady. Dharma rajan was an epithet of Yoodhishtiran the eldest of the five Pandavas of Cashmere or Central asia; hence much confusion in the minds of the people, as above indicated [mahabhaurat, matam].——*Dharma shastram* (धर्मशास्त्र - dharmashástra, San.). From (dharma, san. duty + shástra, san. code). Consisting of text-book, commentaries and digests. A work on the whole body, or on particular subjects, of Hindoo law. The three principal topics of such works are:—auchauram, rules of conduct; vyavahauram, judicature; and prauyaschittam, penance. Forty-seven Dharma shastrams are enumerated by sanscrit authors, and of these the following twenty are known to be still extant:—Angiran, Atry, Aupastamban, Cautyauyanan, Dacshan, Gowtaman, Haureetan, Likhitan, Menoo, Oosbanan, Parausharan, Samvartan, Shankhan, Shautautapan, Vishnoo, Brihaspaty, Vyausan, Vasishtan, Yanyavalcyan, Yaman. Menoo the most important, Yanyavalcyan next [shastram].——*Dharmashaulay* (धर्मशाला - dharmashálá, San.), From (dharma, san. charity + shálá, san. hall). A place of accommodation for travellers and pilgrims [choultry, moosaufer khana].——*Dharmavaram* (ధర్మవరము - dharmavaramu, Tel.). See sep. title.——*Dharna* (دهرنا - dharná, Hind.). From (dhri, san. to restrain). Sitting at the door of a house to compel payment of a debt. The person observes a strict fast, and if the suitor were to perish the consequences of the sin would fall upon the other. There is a similar practice at the door of a temple until attendant priest assures the person his desire will be granted. This mode of harassing is now controlled by law [maryauday].——*Dhauracote* (ధారాకోట - dhárákóta, Tel. dhárákót *). From (dhárá, san. stream + kóta, san. fort). Ancient zemindarry, Village; Ganjam dist., Zemindarry tract; pop. 24,347; square miles 132; lat. of village 19° 38′; long. 84° 37′; from Chetterpore W.N.W. 33 miles; from Russellcondah S. 20 miles. On the Rooshcoolya, adjoining Bodagooda on the north and Goomsoor on the east. Formerly a part of the ancient Khidishingy zemindarry, together with the neighbouring divisions of Sooradah, Bodagooda and Shergadah. The name of the first Rajah of Khidishingy was Sobab chendra sing, who is said to have ruled over the country from A.D. 1168 to 1206. In A.D. 1476 Boliyar sing divided the Khidishingy country. To Damona sing, the son of his eldest son Gangadro pattoo

coomonaro, he gave the Bodagooda talook. To his second son Haddoo sing, he gave Dhauracote. To his third son Soonda danoo sing, he gave Sooradah. He kept Shergadah for himself. The zemindarry is divided into the three mittahs [q.v.] of Conoonagodo, Jahada and Sahasrango. The present zemindar [q.v.] is Shree braja soondara sing. Peshcush Rs. 24,462.——*Dhauranay* (धारणा - dháraná, San.). From (dhri, san. to hold). Fixation of thought. One of the eight means of mental concentration practised in Yogam [q.v.]. Sheiva yogies, enumerate nine Dhauranays, viz.:—"*a*" [Nauma dhauranay, name meditation or worship of supreme being in the form of an image under a given name;—"*b*" Mauya dhauranay, mauyay meditation or worship of supreme being who is unlimited and without form, accompanied by entire renunciation of the world;—"*c*" Bhaida dhauranay, change meditation or exercise of the yogy [q.v.] to restrain his bodily affections and by controlling his bodily airs to alter the position of his heart;—"*d*" Muntra dhauranay, spell meditation or worship of shiva by the five-lettered muntram [q.v.] namshivauya;—"*e*" Chatooranga dhauranay, four member meditation or meditation on the supreme being, as when the yogy unites the faculties of his mind with the four constituents of the body, earth, water, fire and wind; this is done when reason and fire, reflection and wind, will and water, are joined with resolution or passion represented by earth, and all co-operate to fix the mind in the air, the seat of bramh [q.v.];—"*f*" Shabda dhauranay, word meditation or continual meditation of the sacred syllable om [q.v.];—"*g*" Vastoo dhauranay, existence meditation or mental perception of bramh;—"*h*" Vajra dhauranay, worship of shiva only in the lingam [q.v.], rejecting the lower passions which represent bramha and vishnoo;—"*i*" Chitra dhauranay or meditation when approaching assimilation to the deity, by gaining a knowledge of the twenty-six properties [tatwam] of the body [shareeram], the soul [autmam] and the supreme being, after this the soul arrives at pure spiritual knowledge [nyaunam] and is emerged in the deity [matam].——*Dhauray* (धारा - dhárá, San.). From (dhri, san. to hold) [dharmam]. Holding. Stream [caulvye, vycaul].——*Dhaurla* (ధార్ల - dhárla, Tel.). Locative plural. Suffix in place names; as Punchadhaurla, meaning five streams.——*Dheiryam* (धैर्य - dhairya, San.). From (dhri, san. to hold) [dharmam]. Courage. Dheirya lutchmy is the goddess thereof. Dheiryanautan, from (nát'ha, san. lord) is Hindoo 2nd or pers. name; common among non-bramins [peyar].

DHARAUPOORAM (தாராபுரம் - tárápuram, *Tam.* dhárápuram*). From (dhárá, san. stream + pura, san. town) [dhauray]. From the position on the amravatty. Sanscrit name (virátapura), meaning virautan, the mythological king + town.——**(1)** Talook, Coimbatore district. Tahsildar's pay Rs. 200. Area 830 square miles. Population 249,221. Language Tamul. S. of district, forms part of sub-division. Bounded S. by Pulney talook, Madura district; E. by Caroor; W. by Pulladam and Oodamalpett; and N. by Erode, from which it is separated by Noyil. A peculiarity is the immense inam [q.v.] area. Undulating plain sloping generaly E. towards Cauvery, but with a local water-shed [nadee] near Caungyam falling to Noyil on N. and Amravatty on S. These two rivers, especially Amravatty, drain the talook into the Cauvery. The former is only occasionally in flood, the latter frequently, but at varying heights from May to March. There are two or three petty hills, of which Shivamullay is a landmark and sacred place. The climate is tolerably good, by the end of May S.W. monsoon [q.v.] dispels heat. Being immediately opposite to Palghaut gap, the wind is furious during June and July; but the climate is then healthy and tolerably invigorating. During N.E. monsoon from November to February, heavy mists and chill winds are frequent and fever prevalent. This is also season for cholera. Rainfall inconsiderable. No natural forests or jungles. Talook has only palmyras and the commonest jungle timber. Soils, of low productive power, are gravelly, stony, and sandy, with the usual loams in bottoms. The surface of the south is largely composed of limestone [choonam cull] more or less agglomerated, as especially in the west. Immense fields of calcareous tufa in some places cover the surface in continued masses, the strata being often many feet thick and involving small masses of quartz [ven cull] and other stones. No black-cotton soil [regar]. Aquamarine was found at Padiyore near Caungyam in beginning of century, but mine exhausted. Corundum [q.v.] near Caungyam; and quartz crystals, limpid or amethystine. Caungyam breed of cattle [maud] and ponies are widely known. Chief crops on dry lands are three and four year cotton [q.v.], cumboo [bajrah], cholum [q.v.], gingelly [q.v.], and pulses [dholl]; on garden lands cholum, cumboo, raggy [q.v.] and tobacco [pogauk]; on wet lands paddy [q.v.], raggy, sugar-cane [q.v.], and plantains [q.v.]. In Caungyam division cholum and gingelly are cultivated. Gram grown in N.E. monsoon. Tobacco good, but coarse. Fodder crops in parts especially in Caungyam. Jaggery [q.v.] and toddy [q.v.] produced, especially in Caungyam and Moolanore neighbourhoods. A few pumplemoses [pummelow] near Caungyam. Jaggery and sugar are made and usual local manufactures of cloth, carts, pots [chatty], bricks [shengal], &c. Trade is considerable only at Dharaupooram. Rivers are Amravatty, Noyil, and Ooppaur; the first crossed by six anicuts [q.v.] supplying irrigation channels [q.v.]. Numerous private wells. The channels are apt to fall very low in September and after December. Colinjivaudy channel is divided by a dam near Colinjivaudy into three separate channels, viz., Colinjivaudy, Nelambore, and Veerautchimungalam. Cauttangauny tank, fed from the Noyil by an anicut, gets a supply several times during the year, and is seldom dry; two crops, the first being usually cumboo, are regularly raised. Congore tank in the extreme south is of little importance. Places of archæological interest:—Arsanpolliem, Aulambaudy, Aurtozhvoo, Carcanpolliem, Caudiyore, Caungyam, Cauttangauny, Comarapolliem, Cottanore, Dharaupooram, Ganapatipolliem, Keeranore, Mailmoogam, Marootoray, Maumbaudy, Mettapolliem, Moottore, Mungalaputty, Nandavanampolliem, Nauttanpolliem, Nelaly, Nezhooly, Nuttacaudiyore, Oothiyore, Oottamapolliem, Padiyore, Paranjervaly, Paupiny, Permiyam, Putchapolliem, Shadaiyanpolliem, Shivamullay, Toppanpolliem, Tumbooreddipolliem, Vellacoil, Vellíyarsal. Principal trig. stations:—Canappoly, Cautpolliem, Naulcauny, Oothiyore, Putchapolliem, Tirmangaradoo. The leading places, &c., in the talook are the following.——*Amravatty* (அமராவதி - ámarávathi, Tam.). See sep. title.——*Canappoly* (கனப்போலி - kanappoli, Tam.). From (kanai, tam. closeness + poli, tam. field bank). Otherwise N.W. end, Coimbatore base. Trig. station; lat. 11° 00′ 09·19″; long. 77° 39′ 14·09″; height 1,017 feet; from Dharaupooram N.N.E. 19 miles; from Paupiny W.S.W. 2¼ miles. ——*Caungyam* (காங்கயம் - kángayam, Tam.). See sep. title. ——*Cautpolliem* (காட்டுப்பாளையம் - káttuppálaiyam, Tam.). From (káda, tam. forest + pálaiyam, tam. camp). Otherwise S.E. end, Coimbatore base. Trig. station; lat. 10° 56′ 38·65″; long. 77° 43′ 18·35″; height 879 feet; from Dharaupooram N.N.E. 17 miles; from Vailampolliem E.S.E. 1 mile.——*Colinjivaudy* (கொளிஞ்சிவாடி - koliñjivádi, Tam.). From (koliñji, tam. jungle gram, tephrosia purpurea, pers. + vádi, tam. enclosure). Village; pop. 1,437; acres 818; lat. 10° 44′; long. 77° 35′; from Coimbatore E.S.E. 43 miles; from Dharaupooram E. 1 mile. Suburb of Dharaupooram with Shiva temples and inscriptions. ——*Coondalam* (குண்டலம் - kundalam, Tam.). Means circle. Village; pop. 2,716; acres 9,517; lat. 10° 50′; long. 77° 30′; from Coimbatore E.S.E. 35 miles; from Dharaupooram N.W. 9 miles. Shiva temple and weekly market.——*Cunnivaudy* (கன்னிவாடி - kannivádi, Tam.). From (kanni, tam. girl + vádi, tam. enclosure). Village; pop. 3,865; acres 8,440; lat. 10° 49′; long. 77° 50′; from Coimbatore E.S.E. 57 miles; from Dharaupooram E.N.E. 18 miles. On road to Caroor. Mud fort in ruin.——*Dalavoyputnam* (தளவாய்ப்பட்டணம் - talaváyppattanam, Tam.). From (talaváy, tam. commander + pattana, san. town). Village; pop. 4,564; acres 6,720; lat. 10° 40′; long. 77° 32′; from Coimbatore S.E. 42 miles; from Dharaupooram S.W. 5 miles. On road to Oodamalpett. Vishnoo temple.——*Dharaupooram* (தாராபுரம் - tárápuram, Tam.). See below.——*Moolanore* (மூலனூர் - múlanúr, Tam.). From (múla, san. root, epithet of shiva + úr, tam. village). Village; pop. 7,803; acres 18,367; lat. 10° 48′; long. 77° 45′; from Coimbatore E.S.E. 53 miles; from Dharaupooram E.N.E. 13 miles. Shiva temple. Weekly market. ——*Naulcauny* (நாலுகாணி - nálugáni, Tam.). From (nál, tam. four + káni, tam. landed estate). Trig. station; lat. 10° 53′ 53·31″; long. 77° 39′ 31·19″; from Cambaliyamputty N.N.E. 1½ mile; from Dharaupooram N.N.E. 13 miles.——*Noyil* (நொய்யல் - noyyal, Tam.). See sep. title——*Ooppaur* (உப்பாறு - uppáru, Tam.). From (uppu, tam. salt + áru, tam. river). River. Rises in Anamullays, descends in the Vettacaurenpoothore frontiers and empties into Auliyaur near Anamullay village. Bridged near Dharaupooram at the junction of the roads from Caungyam, Pulladam, and Tirpore.——*Oothiyore* (ஊதியூர் - úthiyúr, Tam.). From (úthi, tam. to blow the bellows + úr, tam. village). Village; pop. 3,121; acres 7,048; lat. 10° 53′; long. 77° 34′; from Coimbatore E.S.E. 39 miles; from Dharaupooram N. 11 miles. Two old Shiva temples on small hill. Trig. station; lat. 10° 53′ 05·99″; long. 77° 33′ 38·06″; height 1,275 feet; from Dharaupooram N. 11 miles; from Oothiyore S.W. ⅛ mile.——*Palayacottah* (பழையகோட்டை - pazhaiyagóttai, Tam.). From (pazhaiya, tam. old + kóttai, tam. fort). Village; pop. 2,821; acres 8,656; lat. 11° 04′; long. 77° 44′; from Coimbatore E.N.E. 49 miles; from Dharaupooram N.N.E. 25 miles. Cattle and pony breeding centre.——*Putchapolliem* (பச்சாப்பாளையம் - paççáppálaiyam, Tam.). Means green village or village of shiva the green-haired god. Village; pop. 4,860; acres 12,383; lat. 10° 58′; long. 77° 40′; from Coimbatore E. 45 miles; from Dharaupooram N.N.E. 18 miles. Old Shiva temple. Two dolmens [codaycull]. Trig. station; lat. 10° 59′ 42·55″; long. 77° 39′ 53·80″; height 971 feet; from Dharaupooram N.N.E. 19 miles; from Paupiny S. 2½ miles.——*Shivamullay* (சிவமலை - shivamalai, Tam.). Means shiva's hill. Hill; lat. 11° 02′; long. 77° 35′; from Coimbatore E. 39 miles; from Dharaupooram N. 20 miles. Two temples. Famous Soobramanya sawmy temple, resorted to by Vellaula. ——*Tirmangaradoo* (திருமண்கரடு - tirumangaradu, Tam.). From (tiru, tam. sacred + man, tam. earth + karadu, tam. rough ground). Trig. station; lat. 10° 58′ 25·44″; long. 77° 42′ 12·58″; height 970 feet; from Dharaupooram N.N.E. 18 miles; from Veera cholapooram S. 2 miles.——*Veerautchimungalam* (வீராச்சிமங்கலம் - viráççimangalam, Tam.). From (víra,

san. hero + ádchi, tam. possession + mangala, san. prosperity). Means the village given to a hero. Village; pop. 2,829; acres 1,849; lat. 10° 46′; long. 77° 36′; from Coimbatore E.S.E. 43 miles; from Dharaupooram N.E. 3¼ miles. Vishnoo temple.——*Vellacoil* (வெள்ளக்கோவில் - vellakkóvil, Tam.). From (vellai, tam. white + kóvil, tam. temple). Village; pop. 6,359; acres 13,471; lat. 10° 57′; long. 77° 46′; from Coimbatore E. 51 miles; from Dharaupooram N.E. 19 miles. On Caroor road with travellers' bungalow. Old Shiva temple with inscriptions and also a dolmen. Four miles north is a temple much frequented. **——(2)** Town, Talook head-quarters; Coimbatore dist., Dharaupooram tal.; pop. 7,680; acres 3,597; lat. 10° 44′; long. 77° 34′; from Coimbatore E. 42 miles; from Erode S.S.W. 43 miles; from Madras S.W. 250 miles; from Ootacamund S.E. 71 miles; from Pollachy E.N.E. 35 miles; from Suttimungalam S.S.E. 56 miles. On left bank of Amravatty, in a fine plateau of open country which stretches nearly to the Pulneys some fifteen miles south. A channel from the river bisects the town. Roads converge from every quarter. In 1667 and again in 1746 taken from Madura by Mysore. In the campaigns with Hyder ally and Tippoo sahib it was a point of strategical importance, being captured by Colonel Wood in 1768; retaken by Hyder in the same year; again occupied by the British in 1783; ceded by the treaty of Mangalore, and finally resumed in 1790 by General Meadows. In 1792 the fort was dismantled. The town nearly disappeared, but rebuilt after 1799 and made head-quarters of southern division. Also for a few years seat of Zillah [q.v.] court; transferred to Coimbatore in 1828. Old Shiva temple with inscriptions. Weekly market. Station of Roman catholic and Wesleyan missions.

DHARMANAM (धर्मण - dharmana, *San.*). From (dhanvá, san. dry soil) [dhan]; from habitat. Botanically the Grewia genus, tiliaceæ [vricsham, 27]. Shrubs or small trees; leaves simple, usually serrated; flowers have five sepals, which are colored on the inside and often hairy outside; and five petals; fruit consists of one to four stones, each containing one or two seeds; leaves of some species eaten by cattle; many species yield good fibres; many produce edible fruits; genus is very scattered in vernacular nomenclature. The species best known to the natives are:—abutilifolia [bird tadda], asiatica [falsah], excelsa [small tadda], hirsuta [bran plant], microcos [abrony], orbiculata [round-leaved tadda], orientalis [female bair], pilosa [dog bran plant], salvifolia [jaurah], tilliæfolia [tadda]. Other s. indian species indigenous or naturalized are:—bracteata, columnaris, diplocarpa, emarginata, lævigata, polygama, populifolia, villosa.

DHARMAPOORY (دھرمپوری - dharampúrí, *Hind.*; தருமபுரி - tarumappuri, *Tam.* dharmapuri*). From (dharma, san. name of a king + purí, san. town) [dharmam]; called after local ruler dharma rajah. Ancient name (tagadúr), meaning foliage village.**——(1)** Talook, Salem district. Tahsildar's pay Rs. 175. Most southerly of talooks of Sub-collector's division, and forms portion of ancient province of Baramahaul [q.v.]. Area 941 square miles. W. of district. Between N. lat. 11° 54′ and 12° 26′ and E. long. 77° 43′ and 78° 20′. Extreme length north to south about 35 miles, and extreme breadth east to west about 34 miles; average being 28 and 26 miles, respectively. Population 18,442. Languages Tamul, Teloogoo, and partly Canarese. Bounded north by Oossoor and Krishnagherry talooks; west by Oossoor talook and Bhawauny talook, Coimbatore district, the Cauvery dividing it from the latter; south by Omalore division of Salem talook, from which it is separated by Toppoor river; and east by Krishnagherry and Ootancaray talooks. Entered from the south by the Toppoor pass. Average elevation, from 1,500 to 1,700 feet. The talook is sparsely wooded towards Pennagaram, but near the hills the jungle grows richer. The talook is not wholly hill-girt, the north-eastern portions being carried on into the plains which mark the Ponniaur valley, and extend into Krishnagherry and Ootancaray talooks. The streams traversing the talook follow for the most part the bases of the hill ranges. Soil is principally ferruginous loam and sand with, in the valleys, black alluvial clay and, in the immediate neighbourhood of Dharmapoory, cotton soil [regar]. Quartzose gravel is commonly found in combination with the inferior classes of sandy soil. In many places the earth is strongly impregnated with saltpetre [shorah] and soda salts [munn cauram]. Principal industries are husbandry, weaving, trade in grains and money dealing, carpentry and the calling of ironsmith and goldsmith. Chief exports are paddy [q.v.], gram [q.v.], gingelly [q.v.] seed, tamarind [q.v.] and cocoanuts [q.v.]; principally to Bangalore, Madras, Negapatam and Trichinopoly. Imports are salt [ooppoo], jaggery [q.v.], wheat, areca-nut, tobacco [pogauk], pulses [dholl], avaray [country bean], saffron [country saffron], ground-nut [q.v.], and plantains; principally from Bangalore, Coimbatore and Vellore. Wet crops are paddy, sugar-cane [q.v.], cocoanuts, mostly grown in the valley of the Sanatcomauranuddy near Mauraundahully; betel [q.v.], areca-nut [q.v.], cholum [q.v.] and saffron to a small extent. In poonjah [q.v.] land raggy [q.v.], cumboo [bajrah], varagoo, [q.v.], shaumay [q.v.], cholum, tovray [common dholl], avaray, cadalay [bengal gram], payar [green gram], oolandoo [black gram], oil [yennay] seeds, nary payar [field gram], horse-gram, gingelly, cottamully [cassibor] and tobacco are grown. Wheat [geung] is cultivated on the Vattalamullay; cotton [q.v.], notwithstanding the abundance of soil suited to its production, is seldom grown, and indigo [q.v.] is unknown. A blue dye resembling the latter in many respects, but much inferior, is prepared somewhat largely from leaves of Veppaulay maram [paula indigo]. Iron [auhan] ore is the only mineral product. Pennagaram division is noted for Aulambaudy breed of cattle [maud]. Rivers are Cauvery, Chennaur, and Toppoor. Sungambasavan anicut [q.v.] and channel [q.v.], connected with the Chennaur, supply tank of same name. Small tributaries of the Ponniaur and Toppoor traverse the north-east portion and centre of the talook respectively. From the former of these is diverted the Poolamputty caulvye [q.v.]. The chief tanks are the Adamancottah, Annasaugaram, Colagattore, Dharmapoory, Jertalaub, Krishnapooram, Mauthemungalam, Shogattore, Sungambasavan and Yairpully tanks. There are seven ferries in the talook, viz., Bommasamoodram, Congambutty, Cottay sholapaudy, Lakkamputty, Maligay, Naugamaray and Sholapaudy. Camping grounds:—Dharmapoory, Adamancottah, Toppoor choultry, Shogattore, Palcode. Zemindarries:—Baivhully, Belagayapooram, Giddanhully, Gollahully, Hanoomantapooram, Mauraundahully, Mauthehully, Neccoondy, Noolahully, Paneycolam, Paupauraputty, Paupinaickamputty, Pullipatty, Pungoonuttam, Reddihully, Sookkanhully, Tirmalvaudy, Vailamputty, Veppilay. Places of archæological interest. Adamancottah, Cadatore, Caurimungalam, Collaputty, Covilore, Devarmookkoolam, Dharmapoory, Indore, Kerecodihully, Maligay, Mauraundahully, Mothore, Paupauraputty, Pauvily, Pennagaram, Peroombaulay, Pooliyamputty, Shookkamputty. Principal trig. station:—Caradigooddey. The leading places, &c., in the talook are the following.——*Adamancottah* (அதமங்கோட்டை - athamangóttai, Tam.). See sep. title.——*Annasaugaram* (அன்னசாகரம் - annaságaram, Tam.). From (anna, san. food + ságara, san. sea). Village; pop. 1,812; acres 566; lat. 12° 07′; long. 78° 13′; from Dharmapoory S. 1 mile; from Salem N. 31 miles.——*Baivhully* (ಬೇವುಹಳ್ಳಿ - bévuhalli, Can.). From (bévu, can. neem tree, melia azadirachta, linn. + halli, can. hamlet). Zemindarry, Village; pop. 216; square miles 18⅛; lat. of village 12° 18′; long. 78° 03′; from Dharmapoory N.W. 16 miles; from Salem N. 45 miles. Peshcush Rs. 1,605.——*Caradigooddey* (ಕರಡಿಗುಡ್ಡೆ - karadigudde, Can.). From (karadi, can. bear + gudde, can. hill). Trig. station; lat. 11° 59′ 31·24″; long. 77° 55′ 04·51″; height 1,984 feet; from Dharmapoory S.W. 22 miles; from Donneygooddeyhully S. 1 mile.——*Caurimungalam* (காரிமங்கலம் - kárimangalam, Tam.). From (kári, tam. blackness + mangala, san. prosperity). Canarese name (dandutimmanahalli), meaning army + timmana, proper name + village. Village; pop. 2,487; acres 1,830; lat. 12° 19′; long. 78° 15′; from Dharmapoory N. 12 miles; from Salem N. 45 miles. On the Krishnagherry road. Inhabitants chiefly Chetties, who trade in grain and oil-seed. Camping ground is indifferent. West is an inscription. Agricultural produce and cattle change hands at the weekly fair.——*Cauvery* (காவேரி - kávéri, Tam.). See sep. title.——*Chennaur* (செண்ணாறு - shennáru, Tam.). See sep. title.——*Cottagherry* (கோட்டைகிரி - kóttaigiri, Tam.). From (kóta, san. fort + giri, san. mountain). Hill; lat. 12° 19′; long. 77° 55′; from Dharmapoory N.W. 23 miles; from Salem N.N.W. 49 miles.——*Dharmapoory* (தருமபுரி - tarumappuri, Tam.). See below.——*Giddanhully* (ಗಿಡ್ಡನಹಳ್ಳಿ - giddanahalli, Can.). From (gidda, can. proper name + halli, can. hamlet). Zemindarry, Village; pop. 285; lat. of village 12° 15′; long. 78° 06′; from Dharmapoory N.W. 11 miles; from Salem N. 41 miles. Peshcush Rs. 293.——*Gollahully* (ಗೊಲ್ಲಹಳ್ಳಿ - gollahalli, Can.). From (golla, can. a cowherd + halli, can. hamlet). Zemindarry, Village; pop. 254; lat. of village 12° 08′; long. 78° 04′; from Dharmapoory W. 10 miles; from Salem N.N.W. 34 miles. Peshcush Rs. 255.——*Haleypoora* (ಹಳೇಪುರ - halépura, Can.). From (hale, can. old + pura, san. town). Village; pop. 120; lat. 12° 07′; long. 77° 35′; from Dharmapoory W. 20 miles; from Salem N.N.W. 35 miles. A Vishnoo temple with annual festival.——*Hanoomantapooram* (அனுமந்தபுரம் - anumandappuram, Tam.). From (hanumán, san. the long-jawed monkey chief + pura, san. town). Zemindarry, Village; pop. 841; square miles of village 5⅞; lat. of village 12° 20′; long. 78° 10′; from Dharmapoory N.N.W. 14 miles; from Salem N. 46 miles. Peshcush Rs. 1,455.——*Hogeycull* (ಹೊಗೆಕಲ್ಲು - hogenakallu, Can.). See sep. title.——*Maudehully* (ಮಾದಹಳ್ಳಿ - mádehalli, Can.). From (mádiga, can. chuckler + halli, can. hamlet). Zemindarry, Village; pop. 507; square miles 2$\frac{3}{16}$; lat. of village 12° 12′; long. 78° 06′; from Dharmapoory N.W. 8¼ miles; from Salem N. 38 miles. Peshcush Rs. 681.——*Mauraundahully* (ಮಾರಾಂಡಹಳ್ಳಿ - márándahalli, Can.). From (máránda, can. proper name + halli, can. hamlet).—"*a*" Zemindarry; pop. 985; square miles 18$\frac{1}{16}$; between lat. 12° 20′ and 12° 27′; long. 78° 00′ and 78° 04′. Peshcush Rs. 1,744.—"*b*" Village; lat. 12° 24′; long. 78° 03′; from Dharmapoory N.N.W. 21 miles; from Salem N.N.W. 51 miles. Old fort and Shiva temple.——*Neccoondy* (நெக்குந்தி - nekkundi, Tam.). From (ne, tel. good + gondi, tel. narrow pass). Zemindarry, Village; pop. 324; lat. of village 12° 09′; long. 77° 56′; from Dharmapoory W. 19 miles; from Salem N.N.W. 38 miles. Peshcush Rs. 2,351.——*Noolahully* (ನೂಲಹಳ್ಳಿ - nulahalli, Can.). From (núlu, can. thread + halli,

can. hamlet). Zemindarry, Village; pop. 805; square miles 13¾; lat. of village 12° 05'; long. 78° 13'; from Dharmapoory S. 3¾ miles; from Salem N. 29 miles. Peshcush Rs. 2,498.——*Palcode* (பாலக்கோடு - pálakkódu, Tam. pálakód *). From (pál, tam. milk + kódu, tam. peak). Sanscrit name (kshírapurí), meaning milk town. Ancient name (tambigavundenhalli), meaning tumby gownden, proper name + village. Town; pop. 3,621; acres 441; lat. 12° 18'; long. 78° 07'; from Dharmapoory N.N.W. 14 miles; from Salem N. 45 miles. On the Oossoor road. Water is good and abundant. Public bungalow. Large chuttram [q.v.]. No good camping-ground in the neighbourhood. Fruit, cocoanuts and betel-leaf, the produce of the Sanatcomauranuddy basin, is sold at the weekly market. Large trade in skins [chamrah] and grain.——*Paupauraputty* (பாப்பாரப்பட்டி - páppárappatti, Tam.). From (páppán, tam. bramin + patti, tam. cattle fold).—"*a*" Zemindarry; square miles 5$\frac{9}{16}$.—"*b*" Village; pop. 937; lat. 12° 13'; long. 78° 06'; from Dharmapoory N.W. 10 miles; from Salem N.N.W. 39 miles. Bramin village reclaimed, as tradition says, some 500 years ago from the jungles by Hiranya iyer, a Carnatic bramin. Vishnoo temple with inscription. Most of the Bramins, Carnautacas, are reputed descendants of Hiranya iyer. Peshcush Rs. 690.——*Paupinaickamputty* (பாப்பிநாயகம்பட்டி - páppináyagambatti, Tam.). Means paupinaicken's village. Zemindarry, Village; pop. 1,354; square miles 20$\frac{1}{16}$; lat. of village 12° 14'; long. 78° 08'; from Dharmapoory N.W. 8 miles; from Salem N. 40 miles. Peshcush Rs. 1,837.——*Pennagaram* (பென்னாகரம் - pennágaram, Tam.). See sep. title.——*Pikkily mullay* (பிக்கிலிமலை - pikkilimalai, Tam.). From (pikili, tel. the hill bulbul + malai, tam. mountain). Hill; lat. 12° 16'; long. 78° 05'; from Dharmapoory N.W. 12 miles; from Salem N. 42 miles.——*Ponautchy bett* (ಪೊನಾಚ್ಚಿಬೆಟ್ಟ - ponáççibetta, Can.). From (ponáççi, can. proper name + betta, can. hill). Hill.——*Pulliputty* (பள்ளிப்பட்டி - pallippatti, Tam.). From (palli, tam. member of the caste, so called + patti, tam. cattle-fold). Zemindarry, Village; pop. 370; lat. of village 11° 58'; long. 77° 58'; from Dharmapoory S.W. 20 miles; from Salem N.W. 27 miles. Peshcush Rs. 306.——*Pungoonuttam* (பங்குநத்தம் - pangunattam, Tam.). From (pangu, tam. portion + nattam, tam. village). Zemindarry, Village; pop. 346; square miles 27$\frac{3}{16}$; lat. of village 12° 07'; long. 78° 03'; from Dharmapoory W. 10 miles; from Salem N.N.W. 32 miles. Peshcush Rs. 1,519.——*Reddihully* (ರೆಡ್ಡಿಹಳ್ಳಿ - reddihalli, Can.). From (reddi, can. headman of village + halli, can. hamlet). Zemindarry, Village; pop. 444; square miles 15¼; lat. of village 12° 02'; long. 78° 13'; from Dharmapoory S. 6¾ miles; from Salem N. 26 miles. Peshcush Rs. 2,478.——*Sungambasavan* (ಸಂಗಮಬಸವ - sangamabasava, Can.). From (sangama, san. junction + basava, can. bull). Village; acres 660; lat. 12° 22'; long. 78° 05'; from Dharmapoory N.W. 18 miles; from Salem N.W. 49 miles. Site of an anicut now broken and damaged. Feeds a tank of same name.——*Tirmalvaudy* (திருமலைவாடி - tirumalaivádi, Tam.). From (tiru, tam. holy + malai, tam. hill + vádi, tam. enclosure). Zemindarry, Village; pop. 336; square miles 18$\frac{3}{16}$; lat. of village 12° 19'; long. 78° 01'; from Dharmapoory N.W. 18 miles; from Salem N.N.W. 47 miles. Peshcush Rs. 703.——*Toppoor* (தொப்பூர் - toppúr, Tam.). See sep. title.——*Vailamputty* (வேலம்பட்டி - vélambatti, Tam.). From (vél, tam. acacia tree, acacia arabica, willd. + patti, tam. cattle-fold). Zemindarry, Village; pop. 311; square miles 5¼; lat. of village 12° 12'; long. 78° 06'; from Dharmapoory N.W. 8 miles; from Salem N. 37 miles. Peshcush Rs. 180.——*Vattalamullay* (வத்தலமலை - vattalamalai, Tam.). From (vartula, san. circle + malai, tam. mountain). Hill; lat. 12° 02'; long. 78° 16'; from Dharmapoory S.E. 7 miles; from Salem N. 26 miles. A red dye [shauyam] is manufactured for coloring silk [puttoo].——*Veppilay* (வேப்பிலை - véppilai, Tam.). From (vémbu, tam. margosa tree, melia azadirachta, linn. + ilai, tam. leaf). Zemindarry, Village; pop. 282; lat. of village 12° 13'; long. 78° 05'; from Dharmapoory N.W. 10 miles; from Salem N.W. 39 miles. Peshcush Rs. 191.——**(2)** Town, Talook head-quarters; Salem dist., Dharmapoory tal.; pop. 7,090; lat. 12° 08'; long. 78° 13'; from Madras W.S.W. 156 miles; from Namcull N. 62 miles; from Oossoor S.S.E. 47 miles; from Salem N. 33 miles; from Tripatore S.W. 37 miles; from Yercaud N.N.W. 25 miles. Healthy. Regularly laid out in a level plain near an old fort formerly one of Tippoo's garrisons. The water is generally brackish. A large circular tank west of the town. Near this is a tank built by Narsiah. Some fine trees line its banks and form a favorite camping-ground. Until 1688 Dharmapoory belonged to the kingdom of Aura, but in that year was annexed by Mysore. In 1768 it was captured by Colonel Wood, but re-occupied by Hyder ally until the signature of peace. For some years residence of Sir Thomas Munro. Two ancient Vishnoo temples, in one of which are two inscriptions. On the banks of the lake near the old town are two carved statues of Rama and Lutchmanan with inscriptions. In Virpautchapooram, a suburb, is an inscription recording a grant of the village by a local chief in the reign of Shreerungan of Vijianugger in A.D. 1619. The town is inhabited chiefly by Mussalmans, trading in skins, and by weavers. Trade in grains and oil-seeds.

DHARMAVARAM * (ధర్మవరము - dharmavaramu, *Tel.*). From (dharma, san. piety + pura, san. city) [dharmam].——**(1)** Talook, Anantapore, tahsildar's pay Rs. 200. Area 1,226 square miles; pop. 118,724; language Teloogoo. Centre of district. Boundaries:—North, Royadroog talook of Bellary west of river Pennair and Anantapore talook from east of river Pennair to near Cuddapah district frontier. East, Anantapore talook, Cadiry talook of Cuddapah district, and Penoocondah talook east of Chitrauvaty river. South, Penoocondah talook between Pennair and Chitrauvaty river, and Pauvoogada talook of Mysore west of Pennair. West, Mysore and Royadroog talook of Bellary. Level, except on the eastern frontier and in the south and west. The highest hill is at Darshimala, about seven miles south of the cusbah [q.v.]. There are other high hills at Calyaundroog and Coondarpy droog. The soil is chiefly red and gravelly, and there is very little regar [q.v.]. The principal crops are horse-gram [q.v.] and paddy [q.v.], and in smaller quantities raggy [q.v.], cholum [q.v.], and castor [aumanac] oil. It is estimated that one-fourth of the paddy grown is sent to Cuddapah and the adjoining black land talooks. Oil-seeds and cholum are received in exchange. Very little industry and commerce, beyond agriculture. Hindoopore extension and Dharmavaram-Tripatty railway pass through the talook. Compared with the size of the talook the irrigation works are few and insufficient. Principal tanks:—Canoomoocla, Coontimaddy, Cumbadore, Dharmavaram, Malyanore, Moolcalaid, Naugasamoodram. Principal camping grounds:—Chennacottapully, Daudalore. Places of archæological interest:—Calyaundroog, Canagaunpully, Canoomoocla, Chennacottapully, Chintarapully, Conaupooram, Coondarpy droog, Cumbadore, Daudalore, Dharmavaram, Garoodapooram, Lutchmanapully, Maurlahully, Mullinayanipore, Narsapooram, Nasancote, Naugasamoodram, Paulore, Rowla cheroo, Togracoonta. Principal trig. stations:—Condapully, Coondarpy, Devaudelbetta, Ooravacondah. The leading places, &c., in the talook are the following.——*Calyaundroog* (కళ్యాణదుర్గము - kalyánadurgamu, Tel.). See sep. title.——*Canoomoocla* (కనుముక్కల - kanumukkala, Tel.). From (kanama, tel. pass + mukku, tel. nose); opposite to a pass. Village; pop. 1,781; lat. 14° 18'; long. 77° 48'; from Anantapore S.S.E. 27 miles; from Dharmavaram S. 7¾ miles. Contains a tank.——*Chennacottapully* (చెన్నకొత్తపల్లి - chennakottapalli, Tel.). From (chenna, tel. proper name, chennappa + kotta, tel. new + palle, tel. village). Village, travellers' bungalow; pop. 1,611; lat. 14° 16'; long. 77° 40'; from Anantapore S. 28 miles; from Dharmavaram S.W. 12 miles. On Hindoopore railway line.——*Chitrauvaty* (చిత్రావతి - chitrávati, Tel.). See sep. title.——*Condapully* (కొండపల్లి - kondapalli, Tel.). From (konda, tel. hill + palli, tel. village). Trig. station; lat. 14° 31' 51·62"; long. 77° 26' 43·35"; height 2,259 feet; from Anantapore S.W. 17 miles; from Dharmavaram W.N.W. 23 miles; from Goontapully N.W. 2¼ miles.——*Coondarpy* (కుందర్పి - kundarpi, Tel.). See sep. title.——*Coontimaddy* (కుంటిమద్ది - kuntimaddi, Tel.). From (kunta, tel. tank + maddi, tel. tree, terminalia arjuna, bedd.). Village; pop. 1,242; lat. 14° 20'; long. 77° 38'; from Anantapore S. 23 miles; from Dharmavaram S.W. 10 miles. Contains a tank.——*Cumbadore* (కంబదూరు - kambadúru, Tel.). From (kambadamu, tel. cultivation + úru, tel. village). Village; pop. 1,596; lat. 14° 21'; long. 77° 16'; from Anantapore S.W. 34 miles; from Dharmavaram W. 33 miles. 8 miles west of Peroor bungalow. Has a tank irrigating 900 acres. Four old temples, one built by a Chola king.——*Darshimala* (దరిశిమల - darishimala, Tel.). From (dari, tel. border + mala, tel. hill). Village; pop. 286; lat. 14° 22'; long. 77° 52'; from Anantapore S.E. 25 miles; from Dharmavaram E.S.E. 7½ miles. Among wooded hills.——*Devaudelbetta* (దేవాదులబెట్ట - dévádulabetta, Tel.). From (déva, san. god + ádi, san. etcetera + betta, can. hill); hill of the gods and others. Trig. station; lat. 14° 33' 38·80"; long. 77° 10' 04·70"; height 2,434 feet; from Anantapore W.S.W. 34 miles; from Calyaundroog E.N.E. 1¾ miles; from Dharmavaram W.N.W. 41 miles.——*Dharmavaram* (ధర్మవరము - dharmavaramu, Tel.). See below.——*Malyanore* (మల్లియనూరు - maliyanúru, Tel.). From (malliya, tel. jasmine flower, jasminum sambac, ait. + úru, tel. village). Village; pop. 1,831; lat. 14° 15'; long. 77° 01'; from Anantapore W.S.W. 51 miles; from Dharmavaram W.S.W. 51½ miles. Has a large tank.——*Moolcalaid* (ములకలేడు - mulakalédu, Tel.). From (mulaka, tel. brinjaul, solanum ferox, linn. + vídu, tel. town). Village; pop. 3,139; lat. 14° 22'; long. 76° 58'; from Anantapore W.S.W. 50 miles; from Dharmavaram W. 54 miles. Has a tank irrigating 585 acres.——*Nasancote* (నసనకోట - nasanakóta, Tel.). From (narasanna, tel. proper name + kóta, tel. fort). Village; pop. 1,254; lat. 14° 21'; long. 77° 29'; from Anantapore S.S.W. 25 miles; from Dharmavaram W. 19 miles.——*Naugasamoodram* (నాగసముద్రము - nágasamudramu, Tel.). From (nága, san. proper name + samudra, san. ocean). Village; pop. 1,839; lat. 14° 19'; long. 77° 42'; from Anantapore S. 25½ miles; from Dharmavaram S.W. 8 miles. Contains a tank.——*Nyaumadala* (నేమద్దల - némaddala, Tel.). From (néma, san. enclosure + maddi, tel. terminalia arjuna, bedd.). Village; pop. 1,556; lat. 14° 16'; long. 77° 38'; from Anantapore S. 28½ miles; from Dharmavaram S.W. 14 miles. Coarse paper made from aloe [q.v.] fibre.——*Ooravacondah* (ఉరవకొండ - uravakonda,

Tel.). From (uravu, tel. beauty + konda, tel. hill). Trig. station; lat. 14° 15′ 46·62″; long. 77° 38′ 57·38″; height 2,193 feet; from Anantapore S. 29 miles; from Dharmavaram S.W. 13 miles; from Nyaumadala E. 1½ miles.——*Pennair* (పెన్నేరు - pennéru, Tel.). See sep. title.——*Peroor* (పేరూరు - pérúru, Tel.). From (péru, tel. large + úru, tel. village). Village, travellers' bungalow; pop. 1,434; lat. 14° 21′; long. 77° 24′; from Anantapore S.W. 28½ miles; from Dharmavaram W. 25¾ miles. On Pennair river and old Bellary road.——*Toomcherla* (తూముచెర్ల - túmúcherla, Tel.). From (túmu, tel. sluice + cherla, tel. village). Village; pop. 1,040; lat. 14° 32′; long. 77° 30′; from Anantapore S.W. 14 miles; from Dharmavaram W.N.W. 20 miles. Contains a tank. ——(2) Village, talook head-quarters; Anantapore dist., Dharmavaram tal.; pop. 6,836; lat. 14° 25′; long. 77° 46′; from Anantapore S.S.E. 19½ miles; from Bellary S.E. 73½ miles; from Gooty S. 48 miles; from Madras N.W. 200 miles; from Penoocondah N.N.E. 24¼ miles. On the Chitrauvaty river. Founded by Kriyashacty wodeya, and formerly fortified. Market of importance. Large tank irrigating 1,416 acres. The fort walls have been demolished. Vishnoo temple of great antiquity. Manufacture of silk [puttoo] cloths for women.

DHAU (धा - dhá, *San.*) [dhar]. To support.——*Danaicken* (டனயக்கன் - tanáyakkan, Tam.). Corruption from (dhananáyaka, san. wealth lord); epithet of coobairan [q.v.], lord of wealth. Proper name.——*Danaicken cottah* (டனயக்கன் கோட்டை - tanáyakkangóttai, Tam.). Means danaicken's fort. Village; Coimbatore dist., Suttimungalam tal.; acres 275; lat. 11° 26′; long. 77° 7′; from Coimbatore N. 30 miles; from Suttimungalam W.S.W. 13 miles. Formerly gave its name to a talook [q.v.]. Now almost deserted.——*Dhanacataca* (धनकटक - dhanakataka, San.). From (dhana, san. wealth + kataka, san. hill-village). One of Hwen thsang's nine S. indian kingdoms, his Tonakie-tse-kia. For identification with Dharanicottah, see vol. I (10) [charitram].——*Dhanacoty* (தனக்கோடி - tanakkódi, Tam.). From (dhana, san. wealth + kóti, san. crore). Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Dhanam* (धन - dhana, San.). From (dhá, san. to nourish) [dhau]. Wealth. Cattle. The plus sign. Female proper name [peyar]. Plant first term; from being valued for usefulness. Ex., where transl. is of second term:—Crotalaria juncea (dhanahári), carrying off; Cyperus rotundus (dhanakúta), heap; Pongamia glabra (dhanavriksha), tree. See gloss. paragrahs.——*Dhananjayan* (தனஞ்சயன் - tanañjayan, Tam.). From (dhana, san. wealth + jaya, san. victory). Conquering booty; epithet of Arjoonan. Hindoo 2nd or pers. name [peyar]. ——*Dhanaujee* (ಧನಾಜಿ - dhanáji, Can.). From (dhana, san. wealth + jí, hind. master). Hindoo 2nd or pers. name [peyar]. ——*Dhanyah* (دھنیا - dhaniyá, Hind.). From (dhánya, san. grain); from grain-like seeds. Coriander [cassibor].——*Dhaun* (دھان - dhán, Hind.). From (dhánya, san. grain). Rice in the husk. Goldsmith's weight. 2 jows = 1 dhaun, 4 dhauns = 1 goomchy [niray, 3 e]. Approximate actual value, 1 dhaun = $\frac{13}{32}$ grain. Same as Can. veesha tookkam, Tam. nelmany. See vol. I, 609.——*Dhaunmady* (دھان مڑی - dhánmarí, Hind.). From (dhánya, san. grain + marí, hind. field). Rice fields.——*Dhaunya cottay* (தானியக்கோட்டை - tániyakkóttai, Tam.). From (dhánya, san. grain + kóttai, tam. a measure). A land measure in Tinnevelly. The extent supposed to require a cottah [q.v.] of seed. It is about 1·62 acres.——*Dhaunyam* (धान्य - dhánya, San.; اناج - anáj, Hind.; ಧಾನ್ಯ - dhánya, Can.; ధాన్యము - dhányamu, Tel.; ധാന്യം - dhányam, Mal.; தானியம் - tániyam, Tam.). From (dhá, san. to support), life-supporter. Hind. from (anna, san. food). San. also (shúkadhánya), meaning awned or bearded grain. Tam. also (kathirdhánya), meaning ear + grain. Equivalent to cereal, otherwise cereal grasses; that is to say the Graminaceæ [vricsham, 156]; cultivated for their seed as food [dry grain, paddy]. Do not include the dholls or pulses [dholl]. Nine principal kinds are enumerated, the Navadhaunyam [q.v.]; small quantities of each of which are given to Bramins at festivals [pundigay]. Dhaunya lutchmy is the goddess of grain.——*Dhautmaulay* (धातुमाला - dhátumálá, San.). From (dhátu, san. root, in grammar + málá, san. garland). List of philological roots. Several works of this name.——*Dhautoo* (धातु - dhátu, San.; معدنیات - madaniyát, *Ar.*; دھات - dhát, Hind.; ಧಾತು - dhátu, Can.; ಧಾತು - dhátu, Too.; ధాతు - dhátu, Tel.; ധാതു - dhátu, Mal.; தாது - táthu, Tam.). Ar. from (madan, ar. mine). Mineral. Any natural production [dravyam] from mine or ore formed by the action of chemical affinities, and organized when becoming solid by the power of crystallization. One class of mineral products are the products of the earth itself; which are brought into use either in the state in which they are found, as colored earths, abruck [q.v.] slates, building stones, &c. [cull, munn]; or are rendered useful after peculiar treatment, such as metals [lóham] obtained by smelting, or lime [choonam] obtained by calcination. Another class are the substances distinguished as chemical substances, which are obtained from various minerals, earths, &c., after undergoing chemical processes of sublimation, distillation, solution, &c. [ooppoo, sarakk]. Compare Moolam the vegetable kingdom and Jantoo the animal kingdom.

DHAUMIN (دھامن - dhámin, *Hind.*). Rat-snake [q.v.].

DHAVAM (धव - dhava, *San.*). From (dhav, san. to flow) [dhoby]; from exudation. Botanically the Anogeissus genus, combretaceæ [vricsham, 55]. Trees or shrubs; leaves alternate, entire; flowers in globose heads; fruits small, dry, compressed, containing one seed. The species best known to the natives are:—acuminata [pauchimaun], latifolia [vekkauly].

DHEEMAR (دھیمر - dhímar, *Hind.*). From (dhívara, san. fisherman). A fisherman or one of bearer [boy] caste.

DHER (دھیر - dher, *Hind.*). Hindoo of low caste [pariah]. Compare:—Corvus culminatus (dheríkavvá), pariah crow; Herodias alba (dherbaglá), pariah crane. See gloss. paragraphs.

DHOBY (دھوبی - dhobí, *Hind.*). From (dháv, san. to wash) [dhavam]. The Hindostany name for the washerman caste [dhoty]. The corresponding terms are:—Tam. vunnaun, Tel. saucala, Can. agasa, Mal. veloottaidan. As forming a caste, various sub-divisions are recognised, which do not eat, drink, or marry together. No Hindoos, even the poorest, ever wash their own clothes; and this operation is always done by the professional caste. Dhobies first steam the clothes by hanging them in a bundle over a cauldron of boiling water; they are then taken to a stream or pond where they are thoroughly washed with the aid of fuller's earth [dhoby's earth]; the dhoby stands in the water, and taking a quantity of clothes by one end into his two hands he raises them aloft in the air and brings them heavily down upon a broad stone slab at his feet; this operation he repeats until the clothes are perfectly clean. There is a Hindostany proverb:—دھوبی کا گدا نہ گھر کا نہ گھاٹکا— "Like washerman's ass, neither of the house nor of the washing "ghaut [q.v.];" i.e., from pillar to post. There is a Tamul proverb:—தட்டாரச் சித்து தறிச்சித்து வண்ணாரச் சித்துக்கு வராது—"The skill of a goldsmith and of a weaver are not "equal to the tricks of a washerman;" i.e., substituting clothes. The dhoby is a member of the village corporation of twelve [balootah]; besides being obliged to wash and dry the ryot's cloth, he occasionally spreads a cloth in the choultry [q.v.] when any great man passes for his convenience, and carries links [pandam, masaul] at the religious processions [inam, jauty].——*Dhobin* (دھوبن - dhobin, Hind.). Washerwoman.——*Dhoby boolbool* (دھوبی بلبل - dhobíbulbul, Hind.). Muscicapinæ, muscicapidæ [macsha grauhy], dentirostres, insessores, aves [pacshy, 20], of naturalists [jantoo]. Fly catchers. The species best known to the natives is Erythrosterna leucura. Alias Muscicapa albicilla, parva; Rubecula tytleri; Saxicola rubeculoides; Synornis joulaimus. Resembles in habit the British robin.——*Dhoby's earth* (ऊष - úsha, San.; قلی - kilí, Ar.; طین گازری - tínigázurí, Pers.; سجی مٹی - sajjímattí, Hind.; چوڑ کی مٹی - chaurkimattí, Dec.; ಚೌಳು - chaulu, Can.; సున్నపుచవుడు - sunnaputsavudu, Tel.; உவர்மண் - uvarman, Tam.). Title from being used by washermen in bleaching. San. from (ush, san. to kill); as destroying vegetation. Ar. from (kili, ar. to cook in a frying pan). Pers. from (tín, ar. earth + gázur, pers. washerman). Hind. from (sajjí, hind. carbonate of soda + mattí, hind. earth). Dec. from (tsavudu, tel. saline earth + mattí, hind. earth). Tel. from (sunnamu, tel. lime + tsavudu, tel. saline earth). Tam. from (uvar, tam. salt + man, tam. earth). Title otherwise Fuller's earth. A whitish grey, sandy efflorescence [sowdoo]; covers country where decayed white granite [caroom cull] forms the surface soil; contains from 13 to 25 per cent. of crude carbonate of soda. Begins to accumulate in the dry weather, and after rains it can be scraped off the surface. By repeated boiling, and the addition of a little quicklime [choonam], the alkali [q.v.] is obtained of considerable strength. Used by dhobies and the lower castes for washing clothes; it has a softening effect on water and removes the dirt. A crude sort of soap in conjunction with lime is produced from this earth, known as choonam [q.v.] soap [sauboon], and sold as sabboo in the bazaars. Weavers and dyers use a solution of the earth as a mordant [cauram] in fixing the red dye [shauyam] of the chironjee [q.v.] bark. It is also employed in the manufactures of glass [cunnaudy, gauzoo] and country soap. In Malabar, where dhoby's earth is not known, the ashes of burnt vegetables [sujjeekhaur], chiefly cocoanut [q.v.] leaves, are used. Same in Ceylon. Dhoby's earth is distinct from Pooneer, which see.——*Dhoby kite* (دھوبی چیل - dhobíchíl, Hind.). From bright color. Same as Braminy kite.

DHOLE (अरण्यश्वान - aranyashvána, *San.*; कोळसन - kólasana, *Mahr.*; جنگلی کتا - janglíkuttá, *Hind.*; انجنگتن - anjingutan, *Malay*; ಶೀಳನಾಯಿ - shílanáyi, *Can.*; ಕೆನ್ನಾಯಿ - kennáyi, *Coorg*; రేచుకుక్క - rétsukukka, *Tel.*; ବୋଲିଆକୁକୁର - boliyakukuro, *Oor.*; ചെന്നായ - chennáya, *Mal.*; வேட்டைக்காரன் - véttaikkáran, *Tam.*). San. from (aranya, san. forest + shvána, san. dog). Mahr. from (kólá, mahr. jackal + shuna, san. dog). Hind. from (janglí, hind. wild + kuttá, hind. dog). Malay from (anjing, malay, dog + utan, malay, wild). Can. from (shílu, can. to tear + náyi, can. dog). Coorg from (kem, can. red + náyi, can. dog). Tel. from (rétsu, tel. to set on + kukka, tel. dog); setter-dog. Mal. from (chem, mal. red + náya, mal. dog). Tam. from (véttai, tam. hunting + kri, san. to do). Hind. also (bankuttá),

meaning forest dog; (sonkuttá), meaning golden dog; (rámkuttá), meaning beautiful dog. Tel. also (adavikukka), meaning jungle + dog. Tam. also (shennáy), meaning red + dog. Canis [shwaunam] dukhunensis, canidæ [cookooram], digitigrada, carnivora, mammalia [sastanam, 12], of naturalists [jantoo]. Alias Canis primærus; Cuon rutilans. General color bright rusty-red or rufous fawn color, paler beneath; ears erect, rather large, somewhat rounded at the tip; tail moderately brushed, reaching to the heels, usually tipped blackish; limbs strong; body lengthened. The wild dogs prey by night and by day, but chiefly by day. They unite to hunt down their victim, running by smell rather than by the eye. They kill the tiger [pooly].

DHOLL (शमीधान्य - shamídhánya, *San.*; دال - dál, *Hind.*; ಬೇಳೆ - béle, *Can.*; కాయధాన్యము - káyadhányamu, *Tel.*; പയർ - payar, *Mal.*; காய்த்தானியம் - káyttániyam, *Tam.*). Title from hindostany [dalam]. San. from (shamí, san. pod + dhánya, san. grain). Hind. from (dal, san. to split). Tel. from (káya, tel. pod + dhánya, san. grain). Tam. from (káy, tam. unripe fruit + dhánya, san. grain); pod grain. Tam. also (muthirai). The terms may be taken generally for pulses, or leguminous plants. Distinguish from dry grain [q.v]. Properly the pulse Phaseolus mungo, but applied to other kinds, the pea of which, especially when converted into a sort of coarse pease soup, enters largely into the food of the natives. The dholls contain a large proportion of an albuminate called legumin or vegetable casein, which is coagulable like casein; owing to their comparative indigestibility by man they are inferior as food to the flesh of animals and are incapable of being digested in sufficient quantity to support human life by themselves; added in small amount to starchy or fatty foods they are of great value; eaten for instance with rice [q.v.]; they keep well, although becoming harder by time and requiring more careful preparation; they are rich in sulphur [gandhac], potassium and calcium, but inferior to the cereals [dhaunyam] in magnesium and phosphoric acid; they require slow and protracted boiling, and, if old, are steeped and crushed before being cooked for food; when the seeds are fresh, the husk is always removed. There is a Teloogoo proverb:—అరికె తలిక కందిలేదు—"If arikey "[khoda millet] fails there will be dholl;" pulse instead of grain. The following are two key-lists in the briefest possible terms of the principal pulses of s. india for which vernacular names are known; further information must be traced in the glossary paragraphs through the small-type cross references at end of this volume; see also vricsham, 7, for the method of expressing the products, &c., of plants in the dravidian languages.—"*a*" Arachis hypogæa, ground nut; Cajanus indicus, common dholl; Canavalia ensiformis, hussar bean; Ceratonia siliqua, carob; Cicer arietinum, bengal gram; Cyamopsis psoralioides, chinese lablab; Dolichos biflorus, madras horse gram; Dolichos lablab, country bean; Ervum lens, lentil; Glycine soja, japanese cow gram; Lathyrus sativus, vetch; Mucuna pruriens, common cowitch; Phaseolus aconitifolius, moorman's gram; Phaseolus adenanthus, wild green gram; Phaseolus lunatus, country french bean; Phaseolus mungo, green gram; Phaseolus mungo, var. radiatus, black gram; Phaseolus trilobus, field gram; Phaseolus vulgaris, french bean; Pisum sativum, garden pea; Vicia faba, broad bean; Vigna catiang, cow gram.—"*b*" Bean, dolichos, vicia; Carob, ceratonia; Cow gram, vigna; Cowitch, mucuna; Dholl, cajanus; French bean, phaseolus; Gram, cicer, dolichos, glycine, phaseolus; Ground nut, arachis; Hussar bean, canavalia; Lablab, cyamopsis; Lentil, ervum; Pea, pisum; Vetch, lathyrus.——*Black dholl* (कालतुवरी - kálatuvarí, San.; ಕಾಡುತೊಗರಿ - kádutogari, Can.; కారుకంది - kárukandi, Tel.; காலியாந்துவரை - káliyánduvarai, Tam.). Title from appearance of seed. San. from (kála, san. black + tuvarí, san. dholl, cajanus indicus, spreng.). Can. from (kádu, can. wild + togari, can. dholl). Tel. from (káru, tel. black + kandi, tel. dholl). Tam. from (káli, tam. point de galle + tuvarai, tam. dholl). Tel. also (nélaolumu), meaning ground + ipomæa angustifolia, jacq.; (chiriulava), meaning small + horse-gram, dolichos biflorus, linn.; (kápuchikkudu), meaning wild; (núguchikkudu), meaning downiness; (nallagurigindza), meaning black + abrus precatorius, linn.; (gadichikkudu), meaning paddy field + dolichos lablab, linn.; (karraulava), meaning stick + dolichos biflorus, linn.; (errachikkudu), meaning red + dolichos lablab, linn. Tam. also (káttukkollu), meaning wild + dolichos biflorus, linn.; (karuppukkunri), meaning black + abrus precatorius, linn. Title otherwise Black goomchy, Wild horse-gram. Botanically the Rhynchosia genus, leguminosæ [vricsham, 48]. Herbs or undershrubs, usually with twining stems, and often sprinkled with small yellow resinous or grandular dots; leaves consist of three leaflets, the middle one having a long stalk; flowers yellowish, and disposed in racemes produced from the angles of the leaves; pod flattened, unequal-sided or sickle-shaped, containing two round seeds. The species best known to the natives are:—aurea, cana, cyanosperma, densiflora, heynei, minima, nummularia, rufescens, suaveolens, velutina, viscosa.——*Common dholl* (आढकी - ádhakí, San.; तूर - túra, Mahr.; तोरि - tóri, Conc.; شاض - sház, Ar.; شاخل - shákhul, Pers.; تور - tuvvar, Hind. and Dec.; ತೊಗರಿ - togari, Can.; ತೊಗರಿ - togari, Too.; కంది - kandi, Tel.; కందులొ - kandulo, Oor.; തുമര - tumara, Mal.; රටතෝර - ratatóra, Singh.; துவரை - tuvarai, Tam.). Mahr. from (tuvara, san. astringency). Hind., &c., from same. Singh. from (rata, singh. foreign + tóra, singh. cassia). Tam. from (tuvara, san. astringency). San. also (tuvariká), meaning astringent; (súpya), meaning used in making sauce. Hind. also (dál); (barítuvvar), meaning large dholl; (arhar); (pádkátuvvar), meaning wind producing dholl. Can. also (kariuddugida), meaning black pulse plant. Tel. also (peddakondakandi), meaning large + hill + dholl; (pótukandi), meaning male + dholl; (yerrakandi), meaning red + dholl. Tam. also (iyavai), meaning hill dholl. Title otherwise Angola pea, Arhar, Cajan pea, Candy plant, Catjang [q.v.], Congo pea, No-eye pea, Pigeon-pea, Red gram [cow gram], Sauce pea, Togary, Toor, Tovray, Two-colored dholl. Botanically Cajanus indicus, spreng., leguminosæ [vricsham, 48]. Cajanus, from (kachang, malay, pulse). Alias Cajanus bicolor, flavus; Cytisus cajan, pseudocajan. Erect shrub, 3–6 feet, softly pubescent, with tender branches; leaves pinnately trifoliolate; leaves oval, lanceolate, mucronate; calyx campanulate, somewhat bilabiate; lips nearly equal in length, upper one shortly bifid, lower one three-partite; segments slightly curved upwards; apices recurved; corolla papilionaceous; petals equal in length; vexillum broad, bicallous at the base; keel falcate; racemes axillary; pedicels slender, in pairs; legumes hirsutely pubescent, from 2 to 3 inches long and ¼ to ⅓ inch broad, three to five-seeded; flowers yellow; native of equatorial africa; cultivated here. Seldom sown alone, but mixed with early zonna [cholum], aurooga [khoda millet], raggy [q.v.], and corra [tinay] crops; cultivated in red soil; ground prepared in south from chittray or april to veiyaushy or may, on coromandel in ashaudham or july and shrauvanam or august, on w. coast from maidom or april to yedavam or may; the land is ploughed up three or four times and manure applied; seed sown in south in chittray or april with cholum or three months later in audy or july with varagoo, on coromandel in ashaudham or july and shrauvanam or august, on w. coast in maidom or april and yedavam or may with rice [q.v.] and in carcatacam [mausam] or july with raggy; sown mixed with the other seed broadcast while under growth; no treatment except weeding; full grown crop bushy, with red pods; cut after six or eight months; the bundles are brought to the threshing floor [calam] and kept under weights; the dry pods are removed from the plants and beaten with sticks to separate the seed; the seeds are then collected, mixed with red earth [shemmunn] to give them a color, and steeped in water till germination takes place; they are then dried in the sun for a couple of days and ground in a mill to break them up, when they are freed of the testa; the cotyledons are now called dholl. Chemical composition of the dholl with husk is water 13·3, albuminoids 17·1, starch 55·7, oil 2·6, fibre 7·5, ash 3·8, phosphoric acid ·9 per cent. Dholl is easily digested and is suitable for invalids; leaves are used in diseases of the mouth. Cattle eat the tender parts of the plant, both green and dry; the green pods are cooked into curries [q.v.]; the dholl also cooked into curries and cakes [poppadam] prepared from it; used by natives as a porridge and by europeans as an ingredient in kitcherry [q.v.]; similar to english split pease. There is a Teloogoo proverb:—పప్పులేని పెండ్లి ఉప్పులేని కూరా ఉన్నదా—"Is there a "marriage without dholl or vegetable curry without salt?" The stalks are strong and woody and well adapted for making charcoal [adoopp kary] required in gunpowder manufacture; the dried stem makes good fuel and well adapted for producing fire by friction; stalks also used for roofing, basket-making, &c.; tubular wicker-work fascines of these used to line wells to prevent the earth from falling in. Two chief varieties, Cajanus indicus, var. flavus, dec., with the pea plain yellow, and Cajanus indicus, var. bicolor, dec., with the pea veined with purple. No other species of cajanus here. Dholl greens, title from being cooked with dholl, are the same as Indian purslane. For different peas, compare:—Abrus precatorius, love pea, rosary pea; Adenanthera pavonina, coral pea; Arachis hypogæa, earth pea; Cajanus indicus, angola pea, cajan pea, congo pea, no-eye pea, pigeon pea; Cardiospermum halicacabum, heart pea; Cicer arietinum, chicken pea, egyptian pea, chick pea; Lathyrus odoratus, sweet pea; Pisum arvense, field pea, grey pea; Psophocarpus tetragonolobus, winged pea. See gloss. paragraphs.——*Galle dholl* (காலியாந்துவரை - kálíyánduvarai, Tam.). Same as Black dholl.——*Gum dholl* (ಅಂಟುತೊಗರಿ - antutogari, Can.). Title from clammy pubescence like dholl plant. Same as Shittamootty.——*Hill dholl* (پہاڑ کا تور - pádkátuvvar, Hind.; కొండకంది - kondakandi, Tel.; மலைத்துவரை - malaittuvarai, Tam.). A variety of Common dholl.——*Jungle dholl* (काडतोरि - kádatóri, Conc.; ಕಾಡುತೊಗರಿಗಿಡ - kádutogarigida, Can.; ಕಾಟುತೊಗರಿದೈ - kátutogaridai, Too.; காட்டுத்துவரை - káttattuvarai, Tam.). Can. from (kádu, can. jungle + togari, can. dholl, cajanus indicus, spr. + gida, can. plant). Too. from (kátu, too. wild + togari, too. dholl + dai, too. plant). Tam. from (kádu, tam. jungle + tuvarai, tam. dholl). Botanically Atylosia candollei, w. and a., leguminosæ [vricsham, 48]. Alias Atylosia major; Collæa trinervia; Odonia trinervia. Erect; branches straight; young parts villous with fulvous hairs; leaflets oval, upper side even, pubescent, under reticulated, shortly tomentose, villous on the nerves and margin; stipules lanceolate-acuminate, spreading; peduncles two-flowered; calyx villous; segments curved upwards; spurs of the vexillum bent inwards, slightly callous; legumes

villous; neilgherries. For Atylosia scarabæoides, benth., see Jungle horse-gram.——*Red dholl* (لال تور - láltuvvar, Hind.). Variety of Common dholl.——*Wild dholl* (جنگلی دال - janglídál, Hind.; ಕಾಡುಬಿಳಿಸಜ್ಜಬುಹುಲ್ಲು - kádubilisajjabuhullu, Can.; നീർവ്വള്ളിപ്പുല്ല് - nírvvallippullu, Mal.). Hind. from (janglí, hind. wild + dál, hind. dholl, cajanus indicus, spr.). Can. from (kádu, can. jungle + bili, can. white + sajjabuhullu, can. the plant). Mal. from (nír, mal. water + valli, mal. creeper + pullu, mal. grass); as growing in wet ground. Botanically Leersia hexandra, swz., graminaceæ [vricsham, 156].

DHONY (ڈونی - doní, *Hind.*; డోని - dóni, *Tel.*; തോണി - tóni, *Mal.*; தோணி - tóni, *Tam.*). Literally dug-out trough. A gold washer's trough [julgar]. Distinguish from Doney [q.v.]. A large vessel used on the Coromandel coast, from having been originally dug out of a single tree. This is about seventy feet long, twenty feet broad, and twelve feet deep, with a flat bottom or keel part, which at the broadest place is seven feet; and at the fore and after parts of the vessel it breaks into ten inches, which is the siding of the stem and stern post. The fore and after bodies are similar in form amidships. The draught of water is about four feet, and when loaded about nine feet. Dhonies have only one mast, with a long sail, and are navigated from land to land and coastwise in the fine season only. They have no great sailing qualities:—There is a Tamul proverb:—*கரை காணாத தோணி போல*—"As a dhony out of sight of land." And another:—*காற்றுக்குத் தோணி எதிர்த்து ஓடாது*—"A "dhony cannot sail against the wind." When they are of a port in a calm, the sailors throw a handful of sand or shells and feathers in the calm sea, and by the drifting of the feathers on the surface, and sinking of the sand or shells, a calculation of the rate of current is formed, and they anchor off the coast accordingly. The anchor is made by lashing together three crooked branches of a tree, which are then loaded with heavy stones, and the cable is formed from coir [q.v.] yarns. They have no deck and are thatched with palm leaves [cadjan]. These vessels trade from Madras and the east coast to the island of Ceylon and Gulf of Manaar. There are various clever contrivances practised by the native mariners of the Coromandel coast, in navigating, sailing and repairing their vessels.—"*a*" The following is an instrument for ascertaining latitude [acsham] when out of soundings. A piece of thin board, oblong in shape, three inches long by one and-a-half wide, is furnished with a string suspended from its centre, eighteen inches long. A number of knots are made in this string indicative of certain previously observed latitudes; in other words, coinciding with the positions of certain well known places on the coast. The position of these knots is obtained in the following manner. The observer elevates the board in his left hand, its longest side being upwards, and draws it backwards and forwards in front of his eye until its upright length exactly corresponds with, or covers the space included between the polar star [dhroovam] and the horizon [cshitijam]. With his right hand he next catches hold of the string and brings it to his nose, he makes a knot at the point where it touches that feature; and if he at the time be abreast of Point palmyra [q.v.], an undeviating index is afforded, which will in future show him when he is off that point, the North star's elevation [avanataumsham] being always fixed, and therefore all the parts of the triangle [mookonam, trikonam] formed by his line of sight, the string, and the distance between the polar star and the horizon, or the length of the board, equally as constant. He makes similar observations at, and a knot is fixed opposite, each conspicuous place, on the length of the string, as far as Dondra head in Ceylon generally. Thus by a simple observation, at any future time the mariner is enabled to ascertain his position with sufficient accuracy for his purposes, anywhere on the coast between Calcutta and the south point of Ceylon.—"*b*" To ascertain the rate of sailing, the procedure is as follows. By previous practice the sailor knows his rate of walking; he throws a piece of wood overboard at the stern of the vessel, and walks towards the stern keeping pace with the wood floating past, then he remembers his rate of walking, to which the progress of the vessel must necessarily be equal.—"*c*" When it is desired to ascertain the direction of the current, this is performed by throwing into the sea during the prevalence of a calm, a ball of ashes kneaded together by water; as it slowly sinks it separates, leaving a long broad tail, like a comet's [dhoomkait], behind it which is wafted away in the run of the current, making a line of direction apparent to an observer standing a little over the surface.—"*d*" The docking of a ship is simple and ingenious. In the first instance, when a ship is to be docked, she is floated into a basin direct from the sea or inlet; then the entrance is closed. The basin is surrounded by a high mud bank which forms it. The level of the water in the basin upon which the vessel now floats, is raised by scarping the mud from the banks into the basin, levelling it at the bottom of the water, and so raising the bottom of the basin which must of consequence elevate its contained water. This process is carried on until the ship is considerably higher than the level of the contiguous sea or inlet, the water is then suffered to run off, two beams are placed transversely under the ship, stem and stern, resting on the new and exposed bottom of the basin. Perpendicular shores are then put to her, and the earth levelled until she is on the same plane as the adjoining ground.—"*e*" For undocking the ship from her elevated position the following is the process. Four sets of cables are used, each one is coiled into the shape of a solid cone, one fake or coil not touching the one beneath it, soft mud and sand being interposed between each layer as well as smeared all over it. One cone is placed under the starboard bulge forward, and another under the same bulge aft, a third and a fourth correspond in position on the larboard side; thus the four solid cones of rope support the ship. She is now gradually lowered by withdrawing from the base of each cone simultaneously a coil or fake, by which the four cones bodily subside, and the vessel along with them, resting as she does upon them. It might be conjectured that by removing the lower coil the superstructure would tumble down, but this is obviated by the solidity of the mass, each layer consisting of a solid flat coil of rope one circle round within another.——*Yautra dhony* (යාත්‍රා ඔරුව - yátraoruva, Singh.). From (yátra, san. voyage + oruva, singh. boat). A Ceylon coasting-vessel, with an outrigger.

DHOO (धू - dhú, *San.*). To kindle.——*Dhoomam* (धूम - dhúma, San.). Smoke.——*Dhoom kait* (धूमकेतु - dhúmakétu, San.). From (dhúma, san. smoke + kétu, san. flag), hence sign; whose ensign is marked by smoke. Comet.——*Dhoonah* (دهونه - dhúnah, Hind.). Dammer [q.v.].——*Dhoopam* (धूप - dhúpa, San.). Means incense. Storax. Botanically the Styrax genus, styraceæ [vricsham, 84]. Trees or shrubs natives of asia and n. america; leaves entire, frequently covered with star-shaped hairs; flowers white, in racemes; fruit globose, one-celled, one-seeded. The species best known to the natives are:—benzoin [q.v.], officinale [true storax]. Compare the compounds, where transl. is of first term:—Ailantus malabarica (gugguladhúpa), dammer; Boswellia serrata (vishéshadhúpa), distinction; Boswellia serrata, var. glabra (kónkanadhúpa), concan, and (yakshadhúpa), demi-god; Canarium strictum (mandadhúpa), slow, (ráladhúpa), resin; Vateria indica (mandadhúpa), slow. See gloss. paragraphs.

DHOOLY (ڈولی - dúlí, *Hind.*). From (dul, san. to swing). A swinging litter for carrying women or sick persons [manjilee]. Consists of a cot [q.v.] or frame, suspended by the four corners from a bamboo [q.v.] pole, and is carried by two or four men. It is lighter and cheaper than a palankeen [q.v.]. Cf. Tonjon.

DHOOP (دهوپ - dhúp, *Hind.*). Sunshine.——*Dhoopchown* (دهوپ چهاؤں - dhúpchháun, Hind.). Means sunshine and shade. A brocaded shot silk with light and shade [puttoo, sheelay].

DHOTY (دهوتی - dhotí, *Hind.*; ధోవతి - dóvati, *Tel.*). From (dhoná, hind. to wash); from being washed daily at the time of bathing [dhoby]. Duttee in old trade lists. A plain loin cloth. The end, after a couple of turns round waist, is passed between the legs, and put under the folds which cross behind; so that a festoon of calico [q.v.] hangs down to either knee. Occasionally the end is passed from behind and fastened in front. Amongst Mahomedans, after being folded two or three times round the waist, it is allowed to hang down; not tucked between the legs as with Hindoos. With a Hindoo the dhoty is indispensable. Should he wear drawers or trousers [pyjauma], he has a dhoty, large or small, underneath. While at home and at ease, and on the most solemn religious occasions, even royal personages dress in the simplest possible fashion; with only the dhoty wound round the waist and a turban [puggry] on the head. Fine robes and valuable jewelry are reserved for great occasions and for appearance in portraiture. See vol. I (98).

DHOURRA (جواری - javárí, *Hind.*). From (júrna, san. the plant). Same as Cholum.

DHOW (داؤ - dáú, *Hind.*). A sloop on the western coast; applied specially to the old fashioned vessel of Arab build, with a long grab stem, rising at a long slope from the water, and about as long as the keel, usually with one mast and lateen-rig.

DHROOVAM (ध्रुव - dhruva, *San.*). From (dhru, san. fixed). Stationary [dhar]. Dhroova cowle is a permanent lease. Generally the pole of a great circle of the sphere [golam], particularly the Celestial pole [alrooccabah, cootb, meroo]. Also means an epoch to which a computation is referred. Also the twelfth astronomical yogam [q.v.].——**(1)** *Dhroovacam* (ध्रुवक - dhruvaka, San.). Means fixed. Otherwise Nirayanam, meaning without precession [ayanaumsham]. Fixed celestial longitude, measured on the ecliptic [craunty mundalam] from the first point of the fixed Maisham or the beginning of the fixed sidereal zodiac [raushy]. This is a constant arc and not liable to precession error as sauyanam [q.v.] or tropical celestial longitude. Dhroovacams like Sauyanams can be calculated by great circle [mundalam] from the pole of the ecliptic [craunty mundalam], when they are aspootam or invisible or true longitudes; or the same can be done by great circle from the celestial pole only or pole of the earth projected, when they are spootam [q.v.] or apparent. The latter is much the more usual, and hence the difficulty of identifying stars described in the old shastrams.——**(2)** *Dacshina dhroovam* (दक्षिणध्रुव - dakshinadhruva, San.). From (dakshina, san. south + above). The South pole [coo meroo].——*Oottara dhroovam* (उत्तरध्रुव - uttaradhruva, San.). From (uttara, san. north + above). The North

pole [soomeroo]. All the fixed stars [nacshatram] revolve about this particular point in the heavens; and near it is star of second magnitude, called Polar star, end of tail of Ursa minor [doobhe asghar]; has no other star of equal brightness near, and always seen in same direction, for circle it describes about pole is too small to be sensible to naked eye [jyotisham].

DHUKKA (دھکا - dhakká, *Hind.*). Shoving.——*Dhukkamhokkhy* (دھکامکھی - dhakkámukkhí, Hind.). From (above + mukkhi, hind. blow). Time of trouble.

DHURRAH (دھرا - dhará, *Hind.*; ధర - dhara, *Tel.*). Bazaar weight. 2 punchairs = 1 dhurrah; 4 dhurrahs = 1 munn [niray, 2e]. Approximate actual value, 1 dhurrah = 6 lbs. 4 oz. avoirdupois. Same as Can. dhaday. Compare Yeday. See vol. I, 609; II, 513.

DHWAJ (ध्वज - dhvaj, *San.*). To move.——*Dhwajam* (ध्वज - dhvaja, San.; دھجا - dhaja, Hind.). Banner. A pole [dandam] with a strip of cloth tied to the end of it, and erected near a place of worship or elsewhere in satisfaction of a vow.——*Dhwaja stambham* (ध्वजस्तम्ब - dhvajastambha, San.). From (dhvaja, san. banner + stambha, san. pillar). Flag-staff placed in front of a temple [coil].

DIAMPER (ഉദയംപേരൂർ - udayampérúr, *Mal.*). From (udaya, san. rising + pérúr, mal. large village). Sanscrit name (udayapura), meaning rising town. Village; Travancore state, Cottayam division, Wycome talook. Christian town, remarkable as being the scene of the celebrated synod at which Menezes, Portuguese archbishop of Goa, compelled the Syrian christians of St. Thomas in A.D. 1599, to submit to the Pope, and burned their ritual and doctrinal books.

DIBBA (ٹبا - tibbá, *Hind.*; దిబ్బ - dibbá, *Tel.*; திப்பை - tippai, *Tam.*). Mound [tippa]. Suffix in place names, especially in the northern districts; as Frangooladibba, meaning europeans' mound. Olandoodibba, meaning dutch mound [dinney].

DIC (दिक् - dik, *San.*). From (dish, san. to point out) [desham, disay]. Quarter; space. The eight cardinal and intermediate points of the horizon [cshitijam]; but the zenith and nadir [ashata dic, jyotisham] are also called dic.——*Digambaran* (दिगम्बर - digambara, San.). From (above + ambara, san. clothing). Sky-clothed. Also called Nirgrantan, meaning without bond.—"*a*" A mendicant of the Jeina sect. The Jains are divided into two principal divisions, Digrmbarans and Shwetaumbarans. The former have the best pretensions to antiquity and have been most widely diffused. The latter means the white-robed, the teachers being so dressed. In the present day, the Digambaran ascetics do not go abroad naked, but wear colored garments; they confine the disuse of clothes to the period of their meals, throwing aside their wrapper when they receive the food given them by their disciples. The following is a Hindostany proverb:—جہاں نہ جا کوئی تہاں نہ تا کو تہاوں دھوبی بسکر کیا کرے دگمبر کے گاوں—"Let not a man go where his "qualities are not appreciated; what occasion has a washerman "to live in a village of Digambarans?" [matam].—"*b*" Hindoo 2nd or pers. name. Common among Madhwas and Mahrattas [peyar].

DIGOOVA (దిగువ - digoova, *Tel.*). From (digu, tel. to descend). Prefix in place names; as Digoova ahobilam, meaning Lower ahobilam. Cf. Egoova.

DIL (دل - dil, *Hind.*). Heart.——*Dilair* (دلیر - diler, Hind.). Firm in heart. Part of lacab; as Dilair jung, intrepid in war [ism].——*Dilaraum* (دلآرام - dilárám, Hind.). From (above + árám, pers. comfort). The comforter. Servant's name [ism].——*Dilawar* (دلآور - diláwar, Hind.). From (above + áwar, pers. having). The brave. Mahomedan servant's name. Prefixed to an alam forms a lacab; as Dilawar ally, the brave ally, taken by Shiahs [ism].——*Dildaur* (دلدار - dildár, Hind.). From (above + dár, pers. keeper). Beloved. Servant's name. Prefixed to an alam forms a lacab; as Dildaur ally, lover of ally. Term of devotion + alam. Taken by Shiahs [ism].——*Dildost* (دلدوست - dildost, Hind.). From (above + dost, pers. friend). Lover. Servant's name. Prefixed to an alam forms a lacab; as Dildost ally, sincere friend of ally. Term of devotion + alam. Taken by Shiahs [ism].——*Diljoo* (دلجو - diljú, Hind.). From (above + jú, pers. seeker). Studious of pleasing. The conciliator. Mahomedan servant's name [ism].——*Dilshaud* (دلشاد - dilshád, Hind.). From (above + shád, pers. joy). The gladdener. Mahomedan servant's name [ism].

DILO OIL (دلوکا تیل - dilokátel, *Hind.*). Title from fiji. Product of Calophyllum inophyllum [common poon].

DIMHUTTY (ದಿಂಪಹಟ್ಟಿ - dimhatti, *Can.*). From (dimpu, can. below + hatti, can. village). Can. also (úrbetta), meaning village + hill. Hill and village; Neilgherry dist., Paranginaud division; lat. 11° 26′; long. 76° 53′; height 6,903 feet; from Coonoor N.N.E. 7½ miles; from Ootacamund E.N.E. 11 miles. A short distance N. of approach to Kotagherry. At foot of this the earliest sanitarium stood.

DIMMAM (ದಿಮ್ಮಂ - dimmam, *Can.*). Means mound. Village, Hill; Coimbatore dist., Suttimungalam tal.; lat. 11° 37′; long. 77° 10′; from Coimbatore N.N.E. 45 miles; from Suttimungalam N.W. 11 miles. At head of Hassanore ghaut [q.v.]. Chuttram [q.v.] and bungalow [q.v.]

DIMMAS (درمس - durmus, *Hind.*; دھمس - dhammas, *Dec.*). A pavior's rammer.

DINAM (दिन - dina, *San.*; دن - din, *Hind.*; దినము - dinamu, *Tel.*). From (div, san. to shine) [deva]. Cf. Ahas. A day [naul, pagal, roz].——**(1)** "*a*" In the European system the civil day is divided into two portions of twelve hours each; that from midnight to noon being called Antemeridian, and that from noon to midnight Postmeridian. The astronomical day is reckoned from noon to noon, or often at the present day from midnight to midnight, without the distinction of A.M. and P.M. The civil day commences at the midnight preceding the astronomical day, if the latter dates from noon.—"*b*" The instant of time to which the sun appears on the meridian [raikhay] of a place is apparent noon; and the interval between the departure of the sun from the meridian to its return is an apparent solar day, which is a period of unequal length because the sun moves in the ecliptic [craunty mundalam], and not in the equator [naudy mundalam], and because the diurnal velocity [gaty] varies with earth's distance from sun. But to secure a uniform measure of time, astronomers assume the revolution [bhaganam] of a mean sun; this gives a mean solar day, the length of which is equal to the average or mean of all the apparent solar days in a year. Clocks and chronometers are adjusted to mean solar time [madhyama sowra maunam], while the sun alone keeps apparent time. The difference between mean time and apparent time is the Equation of time.—"*c*" The sidereal day is the interval between the departure and the return of a star [nacshatram] to the same meridian. All the stars give the same exact duration of 23h. 56m. 4·09s. for the sidereal day, instead of 24h.; this acceleration of the sidereal on the solar day produces all the varied aspects seen in the heavens in the ccurse of a year.——**(2)** The natives have a great variety of ways of considering the day and fixing its duration. The principal are the following:—"*a*" The Sauvanam or natural or civil day is the time between two consecutive sun risings; therefore the Sauvanam days are of various duration even under the equator. According to the ancient shastrams [q.v.], the Sauvanam day is divided into 60 Ghatams or ghaticadandams, the Ghatam into 60 Vinaudicays, the Vinaudicay into 6 Prauna calays, the Prauna calay into 10 Vipalams [caulam].—"*b*" The Sowram day is the time during which the sun describes one degree [bhaugam] of the ecliptic. These days are therefore longer or shorter as the sun is near his apogee or perigee. They are divided in the same proportions as the Sauvanam days but with different names; viz., Dandam, Vicalay or Palam, Prauna calay, Caushta calay. Astronomers sometimes divide these days into minuter parts; thus the Vipalam or Caustha calay into 60 Alipalams, the Alipalam into 3,600 nimishams or twinklings of the eye [caulam, 6].—"*c*" The Nacshatram day, which is also frequently called Sowram with a different meaning from that just mentioned. It is sidereal, being the time between the same point of the ecliptic rising twice; or rather the time between the equinoctial points, called Ayanam [q.v.], rising twice. These days are accounted to be equal to one another throughout the year and are always equal to 60 Ghadiyas, subdivided sexagesimally into Vighadiyas, Params and Soorams [caulam, 5a]. It is to be noted that the measure of time called Ghadiya means also an arc [chaupam] or portion of a Nacshatram of 13° 20′, which is likewise subdivided into Vighadiyas, Params, &c., having no immediate reference to time.—"*d*" The lunar day or Tity [caulam, 4] is divided also sexagesimally like nacshatram day.—"*e*" Deva dinam is equal to a sideral revolution of the sun [varsham.]—"*f*" Pitrya dinam is equal to a synodical revolution of the moon [chaundra mausam].—"*g*" Bramha dinam is equal to a calpam, or 4,320,000,000 years; his night being equal to his day [caulam, 2].—"*h*" Yoog dinam is another word for Aharganam [q.v.], meaning the number of days expired from the commencement of a Yoog [q.v.]; or Yoog dinam means the aniversary day of that on which a Yoog began, which is always noticed in the calendar [punchaungam].——**(3)** *Cary dinam* (కరిదినము - karidinamu, Tel.). From (kari, tel. black + above). A day the morning and previous night of which is considered inauspicious.——*Dinacaran* (தினக்கரன் - tinnakkaran, Tam.). From (above + kara, san doer). Sun, the daymaker [divaucaram]. Hindoo 2nd or pers. name. Common among Madhwas and Mahrattas [peyar].——*Dinaurdham* (दिनार्ध - dinárdha, San.). From (above + ardha, san. half). Half the time of sun being above the horizon [cshitijam, jyotisham, nairam].

DINDIGUL * (திண்டுக்கல் - tindukkal, *Tam.*). From (dindu, tel. pillow + kal, tam. rock); from shape. Greek τάγγαλα.——**(1)** Talook, Madura district. Thasildar's pay Rs. 200. Area 1,121 square miles. Population 370,887. Language Tamul. N. inland part of district. Bounded N. Caroor talook of the Coimbatore district, E. Coolitalay talook of Trichinopoly district, and Mailore and Madura talooks of Madura district, S. Tirumungalam and Madura talooks, W. Periyacoolam and Pulney talooks. Conquered by Mysore rajahs in 1745 A.D.; captured by the

British in 1783; restored at the peace of 1784; finally ceded to the British by treaty with Tippoo, 18th March 1792 and entered in the schedule as Dindigul and Pulney, two talooks. Mountainous and arid in most parts. Soil consists of grey and dark ferruginous earth, lying upon gneiss, which in some places has decayed into a light grey soft stone, easily dug by a pickaxe or spade. Near wells the soil is about three feet in thickness, and the rock is veined with felspar [mauvayira cull] and sometimes with a soft stratum of clay [calimunn]. For agricultural purposes the inhabitants depend chiefly on the rains, which during six months of the year are abundant, and two crops of dry grain [q.v.] are not unfrequently obtained in the year. The iron works at Coottam and Chilamputty were once considerable. A pearl-bearing mussel is said to have been once found. Tanneries [chamrah] and cheroots [q.v.] manufactured to a great extent in the town. Principal rivers are the Codavanaur, Maungaray, and Vagatchay. The Codavanaur irrigates many villages. Contains 1,542 tanks. There is fine camping ground west of the town of Dindigul, near the rock, the other camping grounds are not very good. Places of archæological interest:—Ahtoor, Anaipputty, Batlagoondoo, Calvaurputty, Dindigul, Keityancottay, Nullamannaurcottay, Ramanautapooram, Raugalaupooram, Taudicomboo, Tavashimaday, Virauliputty. Principal trig. stations:—Caloogoomullay, Cooroomullay, Moodimullay, Rishimullay. The following are the leading places, &c., in the talook.——*Ambatooray* (- ambatturai, Tam. ambaturai *). From (ambá, tam. goddess + turai, tam. ford). Village, Railway station; pop. 4,975; acres 3,255; lat. 10° 17′; long. 77° 58′; height 997 feet; from Dindigul S.S.W. 7¼ miles; from Madura N.N.W. 28 miles. Zemindarry resumed by Government.——*Ammayanaickanore* (- ammayanáyakkanúr, Tam.). See sep. title.——*Auttore* (- áttúr, Tam.). From (áru, tam. river + úr, tam. village). Village; pop. 8,565; acres 3,443; lat. 10° 17′; long. 77° 53′; from Dindigul W.S.W. 9¾ miles; from Madura N.W. 31 miles. In the centre of a highly cultivated tract.——*Ayilore* (- ayilúr, Tam.). From (ayil, tam. plough + úr, tam. village). Village; pop. 4,275; acres 7,637; lat. 10° 29′; long. 78° 13′; height 1,087 feet; from Dindigul N.E. 15 miles; from Madura N. 38 miles. Railway station.——*Batlagoondoo* (- vattilakkundu, Tam.). From (bhaktudu, tel. devotee + gundu, tel. rock); originally the seat of teloogoo bramins. Village; pop. 9,709; acres 6,003; lat. 10° 09′; long. 77° 48′; from Dindigul S.W. 20 miles; from Madura N.W. 29 miles. The Munjalaur flows south of the village. Surrounded by wet lands. Small hills in west and north; the western called Permaul coil caradoo. On main road to Pulneys. In 1768 captured by a Mysore force after a siege of six days and captured a few days later by a reinforced army from Madura.——*Caloogoomullay* (- kazhugumalai, Tam.). From (kazhugu, tam. eagle + malai, tam. mountain). Trig. station; lat. 10° 10′ 10·61″; long. 78° 03′ 17·36″; height 4,441 feet; from Coolashekharancottah N.E. 6½ miles; from Dindigul S.S.E. 13 miles; from Shiroomullay S.E. 6 miles.——*Codavanaur* (- kodavanáru, Tam.). See sep. title.——*Cooroomullay* (- kurumalai, Tam.). From (kuru, tam. short + malai, tam. mountain). Trig. station; lat. 10° 35′ 21·72″; long. 77° 55′ 00·79″; height 2,527 feet; from Coottam W.N.W. 3½ miles; from Dindigul N.N.W. 17 miles.——*Cunnivaudy* (- kannivádi *, Tam.). From (kanni, tam. plant. aloe socotrina, lamb. + vádi, tam. enclosure). Zemindarry, Village; pop. 3,708; acres 136,218; lat. of village 10° 22′; long. 77° 53′; from Dindigul W. 9¾ miles; from Madura N.W. 37 miles. Peshcush Rs. 38,129. One of the twenty-four polliems of old Dindigul district. Attacked by Hyder ally in 1755, when the poligar [q.v.] offered 3 lakhs of chuckrams [q.v.] and paid down 70,000. Subsequently resumed by Hyder for arrears of revenue [yeriyode].——*Dindigul* (- tindukkal, Tam.). See below.——*Iyempolliem* (- aiyambálaiyam, Tam.). See sep. title.——*Maroothanuddy* (- maruthanathi, Tam.). From (marutham, tam. terminalia tomentosa, bedd. + nadí, san. river). Sanscrit name (parushanadí), meaning rugged + river. River rises in the Lower pulneys and after a course of about 25 miles joins the Munjalaur.——*Moodimullay* (- mudimalai, Tam.). From (mudi, tam. head + malai, tam. mountain). Trig. station; lat. 10° 24′ 28·60″; long. 78° 13′ 36·95″; height 3,134 feet; from Dindigul E.N.E. 15 miles; from Shengoorchy N.N.E. 2½ miles.——*Moollipaudy* (- mullippádi, Tam.). From (mulli, tam. solanum indicum, linn. + pádi, tam. village). Village; pop. 2,337; acres 2,203; lat. 10° 24′; long. 78° 04′; from Dindigul N.E. 4½ miles; from Madura N.W. 34 miles. The Chandana varadaur flows through village and supplies Periyacoolam tank.——*Munjalaur* (- mañjaláru, Tam.). See sep. title.——*Nilacottah* (- nilakkóttai, Tam.). See sep. title.——*Ramgherry* (- irámagiri, Tam.). From (ráma, san. the god + giri, san. hill). Village, Hill; lat. 10° 40′; long. 78° 10′; from Dindigul N. 23 miles; from Madura N. 50 miles. Once residence of a poligar; ruined fort and Vishnoo temple.——*Rishimullay* (- irudimalai, Tam.). From (rishi, san. sage + malai, tam. mountain). Trig. station; lat. 10° 12′ 29·72″; long. 77° 55′ 27·79″; height 1,675 feet; from Dindigul S.S.W. 12 miles.——*Shiroomullay* (- shirumalai, Tam.). See sep. title.——*Taudicomboo* (- tádikkombu, Tam.). From (tádi, tel. palmyra tree, borassus flabelliformis, linn. + kombu, tam. branch), perhaps from a palmyra with branches. Village; pop. 4,784; acres 9,103; lat. 10° 27′; long. 78° 00′; from Dindigul N. 5½ miles; from Madura N.N.W. 37 miles. Old Vishnoo temple with inscription of Vijianugger dynasty dated 1629.——*Vada madura* * (- vadamathurai, Tam.). From (vada, tam. north + mathurai, tam. town so called). Village, Railway station; pop. 4,770; acres 7,109; lat. 10° 26′; long. 78° 09′; height 969 R. S.; from Dindigul N.E. 10½ miles; from Madura N. 37 miles.——*Vagatchay* (- vagaççai, Tam.). From (vagai, tam. division + shéy, tam. length). River. Rises in the western hills, and running easterly and north-east, crosses the Madura and Nuttam roads. It then divides into the Moollipaudy and Poonganay rivers, which intersect the plain of Dindigul; these being joined by the Cullaur and the Ayilore, two small streams which rise in the low hills to the eastward, again unite, and running north fall into the Codavanaur.——*Vedasundoor* (- védasandúr, Tam.). See sep. title.——*Veigay* (- vaigai, Tam.). See sep. title.——*Yeriyode* (- eriyódu, Tam.). From (eri, tam. to burn + ódu, tam. tile). Village; pop. 1,926; acres 3,733; lat. 10° 31′; long. 78° 06′; from Dindigul N.N.E. 12½ miles; from Madura N. 41 miles. One of the twenty-four polliems of the late Dindigul district. Attacked by Hyder in 1755, when the poligar consented to pay 70,000 chuckrams; subsequently resumed by Hyder for arrears of revenue [cunnivaudy].——

(2) Town, Mountain, Railway station, Head-quarters of Sub-collector and Sub-registrar, District moonsiff's station. Madura dist., Dindigul tal.; pop. 20,203; acres 1,280; lat. 10° 22′; long. 78° 00′; height 924; from Kodaykarnal E.N.E. 35 miles; from Madras S.W. 242 miles; from Madura N.W. 30 miles; from Rameshwaram N.W. 114 miles; from Ramnaud N.N.W. 88 miles. On the trunk road from Coimbatore to Pondicherry, at N.E. extremity of valley of same name extending along foot of ghauts [q.v.]. The town is in the middle of an extensive plain, measuring 29 miles from north to south and 30 miles from east to west, entirely surrounded by hills. Formerly capital of an independent province, nominally part of Madura kingdom. As a strategical point of great natural strength, commanding the passes between Madura and Coimbatore, its possession always keenly contested. Between 1623 and 1659 the scene of many encounters between Mahrattas and Mysore and Madura troops, the poligar of Dindigul holding at that time feudatory authority over eighteen neighbouring chieftains. Chundah sahib, the Mahrattas, and Mysore troops, occupied the fort in turn; and during the intervals in which no greater power was in possession, the strongest local chief made it his head-quarters. Attacked by troops of the poligars in the reign of Moottoo veerappanaick of Madura, 1609–1622 A.D. Besieged by an army from Mysore in 1625, during the reign of Trimalnaick, but the assailants were driven back by the Dalavoy saitoopaty. In 1736 stormed by Chundah sahib. In 1745 conquered by the Mysore rajahs. In 1755 garrisoned by Hyder and used by him as the basis of his schemes for subduing the powerful poligars of Madura, and annexing the greater part of that district as well as Coimbatore. As the gate to Coimbatore from the south, the fort proved in the wars with Hyder, a serious obstacle to the operations of the British troops at Trichinopoly and Madura. Taken by the British in 1767, lost again in 1768, retaken in 1783, given up to Mysore by the treaty of Mangalore in 1784, recaptured on the next outbreak of war in 1790, and finally ceded to the Company by the treaty with Tippoo of 18th March 1792. Fort, built on a remarkable wedge-shaped rock 400 feet in length and 300 in breadth, 1,223 feet above the sea, is to the west and in good preservation. It was occupied by British garrison until 1860. At the top of the rock is a ruined temple with an inscription, dated A.D. 1538, recording a gift during the reign of Atchoota deva royel of Vijianugger. Staples of local trade are hides [chamrah], tobacco [pogauk], coffee [q.v.], and cardamoms [q.v.], for the export of which the system of roads radiating from the town afford exceptional facilities. Silks [puttoo] and muslins [mull] manufactured here had once a high repute, as also the blankets [cumbly] made from Cooroombaud [q.v.] wool [pushm]. The following are the travelling distances from Dindigul to different places:—

To	Viâ	Miles and Furlongs.	
Avanashy ...	Dharaupooram	95	0

DINNEY (డిన్నె - dinne, *Tel.*; திண்ணை - tinnai, *Tam.*). Mound. Suffix in place names; as Naugaldinney, meaning Serpent's mound [dibba].

DIRHEM (درهم - dirham, *Hind.*). From Greek δράχμη. An ancient Mahomedan silver coin equivalent to about 10 pence. 20 or 25 equal one deenaur [q.v.]. The deenaur equal to a ducatoon or sequin, about 9 shillings. As a weight, a dirhem is considered equal to $3\frac{1}{2}$ maushams or $52\frac{1}{2}$ grains [damree, daum].

DISAY (திசை - tisai, *Tam.*). From (dish, san. to point out) [desham, dic]. Direction [ashtadic]. Province.——*Disaytchol* (திசைச்சொல் - tisaiççol, Tam.). Provincial words.

DITA (सप्तछद - saptachhada, *San.*; सातवण - sátavana, *Mahr.*; सान्निरूकु - sánnirúku, *Conc.*; دیت - det, *Hind.*; ಪಾಲೆ - pále, *Can.*; ಪಾಲೆ - pále, *Too.*; ఏడాకులపాల - édákulapála, *Tel.*; ଛତ୍ନିୟା - chhatniya, *Oor.*; ഏഴിലമ്പാല - ézhilampála, *Mal.*; රුකත්තන - rukattana, *Singh.*; ஏழிலைப்பாலை - ézhilaippálai, *Tam.*). Title from hindostany, name in bombay. San. from (sapta, seven + chhada, san. leaf); from leaves appearing in whorls of seven. Mahr. from (saptaparna, san. seven-leaved). Can. from (pálu, can. milk). Tel. from (édu, tel. seven + áku, tel. leaf + pála, tel. milky plant). Mal. from tamul. Singh. from (ruk, singh. tree + attana, singh. datura fastuosa). Tam. from (ézhu, tam. seven + ilai, tam. leaf + pálai, tam. milky plant). San. also (saptaparna), meaning seven + leaf; (ayugmachhada), meaning having an odd number of leaves; (jívaní), meaning life-giver [indian nettle]; (payasyá), meaning milky; (kshatriyá), meaning protecting; (ayugmaparna), meaning having an odd number of leaves; (shárada), meaning flowering in autumn. Can. also (hále), meaning milk; (élelepále). Tel. also (édákulaponna), meaning seven + leaf + calophyllum inophyllum, linn.; (pálagaruda), meaning braminy kite paulay; (édákulaariti), meaning seven + leaf + plantain tree, musa paradisiaca, linn. Mal. also (mukkanpala), meaning three-eyed milk tree; (daivappála), meaning divine milk tree; (mangalappála), meaning auspicious milk-tree; (pála). Tam. also (pálai), meaning milky plant [edible paulay, eve's apple, ground paulay, monkey-face paulay, nakchiknee silk cotton, nauga champak, pauchonty, paula indigo, paulay silk cotton, tellicherry bark]. Title otherwise Devil's tree, Dita-bark tree, Seven-leafed milk plant, Seven-leafed plaintain, Seven-leafed poon. Botanically Alstonia [saptaparnam] scholaris, r. br., apocynaceæ [vricsham, 87]. Alias Alstonia oleandræfolia; Echites scholaris. This tree has obtained the name scholaris from its planks being used as school-boards, on which children trace their letters. Stiff-branched tree, 50 feet; furrowed trunk; leaves five to seven in a whorl, obovate-oblong, obtuse, veins ribbed, approximating the margin; calyx five-parted; corolla salver-shaped, with roundish segments; cymes on short peduncles; limb of corolla a little bearded; flowers greenish white, follicles very long, slender; flowers emit a sickening smell which pervades air about sunset, flowering in january and february. Stem gives a kind of gutta-percha [q.v.]. The medicinal drug consists of irregular fragments of bark $\frac{1}{4}$ to $\frac{1}{2}$ inch thick, easily breaking with a short fracture; the external layer fissured, dark grey or brownish, sometimes with black spots; it readily separates when handled; inner substance of a bright buff; it has no smell, is bitter but not disagreeable when chewed. Bark medicinally an astringent tonic, anthelmintic, alterative and antiperiodic; common native medicine in bowel-complaints; gives to pharm. alstoniæ cortex, officinal. Ashes used as mordant [cauram]. Wood white, soft, even-grained, seasons badly, and soon gets mouldy and discolored; not durable, but easily worked.

DITTAM (திட்டம் - tittam, *Tam.*). From (dishta, san. assigned). Rule, agreement; the account in former days of the probable settlement ascertained early in the season, by taking from each ryot [q.v.] a memorandum [cooripp] of what he intended to cultivate [inam].

DITY (दिति - diti, *San.*). One of the wives of Cashyapan [q.v.], whose children were the Deityans [q.v.], as Adity [q.v.] another wife was the mother of the gods and the Sooras [audityan].——*Deityan* (दैत्य - daitya, San.). From (diti, san. wife of kashyapa). Greek τιτᾶς. Oldest Sanscrit word for demoniac giants and enemies of gods [dasyoo, dausan]. At the churning of the ocean they fought with the gods regarding the cup of amritam [q.v.]; when Vishnoo assuming a female form [mohiny] deluded them. The Deityans then plunged into Pautaulam [q.v.]. In the Hebrew genesis the Sons of God and Daughters of Men correspond with males of devas and females of deityans [coormam]. According to European sanscritists the conflict of Devas and Deityans is explained by the solar theory, or daily combat between light and darkness. That legend is also seen in the stories of Vishnoo and Baly, and Indran and Ahalyay. In greek the same exists under form of Theseus, Persephone, and Hades; Heracles, Alcestis, and Hades; Orpheus and Eurydice; and in the later story of Paris and Helen. In latin it exists in the story of Hercules and Cacus, Ceres and Pluto. In the teutonic languages it is told under the names of Odin and Balder, Beowulf and Grendel [matam]. In late sanscrit writings the term deityans is applied to the dark inhabitants of India, such as the Dravidians met by the Aryans. See Asooran, which is a later term; and Raucshasan, which is still later.

DIV (दिव् - div, *San.*). To shine.——*Deva* (देव - déva, San.). See sep. title.——*Dinam* (दिन - dina, San.). See sep. title.——*Divasam* (दिवस - divasa, San.). A day [dinam]. An anniversary commemorative of deceased parents.——*Divaucaram* (दिवाकर - divákara, San.; திவாகரம் - tivágaram, Tam.). From (diva, san. day + kara, san. maker); epithet of the sun, the day maker [dinacaran]. Oldest dictionary [nigantoo] of Tamul language, by Shendan member of the Madura college [q.v.]; twelve chapters.——*Divy* (दिवि - divi, San.). Day time in the calendar [punchaungam]. Thus Tyaujya divy means that the Tyaujyam [q.v.] occurred at day time.

DIVY (దివి - dívi, *Tel.*; ദിവി - divi, *Mal.*). From (dvípa, san. island).—"*a*" Island. Suffix in place names; as Anjidivy, meaning five islands [dweepam, teev].—"*b*" Sanscrit name (hamsadvípa), meaning swan + island. Island, Promontory, Lighthouse; Kistna dist., Bunder tal.; pop. 20; lat 15° 57′; long. 81° 13′; from Masulipatam S. 16 miles. Low headland surrounded by shoal flats for six miles south and east, the edge of the shoal sometimes extending five or six leagues out to sea. Around the point and between it and Divy false point, several branches of the Kistna fall into the sea. The rise and fall of the tide is seldom more than four or five feet in the springs at the mouths of the rivers; but when a severe gale of wind blows from the sea, the lowland contiguous to it is inundated, causing great destruction of property and lives. The point is 19 miles north-east of the mouth of the Kistna. Formerly belonged to the Noozveed zemindars, but appropriated by the French, who built a fort and cut a canal from the river to Masulipatam. Afterwards included in the Havelly [q.v.] lands of Masulipatam and given to Condregoola jogy puntooloo, as a reward for his services. His brother, Condregoola vencatroyel, doobash [q.v.] under later chiefs in council at Masulipatam, in 1776 took all the Havelly lands on a ten years' lease, which lease was continued to his nephew Jaggappa. In 1807 given on zemindarry [q.v.] tenure to Condregoola gopaul row, who died on 30th April 1812 and was succeeded by his younger brother Jugganauta row. Condregoola gopaul row died on 16th May 1836, leaving authority to his widow to adopt a son. Zemindarry was brought to sale on March 25th, 1853, and purchased for Rs. 25,000 by Government. Divy false point stands $16\frac{1}{2}$ miles south-west by west of Divy point. Light two miles N.W. of Divy point; lat. 15° 59′ 11·79″; long. 81° 10′ 8·15″. White; fixed, 14 miles range. Visible from all directions seaward. Masonry column white. To point out dangerous sands in vicinity.

DIVY DIVY (سماق امریقه - sumákiamríkah, *Ar.* and *Pers.*; امریقه کا سماق - amríkahkásumák, *Hind.* and *Dec.*; ವಿಲಾಯತಿ ಅಲ್ಲೆಕಾಯಿಮರ - viláyatíaldekáyimara, *Can.*; கொடிவேலன் - kodivélan, *Tam.*). Title from north american. Ar. from (sumák, ar. sumach + amríkah, ar. america). Pers., &c., from arabic. Can. from (viláyati, hind. foreign + aralekáye, can. gallnut, terminalia chebula, retz. + mara, can. tree). Tam. from (kodumai, tam. crookedness + vél, tam. acacia); from curving legumes. Tam. also (mullillátbavélan), meaning thorn + not having + acacia; (tivithivi); (kónaivél), meaning crooked acacia. Title otherwise American dívy divy, American sumach, Diby diby, Liby liby, Sumach. Botanically Cæsalpinia [coobairaucshy] coriaria, willd., leguminosæ [vricsham, 48]. Alias Cæsalpinia thomæa; Poinciana coriaria. Small spreading tree, 25–30 feet, unarmed; leaves bipinnate; pinnæ six to seven pairs; leaflets fifteen to twenty pairs, linear, obtuse; racemes panicled; pedicels shorter than the flowers; calyx cup-shaped at the base, five-lobed; petals five unequal, upper one shorter than the rest; legume tough, oblong, incurved laterally, reddish brown; may be known by its drying into the shape of the letter S.; flowers small yellow fragrant; native of w. indies, naturalised here; now common. Pods contain much tannin like vallonia, and are astringent; powder prepared from them, light yellow color and astringent taste, antiperiodic; decoction of the legume forms injection in bleeding piles; pods are remedy for prolapsus ani in children; mentioned in pharm., but non-officinal. Pods are employed for tanning [chaurah]; superior to all other indian astringents.

DIWAUN (دیوان - díwán, *Hind.*). From (daun, ar. an account).—"*a*" The principal revenue servant under a zemindar [q.v.]. By this title the Company were receivers-general in perpetuity of the revenues of Bengal, Behar, and Orissa, under a grant from the Great moghul. In Persia, a court of justice or of other business. Diwanny, of or relating to a diwaun; civil as opposed to criminal.—"*b*" Also a collection into one volume of the entire odes of an author, in Persian or Hindostany; in bringing them together they are arranged alphabetically according to the letters in which the verses terminate. There are very many of these current in Madras. See specimens below. ——*Diwaun e dard* (دیوان درد - díwánidard, Hind.). By Dard, takhalloos [q.v.] of Cauja meer of Delhi. Died about 1786.
میرا جی هی جبتك تری جستجو می زبان جبتلك هی یهی گفتگو
هی * کیا سیر سب همنے گلزار دنیا گل دوستی مین عجب رنگ و
بو هی * درد دلسے لوتتا هون کس کو میرا درد هی هونمین
—حرف درد جس پهلو سے اٹهو درد هی * "Live as long as I "may, I shall be ever seeking you; and this will be the subject-"matter of discourse so long as there is a power of speech in "me. I have travelled all over the garden of the world but "I have no where found such wonderful fragrance as that "existing in the clay of friendship. I roll and toss with heart-"ache, and who feels for me? Dard is my name which way you "read and which side I roll and lie." Dard means heart-ache. ——*Diwaun e nausikh* (دیوان ناسخ - díwáninásikh, Hind.). By Nausikh, takhalloos of Sheikh imaum buksh, born at Fyzabad. Died about 1837. زاهدا کیونکر کرونمین ترك یهه دنیا وه هی
سیر کو آئے تهے آدم باغ رضوان چهوڑ کر * هوتی هی غربت
مین ثروت پر بڑی ایذا کے ساتهه رنج اٹهایا کسقدر یوسف نے

"It is not well to check the flow of warm passion, for there "comes a fetid smell from stagnant water. When a wicked man "becomes intoxicated with pride of wealth, it is as it were a "second devil exciting the first one. Humanity is one thing "and learning quite another; for if you teach a parrot ever so "much, he will be a parrot [totah] nevertheless."

DO (دو - do, *Hind.*). Two [dwau, dwi].——*Doab* (دو آب - doáb, Hind.). From (above + áb, pers. water). The area between two confluent rivers, or the confluence itself [sangam]. ——*Dofusl* (دو فصل - dofasl, Hind.). From (above + fasl, ar. crop). Raising two crops a year on the same land [iroobhogam]. ——*Dohar* (دوهر - dohar, Hind.). From (above + har, hind. suffix of division). Calico [q.v.] sheet; in cold weather doubled and worn over the shoulders. Cf. Chudder.——*Dohra* (دوهرا - duhrá, Hind.). Double.——*Domoonh* (डुण्डुभ - dundubha, San.; دو منهه کا سانپ - domunhkásámp, Hind.; ಇತ್ತಲೆಹಾವು - ittalehávu, Can.; రెండుతలలపాము - rendutalalapámu, Tel.; മണ്ണണിപ്പാമ്പ് - mannanippámbu, Mal.; இருதலைப்புடையன் - iruthalaippudaiyan, Tam.). San. from (dundu, san. the sound + bhan, san. to utter). Hind. from (domunh, hind. double faced + sámp, hind. snake). Can. from (iru, tel. two + tale, can. head + hávu, can. snake). Tel. from (rendu, tel. two + tala, tel. head + pámu, tel. snake). Mal. from (man, mal. mud + ani, mal. to wear + pámbu, mal. snake). Tam. from (irandu, tam. two + talai, tam. head + pudaiyan, tam. earth snake). Blind snake; two-ended snake. The terms are co-extensive with family Typhlopidæ, ophidii, colubriformes, ophidia [sarpam], reptilia [sarpy, 12], of naturalists [jantoo]. These snakes have the body cylindrical, with very short head not distinct from neck, and with a very short tail; the body and tail are covered with rounded, polished, imbricate scales; jaws scarcely dilatable; rudiments of hinder extremities are hidden below the skin. Live under ground, their rigid body and short curved tail being adapted for burrowing; after showers of rain they occasionally appear above ground; feed on worms and small insects; oviparous; smallest species of snakes belong to this family, some being only half the size of a common earth-worm. The following are the South indian species:—"*a*" Onychocephalus acutus. Alias Onychocephalus lülken, meddef, westermanni; Typhlops russellii. Has the body only a little thicker behind than in front; circumference in middle is contained fourteen times in the total length; tail slightly curved, extremely short; body surrounded by series of scales; light bronze-colored, each scale on the back lighter in the centre; below uniform yellowish.—"*b*" Typhlops braminus. Alias Eryx braminus; Tortrix russellii. Has the body very much thicker behind than in front; circumference in middle one-thirteenth of the total length; tail slightly curved, very short; uniform brown, paler beneath; most common species.—"*c*" Typhlops pammeces. Is closely allied to Typhlops braminus, only half as thick; circumference of body twenty-fourth of total length.——*Doobash* (دو باش - dubásh, Hind.). From (above + básh, hind. language). One who speaks two languages, an interpreter [dragoman]. The doobash in this sense was formerly a usual servant in every household; and there is still one attached to each mercantile house, as the broker [dallaul] transacting business with natives, and corresponding to the Calcutta banyan [q.v.]. Now applied to a dressing boy or other servant with a European.——*Dooggauny* (దుగ్గాణి - duggáni, Tel.; துக்காணி - tukkáni, Tam.). From (duga, tel. two + káni, tel. one sixty-fourth of a tunkam or a pie). A copper coin, variable. At Madras, 2 pies = 1 dooggauny, 2 dooggaunies = 1 doody [naunyam, 2a, b, c]. Same as Hind. adhelah, Tel. yegauny.——*Doogoolam* (ದುಗುಲ - dugula, Can.; దుగులము - dugulamu, Tel.).—"*a*" Coin. 2 baidas = 1 doogoolam; 2 doogoolams = 1 chowlam [naunyam, 2b]. Approximate actual value, 1 doogoolam = 4 annas. Nellore and Kistna. Same as Hind. powlah, Can. caul. Compare velly.—"*b*" Goldsmith's weight. Same scale [niray, 3b]. Approximate actual value, 1 doogoolam = 3½ grains. Teloogoo countries. In testaceous scale equal to 2 gooriginjas. Compare Can. adda or manjoty, Tam. munjaudy. See vol. 1, 609. ——*Doopty* (దుప్పటి - duppati, Tel.). Corruption of Doputta [q.v.]. A sheet.——*Doputta* (دوپٹه - dopatta, Hind.). From (above + pata, san. cloth). Literally two breadths. A scarf or looghee [q.v.] consisting of two pieces or breadths stitched together [doopty, sheelay].——*Doshamba* (دوشنبه - dúshambah, Hind.). From (above + shambah, pers. saturday). Monday; on this day God created the seven firmaments [shamba].——*Doshaula* (دوشاله - doshálah, Hind.). From (above + shál, pers. woollen cloth, so called). Long shawl [q.v.]; invariably manufactured and sold in pairs; production of Cashmere.——*Dosily* (దోసిలి - dósili, Tel.). From (above + li, tel. suffix showing measurement). Two hands joined together, so as to hold anything [prasritam]. Handful, grain as a fee. A single handful is a mooshty [q.v.] or mootty [q.v.].

DODDA (ದೊಡ್ಡ - dodda, *Can.*). Great [hey]. Plant first term. Ex., joining two genera where transl. is of second term:—Amomum subulatum (doddayálakki), elettaria cardamomum; Careya arborea (doddáladamara), ficus bengalensis; Coscinium fenestratum (doddamaradarasina), morinda umbellata; Jatropha curcas (doddaharalu), ricinus communis; Pedalium murex (doddaneggilu), tribulus terristris; Pimpinella anisum (doddajírige), cuminum cyminum; Portulaca oleracea (doddagóni), salvadora persica; Scindapsus officinalis (doddahippali), piper longum; Zea mays (doddajóla), sorghum vulgare. See gloss. paragraphs. ——*Dodabetta* (ದೊಡ್ಡಬೆಟ್ಟ - doddabetta, Can.). From (above + betta, can. hill). Mountain; Neilgherry dist., Todanaud div.; lat. 11° 24′; long. 76° 47′; height 8,647; from Ootacamund E.S.E. 2½ miles. Really a range with Dodabetta peak as its southern and Snowdon as its northern eminence. The distance between these points is 2 miles. Dodabetta peak is highest peak of the Neilgherries, and shuts in valley of Ootacamund on side. Remarkable, even among the mammiform hills so common on Neilgherries, for flattened curve of its summit. The hollows of its slopes are clothed with thick woods; and rhododendron [neilgherry rhododendron] trees, though somewhat stunted, are found even within a few yards of the top, which is covered with thick coarse grass and flowering sub-alpine shrubs and herbs. Numerous small streams which flow into the valleys below take there rise here. During Governorship of Marquis of Tweeddale, an observatory was established on the summit. Observations were begun in 1847 and continued till May 1859. The thermometric observations taken here are not to be relied on. Those of the atmospheric pressure and rainfall though not accurate, are less open to suspicion. A record of the meteorological observations was published at Madras in 1848. There is a tea [q.v.] and cinchona [koinah] estate, on the N. slope of Dodabetta; from Ootacamund E. 3 miles; 184 acres.

DODDY (ದೊಡ್ಡಿ - doddi, *Can.*; దొడ్డి - doddi, *Tel.*; தொட்டி - totti, *Tam.*). From (todu, tam. to bind); enclosure. Cattle pound. Suffix in place names, as Nadimidoddy, meaning middle cattle pen.

DODE (దోడు - dódu, *Tel.*). Connected with (tóda, tel. preposition meaning in company with). Protection. Suffix in place names; as Vendode, meaning rear + protection.

DOG (श्वा - shvá, *San.*; कुत्रा - kutrá, *Mahr.*; ನಾಯಿ - náyi, *Can.*; కుక్క - kukka, *Tel.*; നായ - náya, *Mal.*; நாய் - náy, *Tam.*). San. from (shun, san. to go). Common prefix to plant names, following the Dravidian languages, and denoting an inferior species. Examples are, where translation is of second term:—Cleome viscosa (kukkáválu), brassica juncea; (kukkaváminta), gynandropsis pentaphylla; Grewia pilosa (kukkabudda), grewia hirsuta; Ocimum basilicum (kukkatulasi), ocimum sanctum; Trianthema crystallina (kukkapálakúra), oxystelma esculentum. See gloss. paragraphs [nye].——*Dog bane* (قاتل الكلب - kátilul-

kalb, Ar.); meaning dog killer. Same as Poison nut.——*Dog prick* (நாயுருவி - náyuruvi, Tam.). Title from curved prickles like dog's teeth. Same as Indian burr.——*Dog's tongue* (श्वरसना - shvarasaná, San.). Title from appearance of leaf. Same as Leafy milk hedge.——*Dog umbrella* (کتّے کی چھتری - kuttekí-chhatrí, Hind.). Same as Caulaun.

DOKE (ڈوک - dok, *Hind.*; குறவை - kuravai, *Tam.*). Tam. from (kurumai, tam. shortness). The genus Ophiocephalus, ophiocephalidæ [walking fish], acanthopterygii, teleostei, pisces [matsyam, 29], of naturalists [jantoo]. The species best known to the natives are:—gachua [pariah doke], marulius [murrel], punctatus [spotted doke], striatus [pariah murrel]. Cf. also Rock doke, which is another genus.——*Pariah doke* (ڈھیڑی ڈوک - dherídok, Hind.; ಮಹಾಕೊರವ - mahákorava, Can.; కొరమట్టు - kóramutte, Tel.; ଚେଂଗ - chenga, Oor.; കുറുവ - kuruva, Mal.; කනයා - kanaya, Singh.; பெருங்குறவை - perunguravai, Tam.). Title from dark color. Hind. from (dherí, hind. pariah + dok, hind. ophiocephalus genus); from its voracity. Can. from (maha, san. great + korava, can. ophiocephalus genus). Tel. from (kóra, tel. fang + mutte, tel. clupea longiceps). Mal. from (kuru, mal. small); small fish. Tam. from (perum, tam. big + kuravai, tam. ophiocephalus genus). Tam. also (kizháttí), siluridæ or cat-fish family. Ophiocephalus [doke] gachua, ophiocephalidæ [walking fish], acanthopterygii, teleostei [matsyam, 29], of naturalists. Alias Ophiocephalus coramota et fuscus, kelaartii, koramotta, limbatus, marginatus, montanus. Coramota from teloogoo; kelaartii from tamul; koramotta from teloogoo. Scales broad and irregular on summit of head; four or five rows between orbit and angle of preopercle; twelve between snout and base of dorsal fin. Those on head roughened by circular lines, which externally are parallel with their outer edge, lines on scales of body are in form of arches. Colors differ materially, according to water in which they reside; usually greenish, lighter beneath; dorsal, caudal, and anal slate-colored, with orange margin; pectoral with black base, transversely barred and having a slight reddish or orange edge. In the young there is often large ocellus with light edge on last five dorsal rays; caudal barred. Occasionally it is spotted white, or even orange. Freshwater; often found thriving at the bottom of wells, and in fact may be taken from the waters of the plains on those in very high elevations. It attains at least 13 inches in length, is very voracious, and may often be captured in little water-courses, into which it has pursued the Haplochili and other small fish. ——*Rock doke* (गड - gada, San.; मालव्य - málavya, Mahr.; کوراپھکھولی - koráfíkhaulí, Hind.; ಪಂಡಿಪಕ್ಕೆ - pandipakke, Can.; கற்குறவை - karguravai, Tam.). Title from clinging to rocks. Can. from (pandi, can. pig + pakke, can. bird); pig-fish. Tam. from (kal, tam. stone + kuravai, tam. ophiocephalus genus). Hind. also (pattharchátá), meaning stone licker. Title otherwise Hill trout, Stone ophiocephalus. Discognathus lamta, cyprininæ, cyprinidæ, physostomi, teleostei [matsyam, 39], of naturalists. Alias Chondrostoma mullya; Cyprinus gotyla, lamta; Discognathus crenulatus, fusiformis, macrochir, rufus, obtusus; Garra alta, ceylonensis, gotyla, lamta, malabarica; Gonorhynchus bimaculatus, brachypterus, caudatus, gotyla, mcclellandi, rupeculus, stenorhynchus; Lobocheilos caudatus, gotyla, lamta; Platycara lissorhynchus, nasuta, notata. Garra from sanscrit. Air-vessel small, its posterior portion minute; ova small, numerous; greenish, with a bluish-green band along centre of body, and extending along middle of caudal fin; generally dark spot behind gill-opening; abdomen yellowish-green; fins yellowish, stained darker at margins; in malabar and canara some have a dark band along the side, with an orange one above and another below it; at least 8 inches in length; putrifies very rapidly after death, and generally dies almost as soon as removed from the water. No other common species here.——*Spotted doke* (پھلڈوک - phúldok, Hind.; ಬೆಳಿಕೊರವ - belikorava, Can.; మట్టు - mutte, Tel.; ଗୋରିସା - gorissa, Oor.; കുറുവ - kuruva, Mal.; குறவை - kuravai, Tam.). Title from black spots. Hind. from (phúl, hind. flower + dok, hind. ophiocephalus genus); from spotted fins. Can. from (bili, can. white + korava, can. ophiocephalus genus). Tel. means snout. Tam. from (kurumai, tam. shortness). Title otherwise Black caboose. Resembles the varaul, but is only a quarter of its size. Ophiocephalus [doke] punctatus, ophiocephalidæ [walking fish], acanthopterygii, teleostei [matsyam, 29], of naturalists. Alias Ophiocephalus affinis, indicus, karrouvei, lata. Karrouvei from tamul. Lower jaw the longer. Scales on summit of head large and irregular; twelve rows between snout and origin of dorsal fin; five rows between eye and angle of opercle. Those on top of head roughened in lines parallel with their outer edges, but on body are more horizontal. Colors vary with water they reside. Back greenish, yellow on sides and abdomen, with dark stripe along side of head; several bands from back pass downwards to middle of body. Fins spotted, caudal and vertical with narrow light edge, and dark basal band; ventrals white or gray. Some have scattered black spots over body and head, and this appears most common near the sea, and in the breeding season, whilst they are absent from the young. Freshwaters, generally in the plains, preferring the stagnant to the running. Foot or a little more in length.

DOLE (ढोल - dhóla, *San.*; ڈھول - dhol, *Hind.*; డోలు - dólu, *Tel.*; തവിൽ - tavil, *Mal.*; தவில் - tavil, *Tam.*). A large drum [paray] both sides covered with leather [chamrah] and played upon with the hands [sangeetam].

DOLPHIN (دلفین - dulfín, *Hind.*). The sea mammal so called [cadalpundry].——*Dolphin fish* (دلفین - dulfín, Ar.; خوک ماهی - khokmáhí, Pers.; سور مچھی - súwarmaççhí, Hind.). Pers. from (khok, pers. hog + máhí, pers. fish). Hind. from (súwar, hind. hog + maççhí, hind. fish). Coryphæna hippurus, coryphænidæ, acanthopterygii, teleostei [matsyam, 18], of naturalists [jantoo]. Alias Coryphæna chrysurus, dolfyn, dorado, japonica; Lampugus pelagica, immaculatus; dolfyn from arabic. Body elongated and compressed; occipital crest well developed. Cleft of mouth oblique, lower jaw longer. Lateral line curved to opposite end of pectoral, from whence it goes straight to centre of caudal. Back grayish, shot with gold; abdomen golden, covered with blue spots, which become black after death; dorsal fin light blue at base, becoming black towards summit. Sea; 5 feet or more in length; common in Madras, and eaten by natives. No other common species here.——*Dolphin's nose* (డాల్ఫినునగ్రము - dálp'hinuagramu, Tel.; மூக்குமலை - múkkumalai, Tam.). From (múkku, tam. nose + malai, tam. hill).—"*a*" Promontory; Vizagapatam dist., Vizagapatam division; lat. 17° 41′; long. 83° 20′; from Vizagapatam S. 1 mile. At southern entrance of Vizagapatam harbour forming, with ruined town on it, a conspicuous landmark to mariners. The light, formerly shown here, was destroyed in the cyclone of 1876 and has not been replaced. A flag is hoisted every morning at 8 A.M. and lowered at 9 A.M. to indicate correct time to the shipping in the roads. The remains of an old Dutch fort exist on its northern face.—"*b*" Hill; Neilgherry dist., Paranginaud division; lat. 11° 22′; long. 76° 54′; from Coonoor E.N.E. 4¼ miles. Promontory above Kotagherry gorge. View of Catherine falls and plains of Coimbatore and Salem.

DOMBA (තෙල්දොඹ - teldomba, *Singh.*). Poon [q.v.] oil.

DOMBAR (ڈومرا - domrá, *Hind.*). From (dommi, tel. a multitude). A wandering tribe. Men and women are singers and gymnastic performers; usually possess cattle [maud] and asses [gadhah], but do not engage in the carrying trade; traffic in pigs [soor] and asses, and sell mats [boriyah], baskets [tokrah], and combs; travel with portable huts resembling the top of a country cart; eat all sorts of flesh and usually wear heavy cloths; some are agricultural laborers. They worship Polairamma. Numbers about 12,000 [jauty].

DONA (డొన - dona, *Tel.*). Sacred pool in hills [teertam].

DONEY (డోనె - dóne, *Tel.*; தறிமரம் - tarimaram, *Tam.*). Title from teloogoo. Tam. from (tari, tam. loom + maram, tam. wood). Tam. also (páççutti), meaning warp + roller. Distinguish from Dhony [q.v.]. A wooden revolving bar, round which the woven cloth is wound; opposite of the warp-beam or mady cumboo [nesavoo].

DONKA (డొంక - donka, *Tel.*). From (donku, tel. to be depressed). Pathway.

DOOB (دوب - dúb, *Hind.*). From (durv, san. to hurt); from sharp grass blades [doorvay]. Same as Hurrially. Distinguish from Daub [q.v.].——*White doob* (வெள்ளறுகு - vellaruga, Tam.). Same as Small chiretta.

DOODH (دودھ - dúdh, *Hind.*). From (dugdha, san. milk). Milk [paul]. Very common plant term. Compare:—Holarrhena antidysenterica (dúdhíkílakrí), milk stick; Oxystelma esculentum (dúdhlatá), milk creeper; Tabernæmontana coronaria (dúdhmográ), milk jasmine. See also Euphorbia thymifolia, Ichnocarpus frutescens, Wrightia tomentosa. See gloss. paragraphs.——*Doodhy opium* (دودھی افیم - dúdhíafím, Dec.). Title from large quantity of milky juice. Soft, dark in color and weaker than Malwah opium [aphainam].——*Doogdhyam* (दुग्ध्यं - dugdhya, San.). From (duh, san. to milk). Butter. Doogdhya krishnan is an epithet of krishnan in one of his manifestations when he is induced by his mother Yashoday to eat butter while in the act of crawling.

DOODOOGA (हूम् - húm, *Mahr.*; దుద్దుగ - dudduga, *Tel.*; நெட்டநாரட்டி - nettanáratti, *Tam.*). Tam. from (nedu, tam. tall + nár, tam. fibre). Tel. also (chilakadudnga), meaning parrot + the plant; (chittadudnga), meaning small + the plant. Tam. also (núlilaimaram), meaning thread + leaf + tree. Botanically Polyalthia cerasoides, benth. & h. f., anonaceæ [vricsham, 4]. Alias Guatteria cerasoides; Uvaria cerasoides. Tree; leaves oblong or lanceolate, acute, pubescent beneath; flower bearing shoots almost abortive; lateral ones leafless; peduncles solitary, terminal, with one or two bracteas at their base; calycine lobes nearly as long as the corolla; petals equal, oval, oblong, thick, carpels globose, dark red, size of a cherry [auloo], on stalks nearly twice their length; a moderate-sized tree; flowers in hot months; flowers fragrant, greenish. Wood olive-grey, moderately hard, close-grained. Other species are:—Coffeoides,

coffee [q.v.] plant; abundant in wynand; in flower at all seasons; young leaves come out, brilliant red color; coorumbars make ropes from bark, which when fresh has strong smell of ammonia; soft wood. Fragrans, fragrant doodooga or parrot doodooga, malabar. Korinti, climbing shrub; malabar, tanjore, courtallam. Longifolia [ashocam]. Persicæfolia. Rufescens. Suberosa, tree; flowers small greenish-white; flowering throughout year; wood close, tough, durable.——*Black doodooga* (گیدڑروکھ - gídarrúkh, Hind.; నల్లదుద్దుగ - nalladudduga, Tel.). Hind. from (gídar, hind. jackal + rúkh, hind. tree). Tel. from (nalla, tel. black + dudduga, tel. the plant, polyalthia cerasoides, bth. and hook. f.). Tel. also (peddachilakadudduga), meaning large + parrot + the plant, polyalthia cerasoides, bth. and hook. f. Botanically Miliusa velutina, hook. f. and th., anonaceæ [vricsham, 4]. Alias Uvaria velutina, villosa. Tree, with densely tomentose branches; leaves small, ovate or oblong, acuminated, cordate at the base, densely velvety beneath; peduncles branched; pedicels three to six slender, elongated, densely tomentose, without bracts; sepals tomentose; outer petals resembling the sepals, inner ones broad-ovate, tomentose without, dark-brown and somewhat glabrous within; ovaries velvety; carpels pubescent, short-pedicelled, baccate, black; seeds one to two; flowering in march and april. Wood yellow when fresh cut, grey or greyish-brown when dry; moderately hard. Other common species are:—indica, nilagirica, wightiana.

DOODY (దుడ్డు - duddu, *Tel.*; துட்டு - tuttu, *Tam.*). From (dvi, san. two) [do, dwan, dwi]. Ancient copper coin. An old scale is:—10 cash = 1 doody, 8 doodies = 1 fanam, 45 fanams = 1 pagoda. A more modern scale is:—2 dooggaunies = 1 doody, 3 doodies = 1 anna [naunyam, 2 a, b, c]. Approximate actual valne, 1 doody = 4 pies. No coin of the name current. At Madras equal to 2 pies and same as dooggauny. Same as Tel. dub. See vol. I, 609.

DOODY (దూది - dúdi, *Tel.*). Cotton [q.v.] wool [punj]. Distinguish from Doodh.——*Doodeycoolam* (దూదేకుల - dúdékula, obl., Tel.). From (above + éku, tel. to clean). A class of Mussalmans who clean cotton [jauty].——*Doody paula* (దూదిపాల - dúdipála, Tel.). Cotton + milk plant. Plant name common to:—Dregia volubilis; Oxystelma esculentum. See gloss. paragraphs.

DOOGARAUZPATAM (దుగరాజపట్నము - dugarájapatnamu, *Tel.* dugarázpatnam*) [dhroovam]. From (dhruvarádzu, tel. a king + pattana, san. town). Tel. also (svarnamukhidugarájapatnamu), as being near mouth of Swarnamookhy. Sanscrit name (dhruvarájapattana); also (yuvarájapattana), meaning heir apparent + town. Village, Port; Nellore dist.; Goodoor tal.; pop. 2,598; acres 8,313; lat. 13° 59′; long. 80° 12′; from Goodoor E.S.E. 23¾ miles; from Madras N. 61 miles; from Nellore S.S.E. 35 miles; from Poody N.N.W. 9½ miles; from Toopily S.E. 4¼ miles. Called Armegam by the English. On the Coromandel coast [q.v.], on the western shore of the northern inlet forming communication between Poolicat lake and the Bay of Bengal, nine miles south of the embouchure of the Swarnamookhy. South-east of the outward or seaward mouth of the inlet is Blackwood harbour. Armegam shoal shelters it in certain directions, while Poody point and shoal and the mainland protect it on other points; so that ships might, if they chose, lie here in safety. It is the only place on the Coromandel coast which offers any real protection to ships during an easterly gale. During the north-east monsoon [q.v.], the sea breaks very high on the shallow ridge of the shoal, rendering the harbour within comparatively smooth. One of the earliest English possessions on the Coromandel coast. In February 1625, the East india company established a factory, the ground being obtained from the Rajah of Vencatagherry by the local Curnum [q.v.] or Canoougo [q.v.] patnaswaumoola, armoogam moodelly, after whom the factory [aurang] was called. On the 24th September 1861 on the removal of the establishment to Chennacooppam [q.v.], the modern Madras, the place was abandoned. On the 31st July 1801 it was ceded with the rest of the Carnatic [q.v.] to the East india company by His Highness Prince Azeem ood dowla, Nawaub [q.v.] soobahdar [q.v.] of Arcot. Old fort. Formerly the chief of a group of small ports lying near Armegam lighthouse, but the export trade by sea has gone down. Trade with Madras, now carried on by canal, consists of grain and firewood and sometimes cured fish. It still possesses a customs station and a travellers' bungalow. The salt manufactured here is of some repute. Armegam lighthouse is five miles distant. Trig. station at the Traveller's bungalow; lat. 13° 59′ 3·51″; long. 80° 12′ 1·13″; from Goodoor E.S.E. 24 miles; from Pambaly N.N.W. 4½ miles; from the sea W. ½ mile. A flagstaff has lately been erected to mark the site of this ancient English settlement.

DOOKKAR (ڈکر - dukkar, *Hind.*). Corruption of (shúkara, san. hog). Wild hog; term of abuse [soor].

DOOKKY (దుక్కి - dukki, *Tel.*). From (dunnu, tel, to plough). A ploughing. Rain is mensured by this; equivalent to an inch [q.v.] of rain [mazhay]. Padoonoo [q.v.] is more.

DOOMAGOODEM (దుమ్ముగూడెము - dummagúdemu, *Tel.*). From (dummu, tel. dust + gúdemu, tel, village). Braminical tradition that Rama fought here with Raucshasans and the dust obscured the sky. Zemindarry, Village, Head-quarters of a sub-divisional officer D.P.W.; Godavery dist., Bhadrachellam tal.; pop. 2,475; lat. of village 17° 52′; long. 80° 56′; from Bhadrachellam N. 13 miles; from Cocanada W.N.W. 108 miles. On the Godavery. Until recently head-quarters of the Upper godavery engineering works. The first barrier on the Godavery is here. An account of the anicut [q.v.] works now in abeyance will be found in a foot-note to the article on Public Works, Buildings and Roads, in vol. I, chapter IV. There is considerable timber trade. Branch head-quarter station of Church mission society.

DOOMPA (దుంప - dumpa, *Tel.*). Tuberous root [gaddah]. Compare:—Dioscorea glabra (éddutókadumpa), ox tail tuber; Dioscorea pentaphylla (pandimukkudumpa), pig's nose tuber; Habenaria platyphylla (tsukkadumpa), spotted tuber; Helmia dæmona (pulidumpa), tiger tuber; Methonica superba (pottidumpa), stunted tuber. See gloss. paragraphs.

DOON (دون - dún, *Hind.*). A valley [cona].

DOOR (दुर् - dur, *San.*). Difficult; bad.——*Doorga* (दुर्गा - durgá, San.; துர்க்கை - turkkai, Tam.). From (above + gam, san. to go). Means inaccessible.—"*a*" *δημήτηρ* of Greeks; Ceres of Romans; Isis of Egyptians. A Shacty [q.v.] or wife of Shiva, but often identified with the village goddess of this country. She is represented with a sheep's head, standing on the giant Simhamookhasooran or the lion-faced, whom she killed, though as often as his head was severed from his body a new one sprang up. Her head is fiery and adorned with different jewels. On her forehead she wears a crescent made with sacred ashes [vibhooty] of burnt cow-dung [shauny]. In five of her six hands she holds respectively, a ring, a sword, a trident, a goad, and a skull. Doorga was the daughter of the giantess Mahamye and the sage Cashyapan. She has various names, for instance:—Ajomookhy or the sheep-headed, Ayyay or mistress, Bhagavaty or goddess, Neely or the blue one, Showry or heroine, Shóoly or she who holds a trident, Soondary or the beautiful, Vaulgeicondole or she who holds a sword, &c. Her pagodas [q.v.] correspond to those of Ayenaur [ayen], and the principal images in them, besides her own, are of Vigneshwaran [q.v.], Veerabhadran [q.v.], and Bhadra cauly [q.v.]. The Poojarry [q.v.] makes offerings every Friday. He receives also offerings brought in fulfilment of vows. The annual festival is like those of other Graumadevatays [q.v.]. She is, like Chamoondy [q.v.], supposed to give valour and to assist in the practice of the black art. Distinguished by her fair complexion from the black Bhadra cauly. See vol. I (73), (78) [matam].—"*b*" Name common to both sexes especially with Pariahs [peyar]. Similarly Doorgaprasaud, from (prasáda, san. favor), one who has doorga's favor; Doorgauchellam, from (achala san. hill); Doorgojee, from (jí, hind. master).——*Doorgam* (दुर्ग - durga, San.). Means inaccessible, Defile, gorge. Mountain fortress, castle. Common suffix in place names in the form of droog [q.v.].——*Doorga navamy* (దుర్గనవమి - durganavami, Tel.). Means the goddess + ninth day. Lunar festival [pundigay, 3a], subject to intercalation. The ninth lunar day of the waxing moon of the eighth lunar month Caurteecam [mausam], between 25th October and 25th November. Sacred to Doorga. Anniversary of the beginning of the Krityoog. Same as Krityoogandy.——*Doorga poojay* (దుర్గపూజ - durgapuja, Tel.). Means Doorga worship [pundigay, 6a]. Same as Dusserah.——*Dooryodhanan* (दुर्योधन - duryódhana, San.). From (above + yudh, san. to fight). The eldest son of Dhritaraushtran, who fought with the Pandavas [mahabhaurat].

DOORAST (درست - durust, *Hind.*). Persian. In repair [shikast].

DOORVAY (दूर्वा - dúrva, *San.*). From (durv, san. to hurt); from sharp blades of grass [doob]. Same as Hurrially [q.v.].

DOOTAN (दूत - dúta, *San.*). From (du, san. to go). A messenger of the gods [ganam]. The Gana nautans or Dootans are divided into three classes:—Shivadootans or shiva's messengers; Vishnoo dootans or vishnoo's messengers; Yamadootans or yaman's messengers. The Shivadootans are represented as red, short, and thick, like bhootams; their hair-locks, twisted together, rest on their heads like a cap; from their mouths project two large lion's teeth; they have four hands, in which they hold respectively, a snake, a cord, a trident, and a wine-jug; their body is covered with various ornaments; by these eeshwaran [q.v.] fetches the souls of his devotees at death to keilausam [q.v.] in a pooshpacavimaunam or self-moving chariot. The Vishnoodootans have their hair dressed like the shivadootans, and also like them have lion's teeth; otherwise they resemble vishnoo; that is to say they are of blue color; wear the tirnaumam [q.v.] on their forehead, arms, and breasts; wear round their necks a rosary of toolsimany [q.v.]; and hold in their four hands respectively, a chunk [q.v.], a chuckram [q.v.], a battle-axe, and a club; through these vishnoo fetches his devotees to veicoontam [q.v.]. The Yamadootans are painted quite black, with horrible faces and large teeth; in their hands they carry a trident, a club and ropes; and in their girdles, daggers; their business is to carry the souls of the wicked into naracam [q.v.], where there are two hundred and eighty millions of places of torture; but they cannot lay hold on any one before his fixed period of life is elapsed, and the souls of the pious

they cannot touch. When such die as are neither virtuous nor wicked, the messengers of yaman and those of shiva or vishnoo come into conflict with each other, each party claiming the indifferent souls [matam, samsauram].

DOOTTALORE (దుత్తలూరు - duttalúru, *Tel.*). From (dutta, tel. pot + úru, tel. village). Village; Nellore dist., Oodayagherry tal.; pop. 3,459; acres 18,835; lat. 14° 51′; long. 79° 27′; from Nellore N.W. 47 miles; from Oodayagherry E. 7 miles from Madras N.W. 137 miles. Largest village in the talook [q.v.]. Trade in indigo [q.v.]. Zonna [cholum] cultivated. Soil fertile, black clay [calimunn]. Small hill on west of village. Four tanks in a line.

DORAY (ಧೊರೆ - dhore, *Can.*; దొర - dora, *Tel.*; துரை - turai, *Tam.*). Ruler; master [ayyan, iyen]. With the Tamul and Teloogoo races is equivalent to the English words, sir, master, and to the Arabic sahib [q.v.]. Both in its singular and plural forms it is a title of the Conda dora, the chieftains in the mountains of Goomsoor. Suffix and prefix in Tamul proper names [peyar].——*Chinnadoray* (சின்னதுரை - shinnathurai, Tam.). Young gentleman, term for junior officers.——*Doragauroo* (దొరగారు - doragáru, Tel.). From (above + gáru, tel. honorific plural suffix). Honorific of doray, applied to Europeans especially [sahib].——*Dorasauny* (దొరసాని - dorasáni, Tel.; துரைசானி - turaisáni, Tam.). From (above + sáni, tel. wife). Lady.——*Dorasawmy* (துரைசாமி - turaisámi, Tam.). From (above + svámí, san. lord). Familiarly Doratchy. Hindoo 2nd or pers. name [peyar].——*Doraycunnan* (துரைக்கண்ணன் - turaikkannan, Tam.). From (above + kan, tam. eye); as precious as the master's eye. Hindoo 2nd or pers. name. Common among non-bramins [peyar].——*Dorayraghavan* (துரைராகவன் - turairágavan, Tam.). From (above + rághava, san. ráma of the line of raghu). Hindoo 2nd or pers. name [peyar].

DORIYAH (ڈوریا - doriyá, *Hind.*). From (dorí, hind. string). A striped muslin [charkhauny, sheelay].

DORNAUL (తోరణాల - dóranála, *Tel.*). From (tórana, san. outer entrance of a city) [toranam]. From its being considered one of the entrances of the temple of Srisheilam.—"*a*" Village; Kurnool dist., Marcapore tal.; pop. 1,814; acres 5,979; lat. 15° 55′; long. 79° 08′; from Kurnool E. 69 miles; from Marcapore N.W. 16 miles. At E. entrance of Muntraula canama pass, which is also known under this name. Formerly seat of a poligar [q.v.]. Descendant of the family still resides at Bommalaupooram.—"*b*" Ghaut; Nellore dist., Oodayagherry tal.; lat. 14° 41′; long. 79° 14′; from Nellore N.W. 58 miles; from Oodayagherry S.W. 15 miles. Pass over the Eastern ghauts [q.v.]. The main road to Cuddapah from Nellore and the coast is through it. The road from Nellore to the ghaut [q.v.] is 58 miles in length, and the distance beyond to Cuddapah is 52 miles. Carts are allowed to pass only in the day.

DOROOVOO (دارو - darú, *Hind.*; దొరువు - doruvu, *Tel.*; துரவு - turavu, *Tam.*). From (travvu, tel. to dig) [toorvoo]. A large well [bhauvy] made by excavating the sand [manal]. Seen in casuarina [chowkmaram] plantations. Dorvy is another form.

DOSS (ದಾಸ - dás, *Can.*; దాసుడు - dásudu, *Tel.*). From (dása, san. slave) [dausan]. Slave, worshipper. Originally affixed to names of Cauyasts and Shoodras, but now common among all castes. Hindoo third name [peyar.]——*Ramdoss* (రామదాసుడు - rámadásudu, Tel.). One who adores Rama [peyar].

DOST (دوست - dost, *Pers.*). Friend. Prefixed to an alam forms a lacab; as Dost ally, friend of ally. Shiah name [ism]. A Dost ally was second Nawaub [q.v.] of the Carnatic [q.v.] from 1732 to 1740; killed in 1740 in an action with the Mahrattas who had invaded the Carnatic [charitram].

DOWGAUM (దవుగాం - davugám, *Tel.*). From (dhau, oor. red soil + gám, oor. village). Village; Ganjam dist., Zemindarry tract tal., Dhauracote estate; lat. 19° 39′; long. 84° 30′; from Chetterpore W.N.W. 40 miles; from Russellcondah S.S.W. 22 miles. Near junction of Sooradah and Shergadah roads at 2 miles from Aska. Rooshcoolya project head-quarters.

DOWLA (دولہ - daulah, *Ar.*). Empire. Lacab suffix of Field marshals under the Abbaside caliphs. Since become common; as Itibar ood dowlah, confidant of the empire [ism].——*Dowlat* (دولت - daulat, Hind.). Pers. form of above. Dowlat row a common Mahratta name.——*Dowlatabad* (دولت آباد - daulatábád, Hind.). From (daulat, ar. prosperity + ábád, pers. city). Town, Head-quarters of Tahsildar and Sub-registrar; Salem dist., Krishnagherry tal.; pop. 3,345; acres 306; lat. 12° 31′; long. 78° 16′; from Krishnagherry S.S.E. 1½ miles; from Salem N. 59 miles. Also known as New krishnagherry. The country around is level. Chetties and weavers predominate. Car festival of Navaneeta krishnasawmy [doogdhya krishnan] in May lasts for ten days.

DOWLAISHWERAM (ధవళేశ్వరము - dhavaléshvaramu, *Tel.* dowlaishweram *). From (dhavala, san. white + íshvara, san. lord). Sanscrit name (dhavalagiri), meaning white + mountain. Town, Head-quarters of Superintending Engineer; Godavery dist., Rajahmundry tal.; pop. 10,492; acres 1,869; lat. 16° 56′; long. 81° 49′; from Cocanada W. 30 miles; from Rajahmundry S. 4 miles. At the bifurcation of the Godavery, where the great anicut, 1,400 yards long, was constructed in 1848. Connected with the coast at several points by numerous navigable canals of the Godavery irrigation system and also with Madras through the Kistna system and the Buckingham canal [q.v.]. During the construction of the anicut, Dowlaishweram, as the head-quarters of the Sappers and Miners and a large Engineering staff, was of much importance. Government workshops now. During the wars between the Saitoopaties of Rajahmundry and the Mahomedan rulers of Ellore in the fifteenth and sixteenth centuries, Dowlaishweram was the scene of frequent struggles. Houses of former European residents, built on hills in the neighbourhood, are now in ruins. Quarries of good building stone are worked largely. Close to the town are the ruins of a fort built by the Chalookya vijayauditYan; on the top of a small hill called Dhavalagherry is the temple of Janardana sawmy facing the Godavery.

DOWLE (ڈول - daul, *Hind.*). Mode, manner. An estimate, especially of probable revenue. As applied to abkarry [q.v.] means an agreement between a wholesale renter and his shopkeeper by which the latter agrees to take a certain quantity of spirits for sale each month. Distinguish from Cowle.——*Dowle vasool bauky* (ڈول وصول باقی - daulwasúlbákí, Hind.). Demand, collection, and balance [jumma vasool bauky], the common account rendered of revenue officers.

DOZAK (دوزخ - dozakh, *Hind.*). Hell. The Mahomedans reckon seven hells:—Jahannam a deep pit, destined for such of the worshippers of the true God as are guilty; Lazah or blazing flame, for the Christians; Hootama or intense fire, for the Jews; Saur or flaming fire, for the Sabians; Sakar or scorching heat, for the Magi or Gabars or fire worshippers; Jaheem or large hot fire, for the pagans and idolators; Hauviya or dark bottomless pit, for hypocrites. For heaven see Bheest.

DRAGOMAN (ترجمان - tarjumán, *Hind.*). Title from (tarjamah, ar. to interpret); g is soft. An interpreter [doobash].

DRAGON'S BLOOD (खड्गमृगरक्त - kadgamrigarakta, *San.*; دم الاخوين - dammulakhwain, *Ar.*; خون سیاوشان - khúnisiyáwashán, *Pers.*; دم الاخوين - dammulakhwain, *Hind.* and *Dec.*; ಖಡ್ಗಮೃಗನೆತ್ತರು - khadgamriganettaru, *Can.*; ಖಡ್ಗಮೃಗನೆತ್ತರು - khadgamriganetteru, *Too.*; ఖడ్గమృగంనెత్తురు - khadgamrigamnetturu, *Tel.*; காண்டாமிருகரத்தம் - kándámirugarattam, *Tam.*). Title from size and appearance of tree and color of resin. San. from (khadgamriga, san. sword beast, rhinoceros + rakta, san. blood). Ar. from (damm, ar. blood + akhwain, ar. two brothers). Pers. from (khún, pers. blood + siyáwash, pers. father of cyrus); in allusion to his love for his step-mother. Hind. from arabic. Can. from (khadgamriga, san. rhinoceros + nettaru, can. blood). Too. from canarese. Tel. from (khadgamriga, san. rhinoceros + netturu, tel. blood). Ar. also (dammussubán), meaning dragon's blood; (dammuttinnín), meaning dragon's blood; (kátetuddamm), meaning blood-dropping gum. Pers. also (ázhdahákhún). Hind. also (indarume); (hirádukhi); (rangbarat). To be distinguished from the Gum dragon or Tragacanth [kateerah]. Greek κιννάβαρι ἰνδικὸν; the mineral cinnabar, with which this vegetable product was thus confounded, is the red sulphuret of mercury [shangarf]. Latin Sanguis draconis. Title otherwise Blood-shedding tree, Brother's blood, Cyrus blood, Rhinoceros blood. The produce of:—Calamus draco, willd., a species of rattan [q.v.] palm [taur] of the eastern archipelago; Pterocarpus draco, linn., allied to the indian kino tree or pterocarpus marsupium, roxb. [common vengay], of south india; Dracæna draco, linn., a liliaceous tree of madeira and the canary islands. An inodorous, insipid resin [gond, raal] or coloring principle, obtained from the surface of the ripe fruit; color in lump is dark-brown-red; in powder, bright red; friable; of shining fracture; contains benzoic acid [saumbrauny pool]; insoluble in water, but readily soluble in alcohol, ether and oils [yennay]. Discarded medicine by european practitioners; veidyans [q.v.], recommend solution in arrack [q.v.] as external application to head and temples in syncope. Employed as a coloring matter [shauyam], as an ingredient in varnishes [rangh] and in the composition of tooth-powder; used for preparing gold lacquer, for staining marble.——*Indian dragon's blood* (గండామృగంనెత్తురుచెట్టు - gándámrigamnetturuchettu, Tel.). Same as Common vengay.——*Madeira dragon's blood* (دم التنين اندلوسی - dammuttinníniandalusí, Pers.). From dracæna draco.——*Socotra dragon's blood* (دم التنين سقوطری - dammuttinnínisokotrí, Pers.). From pterocarpus draco.——*Sumatra dragon's blood* (دم التنين سماترا - dammuttinninisumátrá, Hind.). From calamus draco.

DRAVIDA (द्रविड - dravida, *San.*). The equivalence of the words Dravida and Tamul [q.v.] has been proposed. It is not improbable considering the surd character of the last letter in தமிழ். Both will then be identical with the Δαμυρική of Ptolemy. No other etymology is known.—"*a*" Early Sanscrit name for the Tamul people, their language, and their country. In later

Sanscrit a generic name for all South indian peoples, &c., showing that the Aryans then regarded them as allied. Menoo does not realize the aboriginal nature of the Dravidians, but says:—"The following tribes of Cshatriyas have gradually sunk "into the state of Vrishalans from the extinction of sacred rites "and from having no communication with Bramins, viz., "Powndracas, Odras, Dravidas, Cambojas, Yavanas, Shaucas, "Pauradas, Pahlavas, Cheenas, Kirautans, Daradas, and Kha-"shas." Varauha mihirau places the Dravidas in the south-west, but mentions also an eastern half of the Dravidas. The distinction is evidently between the west and east coast civilizations. Dravidam is spoken of in the Brihat samhitay [q.v.] of Varauha mihiran as being divided into Cholam, Paundyam, Keralam, Carnautacam, Calingam, and Andhram. Comaurila bhatt calls the language of the south Andhradravidabhashay, joining the Teloogoos to the Tamuls [puncha dravidam].—"*b*" Modern authorities make twelve divisions. The four chief being:—Tamul, spoken in paundyam, cholam, and eastern keralam [q.v.], i.e., throughout the central and southern districts of the presidency; teloogoo, the language of the calingam and andhram countries, or the mahomedan telingana [q.v.], the british northern circars [q.v.]; malayalam, spoken in western keralam, i.e., malabar, trayancore, and cochin; and canarese, in carnautacam [q.v.], or canara, mysore, and a few tracts of the wynaud and coimbatore. Tooloo is spoken round Mangalore and in Coorg. The other six are uncultivated dialects of hill-tribes. The dravidian languages are distinct in the same way as spanish from portuguese, irish from welsh, hebrew from aramaic, hindee from bengallee.—"*c*" The Dravidian languages have adopted sanscrit words in different proportions. Of the cultivated dravidian languages, the percentage of sanscrit words is smallest in tamul and greatest in malayalam; the proportion is less in teloogoo than in canarese; in teloogoo about half the vocabulary consists of sanscrit words, either pure or modified. In the newer Dravidian tongues composition is regarded as refined in language in proportion to the amount of Sanscrit. In Tamul poetry the reverse holds good. In this few Bramins have written anything worthy of preservation. The language has been cultivated and developed with immense zeal and success by Tamulian shoodras, and the highest rank in Tamul literature which has been reached by a Bramin is that of a commentator.—"*d*" The whole of the ethnological portion of this work is devoted to showing that the Dravidians are a totally distinct nationality. See in particular vol. I (33), (42). As illustrating their indifference however to everything lying outside their own sphere and interests, and to comparative philology, it is noticeable that no term belonging to the Dravidian languages themselves has ever been used to designate all the members of the nation [bhaushay].——*Dravida bramin* (द्राविड-ब्राह्मण - dravidabráhmana, San.).—"*a*" Bramins are classed historically or theoretically under two great divisions, named Gowda and Dravida, each of which consists of five tribes. These are mostly separated by geographical boundaries. The following is the Sanscrit shlocam usually quoted:—महाराष्ट्रांध्र द्राविडाः कर्णाटश्चैव गुर्ज्जराः द्राविडाः पंचधा प्रोक्ता विंध्यदक्षिणवासिनः सारस्वताः कान्यकुब्जा गौडोत्कल मैथिलाः गौडाः पंचविधा प्रोक्ता विंध्यादुत्तरवासिनः—Dravidas live south of the Vindhya range and consist of fiv etribes, Maharashtra [mahratta], Andhra [teloogoo], Dravida [tamul], Carnauta [canarese], and Goorjara [goozeratty]; Gowdas inhabit the north and are divided into Sauraswata of the concans, Caunyacoobja, Gowda, Ootcala [ooriya], Meitila of upper Bengal. The river Nerbudda in Central india is commonly regarded as a geographical line of demarcation between the two. The former are of greater antiquity than the latter.—"*b*" The Gowdas consist of these tribes; Caunyacoobja, Gowda proper, Meitila, Ootcala, Saraswat. The Dravidas consist of these tribes; Carnauta, Dravida proper, Goorjara, Maharashtra, Telinga. The Caunyacoobja bramins belong to the old kingdom of Canouj, and are found dispersed over a large portion of the North-western provinces, as far as Benares, where they are very numerous; the Saraswat bramins are in the North-west of India; the Gowdas proper are found in the vicinity of Delhi and in Bengal; the Meitilas inhabit the northern part of Behar; the Ootcalas have their home in Orissa. The Maharashtras belong to the Mahratta country; the Telingas to Telingana; the Dravidas to the tamul-speaking districts; the Carnautas to the upland Carnatic; the Goorjaras to Goozerat. Besides these main tribes there are twenty-five supplementary tribes.—"*c*" Although some of these tribes may partake of cooked food together, none intermarry. The five Gowda tribes are entirely distinct from one another, both in regard to marriage and eating food; and are likewise, in these respects, distinct from the five tribes of Southern bramins. The five Dravidas are not quite so exclusive in their relations to one another. None of them intermarry; nevertheless four out of the five can eat together, the Maharashtra, Telinga, Dravida, and Carnauta; none of these however eat with the Goorjara tribe, owing to certain peculiarities in this tribe not found in the rest. Gowdas partake freely of the flesh of many animals, but Dravida bramins do not eat animal food of any kind. The supplementary tribes keep themselves aloof from one another and from all other tribes.—"*d*" The sectarian divisions are practically more operative than any of the above tribal divisions. The following are sects among Dravida bramins, viz.:—Caupaulica or followers of bheiravan a son of shiva, Gaunapatya or followers of ganesh, Shaucta or followers of doorga, Shreeveishnava of ramaunoojan, Smarta, Madhwa, Sowrah or followers of soorya. Caupaulican, Gaunapatyan, Shauctan, and Sowrah, are not to be found at all in a body in Southern india. For the other heads see the heads in this glossary.—"*e*" Also as Dravidas proper, a designation of a branch of Smarta bramins themselves, a division of the general Dravidas. See Bramin [jauty].——*Dravida desham* (द्रविडदेश - dravidadésha, San.). Country of the Dravidian languages. The Southern peninsula of India. One of Hwen Thsang's divisions of S. india, Ta-lo-pi-cha in Chinese writing. Its capital, Kien-chi-pu-lo, or Canchipoora, or Conjeeveram. Regarding the history of the ancient Dravidian dynasties, nothing can be added to what is stated in vol. I (115) to (132) [charitram].——*Dravidam* (द्रविड - dravida, San.). Tamul country.——*Dravida prabandham* (द्राविडप्रबन्ध - drávidaprabandha, San.). From (prabandha, san. composition). Same as Tirvyemozhy, Veishnava work.——*Dravira* (द्राविर - drávira, San.). Bengalee form of Dravida.——*Puncha dravidam* (पञ्चद्राविड - pañchadravida, San.). In opposition to Puncha gowdam; the five great ancient kingdoms south of the Vindhya mountains, or Dravida, Carnauta, Goozerat, Maharashtra, Telinga. So in languages the colloquial languages of India are divided by the Sanscrit pundits into two classes, each containing five dialects. These dialects are denominated respectively the five Gowdas and the five Dravidas. By the Gowda languages are meant the Bhaushays, or popular dialects of N. india, at the head of which stands the Bengalee, the Gowda proper. The five Dravidas are the Telinga, Carnautaca, Mahratta, Goorjara, and Dravida or Tamul proper. The Mahratta and Goorjara languages are erroneously included in this enumeration, if any attention is to be paid to structural considerations; in that respect they belong to the northern group [bhaushay].

DRAVYAM (द्रव्य - dravya, *San.*). From (dru, san. to go) [draucshay, drauvacam]. Literally a liquid.—"*a*" Elementary substance, the first category. Nine kinds of Dravyam are usually enumerated, viz.:—pritivy, earth; ap, water; tejas, fire; vayoo, air; aucausham, ether; caulam, time; dic, space; autman, soul; manas, mind. The first five of these are the material world. The Jeinas reckon only six dravyams, viz.:—jeevam, soul; dharmam, virtue; adharmam, vice; poodgalam, matter; caulam, time; aucausham, space. For category, see Padaurtam; for elementary substance, see present head; for matter, see Bhootam; for organic and inorganic, see Indriyam and Anindriyam; for organic kingdom, see Ganam [jantoo, vricsham]; for organic class, see Vargam; for organic order, see Santaunam; for organic family, see Coolam; for organic genus, see Jauty; for organic species, see Bhaidam. Oopa prefixed to either of the above means a sub-head. For inorganic minerals, see Dhautoo.—"*b*" Wealth. Puncha dravyam are five sources productive of wealth, viz., from mountains, forests, fields, towns, and the sea; and each of those again yield five kinds.——*Draucshay* (द्राक्षा - drákshá, San.). From (dru, san. to run) [drauvacam, dravyam]; from juice. Title otherwise Vine. Botanically the Vitis genus, ampelideæ [vricsham, 42]. Sarmentose shrubs; climbing, usually by means of leaf-opposed tendrils, rarely rooting; leaves of some simple, undivided or variously lobed; of others, compound; flowers small greenish and in leaf-opposed panicles; berry ovoid or globose. The species best known to the natives are:—auriculata [vegetable nerinjy], carnosa [acid naralay], indica [country angoor], latifolia [jungle angoor], lanata [large naralay], lanceolaria [large acid naralay], linnæi [small acid naralay], pedata [naralay], quadrangularis [piranday], setosa [bristly piranday], vinifera [angoor]. Other s. indian species indigenous or naturalized are:—adnata, discolor, elongata, erioclada, himalayana, pallida, repanda, repens, rheedii, roxburghii, tomentosa.——*Drauvacam* (द्रावक - drávaka, San.). From (dru, san. to dissolve) [draucshay, dravyam]. Any strong liquor, especially a mineral acid [poolipp, tezaub]. Pottle ooppoo drauvacam, from (petluppu, tel. nitre) is nitrous acid [shorah]. Swarna drauvacam, from (svarna, san. gold) is Aqua regia, nitro-muriatic-acid; also called Swarna bhaidy, meaning gold dissolving, and Swarna vaidhay, meaning gold-piercing.

DRICAUNAM (द्रकाण - drikána, *San.*). From Greek δέκανος. The third of a zodiacal sign [raushy].

DRIK (दृक् - drik, *San.*). Sight.——*Drikmundalam* (दृङ्मण्डल - drinmandala, San.). Great circle perpendicular to the horizon [cshitijam], and passing through the zenith [ootcham]. Otherwise vertical circle or circle of altitude. The altitude [avanataumsham] of a celestial object is its distance above the horizon; or it is the arc [chaupam] of a vertical circle intercepted between the object and the horizon. The zenith distance [nataumsham] of a celestial object is its distance from the zenith of the observer; or it is the arc of a vertical circle contained between the object and the zenith [jyotisham].

DROO (द्रु - dru, *San.*). From (dri, san. to split). Tree, wood.——*Droomam* (द्रुम - druma, San.). Tree [daur]. Plant second term. Ex., where transl. is of first term:—Alpinia galanga (kapidruma), monkey; Cordia obliqua (bhútadruma), devil;

Euphorbia tirucalli (vajradruma), adamantine; Ficus religiosa (bódhidruma), knowledge; Mangifera indica (mádhavadruma), spring; Melia azedarach (himadruma), dew; Securinega leucopyrus (apriyadruma), unliked. See gloss. paragraphs.——*Drowpady* (द्रौपदी - draupadí, San.). From (drupada, san. the king). A patronymic. Wife of the Pandoo princes. The joint wife of the five Pandoos [mahabhaurat]. Cf. Maroomakkatoyem, but the story cannot be in any way S. indian.——*Drowpady's hair* (കുതിരവാൽ - kutiravál, Mal.; துரோபதைக்கூந்தல் - turóbathaikkúndal, Tam.). Mal. from (kutira, mal. horse + vál, mal. tail). Tam. from (draupadí, san. the wife of the five pandavas + kúndal, tam. hair); from twining filiform character. Botanically Porana racemosa, roxb., convolvulaceæ [vricsham, 93]. Alias Dinetus racemosus; Porana dichotoma. Herb; flowers small white.

DROOG (दुर्ग - durga, San.; درگ - durg, Hind.). From (dus, san. prefix meaning difficult + gam, san. to go) [door]. A mountain fastness [doorgam]. Suffix in place names.

DRUMSTICK TREE (முருங்கை - murungai, Tam.). From appearence of pod. Same as Moringa.

DRY GRAIN (خشکاناج - khushkanáj, Hind.; మెట్టధాన్యము - mettadhányamu, Tel.; പുഞ്ചധാന്യം - puñchadhányam, Mal.; புன்செய்தானியம் - punseydániyam, Tam.). Hind. from (khushk, pers. dry + anáj, pers. grain). Tel. from (metta, tel. dry land + dhánya, san. grain). Mal. from (puñcha, mal. dry field + dhánya, san. grain). Tam. from (punsey, tam. dry land + dhánya, san. grain). Cereals which do not, like rice [paddy, nunjah], require artificial irrigation, being watered only by the rain. Compare dholl, which is a dry pulse. As a class, dry grains form a more nutritious dietary than rice, and their average composition may be taken as 9 per cent. of nitrogenous aliment, 2·6 of fat, 74 of carbo-hydrates and 2·3 of salts; the ash of the seeds when freed from silica, of which there is a considerable quantity, consists of about 50 per cent. of phosphoric acid in combination with magnesium, potassium and a little sodium; it contains no lime. Most of these grains are prepared for food by removing the outer husk, grinding the remainder into meal and making with this either cakes or a kind of thick porridge. In the case of raggy [q.v.] more especially, complete comminution and careful boiling are necessary to obviate indigestibility leading to diarrhœa and insufficient nutrition. The following is a Hindostany proverb:—دانہ کہا موٹھہ کا پانی پی سونٹھہ کا—"If "you eat millet [q.v.], drink ginger-water;" means, look before you leap. Varagoo [q.v.] is generally cooked in the same manner as rice; that is, boiled carefully and eaten whole. The manufacture of raggy or cholum [q.v.] bread has not yet been tried, though the Italians make their finest bread of the Panicum italicum. The Panicums, Pennisetums, Sorghums, and Eleusines, are called in English millets; there is no generic native term for this. The following are two key-lists in the briefest possible terms of the principal dry grains of s. india for which vernacular names are known; further information must be traced in the glossary paragraphs through the small-type cross references at end of this volume; see also vricsham, 7, for the method of expressing the products, &c., of plants in the dravidian languages.—"*a*" Amarantus paniculatus, brown spinach; Avena sativa, oat; Bambusa arundinacea, common bamboo; Coix lachryma, job's tears; Eleusine coracana, raggy; Hordeum vulgare, barley; Panicum frumentaceum, large shaumay; Panicum glaucum, coraly; Panicum italicum, italian millet; Panicum miliaceum, little millet; Panicum miliare, shaumay; Paspalum scrobiculatum, varagoo; Pennisetum spicatum, spiked millet; Sorghum saccharatum, sweet cholum; Sorghum vulgare, cholum; Triticum vulgare, wheat; Zea mays, maize.—"*b*" Bamboo, bambusa; Barley, hordeum; Cholum, sorghum; Coraly, panicum; Job's tears, coix; Maize, zea; Millet, panicum, pennisetum; Oat, avena; Raggy, eleusine; Shaumay, panicum; Spinach, amarantus; Varagoo, paspalum; Wheat, triticum.

DUB (డబ్బు - dabbu, Tel.; இடப்பு - idappu, Tam.).—"*a*" Coin. Same as Doody [naunyam, 2b]. Often used for money in general.—"*b*" Goldsmith's weight. 4 pagodas = 1 dub; 16 dubs = 1 tunkam [niray, 3b]. Approximate actual value, 1 dub = 216 grains. Kistna.—"*c*" Alumgheer dub is a copper coin still current in Hyderabad. Rama rajah dub struck by Rama roy, last king of Vijianugger; initial 'ra' occurs on both sides, on one reversed in the centre of a circle. Dubby is a cash-box, kept in temples to receive contributions.

DUBBEER (دبیر - dabír, Hind.). Writer, secretary [navees].

DUBBER (ڈبہ - dabbá, Hind.). Bottle [cooppy] formed of skins [chamrah] and used for holding and conveying spirits, oil, ghee, &c. These are made of all sizes, from a quart to 10 or 20 gallons. They are formed of untanned goat [vellaud] skins by stretching them when wet over unburned hollow clay forms, the edges being well rubbed down on the lower skin to cause adhesion. The clay core is readily removed after the bottle is dried in the sun. They are of nearly a globular form, roundish at the bottom, so as not to stand well. The aperture end is round like that of the bottom, but large in proportion to their size; the neck is short.

DUFFEDAR (دفعدار - dafadár, Hind.). From (dafa, hind. band of policemen + dár, pers. keeper). Head of a Dafa [q.v.]; now of an establishment of daloyets [q.v.] or personal peons [q.v.]. Also a non-commissioned native officer of infantry or cavalry next in rank to a jemadar [q.v.].

DUFTER (دفتر - daftar, Hind.; దస్త్రము - dastramu, Tel.; தஸ்திரம் - tasttiram, Tam.). From (daffat, ar. thick paper). A list, catalogue [daub, zaubitah]. A bundle of written documents [dastavaiz] tied together in a cloth. The place where records are kept, an office. Dufterbund is a record-keeper.

DUGONG (जलनर - jalanara, San.; جلمانس - jalmánus, Hind.; دويوڠ - duyung, Malay; ನೀರುಪಿಳ್ಳೆ - nírupille, Can.; నీరుపాప - nírupápa, Tel.; നീരാളി - nírâli, Mal.; මුදුඌරා - mûduúrá, Singh.; நீர்மனிதன் - nírmanithan, Tam.). Title from malay. San. from (jala, san. water + nara, san. man). Hind. from (jal, hind. water + mánus, hind. man). Can. from (níru, can. water + pille, can. child). Tel. from (níru, tel. water + pápa, tel. baby). Mal. from (nír, mal. water + ál, mal. man). Singh. from (múda, singh. sea + úra, singh. hog). Tam. from (nír, tam. water + manithan, tam. man). Halicore dugong, sirenia, mammalia [sastanam, 27], of naturalists [jantoo]. These animals feed entirely on plants, either plucked at the bottom of the sea, or on rocks laid bare by the retreat of the tide, and they do not venture far out to sea, but keep near the shore and the mouths of large rivers. Their pectoral mammæ, and peculiar physiognomy as observed when they raise their bodies partially out of water, led to the accounts by mariners of Tritons, Sirens and Mermaids. The Dugong skin uniform bluish, sometimes blotched with white beneath, or pale fulvous with white under parts; eyes very small; incisors nearly concealed; a few scattered bristles on the body. Up to 9 or 10 feet in length and upwards; usually 5 to 7 feet. The Dugong has been taken on the west coast as high as the coast of Canara. Found along the shore, and in the salt-water inlets of the Concan and South Malabar. Prized for oil [yennay], but not hunted on these coasts. The oil is obtained from the blubber, and is equal to cod-liver oil; a cure for diseases of the ear. The bone of the animal in fineness and hardness of grain, specific gravity, and appearance, approaches nearly to the nature of ivory [dant]. The flesh is often eaten.

DUMMERGUNDY (దుమ్మలగొండి - dummalagondi, Tel.). Hyæna [cazhoothay pooly], Anglo-indian term of ridicule.

DUNDORAH (ڈھنڈورا - dhandorá, Hind.). From (dhundhu, san. to search). Proclamation by beat of tom-tom [q.v.].

DUNG KITE (رخمه - rakhamah, Ar.; کرگس - kargas, Pers.; گوکھاؤچیل - gúkháúchíl, Dec.; ಬಿಳಿಹದ್ದು - bilíhaddu, Can.; పీతిగద్ద - pítigadda, Tel.; மஞ்சட்டிருடி - mañjattirudi, Tam.). Title from food. Ar. from (rakham, ar. love); carrion-loving. Dec. from (gú, hind. dung + kháú, hind. eating + chíl, hind. kite). Can. from (bilí, can. white + haddu, can. vulture). Tel. from (piyyi, tel. dung + gadda, tel. vulture). Tam. from (mañjal, tam. turmeric + tirudu, tam. to steal); from yellow face and bill. Ar. also (anúk). Hind. also (kalmurghí), meaning black bird. Tel. also (tellabúraga), meaning white + vulture; (pítirigadda), meaning dung + kite. Tam. also (páppátti), meaning bramin female, contraction of (páppáttikkazhu), meaning bramin female vulture; from yellow face and bill. Title otherwise White scavenger vulture. Neophron percnopterus, neophroninæ, vulturidæ [gridhram], raptores [pacshy, 1], of naturalists [jantoo]. Alias Vultur ginginianus, stercorarius. Pharoah's chicken in Egypt. Adult of a yellowish or creamy white, quills black, feathers of the neck long, face deep, turmeric [country saffron] yellow, tip of bill horny yellow; its chief food, human ordure. No other common species here.

DUNGRY (డంగిడి - dangidi, Tel.). Tel. from (dángidi, village so called near bombay). A coarse cotton [q.v.] fabric used by the poorer classes. The stouter kinds are employed in making sails for native sailing vessels and tents [derah]. Dungry is woven with two or more threads together in the web and woof. Superior descriptions are made with the web and woof, or web only, twisted either wet or dry; but this is expensive [nesavoo].

DUNKAH (ڈنکا - danká, Hind.). A pair of kettle drums [paray] carried on a horse [ghorah] or camel [ottagam, sangeetam]. Sign of nobility.

DURBAR (دربار - darbár, Hind.; దర్బారు - darbáru, Tel.). From (dar, pers. within + bár, pers. courtyard) [dar]. A hall of audience. A levee. Also the executive government of a native state.

DURGAH (درگاہ - dargáh, Hind.). From (dar, pers. door + gáh, pers. place) [durree]. A royal court. Here the shrine of a Mahomedan saint; a place of religious resort and prayer [inam]. ——*Durgamittah* (దర్గామెట్ట - dargametta, Tel.). From (above + metta, tel. high ground). Often wrongly called Doorga mittah. There was formerly a shrine here on edge of the tank. Southern suburb of Nellore where Europeans live.

DURIAN (دوريں - duriyan, *Malay*). Title from malay, meaning thorny; from strong prickles over the rind. Title otherwise Civet-cat fruit tree. Botanically Durio zibethinus, dec., malvaceæ [vricsham, 25]. Fruit about size of a man's head, within which is the seed, with edible enveloping pulp of about the size of a hen's egg; pulp pure white, resembling blancmange; bulk of the fruit is offensive, having the smell of putrid animal substance or rotten onions [piyauz]; pulp is edible; seeds, when roasted, have flavor of chestnuts.

DURKHAST (درخواست - darkhást, *Hind.*). From (khástan, pers. to petition). A tender. An application for the cultivation of land; or for farming any branch of the revenue.

DURMA (درما - darmá, *Hind.*). Mat [boriyah] made of the split stalks of Phragmites roxburghii, kunth. [large naunal].

DURREE (دری - darí, *Hind.*). From (dar, pers. door) [durgah]. A small carpet [shatranjee].

DURZEE (درزی - darzí, *Hind.*). A tailor [inam].

DUSSERAH (दशहरा - dashahará, *San.*; دسہرا - dasehrá, *Hind.*). From (dasha, san. ten + hara, san. taking away). Taking away ten sins; epithet of the Ganges; originally a festival in honor of Gungay, but now held in honor of Doorga, especially for her victory over the demon Mahishausooran. The Doorga poojay of N. india. Also commemorates Rama's victory over Ravanan. Particularly a Mahratta festival.—"*a*" Lunar festival [pundigay, 6d], subject to intercalation. Of ten days' duration, beginning with first lunar day [tity] of waxing moon of seventh lunar month Aushweejam [mausam], between September 15th and October 16th at the time of the autumnal equinox [toolauyanam].—"*b*" The nine nights are theoretically a fast, and are called the Navarautry [q.v.]. After Pongal [q.v.], the most celebrated festival. Processions and public ceremonies are made in the pagodas [q.v.] while it lasts. The school boys, finely dressed, walk through the streets, accompanied by their masters, and stopping at the houses of great men sing verses and play colauttam [q.v.], for which they expect a present. It is properly however a domestic festival, when families adore the instruments, tools, and implements by which they gain their livelihood; the farmer his plough, the artisan his hammer and chisels, the barber his razor, the tailor his needle, the writer his pen, teachers and scholars their books, the soldier his sword, shield and gun, &c., the women their baskets, pestle and mortar and household implements. In the course of the poojay [q.v.], several deities also are worshipped; especially Saraswaty, wife of Bramha and goddess of music and letters; and Doorga, Parvaty, or Bhagavaty, formerly propitiated with human sacrifices and offerings of blood. On the ninth day the implements are collected and placed together for adoration. The tenth day is set apart for amusement, and the arms which were exposed the preceding evening are locked up. In the afternoon the gods are carried out of the city or village in procession to hunt, accompanied by the dancing girls and musicians, and fireworks are let off on the occasion if the feast be in the evening.—"*c*" The fifth day is called Saraswaty poojaurambham; the ninth is Saraswaty poojay, or Maharnavamy; the tenth is Ayoodha poojay or Vijaya dashamy or Dusserah day proper. In Malabar the opening day is called Pooja veppoo, and closing day Pooja yedoopp [maryauday].

DUSTER (دستر - dastar, *Hind.*). Table-cloth or towel.

DUSTOOR (دستور - dastúr, *Hind.*). From (dast, pers. hand + bar, pers. to take). Custom.——*Dustoory* (دستوری - dastúrí, Hind.). That which is customary. The commission or percentage on the money passing in any cash transaction which goes to the agent. Ordinary gold coin of Acbar, equal to about nine rupees.

DUTT (दत्त - datta, *San.*). From (dá, san. to give) [dau]. —"*a*" Adoption. If a married Hindoo of the upper class is without male issue he is required to procure a son by means of adoption. If he has not a son to perform his obsequies, he will be excluded from happiness after death. The adopted son renounces all claim on the property of his natural father, and acquires an unlimited right of succession to all that belongs to his adopted father. The adopted son is obliged on his part to take care of his acquired parents in their old age, and attend to their funeral when they die. The child adopted may be a relative or not, but must be of the same caste. See vol. I (106), (107). There are four kinds of adoption in Malabar.—"*a*" Adoption by ten hands, i.e., by the hands of the adoptors, male and female, the adoptee, and the adoptee's parents or guardians. In the case of those following the Maroomakkatoyem [q.v.] system of inheritance, the adopters will be the Carnaven [q.v.] and the senior female in the Tarwaud [q.v.], whilst the adoptee's guardians will be his Carnaven and mother. This form of adoption is very rarely used except in Bramin families. The boy selected is usually one on whom the Oopanayanam [q.v.] ceremony has not been performed.—"*b*" Adoption by Chamata, or by burning a pan of sacred grass.—"*c*" Adoption by taking into the family. This is the form commonly adopted by Bramin widows and shoodras for the purpose of perpetuating the family when it is in danger of becoming extinct. There is no limit as to age or number of persons adopted. The only limit is that the person or persons adopted should be of the same Vamsham [q.v.] or tribe as the adoptor. Among Shoodras, the adoption should be of one or more females, but it is frequently accompanied by the adoption of a male for the purpose of providing for the future management of the adoptor's property. Sometimes a whole family of adults is adopted.—"*d*" Among the Bramins, there is another form of perpetuating the family by the affiliation of the son-in-law which is called Sarwa saudhanam [illatam]. The son-in-law succeeds to the management in trust for the issue of his marriage. If there is no issue, the property reverts to the nearest heirs. This custom seems to be a relic of the Pootrica pootran or son of the appointed daughter and to recall a period when the daughter and the daughter's son were not in the line of heirs [maryauday].—"*e*" Title of a man of the Vèisya class, but now common among the Cauyast or writer class. Ramdutt, bestowed by Rama is a common name [payar].

DWAU (द्वा - dvá, *San.*). Two [do, dwi].——*Dwandwam* (द्वन्द्व - dvandva, San.). Couples of qualities or conditions the opposite of one another; as, cold and heat, happiness and misery, honor and dishonor, profit and loss, victory and defeat. Very common in native literature and ordinary parlance.——*Dwaudasham* (द्वादश - dvádasha, San.). From (above + dasha, san. ten). Twelve, twelfth.——*Dwaudashy* (द्वादशी - dvádashí, San.). The twelfth day of a lunar fortnight [pacsham].——*Dwauparam* (द्वापर - dvápara, San.). Literally the age with number two; or second counting from one as zero, or counting backwards. The third age of the world [yoog].——*Dwaupar yoogaudy* (ద్వాపరయుగాది - dváparayugádi, Tel.). From (above + yuga, san. age + ádi, san. beginning). Lunar festival [pundigay, 6d], subject to intercalation. Amavausyay [q.v.] which determines end of eleventh lunar month Maugham [mausam], between 14th January and 12th February, being anniversary of beginning of Dwaupar yoog.

DWAURAM (द्वार - dvára, *San.*). From (dvri, san. to cover). Gate [darwanja].——*Dwaura mantapam* (द्वारमण्डप - dváramandapa, San.). From (above + mandapa, san. hall). Inner portico of temple [coil].——*Dwaura paulacan* (द्वारपालक - dvárapálaka, San.). From (above + pálaka, san. protector). Large sized Yacshas placed at gate of a temple [coil]. Cf. Ashtadicpaulacan.——*Dwaura samoodram* (द्वारसमुद्र - dvárasamudra, San.). From (above + samudra, san. ocean). Capital of the Hoysala ballaulas, marked by the modern Halabeed, about 105 miles N.W. of Seringapatam. Founded in the twelfth century, plundered in 1310 by Malik caufoor [q.v.]; and destroyed in 1326 by Mahomedans when it was abandoned [charitram].——*Dwauravaty* (द्वारवती - dváravatí, San.). From (above + vat, san. suffix of possession). Capital of Krishnan; otherwise called Dwarca. In Goozerat.

DWI (द्वि - dvi, *San.*). Two [do, dwau]. Double. Plant first term. Ex., where transl. is of second term:—Clerodendron serratum (dvidandi), stick; Lagenaria vulgaris (dvikándiká), melon; Zizyphus jujuba (dviparní), leaf. See gloss. paragraphs.——*Dweepam* (द्वीप - dvípa, San.; தீவு - tívu, Tam.). From (dvi, san. two + ap, san. water).—"*a*" An island [divy, teev]. The seven mythological Dweepams or insular continents are:—Jamboo, meaning eugenia jambolana, lamk. [common jaumoon], surrounded by the sea of salt-water or lavanam; Placsham, meaning ficus arnottiana, miq. [wild peepul], surrounded by the sea of sugar-cane or icshoo; Shaulmaly, meaning bombax malabaricum, dec. [red-cotton tree], surrounded by the sea of wine or soorah; Coosham, eragrostis cynosuroides, retz. [darbhay], surrounded by the sea of ghee or sarpy; Crowncham, meaning the bird, numenius arquata, curlew [deergha chanchoocam], surrounded by the sea of curds or dadhy; Shaucam, meaning vegetables, surrounded by the sea of milk or doogdham; Pooshcaram, meaning nelumbium speciosum, willd. [nelumbo], surrounded by the sea of fresh water or jalam. It is probable that the older pooraunams [q.v.] which give this geography were composed in or near Cashmere [q.v.]. See vol. I (2).—"*b*" Chapter of a book.—"*c*" Foreign. Plant first term. Ex., where transl. is of second term:—Artocarpus incisa (dvípuppilávu), artocarpus integrifolia; Cassia alata (dvípágasti), sesbania grandiflora. See gloss. paragraphs.——*Dweepar* (ദ്വീപർ - dvípar, Mal.). Another name of Teeyar, showing that they came from Ceylon. Cf. Eelavacan, Ilavan.——*Dweitam* (द्वैत - dvaita, San.). From (dvi, san. two). Duality. The special development of Vedauntic philosophy which underlay the religious Veishnavite system of Madhwacharry [q.v.] and his followers. He maintained that the paramautman [q.v.], or divine soul, and the jeevautman [q.v.], or human soul, are two and distinct. This system is opposed to, or distinguished from, the old adweitam [q.v.] of Shuncaracharry [q.v.] and the vishishtaudweitam [q.v.] of Ramaunoojacharry [q.v.]. While the followers of Madhwacharry observe, on the whole, the same rites with other Veishnavas, they have this peculiarity that they place the images of Shiva and his consort as well as that of Ganesh in the same shrine with the forms of Vishnoo, and pay to them adoration as they do to his idols. Madhwacharry having first been a Sheiva, attempted thus to form a kind of

alliance between the two sects of the Sheivas and the Veishnavas. The Dweita philosophy is not natural to the south. The Dweita bramins are called Tatwavaudies meaning those who question the nature of tatwam [q.v.] or truth.——*Dwijan* (द्विज - dvija, San.). From (above + ja, san. born). Twice-born; a Bramin, Cshatriya or Veisya whose investiture [oopanayanam] with the sacred thread [poonool] constitutes religiously and metaphorically his second birth. It is most usually applied to Bramins. See vol. II, 235. There is a stanza—जन्मनाजायतेशूद्रः कर्मणाजायतेद्विजः वेदाध्यायीविप्रस्यात् ब्रह्मज्ञानीचब्राह्मणः—"By birth he is a Shoodra, "by rites a Dwijan, by the reading the scriptures a Vipran, and "by knowledge of the deity a Bramin."——*Dwijyay* (द्विज्या - dvijyá, San.). From (above + jyá, san. sine). The sine; but more properly the chord of an arc [jeevay]. Also the sine of the sun's declination [craunty] when his longitude [sauyanam] is II signs [raushy]. Dwijyah maurgam is a horizontal line. Dwijyah pindam is the sine of 3° 45′ [jyotisham, pindam].——*Dwipada* (द्विपद - dwipada, San.). From (above + pada, san. foot). Couplet.——*Dwiteeyay* (द्वितीया - dvitíyá, San.). The second day [tity] in a lunar fortnight [pacsham].

DYAUNAT (ديانت - diyánat, *Ar.*). From (dána, ar. to obey) [deen]. Honesty. Prefixed to an alam forms a lacab; as Dyaunat ally, faithful to Ally. Term of devotion + alam [ism].

DYE ROOT (சாயவேர் - sháyavér, *Tam.*). Title from use. Commercial term. Same as Chayroot.

E (ए - é, *San.*; ى - ye, *Hind.*; எ - e, ஏ - é, *Tam.*). Sanscrit symbol of Vishnoo [q.v.]. Hind. numerically 10; in almanacs [punchaungam] stands for Jupiter [brihaspaty] and sign [raushy] Aquarius [coombham, dalo]. Tam. sign for the numeral 7. Tam. long means an arrow.

EAGLE (عقاب - ukáb, *Hind.*). Prefix [cooralam].——*Eagle stone* (حجرالعقاب - hajarulukáb, Hind.). Found in eagle's nests. A natural concretion of argillaceous oxide of iron, in rounded or ovoidal masses having a concentric structure, often hollow within, with a loose kernel at centre. Varies from size of a walnut [acroot] to that of a man's head. Held to be a specific against disease and a charm against shipwreck and other disasters. Aetiles of the ancients.——*Eagle-stone creeper* (حجرالعقاب - hajarulukáb, Ar.). Title from bearing nuts like Eagle stones. Same as Bondac.——*Eagle wood* (अगरु - agaru, San.; شجر عودالطيب - shajariúduttíb, Ar.; عود هندى - údihindí, Pers.; اگر - agar, Hind. and Dec.; كالا مبك - kálámbak, Malay; ಅಗರು - agaru, Can.; ಹಗಲ್‌ಗಂಧ - hagalgandha, Too.; అగరు - agaru, Tel.; അകിൽ - akil, Mal.; කළු අගිල් - kaluagil, Singh.; அகில் - agil, Tam.). Title from malayalam, through hebrew ahalím and ahaloth. San. means not heavy [tiger's milk]. Ar. from (shajar, ar. tree + úd, ar. wood + tíb, ar. fragrant). Pers. from (úd, ar. fragrant wood + hindí, pers. indian). Hind., &c., from sanscrit. Singh. from (kalu, singh. black + agil, singh. eagle wood). Tam. from sanscrit [chikrassy, tiger's milk]. San. also (kríshnágaru), meaning black eagle wood; (agnikásht'ha), meaning firewood, from burning as incense. Ar. also (yallanjíy); (údihindí), meaning indian fragrant wood, the black variety. Pers. also (agarihindí), meaning indian fragrant wood; (údikámárí), meaning caumaury wood, the pale colored variety. Hind. also (samandurí), applied to oily variety, from the place where produced. Greek ἀγάλλοχον; later ξυλαλόη. Title otherwise Agallochum, Agar, Agil, Akyaw, Aloes wood, Calambac, Indian scented wood, Lign aloes, Lignum aloes. Botanically Aquilaria agallocha, roxb., thymelæaceæ [vricsham, 114]. Not to be confounded with the medicine bitter aloes, produce of a totally different plant [aloe]. Large tree, sylhet and malayan peninsula; flower small, green; interior part of trunk possesses aroma from oleaginous particles there stagnating and concentrating result of diseased action, yellowish in color. In "all thy garments smell of myrrh [q.v.], aloes, and cassia" of the psalms, aloes means eagle wood. Wood used in decoction [kwautam] in fevers [jwaram]; bark beaten applied externally for rheumatic pains. The resinous extract burnt in temples, chief ingredient of native pastils [oodbutty]. The wood is heavy, yellowish white shaded with green, and resinous; it is very costly, being sold by weight; precious stones [ratnam] frequently set in this wood; also used itself for ornaments and rosary beads [maulay]. A kind of eagle wood is produced by Excæcaria agallocha [tiger's milk].

EAST (مشرق - mashrik, *Hind.*). Prefix.——*East coast canal* (உப்புவாய்க்கால் - uppuváykkál, Tam.). Same as Buckingham canal [q.v.].——*East indian* (مشرقى - mashrikí, Hind.). From (mashrik, ar. east); as opposed to west or Europe. E. indies as distinguished from W. indies include not merely the two great peninsulas of S. Asia, but likewise all adjacent islands from the delta of the Indus to the N. extremity of Philippines. They extend from lat. 35° N. to lat. 10° S. and long. 65° to 130° E. At one time had a wider application including Japan also. Title means also descendants of European fathers and native mothers. Also very common plant term, meaning that the indian plant resembles European one. Ex.:—Bassella rubra, east indian spinach; Cedrela toona, east indian cedar; Flacourtia cataphracta, east indian plum; Hibiscus sabdariffa, east indian sorrel; Holopetala integrifolia, east indian elm; Nerium odorum, east indian oleander; Ocimum gratissimum, east indian basil; Pistacia lentiscus, east indian mastich; Pterocarpus marsupium, east indian kino; Soymida febrifuga, east indian mahogany; Tabernæmontana coronaria, east indian rose-bay; Xylia dolabriformis, east indian iron wood. See glossary paragraphs [indian].

EBONY (آبنوس - ábnús, *Ar.*). From (ében, hebrew, stone); from hard wood. For the indian ebonies see two major heads Indian ebony and Mountain ebony.

EED (عيد - íd, *Hind.*). From (aud, ar. to recur); from periodicity. Festival among Mahomedans. Generally means the two special Eedayeen, which are enjoined by texts of the Koran [q.v.] and are therefore farz [q.v.] or absolute; others being termed soonnat [q.v.] or traditional. The Eedayeen are Eed ool fitr or Ramzaun [q.v.] festival and Eed ooz zoohah or Buckreed [q.v.]. The others are Aukhiry chahaur shamba [q.v.], Baurah wafaut [q.v.], &c.——*Eedayeen* (عيدين - ídaín, Hind.). From Arabic. Dual of Eed; Ramzaun [q.v.] and Buckreed [q.v.].——*Eed e coorbaun* (عيد قربان - ídikurbán, Hind.). From (kurbán, ar. sacrifice). Same as Buckreed.——*Eedee* (عيدى - ídí, Hind.). Plural Eediyaun. A verse or something relating to an eed written by schoolmasters on colored paper, and given to pupils as a method for asking presents from parents. These gifts are principally confined to Aukhiry chahaur shamba [q.v.], Shab e baraut [q.v.], Ramzaun [maheena], Buckreed [q.v.] and Moharram [q.v.].——*Eedgah* (عيد گاه - ídgáh, Hind.). From (above + gáh, pers. place). A place where Mussalmans meet for prayer [namauz, salaut] on holy days. A building generally situated without the walls of a town, erected on a platform three or four feet above the level of the ground, and on an eminence. It consists of a square wall with two or more minarets [meenaur], and having in the centre, on a level with the ground, three steps, which forms the mimbar [q.v.] or pulpit, from which the khootba [q.v.] or sermon is read on particular feast days, such as Buckreed [q.v.] and Ramzaunkee eed [eed ool fitr].——*Eed ool fitr* (عيدالفطر - ídulfitr, Hind.). From (above + fitr, ar. fast breaking). Otherwise Eed oos sagheer, small festival; Ramzaunkee eed, festival of Ramzaun; Eedi sadka, festival of alms; and Chotee eed, small festival. Festival held on the first of Shawaul [maheena], in commemoration of breaking the thirty days' fast of the Ramzaun [q.v.]. Sufficiently described at vol. I (97).——*Eed ooz zoohah* (عيدالضحى - íduzzohá, Ar.). From (above + zohá, ar. forenoon); from time of prayers. Ar. also (ídiazhá), meaning festival of victims. Same as Buckreed.

EEJICA (ईजिक - íjika, *San.*). From (íj, san. to depreciate). Sanscrit corruption of Eelam [q.v.] or Ceylon [eloo].

EELAM (ஈழம் - ízham, *Tam.*). From (izhu, tam. to draw). Toddy; so Ceylon [eejica, éloo]. Cf. :—Plumeria acutifolia (ízhattalari), ceylon oleander; Scindapsus pertusus (ízhattimara-vázha), ceylon ivy. See gloss. paragraphs.——*Eelavacan* (ஈழவகன் - ízhavagan, Tam.). From (above + personal suffix). The corresponding terms are:—Tel. idiga, Can. billava, Mal ilava. Same as Ilavan of Malabar [jauty]. Cf. Dweepar.

EENJOO (ஈஞ்சு - íñju, *Tam.*). From (í, tam. to give); useful tree. Same as Small date.——*Eendra* (ఈండ్ర - índra, Tel.). From (ídsu, tel. to make to give, draw). Caste of toddy-drawers [jauty].

EEPOORPOLLEM (ఈపూరుపాలెము - ípúrupálemu, *Tel.* ipurupálem *). From (ípi, tel. dung fly + úru, tel. village + pálemu, tel. fortified village). Village, Port, Head-quarters of Assistant superintendent of Sea customs; Kistna dist., Baupatla tal.; pop. 3,982; acres 8,246; lat. 15° 52′; long. 80° 26′; from Baupatla S.W. 6 miles; from Madras N. 190 miles; from Masulipatam W.S.W. 52 miles; from Nizampatam W. 17 miles. On Golcondah coast [q.v.], 30 miles from mouth of Kistna. Salt marsh.

EESAH (عيسى - isá, *Hind.*). From arabic. Jesus. Mahomedan alam; as Mahomed eesah, double alam [ism].

EESH (ईश् - ísh, *San.*). To command, to protect.——*Eeshamaundan* (ஈசமாந்தன் - ísamándan, Tam.). From (ísha, san. shiva + mándan, tam. son). Vigneshwaran.——*Eeshan* (ईश - ísha, San.; ஈசன் - ísan, Tam.). Lord. A name applicable to either of the Trimoorties [eeshwaran]. Suffix in proper names as Ganeshan, Soondreshan [peyar].——*Eesharmool* (ഈശ്വരമൂലി - íshvaramúli, Mal.). Title means lord + root; from medicinal virtue. Same as Screw tree.——*Eeshaunyan* (ईशान्य - íshánya, San.). Shiva, as the regent deity of the north-east quarter. Symbol a crow. Eeshaunya moolay is the north-east quarter [ashta dic].——*Eeshwaram* (ईश्वर - íshvara, San.). From (ísh, san. to protect); medicinal. Botanically the Aristolochia genus, aristolochiaceæ [vricsham, 117]; birthworts. Shrubs erect or straggling; leaves broad and leathery; fruit is a six-celled

capsule with numerous seeds. The species best known to the natives are:—bracteata [indian worm-killer], indica [isharmool]. Also suffix in sacred place names, whether dedicated to Shiva or Vishnoo; as Someshwaram, Rameshwaram.——*Eeshwaran* (ईश्वर - íshvara, San.; ஈசுரன் - ísuran, Tam.). The supreme being; mostly Shiva, rarely Vishnoo. May be connected with the Chaldean ashur, and the Egyptian osiris or occidental deity. The Shactibhactans use the term Eeshwaracoil for Amman coil, where the feminine energy is worshipped. In systems of philosophy Eeshwaran is used for spirit, finite or infinite [augamam]. In the Vedauntam [q.v.] system it is the anima mundi. The Jeinas acknowledge no Eeshwaran, creator, or ruling providence [matam]. Hindoo 2nd or pers. name; also suffix in bramin proper names as Parameshwaran [peyar]. Plant first term; as Helicteres isora (íshvaramúli), eeshwaran's root.——*Eeshwary* (ईश्वरी - íshvarí, San.). Parvaty [q.v.]; not applied to Lutchmy [q.v.].

EEYAM (सीस - sísa, *San.* and *Mahr.*; آنك - ánuk, *Ar.*; سرب - surb, *Pers.*; سیسا - sísá, *Hind.*; شيش - shísh *Dec.*; تما هتم - timahitam, *Malay*; ಶೀಸ - shísa, *Can.*; సీస - sísa, *Too.*; సీసము - sísamu, *Tel.*; ഈയം - íyam, *Mal.*; ඊයම් - íyam, *Singh.*; ஈயம் - íyam, *Tam.*). Title from tamul. San. from (si, san. to bind). Malay from (timah, malay, tin + itam, malay, black). San. also (sísaka). Lead. Plumbum of chemists; a soft blue metal [loham] easily scratched, and making a mark on paper; easily malleable, but slightly tenacious, and not sonorous; melts at low heat; alloyed with tin [tagaram] in different proportions it forms solder and pewter [cull eeyam]; and with antimony [soorma] it constitutes type metal; generally found as an oxide; if in contact with water as in water-pipes, lead is liable to be oxidised, and to render the water poisonous; it also combines with various acids; carbonate of lead or white lead is a dense white powder commonly employed as a pigment [rangh]. μόλυβδος was exported from Egypt to the west coast according to the Periplus, but for its indigenous distribution see vol. II, 35. Semi-vitrified oxide of lead is moordar sing [q.v.]. White lead or ceruse is moottoovelly [q.v.]. Iodide of lead is seesauroonam from sanscrit. Red oxide of lead is sendoor [q.v.].——**(1)** *Eeya carcand* (ملح الرصاص - milhurrassás, Ar.; شکرسرب - shakari-surb, Pers.; سیسا لون - sísálon, Hind.; شیش کا نمك - shíshká-namak, Dec.; ஈயக்கற்கண்டு - íyakkargandu, Tam.). Ar. from (milh, ar. salt + rassás, ar. lead). Pers. from (shakar, pers. sugar + surb, pers. lead). Hind. from (sísá, hind. lead + lon, hind. salt). Dec. from (shísh, dec. lead + namak, hind. salt). Tam. from (íyam, tam. lead + kargandu, tam. sugar-candy). Sugar of lead, otherwise Acetate of lead. Plumbi acetas of chemists. Astringent and sedative. In overdoses poisonous.——*Eeyapaulam* (ஈயப்பாளம் - íyappálam, Tam.). Pig lead. *Eeyatagadoo* (ஈயத்தகடு - íyattagadu, Tam.). Lead sheet.——**(2)** *Cull eeyam* (கல்லீயம் - kallíyam, Tam.). Meaning stone + lead. Pewter [jas].——*Gandhac kalappeeyam* (கந்தகக்கலப்பீயம் - kandagakkalappíyam, Tam.). Means sulphur mixture + lead. Native sulphide of lead.——*Vediyoopp eeyam* (வெடியுப்பீயம் - vediyuppíyam, Tam.). Means nitre + lead. Nitrate of lead. Plumbi nitras of chemists [ospitry]. Astringent, deodoriser.

EFFENDY (افندی - afandí, *Hind.*). Through turkish from modern greek ἀφέντης, meaning absolute master. Lord; equivalent to English sir.

EGG PLANT (بینگن - baingan, *Hind.*). Title from appearance of fruit, smooth and somewhat oval like an egg. Same as Brinjaul.

EGOOVA (ఎగువ - eguva, *Tel.*). From (ekku, tel. to ascend). Prefix in place names; as Egoova ahobalam, or upper ahobalam. Cf. Digoova. Egoomaty is exportation.

EI (ஐ - ai, *Tam.*). Lord. Beauty. Also five, being then a contraction of eindoo below.——*Eindinay* (ஐந்திணை - aindinai, Tam.). From (above + tinai, tam. land). Five species of lands:—Coorinjy, Marootham, Moollay, Neydal and Paulay, or hill, agricultural, wood, maritime, desert [desham].——*Eindoo* (ஐந்து - aindu, Tam.). Five.——*Einganaykizhavan* (ஐங்கணைக்கிழவன் - ainganaikkizhavan, Tam.). From (above + kanai, tam. arrow + kizhavan, tam. lord). Cauman as lord of the five-arrows [cauma baunam], lotus [nelumbo], mango [q.v.], ashocam [q.v.], jasmine [q.v.], and blue indian water-lily [q.v.]. Champak [q.v.] sometimes replaces mango.——*Eingaran* (ஐங்கரன் - aingaran, Tam.). From (above + kara, san. hand). Vigneshwaran, the five-handed god.——*Eivana nel* (ஐவனநெல் - aivananel, Tam.). From (ai, tam. beauty + vana, san. forest + nel, tam. paddy). Mountain paddy [q.v.].——*Eiyaur* (ஐய்யார் - aiyyár, Tam.). From (ai, tam. five + áru, tam. river). River; Trichinopoly district, Moosiry talook. Jungle stream. Rises in gorge between Putchamullays and Collimullays, and receiving tributaries from both ranges, falls into Cauvery just above upper anicut [q.v.]. Length 30 miles. Principal tributary the Taligay.

EINDAH (آئنده - áindah, *Hind.*). From (ámadan, pers. to come). Future.——*Eindah saul* (آئنده سال - áindahsál, Hind.). From (sál, pers. year). Ensuing year [saul].

EINDRAM (ऐन्द्र - aindra, *San.*). From (indra, san. the god). The oldest system of Sanscrit grammar. Eight different native schools of grammar are commonly mentioned. Of these, Paniny's system has long superseded all others; Shaucatauyanan's and Jinendran's are still known by existing manuscripts; Chundragomin's grammar exists in a Tibetan version; and four other schools, of Indran, Caushacritsnan, Aupishaly and Amaran, are known by name or by an occasional quotation. The Booddhist canonical works of the north mention the Eindram grammar [vyaucaranam].

EIRAUVATAM (ऐरावत - airávata, *San.*). From (irá, san. water + vat, san. suffix of possession). Indran's elephant [q.v.] produced at the churning of the ocean [coormam]. The elephant of the east quarter [ashta dic]. An image of this divinity made of clay [calimunn] is often worshipped by Canarese women [matam]. As a country, stands for Thibet. Also the northern avastaunam or one-third path of the sun and moon [avastaunam, jyotisham, nacshatram].

EITAREYAM (ऐतरेय - aitaréya, *San.*). From (itará, san. female proper name). An Aranyacam and Oopanishad [q.v.] of the Rig veda, which contains the earliest speculations as to the Braminical ritual [matam].

EIVADZ (عوض - ívaz, *Hind.*). From (ázá, ar. to substitute). Substitute, money. Eivadz nauma is deed of exchange.

EJOO (اجوق - ijuk, *Malay*). A strong black horsehair-looking fibre, obtained from the Arenga saccharifera palm [gomooty]. It is very durable and tenacious, and employed in the countries where the trees are indigenous, for cordage, for nets and seines, for the rigging of vessels, and for cables.

ELEMI (جنگلی بادام کا پیڑ - janglíbádámkáper, *Hind.*; جنگلی بادام کا جہاڑ - janglíbádamkájhár, *Dec.*; کانری - kánarí, *Malay*; ಸಾಂಬ್ರಾಣಿಮರ - sámbránimara, *Can.*; රටකැකුණ - ratakakuna, *Singh.*). Title from philippine language. Hind. from (janglí, hind. wild + bádám, hind. almond, prunus amygdalus, baill. + per, hind. tree). Can. from (sámbráni, can. benzoin + mara, can. tree); from smell of oil. Singh. from (rata, singh. foreign + kekuna, singh. canarium zeylanicum). Title otherwise Caunary oil plant, Chinese olive, Java almond, Jungle almond, Manilla elemi plant, Mauritius elemi resin plant, Sambrauny [q.v.] tree. Botanically Canarium [caunary] commune, linn., burseraceæ [vricsham, 35]. Canarium, from (kanari, malay, the tree). Alias Amyris zeylanica; Balsamodendron zeylanicum; Bursera paniculata; Colophonia mauritiana; Canarium mehenbenthene, zephyricum. Tree, 50 feet; leaves unequally pinnate; leaflets seven to ten on long stalks, ovate-oblong, acute, or shortly acuminate, entire, glabrous; panicles terminal, divaricated; flowers two to three together, almost sessile at the extremity of the ultimate pedicels; drupe covered with a thin somewhat fleshy sarcocarp; calyx three-lobed, externally silky; petals three; nut very hard, three-angled; seed solitary; flowers white; flowering in hot season; introduced into gardens from java, and grown successfully in travancore. The fruit is from 1¼ to 1½ inch long, ovoid, three-angled, pointed at the apex, smooth, purplish, with a thin fleshy epicarp, nut very hard, three-angled, indehiscent, one-celled by abortion of the other two; the almond consists of a membranous testa, enclosing the oily cotyledons, which are divided into three lobes, folded and twisted together; the kernels yield 40 per cent. of a semi-solid fat of an agreeable and sweet taste, which keeps very long without turning rancid. Produces resin [raul] so abundantly that it hangs in large pieces and conical tears from the trunk and principal branches. The resin is at first white, liquid and sticky, but afterwards becomes yellowish and of the consistence of wax [mom]. It readily softens when heated. The bark yields a limpid oil with a pungent turpentine [ganda firoza] smell, congealing in a buttery camphoraceous substance, which has the same properties as balsam [q.v.] of copaiba. Gives to pharm. elemi resin, mild terebinthinate stimulant, not administered internally; officinal; for british almond oil. The fruit in taste is something like an almond [baudam]. Oil used at table when fresh, for burning when stale; kernels, mixed with sugar [q.v.], made into cakes and eaten as bread.

ELENGI (ഇലഞ്ഞി - ilaññi, *Mal.*). From (ireyu, mal. to murmur), from the noise produced by the wind upon the tree. Botanical specific name [ilanjy].

ELEPHANT (गज - gaja, *San.*; हत्ती - hattí, *Mahr.*; فيل - fíl, *Ar.*; پیل - píl, *Pers.*; هاتھی - háthí, *Hind.*; هاتی - hátí, *Dec.*; بیرم - beram, *Malay*; ಆನೆ - áne, *Can.* and *Too.*; ఏనుగు - énugu, *Tel.*; ହାତୀ - hatti, *Oor.*; ആന - ána, *Mal.*; අලියා - aliyá, *Singh.*; யானை - yánai, *Tam.*). Title from (al, ar. the + ibha, san. elephant + danta, san. tooth). San. from (gaj, san. to roar). Mahr. from (hasti, san. elephant). Ar. from (fayala, ar. bulky). Pers. from arabic. Hind. from (hasti, san. elephant). Can. from (ánu, can. to bear up). Oor. from (hasti, san. elephant).

Mal. from (éntu, mal. to support). Malay also (gajah). Elephas indicus, elephantidæ, proboscidea, mammalia [sastanam, 20], of naturalists [jantoo]. The Elephantidæ contain two living species only, the Indian and African elephants. The Indian elephant has a head oblong with a concave forehead; crowns of the molars presenting narrow transverse ridges; four toes to the hind feet; ears moderate; tusks large in the male, small in the female. The African elephant is of larger size as a rule, with enormously developed ears, which quite overlap his withers. The forehead recedes, and the trunk is more coarsely ringed; the tusks are larger. Another point of divergence is that the African elephant has only three nails on the hind feet, whereas the Indian has four. The number of pairs of ribs is nineteen in the Indian elephant and twenty-one in the African, and there are thirty-three caudal vertebræ in the Indian and never more than twenty-six in the African. In some males only one tusk is developed; and in Ceylon many male elephants have the tusks very small. Twice round an elephant's foot is his height, of which the maximum is probably 12 feet. The skull of the elephant possesses many striking features quite different from any other animal. The brain in bulk does not greatly exceed that of a man. He is physically incapable of making the smallest spring, either in vertical height or horizontal distance. Thus a trench 7 feet wide is impassable to an elephant, though the step of a large one in full stride is about 6½ feet. The trunk of the elephant is possessed of enormous power. One peculiarity of the elephant is its noiseless tread. Another is the power of withdrawing water from the stomach by the insertion of its trunk into the mouth, which it sprinkles over its body when heated. An old belief was that it had no joints, and that it slept leaning against a tree [mouse deer]. The elephant is one of the oldest known of animals. In the old Sanscrit writings it frequently appears. Eirauvatam [q.v.], which means proceeding from water, is the name of the elephant of Indra, or elephant of the eastern quarter [ashtadic]. At a very early period elephants were used in war by the Indian nati ons. On the west coast the elephant is abundant in many localities from the extreme south, Travancore, to the north latitude 17 or 18 degrees, all along the line of Western ghauts [q.v.], more especially on the Anamullay hills, named from that circumstance; in the Coimbatore hills, Wynaud, the slopes of the Neilgherries, Coorg and parts of Mysore and Canara. The Shevaroys and Collimullays, and other detached ranges to the east, have occasionally small herds of them. Elephants used to be captured by Government establishments near Coimbatore. Some were taken in pit-falls dug for the purpose, others were driven into large enclosures [kheddah]; occasionally they were captured by female decoys taken out for the purpose. A herd of elephants is always led by a female, never by a male. The rarity of the remains of dead elephants has been remarked upon. It is remarkable that a well-trained elephant will stand the charge of a tiger [pooly] without flinching, though naturally one of the most timorous of animals. The Tamul Cooral has the following:—பரியது கூர்ங்கோட்ட தாயினும் யானை வெரூஉம் புலிதாக் குறின்—"Although "the elephant has a large body and a sharp tusk, yet it fears "the attack of the tiger." Their chief use here is to assist in the transport of logs of timber from forests to river banks. Of the hair of the elephant's tail, rings, bracelets, and other female ornaments are made. The natives do not speak of it as an intelligent animal, and it does not figure in their ancient literature for its wisdom, as do the fox [lomree], the crow [caurvam], and the monkey [bandar]; but on the other hand Ganesh [q.v.], the god of prudence, is always depicted with the body of a man and head of an elephant. As a badge, the elephant used to represent the Chera and Congoo dynasties. The male elephant is called gendah [q.v.] or tusker [comban] from having large tusks; the female or hine is called maknah [q.v.] and has small tusks [dant]. There is a Tamul proverb:—ஆனி ஆனைவாலொத்த கரும்பு—"In June sugar-cane is like an elephant's tail;" it is a small growth like the shortness of the elephant's tail. And another:—ஆனை தன் தலையில் தானே மண்ணைப்போட்டுக் கொள்ளும்—"The elephant puts sand on its own head;" one who plans his own ruin. And another:—ஆனைக்கவடும் பூனைத் திருடும்—"The deceit of an elephant and the thievishness of "a cat." There is a Teloogoo proverb:—ఏనుగకు ఒకసీమ గుర్రానికి ఒకఊరు బర్రెకు ఒకబానిస—"To keep an elephant a whole country "is needed, a village for a horse and a maid-servant for a "buffalo." And another:—ఏనుగుమింగినవెలగపండువత్తె—"Like a "wood-apple swallowed by elephant;" elephants are said to swallow wood-apples and pass them out empty but entire and unbroken. The title is also a common prefix to plant names, following the dravidian languages; term denotes a large or coarse species. Cf. Aunay, Cary, Coonjaram, Gajam, Hasty. ——*Elephant apple* (விளாம்பழம் - vilámbazham, Tam.). Title from large size of fruit. Same as Wood-apple——*Elephant arrowroot* (ആനക്കൂവ - ánakkúva, Mal.). From large rhizome. Same as Arabian costum.——*Elephant creeper* (ಅಡಿಕೆಬಿಲುಬಳ್ಳಿ - adikebiluballi, Can.; ఆర్కబూరు - arkebúru, Too.; ആനപ്പരുവ - ánapparuva, Mal.; පොට - pótá, Singh.). Title from size and strength. Can. from (adike, can. areca nut + billu, can. waste land + balli, can. creeper); from oblong red berries. Mal. from (ána, mal. elephant + paruva, mal. creeper). Title otherwise Areca nut creeper. Botanically Pothos scandens, linn., araceæ [vricsham, 152]. Generic name from singhalese. Rooting epiphyte; leaves more or less long-petioled, lanceolate or oblong lanceolate, narrow acuminate, obtusely rounded at the base and there articulated with a winged petiole; spadix axillary, solitary, peduncled, recurved, sub-globose; spathe ovate, acute, boat-shaped, reflexed; malabar, chittagong. Same term for Argyreia speciosa [sea-shore paulay].——*Elephant grass* (रामबाण - rámabána, Mahr.; ಜಂಬುಹುಲ್ಲು - jambuhullu, Can.; జమ్ము - dzammu, Tel.; ஆனைப்புல் - ánaippul, Tam.). Title from food of elephants. Mahr. from (ráma, san. the hero + bána, san. arrow). Can. from (jambu, can. kind of sedge or reed + hullu, can. grass). Tam. from (ánai, tam. elephant + pul, tam. grass). Tel. also (énugadzammu), meaning elephant + the plant. Tam. also (shambu); (ánaikkórai), meaning elephant sedge, cyperus. Title otherwise Bulrush, Cat's tail, Jammoo, Reed mace. Botanically Typha elephantina, roxb., typhaceæ [vricsham, 153]. Culms round, smooth, glossy, jointed at the insertion of the leaves, 6-10 feet; leaves linear, somewhat channelled below, exceeding the flower-bearing stem; male spadix remote from the female, both cylindric; flowering nearly all year; grows in fresh-water tanks, brooks, and slow-stream rivers. The pollen of the flowers is abundant, and if a light be applied to it a flash of fire is produced. Eaten by elephants. Leaves used for making mats [boriyah]; culms tied in bundles and used as buoys to swim with, like sedges in england. Lesser elephant grass, called patar in hindostany, title otherwise eracah, indian reree plant, lesser cat's tail, small bulrush, is typha angustifolia; down of ripe fruit used to wounds and ulcers, like medicated cotton wool [punj]. ——*Elephant lime* (గజనిమ్మ - gajanimma, Tel.). Title from size. Same as Sour lime.——*Elephant palm* (ആനപ്പന - anappana, Mal.). Title from being favorite food of elephants. Same as Bastard sago palm.——*Elephant's ear* (ஆனைச்செவியடி - ánaiççeviyadi, Tam.). Title from resemblance of leaves. Same as Elephant's foot.——*Elephant's foot* (गोजिह्वा - gójihvá, San.; شمدلن - shamdulun, Hind.; ఎద్దునాలుకచెట్టు - eddunálukachettu, Tel.; ആനച്ചോവടി - ánaççóvati, Mal.; ඇතඩි - etadi, Singh.; ஆனைச்செவியடி - ánaiççeviyadi, Tam.). Title from resemblance of leaves. San. from (gó, san. cow + jihvá, san. tongue); from resemblance of leaves to cow's tongue. Compare gowzabaun. Tel. from (eddu, tel. bull + náluka, tel. tongue + chettu, tel. tree); from leaf. Mal. from (ána, mal. elephant + chuvata, mal. foot-mark). Singh. from (et, singh. elephant + adi, singh. foot). Tam. from (ánai, tam. elephant + shevi, tam. ear + adi, tam. foot); from resemblance of leaves. Hind. also (gobhí). Tel. also (énugabíra), meaning elephant + elæodéndron glaucum, pers.; (hastikarnaka), meaning elephant's ear. Title otherwise Elephant's ear, Rough elephant's foot. Botanically Elephantopus scaber, linn., compositæ [vricsham, 74]. Medicinal herb; stem dichotomous, ramous; leaves scabrous, radical ones crenate, cuneate, alternated at the base; cauline ones lanceolate; floral ones broad cordate, acuminate, canescent; flowers purple; flowering in cold season; common under the shade of trees. Decoction of root and leaves given on west coast in dysuria; good vulnerary; bruised leaves boiled with rice [q.v.] given internally in swellings of body or pains of stomach. No other common species here.——*Elephant thorn* (فيل خار - filkhár, Hind.). From large stout thorn. Same as Coday vail.——*Elephant yam* (कन्द - kanda, San.; کند - kandá, Hind. and Dec.; ಸುವರ್ಣಗಡ್ಡೆ - suvarnagadde, Can.; కంద - kanda, Tel.; ଓଲୁ - ullu, Oor.; ചേന - chéna, Mal.; கருணை - karunai, Tam.). Title from size. San. means bulbous root. Hind. from sanscrit. Can. from (suvarna, san. gold colored + gadde, can. root). Tel. also (duradakanda), meaning itching + the plant; (surikanda); (suvarnagadda), meaning good + color + root. Tam. also (kárgarunai), meaning to taste acrid + the plant; (kárákkarunai), meaning to taste acrid + negative particle + the plant, a variety. Title otherwise Caroonay [telinga potato, wild telinga potato], Elephant-foot yam. Botanically Typhonium orixense, schott., araceæ [vricsham, 152]. Alias Arum orixense. Stemless; leaves three-lobed; flowers sub-sessile; spathe ample, erect, longer than the spadix; filaments long and often ramous; flowers small. Cultivated in sandy soil; cultivation, dry; no nursery; seeds sown in small plots or else in pits; full grown crop is 1¼ yards high; a yard from the root, the stem branches off into smaller stalks, with leaves on all sides and bears a similarity to umbrella held top below; yams dug out after eight months. Roots are exceedingly acrid; used in poultices as a counter-irritant and in snake-bites; pharm. non-officinal. Other common species are:—bulbiferum, cuspidatum, divaricatum. Compare:—Amorphophallus campanulatus (malanchéna), mountain elephant yam; Dracontium polyphyllum (káttuchéna), wild elephant yam. See gloss. paragraphs.

ELIXIR (الاكسير - alaksír, *Hind.*). From (al, ar. particle + aksír, ar. quintessence). The philosopher's stone once supposed to have the power of prolonging life or of transmuting articles into gold [pon]. Hence anything efficacious. Cf. Amritam and Sanjeevy.

ELLIAH (ഇളയ - ilaya, *Mal.*). Young.——*Elliad* (ഇളയതു - ilayatu, obl.; ഇളയതു - ilayatu, pers. sing.; ഇളയതുകൾ -

ilétánmár, pers. pl., Mal.). Caste-title in oblique case. A class of Bramins in Malabar lower than Numboory [ardha bramin]. Others are Moossads [q.v.] and Numbies [q.v.]. These do not eat nor keep company with ordinary Bramins, nor however will they eat or associate with Nayar. They officiate as the family priests of Nayar families. In customs they are still Bramins, and their women are strictly gosha [q.v.]. See vol. II, 100 [jauty].——*Elliah rajah* (ഇളയരാജ - ilayarájá, Mal.). Junior rajah. The nearest heir to the throne on the west coast. He is usually the rajah's next younger brother, or the eldest son of his sister. Should the nephew be older than the brother, the senior is the heir. The next heirs after the Elliah rajah are called first, second, third princes, and so on. When one dies, the next takes the vacant title, so that the third prince will become second, then first, then Elliah rajah. As the succession is continued through sisters' sons [maroomakkatoyem], it is not, as amongst Braminical hindoos, males who are adopted in case of need, but females as sisters to existing heirs, and their sons will succeed. Should there be no sons, or only infants, the mother rules during the minority [baulyam]. The sons of the rajah, who are called tumby [q.v.] or younger brother, reside with him in his palace [covilagam] during their youth, and are provided for while the father is alive, as are their mothers also, by gifts of estates, houses, or money, which they thenceforth enjoy as private property [maryauday].

ELLORE (ఏలూరు - élúru, *Tel.*). From (élu, tel. rule + úru, tel. village). Tel. also (uppuélúru), meaning salt + ellore the place, so called to distinguish it from rye ellore, or vellore of n. arcot. Sanscrit name (vélapura), meaning tide + town; as being on the tammilair.——(1) Talook Godavery district. Tahsildar's pay Rs. 175. Area 729 square miles. Population 171,985. Language Teloogoo. W. of district. Bounded north by the Nizam's territory, south by Goodivauda talook of kistna, Colair lake and Bheemavaram talook, east by Tanookoo and Yernagoodem talooks, and west by Noozveed zemindarry of Kistna district. The greater part is rough and jungly; the southern part, especially in the neighbourhood of the Colair lake, being flat. Soil black cotton [regar] on the Colair side, the rest red sandy. Special industry is the manufacture of fine woollen carpets [cumbly, shatranjee] and saltpetre [shorah]. Trade principally in paddy [q.v.] and other dry grains [q.v.], carpets, saltpetre, and timber from the Nizam's territories. The high-level canal from Vijayeshwaram to Ellore passes through the talook, and is joined by the Bezwada canal at Ellore. Both canals are navigable and there is thus through communication by water between Rajahmundry and Bezwada. Several branch channels supply the villages about Ellore. A few villages are irrigated by the two mountain streams of Ramilair and the Tammilair. Numerous tanks in the upland villages. Camping grounds, Ellore and Raghavapooram. Zemindarries:—Ambarpett, Dooddepoody, Goontoopully, Malacacherla, Shingagoodem, Timmangoodem, Tungellamoody, Vadlaputlanootnam, Vaigavaram, Vasantavauda. Places of archæological interest:—Audamulley, Bheemadvole, Bogole, Caumavarappoocottah, Conijerla, Coppauca, Dendlore, Dharmaujigoodem, Dondapaud, Dwarcatirmala, Ellore, Gollagoodem, Goontoopully, Keikaram, Moondore, Naugoolapully, Peddapaud, Tadicalpoody. Principal trig. station Bandamcherla, Soodicondah, Yedlagutt. The leading places, &c., in the talook are the following.——*Ambarpett* (అంబరుపేట - ambarupéta, Tel. ambarapet *). From (ambara, san. cloth + péta, tel. suburb). Zemindarry, Village; pop. 2,008; lat. of village 16° 49′; long. 81° 21′; from Cocanada W.S.W. 62 miles; from Ellore N.E. 16 miles. Peshcush Rs. 16,140.——*Bandamcherla* (బండచెరువు - bandamcherla, Tel.). From (bandha, san. bund + cheruvu, tel. tank). Trig. station; lat. 17° 03′ 38·94″; long. 81° 06′ 13·46″; height 1,122 feet; from Ponookmaudoo N. 2 miles.——*Caumavarappoocottah* (కామవరపుకోట - kámavarapukóta, Tel.). From (káma, san. cupid + varamu, tel. town + kóta, san. fort). Village; pop. 3,336; lat. 17° 00′; long. 81° 15′; from Cocanada W. 67 miles; from Ellore N.N.E. 22 miles. Old fort dating from time of Reddies. South of village is hill in which is rock-cut cave with sculptures. Above cave are two small temples. At foot of hill are two large statues of Hanooman [q.v.].——*Chintalapoody* (చింతలపూడి - chintalapúdi, Tel.). See sep. title.——*Dendlore* (దెందులూరు - dendulúru, Tel.). From (dvandva, san. double + úru, tel. village). Village; pop. 3,381; acres 7,060; lat. 16° 46′; long. 81° 12′; from Cocanada W.S.W. 72 miles; from Ellore N.E. 5 miles. Once formed part of the ruined city of Vengy [q.v.]. Tradition says that there were 101 temples and 101 tanks. There are still nearly 20 tanks. The fort at Ellore was built by the Mussalmans with materials from the ruined temples of this village. Large statue of Ganesh [q.v.] south of the village. East is a high mound called Bheemalinga dibba, and north is a mound in the centre of a tank with carved stones.——*Dooddepoody* (దుద్దేపూడి - duddépúdi, Tel.). From (dudde, tel. child + púdi, tel. village). Zemindarry, Village; pop. 368; lat. of village 16° 49′; long. 81° 22′; from Cocanada W.S.W. 60 miles; from Ellore E.N.E. 17 miles. Peshcush Rs. 378.——*Dwarcatirmala* (ద్వారకాతిరుమల - dvárakátirumala, Tel.). From (dváraká, san. saint who lived on hill + tiru, tam. holy + mala, tel. hill). Sanscrit name (anantashaila), meaning vishnoo, the eternal + mountain. Village, Place of pilgrimage; pop. 761; acres 1,198; lat. 16° 57′; long. 81° 18′; from Cocanada W. 64 miles; from Ellore N.N.E. 20 miles. Old temple, picturesquely situated on a low rocky hill, considered almost as sacred as Tripatty.——*Ellore* (ఏలూరు - élúru, Tel.). See below.——*Goondagole* (గుండుగొలను - gundugolanu, Tel.). From (gundu, tel. round + kolanu, tel. tank). Village; pop. 2,696; acres 3,545; lat. 16° 47′; long. 81° 17′; from Cocanada W.S.W. 66 miles; from Ellore E.N.E. 9½ miles.——*Goontoopully* (గుంటుపల్లి - guntupalli, Tel.). From (gundu, tel. rock + palli, tel. village). Zemindarry, Village, Place of pilgrimage; pop. 970; lat. 17° 00′; long. 81° 11′; from Cocanada W. 72 miles; from Ellore N. 21 miles. Peshcush Rs. 962. East is a cave temple in a hill, the remains of a rock-cut Booddhist monastery [vihauram] and cheityam [q.v.]. Annual festival at Shivarautry [pundigay, 6a].——*Krishnarowpollem* (కృష్ణారావుపాలెము - krishnarávupálemu, Tel.). From (krishnarávu, tel. proper name + pálemu, tel. fortified village). Village; pop. 153; acres 530; lat. 16° 59′; long. 81° 07′; from Cocanada W.S.W. 74 miles; from Ellore N. 19 miles. Trade registering station.——*Malacacherla* (మలకచెర్ల - malakacherla, Tel.). From (malaka, tel. crooked + cherla, tel. village). Zemindarry, Village; pop. 195; lat. of village 16° 50′; long. 81° 14′; from Cocanada W.S.W. 68 miles; from Ellore N.E. 10 miles. Peshcush Rs. 1,495.——*Raghavapooram* (రాఘవపురము - rághavapuramu, Tel.). From (rághava, san. proper name + pura, san. town). Raghava row was an ancient Zemindar of Zoopully family who lived here. Village; pop. 1,228; acres 6,401; lat. 17° 06′; long. 80° 57′; from Cocanada W.N.W. 86 miles; from Ellore N.N.W. 30 miles. On the boundary between the British and Nizam's territory. Old cantonment. Old European cemetery.——*Shanivaurapettah* (శనివారపుపేట - shanivárapupéta, Tel.). From (shanivára, san. saturday + péta, tel. suburb). Village; pop. 3,598; lat. 16° 43′; long. 81° 07′; from Cocanada W.S.W. 77 miles; from Ellore W.N.W. 2½ miles. Head-quarters of Nidadvole and Baharjully zemindarries. Excellent cloths woven. Noted for betel-leaf [q.v.] gardens.——*Shingagoodem* (శింగగూడెము - shingagúdemu, Tel.). From (shingana, tel. proper name + gúdemu, tel. village). Zemindarry, Village; pop. 475; lat. of village 16° 57′; long. 81° 03′; from Cocanada W. 80 miles; from Ellore N.N.W. 18 miles. Peshcush Rs. 46.——*Soodicondah* (సూదికొండ - súdikonda, Tel.). From (súdi, tel. needle + konda, tel. hill). Trig. station; lat. 16° 57′ 20·75″; long. 81° 14′ 47·19″; height 525 feet; from Vadlaputlanootnam S. 1 mile.——*Tadicalpoody* (తడికలపూడి - tadikalapúdi, Tel.). From (tadike, tel. screen + púdi, tel. village). Village; pop. 2,538; acres 15,159; lat. 16° 54′; long. 81° 13′; from Cocanada W. 70 miles; from Ellore N.N.E. 14 miles. Old temple of Gungeshwarasawmy, fabled to have been built by Bheeshman, grandfather of the five Pandavas. In the shrine of Ancaulamman are six stone statues bearing inscription.——*Tammilair* (తమ్మిలేరు - tammiléru, Tel. tammilér *). From (tammudu, tel. younger brother + éru, tel. river). According to bramins named after lutchmanan, brother of rama. River. Flows south-east from the Eastern ghauts [q.v.] into Colair lake 3 miles below Ellore town.——*Timmangoodem* (తిమ్మనగూడెము - timmanagúdemu, Tel.). From (timmanna, tel. proper name + gúdemu, tel. village). Zemindarry, Village; pop. 106; lat. of village 16° 50′; long. 81° 16′; from Cocanada W.S.W. 66 miles; from Ellore N.E. 12 miles. Peshcush Rs. 64.——*Tungellamoody* (తంగెళ్ళమూడి - tangellamúdi, Tel.). From (tangédu, tel. cassia auriculata, linn. + púdi, tel. village). Zemindarry, Village; pop. 1,846; lat. of village 16° 43′; long. 81° 09′; from Cocanada W.S.W. 75 miles; from Ellore N. ¾ mile. Peshcush Rs. 5,143.——*Vadlaputlanootnam* (వడ్లపట్లనూతనము - vadlapatlanútanamu, Tel.). From (vadlu, tel. paddy + pattu, tel. place + nútana, san. new). Zemindarry, Village; pop. 188; square miles 3½; lat. of village 16° 58′; long. 81° 15′; from Cocanada W. 67 miles; from Ellore N.N.E. 19 miles. Peshcush Rs. 84.——*Vaigavaram* (వేగవరము - végavaramu, Tel.). From (véga, san. stream + pura, san. town). Zemindarry, Village; pop. 317; lat. of village 16° 52′; long. 81° 12′; from Cocanada W.S.W. 70 miles; from Ellore N.N.E. 12 miles. Peshcush Rs. 787.——*Vasantavauda* (వసంతవాడ - vasantaváda, * Tel.). From (vasanta, san. spring season + váda, tel. place). Zemindarry, Village; pop. 1,888; lat. of village 16° 37′; long. 81° 03′; from Cocanada W.S.W. 84 miles; from Ellore S.W. 9½ miles. Peshcush Rs. 7,349.——*Yedlagutt* (ఎడ్లగట్టు - edlagattu, Tel.). From (eddu, tel. ox + gattu, tel. hill). Trig. station; lat. 17° 01′ 15·25″; long. 81° 22′ 45·04″; height 571 feet; from Raghavapooram E.S.E. 28 miles.——(2) Town, Municipality, Head-quarters of Head assistant collector and tahsildar; Godavery dist., Ellore tal.; pop. 29,382; acres 5,414; lat. 16° 42′; long. 81° 09′; from Cocanada W.S.W. 75 miles; from Coonavaram S.S.W. 59 miles; from Madras N.N.E. 252 miles; from Narsapore W.N.W. 43 miles; from Rajahmundry W.S.W. 47 miles. The soil of the town is impregnated with saltpetre. On the Tammilair, which divides here into two portions, the town being situated between them. On the right bank are the old barracks and the cantonment hospital, on the left were formerly the officers' houses. The country round is flat, with hills in the distance. Soil chiefly black cotton, and the cultivation paddy. Climate very similar to that of Masulipatam; but, being further inland, hotter and there is less sea-breeze. Originally portion of the Vengy kingdom,

it formed part of the Orissa conquests till 1480 when it was occupied by Mahomedans. Under the Vijianugger kingdom it once more became Hindoo. Early in the sixteenth century it was captured by Cootb shah of Golcondah by whom and his successors it was held against the Rajpoots of Rajahmundry and the Reddies and Khonds of surrounding districts, until the Golcondah power was merged in the Mahomedan viceroyalty of the Deccan [q.v.]. It was then in turn possessed by native princes, by the French, and finally by the British. It then became the capital of the Circar [q.v.] of Ellore, which, together with that of Condapully, occupied the whole of the country between the Godavery and Kistna. When the Northern circars [q.v.] were divided into districts, it belonged to Masulipatam district, and was connected with it till 1859, when it was transferred to Godavery district on the redistribution of the districts of Guntoor, Masulipatam, and Rajahmundry. The revenue and magisterial charge of the town and talook was entrusted at first to a Deputy collector, but was transferred to the Head assistant collector in 1867, a portion of the old barracks being converted into his office. A military detachment was stationed at Ellore for many years, but it has now ceased to be a military station. A copper plate inscription [shausanam] discovered here gives the order of precedence in which betel-leaves were served to various chiefs and persons by Ibrahim cootb shah after his conquest of the country in 1566 A.D. In the northern part are the remains of an old fort, built by Mahomedans about the fourteenth century, from the materials of the pagodas [q.v.] in the neighbouring city of Vengy, which were then captured and rifled. A mosque has been built with the materials of a Hindoo temple. The town has benefited greatly by the opening of the canals from Bezwada and Rajahmundry. The carpets [shatranjee] made here are manufactured by Mahomedans, descendants of Persian settlers. Also noted for betel [q.v.] gardens. The Ellore canal is forty miles long from Chettipett to Ellore, where it joins the canal from the Kistna anicut [q.v.] at Bezwada.

ELOO (එළුව - eluva, *Singh.*). Or Heloo. The language of the old Singhalese poetry [ceylon, eelam, eejica, eelavaca].

ELY (मूषिक - múshika, *San.*; گھرکا چوھا - gharkáchúhá, *Hind.*; مونڈق - munduk, *Malay*; ಮನೆಇಲಿ - maneili, *Can.*; ಎಲಿ - eli, *Too.*; ఎలుక - eluka, *Tel.*; എലി - eli, *Mal.*; ගෙවල්මීයා - gevalmíyá, *Singh.*; எலி - eli, *Tam.*). Title from tamul. San. from (mush, san. to steal); from their sly habits. Hind. from (ghar, hind. house + chúhá, hind. rat). Can. from (mane, can. house + ili, can. rat). Tel. from (illu, tel. house). Singh. from (gé, singh. house + míyá, singh. rat). Tam. means dark one. Hind. also (chúhá). Can. also (ili). Tam. also (vítteli), meaning house rat. Mus [moosham] decumanus, muridæ, rodentia, mammalia [sastanam, 17], of naturalists [jantoo]. Generic name from (músha, san. rat). Alias Mus brunneus, norvegicus. Rat. Title otherwise House rat, Brown rat. Above dusky cinereous brown with a tinge of yellow, the shorter hair being slaty at the base with a yellow tip, and the longer ones dusky-blackish; beneath dirty pale ashy; ears as broad as long, rounded tail naked and scaly. Akin is the Black rat, Mus rattus of naturalists. Grayish black above, dark ashy beneath, tail longer than the body, long piles numerous, somewhat flattened. The muzzle is sharper than that of the brown rat, the ears more oval, and it is lighter in its make, and with much longer hair. This is the black rat of Europe introduced. It is found chiefly in large towns near the coast. Belonging to the same genus also is the striped-bellied field-rat, Mus infralineatus, of naturalists. Above the fur fulvous with the shorter hairs lead colored; throat, breast and belly, pure white, with a central pale fulvous brown streak; tail slightly hairy. Procured in the neighbourhood of Madras and elsewhere. This is distinct from Golunda meltada [varappely]. Indian species not here found are:—Andamanensis or andaman rat, Robustulus or burmese common rat, Rubricosa or small red rat of the kakhyen hills, Sladeni or sladen's rat, Yunnanensis or common house rat of yunnan. The title Ely also forms prefix in many plant names, and then indicates inferiority, or wild habit.——*Maravely* (तरुमूषक - tarumúshaka, San.; جنگلی چوھا - janglíchúhá, Hind.; ಹ್ಯಾಡ - hyáda, Can.; మానెలుక - máneluka, Tel.; മരവെലി - maraveli, Mal.; மரவெலி - maraveli, Tam.). Title from tamul. San. from (taru, san. tree + múshaka, san. rat). Hind. from (janglí, hind. wild + chúhá, hind. rat). Can. from (hédi, can. a shy person). Tel. from (mánu, tel. tree + eluká, tel. rat). Tam. from (maram, tam. tree + eli, tam. rat). Title otherwise Tree rat. Mus [moosham] brunneus, muridæ, rodentia, mammalia [sastanam, 17], of naturalists [jantoo]. Alias Mus nemoralis. This belongs to a group of rats having arboreal habits. Above reddish brown, or rusty brown, with a few long bristles intermixed; beneath dull whitish, or pale rusty with a hoary tinge, or pale grayish brown; tail as long as, or a little longer than the head and body; feet pale fleshy; ears rather long, and head somewhat lengthened. Some have the upper parts dark brown, with only a slight rufescent tinge. Found throughout Southern india. It makes a nest in mango [q.v.] trees, or in thick bushes and hedges. Akin is the Rufescent tree rat. Mus rufescens of naturalists. Alias Mus arboreus, brunnensculus, flavescens, kandianus, montanus, tetragonurus. Pale yellowish brown or rufescent brown above, white beneath, with numerous bristles on the back tipped with black. Head long, muzzle pointed; face narrow; eyes large; incisors yellow; ears very large, sub-ovate, nude. Indian species not here found are:—Aquicaudalis, caudatior or chestnut rat, Ceylonus, Concolor or common thatch rat of pegu, Nitidus or shining brown rat, Niveiventer or white-bellied house rat, Palmarum or nicobar tree rat, Plurimammis.——*Moollely* (शाली - shalí, San.; کانٹے دار چوھا - kántedárchúhá, Hind.; ಮುಳ್ಳುಹಂದಿ - mulluhandi, Can.; ಮುಳ್ಳೆಲಿ - mulleli, Too.; ముండ్లపంది - mundlapandi, Tel.; മുള്ളെലി - mulleli, Mal.; முள்ளெலி - mulleli, Tam.). Title from tamul. San. from (shala, san. quill of porcupine). Hind. from (kántá, hind. thorn + dár, pers. possessing + chúhá, hind. rat). Can. from (mullu, can. bristle + handi, can. hog). Tel. from (mullu, tel. bristle + pandi, tel. pig). Tam. from (mullu, tam. bristle + eli, tam. rat). Title otherwise Hedge-hog. Erinaceus micropus, erinacediæ, insectivora, mammalia [sastanam, 14], of naturalists [jantoo]. Alias Erinaceus nudiventris. Feet pentadactylous or five-toed; legs very short. The tibia and fibula are joined together. The back is clothed with hair intermixed with sharp spines or bristles. Tail short or wanting entirely. Inhabits the low jungles of the extreme south; also obtained on the Neilgherries and on the Western ghauts [q.v.]. Indian species not here found are:—Erinaceus collaris or collared hedge-hog, Erinaceus jerdoni, Erinaceus megalotis or large-eared hedge hog, Erinaceus pictus or painted hedge-hog, Gymnura suilla or short-tailed tree-shrew, Gymnura rafflesii. For porcupine see Kharpoosht.——*Shevvely* (हरिणमूषिक - harinamúshika, San.; يربوع - yarbú, Ar.; موش دشتی - múshidashtí, Pers.; هرن موش - harnámúsh, Hind.; ಬಿಳಿಇಲಿ - bilíili, Can.; తెల్లఎలుక - tellaeluka, Tel.; വെള്ളെലി - velleli, Mal.; செவ்வெலி - shevveli, Tam.). Title from tamul. San. from (harina, san. antelope + múshika, san. rat); from activity and size of its eyes. Pers. from (músh, pers. mouse + dasht, pers. forest). Hind. from (haran, hind. antelope + músh, pers. rat). Can. from (bilí, can. white + ili, can. rat); that is, pale colored. Tel. from (tella, tel. white + eluka, tel. rat). Mal. means white rat. Tam. from (shem, tam. red + eli, tam. rat); from the fawn color. Tel. also (erraeluka), meaning red + rat. Tam. also (velleli), meaning white rat. Title otherwise Antelope rat, Jerboa rat, Jumping hare. Gerbillus indicus, muridæ, rodentia, mammalia [sastanam, 17], of naturalists [jantoo]. These field rats have small forelimbs and well-developed hinder limbs. Their form is somewhat slender and their eyes are large. They are extraordinarily agile, and form extensive burrows in plains, especially in sandy districts, and also in sand hills, but not generally in cultivated fields. Above light fulvous brown, or bright fawn color, somewhat paler on the sides, beneath white; eyebrow whitish; whiskers long, black; tail blackish towards the tip, which is clad with a tuft of long blackish hairs; ears large, almost nude. The hairs of the back are light plumbeous at the base with fulvous tips, with some thin black hairs intermixed, most conspicuous on the sides and cheeks. Found over all Southern india, but not at high elevations. Indian species not here found are:—Cryptorhinus or lobe nosed jerboa rat, Erythrurus or red-tailed jerboa rat, Hurrianæ or desert jerboa rat, Nanus or dwarf jerboa rat.——*Varappely* (केदारमूषक - kédáramúshaka, San.; کھیت کا چوھا - khetkáchúhá, Hind.; ಕಿರಇಲಿ - kiraili, Can.; ಕಂಡದಎಲಿ - kandadaeli, Too.; మెట్టఎలుక - mettaeluka, Tel.; വരമ്പെലി - varampeli, Mal.; මීවින්නා - mívinná, Singh.; வரப்பெலி - varappeli, Tam.). Title from tamul. San. from (kédára, san. field + múshaka, san. rat). Hind. from (khet, hind. field + chúhá, hind. rat). Can. from (kira, can. small + ili, can. rat). Too. from (kanda, too. field + eli, too. rat). Tel. from (metta, tel. high ground + eluka, tel. rat). Singh. from (mí, singh. rat + vini, singh. forest). Tam. from (varappu, tam. field ridge + eli, tam. rat). Title otherwise Field rat. Golunda meltada, muridæ, rodentia, mammalia [sastanam, 17], of naturalists [jantoo]. With the same generic name as the Bush rat [golandy], but much differs. Above reddish brown with a mixture of fawn, lighter beneath. The fur fine, close and soft, with a few longer hairs projecting. Head short; muzzle sharp; ears large; tail shorter than body. This rat has only been found in Southern india. Lives entirely in cultivated fields making a very slight hole in the root of a bush, or merely harbouring among heaps of stones. Its flesh is eaten by the Woddar or tank-diggers [wodda].

EMBOOREL (இம்பூறல்வேர் - imbúralvér, *Tam.*). From (irumbu, tam. iron + úral, tam. taint + vér, tam. root); because of the red dye from root. Same as Chayroot.

EMETIC NUT (शल्य - shalya, *San.*; جوزالقی - jauzulkaí, *Ar.*). Title from use of nut. San. from (shal, san. to cover); protected by thorns. Arabic means same as title. Botanically the Randia genus, rubiaceæ [vricsham, 71]. Shrubs or small trees armed with strong axillary thorns; flowers whitish or yellowish in color; fruit has a dry rind and is internally divided into two compartments, containing numerous seeds; wood smooth, close-grained, hard. The species best known to the natives are shown below. Other s. indian species indigenous or naturalized

are:—candolleana, gardneri, speciosa. Compare also Hill emetic nut and White emetic nut which are gardenias.——*Bedaly emetic nut* (బెదలి - bedali, Tel.). Tel. means bad fruit. Tel. also (bedalika); (pedali); (pedayi). Title otherwise Bedaly, Sweet-scented griffithia. Botanically Randia [emetic nut] malabarica, lam., rubiaceæ [vricsham, 71]. Alias Gardenia fragrans, pandaki; Griffithia fragrans; Posoqueria fragrans; Randia fragrans; Stylocoryne malabarica, pandaki. Glabrous shrub, with usually opposite thorns, sometimes unarmed; leaves petioled, from obovate to oblong, cuneate at the base, coriaceous, with concave hairy glands in the axils of the nerves; stipules roundish-ovate, cuspidate, caducous; flowers pedicelled, white, in a short-peduncled umbel-like corymb at the ends of the branches, or on short lateral knobs or leafless young shoots; flowering in june and july; pedicels with two bracts near the base; fruit about the size of a large pea, roundish, red when ripe; common hedge plant. ——*Common emetic nut* (मदन - madana, San.; गेळ - géla, Mahr.; आमार्ले - ámárla, Conc.; جوزالقی - jauzulkaí, Ar. and Pers.; مین پھل - menphal, Hind.; مینڈھ پھل - mendphal, Dec.; ಅರೆಮಾದಲು - aremádalu, Can.; ಅರೆಮಾಪಳ - aremápala, Too.; మంగ - manga, Tel.; ପଟିର - patira, Oor.; കരളിക്കായ - karalikkáya, Mal.; කුකුරුමාන් - kukurumán, Singh.; மருக்காரை - marukkárai, Tam.). San. from (mad, san. to intoxicate) [white datura]. Mahr. from (garala, san. poison). Ar. from (jauz, ar. nut + kaí, ar. emetic). Hind. and dec. from sanscrit. Can. from (are, can. half + mádala, can. citron, citrus medica, linn.); from fruit. Too. from (are, too. half + mápala, too. citrus medica, linn.). Mal. from (garala, san. poison + káya, mal. fruits). Cf. Indian berry. Tam. from (maru, tam. fragrance + kárai, tam. canthium parviflorum, lam.); from seeds. San. also (maruvaka), meaning causing death, by its poisonous flowers; (karahátaka), meaning injuring hand, from thorns. Ar. also (jauzulkausal), meaning physic nut. Hind. also (men). Dec. also (medphal). Can. also (mangari). Tel. also (mranga); (manda). Mal. also (káttunáranna), meaning wild lime is atalantia monophylla, cor. [monkey lime]; from fruit. Singh. also (valkukurumán), meaning wild + the shrub. Tam. also (marukkálam), meaning fragrant poison, from seeds; (mathukkárai), meaning sweet cauray, from seeds; (púngárai), meaning flowering cauray. Title otherwise Bushy gardenia, Manga, Marookkauray, Poison fruit, Sweet cauray. Botanically Randia [emetic nut] dumetorum, lamk., rubiaceæ [vricsham, 71]. Alias Canthium coronatum; Ceriscus malabaricus; Gardenia dumetorum, floribunda, longispina, spinosa; Posoqueria dumetorum, floribunda, longispina; Randia floribunda, longispina, spinosa, tomentosa. Shrub or tree 6-10 feet, armed; spines opposite; leaves almost sessile, oval, cuneate at the base, when young, slightly pubescent; flowers axillary, solitary, terminal on the young shoots, on short pedicels; calyx campanulate, five-parted; lobes oblong; corolla hirsute on the outside; tube with a ring of dense hairs inside near the base; fruit usually globose, sometimes oblong, crowned with the limb of the calyx, two-celled, many-seeded; flowers white; flowering in april. Thorny ramous shrub, or in good soil a small tree, very common in the plains. Size of berry or so-called nut varies from small cherry [auloo] to a walnut [acroot]; generally resembles a small yellow apple [seb]; round and smooth, when ripe yellow, contain large quantity of firm, fleshy pulp; enclosing numerous sweetish-tasted, strong-smelling seeds; the berry has a peculiar sickly smell. The root bark, and fruit are used as emetic; the emetic property of the latter depends on the dry pulp or mucous surrounding seeds, and this pulp can be dissolved in water easily; substituted for british ipecacuanha; quoted in pharm., non-officinal. Pulp roasted and eaten by natives. Whole berry bruised and thrown into ponds to intoxicate fish [indian berry, marotty, round milk hedge, sooptee, walsoora]; they are then easily captured, and fruit does not render them unwholesome. The shrub employed for fences. Wood white or light-brown, compact, hard; used for fuel.——*Gray emetic nut* (पेंढर - péndhara, Mahr.; ಪೆಂಡರಿ - pendharí, Can.; పెద్దమ్రంగ - peddamranga, Tel.; ପେଣ୍ଡ୍ର - pendra, Oor.). Title from berry. Mahr. means white. Can. from mahratta. Tel. from (pedda, tel. large + mranga, tel. emetic nut). Tel. also (dévatámalle), meaning divine jasmine, from flowers; (gúáku); (nallamanga), meaning black emetic nut; (nalaika). Title otherwise Divine jasmine, Pindaloo. Botanically Randia [emetic nut] uliginosa, dc., rubiaceæ [vricsham, 71]. Alias Gardenia uliginosa; Posoqueria uliginosa. Tree; branches straight, four-angled; branchlets decussating, horizontal, bearing one to four thorns and one to three large short-pedicelled white flowers at their extremity; leaves oblong, somewhat cuneate at the base, glabrous, shining; limb of the calyx tubular, bluntly five-toothed or nearly entire, a little shorter than tube of the corolla; corolla villous in the mouth; berry oval, drupaceous, even; flowering in the hot season. Rigid ramous small thorny tree; bears large, white and fragrant flowers in pairs or in threes at the top of the branchlets; berry is about the size of a pullet's egg, ash-colored or olive-grey, and two-celled; the seeds are flattish, nestling in the pulp. Unripe berry, roasted in wood ashes, used as a remedy in diarrhœa and dysentery, the central portion, consisting of the stone and seeds, being rejected; it is astringent. Pulp eaten by natives; unripe fruit employed as a vegetable dye [shauyam]. Wood whitish grey, close-grained, hard, no heart-wood.——*Hill emetic nut* (پاپڑا - páprá, Hind.; కొండమంగ - kondamanga, Tel.; କୋଟରଙ୍ଗ - kotaranga, Oor.; கம்பைமரம் - kambaimaram, Tam.). Title from habitat and resemblance. Tel. from (konda, tel. hill + manga, tel. randia dumetorum, lamk.). Hind. also (banpindálú), meaning forest dioscorea globosa, roxb. Tel. also (bikki); (kokkita) [sea-shore paulay]; (kurikiti); (peddakáringuva), meaning large + wild + asafœtida; (chiribikki), meaning small variety; (kákiti); (peddabikki), meaning large variety; (káringuva), meaning wild asafœtida, ferula narthex, boiss. [decamallee]. Title otherwise Broad-leaved gardenia, Cambay. Botanically Gardenia [gandharajah] latifolia, aiton., rubiaceæ [vricsham, 71]. Alias Gardenia enneandra. Unarmed tree; leaves opposite or in threes, very shortly petioled, oval or obovate, glabrous, with a small hairy gland in the axils of the nerves beneath; limb of the calyx campanulate, irregularly divided, hirsute on the inside; coralla hypocrateriform; tube long, hirsute on the outside; limb about nine-cleft, the divisions obliquely obovate, hirsute towards the one margin on the outside; stigma clavate, thick and fleshy, bipartite; segments two-cleft; berry nearly globose, even, crowned with the calyx; nut thin, brittle and bony, with four parietal receptacles; flowers terminal, solitary, very shortly-pedicelled, very large, pure white in the morning, yellow in the evening, fragrant; hills of the circars [q.v.] and carnatic [q.v.]; flowering in april. Leaves, some as much as fifteen inches long and six inches wide. Wood light-yellowish brown, close and even-grained, hard, handsomely mottled, neither warps nor splits; no heart-wood; easy to work, durable, a substitute for box-wood; combs are made of it.——*White emetic nut* (తెల్లమంగ - tellamanga, Tel.). Same as Decamallee.

ENNORE (என்னூர் - ennúr, *Tam.*). From (énai, tam. an eel + úr, tam. village). Village just north of Cuttiwaukum [q.v.] backwater; Chingleput dist., Sydapett tal.; pop. 453; acres 1,807; from Madras N. 12 miles; from Ponnairy S.E. 11 miles; from Sydapett N. 17 miles; from sea W. ½ mile. The English settlement at Cuttiwaukum takes this name. Ennore beacon is a trig. station in lat. 13° 13′ 53·06″; long. 80° 22′ 25·58″; from Cadapaukam N.E. 4½ miles; from Sydapett N. 15 miles; from the sea W. 1¼ miles. Ennore D.P.W. bungalow is a trig. station in lat. 13° 13′ 50·20″; long. 80° 22′ 19·41″; from Sydapett N. 15 miles; from the sea W. 1¼ miles.

ERNACOLUM (എറണാകുളം - eranákulam, *Mal.*). From (haranár, mal. the saint, so called + kulam, mal. tank). Sanscrit name (haranágakula), means shiva + serpent + residence; also (rishinábhitatáka), meaning saint + navel + tank. Town, Head-quarters of Diwaun, Appeal court, Zillah court, Moonsif's court and talook, Post and Telegraph office; Cochin state, Canyanore tal.; pop. 3,504; lat. 9° 59′; long. 76° 19′; from Canyanore W.N.W. 10 miles; from Chittoor S.S.W. 59½ miles; from Cochin E.N.E. 2¼ miles; from Madras S.W. 345 miles; from Trichore S. 38 miles; from Tripoontora W.N.W. 5 miles; from the sea E. 3 miles. On the backwater opposite to Cochin town. May be considered the capital of Cochin state. The town itself is insignificant, consisting chiefly of houses of a poor description scattered along the bank of the backwater, the most closely populated portion being inhabited by Black jews [jonaca]. Besides the public offices there is a Durbar [q.v.] hall where the British resident pays his state visit to the Rajah of Cochin. There is a travellers' bungalow [q.v.].

ERODE * (ஈரோடு - íródu, *Tam.*). From (ír, tam. two + ódai, tam. water-course) [ir]; between bhawauny and cauvery. —(1) Talook, Coimbatore district. Tahsildar's pay Rs. 225. Area 598 square miles. Population 247,008. Language Tamul. N.E. of district. Bounded N. by the Bhawauny; N.E. and E. by the Cauvery which separates it from Trichengode talook of Salem district; S. by the Noyil which separates it from Caroor and Dharaupooram talooks; W. by Pulladam talook; and N.W. and N. by Suttimungalam and Bhawauny talooks respectively. Comprises the old Peroondoray and Erode talooks. The whole talook slopes towards Cauvery, into which all streams eventually fall. A gently undulating plain, broken parallel with the Madras railway by a slight ridge, the peaks of which are Aratchalore, Shennimullay, and Yelmattore. There are also several small isolated hills. The climate of the valley of the Cauvery is hot and close, the south-west monsoon [q.v.] is heated and fitful, and periods of calm alternate with dust storms and gusts of wind [pishauch]. In the west however, where the country is higher, the climate is cooler and healthier, the tracts about Chengampully and Peroondoray being convenient resorts in April, May, June and September. Peroondoray is the locality most favored by rain; towards Erode the fall is somewhat less, while to the west, especially the parts bordering on Pulladam, it is very scanty. Pasture lands are rare. There are no forests or jungles; the country is tolerably provided with common trees. Palmyras [q.v.] are plentiful. Good roads. Soil everywhere largely calcareous, even the disintegrated gneiss yielding lime [choonam] which has infiltrated from above. Excellent felspar [mauvayira cull] suitable for potting is obtainable everywhere. Iron [auban] used to be smelted from black sands [manal] of surface streams, especially near Shennimullay, the stones of which are highly ferric. Asbestos [cull naur] is occasionally found and used medicinally. Building stones are good and cheap everywhere; a

quarry at Poojarry comaura gowndanore, near Ootcooly railway station, supplies excellent stones for important railway works. Brick [shengal] clays are occasionally good. Potters' clay [calimunn] for ordinary porous earthenware is procurable from tank-beds, &c.; no good potting [chatty] materials, except quartz [vencull] and felspar, exist. Soils are all red; there is no black cotton tract [regar], and the only dark soils are in the beds of tanks and in wet fields where the red soil has changed color owing to continuous manuring with vegetable matter. 80 per cent. of talook is red sand, rest being red loam with 1 per cent. of so called black soils. Except fine wet lands under Calingaroyan and garden lands, talook is of poor soil. The uplands are very poor as a rule, the best part of the soil having been washed into the bottoms and thence largely to Trichinopoly and Tanjore. Trees and crops are those of the ordinary dry lands. Fruit trees, except palmyras and a few cocoanuts near wells, are rare; even tamarinds are scarce. Chillies [q.v.] and tobacco [pogauk], the latter especially in the southern parts of the talook, grow well in gardens in the cold weather; Sunn [q.v.] hemp is grown in the neighbourhood of Tingalore where excellent gunny [q.v.] is made. The chief crops are in dry lands, cumboo [bajrah], cholum [q.v.], pulses [dholl], oil-seeds [yennay], cotton [q.v.] and other fibres; in gardens chillies, raggy [q.v.], cholum, cumboo and tobacco; in wet-lands, paddy [q.v.], raggy and gingelly [q.v.]; sugar-cane [q.v.] and plantains are not extensively grown. Turmeric [country saffron], yams [auloo] and sweet-potatoes [q.v.] are also grown in garden lands, especially near Erode. The only fruits grown are pomegranates [anaur], especially near the railway; cocoanuts [q.v.] on wet lands in topes [q.v.] and in gardens in rows along the water-courses; plantains [q.v.] and tamarinds [q.v.]. Mangoes [q.v.] are very rare. There are also a few pumplemoses [pummelow], oranges [q.v.] and limes [q.v.]. The jujube [q.v.] is plentiful near Coonnatore; there are very few other wild fruits except the prickly-pear [q.v.] which grows in masses. Dry crops are usually poor. For pasture the ryots depend upon the public lands and the grazing of their fallow and cotton lands. Cattle [maud] are not much bred for sale. The chief industries besides agriculture are cart-building, stone-quarrying, well-digging, potting and brick-making, iron-smelting, weaving, choonam-burning and saltpetre-making; there are also the ordinary carpenters and workers in iron, brass [pittalay] and the precious metals [pon]. Cart-building is active in Erode town; it is also found occasionally elsewhere. Stone is quarried in many places, chiefly by Woddar; that for the Cauvery bridge was found near Ootcooly railway station and is of good quality. Common grindstones of gneiss are cut in the Cauvery bed and in many other places. The Woddar are the only well-diggers. Iron smelting is now rare. Only country coarse cloths are woven and the manufacture is on the decline. The saltpetre [shorah] industry once considerable, has now almost died out. A large trade is done in country leather [chamrah]. The trade in raw produce, salt [ooppoo] and cloths is the most important. The oil and hide trades have no special centres, but cotton is largely brought into Erode. The only other product is the bark of the white acacia [velvail] used in distilling, and that of the Cassia auriculata or auvauray [tungaid] largely used for tanning [chamrah]. Rivers are the Bhawauny, Cauvery and Noyil besides numerous drainages, such as the Caroongalpullam crossing the Calingaroyan and Poogalore channels and falling into the Cauvery and Noyil. The various drainages and especially the Caroongalpullam are liable to heavy floods owing to the undulating surface. The Cauvery is somewhat used for traffic from above Bhawauny downwards; passengers and light freight are taken in basket boats when the river is in flood. Ferries are tolerably numerous. Irrigation is either direct from channels [q.v.], from tanks fed by channels, or from tanks supplied by rain-fed surface or jungle streams. Under the first head are the Calingaroyan and Poogalore channels, the latter only irrigating a few acres. In the second class is Vadoogapolliem tank. Cultivation under tanks varies considerably. Under some tanks, as Dalavoypolliem, the ryots do not grow crops unless there is a full supply; in others, as Poothoorpullapolliem, which have not filled for years, the ryots have dug wells and cultivate crops, such as sugar-cane the whole year round. Camping grounds :—Chengampully, Chittore, Erode and Peroondoray. Places of archæological interest :—Circar yairipolliem, Codoomoody, Erode, Nullamputty, Peroondoray. There are small Jeina temples at Arasa mullay, Poondoray, Tingalore, Vellode, Vijiamungalam. Principal Trig. stations :—Shennimullay, Yelmattore, Yettimullay. The leading places, &c., in the talook are the following.——*Aratchalore* (அரச்சலூர் - araççalúr, Tam.). From (arasu, tam. the peepul tree, ficus religiosa, linn. + úr, tam village). Village, Hill; pop. 6,707; acres 14,651; lat. 11° 10′; long. 77° 44′; from Coimbatore E.N.E. 51 miles; from Erode S.S.W. $12\frac{1}{2}$ miles. Four Shiva temples with festivals once a year.——*Bhawauny* (பவானி - paváni, Tam.). See sep. title.——*Calingaroyan* (கலிங்கராயன் - kalingaráyan, Tam.). See sep. title.——*Canacaupooram* (கனகாப்புரம் - kanagáppuram, Tam.). From (kanaka, san. gold + pura, san. town). Village; pop. 1,488; acres 1,897; lat. 11° 15′; long. 77° 44′; from Coimbatore E.N.E. 52 miles; from Erode S.S.W. 7 miles. Cave in rock. Three Shiva temples. Large market.——*Caunjicoil* (காஞ்சிக்கோவில் - káñjikkóvil, Tam.). From (káñji, tam. holopetala integrifolia, planch. + kóvil, tam temple). Village; pop. 5,417; acres 9,454; lat. 11° 22′; long. 77° 39′; from Coimbatore E.N.E. 51 miles; from Erode W.N.W. 9 miles. Five Shiva temples with festivals.——*Cauvery* (காவேரி - kávéri, Tam.). See sep. title.——*Codoomoody* (கொடுமுடி - kodumudi,* Tam.). From (kodu, tam. rough + mudi, tam. peak). Village, Sub-registrar's station, Railway station; pop. 4,020; acres 3,089; lat. 11° 05′; long. 77° 56′; height 430 feet; from Coimbatore E. 63 miles; from Erode S.S.E. $21\frac{1}{2}$ miles. Thriving wet village. Ancient and well-sculptured Shiva temple. Market much frequented by grain merchants.——*Coonnatore* (குன்னத்தூர் - kunnattúr, Tam.). From (kunram, tam. hill + úr, tam. village). Village; pop. 981; acres 994; lat. 11° 16′; long. 77° 27′; from Coimbatore N.E. 36 miles; from Erode W. $22\frac{1}{4}$ miles. Large market.——*Erode* (ஈரோடு - íródu, Tam.). See below.——*Noyil* (நொய்யல் - noyyal, Tam.). See sep. title.——*Oonjalore* (ஊஞ்சலூர் - úñjalúr, Tam. unjalúr*). From (úñjal, tam. swing + úr, tam. village). From the swinging festival. Village, Railway station; pop. 4,399; acres 3,610; lat. 11° 08′; long. 77° 55′; height 446 feet; from Coimbatore E. 63 miles; from Erode S.E. $17\frac{1}{2}$ miles. Old Shiva temple with inscriptions.——*Passore* (பாசூர் - pásúr, Tam. pásur*). From (pásu, tam. green + úr, tam. village). Village, Railway station; pop. 1,335; acres 1,509; lat. 11° 14′; long. 77° 54′; height 497 feet; from Coimbatore E.N.E. 63 miles; from Erode S.E. $11\frac{1}{4}$ miles. Irrigated by Calingaroyan channel.——*Peroondoray* (பெருந்துறை - perundurai, Tam.). See sep title.——*Shennimullay* (சென்னிமலை - shennimalai, Tam.). From (shenni, tam. summit + malai, tam. mountain). Village, Hill, Trig. station; pop. 2,656; acres 5,487; lat. 11° 09′ 23·67″; long. 77° 37′ 44·05″; height 1,749 feet; from Coimbatore E.N.E. 44 miles; from Erode S.S.W. 15 miles. Famous Soobramanyan temple much resorted to by Vellaular. Market.——*Yelmattore* (எழுமாத்தூர் - ezhumáttúr, Tam.). From (ezhumai, tam. height + máttúr, tam. village so called). Village; pop. 4,662; acres 8,335; lat. 11° 11′; long. 77° 49′; from Coimbatore E.N.E. 57 miles; from Erode S.S.E. $11\frac{1}{2}$ miles. Shiva and Vishnoo temples on rock. Trig. station; lat. 11° 12′ 02·30″; long. 77° 47′ 27·96″; height 1,342 feet; from Erode S. 10 miles; from Yelmattore village N.W. 2 miles.——*Yettimullay* எட்டிமலை - ettimalai, Tam.). From (etti, tam. the poison-nut tree, strychnos nux-vomica, linn. + malai, tam. mountain). Hill; lat. 11° 03′; long. 77° 53′; from Coimbatore E. 60 miles; from Erode S.S.E. $20\frac{3}{4}$ miles. Within Vadivoollamungalam village. Trig. station; lat. 11° 03′ 52·68″; long. 77° 53′ 15·10″; height 618 feet; from Erode S.S.E. 20 miles; from Vengambore S.S.W. $3\frac{1}{2}$ miles.——**(2)** Town, Divisional and talook head-quarters, District moonsif's and Sub-registrar's station; it is also the Head-quarters of the Assistant superintendent of Police and of the D.P.W. Sub-divisional officer, Railway station; Coimbatore dist., Erode tal.; pop. 12,330; acres 7,890; lat. 11° 20′; long. 77° 46′; height 543 feet; from Coimbatore E.N.E. 57 miles; from Madras S.W. 212 miles; from Ootacamund E. 69 miles; from Pollachy N.E. 68 miles; from Suttimungalam E.S.E. 35 miles. Close to Cauvery at extreme E. of district. In time of Hyder ally it contained 3,000 houses and a population of 15,000; but in consequence of successive Mahratta, Mysore, and British invasions, it was almost deserted and ruined. Until 1667 it formed part of the Madura kingdom, but in that year fell to Dodda deo, Rajah of Mysore. In 1768, it was taken and lost by the British; and in 1790, it was finally recaptured. As soon as peace was signed, the people returned to a place with so many advantages in position and fertility; and within a year it had 400 houses and a population of over 2,000. The garrison was withdrawn in 1807, and the ruined fort levelled, as a relief work during the famine of 1877. The space enclosed within the ramparts had been long before occupied by cotton presses and saltpetre warehouses. Two old Vishnoo and Shiva temples, both with inscriptions. Trade consists chiefly in the export of cotton, saltpetre, and rice. It is an important railway entrepôt. Besides the Great trunk road from Madras, which passes through Erode; the main lines to Caroor, Peroondoray, and Mysore, one viâ the Hassanore ghaut, the other viâ the Burgoor ghaut, radiate from it. Junction of Madras and S.I. railways. Roman catholic mission. $1\frac{1}{2}$ miles E. is bridge of 22 arches crosses Cauvery, 1,536 feet long.

ETIMAUD (اعتماد - etimád, *Ar.*). From (amada, ar. to support). Right arm. Part of lacab [q.v.]; as Etimaud jung, the support of war [ism].

EUROPE (विलायती - viláyatí, *Mahr.*; ولايتى - viláití, *Hind.*; ಶೀಮೆ - shíme, *Can.*; సీమ - síma, *Tel.*; വിലാത്തി - vilátti, *Mal.*; சீமை - shímai, *Tam.*). Hind. from (viláyat, ar. foreign country). Drav. from (símá, san. border). Common prefix to plant names, following the dravidian languages. Term denotes any foreign article; particularly Arabia, Europe, or Persia. Not used for Chinese, or other countries east of India [faranghee, firangy, foreign, seema, vilauyaty]. Examples joining two genera are, where transl. is of second term :—Adansonia digitata (viláitíamli), tamarindus indica; Althæa officinalis (shímaittutti), abutilon indicum; Arachis hypogæa (viláitímúng), phaseolus mungo; Baliospermum montanum (shímaiyámanakku), ricinus communis;

Carum carui (viláitízírekáper), cuminum cyminum; Cassia alata (viláitíagtí), sesbania grandiflora; Crotalaria juncea (viláitíakrekánár), calotropis gigantea + fibre; Cydonia vulgaris (shímaimáthalai), punica granatum; Fourcroya gigantea (shímaikkattázhai), aloe indica; Garcinia cambogia (viláitíamlı), tamarindus indica; Hedychium spicatum (shímaikkiççilikkizhangu), curcuma zedoaria; Jatropha multifida (viláyatiharalu), ricinus communis; Lycopersicum esculentum (viláitíbaingan), solanum melongena; Malpighia glabra (shímainelli), phyllanthus emblica; Malva sylvestris, var. mauritiana (vilátíkangíkájhár), abutilon indicum; Myrtus communis (viláitímenhdí), lawsonia alba; Parkinsonia aculeata (símajíluga), æschynomene aspera; Pedilanthus tithymaloides (símachitramúlamu), plumbago zeylanica; Peganum harmala (símagóranta), lawsonia alba; Phaseolus trilobus (shímaiyavarai), dolichos lablab; Pinus longifolia (shímaittévathári), erythroxylon monogynum; Pithecolobium dulce (símachinduga), albizzia odoratissima; Poinciana regia (símatangédu), cassia auriculata; Quisqualis indica (viláitíchaméli), jasminum grandiflorum; Sideroxylon tomentosum (shímaimagizham), mimusops elengi; Stilpnophyllum elasticum (valáitíbarkéjhár), ficus bengalensis; Thevitia nereifolia (shímaiyalari), nerium odorum. See gloss. paragraphs. There are numberless others where the genus is the same.

EVANGELION (ഏവൻഗേലിയോൻ - evangaliyón, *Mal.*). Gospel among Malabar syrian christians.

EYE (چشم - chashm, *Hind.*). Prefix.——*Eye fly* (मशक - mashaka, San.; मुरकूट - murakúta, Mahr.; ڈانس - dáns, Dec.; ಕಣ್ಣುಸೊಳ್ಳೆ - kannusolle, Can.; దోమ - dóma, Tel.; കൊതു - kotu, Mal.; ඝොෂ - ghósha, Singh.; கொசு - kosu, Tam.). Title from getting into the eyes. San. from (mash, san. to hum). Dec. from (damsh, san. to sting). Can. from (kannu, can. eye + solle, can. mosquito). Mal. from tamul by corruption. Singh. from (ghush, san. to sound). Tam. from (ghósha, san. gnat). Belongs to family Muscidæ, diptera, holometabola, insecta [poochy], of naturalists [jantoo]. They form clusters on hanging threads. Avoid rooms in which branches of penny royal [poodeenah], or of walnut tree [acroot] have been suspended.——*Eye powder* (چشمیزج - chashmízaj, Pers.). Title from powdered seed being applied in ophthalmia. Same as Black horse-gram.

EYIL (எயில் - eyil, *Tam.*). Means forest. Ancient division of Tondaimundalam [tonday].

F (ف - fe, *Hind.*). Symbol for 80; in almanacs, the moon [chundran] in her altitude [avanataumsham].

FACE PLANT (ചതമരം - chatamaram, *Mal.*; வட்டிலை - vattilai, *Tam.*). Title from pattern on leaf. Mal. from (chata, mal. hairlock + maram, mal. tree). Tam. from (vadu, tam. scar + ilai, tam. leaf). Title otherwise Caricature plant, Painted justicia, Scar leaf. Botanically Graptophyllum hortense, nees, acanthaceæ [vricsham, 101]. Alias Justicia picta. Low thorny shrub; leaves smooth, elliptical, lanceolate, 3 to 4 inches in length, dull deep green above and dark red below; have yellow marks, supposed to be caricatures of the human face; flower crimson, flowering nearly all year; common in gardens; flower religious; no other species here.

FAKEER (فقير - fakír, *Hind.*). From (fakr, ar. poverty). Any poor person. So a Mahomedan religious mendicant [calandar]. These are divided first into baushara [q.v.] or with the law, and beshara [q.v.] without the law; and under each head are various distinct brotherhoods, having their own office bearers and special practices. Every new-comer is admitted first as a mooreed [q.v.] or disciple, and may afterwards become a moorshid [q.v.] or teacher [peer]. At the Moharram [q.v.] the term means men disguised as fakeers. The principal Moharram fakeers were originally parties of mourners, and according to Mahomedan law only praying [namauz] and fasting [roza] during the anniversary are recognized. But these have been turned into masquerade [masheikh]. For Hindoo devotees, see Sanyausy and Beiraugy. Term is used in combination with the name of Mahomed, his companions, &c., to form Mahomedan proper names, indicating humility; as Fakeer ahmed, beggar of Ahmed [ism].——*Fakeer's bottle* (अलाबु - alábu, San.; रानभोंपळी - ránabhómpalí, Mahr.; काडदुदी - kádadudhí, Conc.; قرع - kara, Ar.; كدو - kaddú, Pers. and Hind.; هراكدو - harákaddú, Dec.; لابو امبن - labuamban, Malay; ಸೊರೆ - sóre, Can.; ಕಾಟುತುರೆ - kátuture, Too.; సొర - sora, Tel.; ചുര - chura, Mal.; දියලබ්බා - diyalabba, Singh.; சுரை - shurai, Tam.). Title from use by fakeers. San. from (a, san. negative prefix + lamb, san. to sink); serve as buoys. Mahr. from (rána, mahr. wild + bhómpalí, mahr. the pumpkin gourd, benincasa cerifera, savi.). Ar. from (kara, ar. empty). Hind. from persian. Dec. from (hará, hind. green + kaddú, hind. gourd). Too. from (kátu, too. wild + ture, too. gourd). Singh. from (diya, singh. water + labba, singh. long gourd). Drav. mean hollow. San. also (dvikándiká), meaning double melon; (pindap'hala), meaning ball fruit. Hind. also (dilpasand), meaning heart + approved; (golkaddu), meaning round gourd; (janglíkaddú), meaning wild gourd; (kábulí), meaning cabool plant; (kásíphal), meaning benares fruit. Can. also (huççusóre), meaning wild gourd; (kahisóre), meaning bitter + gourd. Tel. also (ánapa), meaning edible; (ánuga), meaning edible; (gubbakáyachettu), meaning plant with round fruit. Mal. also (kaippaççura), meaning bitter gourd; (káttuchura), meaning wild gourd; (vellaççura), meaning white gourd. Tam. also (kinnariççurai), meaning lute gourd [calabash]. Title otherwise Bottle gourd, Calabash, False calabash, Trumpet gourd, White pumpkin [wax gourd]. Botanically Lagenaria vulgaris, sering., cucurbitaceæ [vricsham, 62]. Alias Cucurbita lagenaria; Pepo lagenarius. Stem climbing softly pubescent; calyx campanulate; petals rising from within the margin of the calyx; tendrils three to four-cleft; leaves cordate, nearly entire or lobed, lobes obtuse or somewhat acute, glaucous; flowers fascicled, white; petals very patent; fruit pubescent, at length nearly glabrous and very smooth; seeds numerous, flesh-white, edible; fruit yellow when ripe, having appearance of two oval gourds united endwise, or inflated bladder compressed by a cord around it. Pulp of fruit used in poultices, bitter and purgative, and substitute for colocynth [bitter water melon]; decoction of leaves mixed with sugar [q.v.] given in jaundice; seeds yield oil used for headache. By europeans boiled when young and used as vegetable marrow [q.v.]; by natives sliced and cooked as curry [q.v.]; young shoots and leaves eaten by all classes. Fruit actually used by beggars and others when dried and empty as a bottle [cooppy]; tendril gives a dye; fruit used as buoy for swimming across river and transporting baggage, &c.; the large round kind used for making the stringed instrument kinnary [kingry]; the longer and narrow sort make the wind instruments magady [q.v.], with which snake-charmers entice snakes from holes; when wild the fruit is somewhat poisonous. No other common species here.

FAKR (فخر - fakhr, *Ar.*). From (fakhara, ar. to excel). Glory, pride. Part of lacab; as Fakr ood deen, the pride of religion; Fakr ood dowla, the pride of the empire [ism].

FAKT (فقط - fakt, *Hind.*; ఫకతు - p'hakatu, *Tel.*). From arabic. Only. Written at the end of a document [dastavaiz] to indicate that it is completed.

FALAUNA (فلانه - fulánah, *Hind.*). From (fulán, ar. such a one). A person whose name is not specified.

FALOOS (فلوس - fulús, plural of فلس - *Hind.*). From lat. follis. A copper coin [naunyam] equal to five cash [q.v.]. From arabia and persia.

FALSAH (परुष - parusha, *San.*; फलशि - p'halashi, *Mahr.*; فالسه - fálsah, *Ar.*; پالسه - pálsah, *Pers.*; فالسا - fálsa, *Hind.*; فالسا - fálsa, *Dec.*; పుటికి - putiki, *Tel.*; දමිනියා - daminiya, *Singh.*; பலிசு - palisa, *Tam.*). Title from deccany. San. means rough. Singh. from (damanavá, singh. to tame), devil tamer; from the priest binding the devil he wishes to subdue to this tree [tadda]. Tam. from hindostany. Title otherwise Devil-tamer, Sweet falsah. Botanically Grewia [dharmanam] asiatica, linn., tiliaceæ [vricsham, 27]. Alias Grewia subinequalis. Tree; leaves five-nerved, roundish-cordate, unequally serrated, under side pubescent or hoary; stipules lanceolate-subulate; peduncles two to four, longer than the petiole, three-flowered; sepals oblong-lanceolate, longer than the petals; stigma four-lobed; drupes globose with one to two, one-celled nuts; flowers yellowish-orange. Small, hazel-like tree; cultivated; flowers about end of cold season, and fruit ripens in april and may; fruit a berry, about the size of a pea [calauyam] with a stone in the centre. Fruit medicinally astringent, cooling and stomachic. Fruit eaten; from same a spirit is distilled and a sherbet [q.v.] made. Bark used in rope making. Wood yellowish-white.——*Creeping falsah* (धविपोंमसरी - dhavipómsarí, Conc.; ಮೊದಿರಕಣ್ಣಿ - modirakanni, Can.; ಮುಲ್ಲಂಕೊಲೆ - mullankole, Too.; తివ్వపుటికి - tivvaputiki, Tel.; മോതിരക്കണ്ണി - mótirakkanni, Mal.; බූගෙටියා - búgetiyá, Singh.; மோதிரக்கண்ணி - móthirakkanni, Tam.). Title from rambling habit. Can. from malayalam. Tel. from (tivva, tel. creeper + putiki, tel. grewia asiatica, linn.). Mal. from tamul. Singh. from (bú, singh. earth + getiya, singh. the plant). Tam. from (móthiram, tam. ring + kanni, tam. flower-bud); from shape. Tel. also (vudupa); (gatrinta). Singh. also (getiyá); (híngetiyá), meaning low + the plant. Tam. also (agóri). Botanically Hugonia mystax, linn., lineæ [vricsham, 28]. Alias Hugonia obovata. Rambling shrub, 10-15 feet; leaves alternate, or crowded at the ends of the branches, oval, glabrous, entire; sepals distinct, acute, unequal; petals five, alternate with the sepals; styles five, distinct; ovary roundish, five-celled; fruit a drupe, enclosing five distinct one-seeded carpels; peduncles axillary, one-flowered; spines circinate, opposite; flowers yellow; flowering in rainy season. Bruised roots used in reducing inflammatory tumours, in bites of serpents, and as febrifuge and anthelmintic, especially for children.

FANAM (पण - pana, *San.*; فلم - falam, *Hind.*; பணம் - panam, *Tam.*). From (pan, san. to barter). Money in general, so coin.—"*a*" Anciently a small gold coin, the tenth or twelfth part of a calanjy [q.v.]. Somewhere about $1\frac{1}{4}$ rupee. The ancient gold fanams generally exhibit the same devices as the

pagodas [q.v.]. Such are the elephant of the congoos, boar of the chalookyas, fish of the paundyans, tiger of the cholas and of the hoysalas of dwaurasamoodram; some with the lion-looking back, the device of the cadambas; some with a naugam [cobra] serpent called Soobramanyan; the Shreeveishnava three-pronged sectarian mark [naumam], probably struck at Vencatagherry or Tripatty; the Getty fanam with the figure of a dagger identified with the Mahrattas of Tanjore; the bull, which may be related either to Condaveed, Warangal, or perhaps to the later Cholas; the seated Lutchmy fanam connected with the Lutchmy mauda or half pagoda, &c. Latterly the fanam was of silver or base gold. This bore various local values, but according to the old Madras monetary system, prevailing till 1818, 42 fanams went to one star pagoda, and a Madras silver fanam was therefore worth about 2*d*. Silver fanams are still met with on W. coast and as late as 1862 were received at the treasuries of Tellicherry and Calicut; they are generally four chuckrams, and worth about 3½*d*.; like chuckrams [q.v.] they are counted on a board.—"*b*" The following are different kinds of old gold [pon] and silver [velly] Fanam coins:—Cataury, from (kattára, san. dagger); gold, struck by rajahs of negapatam. Chikka deva roya, from the younger devaroya of mysore, silver. Chooly, from (shuli, tam. circle), gold, ramnaud. Gajapaty, from gajapaties of orissa gold. Getty, with figure of dagger, mahrattas of tanjore, gold. Gopooram, from image, gold. Haley, from (halé, can. old), silver. Hydary, copper, issued by hyder. Ikkairy, from place so called, gold. Jhelly fanam, from (shalli, tam. small piece), trichinopoly, 16 to 1 pagoda, gold. Madura, gold, struck by naugama naick. Matsya moodray, from fish stamp, gold. Meily, from (muyyin, can. token), seringapatam, 45 to 1 star pagoda, silver. Moraury row, gold, struck by moraury row, also known as nauga moodray. Mysore, silver. Nangoora; anchor fanam, coimbatore coin, 33 to 1 star pagoda, silver. Nauma moodray, having naumam, gold. Pitchacaul, beggar's fanam, coimbatore, 1,588¾ to 100 star pagodas, base gold. Pondicherry, silver. Raja canteroy, coined by canteroy, mysore king, gold. Raushy fanam, from (ráshi, san. a sign of the zodiac); the most ancient of the indigenous fanams; gold, and have fourteen dots; twelve dots are twelve signs [raushy] of the zodiac, and the two separate dots are sun [sooryan] and moon [chundran]. Shambhoo moodray, from (shambhu, san. shiva), gold. Simha moodray, lion stamp, gold, of honnore. Soobbaroya or snake, by poligar of codicondah; gold; four varieties; in one is a snake on a plain field supported by emblems of sun and moon; in a second sun and moon are wanting; in third only upper portion of snake with hood distended appears between sun and moon, on fourth the typical five-headed naugam occurs in usual seated position; on the reverse is the word shree [q.v.] in nagry [q.v.]. Sultauny; a coin of tippoo's, about 3½ to the rupee, silver. Tellicherry, silver, 33 to 1 star pagoda, silver. Trinomallee, gold. Veeroye, by veera royer of coimbatore, gold and silver; malabar, new, 1,225 to 100 star pagodas, old, 1,400 to 100 star pagodas; coimbatore, 1,489$\frac{1}{16}$ to 100 star pagodas; some very pure, whence called aparanjy [q.v.] fanams. Vencatramana, from the god, gold. Vrishabha moodray, bull stamp, gold.—"*c*" The following may be taken as a scale for the silver fanam coin:—2 chinnapanams = 1 fanam; 22½ fanams = 1 star pagoda [naunyam, 2a]. Approximate actual value, 1 fanam = 2 annas 6 pies. Compare Can. hana, Tel. baida.—"*d*" Fanam is also a goldsmith's weight. 2 munjaudies = 1 fanam; 9 fanams = 1 pagoda weight [niray, 3a]. Approximate actual value, 1 fanam = 6 grains. Same as Can. hana, Tel. chinnam. Compare Chowlam. See vol. I, 609.

FAN PALM (پنکھے کا تاڑ - pankhekátár, *Hind.*). Title from fans being made of the leaves. The usual application of this name is to the palmyra [q.v.], which is the type on which European fans have been formed; but it is also sometimes applied to the talipot [q.v.].

FARAMOOSHY (فراموشی - farámúshí, *Hind.*). From persian. Carelessness.

FARANGHEE (فرنگی - farangí, *Hind.*). Foreign [q.v.] or european [europe, firangy, seema, vilauyaty]. Plant first term. Ex., where transl. is of second term:—Argemone mexicana (frangídhatúra), datura fastuosa; Boswellia serrata, var. glabra (farangíúdkájhár), incense + tree; Sterculia fœtida (farangíbádam), prunus amygdalus. See gloss. paragraphs.

FARASY (فارسی - fársí, *Hind.*). Persian language [pars].

FARAUR (فرار - farár, *Hind.*). From (farra, ar. to run away). Flight.——*Faraury* (فراری - farárí, Hind.). From (farár, pers. flight). A person who has absconded.——*Faraury log* (فراری لوگ - farárílog, Hind.). From (above + log, hind. people). Deserters.

FAREED (فرید - faríd, *Ar.*). From (farada, ar. single). Unique, precious. The name of a Mahomedan saint [walee]. Mahomedan alam. Also part of lacab; as Fareed bee, alam + alaumat; Fareed ood deen, the precious gem of faith [ism].——*Fareedbootee* (فرید بوتی - farídbútí, Hind.). Means fareed's plant, from a saint of that name having lived on water, rendered mucilaginous with the leaves. Plant name common to Cocculus villosus, Pedalium murex; see gloss. paragraphs.

FARHAT (فرحت - farhat, *Hind.*). From (faraha, ar. to rejoice). Comfort, delight. Part of alam and lacab; as Farhat bee, delightful lady; Farhat ool moolk, joy of the state [ism].

FAROKHT (فروخت - farokht, *Hind.*). From (furokhtan, pers. to sell). Sale [vicrayam].

FAROOK (فاروق - fárúk, *Hind.*). From (faraka, ar. to distinguish). Title of Caliph omar.——*Farooky* (فاروقی - fárúkí, Hind.). A class of Sheikhs named after Caliph omar.

FARSANG (فرسنگ - farsang, *Hind.*). Persian measure of length. Twenty-two furlongs and two-fifths or 2·78 miles [coss].

FARZ (فرض - farz, *Hind.*). From (faraza, ar. to mark), because it is pressed on a man like a mark. God's commands are of two kinds:—Farz or injunction, which in delivering he has repeated thrice and the neglect of which is a mortal sin; Waujib [q.v.] or injunction which in delivering he has repeated twice.

FARZEEN (فرزین - farzín, *Hind.*). Queen in chess [shatranj].

FASEEH (فصیح - fasíh, *Hind.*). Means clear. Eloquent. Part of lacab; as Faseeh ood deen, eloquent in religion [ism].

FATAKREE (پھٹکری - phatakrí, *Hind.*). Alum [padicauram].

FATAUWAH (فتاوا - fatáwá, *Hind.*). From (fatá, ar. decree). Plural. Collection or digest of judicial decisions. The best known is the Fatauwah e alumgheery, compiled by order of Aurungzeeb [futwah].

FATIMAH (فاطمه - fátimah, *Hind.*). From (fatama, ar. to wean). Name of the prophet's daughter. Female alam, as Fatimah bee, alam + female alaumat [ism].

FAUKHTAH (فاخته - fákhtah, *Hind.*). A dove [capotam]; term of abuse, meaning simpleton.

FAUSH (فاش - fásh, *Hind.*). From persian. Published.

FAUTIHA (فاتحه - fátihah, Hind.). From (fataha, ar. to open) [futteh]. The first chapter of the Koran [q.v.] which is recited in prayers [namauz] for dying Mahomedans; hence prayers for defunct [janauza]; at marriages [shaudy], &c., oblations and offerings to saints [walee].

FAZL (فضل - fazl, *Hind.*). From (fazala, ar. to exceed). Grace. Prefixed to an alam forms a lacab; as Fazl hoossain, grace of hoossain; Shiah name [ism].——*Fauzil* (فاضل - fázil, Hind.). From (fazala, ar. to exceed). Excellent. Prefixed to an alam forms a lacab; as Fauzil Mahomed, excellent mahomed. Feminine form is Fauzilah; as:—Fauzilah khanam, with female alaumat added [ism].

FEEL (فیل - fíl, *Hind.*). Elephant [q.v.]. Feel khana are elephant stables [aunesaul].

FEHRIST (فهرست - fehrist, *Hind.*). From persian. Catalogue [daul, zaubitah].

FEISAL (فیصله - faislah, *Hind.*). From (fasl, ar. division) [fusl]. Settlement. Feisal teervay is settled land-tax.

FEIZ (فیض - faiz, *Ar.*). From (fáza, ar. to overflow). Bounty. Prefixed to an alam forms a lacab; as Feiz ally, bounty of ally [ism].——*Feiyauz* (فیاض - faiyáz, Ar.). Liberal. Prefixed to an alam forms a lacab; as Feiyauz ally, bounty of ally [ism].——*Feizoo* (فیضو - faizú, Hind.). Graceful. Lacab [ism].

FERISHTA (فرشته - firishtah, *Hind.*). From (firistádan, pers. to send). A messenger. An angel. The four recognized angels by Mahomedans are Jibbreel [q.v.], the archangel, Michael [q.v.], of rain; Israfeel [q.v.], of resurrection; and Izraeel [q.v.] of death. Takhalloos [q.v.] of Hindoo shah the historian of the Beejapore court. His work Taureek e ferishta is text-book at Madras.

FEROKHEE (فرخی - farrukhí, *Hind.*). From (farrukh, pers. happy). Tippoo's projected capital near Beypore [furrackabad]. Also his quarter mohur [q.v.].

FEVER (ज्वर - jvara, *San.*). Prefix to many medicinal plants. ——*Fever grass* (ज्वराङ्कुश - jvaránkusha, San.). Title from use. Sanscrit means fever goad. Same as Ibharancoosha.——*Fever nut* (జ్వరఘట్ట - jvaragattsa, Tel.). Title from use. Same as Bonduc.

FI (فی - fí, *Ar.*). Arabic prefix signifying in; as Filjoomla meaning in + whole, on the whole; Filshad, per cent.

FIDAH (فدا - fidá, *Ar.*). From (fidá, ar. to ransom). Sacrifice. Prefixed to an alam forms a lacab; as Fidah ally, sacrifice of ally; mostly taken by Shiahs [ism].

FIDWY (فدوی - fidwí, *Pers.*). Obedient. So 'your obedient servant,' or 'I.'

FILFIL (فلفل - filfil, *Ar.* and *Pers.*). Chilly [q.v.] or pepper [q.v.]. Cf. Capsicum annuum (filfiliahmar), red chilly; Piper longum (filfilidaráz), long pepper; Piper nigrum (filfilisiyáh), black pepper. See gloss. paragraphs.

FINDAK (فندق - findak, *Hind.*). From (banadík, ar. venice), as coming from there. Filbert.——*Findakihind* (فندق هند - findakihind, Ar.). Indian filbert [bonduc], or soapnut [q.v.].

FIRANGY (فرنگی - farangí, *Hind.*). From (farang, pers. europe). Relating to Europe [europe, faranghee, foreign, seema, vilauyaty]. Portuguese, who settled on the west coast of India, thus known to the natives. Also applied to natives converted by the Portuguese. Now used to denote any European, especially by Mahomedans. Also occurs in some place names, as firangy dibba or portuguese mound.

FIRAUSAT (فراست - firásat, *Hind.*). From (farasa, ar. to discern). Sagacious. Part of lacab; as Firausat jung, sagacious in war [ism].

FIREWORK PLANT (इंगुदी - ingudí, *San.*; हिंगण - hinganá, *Mahr.*; هنگن کا پیڑ - hingankáper, *Hind.*; هنگن کاجهاڑ - hingankájhár, *Dec.*; ಇಂಗಳೀಕ - ingalíka, *Can.*; గార - gára, *Tel.*; നഞ്ചുണ്ട - nañchunta, *Mal.*; நஞ்சுண்டான் - nañjundán, *Tam.*). Title from use of nut shells. San. from (ing, san. to move) [bandam, catapang]. Mahr. from sanscrit. Hind. from (hingana, mahr. the tree + per, hind. tree). Can. from sanscrit. Tel. from (gaurí, san. the deity); nut shells like grenades used in her worship [portia]. Mal. from tamul. Tam. from (nañju, tam. poison + undai, tam. a ball); destructive ball, from use of nut shells in fireworks. San. also (tápasataru), meaning anchorite's tree; (munipádapa), meaning anchorite's tree; because gooroos prepare from the seeds an oil for the lamp which they use in the ceremony of gooroo oopausanay. Hind. also (hingol). Title otherwise Bean caper, Gooroo's tree, Gowry's tree, Hingan, Poison-ball, Zachun-oil tree. Distinguish from Hing [q.v.]. Botanically Balanites roxburghii, planchon, simarubeæ [vricsham, 33]. Alias Balanites ægyptiaca, indica; Himenia ægyptiaca, americana; Ximenia ægyptiaca. Tree, 20 feet; leaves alternate, bifoliate; spines axillary; calyx five-parted; sepals villous; petals five, lanceolate; pedicels one-flowered; flowers aggregate, small, green, fragrant; flowering in may; drupe ovoid, acute, one-celled, one-seeded, with a woody five-angled nut; nut covered with a soft pulpy substance like soap [sauboon], bitter and with an offensive greasy smell; variety of egyptian plant found in plains of deccan [q.v.]. Unripe drupes are purgative; seeds given in coughs; bark and leaves anthelmintic and purgative; bark used as cattle medicine. Ripe drupes are eaten; young twigs and leaves browsed by cattle. Seeds give fixed fat oil; nut very hard and used in fireworks [baunam]; a hole being made in it, kernel extracted, and shell filled with powder, when on firing it bursts with a loud report. Wood yellowish white, moderately hard, no heart-wood, no annual rings; used for walking-sticks and for fuel. No other species here.

FIRKAH (فرقه - firkah, *Hind.*). From (farika, ar. to divide). Division. Portion of a talook [taraf, tookady]. In Canara portion of a hobly [q.v.]; the charge of one shanbogue [q.v.]. Cf. Vattam.

FIRMAUN (فرمان - farmán, *Hind.*). From (farmúdan, pers. to command). A mandate, charter [sunnud].——*Nahfirmaun* (نافرمان - náfarmán, Pers.). From (ná, pers. against + farmán, pers. order). Title otherwise Dolphin flower, Larkspur, Rocket larkspur. Botanically Delphinium ajacis, linn., ranunculaceæ [vricsham, 1]. The specific name from certain markings on petals, presenting resemblance to letters A I A I; hence conjectured to be hyacinth of ancients, which had similar markings. Annual with much divided alternate leaves and showy racemes of blue flowers; seeds very acrid. Stavesacre or Lousewort is from delphinium staphisagria, linn. No other species here.

FIROZE (فیروز - fíroz, *Ar.*). Victorious. Part of lacab; as a Firoze hoossain, triumph of hoossain [ism].——*Firozah* (فیروزه - fírozah, Ar., Pers. and Hind.; నీలమణి - nílamani, Tel.; நீலக்கல் - nílakkal, Tam.). Drav. means blue gem. From Persia. The stone is opaque, lamellar, and of a fine pale-blue color. It is the tooth of an animal, penetrated with blue calx of copper [ratnam].

FIRYAUD (فریاد - faryád, *Hind.*). From persian. A complaint, entering of a law suit [anyauyam]. Firyaudy is the complainant, plaintiff.

FITR (فطر - fitr, *Hind.*). From (fatara, ar. to break). Breaking a fast [roza]; especially the meal taken after sunset every day in the month of Ramzaun [q.v.], or the Eed ool fitr when that month [maheena] is complete.——*Fitoor* (فتور - fitúr, Hind.). From (fatara, ar. to slacken). Intrigue, insurrection [baghauvat].——*Fitrah* (فطره - fitrah, Hind.). Alms of grain or corn given at Eed ool fitr.——*Fitrat* (فطرت - fitrat, Ar.). Sagacity. Part of lacab, as Fitrat ally, sagacity of ally; Fitrat jung, sagacious in war [ism].

FLAME TREE (अग्निशिखा - agnishikhá, *San.*). Title from flower. Same as Wild bachnaug and Bastard saffron. Compare flame of the woods [jungle geranium], flame plant [saffron], and fire plant [godaury].

FLORICAN (तनमोर - tanamóra, *Mahr.*; هوبره - hubarah, *Ar.* and *Pers.*; چرز - charaz, *Hind.* and *Dec.*; ಕನ್ನೌಲು - kannaulu, *Can.*; నేలనెమలి - nélanemali, *Tel.*; வரகுக்கோழி - varagukkózhi, *Tam.*). Title from dutch. Mahr. from (tana, mahr. grass + móra, mahr. peacock). Ar. from (hubara, ar. ash-colored). Can. from (kari, can. black + naulu, can. peacock). Tel. from (néla, tel. ground + nemali, tel. peacock). Tam. from (varagu, tam. indian millet, panicum miliaceum, linn. + kózhi, tam. fowl). Hind. also (likh); (ghâskámurghí), meaning grass fowl; (khartítar), meaning grass partridge. Tel. also (chénukódi), meaning field + fowl. Title otherwise Floyerken, Lesser florican, Likh. A small kind of bustard. Sypheotides auritus, otididæ, pressirostres, grallatores [pacshy, 35], of naturalists [jantoo]. Alias Otis fulva. Male, in full breeding plumage, with head, neck, ear-tufts, medial wing-coverts, and whole lower plumage deep black, chin alone being white; lower part of hind neck and large patch on wing white, rest of plumage fulvous, closely mottled with dark brown; first three primaries plain dusky brown, remainder both barred and mottled with brown. Down at base of all feathers beautiful pale dull rose-color, quills, when freshly moulted, have beautiful bloom, mingled pink and green, which soon fades. Ear-tufts about 4 inches long, usually three feathers on each side; with shaft bare, small oval web at the tip, curving upwards. Primaries much acuminated, sometimes ending in point almost as fine as needle. Bill dusky above, edges of upper, and all lower mandible yellowish; irides pale yellow, clouded with dusky; legs dirty whitish yellow. Length 18 to 19 inches. Female has prevalent tone of plumage pale fulvus yellow, feathers of head, back, wings and tail, clouded and barred with deep brown, those on head mostly brown; fore neck with two irregular interrupted streaks, increasing on lower neck and breast, lower plumage thence unspotted and albescent; hind neck finally speckled brown; chin and throat white; first three primaries, as in male, unspotted brown; wing coverts with only a few bars; axillaries brown. Bill, legs and irides as in male, but irides generally unclouded yellow. Chiefly found in cold weather; frequents long grass, but also to be met with in grain fields; feeds chiefly in morning, then easily raised; when moving raises its tail; when flushed suddenly utters sharp note of alarm; flesh most esteemed of all game birds; occasionally snared. No other common species here. The Bengal florican is Sypheotides bengalensis.

FLYING FOX (वातुलि - vátuli, *San.*; वडवागूळ - vadavágúla, *Mahr.*; خفاش - khaffásh, *Ar.*; روباهپر - rúbáhpar, *Pers.*; بادر - bádur, *Hind.*; گدل - gadal, *Dec.*; ತೊಗಲುಬಾವಲಿ - togalubávale, *Can.*; ಕೀಚಬಾವೊಲಿ - kíchabávoli, *Too.*; చీకురాయి - chíkuráyi, *Tel.*; ଚିମ୍ମୁନିଆ - chimmunia, *Oor.*; ആവൽ - ával, *Mal.*; වවුලා - vavulá, *Singh.*; பழந்தின்வவ்வால் - pazhandinvavvál, *Tam.*). Title from color of hair and length of snout. San. from (váta, san. wind). Mahr. from (vada, corruption of vana, san. forest + valgula, san. flying fox). Ar. from (khafisha, ar. small eye). Pers. from (rúbáh, pers. fox + par, pers. flying). Hind. from sanscrit. Can. from (togalu, can. skin + bávale, can. bat). Too. from (kícha, too. sound + báveli, too. bat). Tel. from (chíku, tel. blindness + váyi, tel. face); from small eyes. Tam. from (pazham, tam. fruit + tin, tam. to eat + vavvál, tam. bat). San. also (valgula), meaning handsome. Mahr. also (vágala), from sanscrit. Hind. also (barbagal). Tel. also (sikatyelli), meaning darkness + rat; (rishipakshi), meaning sage + bird. Singh. also (lokuvavula), meaning large + bat. Title otherwise Large fox bat, Russet fox. Pteropus edwardsi, pteropodidæ, cheiroptera, mammalia [sastanam, 3], of naturalists [jantoo]. Alias assamenis, edulis, medius. Head and nape rufous black; neck and shoulders golden yellow; back, dark brown; chin, dark; rest of body beneath, fulvous or rusty brown; interfemoral membrane, brownish black. These are frugivorons bats [vavvaul] of large size, differing so much in their dentition from the insectivorous species that they seem to lead through the flying lemurs [devaunga] directly to the Quadrumana. The dentition is adapted to their diet. They measure sometimes as much as four feet and a half from tip to tip of wing. They have no tail. They are distinguished from the rest of the bats by a claw on the first or index finger, which is short. The tongue is remarkable, being covered with large papillæ, pointing backwards, and each one terminating in a brush or collection of bristly points. It is supposed that they drink toddy [q.v.] from the earthen pots [chatty] on the cocoanut [q.v.] trees. The wild almond [catapang] is their favorite fruit. During the day they roost on trees hanging with their heads down. When disturbed during the day, they fly slowly round and round, with a low screaming noise and soon settle again; hovering for a moment over a bough, they catch suddenly with the claw at the angle of the wing, and, allowing the body to drop, they swing with a single hold. Towards sunset they move about along the branches, and by ones and twos fly off. If water is at hand, they fly down and touch the water. It is not known whether this is for drinking or for bathing a part of their bodies. It is not for fishing, as by some supposed. About the early dawn they return when a scene of great confusion ensues. Friar Jordanus, the Quilon bishop of the fourteenth century, has the following:—
"There be also bats really and truly as big as kites [chillam].
"These birds fly nowhither by day, but only when the sun sets.
"Wonderful! By day they hang themselves upon trees by the
"feet, with their bodies downwards, and in the daytime they
"look just like big fruit on the tree." Marco Polo describes

them thus:—"Bald owls [ooloocam] which fly in the night; they "have neither wings nor feathers and are large as an eagle "[cooralam]." The female brings forth only one young one, which adheres firmly to the breast, retaining its position whether the mother be flying or at rest. Many classes eat the flesh. Akin to this is the Fulvous fox bat or Pteropus leschenaultii. Alias seminudus; Xantharpyia seminuda. Fur, of a fulvous ashy, or dull light ashy brown color, paler beneath, the hairs whitish at the base; membranes, dark brown; fur, short and downy. Found at Madras, Pondicherry, Trichinopoly, &c. Again there is the Small fox bat, or Cynopterus marginatus. General color fulvous olivaceous, pale beneath and with an ashy tinge; ears, with a narrow margin of white. It roosts during the day in clusters on the folded leaves of the plantain [q.v.], palmyra [q.v.] palm, and other trees. It is exclusively frugivorous.

FOOZALAH (فضلا - fuzalá, *Ar.*). Plural of (fázil, ar. accomplished). Forms part of lacab; as Malik ool foozalah, king of the accomplished.

FORBIDDEN FRUIT (ثمر ناجائز - samarinájáiz, *Hind.*). Same as Eve's apple and Pummelow.

FOREIGN (ولايتي - viláiti, *Hind.*). Very common term for plants introduced to India [europe, faranghee, firangy, seema, vilauyaty]. Cf.:—Acacia ferruginea, foreign velvail; Althæa officinalis, foreign tootty; Carum carui, foreign anise; Cassia alata, foreign agatty; Malva sylvestris, var. mauritiana, foreign marsh mallow. See gloss. paragraphs.

FORT (قلعه - kilah, *Hind.*). Prefix.——*Fort st. david* (قلعه سنت ڈیود - kilahisentdevid, Hind.; தேவனாம்பட்டணம் - tévanámbattanam, Tam.). From (tévanáyakkan, tam. proper name + pattana, san. city). Sanscrit name (dévípattana), meaning parvaty + town. Otherwise Tegnapatam by corruption. Town; South arcot dist., Cuddalore tal.; acres 534; lat. 11° 44′; long. 79° 49′; from Cuddalore N.N.E. 2 miles. On left bank of mouth of the Guddilam. Purchased by Company from Rama rajah, a son of Shivajee, for 120,000 chuckrams [q.v.], in 1690. On capture of Madras by French in 1746, Company's agent at this station assumed the control of all the Company's possessions in Southern india and successfully resisted an attack made by Dupleix on the settlement. In 1756 Clive was appointed Governor. In 1758 it was invested by sea and land by the French, and after a short siege, surrendered on June 2, when the fortifications were demolished and were never rebuilt. It was afterwards included in Cuddalore and its dependencies. Ruined houses are still to be seen on the ramparts, and some parts of the fort are in good preservation. Subterranean passages appear to have run completely round under the glacis; while, at short intervals, other galleries striking off at right angles, and terminating in powder chambers, served as mines. At the south-east corner the gallery ran down to the edge of the sea, while on the other three sides the fort was protected by the Ponniaur [q.v.] and two canals. The ruins form a recognised landmark for mariners.——*Fort st. george* (قلعه سينت جارج - kilahisentjárj, Hind.). For a History of fort see vol. II, 279. See also Madras.

FOWJ (فوج - fauj, *Hind.*). From arabic. Army [dandam, pataulam].——*Fowjdar* (فوجدار - faujdár, Hind.). From (above + dár, pers. keeper). Under the Mahomedan governments the chief magistrate of a province.——*Fowjdarry* (فوجداري - faujdárí, Hind.). Criminal, as opposed to diwanny [q.v.] or civil [adawlut].

FOWT (فوت - fáut, *Hind.*). From (fáta, ar. to pass away). Dead. Fowty is one deceased, or legally defunct. Fowtynauma is a list of deaths. Fowty faraury means dead or absconded.

FRANKINCENSE (فرنگي عود - farangíúd, *Hind.*). From (farangí, hind. european + úd, hind. incense). Same as Olibanum.——*Male frankincense* (لوبان - lubán, Dec.). Same as True olibanum.——*White frankincense* (வெள்ளைக்குங்கிலியம் - vellaikkungiliyam, Tam.). Same as White dammer.

FRASERPETT (ಫ್ರೇಜರ್ಪೇಟೆ - p'hréjarpéte, *Can.*; fraserpet, *Coorg gov.*). Can. also (kushálanagara), meaning happy + town; named, after birth of tippoo, by hyder. Principal town in Nunjaraputna talook of Coorg. In north lat. 12° 27′; east long. 76° 2′; on the left bank of the Cauvery, on the main road from Seringapatam to Mercara, 20 miles east of the latter. From Mangalore S.E. 81 miles, Bangalore S.W. 117 miles, Madras W. 290 miles. 2,720 feet above sea-level. Population 1,310. Named after General Fraser, first Commissioner in 1834. It is situated close to the ruins of Jafferabad, a fort built by Tippoo. Fort stormed and demolished in 1789 by the Coorgs under Dodda veerarájendra. The ruins supplied materials for the construction of the bridge over the Cauvery finished in 1848. The climate is milder and the rains less severe than at Mercara. The place is the monsoon [q.v.] residence of the Commissioner of Coorg.

FRAUNSEES (فرانسيس - faránsís, *Hind.*). The French.

FRENCH ROCKS (ಹಿರೋಡೆ - hiróde, *Can.*). Hills so called at Hirode, Mysore district. Highest point 2,882 feet [hirode].

FRESH WATER SHARK (ميٹھے پانی کی هورا - míthepánikíshorá, *Hind.*). Term common to many siluridæ [kizhautty].

FROG FISH (مينڈك مچھی - mendakmacchí, *Hind.*; కప్పచేప - kappachépa, *Tel.*; കടത്തവാള - katattavala, *Mal.*). Title from appearance of head and mouth. Tel. means frog fish. Mal. means sea frog. Title otherwise Frog doke, Globe fish, Puff fish. The genus Tetrodon, gymnodontidæ, plectognathi, teleostei, pisces [matsyam, 45], of naturalists [jantoo]. Some are poisonous. The species best known to the natives are lunaris and reticularis. Cf. Plautchy.

FULLAK (فلك - falak, *Hind.*). From (falaka, ar. to become round). The firmament. The bastinado wherein the soles of the feet are turned to the sky [asmaun].

FULWA BUTTER (پهلوا - phalwá, *Hind.*). Product of bassia butyracea [butter mohwah].

FURRAUSH (فراش - farrásh, *Hind.*). From (farsh, pers. floor cloth). A man to spread carpets, &c., a sweeper.

FURRUCKABAD (فرخ آباد - farrukhábád, *Hind.*). From (farrukh, pers. prosperous + ábád, pers. city). Mal. name (paramukk), corruption from hindostany. Title otherwise Ferok. Village, Railway station; Malabar dist., Yernaud tal.; lat. 11° 11′; long. 75° 52′; from Calicut S.E. 6½ miles; from Munjery W.N.W. 20 miles; from the sea E. 2½ miles. The place which Tippoo sahib in 1789 designed to be the capital of Malabar, and whither in that year he removed the inhabitants of Calicut. In the following year fort was captured by British. It still exists in ruin on a hill crowned by a bungalow [q.v.] now used as a dynamite magazine. Railway here crosses Beypore river. Puttimars [q.v.] can come up to it.

FUSL (فصل - fasl, *Hind.*). From (fasala, ar. to divide) [feisal]. A section, season, thence harvest.——*Fusl cummy* (فصل كمي - faslkamí, Hind.). From (above + kamí, pers. deficiency). Remission granted on two-crop land cultivated with only one crop for want of water [teervay cummy]. See vol. I, 134.——*Fusl jausty* (فصل زيادتي - faslziyádatí, Hind.). From (above + ziyádati, hind. addition). A charge for a second crop raised by Government water on land registered as single crop [teervay jausty]. See vol. I, 134.——*Fusl khareef* (فصل خريف - faslikharíf, Hind.). From (above + kharíf, ar. falling of leaves). Autumn season.——*Fusl rabee* (فصل ربيع - faslirabí, Hind.). From (above + rabí, ar. spring). Spring season.——*Fusly* (فصلي - faslí, Hind.). Harvest year. Also called Hindoo year. Instituted by Acbar. In Bengal it begins in September, with the full moon preceding the autumnal equinox [toolauyanam]; its date also varying three years from the Madras fusly; to find this, subtract 593 from the Christian year. Here from 1st July to the 30th June, and it formerly counted from the 12th July. Here 590 years less than the A.D. year. See vol. I, 612; II, 247.

FUTTEH (فتح - fath, *Hind.*). From (fataha, ar. to open) [fautiha]. Victory. Prefixed to an alam forms a lacab; as Futteh ally, ally's victory [ism]. There is a Hindostany proverb:—گانڈ لنگوٹی نام فتح خان—"He has only a strip of rag "between his legs, but his name is Futteh khan, Lord of victory."

FUTWAH (فتوى - fatwá, *Hind.*). From (fatá, ar. decree) [fatauwah]. An exposition of the Mahomedan law pronounced by a Moofty [q.v.].

G (ग - ga, *San.*; گ - gáf, *Hind.*). San. indicates Ganesh [q.v.] or Vigneshwaran [q.v.]. Hind. numerically 20.

GA (गा - gá, *San.*). To sing.——*Gandharvacottah* (கந்தருவக்கோட்டை - kandaruvakkóttai, Tam. gandharvakóta *). From (gandharva, san. celestial chorister + kóttai, tam. fort).—"*a*" Zemindarry; Tanjore dist., Tanjore tal.; pop. 1,882; lat. 10° 29′ to 10° 41′; long. 78° 59′ to 79° 17′. The late zemindar [q.v.] was transported for life. Peshcush Rs. 6,577.—"*b*" Village, Head-quarters of zemindar; Tanjore dist., Tanjore tal.; pop. 374; lat. 10° 34′; long. 79° 03′; from Tanjore S.S.W. 17¼ miles. Fairs every Tuesday.——*Gandharvan* (गन्धर्व - gandharva, San.). From (gána, san. song). Celestial chorister. Southey changed this to Glendoveer. The most celebrated Gandharvans are Toombooroo and Nauradan [q.v.]. Also ancient form of marriage depending only on the mutual consent of the parties. Also in modern times an inferior marriage which gives the wife less than full rights. Sometimes applied to a marriage between persons of full age. See vol. I (62), (78) [matam]. Cf. Rauc-shasam.——*Gaundharva vedam* (गान्धर्ववेद - gándharvavéda, San.). From (gandharva, san. celestial chorister + véda, san. knowledge). Science [shastram] of music [sangeetam].——*Gayatry* (गायत्री - gáyatrí, San.). From (gai, san. to sing). A kind of metre [chandas]. So a particular and specially holy verse of the Veda [q.v.] written therein. The affinity between god [deva] and light [jyoty] is its burden. Bramins [q.v.] repeat it, with certain finger-signs or anganyausam [q.v.], every morning at sunrise; standing in, or near water, which is sipped, and then poured from the hands during the suppressed repetition of the

prayer [muntram]. After the trisyllabic om [q.v.], follows an invocation to heaven, earth, and sky, and then a salutation to the sun [sooryan]; probably as a visible representation of deity. Extraordinary powers are attributed to the whole formula; and, like the principal deities, it has its thousand and eight names or epithets, called sahasranaumam [q.v.]. Cf. Chowraushy. The gayatry is also personified as the wife of Bramha [q.v.]. This verse occurs in the tenth hymn of the third Ashtacam, of the Samhitay [q.v.] of the Rig vedam [q.v.]. The following is the original in its common form:—ओँभूर्भुवस्सुवः तत्सवितुर्वरेण्यं भर्गो देवस्यधीमहि धियोयोनःप्रचोदयात्—"Om! earth! air! heaven! We "meditate on that excellent light of the divine sun; may it "illuminate our minds." It admits of two interpretations, one referring to Bramha, and the other to the natural sun. The Vedantists [q.v.] incline to the former, though the latter appears to be more natural. See vol. II, 235 [matam].——*Geeta govindam* (गीतगोविन्द - gítagóvinda, San.). From (gíta, san. song + góvinda, san. vishnu, the cow-protector). By Jayadevan. Erotic poem about twelfth century. To celebrate loves of Krishnan [q.v.] and Raudhay [q.v.]; but is given also a mystical interpretation. See vol. I 74).——*Geetay* (गीता - gítá, San.). From (gá, san. to sing). Short for Bhagavat geeta [q.v.].

GADA (گڑھ - garh, *Hind.*; ଗଡ଼ - gada, *Oor.*). Fort. Suffix in place names, especially in Ganjam and Vizagapatam [ghur, godo, gooda].

GADABAH (గదబ - gadaba, *Tel.*). A tribe in the Northern circars [q.v.]. Some 30,000. The language is Kolarian [bhaushay, jauty, kole]. See vol. I (38).

GADDA (గడ్డ - gadda, *Tel.*). Clod. Mound [goodda, mett, metta, mittah]. Suffix in place names; as Avanigadda, meaning earth + mound. Also lands on high level, bearing favorable assessment [gaddateerwa, inam]. Also means esculent roots [doompa].——*Gaddapaur* (గడ్డపార - gaddapára, Tel.; കടപ്പാര - katappára, Mal.; கடப்பாரை - kadappárai, Tam.). From (gadda, tel. clod + pára, tel. a hoe). Tam. also (párai); also (páraikkól), meaning crowbar + stick. Crowbar.——*Gaddavary* (గడ్డవరి - gaddavari, Tel.). From (gadda, tel. clod + vari, tel. paddy). Sowing paddy [q.v.] without previously flooding the ground; otherwise dry ploughing. Opposite of Coodapa [q.v.]. Same as Veligada [pooldycaul, vellaumay].——*Gaddy* (గడ్డి - gaddi, Tel.). Grass.

GADHAH (गर्दभ - gardabha, *San.* and *Mahr.*; حمار - himár, *Ar.*; خر - khar, *Pers.*; گدھا - gadhá, *Hind.*; كالدى - káldi, *Malay*; ಕತ್ತೆ - katte, *Can.* and *Too.*; గాడిదె - gádide, *Tel.*; ଗଧ - gadha, *Oor.*; കഴുത - kazhuta, *Mal.*; කලුදාව - kaludává, *Singh.*; கழுதை - kazhuthai, *Tam.*). Title from hindostany. San. from (gard, san. to bray). Hind. from sanscrit. Can. from (kattu, can. to bray). Tel. from sanscrit. Singh. from (kalu, singh. black + dává, singh. burnt); from color. Ar. also (himáriahlí), meaning domestic ass, as opposed to (himárivahshí) or wild ass. Pers. also (ilá). Title otherwise Ass. Domesticated animal. Equus [ashwam] asinus, equidæ, perissodactyla, ungulata, mammalia [sastanam, 21], of naturalists [jantoo]. Asses are distinguished from horses by their longer head and ears, by the tail being covered with short hairs at the base and furnished with a tuft of long hairs towards the tip and on the sides only, not throughout as in horses. They also want the peculiar hard horny excrescences found on the legs of horses, and have almost invariably a dark longitudinal dorsal stripe. Several species of wild ass are now known to exist, one of which is a native of the western parts of India, Equus onager, but not of this presidency. The domestic ass is small, used only by washermen [dhoby], vagrant Yerkalas [q.v.], and some other wandering tribes. It is unfit for the saddle. The hollow of the ass's foot adapts it for travelling on slippery ground, and its constitution enables it to bear great fatigue in this climate. Pliny describes it as 'animal frigoris maxime impatiens.' Mules are extensively used in this country. There is a Tamul proverb:—என்னைப்போலக் குரலும் என் அக்காளைப்போல ஒயிலும் இல்லை என்கிறதாம் கழுதை—"The ass boasted that there was no voice equal to "his, and no gait equal to that of his elder sister." Generally however the ass is not an object of ridicule. For horse see Ghorah, for mule see Katcher. Indian species not here found are:—Hemionus or kiang or wild ass of Thibet, Onager or wild ass of Cutch.

GAGGARY (گھگری - ghagrí, *Hind.*). From (gharghara, san. the sound). Loose iron fastened to a stick to frighten animals and reptiles [poochy], commonly carried by post-runners.

GAH (گاہ - gáh, *Pers.*). Suffix denoting place; as Durgah, meaning threshold + place, any sacred precinct [eedgah].

GAJAM (गज - gaja, *San.*). From (gaj, san. to roar). Elephant [q.v.].——*Gaja mookhan* (गजमुख - gajamukha, San.). From (above + mukha, san. face). Vigneshwaran [q.v.].——*Gajapatinugger* (గజపతినగరము - gajapatinagaramu, Tel.). See sep. title.——*Gajapaty* (گجپتی - gajapati, Hind.; గజపతి - gajapati, Tel.). From (above + pati, san. master). The lord of the elephants. Proper name [peyar]. A title of the Gungavamsham [q.v.] dynasty [raj] of Orissa [q.v.], 1132—1560, founded by Chorgunga. See vol I (151); II, 77 [charitram]. The name is now held as a title by a family in N. circars [q.v.].——*Gajendran* (గజేంద్రుడు - gajéndrudu, Tel.). From (above + indra, san. best). Lordly elephant. Indran's elephant. Hindoo 2nd or pers. name [peyar].——*Gajpal* (گج پہل - gajphal, Hind.). From (above + p'hala, san. fruit). Same as Chaab pepper.

GAJAPATINUGGER (గజపతినగరము - gajapatinagaramu, *Tel.* gajapatinagar *). From (gajapati, san. lord of elephants, title of vizianagram dynasty + nagara, san. city) [gajam].——**(1)** Division; Vizagapatam district; area 348 square miles; population 123,796; language Teloogoo. Boundaries:—north, Bobbily talook; east, Cheepoorpully talook; south, Vizianagram talook; west, Saulore talook. Very irregular in shape; the northern and southern lines of boundaries being respectively 14 and 5 miles, and the eastern and western boundaries being 6 and 14 miles in length. Interspersed with hills of various dimensions and heights. Soil is generally poor; mostly gravelly and sandy. The principal industries are weaving [nesavoo], jewelry and carpentry. The chief exports are gingelly [q.v.], tobacco [pogauk] and jaggery [q.v.]. The Gajapaty nuddy and its tributary Lingaulavalsa gedda are chief sources of irrigation. The rest are shallow rain-fed tanks [q.v.]. Places of archæological interest:—Daivpully, Garbham, Gobaum, Jayanty agrahauram, Regoolavalsa [shikargunj], Vedoollavalsa. Principal Trig. station, Maroopully. The leading places, &c., in the division are the following.——*Andra* (ఆంధ్ర - ándra, Tel.). See sep. title.——*Bheemavaram* (భీమవరము - bhímavaramu, Tel.). From (bhíma, san. the hero + pura, san. town). Zemindarry, Village; pop. 264; from Gajapatinugger E. 21 miles; from Vizagapatam N. 49 miles. The name of the Zemindarry [q.v.] is Saripully bheemavaram.——*Daivpully* (దేవుపల్లె - dévupalle, Tel.). From (dévu, tel. a chief + palle, tel. village). Village; pop. 3,388; lat. 18° 15′; long. 83° 20′; from Gajapatinugger W.S.W. 4 miles; from Vizagapatam N. 37 miles. Former residence of a chief; ruined fort.——*Gajapatinugger* (గజపతినగరము - gajapatinagaramu, Tel.). See below.——*Goommacote* (గుమ్మకోట - gummakóta, Tel.). From (gumma, tel. grain receptacle + kóta, san. fort). Village, Hill; pop. 305. Shiva temple of Mullicarjoona sawmy, resorted to on Shivarautry [pundigay, 6a].——*Gostany* (గోస్తని - góstani, Tel.). See sep. title.——*Jayity* (జయితి - jayiti, Tel.). Named after the Jeinas who once lived there. Village; pop. 1,576; lat. 18° 21′; long. 83° 18′; from Gajapatinugger N.W. 7¾ miles; from Vizagapatam N. 44 miles. Half a mile west are Jeina temples, and near them a Sheiva temple.——*Maradaum* (మరదాం - maradám, Tel.). Village; pop. 1,302; lat. 18° 09′; long. 83° 16′; from Gajapatinugger S.W. 12 miles; from Vizagapatam N. 32 miles. Fine mango [q.v.] tope [q.v.]. Belongs to Saulore zemindar [q.v.]. Substantial choultry [q.v.].——*Maroopully* (మరుపల్లె - marupalle, Tel.). From (maru, tel. barren + palle, tel. village). Village; pop. 1,475; lat. 18° 19′; long. 83° 23′; from Gajapatinugger N. 2½ miles; from Vizagapatam N. 42 miles. Trig. station in lat. 18° 19′ 53·99″; long. 83° 25′ 27·37″; height 1,611 feet; from Gajapatinugger N. 3 miles.——*Sautaumvalsa* (సాతాంవలస - sátámvalasa, Tel.). From (sátu, tel. sack-cloth weaver + valasa, tel. colony). Village, Place of pilgrimage; pop. 1,201; lat. 18° 25′; long. 83° 35′; from Gajapatinugger N.E. 15¾ miles; from Vizagapatam N.N.E. 51 miles. Large cave on the adjoining hill resorted to on feast days. Contains many lingams [q.v.].——*Shikargunj* (شکار گنج - shikárganj, Hind.; శికార్గంజ్ - shikárganj, Tel.). From (shikár, hind. sport + ganj, pers. a granary). Ancient name (régulavalasa), meaning jujube tree, zizyphus jujuba, lam. + village. Village; pop. 1,339; lat. 18° 26′; long. 83° 26′; from Gajapatinugger N.N.E. 11¼ miles; from Vizagapatam N. 50 miles. This is a more recent name given by the late Maharajah of Vizianagram who reserved adjoining jungle for purposes of sport. Old fort.——*Toommicapulley* (తుమ్మికాపల్లె - tummikápalle, Tel.). From (tummika, tel. the tree, diospyros melanoxylon, roxb. + palle, tel. village). Village, Place of pilgrimage; pop. 515; lat. 17° 54′; long. 83° 13′; from Gajapatinugger S.S.W. 27 miles; from Vizagapatam N.N.W. 16 miles. Shiva temple resorted to on Shivarautry [pundigay, 6a] every year. Supposed to have been founded by Balaraman [q.v.], Krishnan's [q.v.] brother. At the junction of two streams.——**(2)** Deputy tahsildarry; Vizagapatam district. Pay Rs. 70.——**(3)** Town, Head-quarters of Talook and Deputy tahsildar; Vizagapatam dist., Gajapatinugger division; pop. 2,246; lat. 18° 17′; long. 83° 23′; from Coraputt S.E. 52 miles; from Madras N. 405 miles; from Narsapatam N.E. 63 miles; from Parvatipore S. 34 miles; from Vizagapatam N. 40 miles; from Vizianagram N. 13 miles. Once an important mart for hill produce. Trade declining. On the Champauvaty river, otherwise called the Gajapatinugger river.

GALAM (گلم کا تیل - galamkátel, *Hind.*). The reddish white solid oil [yennay] from Bassia butyracea [butter mohwah].

GALANGAL (राम्ना - rásna, *San.*; कोळंजन - kólanjana, *Mahr.*; خولنجان - khulanján, *Ar.*, *Pers.*, *Hind.* and *Dec.*; لنكلوس - langkvas, *Malay*; ದುಂಪರಾಸ್ಮಿ - dumparásmi, *Can.*; దుంపరాష్ట్రము - dumparáshtamu, *Tel.*; അരത്ത - aratta, *Mal.*; කළුවා - kaluvá, *Singh.*; அரத்தை - arattai, *Tam.*). Title from arabic. San. from (ras, san. to taste). Ar. from chinese meaning wild ginger. Tel. from (dumpa, tel. root + ráshtamu, tel. galangal). Mal. from tamul. Tam. from (rakta, san. red). San. also (kulanjana), from arabic; (sugandhavachá), meaning fragrant acorus calamus, linn.; (dhúmala), meaning smoke-colored; (kapidruma), meaning monkey tree; (gandhavárunı́), meaning having fragrant juice; (sugandhayóga), meaning sweet smell + union; (nákuli), meaning relating to mongoose, cf. rasnah; (tíkshnamúla), meaning pungent root; (sugandhá), meaning fragrant, cf. marootham; (kórajá); (pátalá), meaning red [pauthiry]; (raktapushpa), meaning red + flower [red-cotton tree]; (aruná), meaning red [munjeet, turbith]; (raktarénu), meaning red powder; (purusha), meaning fragrance; (éláparní), meaning cardamom leaved. Ar. also (khulanjánikasabí), meaning reed galangal. Hind. also (kalíjan); (pánkijar), meaning piper betel, linn. + root. Can. also (rásmini); (dumrashta); (sugandhaváchigida), meaning fragrant plant. Tel. also (dumparáshtrakamu), meaning root + galangal. Singh. also (kaluvála). Botanically the Alpinia genus, zingiberaceæ [vricsham, 144]. Plants known by thick, tuber-like, aromatic rhizomes, and by flowers arranged in terminal spikes; fruit is a somewhat fleshy capsule of three many-seeded cells. The species best known to the natives are shown below. Others are:—allughas, khulinjan, rheedii.—"*a*" Greater galangal. Cyperus babylonicus of Pliny. Title otherwise Galangal cardamom, Java galangal, King's drug, Large-flowered alpinia, Loose-flowered alpinia, Mongoose plant, Monkey plant, Tree galangal. Botanically Alpinia [galangal] galanga, willd., zingiberaceæ [vricsham, 144]. Alias Amomum galanga, zedoaria; Galanga major, officinalis; Maranta galanga. Galanga from arabic. Perennial; stem 6–7 feet when in flower, with leafless sheath up to the middle; leaves short-stalked, lanceolate, white, and somewhat callous on the margin, smooth; panicles terminal, spreading, dichotomous, each division with from two to six pale-greenish, fragrant flowers; calyx smooth, white, one-toothed; exterior limb of corolla of three nearly equal recurved divisions; interior one unguiculate, oval, deeply two-lobed, white with reddish specks; capsule size of a small cherry [q.v.], obovate, smooth, deep orange-red, three-celled; seed one, much compressed, deep chestnut color, a little wrinkled, arillate, except at the apex; javanese plant; imported. Brown tuberose root, with a faint aromatic smell and pungent taste, like a mixture of pepper [q.v.] and ginger [q.v.]; radix galangæ majoris of chemists. Root given in infusion in fevers, rheumatism, and catarrhal affections; like ginger; seeds possess similar medicinal properties; substituted for british peppermint [poodeenah]; quoted in pharm. non-officinal. Root used in calico-printing with myrobalans [q.v.].—"*b*" Lesser galangal. Title otherwise Chinese galangal, Root stock galangal. Botanically Alpinia [galangal] officinarum, hance, zingiberaceæ [vricsham, 144]. Alias Alpinia chinensis. Imported from China. Root may be distinguished from greater galangal by its color; on the outside being browner and in the inside reddish, whilst the greater root is brownish on the outside, of a dirty white within, and covered with rings about one-fourth of an inch distant from each other; more warm and fragrant than greater; more highly prized as stimulant and stomachic. Substituted for british peppermint; quoted in pharm. non-officinal; radix galangæ minoris of chemists. There is a smaller variety with still quicker qualities. This article often confounded with the root of the betel-leaf plant, piper betel, linn. [betel pepper], which however is not a tuber; the root of hedychium spicatum, ham. [europe zedoary], also resembles this.—"*c*" Nodding galangal. Title otherwise Drooping galangal, Indian shell-flower, Light galangal. Botanically Alpinia [galangal] nutans, roscoe, zingiberaceæ [vricsham, 144]. Alias Alpinia auriculata; Costus zerumbet; Renealmia nutans; Zerumbet speciosa. Leaves lanceolar, short-petioled, smooth; racemes compound by the lower pedicels being two or three-flowered, drooping; lip large, ovate, cordate, obscurely three-lobed at the base; middle lobe curled on the margin; ovary hairy, oval, three-celled; capsule slightly hairy; flowering in april and may. Drooping compound racemes, about a foot long, of flowers, size and form of fox glove, with bracts and calyces of a pure pearly white, the edges of the flower tinged with pink, and the interior orange; thrives in swampy ground. Rhizome much the same as alpinia galanga, willd.; quoted in pharm. non-officinal.——*Indian galangal* (सुगन्धवचा - sugandhavachá, San.; कचोला - kachólá, Mahr.; कचूरु - kaççúru, Conc.; چندر مول - chandarmula, Hind.; ಕಚ್ಚೂರ - kaççúra, Can.; కచోరము - kachóramu, Tel.; കച്ചൂരം - kaççúram, Mal.; கச்சோலம் - kaççólam, Tam). Title from resemblance. San. from (sugandha, san. fragrant + vachá, san. sweet flag, acorus calamus, linn.). Mahr., &c., from (karchúra, san. the plant). Hind. means moon or camphor root. San. also (chandramúlika), meaning camphor + root; (karchúra); (kachhóra), meaning itch-burning. Tam. also (kiççilikkizhangu), meaning citrus aurantium, linn. + root; from aromatic root. Title otherwise Camphor-root plant, Kœmpferian galangal. Botanically Kœmpferia [bhoochampak] galanga, linn., zingiberaceæ [vricsham, 144]. Alias Alpinia sessilis; Kœmpferia plantaginea. Rhizome biennial, tuberous; stem none; leaves stalked, spreading flat on the surface of the earth, round, ovate-cordate, margins membranaceous and waved, upper surface smooth, somewhat woolly towards the base; flowers fascicled, six to twelve within the sheath of the leaves, expanding in succession, pure white with a purple spot on the centre of each of the divisions of the inner series; bracts three to each flower, linear, acute, half the length of the tube of the corolla; calyx the length of the bracts; tube of corolla long, filiform, limbs double, both series three-parted; flowering in rains; cultivated in gardens. The round leaves overlap each other, and flowers seem to rest upon them; flowers are scentless; root and leaves when bruised have a fine fragrance; rhizome fleshy, with fleshy fibres. The rhizome reduced to powder and mixed with honey [shahad] is given in coughs and pectoral affections; boiled in oil externally applied in stoppages of the nasal organs; in pharm. non-officinal.

GALBANUM (قنه - kinnah, *Ar.*; بارزد - bárzad, *Pers.*; بريجا - baríjá, *Hind.*; بريجا گوند - baríjágond, *Dec.*). Title from hebrew, meaning milk, through latin. Greek χαλβάνη. Hebrew khebbenah. Title otherwise Gum galbanum. Gummi-resina galbanum of chemists. Yellowish brown fetid gum-resin [googal, gond] yielded by two plants; Ferula galbaniflua, boiss. and Ferula rubricaulis, boiss., umbelliferæ [vricsham, 67]. Occurs in agglutinated plastic masses; hot, acrid and bitter; in properties resembles asafœtida [q.v.], but weaker. Is in pharm. as a stimulant, antispasmodic, and expectorant; officinal.

GALIYAH (گليا - galiyá, *Hind.*). From (galí, hind. street); i.e., midway. A bullock that lies down in the midst of his work.

GAMBIER (كمبر - gambir, *Malay*; అంకుడు - ankudu, *Tel.*; கத்தக்காம்புச்செடி - kattakkámbuççedi, *Tam.*). Tam. meaning catechu tree. Title otherwise Bastard cutch, Gambier cutch, Japan earth, Pale cutch, Terra japonica. Botanically Uncaria gambier, roxb., rubiaceæ [vricsham, 71]. Specific from malay. Alias Nauclea gambier. A stout climbing shrub, native of straits of malacca. Gambier is the extract by boiling leaves and young shoots; but little soluble in water; is lightish-brown, bitter and powerfully astringent gives a rose-colored precipitate with gelatine, and a deep permanent green with the salts of iron; in chemical composition and qualities strongly resembles cutch [q.v.], and the names catechu and terra japonica are applied to both; this substance is sometimes brought from malay countries to coromandel coast [q.v.]; introduced into european commerce during last century. Used medicinally as astringent; gives to pharm. catechu pallidum, properties similar to catechu nigrum; officinal; properties and uses same as acacia catechu, willd. [catechu]; substituted for british kino [q.v.], oak-galls [mauchicoy] and logwood. The malays chew it with betel [q.v.] leaf, as tamulians chew areca [q.v.] nut. It is employed for tanning and dyeing [shauyam]; gives a soft leather [chamrah].

GAMBOGE (रेवाचिन्निसीरा - réváchinnisírá, *Mahr.*; عصارۀ ريوند - usárahirewand, *Pers.* and *Hind.*; رونگ - rong, *Malay*; రేవల్చిన్నిపాలు - révalchinnipálu, *Tel.*; ගොකටුමෙලියම - gokatumeliyam, *Singh.*; மக்கி - makki, *Tam.*). Title from cambodia [q.v.], the province of that name where produced. Mahr. from (réváchinni, mahr. rhubarb plant + sírá, mahr. vegetable extract). Pers. from (usárah, ar. concrete extract + rewand, ar. rhubarb). Tel. from (revandchíní, hind. rhubarb + pálu, tel. juice). Singh. from (gokatu, singh. gamboge tree + meliyam, singh. gum). Tam. means whitish clay. Tel. also (pasupuvanne), meaning yellow + color. Tam. also (irévalsinippál), meaning rhubarb milk. Product of Garcinia morella, desr. [ceylon gamboge], Garcinia xanthochymus, hk. & f. [yellow mangosteen], Gardenia lucida, roxb. [decamallee]. Yellow resin [raul] imported from Siam, China, or from Ceylon. Occurs in three forms, in rolls or solid cylinders; in pipes or hollow cylinders and in cakes or in masses; inodorous and nearly insipid to taste. One of the most drastic medicinal cathartics. Used as a pigment in miniature painting, and in coloring varnishes [rangh] and lacquers [q.v.]. Argemone mexicana [bramhadand] is gamboge thistle.—*Ceylon gamboge* (तमाल - tamála, San. and Mahr.; वटांब - vatámba, Conc.; ريباس - ríbás, Ar. and Pers.; تمال - tamál, Hind.; دراسبا - darámbá, عصارۀ ريون كا جهار - usárahirevankájhár, Dec.; ... - révalchinni, Malay; ಜಾರಿಗೆ - járige, Can. and Too.; రేవల్చిన్ని - révalchinni, Tel.; കരുക്കമ്പുളി - karukkampuli, Mal.; ගොකටු - gokatu, Singh.; மக்கிமரம் - makkimaram, Tam.). San. from (tamas, san. dark); from color of bark [cassia cinnamon, karanj, yellow mangosteen]. Dec. from (usárah, ar. extract + revand, pers. rhubarb, rheum + jhár, hind. tree). Tel. from hindostany. Mal. from (karukka, mal. to grow black + puli, mal. tamarind, tamarindus indica, linn.); grows black on drying. Singh. from (go, san. cow + katu, singh. thorn); cattle thorn. Tam. from (makki, tam. whitish clay + maram, tam. tree); from soil where it grows. San. also (tápiñchha), meaning sheltering one oppressed by heat [ceylon cinnamon]. Mahr. also (révalchinní). Ar. also (rubbirevand), meaning rhubarb juice, from its similarity in properties and color; (farfíran). Pers. also (shírirevand), meaning rhubarb juice; (usárahírevand), meaning rhubarb extract. Hind. also

(ghotághambá), corruption of gummi guttæ. Tel. also (pasupuvannechettu), meaning yellow + color + tree. Mal. also (puliñchakka), meaning sour + jack, artocarpus integrifolia, willd.; cf. country cinnamon and prickly anona; (pinarppuli), meaning stiff tamarind. Singh. also (kanagoraka), meaning eating garcinia cambogia, desr., from oil used as ghee by poor. Tam. also (irévalsinni), from hindostany [indian rhubarb]. Title otherwise Acid jack, Ghotagamba, Indian gamboge, Mysore gamboge, Rhubarb juice tree. Botanically Garcinia [ractaumram] morella, desrous, guttiferæ [vricsham, 22]. Alias Garcinia elliptica, gutta, pictoria; Hebradendron cambogioides, pictorium. Gutta, from (gátah, malay, gum). The principal Indian gamboge. Tree, 60 feet; much branched; bark thick, of deep rust color, with yellow species; leaves opposite, short-petioled, oblong-ventricose, slighty acute, entire, smooth on both sides; hermaphrodite flowers axillary, solitary, sessile; calyx segments obtuse, in two unequal pairs; petals four, oval; berry oval, size of a large cherry [q.v.], smooth, slightly marked with four lobes, and crowned with the sessile verrucose stigma; seeds four, oblong, reniform; calyx and coralla of male flowers as in the female; flowers yellow; flowers in february, and fruit ripens in may and june; native of s. india and ceylon. From tender twigs, and from fissures in the bark exudes a bright yellow juice, which concretes into a hard resinous substance, identical with the best gamboge of commerce; it quickly dries in the sun, is formed at once into rolls, and undergoes no other preparation; in taste it is inodorous, and nearly insipid. Gives to pharm. cambogia indica vel mysoriensis; cambogic acid principal activity; properties identical with siam gamboge; officinal. An oil is procurable in moderate quantities by pounding seeds in stone mortar and boiling mass until oil rises to the surface; chiefly used as a lamp oil [q.v.] by better classes and as a substitute for ghee [q.v.] by the poor; the gamboge is used for coloring [shauyam] cloth. Wood yellow, hard, mottled.——*Malabar gamboge* (रक्तस्राव - raktasráva, San.; ولايتى املى - viláitíamlí, Dec.; ಓಟೆಕಾಯಿಮರ - ótekáyimara, Can.; ಓಂಟೆಪುಳಿ - óntepuli, Too.; సీమచింత - símachinta, Tel.; കുറുക്കമ്പുളി - kurukkampuli, Mal.; ගොරක - goraka, Singh.; கொறுக்காய் - korukkáy, Tam.). San. from (rakta, san. blood + sru, san. to pour); as yielding red resin. Dec. from (viláití, hind. foreign + amlí, hind. tamarindus indica, linn.). Can. from (ótekáyí, can. stone fruit + mara, can. tree). Tel. from (síma, tel. foreign + chinta, tel. tamarind tree). Mal. from (kuru, mal. short + káya, mal. fruit + puli, mal. tamarind) [corcapilly]. Too. also (esalpuli), meaning leaf + acidity; (karkpuli), meaning sharp + acidity. Tel. also (vádachinta), meaning ship + tamarind tree. Mal. also (kutampuli), meaning pot + tamarind; the dried fruits are preserved in pots; (kotukkáppuli), meaning sharp + fruit + tamarind. Title otherwise Acid leaf tree, Foreign tamarind [corcapilly], Gorga, Malabar tamarind, Pot tamarind. Botanically Garcinia [ractaumram] cambogia, desrous, guttiferæ [vricsham, 22]. Alias Cambogia gutta; Garcinia kydia; Mangostana cambogia. Gutta, from (gátah, malay, gum); mangostana, from (mangusta, malay, garcinia mangostana). Small evergreen tree of w. coast; leaves lanceolate, deep green; flowers terminal or axillary, sessile or subsessile, pedicelled, solitary or several together; male, anthers numerous, on a short, thick androphore, oblong, two-celled, dehiscing longitudinally, introrse; female, staminodes surrounding the base of the ovary in several phalanges, each containing two to three sterile spathulate stamens; stigmas five to ten-lobed, papillose, glandular; ovary six to ten-celled; fruit yellow or reddish, six to ten-furrowed, six to ten-seeded, nearly globular or ovate, furrows broad, with angular edges, the furrows not continued to the apex, which is smooth and depressed, and often nipple-shaped, about size of small orange [q.v.]. A gamboge of fine quality exudes from trunk semi-transparent, very adhesive; is insoluble in water, but soluble in spirits. Fruit used on west coast like tamarinds [q.v.] on coromandel [q.v.]. Gamboge gives usual yellow dye [shauyam]; yields an excellent straight grained lemon colored slightly elastic wood, easily worked. There is a variety conicarpa.——*Siam gamboge* (పసుపువన్నెచెట్టు - pasupuvannechettu, Tel.; மக்கிமரம் - makkimaram, Tam.). Tel. from (pasupu, tel. yellow + vanne, tel. color + chettu, tel. tree); from yellow gamboge. Tam. from (makki, tam. whitish clay + maram, tam. tree); from soil where it grows. Botanically Garcinia [ractaumram] morella, desr., var. pedicellata, guttiferæ [vricsham, 22]. Diœcious tree, with laurel-like foliage and small yellow flowers, found in cambojam [cambodia]; gives the gum resin [googal], true gamboge; substance brittle, fracture shelly, surface opaque, and brownish-yellow with lustre; forms a yellow emulsion when rubbed with water; powder bright-yellow, inodorous, nearly tasteless, but leaving a faintly acrid flavor. Gives to pharm. cambogia, or gummi gambogia, or gummi gutti, valuable hydragogue, cathartic, and anthelmintic. For compound gamboge powder; take of siam gamboge, in powder, three drachms; cream of tartar [draucshaooppoo], in powder, three ounces and one drachm; ginger [q.v.], in powder, two drachms; mix and rub them well together and pass the powder through fine sieve. For compound gamboge pill; take of gamboge, barbadoes or indian aloes [aloe] and compound powder of cinnamon [q.v.], each one ounce; hard soap [sauboon], in powder, two ounces; syrup, a sufficiency; pulverise the gamboge and aloes [q.v.] separately, mix them with the cinnamon powder, and then with the syrup, and beat the whole into a uniform mass. Doses; of compound gamboge powder, from forty grains to one drachm; of compound gamboge pill, from five to ten grains. Siam gamboge is one of the best purgatives in this country and a much stronger drug than jalap [q.v.].

GAN (गण् - gan, *San.*). To count.——*Ganam* (गण - gana, San.). A collection, class. In Mysore, specially Lingayets [q.v.]. A troop of inferior deities [deva], especially those attendant on Shiva [q.v.]. In natural history an organic kingdom. For category in that connection, see Padaurtam; for elementary substance, see Dravyam; for matter, see Bhootam; for organic and inorganic, see Indriyam and Anindriyam; for organic kingdom, see present head [jantoo, vricsham]; for organic class, see Vargam; for organic order, see Santaunam; for organic family, see Coolam; for organic genus, see Jauty; for organic species, see Bhaidam. Oopa prefixed to either of the above means a sub-head. For inorganic minerals, see Dhautoo.——*Ganapa* (ಗಣಪ - ganapa, Can.). From (gana, san. a class of deities + pá, san. to rule). Ganesh, the ruler of the attendant troops. Hindoo 2nd or pers. name [peyar].——*Ganaparvatam* (गणपर्वत - gánaparvata, San.). From (gana, san. a class of deities + parvata, san. mountain). Keilausam [q.v.].——*Ganapatisoobban* (கணப்பதிசுப்பன் - kanappathisuppan, Tam.). From (ganapati, san. vighnéshvara, the ruler of gana + subba, can. serpent), meaning ganapaty and soobramanyan, the serpent lord; a compound name. Hindoo 2nd or pers. name [peyar].——*Ganapaty* (गणपति - ganapati, San.). From (gana, san. a class of deities + pati, san. lord). Ganesh, the lord of minor deities attendant on shiva [vigneshwaran]. Hindoo 2nd or pers. name [peyar]. Title of the dynasty [raj] of Warangal [q.v.]; said to be descended from the Hastinapooram line. Title otherwise Caucateeya, from the seventh prince of this line. Their first capital was Hanoomacondah. Subsequently Warangal. Chorgunga, the founder of the Gajapaty [q.v.] line said to belong to this line. Prataupa roodra deo and his queen Roodramma who ruled as regent for thirty-eight years after his death, are the most important of the line, which succumbed to Mahomedans about 1323. Vol. I (132) [charitram].——*Ganapaty's lime* (ഗണപതിനാരകം - ganapatinárakam, Mal.). From large size of fruit, referring to his large belly. Same as Citron.——*Ganesh* (गणेश - ganésha, San.). From (gana, san. a class of deities + ísha, san. master); the lord of minor deities [ganapaty]. The North indian name for Vigneshwaran [q.v.]; seldom used here. Ganesha geetay is the Bhagavat geeta [q.v.], but with the name of Ganesh substituted for that of Krishnan [q.v.]; used by the Gaunapatyans. See vol. I (73), (87).——*Ganitam* (गणित - ganita, San.). See sep. title.——*Gaunapatyan* (गाणपत्य - gánapatya, San.). From (ganapati, san. the god). A sect of the Dravida [q.v.] bramins [q.v.]; followers of Ganesh; only occasionally found in this presidency [jauty, matam].

GANDAM (गण्ड - ganda, *San.*). Chief.——*Gandadeva* (गण्डदेव - gandadéva, San.). From (above + déva, san. lord). Name of a Congoo [q.v.] carnautam [q.v.] king; said to have subdued the rajah of Canjy [conjeeveram] and levied tribute upon Dravida [q.v.]. Vol. I (130) [charitram].——*Gandaperandam* (गण्डभेरुण्ड - gandabhérunda, San.; கண்டப்பேரண்டம் - kandappérandam, Tam.). From (above + bhérunda, san. terrible); applied to a bird. Angka of the arabs, γρύπς of the greeks, griffin of european heraldry, gryphon of marco polo. A monstrous, two-headed bird holding elephants in its beak and in its claws, the elephant [q.v.] in the former sometimes replaced by the sharabham [q.v.] or fabulous lion [simham]. Compare the Roc in Sinbad the Sailor and his adventures with the gigantic egg and also with the bird [bheroondam].——*Guntamanaickanore* (கண்டமநாயக்கநூர் - kandamanáyakkanúr, Tam. gandamanáyakanúr*). From (ganda, san. chief + amma, tel. mother, titular affix + náyakkan, tam. titular affix + úr, tam. village). Zemindarry, Village; Madura dist., Periyacoolam tal.; pop. 2,909; Zemindarry pays peshcush of Rs. 13,415. One of the twenty-four polliems resumed by Tippoo sultan in 1788.

GANDH (गन्ध् - gandh, *San.*). To hurt.——*Ganda firoza* (सरलरस - saralarasa, San.; علك البطم - ilakulbutm, Ar.; صمغ پیستہ - samaghipistah, Pers.; گندہ فیروزہ - gandahfírozah, Hind.; కర్పూరతైలము - karpúratailamu, Tel.; തിരുവട്ടപ്പശ - tiruvattappasha, Mal.; கர்ப்பூரத்தைலம் - karppúrattailam, Tam.). Title from hindostany. San. from (sarala, san. pinus longifolius, roxb. + rasa, san. juice). Ar. from (ilak, ar. resin + butm, ar. turpentine tree, pistachia terebinthus, linn.). Pers. from (samagh, ar. gum + pistah, pers. pistachia vera, linn.). Hind. from (gandah, hind. nauseous + baríjá, hind. gum). Tel. from (karpúra, san. camphor + taila, san. oil). Mal. means turpentine + gum. Tam. from (karpúra, san. camphor + taila, san. oil). San. also (shrívása), meaning lutchmy + perfume. Ar. also (ilakulambát), meaning turpentine of nabathæans; (samghussanobar), meaning resin + pinus longifolius, roxb. Hind. also (saralkígond); (chírkígond), meaning pinus resin. Title otherwise Alah of the Old testament. Turpentine. An oleo-resin [teilam], from species of coniferæ; contained in all parts of the trees; thick, viscous, shining, rather transparent, color ranging from white to yellow or amber, odour strong and penetrating,

taste bitter and acrid; thickens by age by losing essential oil [attar] and absorbing oxygen [prauna vayoo] from the air. Galipot is the residue of turpentine which has lost its volatile oil [yennay] by spontaneous evaporation; when purified, it is called burgundy pitch; galipot in tears is called false incense. Tar [keel], a liquid or half liquid, tenacious, black; composed of resin [raul], empyreumatic oil, and acetic acid [sirkeyka tezaub]; odour strong and disagreeable, taste bitter and very nauseous; is prepared by the close distillation of the turpentine woods. Smoke black is prepared by the combustion of pitch [zift]; is burned under a dome, within which cloths are suspended to which the soot becomes attached; employed in printer's ink, blacking for shoes, &c. Spirits of turpentine, see Carpoora teilam; this is made by distilling turpentine in a common still, when the oil will be found in the receiver. Common resin or yellow resin is the residue of the distillation of turpentine; when the distillation is performed without addition, it is called common resin, or colophony, but when agitated with about one-eighth of fresh water, while yet fluid, it is named yellow resin. Canada balsam [q.v.] is a transparent resin of honey-like consistence, and of a light straw-color with a greenish tint. For Chian turpentine, see Turpentine pistah.——*Gandhac* (گندک - gandak, Hind.). See sep. title.——*Gandham* (गन्ध - gandha, San.). Smell. Odorous matter pounded for rubbing on the person, or on figures [vigraham] of gods [sandal].—"*a*" Plant first term. Ex., where transl. is of second term:—Alpinia galanga (gandhaváruní), juice; Andropogon schœnanthus (gandhatrina), grass; Cordia obliqua (gandhapushpa), flower; Curcuma zedoaria (gandhamúlí), root; Elettaria cardamomum (gandhakuti), flower-bud; Gardenia florida (gandharája), king; Hibiscus esculentus (gandhamúla), root; Justicia gendarussa (gandharasa), juice; Michelia champaca (gandhap'hala), fruit; Ocimum basilicum (gandhap'hanijjaka), ocimum; Oldenlandia alata (gandhabhadra), auspicious; Pæderia fœtida (gandháli), bough; Piper cubeba (gandhamenasu), piper nigrum; Santalum album (gandháchekke), wood, (gandhapuchettu), tree, (gandhasára), juice; Saraca indica (gandhapushpa), flower; Vanda roxburghii (gandhanákulí), ichneumon plant alpinia galanga. See gloss. paragraphs.—"*b*" Plant second term. Ex., where transl. is of first term:—Acorus calamus (ugragandha), strong; Allium cepa (ugragandha), strong; Alpinia galanga (sugandha), good; Argyreia speciosa (rikshagandha), bear; Balsamodendron myrrha (rasagandha), juice; Bambusa arundinacea (navágragandhá), new + top; Cæsalpinia pulcherrima (ratnagandhi), gem; Coriandrum sativum (hridyagandhá), agreeable; Evolvulus alsinoides (vishnugandhi), vishnoo; Gynandropsis pentaphylla (ajagandhi), sheep; Hemidesmus indicus (pálasugandhi), milk + good; Hygrophila spinosa (ikshugandha), saccharum officinarum; Ipomæa digitata (ikshugandhá), saccharum officinarum, (rikshagandhá), bear; Myrica sapida (sugandhi), good; Pterocarpus santalinus (agarugandhamu), aquilaria agallocha; Rauwolfia serpentina (sarpagandhá), serpent; Saccharum spontaneum (ikshugandhá), saccharum officinarum; Santalum album (shrígandha), auspicious; Tribulus terrestris (ikshugandhá), saccharum officinarum; Withania somnifera (ashvagandhá), horse. See gloss. paragraphs.—"*c*" Mammal first term. Ex., where transl. is of second term:—Crocidura cærulea (gandhamúshika), rat, mus genus; Viverra civettina (gandhamárjára), cat, felis genus, and (gandhamriga), deer, cervidæ. See gloss. paragraphs.——*Gandharajah* (गन्धराज - gandharája, San.). From (gandha, san. fragrance + rájá, san. king). Title otherwise Cape jasmine, Wild asafœtida. Botanically the Gardenia genus, rubiaceæ [vricsham, 71]. Trees or shrubs, frequently spiny, natives of tropical asia and africa; fruit berry-like; largely cultivated for the fragrance and beauty of the flowers; wood smooth, close-grained, hard; pores small, numerous, and uniformly distributed. The species best known to the natives are:—florida [cape jasmine], latifolia [hill emetic nut], lucida [decamallee], turgida [nunjoondam]. Other s. indian species indigenous or naturalized are:—campanulata, coronaria.——*Gandhaulee* (प्रसारणी - prasáraní, San.; चांदवेल - chándavéla, Mahr.; گندھالی - gandhálí, Hind.; సవిరెలచెట్టు - savirelachettu, Tel.). Title from hindostany. San. from (prasri, san. to stretch forth), from relaxing limbs contracted by rheumatism. Mahr. from (chánda, mahr. moon + véla, mahr. creeper). Hind. from (gand, hind. fetid + dhálí, hind. bough). San. also (sáraná), meaning causing to extend; (prataniní), meaning extending; (katambhará), meaning preserving the hip and loins; (rájabalá), meaning king tonic; (bhadrabalá), meaning good tonic; (gandhabhadrá), meaning fragrant and useful; (bhadraparní), meaning having useful leaves; (cháruparní), meaning having beautiful leaves; (prabhadrá), meaning very useful; (prabalá), meaning very powerful; (balá), meaning powerful [balah]; (rájaparní), meaning having shining leaves; (suprasará), meaning well extending; (sómarájí), meaning moon + brightness [wild jeerah]. Title otherwise Chinese fever plant, Moon creeper [goolancha, somam], Rajaparny, Somraj, Stinking opal berry. Botanically Pæderia fœtida, linn., rubiaceæ [vricsham, 71]. Alias Apocynum fœtidum. Slender climber; leaves opposite, oblong or lanceolate, cordate at the base, glabrous; panicles axillary and opposite, or terminal; flowers sessile along the ultimate divisions; berry ovate, somewhat compressed, two-celled, two-seeded; calyx five-toothed; corolla infundibuliform, hairy inside, five-lobed; stamens almost sessile on the middle of the tube; festoons of small bell-flowers, purple varied with white, emitting fetid odour; flowering in cold season. Whole plant when bruised has same fetid smell; roots emetic; fibre from stalks. No other common species here.——*Gendah* (اقحوان - ukhuván, Ar.; بابونۂ گاؤ چشم - bábúnahigáuchashm, Pers.; گیندا - gendá, Hind.; گیند کا جھاڑ - gendkájhár, Dec.; ಚಂಡುಮಲ್ಲಿಗೆ - chandumallige, Can.; బంతిచెట్టు - bantichettu, Tel.; துலுக்கமல்லிகை - tulukkamalligai, Tam.). Title from hindostany. Hind. from (gandha, san. sulphur); from yellow flower. Ar. from (kuhu, ar. to seize). Pers. from (bábúnah, pers. chamomile, anthemis nobilis, linn. + gáu, pers. cow + chashm, pers. eye); from similarity of flowers Can. from (chendu, can. ball + mallige, can. jasminum). Tel. from (banti, tel. nosegay + chettu, tel. tree), from flowers. Tam. from (tulukkan, tam. mahomedan + malligai, tam. jasmine); from use by mahomedans. Pers. also (gulijafarí), meaning yellow flower. Tam. also (kañjáppúççedi), meaning cannabis sativa, linn. + flower + tree; (kendippúççedi), meaning sulphur + flower + plant; (tulukkappú), meaning mahomedan flower. Title otherwise Marigold, Turk jasmine, Yellow jasmine. Botanically the Tagetes genus, compositæ [vricsham, 74]. Showy annuals largely cultivated for the ornamental compound flowers, which are considered sacred. The species best known to the natives are:—Erecta, african marigold, indian yellow marigold, annual, showy, yellow flowers; whole plant has fœtid smell; medicinally flowers purify the blood, and are remedy for eye diseases. Patula, french marigold; a dwarf plant, with comparatively small flowers.——*Gendarussa* (गन्धरस - gandharasa, San.). See sep. title.

GANDHAC (गन्धक - gandhaka, *San.* and *Mahr.*; كبريت - kibrít, *Ar.*; گوگرد - gogird, *Pers.*; گندك - gandak, *Hind.*; بالی رانگ - bálirang, *Malay*; ಗಂಧಕ - gandhaká, *Can.*; ಗಂಧಕ - gandhaka, *Too.*; గంధకము - gandhakamu, *Tel.*; ഗന്ധകം - gandhakam, *Mal.*; ගන්ධක - gandhaka, *Singh.*; கந்தகம் - kandagam, *Tam.*). San. from (gandh, san. injure) [gandh]. Sulphur. Otherwise Brimstone or Burnstone. Occurs in the animal [jantoo] vegetable [vricsham] and mineral [dhautoo] kingdoms, principally the last; elementary combustible solid non-metallic substance of a peculiar yellow color, and very brittle; has neither taste nor smell, though when rubbed it has a faint peculiar odour; very inflammable, burning with a clear flame, and leaving no residuum. As a crude mineral it is chiefly got from volcanic countries, where it is met with in beds; greater part of the sulphur exposed for sale here is imported; it has however been found on west coast in combination with iron [auhan] in the form of pyrites [auhan]; also in godavery; see vol. II, 33. Sublimed sulphur or flowers of sulphur is poo gandhac. Gandhacayooctam, from (yuj, san. to join) is a sulphate, or salt formed by sulphuric acid [gandhac tezaub] in combination with any base, fusible. For different sulphates see Annabhaidy, Mayil toottam, Rasapaspam, Vellay toottam. Sublimed and precipitated sulphur is used medicinally in the form of powder and in ointments; also administered internally; alterative and diaphoretic in small, and mildly aperient in larger doses; used both externally and internally in scabies and other cutaneous affections; pharm. has sulphuris iodidum properties similar to those of iodine, sulphur præcipitatum, sulphur sublimatum. Native sulphur is chiefly employed in the preparation of gunpowder and in making fireworks [baunam] and matches; the fumes of burning sulphur have the effect of whitening raw silk [puttoo]. The following are the different kinds of sulphur.——*Bauna gandhac* (باروت کی گندک - bárúdkígandak, Dec.; బాణగంధకము - bánagandhakamu, Tel.; வாணக்கந்தகம் - vánakkandagam, Tam.). Dec. from (bárúd, hind. gunpowder). Tam. from (vánam, tam. fireworks); as used in fireworks [baunam]. Stick sulphur; also called Roll sulphur, common.——*Dholl gandhac* (دال گندك - dálgandak, Dec.; పప్పుగంధకము - pappugandhakamu, Tel.; പരിപ്പുഗന്ധകം - parippugandhakam, Mal.; பருப்புக்கந்தகம் - paruppukkandagam, Tam.). From resemblance to split dholl. Found in small pieces, some of which are thin and concave, some flat and irregular, and some round like a shot, &c.; bright yellow; form and color resemble half seeds without husk of dholl [common dholl].——*Myrobalan gandhac* (आमलकगन्धक - ámalakagandhaka, San.; आवलागन्धक - ávalágandhaka, Mahr.; آنولہ سار گندك - áunlahsárgandak, Dec.; ನೆಲ್ಲಿಗಂಧಕ - nelligandhaka, Can.; నెల్లికాయగంధకము - nellikáyagandhakamu, Tel.; ആമലകഗന്ധകം - ámalakagandhakam, Mal.; நெல்லிக்காய்க்கந்தகம் - nellikkáykkandagam, Tam.). From color resembling ripe fruit of myrobalan [q.v.]. Occurs in crystalline pieces like those of alum [padicauram]; bright yellow color with a shade of green; color somewhat like ripe fruit of phyllanthus emblica, linn., or emblic myrobalan [q.v.]; purest of all met with in bazaars.——*Putchay ghandhac* (کچی گندك - kaççígandak, Hind.; పచ్చిగంధకము - paççigandhakamu, Tel.; പച്ചഗന്ധകം - paççagandhakam, Mal.; பச்சைக்கந்தகம் - paççaikkandagam, Tam.). Means raw sulphur. Common native sulphur; very impure, hard, and generally whitish yellow in color; the worst in the bazaar [q.v.].——*Yerra gandhac* (रक्तगन्धक - raktagandhaka, San.; तांबडगन्धक - támbadagandhaka, Mahr.; لال گندك - lálgandak, Dec.; ఎర్ర

ಗಂಧಕ - kempugandhaka, Can.; ఎర్రగంధకము - erragandhakamu, Tel.; ചൊവന്നഗന്ധകം - chovannagandhakam, Mal.; கோழித்தலைக்கந்தகம் - kózhittalaikkandagam, Tam.). Title, &c., mean red sulphur. Tam. from (kózhi, tam. fowl + talai, tam. head); from color of cockscomb. Red sulphur. Found in small and highly crystalline, flat or irregular pieces, of purple or brick-dust color; probably a sulphuret of some metal [loham]; it burns with a faint blue flame, and emits a slight smell of sulphur; resorted to by native alchemists, and is the chief ingredient used by them in preparing artificial gold [pon] and silver [velly].

GANDOO (ಗಂಡು - gandu, *Can.*; గండు - gandu, *Tel.*). Male. Plant first term often joining two genèra. Ex., where transl. is of second term:—Alstonia venenata (gandugannéru), nerium odorum; Andropogon nardus (gandahanchikhaddi), aristida setacea + spear; Bambusa stricta (gandubiduru), bambusa arundinacea; Memecylon amplexicaule (ganduképala), solanum stramonifolium; Pimenta acris (gandamenasu), piper nigrum. See gloss. paragraphs.

GANITAM (गणित - ganita, *San.*). From (gan, san. to count) [gan]. Arithmetic [shastram]. See vol. II, 245.——*Bhinna ganitam* (भिन्नगणित - bhinnaganita, San.). From (bhinna, san. fraction). Practice; treating of weights [niray] and prices of things.——*Chauyah ganitam* (छायागणित - chháyáganita, San.). Means shadow-reckoning. Explains the method of finding the height and distance of objects by their shadows [shunk].——*Cshetra ganitam* (क्षेत्रगणित - kshétraganita, San.). See sep. title.——*Ghauta ganitam* (खातगणित - khátaganita, San.). From (kháta, san. excavation). Teaches the manner of measuring the extent of tanks [q.v.], and the water they contain; the manner of measuring and making channels [q.v.], fortifications [cottay, kila], embankments [anay, bund]; explains the different measures [alavay] in use, and treats especially of the use of the level, in making channels and tanks.——*Pauvalore ganitam* (పావలూరుగణితము - pávalúruganitamu, Tel.). From the author, one Veeracharry of Pauvalore, village in Baupatla. Treats of weights [niray] and measures [alavay], of the fundamentals of arithmetic, as numeration, addition, the five different ways of multiplying, division, practice, rule of three, rule of five, of seven, of nine, and eleven.——*Prakeerna ganitam* (प्रकीर्णगणित - prakírnaganita, San.). From (prakírna, san. scattered). Algebra [beejaganitam] of the Hindoos.——*Sootra ganitam* (सूत्रगणित - sútraganita, San.). From (sútra, san. rule). Contains rules for solving arithmetical, hydraulical, and algebraical questions, and treats of dry measures, of progression [raushy], &c.——*Swarna ganitam* (सुवर्णगणित - suvarnaganita, San.). From (suvarna, san. gold). The art of assaying gold [pon] and silver [velly] by the touch, and of taking their specific gravities.

GANJ (گنج - ganj, *Hind.*). From persian. Granary. Treasure [golah, gunj].——*Ganjam* • (గంజాము - gandzámu, Tel.). From (above + gám, hind. village). Greek παλούρα, the point of departure in crossing Bay of Bengal, there being a place (pálúru) a little north.—"*a*" Revenue district; situated on the Coromandel coast [q.v.] in the north-east corner of the presidency; between 18° 12′ and 20° 26′ N. lat., and between 83° 32′ and 85° 14′ E. long.; bounded N. by Pooree district in Orissa, E. by Bay of Bengal, S. by Vizagapatam district, W. by estates of Calahundy, Patna and Jeypore; square miles 8,370; pop. non-agency 1,589,477, agency 307,326; language Teloogoo, Ooriya, Khond, Sowrah. Contains rivers Langoolya, Rooshcoolya, Vamshadhaura; ports Bapanapaud, Barwah, Calingapatam, Ganjam, Gopalpore, Poondy, Sonapore. The whole area of the district is represented by the following sub-areas, where talook [q.v.] means an ordinary tract administered by a Tahsildar [q.v.], and division means a zemindarry [q.v.] tract administered by a superior Deputy tahsildar:—Berhampore talook, Chicacole talook, Goomsoor talook, Maliah [q.v.] tracts, Zemindarry tracts. For general administrative purposes the district is distributed between the following revenue and magisterial officers, who have their head-quarters at the places shown. The pay set opposite the subordinate officers gives the grade of the corresponding charge:—Collector, Chetterpore; Principal assistant collector, Chicacole, in charge of Chicacole talook, Parlakimedy, Tekkaly and Tarlah zemindarries and the Parlakimedy maliahs; Senior assistant collector, Berhampore, in charge of Berhampore talook, Mundasa, Cheekaty, Pedda kimedy, Soorangy, Jalantra, Boodaurasinghy and Jarada zemindarries, and a portion of the Atagadah zemindarry, the maliahs of Pedda kimedy, Soorangy, Jalantra, Boodaurasinghy, Jarada and Mundasa; General deputy collector, Russellcondah, in charge of Goomsoor talook and a portion of Atagadah, Dhauracote, Shergadah, Chinna kimedy, Aska, Devabhoomy, Coorlah and Bodagooda zemindarries; Special assistant agent, Russellcondah, in the low country and Balligooda in the maliahs, in charge of maliahs of Goomsoor, Chinna kimedy and Bodagooda, and Cuttingia and Chocapaud mittahs of the Goomsoor talook. Tahsildars—Berhampore, Rs. 200; Chicacole, Rs. 175; Goomsoor, Rs. 150. Deputy tahsildars—Aska, Rs. 100, range situated in the north-east of Chinna kimedy; Balligooda, Rs. 250; Ganjam, Rs. 70, range situated in the north-east of Berhampore; Ichapore, Rs. 100, range situated in the south of Berhampore; Narsannapett, Rs. 70, range situated in the north-east of Chicacole; Oodayagherry, Rs. 200, range situated in the north-west of Goomsoor; Parlakimedy, Rs. 100, range situated in the Parlakimedy zemindarry; Poorshottapore, Rs. 100, range situated in the north of Berhampore; Ramagherry, Rs. 200, range situated in the Pedda kimedy maliahs; Sompett, Rs. 70, range situated in the south-west of Berhampore; Sooradah, Rs. 100, range situated in the north-west of Dhauracote; Tekkaly, Rs. 100, range situated in the east of Parlakimedy. Sub-magistrate, Berhampore, Rs. 70, jurisdiction extending over the town of Berhampore. Similarly judicial officers:—Judge, Berhampore; District moonsifs, Berhampore, Chicacole, Tekkaly. District engineer, at Berhampore. Contains Registration sub-districts Aska, Berhampore, Chetterpore, Chicacole, Goomsoor, Ichapore, Narsannapett, Parlakimedy, Poorshottapore, Tekkaly. Contains Forest ranges Berhampore, Cookloobha, Curcholy, Moojagodo, Sooradah. Contains Municipalities Berhampore, Chicacole, Parlakimedy. Contains District board; and Chicacole, Berhampore and Goomsoor talook boards. Chicacole talook board embraces the Chicacole talook, the Parlakimedy zemindarry and some proprietary estates, of which Tekkaly is the principal one. Berhampore talook board embraces the Berhampore talook, and the zemindarries of Mundasa, Jalantra, Jarada, Boodaurasinghy, Soorangy, Cheekaty, Pedda-kimedy, Hoomma, Biridy, Paulore, Cullicote and Atagadah. Goomsoor talook board comprises Goomsoor talook, Sooradah division, Shergadah and Chinna kimedy zemindarries, Aska and some other proprietary estates. The following general references should be made to the preceding volumes:—general geography, I (1) to (29); general ethnology, I (29) to (109); general history, I (110) to (188); physical geography, II, 1; meteorology, II, 3; geology, II, 8; fauna, II, 21; flora, II, 26; mineralogy, II, 29. The following references in the preceding volumes will furnish details special to the district:—latitudes and longitudes, II, 47; particulars about towns, II, 48; coast survey, II, 167; light-houses, II, 169; comparative population, II, 172; location of revenue officers, II, 382; revenue settlement of the district, II, 410; registrars' and sub-registrars' stations, II, 421; ports, II, 423; salt factories, II, 426; rain-guage stations, II, 428; police divisions, II, 431; maps published, II, 436; survey topographical lists, II, 443; hospitals and dispensaries, II, 447; head-quarter stations of gazetted officers, II, 461; incidence of taxation, II, 463; weights and measures of the district, II, 510; zemindarries contained, I, 60, and II, 296; agencies contained, I, 71. A special gazetteer account of the whole district is given at II, 77. For the detailed topography of the district, reference should be made to the talook notices in the present volume, Berhampore, Chicacole, Goomsoor; also to the heading Maliah; also to the different zemindarries. The following are the ancient zemindarries and proprietary estates in the district:—Akkavalsa, Aska, Atagadah, Barwah, Belamarapalavalsa, Biridy, Bodagooda, Boodaurasinghy, Bullipully, Caracavalsa, Cheekaty, Chinna kimedy, Chinnaury gocurnapully, Chittivalsa, Consoolacottore, Coorlah, Cullicote, Devabhoomy, Devandy, Dhauracote, Gopalpore, Hoomma, Jalantra, Jarada, Jarjangy, Khallada kimedy, Mundasa, Nowgaum, Nundigaum, Oorlaum, Parlakimedy, Paulore, Pautatekkaly, Pedda kimedy, Penta, Potoolore, Raghoonautapooram, Rajapooram, Saukipully, Saunta lutchmeepooram, Shergadah, Sidibehera cottore, Soorangy, Sowdaum, Talagaum, Talavalsa, Tarlah, Tarlipett, Tekkaly, Temboor, Yellamanchily, Yembaram, Zonnapaud.—"*b*" Deputy tahsildarry; Ganjam district. Pay Rs. 70.—"*c*" Town, Port, Deputy tahsildar's station, Salt factory; Ganjam dist., Berhampore tal.; pop. 4,695; acres 1,535; lat. 19° 23′; long. 85° 06′; from Balligooda S.E. 90 miles; from Berhampore E.N.E. 18¼ miles; from Chetterpore E.N.E. 4 miles; from Chicacole N.E. 105 miles; from Gopalpore N. 5½ miles; from Juggernaut W. 56 miles; from Madras N.E. 530 miles; from Russellcondah S.E. 47 miles. On Orissa coast [q.v.] near the left bank of the Rooshcoolya. The river formerly emptied itself into the sea close to the fort, but its present mouth is nearly three-quarters of a mile farther north. Ganjam was formerly the chief port of the district, but a ship of any size rarely visits the port now. Ships now usually anchor in the roads abreast of the fort in eight or nine fathoms, about two miles from shore. Until 1815 was the head-quarters of the district and a military station when it was visited by an epidemic of fever, which almost depopulated the place and led to its abandonment, the civil and military stations being then moved to Berhampore. The insalubrity has however disappeared. Ganjam used to be remarkable for the magnificence of its European residences. Some of these still exist. There are still to be seen the ruins of a fort in fair condition built in 1768 by Mr. Cotsford, the first Resident, in order to keep the Ooriya zemindars in check, and to resist a threatened invasion by the Mahrattas from Cuttack. There is a mud dock [dhony] for the repair of native vessels. There is some coasting trade by means of the river. The chief trade consists of the export of rice [q.v.]. Important Government salt factory, the manufacture of which forms the principal industry. The salt pans [ooppalam] are situated along the west bank of the canal connecting the Chilka lake with the Rooshcoolya canal. The beds of the pans are on a stratum of black clay. The soil is not so favorable as that at Soorlah and Nowpada factories. Trig. station in lat. 19° 22′ 29·50″; long. 85° 05′ 59·10″; from Berhampore E.N.E. 18 miles; from the sea W. ½ mile. This station is not at Ganjam but

on the opposite side of the Rooshcoolya. The following are the travelling distances by road from Ganjam to different places :—

To	Viâ	Miles and Furlongs.
Aska	Poorshottapore	33 0
Berhampore ...	......	19 0
Cuttack ...	Khoordhah	97 5
Cuttack ...	Pooree	114 5

Vizianagram ...	Berhampore, Chicacole and Chittivalsa.	177 1½

GANJAH (گانجہ - gánjah, *Hind.*). From (grinjana, san. the plant) [ganjar]. Product of Cannabis sativa, linn. [kinnab].

GANJEEFA (گنجیفہ - ganjífah, *Hind.*). Playing cards [chit]. The pack here is divided amongst eight suits.

GANNAIR (करवीर - karavíra, *San.*; कणेर - kanéra, *Mahr.*; سم الحمار - sammulhimár, *Ar.*; خرزهره - kharzahrah, *Pers.*; کنیر - kaner, *Hind.*; گنیر - ganer, *Dec.*; ಕಣಿಗಿಲು - kanigilu, *Can.*; గన్నేరు - gannéru, *Tel.*; അലരി - alari, *Mal.*; அலரி - alari, *Tam.*). Title from sanscrit through hindostany. San. from (kara, san. hand + víra, san. power), sword; from poisonous root destroying life. Mahr. from sanscrit. Ar. from (samm, ar. poison + himár, ar. ass). Pers. from (khar, pers. ass + zahr, pers. poison). Hind., &c., from sanscrit. Mal. and tam. from (alar, tam. flower). San. also (hayamáraka), meaning horse-killer [paula indigo]; (vishavrikshánka), meaning poisonous tree + body; (pratihása), meaning laughing at, from white flowers; (víra), meaning powerful; (chandáta), meaning powerful; (ashvamáraka), meaning horse-killer. Ar. also (diflí). Hind. also (kanel); (karber). Can. also (biliganagalu), meaning white + oleander; (kempuganagalu), meaning red + oleander; (kanigina); (paddalige). Tel. also (kastúripatte), meaning musk + stripe; (erragannéru), meaning red + the tree. Mal. also (chuvannarali), meaning red alary; (kanavíram), by corruption. Tam. also (asuvalari), meaning horse + gannair; (kattúrippattai), meaning musk + stripe; (irattaisivappalari), meaning double + red + the plant; (irattaivellaiyalari), meaning double + white + the plant; (vellaiyalari), meaning white + the plant; (arali). Greek ῥοδοδένδρον, ῥοδοδάφνη. Title otherwise Horse-killer, Indian oleander, Karaveeram, Oleander, Oleander rosebay, Rosebay, Spurge laurel, Sweet-scented oleander. Botanically Nerium odorum, soland., apocynaceæ [vricsham, 87]. Alias Nerium indicum, odoratum. Large spreading shrub, 6–8 feet; calyx five-cleft; corolla salver-shaped, throat crowned by lacerated segments, segments of the limb twisted, unequal-sided; leaves linear lanceolate, three in a whorl, veiny beneath, with revolute edges; peduncles terminal; flowers ordinarily pale-red, fragrant; follicles cylindrical; near banks of rivers; common in gardens; throws up from ground rod-like stems upon summit of which is borne foliage of the narrow lanceolate leaves; flowers offered to shiva [q.v.] and vishnoo [q.v.]. Roots crooked, bark thick, soft, external surface grey, corky, on young roots the corky layer is very thin, and the interior yellow color of the bark is seen through it, inner surface yellow; the bark when cut or wounded exudes a pale yellow latex, which is resinous and very sticky, odour somewhat acrid, taste acrid and bitter. Bark used externally as a repellent, and made into a paste and applied in cases of ringworm; root taken internally acts as a poison; sometimes taken for suicide; root contains yellow poisonous resin [raul], tannic acid, wax [mom], and sugar [q v.]; same poison resides in bark and flowers; used in leprosy [cooshtam], eruptions of the skin, and boils; gives to pharm. oleander flowers, non-officinal. An essential oil is distilled from the flowers. Varieties with pink, deep-red, white, and variegated flowers, both single and double; the tamarix gallica, linn. [manna jhow], is sometimes called auttalary or the river alary, but it is no variety. The following is a Hindostany proverb :—جھگڑے سبب لڑائی ہو وہ آدمی نہیں کانٹا ھی گھر میں سے کایا کل کنر کا—"Who causes quarrels is not a man, but is like a porcupine [kharpoosht] quill or an oleander flower in the house;" vapour of flowers being noxious.——*Cluster gannair* (గుత్తిగన్నేరు - guttigannéru, Tel.). Tel. from (gutti, tel. cluster + gannéru, tel. nerium odorum, soland.). Botanically Kopsia fruticosa, a. dec., apocynaceæ [vricsham, 87]. Alias Calpicarpum roxburghii; Cerbera fruticosa. Large spreading lanceolate leaves; flower 2½ inches, pale rose, at the base and throat bright red; flowering nearly throughout the year.——*Fragrant gannair* (వాడగన్నేరు - vádagannéru, Tel.). Same as Pagoda tree.——*Water gannair* (நீரலரி - níralari, Tam.). From (nír, tam. water + alari, tam. oleander, nerium odorum, soland.). Knot grass, Red shanks. Botanically the Polygonum genus, polygonaceæ [vricsham, 110]. Annual or perennial herbs, rarely undershrubs; leaves alternate; flowers in spikes or racemes. The species best known to the natives are :—aviculare [hoonrauj], barbatum [alligator's nose], flaccidum [water pepper], roxburghii [wobilinta], tomentosum [river jasmine]. Other s. indian species indigenous or naturalized are :—bishiræ, chinense, donii, glabrum, horridum, lanigerum, minus, misquelianum, nepalense, pedunculare, rivulare, wallichii.——*Wild gannair* (తనికి - taniki, Tel.; കാട്ടലരി - kättalari, Mal.; காட்டரளி - kättarali, Tam.). Title from resemblance of leaf. Mal. and tam. from (kádu, tam. wild + arali, tam. nerium odorum, sol.). Tel. also (shiridsmánu). Botanically Homonoya riparia, lour., euphorbiaceæ [vricsham, 118]. Alias Adelia neriifolia; Croton salicifolius; Hæmatospermum javanense. Leaves linear-lanceolate, acuminate, subacute at the base, very often entire, willow-like, beneath sparingly pubescent and scurfy; inflorescences long, many-flowered, erect, slender; segments of the female calyx persistent, ovate-lanceolate; stigmas longer than the capsule, shortish papillose; ovary and capsule here and there muricated, small, pubescent; flowering in the hot season. Large shrub; many-flowered, in beds of rivers; wood grey or greyish-brown, moderately hard, close-grained; there is another species retusa, with varieties cuneata and genuina. The chaltah [q.v.] also is called wild gannair. So also dog bane; botanically alstonia [saptaparnam] venenata, br., apocynaceæ [vricsham, 87]; alias blaberopus venenatus; echites venenata; large tree; flowers largish, pure white; juice of tree poisonous.——*Yellow gannair* (پیلا کنیر - pilákaner, Hind.; پیلا پھول کا کنیر - pílaphúlkáganer, Dec.; పచ్చగన్నేరు - pattsagannéru, Tel.; പച്ചയരളി - paççayarali, Mal.; பச்சையலரி - paççaiyalari, Tam.). Title from color and resemblance of flowers. Hind. from (pílá, hind. yellow + kaner, hind. oleander, nerium odorum, soland.). Tel. from (pattsa, tel. yellow + gannéru, tel. gannair). Tam. from (pattsa, tel. yellow + alari, tam. oleander). Tam. also (tiruváççippú); (shímaiyalari), meaning foreign + oleander; (manjalalari), meaning yellow + oleander. Title otherwise Exile oleander, Exile tree, Foreign oleander, Linear-leaved cerbera, Yellow oleander. Botanically Thevetia nereifolia, juss., apocynaceæ [vricsham, 87]. Alias Cerbera thevetia. Tree, 12 feet; leaves linear, entire, almost veinless, glabrous; calyx five-cleft; segments ovate-lanceolate, acute, three times shorter than the tube of the corolla; peduncles extra-axillary at the tops of the branches, one-flowered; corolla funnel shaped, tube hairy inside; flowers yellow, fragrant; drupe half orbicular, truncated at the apex, two-celled; cells bipartite. A handsome, spreading tree; constantly in blossom with numerous large, thimble-formed, flowers; fragrant; flowering nearly all year; large almond-like [baudam] nuts; native of west indies; introduced; kernels very bitter, when chewed produce numbness and heat in the tongue; oil is extracted from kernels clear bright yellow. The fresh bark of the young wood, of from ½ to 1 inch in diameter, is green, smooth, and covered by a thin grey epidermis, through which the green color is apparent; it turns black when dry; the bark from the larger stems has a brown suberous coating; the wood is white and soft, with a large central pith; all parts of the plant yield an abundance of acrid milky juice; the fruit is globular, slightly fleshy, green, 1½ to 2 inches in diameter, and contains a hard nut, light brown in color, and triangular, with a deep groove along the edge corresponding to the base of the triangle; each nut contains two pale yellow, slightly winged seeds; the seeds and the inner layer of the bark give, when boiled with hydrochloric acid, a deep blue or bluish-green color. Milk highly venomous; oil from kernels is emetic and purgative; bark antiperiodic, substituted for cinchona [koinah]; gives to pharm. exile bark, non-officinal. Wood worthless.

GANY (గని - gani, *Tel.*; கனி - kani, *Tam.*). From (khan, san. to dig) [kainy]. Mine.

GAON (گاؤں - gáun, *Hind.*). Corruption of (gráma, san.). Used in Ganjam and Vizagapatam. Village [gaum, graumam].

GAR (گر - gár, *Pers.*). Means doer. Suffix to nouns to denote agent; as Khidmutgar, service + holder [caur, gaur].

GARA (കര - kara, *Mal.*). Shore. So village. Suffix in place names; as Nedoomangara, meaning long + earth + village [cara].——*Garay* (കര - kara, Mal.; கரை - karai, Tam.). Natural bank. Suffix in place names; as Maungaray, meaning mango tree bank [cara, caray].

GARANCHY (گھرونچی - gharonchí, *Hind.*). From (gharâ, hind. pot + unchâ, hind. high). A stand on which to place chests, being a bare rectangular frame with legs at the corners.

GARBHAM (गर्भ - garbha, *San.*). From (gribh, san. to hold). Interior.——*Garbhagriham* (गर्भगृह - garbhagriha, San.). From (above + griha, san. house). That part of a temple [coil] in which the idol [vigraham] is placed and where the Bramin officiates.

GARCE (ಗರಿಸೆ - garasi, *Can.*; గరిసె - garise, *Tel.*; கரிசை - karisai, *Tam.*).—"*a*" Measure of capacity. 400 mercauls = 1 garce [alavay, 3a]. Approximate actual value, 1 garce = 185 cubic feet, 320 cubic inches. As salt measure, 424 mercauls.—"*b*" Superficial measure. In N. circars [q.v.] land which will yield one garce [alavay, 2b]. Compare Mal. parrah, Tam. cottah. See vol. I, 609; II, 506.

GARDAN (گردن - gardan, *Hind.*). Neck.——*Gardan eyengtha* (گردن اینٹھا - gardanaíttá, Hind.; మెడనులిగాడు - medanuligádu, Tel.). Hind. from (gardan, hind. neck + aítta, hind. twirling). Tel. from (meda, tel. neck + nuli, tel. twist + gádu, tel. personal suffix). Title otherwise Wryneck. Yunx torquilla, yungina.

picidæ [marangotty], scansores, insessores [pacshy, 13], of naturalists [jantoo]. Kestrel-like call; close resemblance of tints to situations on which it alights. No other common species here.

GAROODAN (गरुड - garuda, *San.*). From (garut, san. wing + dí, san. to fly); from swift motion.—"*a*" Mythical bird, prince of birds, the foe of snakes, Vishnoo's vehicle [vauhan], and a son of Cashyapan [q.v.] by Vinatay. Aroonan, the sun's charioteer or the personified dawn, appears as the younger brother of Garoodan. Superior to the common Braminy kite [q.v.], and represented as a being between a man and a bird. On the walls of Veishnava temples and other Veishnava buildings, Garoodan is represented by the figure of a young man seated, with the palms of the hands closed, fingers pointed upwards, a sign denoting reverence; the feet are crossed; the face is that of a man, only with a long, thin, and very aquiline nose; the peculiar cap worn by deities on the head and large wings outstretched from the shoulders. In the Tamul oottara ramayanam [q.v.], the god Vishnoo [q.v.] is represented as going forth to combat, borne by Garoodan; but that is not a usual representation, the quality of mildness or sautwicam [q.v.] being especially ascribed to Vishnoo. The vehicle would seem to be a symbol of swiftness, as the chuckram [q.v.] is an emblem of justice and the mace of power [matam]. Also Hindoo 2nd or pers. name; common among Madhwas [peyar].—"*b*" Plant first term. Generally from being an antidote to poisons, as kite [chillam] is enemy of snakes [sarpam]. Ex., where transl. is of second term:—Aristolochia indica (garudakkodi), creeper; Hydnocarpus venenata (garudap'hala), fruit; Martynia diandra (garudamukku), beak. See gloss. paragraphs.—"*c*" Plant second term, in same sense. Ex., where transl. is of first term:—Alstonia scholaris (pálagaruda), meaning white + tree; Corallocarpus epigæa (ákáshagaruda), sky; Ophiorrhiza mungos (pátálagaruda), nether world; Rauwolfia serpentina (pátalagaruda), pale-red. See gloss. paragraphs.——*Garoodan's beak* (గరుడముక్కు - garudamukku, Tel.). Title from hooked fruit. Same as Tiger claw.——*Garooda ootsavam* (గరుడోత్సవము - garudótsavamu, Tel.; கருடோற்சவம் - karudórchavam, Tam.). Means braminy kite + festival; festival of vishnoo, the braminy kite rider. Otherwise Garooda sairvay. Luni-solar festival [pundigay, 6a]. A local festival at Conjeeveram in second solar month Veiyaushy [mausam], i.e, between 13th May and 12th June. It lasts ten days, during each of which the Vishnoo idol [vigraham] Varadaraja sawmy visits Shiva canjy or Larger canjy on various vauhans [q.v.], for the purpose of permitting the other deities to pay their respects to him. He thus goes down the street [veety] two miles long, which leads from his own temple to the Rajaveety [q.v.], at the foot of which he rests for a while in a mantapam [q.v.]. Varadarajan and Yecaumbara nautan, the Shiva idol, are held to be brothers-in-law, and the evening of sixth day of the feast is occupied by a visit to the Shiva temple. The image is brought down to the front of it, taken thrice round from right to left and the same number of times the opposite way, and then taken away again. This festival is a display of Veishnavism against the old Sheivism. Another Garooda ootsavam takes place at Triplicane on the third day of the lunar month Cheitram [mausam], between 16th March and 15th April, in honor of Paurtasauraty [maryauday, paurtasauraty].——*Garooda punchamy* (గరుడపంచమి - garudapanchami, Tel.). Means braminy kite + fifth lunar day. Same as Nauga punchamy.

GAROOGA (कंकर - kankara, *Mahr.*; توم - túm, *Hind.*; గరుగుచెట్టు - garuguchettu, *Tel.*; ମୋହି - mohi, *Oor.*; കരുവേമ്പു - karuvémbu, *Mal.*; கருவேம்பு - karuvémbu, *Tam.*). Title from teloogoo [fire-work plant]. Hind. from bengalee. Tam. from (karumai, tam. blackness + vémbu, tam. margosa tree, melia azadirachta, linn.); from pinnate leaf [curry-leaf tree]. Hind. also (kharpat). Tel. also (kalugudu). Tam. also (enneykkaraimaram), meaning oil + stain + tree; from dark brown bark. Title otherewise Black neem, Wing-leaved garooga. Botanically Garuga pinnata, roxb., burseraceæ [vricsham, 35]. Generic name from teloogoo. Medium sized tree; pinnate leaves early take on a yellow shade and fall during the cold season, appear with flowers in the hot season; flowers of a yellowish white, in panicles covered with a mealy kind of white substance; large bunches of smooth fleshy fruits of a pale green color resembling grapes [angoor]; very common. Clear, greenish yellow exudation contains a small proportion of resin [raul] and some oil; it has a terebinthiaceous odour and taste. Fruit eaten both raw and cooked. Leaves used as fodder; bark collected by tanners [chamrah]. Sapwood large, heart-wood reddish, moderately hard.

GARRAR (नन्दिवृक्ष - nandivriksha, *San.*; गरारि - garari, *Mahr.*; گراری - garárí, *Hind.*; ಕಾಡಗರ್ಗರಿ - kádagargari, *Can.*; ఒడిశ - vodisha, *Tel.*; କରଡ - karada, *Oor.*; നിലപ്പാല - nilappála, *Mal.*; මදර - madara, *Singh.*; ஒடுகு - ódugu, *Tam.*). Title from hindostany. San. from (nandi, san. happiness + vriksha, san. tree). Hind. from mahratta. Can. from (kádu, can. jungle + gargari, can. ocimum). Mal. from (nila, mal. ground + pála, mal. milk-plant). Tam. from (odi, tam. to shine). San. also (indrayava), meaning the plant, holarrhena antidysenterica, wall. + barley, hordeum vulgare, linn., from being antidysenteric and having seeds like barley; (kutaja), meaning the plant, holarrhena antidysenterica, wall. [tellicherry bark]. Can. also (kodasinagida), corruption from (kutaja, san.) the plant, holarrhena antidysenterica, wall. Tel. also (kadisechettu). Tam. also (odu), meaning shining tree. Title otherwise Wodisha. Botanically Lebidieropsis orbicularis, muller, var. collina, euphorbiaceæ [vricsham, 118]. Alias Amanoa collina; Andrachne orbicularis; Bridelia collina; Cluytia collina, patula, retusa. Tree; leaves elliptic or obovate, round-obtuse, obtuse or slightly cordate at the base, pubescent on the rib below; flowers subsessile, softly grey hairy white; sepals oblong triangular ovate; petals very minute glabrous, irregularly rhomboid above; capsules glabrous; seeds globose; flowers in hot season, seed ripens in december and january; the bark or outer crust of capsules is poisonous; wood reddish, very hard and durable.

GAS (ගස් - gas, *Singh.*). Tree.——*Gasambilla* (గాలారి - polári, Tel.; ചെറിയകൊട്ടം - cheriyakottam, Mal.; ගස්ඇඹිල්ල - gasambilla, Singh.). Title from singhalese meaning ambilla tree. Mal. from (cheriya, mal. small + kottam, mal. costus speciosus, smith). Singh. from (gas, singh. tree + ambilla, singh. antidesma). Tel. also (dzánapalasheru). Botanically Antidesma [amla shaucam] ghæsembilla, muller, var. genuinum, euphorbiaceæ [vricsham, 118]. Specific name from singhalese. Alias Antidesma paniculatum, pubescens. Small, deciduons tree; flower minute, greenish yellow. Leaves and berries eaten. Bark used for ropes. Wood red, with darker colored heart-wood, smooth, hard, close and even-grained.

GASHT (گشت - gasht, *Hind.*). From (gashtan, pers. to roam). Patrol.——*Gashty* (گشتی - gashtí, Hind.). A patrolling officer.——*Mengasht* (مین گشت - mengasht, Hind.). From (mél, tam. over). Overseer.——*Peigasht* (پیگشت - paigasht, Hind.). From (paí, pers. foot). Foot patrol.

GATLA (గట్ల - gatla, *Tel.*). Corruption of (katta, tel. bank). Locative plural. Suffix in place names; as Daudigatla, meaning army + bank [cutla].

GATY (गति - gati, *San.*). From (gam, san. to go) [go, gungay]. Motion. Specially the diurnal motion of a planet [graham] in its orbit [cacsham]. Madhya gaty is mean motion. Spoota gaty, from (sp'huta, san. true) is true or apparent motion. Vakra gaty, from (vakra, san. bend), is retrograde motion [chauram, cramam, jyotisham].

GAUB (तिन्दुक - tinduka, *San.*; बंदारूकु - bandárúku, *Conc.*; آبنوس هند - ábnúsihind, *Ar.*; آبنوس هندی - ábnúsihindí, *Pers.*; گاب - gáb, *Hind.*; تیندو - tendú, *Dec.*; ಅಂಟಿನಮರ - antinamara, *Can.*; ಹೊಳ್ಳೆತೂಪರ - holletúpara, *Coorg*; ಬಂದದಮರ - bandadamara, *Too.*; తుమికి - tumiki, *Tel.*; ଗୁସ୍ବକେନ୍ଧୁ - gusvakendhu, *Oor.*; പനിച്ചി - paniççi, *Mal.*; තිඹිරි - timbiri, *Singh.*; பனிச்சை - paniççai, *Tam.*). Title from hindostany. San. from (tij, san. to sharpen); from acidity of glutinous exudation. Ar. from (ábnús, ar. diospyros ebenum, kœnig. + hind, ar. indian). Dec. from sanscrit. Can. from (antu, can. gum + mara, can. tree). Mal. and tam. from (pani, tam. to flow); as yielding juice. San. also (túvara), meaning astringent from fruit; (dantashat'ha), meaning tooth + rogue, from acid fruit [sour auray, wood apple]. Can. also (tumari); (tappasi); (tumaki); (kusharada). Tel. also (tinduki); (tubuki); (nítitumiki), meaning water + the tree, common near backwaters; (gábu); (tummi). Mal. also (vanañchi), by corruption. Tam. also (tumbi). Title otherwise Backwater tree, Glue tree, Malabar garcinia, Malabar mangosteen, Persian mangosteen, Tindooky, Toomiky, Wild mangosteen [malay. red wood]. Botanically Diospyros [indian ebony] embryopteris, pers., ebenaceæ [vricsham, 83]. Alias Cavanillea philippensis; Diospyros glutinifera, glutinosa; Embryopteris glutinifera, peregrina; Garcinia malabarica. Evergreen tree, 25–30 feet, forming dense dome of foliage; leaves alternate, linear-oblong, pointed, glabrous shining, short-petioled; male peduncles axillary, solitary, three to four-flowered; stamens twenty; females one-flowered, larger than the male; stamens two to four, short; pistils four; nut globular, size of a small apple [seb], rusty-colored, filled with pulpy juice and covered with a rusty farina; seeds eight; flowers white; common near backwaters; native of w. coast. Fruit is full of tannin; juice of fruit applied to bruises and sprains; oil from seeds by boiling used in dysentery and diarrhœa; infusion of fruit used as a gargle; substituted for british logwood and rhatany; diospyri fructus officinal in pharm. like catechu [q.v.]. Fruit eaten by natives when ripe, but not palatable; leaves eaten as vegetable [keeray]. Juice of fruit used for paving boat seams, and preparing nets and lines; on malabar coast employed by carpenters [tutchan] as glue; the glutinous pulp surrounding seeds is used in binding books, as obnoxious to insects; fruit and bark give a dye [shauyam]. Wood grey, moderately hard, close-grained; used for building; gives masts and yards to country vessels in ceylon.——*Black gaub* (کالی لکری - kálílakrí, Dec.). Same as Malabar black wood.——*Chinese gaub* (ولایتی گاب - viláitígáb, Hind.). Hind. from (viláití, hind. foreign + gáb, hind. diospyros embryopteris,

pers.). Title otherwise Chinese date plum, Japan date plum, Japanese keg-fig. Botanically Diospyros [indian ebony] kaki, linn. f., ebenaceæ [vricsham, 83]. Alias Diospyros chinensis; Embryopteris kaki. Fruit about size of large apple [seb], with twin almond-like [bandam] stones in the centre; rind a rich ruddy crimson in texture resembling, but rougher than, that of the peach [shaft auloo]; rather disagreeable odour; flavor suggestive of over-ripe and very mellow apple, not unpalatable; preserve made from it by the chinese.——*Forest gaub* (तिम्बुरणि - timburani, Mahr.; بن گاب - bangáb, Hind.; ಜಗಲಗಂಟಿ - jagalaganti, Can.; ఎర్రగొడ - erragoda, Tel.; வக்கணைமரம் - vakkanaimaram, Tam.). Hind. from (ban, hind. forest + gáb, hind. diospyros embryopteris, pers.). Can. from (jagala, can. fight + gantu, can. knot). Tel. from (erra, tel. red + goda, tel. the tree); sylvatica being tellagoda. Tam. from (ve, tam. hard + kanai, tam. closeness + maram, tam. tree). Can. also (goindú); (kálagoindú); (balkuniki). Tel. also (kákiulimera), meaning crow + nirvala, cratæva religiosa, forst., from similar bark and wood, but darker; (nallaurimeda), meaning black nirvala; (nallaulimera), meaning same; (muççitanki); (muççitunki); (muççitinki); (michatumurra); (kondadorus); (vekkana). Title otherwise Goindoo, Mottled ebony, Vuckanay, Yerragoda. Botanically Diospyros [indian ebony] montana, roxb., ebenaceæ [vricsham, 83]. Alias Diospyros cordifolia, goindu, orixensis, punctata, regulosa; goindu from canarese. Leaves ovate-acute, obtuse at the base, smooth, membranaceous; racemes reflexed, nearly twice as long as the petiole; males five to six-flowered, hermaphrodites one-flower; bracts and lobes of the calyx ovate-acute, ciliated; corolla in the males twice as long as the calyx; stamens the length of the tube; ovary globose, smooth; flowers small, green, fragrant; flowering in march and april. Small tree, common in plains and about the foot of mountains in dry localities throughout presidency. Pulp of fruit is edible. Wood dark-brown, mottled, hard and close-grained, small but useful for cabinet work; does not bear exposure.——*Small gaub* (చిట్టతుమికి - chittatumiki, Tel.). Title from size. Same as Sweet gaub.——*Sweet gaub* (काकतिन्दुक - kákatinduka, San.; تومل - túmal, Hind.; میٹھا تیندو - míthátendú, Dec.; ತಿಂಬುರಣಿ - timburani, Can.; చిట్టతుమికి - chittatumiki, Tel.; କେନ୍ଦୁ - kendhu, Oor.). Title from taste of fruit. San. from (káka, san. crow + tinduka, san. diospyros embryopteris, pers.); from jet black heart-wood. Dec. from (míthá, hind. sweet + tendú, hind. diospyros embryopteris, pers.). Tel. from (chitti, tel. small + tumiki, tel. diospyros). Title otherwise Toomal tree. Botanically Diospyros [indian ebony] tomentosa, r., ebenaceæ [vricsham, 83]. Alias Diospyros exsculpta. Branchlets, peduncles and flowers rusty-tomentose; leaves alternate and opposite, broad-elliptic, especially tomentose below; peduncles of the male flowers the length of the petiole, three-flowered at the apex; calyx campanulate, acute at the base, four to six-lobed at the apex; lobes acute, erect; female flowers solitary, short-pedicelled; calyx deeply four to six-cleft; lobes ovate-acute, reflexed at the margin outwards, somewhat winged; tube of the corolla hairy outside; flowers small, whitish; flowering in march and april. Found on western ghauts [q.v.]; when ripe the berries are yellowish, and are filled with a soft, yellow, sweetish, astringent pulp, eaten by natives; gives an ebony [q.v.].

GAUD (గాడు - gádu, *Tel.*). Personal singular suffix, means fellow. Very common bird second term. Ex.:—Yunx torquilla (medanuligádu), neck + twist + fellow. See gloss. paragraphs. ——*Gauroo* (గారు - gáru, Tel.). Plural of gaud. Added to any name as a title of honor [avergal]. Dora gauroo is a gentleman or zemindar [q.v.]. Tally gauroo is a mother [maryauday, peyar, sahib].

GAUD (കാട് - kátu, *Mal.*; காடு - kádu, *Tam.*). Forest. Suffix in place names; as Maungaud, meaning mango forest [caud].

GAUJAR (गर्जर - garjara, *San.*; गासर - gásara, *Mahr.*; جزر - jazar, *Ar.*; زردک - zardak, *Pers.*; گاجر - gájar, *Hind.* and *Dec.*; ಕೆಂಪುಮುಲ್ಲಂಗಿ - kempumullangi, *Can.*; గజ్జరగడ్డ - gaddzaragadda, *Tel.*; மஞ்சள்முள்ளங்கி - mañjalmullangi, *Tam.*). Title from deccany. San. from (garj, san. to call out) [lussoon]. Ar. from sanscrit. Pers. from (zard, pers. yellow); from color of tuber. Hind. from sanscrit. Can. from (kempu, can. red + mullangi, can. raphanus sativus, linn.). Tel. from (gájar, hind. carrot + gadda, tel. root). Tam. from (mañjal, tam. yellow + mullangi, tam. radish); from color of tuber. San. also (griñjana), meaning roaring [ganjah, kinnab, lussoon]; (shikhámúla), meaning top-knot + root; from root having a tuft of leaves. Tel. also (pítikanda), meaning dung + yam, amorphophallus campanulatus, blume, from smell; (pattsamullangi), meaning yellow + radish. Tam. also (kárattukkizhangu), meaning carrot yam; (káççarakkizhangu), from hindostany. Title otherwise Carrot, Dung yam, Hair-knot root. Botanically Daucus carota, linn., umbelliferæ [vricsham, 67]. Seeds are medicinally nervine tonic, roots refrigerant and alterative; seeds boiled with honey [shahad] and fermented, produce spirituous liquor; roots familiar as food; the form here cultivated is hardy and acclimatised, but exceedingly coarse, with almost green roots; no other common species here.

GAULY (గాలి - gáli, *Tel.*). Wind [vayoo]. Suffix in place names; as Yeedagauly, meaning storm + wind.——*Gaulicondah* (గాలికొండ - gálikonda, Tel.). From (above + konda, tel. hill).—"*a*" Mountain; Kurnool dist., Nundiaul tal.; lat. 15° 26′: long. 78° 49′; from Kurnool E.S.E. 54 miles; from Nundiaul E.S.E. 19¾ miles. Highest point of Nundicanama pass. Railway passes under it by tunnel.—"*b*" Hills; Vizagapatam district, Srungavarapoocote division. A long series of lofty humps and saddles forming one of highest portions of Eastern ghauts [q.v.]. The summits are of gneiss and syenite, capped with laterite [q.v.] and black mould. They are easy of access. The two highest peaks reach a height of 5,345 and 5,287 feet respectively. A good cart-road runs up to Anantagherry 6 miles from the top and 19 miles from the plains, where the Maharajah of Vizianagram has a thriving coffee [q.v.] plantation extending over about 700 acres. The climate is temperate all the year round.

GAUM (گاؤں - gáun, *Hind.*). From (gráma, san.). A village [gaon, graumam]. Suffix in place names; as Belgaum, meaning cave + village.

GAUNAM (चक्र - chakra, *San.*; گھانا - gháná, *Hind.*; ಗಾಣ - gána, *Can.*; గానుగ - gánuga, *Tel.*; ചക്ക് - chekku, *Mal.*; காணம் - kánam, *Tam.*). Title from hindostany. San. from (kram, san. to go); that which goes round. Hind. from (han, san. to crush) [ghanam, ghantay]. Can., tel. and tam. from hindostany. Mal. from (chakra, san. wheel). Tam. also (shekku), corruption of sanscrit. Oil-mill. The following is the general way of extracting oils [yennay] from the mill:—The seeds, whether gingelly [q.v.], castor [aumanac], ippa [common mohwah], cocoanut [q.v.], margosa [neem], &c., are first sifted, and sand and stones are removed. Then they are thrown into the mill, a large quantity at a time. When the mill has been worked for an hour, and the seeds are crushed so that the husk separates from the seed, jaggery [q.v.] and water are added to the mass. The mill is then worked again for some time, when oil oozes out. When it comes out in large quantities it is baled out by wooden ladles [agappay], and when in small quantities it is removed by brushes made of feathers. Castor seeds are first soaked in hot water for three-quarter of an hour; this and an equal quantity of raw seeds are then thrown into the mill. The cocoanut, if soft, is first dried. Margosa seed is first husked [aulay].——*Gaundla* (గాండ్ల - gándla, obl., Tel.). Corrupt oblique plural form of (gánuga), oil-mill; and so used in anglo-indian for the caste. Oil-monger caste. The corresponding terms are:—Hind. telee, Can. gauniga, Mal. checkaula, Tam. vauniyan. Closely resemble the Tamul, but these use only one bullock to work the mill, while Vauniyar use two. They are therefore usually known as Wonteddoo gaundlas. Numbers some 100,000. See vol. II, 227 [jauty]. Distinguish from gowndla [q.v.].——*Gauniga* (ಗಾಣಿಗ - gániga, Can.). Means oilmill-man. Oil-monger caste. The corresponding terms are:—Hind. telee, Tel. gaundla, Mal. checkaula, Tam. vauniyan [jauty].——*Gaunooga pindy coora* (గానుగపిండికూర - gánugapindikúra, Tel.). Oil-mill + cake + pot herb; from being cooked with oil cakes from cocoanut [q.v.] or sesamum [gingelly]; cf. Tranquebar gendarussa. Plant name common to:—Corchorus acutangulus; Melochia corchorifolia. See gloss. paragraphs.

GAUR (കാര - kára, *Mal.*). From (kri, san. to do). Doer, agent; personal suffix as Altigaur, meaning measurement + doër, measuring officer [caur, gar].

GAUZOO (ಗಾಜು - gáju, *Can.*; గాజు - gádzu, *Tel.*). From (kácha, san. glass). Glass bracelet, substituted by the poor for metallic ornaments [nagay, zewar]. The following is the mode of manufacture. Round pits are dug, and fuller's earth of the particular kind [gauzoo sowdoo, pooneer, valayal ooppoo] suitable for making bracelets is heaped near them. Some of the earth is thrown into one of these pits, and water sufficient to stand one span deep is poured over. One or two persons then get into the pit and stir the water and the earth together for half an hour. After two hours the water gets clear, the sand and other heavy substances going to the bottom. This clear water is taken out and poured into the second pit. The same process as in the first pit is repeated in the second and the third pits. The mud which is precipitated between the clear water on the top and the sand at the bottom of the third pit, is taken out and poured upon mats spread near the pits. Some more earth is thrown into the pit and a sufficient quantity of water is mixed with it. The clear brackish water at the top is taken out and mixed with the mud on the mats. It is then left to dry. This last process is done for ten days successively. Four baskets of mud dried in this manner gives ten baskets of dry earth. A large furnace having been previously prepared, numerous earthen pots or crucibles are filled three quarters full with the prepared earth, and placed in piles on the furnace without actually touching it. The crucibles are then closed above with clay. Fire is kept up in the furnace for a night. The earth in the pot melts and turns into a hard black mass, settling down to bulk of half the pot. Over this black mass an incrustation of salt half an inch thick is formed, which is removed. The pots are then taken out of the furnace and broken, and the potsherds are separated from the hard mass. All this is done outside the village. The remaining

work is carried on in the village. A small furnace with six openings is prepared, and potsherds are placed above it without touching the fire. The hard mass above referred to is broken into small pieces and thrown into these potsherds. As it melts, it is stirred with a long steel rod, so that some of it sticks round the end of the rod. So much of the substance as is necessary for making one bracelet is taken out by the steel rod in this manner; and the rod is tapped by another iron instrument. By this process a hole is formed in the substance sticking to the rod. This rough bracelet is taken off the rod, attached to a mould, and formed into a bracelet.

GAYAUL (गयाळ - gayála, *Mahr.*). From (gayál, hind. deserted). Land unfit for cultivation [beed, carambay, gheiradah].

GAYETY (గయెతి - gayeti, *Tel.*). A sub-division of the Gond language [bhaushay, gond]. See vol. I (38).

GAZELLE (غزال - ghazál, *Ar.*). Only the Ravine-deer here.

GEER (گیر - gír, *Hind.*). From (giraftan, pers. to seize). Suffix denoting agent; as Jehaungeer, the world seizer.

GELDRIA (பழவேர்க்காட்டுக்கோட்டை - pazhavérkkáttukkóttai, *Tam.*). Name of the Dutch fort of Poolicat.

GENDAH (गण्ड - ganda, *San.*; گینڈا - gendá, *Hind.*; ఖడ్గమృగము - khadgamrigamu, *Tel.*; വാൾപുലി - válpuli, *Mal.*; காண்டாமிருகம் - kándámirugam, *Tam.*). Tel. from (khadga, san. sword + mriga, san. animal). Tam. from sanscrit. Rhinoceros. Tusker, or male elephant [comban] with long tusks [dant]. Distinguish from Gendah under Gandh.

GENDARUSSA (गन्धरस - gandharasa, *San.*). From (gandha, san. fragrance + rasa, san. juice) [gandh]; from leaves. Botanically the Justicia genus, acanthaceæ [vricsham, 101]. Herbs or shrubs occurring in tropical and sub-tropical regions; flowers red. The species best known to the natives are shown below. Other s. indian species indigenous or naturalized are:—betonica, bivalvis, diffusa, glabra, glauca, montana, nilgherrensis, quinqueangularis, simplex, wynaadensis.——*Common gendarussa* (नीलनिर्गुण्डी - nílanirgundí, San.; कालेनिगुण्डु - kálónigundu, Conc.; اثلق اسود - aslakiaswad, Ar.; پنجنگشت سیاه - panjangashtisiyáh, Pers.; اودی سنبالو - údísambhálú, Hind.; کالی سنبالی - kálíshambálí, Dec.; ಕರಿನೆಕ್ಕಿಗಿಡ - karinekkigida, Can.; ಕರುನೆಕ್ಕಿ - karunekki, Too.; నల్లవావిలి - nallavávili, Tel.; വാതക്കൊടി - vátakkoti, Mal.; කළුවරණිය - kaluvaraniya, Singh.; கருநொச்சி - karunoççi, Tam.). San. from (níla, san. blue + nirgundí, san. notchy, vitex negundo, linn.) [water notchy]. Conc. from sanscrit. Ar. from (aslak, ar. vitex negundo, linn. + aswad, ar. black). Pers. from (panjangasht, pers. vitex negundo, linn. + siyáh, pers. black). Hind. from (údí, hind. blue + sambhálú, hind. vitex negundo, linn.). Dec. from (kálí, hind. black + shambálí, hind. vitex negundo, linn.). Can. from (kari, can. black + nekkigida, can. the plant). Too. from (karu, too. black + nekki, too. the plant). Tel. from (nalla, tel. black + vávili, tel. vitex trifolia, l.). Mal. from (vátam, mal. rheumatism + koti, mal. creeper), from leaves and root being prescribed in rheumatism. Singh. from (kalu, singh. black + varaniya, singh. shrub, hedyotis fruticosa, linn.). Tam. from (karumai, tam. blackness + noççi, tam. vitex negundo, linn.). San. also (krishnanirgundí), meaning black notchy; (krishnasurasa), meaning black notchy. Hind. also (nílínargandí), from sanscrit. Can. also (naççukadde); (karelakkigida), meaning black + the plant. Tel. also (nallanoççili), meaning black + the plant, vitex trifolia, linn.; (nélavávili), meaning ground + vitex trifolia, l.; (addasaramu) [adhatoday]. Mal. also (vátankolli), meaning rheumatism destroyer; (karinoççil), meaning black notchy. Tam. also (vádákkodi), meaning ever fresh + creeper; from dark leaf ever green. Title otherwise Black notchy, Willow-leaved justicia. Botanically Justicia [gendarussa] gendarussa, linn., acanthaceæ [vricsham, 101]. Specific name from (gandharasa, san. fragrant juice). Alias Gendarussa vulgaris. Shrub, 3-4 feet; leaves opposite, lanceolate, elongated; branches numerous, long, and straggling; flowers in whorls on terminal spikes; upper lip undivided; flowers pale, greenish white, sparingly stained with purple; flowers during wet season. In gardens it is usually seen in a stunted form, as it is kept closely cut; the young shoots have a smooth green or purple bark; from the joints, which are somewhat tumid, spring secondary shoots; leaves and tender stalks have, when rubbed, a strong, not unpleasant, smell; grows in waste places as well as cultivated; native of malay islands. Leaves in infusion given internally in fevers; also as a bath; externally juice of leaves administered in coughs to children, and mixed with oil as embrocation in glandular swellings of neck and throat; mixed with mustard-seed [rayaun] is a good emetic; natives put leaves in a bag with common salt [ooppoo], and warming them apply externally in diseases of the joints; leaves scattered amongst clothes to preserve from insects [poochy].——*Coromandel gendarussa* (ನೆಲಬೇವಿನಗಿಡ - nelabévinagida, Can.; నాగపుట్టచెట్టు - nágaputtachettu, Tel.; මානයි - mánayi, Singh.; நிரைபூத்தி - niraibútti, Tam.). Can. from (nela, can. earth + bévinagida, can. the plant, melia azadirachta, linn.). Tel. from (nága, san. cobra + putta, tel. ant hill + chettu, tel. tree). Tam. from (nirai, tam. completeness + pú, tam. to flower); from flowering all the year. Singh. also (mani). Tam. also (kódagasálai); (áram); cf. mountain ebony. Botanically Justicia [gendarussa] procumbens, linn., acanthaceæ [vricsham, 101]. Alias Justicia ascendens; Rostellularia adenostachya, procumbens. Shrub, 7-8 feet; stem spreading, jointed, five striated, often rooting at the joints; leaves linear-lanceolate, opposite, subsessile, entire, a little downy; spikes terminal, erect, four-sided; flowers opposite, decussate, rose-colored; upper divisions of calyx very minute; tube of corolla short, upper lip erect, two cleft, under lip broad, three-parted; capsule four-seeded, seeds two in each cell; flowering nearly all year; very common on pasture ground on coromandel coast. Juice of leaves squeezed into eyes in ophthalmia; has a faintly bitter, disagreeable taste, and is used as a substitute for fumaria, the true pitpapra [q.v.].——*Tranquebar gendarussa* (पिण्डि - pindi, San.; ಕಡ್ಡಿಯರಕಿನಗಿಡ - kaddiyarakinagida, Can.; పిండికొండ - pindikonda, Tel.; தவசுமுருங்கை - tavasumurungai, Tam.). San. from (pinda, san. cake). Can. from (kaddi, can. small stick + eraku, can. to bow + gida, can. plant). Tel. from (pindi, tel. flour + konda, tel. hill). Tam. from (tavasi, tam. devotee + murungai, tam. horse-radish tree, moringa pterygosperma, gærtn.); tavasipillay is a cook boy attending a gooroo [q.v.]. Tam. also (punnákkuppúndu), meaning oil-cake + plant, cooked with sesamum oil-cake [ponnauk]. Title otherwise Pindy conda, Ponnauk poond, Tranquebar adhatoda, Tranquebar justicia. Botanically Justicia [gendarussa] tranquebariensis, linn., acanthaceæ [vricsham, 101]. Alias Adhatoda tranquebariensis; Gendarussa tranquebariensis; Justicia parvifolia. Adhatoda from tamul. Fruticulose, hoary-pubescent; leaves small, roundish; bracts orbiculate, retuse, bracteoles equalling the calyx, linear; flowers axillary, solitary, ascending on a terminal spike, yellowish, purple-dotted. Juice of leaves cooling and aperient, prescribed for children in small-pox; bruised leaves applied to blows and other external injuries.

GENTOO (جنتو - jantú, *Hind.*). From portuguese gentio, a gentile or heathen. The name formerly applied by europeans to the natives of the country, especially to the Teloogoo [q.v.] people, for when the Portuguese arrived the Teloogoo raj [q.v.] of Vijianugger [q.v.] was dominant over great part of the peninsula. Cf. Malabar for tamul.

GERSOPPAH (ಗೇರುಸಪ್ಪೆ - gérusappe, *Can.*; gersoppa, *Mys. Gov.*). From (géru, can. marking-nut plant, semecarpus anacardium, linn. f. + soppu, can. leaf); from the village with the trees. Falls in Shimoga district, Mysore, on the Sharauvaty river [aroovy, sharauvaty].

GEUNG (गोधूम - gódhúma, *San.*; गहूं - gahúm, *Mahr.*; गवु - gavu, *Conc.*; حنطه - hintah, *Ar.*; درخت گندم - darakhtigandum, *Pers.*; گیہوں کا پیڑ - gehúnkáper, *Hind.*; گیہوں کا جھاڑ - gehúnkájhár, *Dec.*; ಗೋಧಿ - gódhi, *Can.*; ಗೋದಿ - gódi, *Too.*; గోధుమ - gódhuma, *Tel.*; ଗୋମ - gómo, *Oor.*; കോതമ്പം - kótampam, *Mal.*; තිරිඟු - tíringu, *Singh.*; கோதுமை - kóthumai, *Tam.*). Title from deccany. San. from (gudh, san. turn, as in a mill); from being used as flour. Mahr. from sanscrit. Ar. from (hanata, ar. red); from color of seeds. Pers., &c., from sanscrit. San. also (mléchhabhójana), meaning barbarian's food; (akshata), meaning unbroken; (sumana), meaning beautiful, pleasant; (dhavala), meaning white; cf. etymology of wheat. Can. also (javegódhi), meaning hordeum vulgare + wheat. Tam. also (várgóthumai), meaning tail + wheat; properly barley [jow]; (kóthi), by corruption. Title otherwise Wheat. Botanically Triticum vulgare, villars, graminaceæ [vricsham, 156]. Alias Triticum æstivum, aristatum, compositum, durum, hybernum, sativum, turgidum. Cereal not much cultivated in s. india. Spike tetragonal, imbricated; rachis tenacious, spikelets usually four-flowered; glumes ventricose, ovate, truncated, mucronate, compressed under the apex, round-convex at the back; nerve prominent; flowers awned or muticous; fruit free. Flour white, heavy; starch or amylum from the seed friable, very white, in an adherent powder, when compressed between the fingers emits a peculiar sound. Wheat is rich in solids, and contain from 1 to 2 per cent. of soluble albumen, 8 to 12 per cent. of gluten, and 60 to 70 per cent. of starch; it is deficient in fat, also in the antiscorbutic salts; when ground it consists of two separable substances, the husk called the bran and the inner starchy portion called flour; the mixture of the two is meal; 504 lb. of wheat should give 392 lb. of flour. Internally flour and water is used as chemical antidote in poisoning by the preparations of mercury [rasam], copper [taumram], tin [tagaram], zinc [tootnaug] and silver [velly], and by iodine. Use of wheat as article of food here chiefly confined to europeans and east indians. There are two varieties classed chiefly according to the consistency of the grain, hard or soft; each of these two classes may be grouped according to the color of the grain in being white or red; and these again may be further sub-divided according to the presence or absence of bristles, which makes them known as bearded or beardless. Cf. Boosam, Rolang, Soojee.

GHAFFAR (غفار - ghaffár, *Hind.*). From (ghafara, ar. to cover). One who pardons; an epithet of God [allah]. Common alam; as Ghaffar ally, double alam; Ghaffar khan, alam +

pataun alaumat [ism].——*Ghafoor* (غفور - ghafúr, Hind.). From (ghafara, ar. to cover). Forgiving; an attribute of God [allah]. Common alam; as Ghafoor beg, alam + moghul alaumat [ism].

GHANAM (घन - ghana, *San.*). From (han, san. to strike) [gaunam]; pressed, dense, heavy. Mass in mathematics. Solid body in geometry. Cube of a number in arithmetic. Ghana moolam is cubic root and ghana palam is contents of a cube or solid [ganitam, shastram].——*Ghanta beejam* (घण्टाबीज - ghantá-bíja, San.; ఆడవి ఆముదము - adaviámudamu, Tel.). From (ghantá, san. bell + bíja, san. seed); from rattling of dry capsules. Tel. from (adavi, tel. jungle + ámudamu, tel. castor-oil plant, ricinus communis, linn.). Botanically the Croton genus, euphorbiaceæ [vricsham, 118]. Trees or shrubs, rarely herbs; leaves alternate, rarely opposite or whorled; flowers solitary or clustered on the axis of a terminal raceme with small bracts; fruit consists of three carpels separating one from the other, and each containing one seed. The species best known to the natives are:—aromaticus [croton lac tree], oblongifolius [devil's goad], tiglium [jamalgota]. Other s. indian species indigenous or naturalized are:—Cascarilla, bark occurs in short, rolled fragments, tonic; Caudatus, leaves applied as a poultice to sprains; Malabaricus, tree 20–30 feet; Reticulatus, small shrub, western moist forests; Scabiosus, very silvery appearance.——*Ghantaravam* (घण्टारव - ghantárava, San.; ಗಿಲಿಗಿಜಿ - giligiji, Can.; గిలిగిచ్చ - giligittsa, Tel.; கிலுகிலுப்பை - kilugiluppai, Tam.). San. from (ghantá, san. bell + rava, san. sound); from rattle of dry pods. Tel. from (gilaka, tel. rattle + gittsu, tel. to pinch). Tam. from sound of seeds in dry legumen. Can. also (gijigiji). Tel. also (gilakachettu), meaning rattle + tree; (pattsadzanumu), meaning green + hemp, crotalaria juncea, linn.; (telladzanumu), meaning white + hemp; (pillivattatíga), meaning cat + testicle + creeper, from fruit; cf. common cowitch and shakaukool. Tam. also (elippidukkan), meaning rat + testicle, from pod; (elippori), meaning rat + crackle; (mínañju), meaning fish + poison [indian berry]; (míngolli), meaning fish killer; (narimarutti), meaning fox + frightener. Castanet plant, Rattlewort. Botanically the Crotalaria genus, leguminosæ [vricsham, 48]. Herbs or shrubs of very various habit and vestiture; leaves simple or trifoliolate; flowers in terminal or leaf-opposed racemes, often showy; pod sessile or stipulate, straight, linear or oblong, turgid, continuous within, usually many-seeded. The species best known to the natives are:—albida [hill giligitcha], hirsuta [black giligitcha], juncea [sunn], laburnifolia [large giligitcha], linifolia [black hill giligitcha], orixensis [stunted giligitcha], quinquefolia [water giligitcha], retusa [short giligitcha], sericea [silky giligitcha], trifoliastrum [nauga giligitcha], verrucosa [forest giligitcha]. Other s. indian species indigenous or naturalized are:—Barbata, erect; flowers few, yellow; Bifaria, procumbent; Biflora, prostrate; Clavata; Digitata, somewhat shrubby; Evolvuloides, perennial; Formosa, erect; Fulva, shrub, mysore, neilgherries; Globosa, prostrate; Grahamiana, shrub; Heyneana, suffruticose; Hirsuta, perennial; Hirta, suffruticose; Leschenaultii, erect; Lunulata, suffruticose; Madurensis, suffruticose; Medicaginea, suffruticose; Mysorensis, suffruticose; Nana, common, branching from the base; Notonii, shrub; Obtecta, suffruticose, erect; Paniculata, shrub, flowers large; Prostrata, suffruticose; Pulcherrima, flowers large; Pusilla, small annual; Ramosissima, suffruticose; Rigida, sandy soil; Rubiginosa, low shrub; Salicifolia, herbaceous, erect; Semperflorens, herbaceous; Sessiliflora; Speciosa, erect; Subperfoliata, suffruticose; Willdenowiana, shrub.——*Ghantay* (घण्टा - ghantá, San.; گھنٹا - ghantá, Hind.). From (han, san. to strike) [gaunam]. A bell or gong [ghariyaul, ghurry, gong]. European hour [caulam].

GHAR (گھر - ghar, *Hind.*). House [griham].——*Gharbaury* (گھرباری - gharbárí, Hind.). From (above + bár, hind. premises + agent suffix). The head of a house [carnaven].

GHAREEB (غریب - gharíb, *Hind.*). From (ghariba, ar. to retire). Poor. Ghareebnawauz, from (nawáz, pers. protector) is friend of the poor, expression addressed to a European official. Ghareeb parwar salaumat is May you be in peace, O patron of the poor; a phrase in letters.

GHARRY (گاڑی - gárí, *Hind.*). A carriage. Distinguish from Ghurry [q.v.].

GHASSAUL (غسال - ghassál, *Hind.*). From (ghusl, ar. ablution). One who washes the dead before burial [janauza].

GHAT (घट् - ghat, *San.*). To unite.——*Ghadiya* (घटिका - ghatiká, San.; ಘಳಿಗೆ - ghalige, Can.; ఘడియ - ghadiya, Tel.). From (ghata, san. a water-jar).—"*a*" Indian hour; time taken for a jar to fill up and sink. Although the lunar day [tity] is of variable length, its sub-division the Indian hour does not in civil practice vary, but consists precisely of 24 English minutes. Natives measure this by an empty vessel [ghurry] of a certain size placed in water. There is a small hole at the bottom, through which water enters; and the size both of hole and vessel is so proportioned that, if care be taken, the vessel sinks at the termination of every 24 English minutes. The ghadiya is divided sexagesimally into vighadiyas, params and soorams. The following is scale:—60 vighadiyas = 1 ghadiya; 60 ghadiyas = 1 dinam or day [caulam, 4, 5a]. Approximate actual value, 1 ghadiya = 24 English minutes. 2½ Indian hours make one English hour. Same as San. ghaticam [caulam, 3], dandam [caulam 6], naudy, and sometimes calay, Hind. ghurry, Can. ghaligey, Tam. naazhy [caulam, 1].—"*b*" The ghadiya referring to time must be distinguished from an arc [chaupam] of the same name, which divides a lunar mansion or nacshatram [q.v.] of 13° 20′ into sixty parts, sub-divided likewise sexagesimally into Vighadiya, &c.——*Ghariyaul* (گھڑیال - ghariyál, Hind.). From (ghatí, san. the indian hour of 24′). The plate or gong [q.v.] on which hours are struck with a wooden mallet [ghantay, ghurry].——*Ghatam* (घट - ghata, San.). From (ghat, san. to unite). Means a pot [chatty]. Mud pot used as a drum [paray].——*Ghurry* (घटी - ghatí, San.; گھڑی - gharí, Hind.; ఘడియ - ghadiya, Tel.; கடி - kadi, Tam.). From (ghat, san. to unite); water jar. A floating cup with a small hole in it, adjusted so that it fills and sinks in a fixed time. Also the gong [q.v.] on which the time so indicated is struck. Hence also a clock or watch. Also the sixtieth part of a day and night [ahorautram], same as ghadiya [q.v.] equal therefore to twenty-four minutes, which was in old Hindoo customs the space of time indicated by the clepsydra just mentioned. In Anglo-Indian usage the word is wrongly employed for an English hour. See vol. I, 609 [caulam, ghantay, ghariyaul].

GHATT (గట్టు - gattu, *Tel.*). A mound of earth; suffix in compound as Caraghatt, meaning embankment + mound [gatt].

GHAULIB (غالب - ghálib, *Ar.*). From (ghaliba, ar. to overcome). Powerful. Lacab of Ally [q.v.]. Common alam; as Ghaulib beg, alam + alaumat [ism].

GHAUS (तृण - trina, *San.*; گھاس - ghás, *Hind.*; ಹುಲ್ಲು - hullu, *Can.*; గడ్డి - gaddi, *Tel.*; പുല്ല് - pullu, *Mal.*; புல் - pul, *Tam.*). Fodder [ghiyah, grausam]. There is a considerable number of plants belonging to the Cyperaceæ [vricsham, 155], and a large number of Graminaceæ [vricsham, 156] consumed by cattle [maud], &c., but as a rule the grasses of s. india are very coarse, and do not contain much nutriment. The native cultivators do not specially cultivate grasses, but give their bullocks [maud] and cows [pashoo] the straw [soppa] of their grain crops, so long as it lasts. For several months in the year the cattle are turned out into bare fields, or driven into the neighbouring jungle. The best grass in s. india, and the one chiefly used for feeding horses [ghorah], is hurrially [q.v.] grass or Cynodon dactylon, pers., graminaceæ. This is capable of withstanding great drought, and when manured and irrigated yields a very large return of green grass or excellent hay. The following are two key-lists of the principal grasses, pulses [dholl] and millets [q.v.] of s. india whose straw, stalks or haulms, are in general use for feeding cattle; further information must be traced in the glossary paragraphs through the small-type cross-references at the end of this volume; see also vricsham, 7, for the method of expressing the products, &c., of the plants in the dravidian languages.—"*a*" Andropogon contortus, spear grass; Andropogon martini, roussa grass; Andropogon muricatus, cuscus; Andropogon schœnanthus, lemon grass; Aristida setacea, broom grass; Chloris barbata, trailing grass; Cynodon dactylon, hurrially grass; Cyperus pangorei, creeping grass sedge; Cyperus rotundus, common sedge; Dolichos biflorus, madras horse-gram; Dolichos lablab, country bean; Eleusine coraçana, raggy; Eleusine indica, crab grass; Eragrostis bifaria, basket grass; Eragrostis ciliata, wild coraly; Eragrostis cynosuroides, darbhay; Eragrostis plumosa, shaumay grass; Festuca indica, cleft grass; Hordeum vulgare, barley; Leersia hexandra, wild dholl; Oryza mutica, mountain paddy; Oryza sativa, paddy; Panicum burmanni, wild hurrially; Panicum colonum, matted purple grass; Panicum crus galli, wild darbhay; Panicum egyptiacum, red shaumay; Panicum erucæforme, small raggy; Panicum fluitans, paddy-field grass; Panicum frumentaceum, large shaumay; Panicum glaucum, coraly; Panicum grossarum, stalk grass; Panicum indicum, black tinay; Panicum italicum, italian millet; Panicum javanicum, surprise grass; Panicum jumentorum, guinea grass; Panicum miliaceum, little millet; Panicum miliare, shaumay; Panicum prostratum, wild white shaumay; Panicum remotum, wild varagoo; Panicum repens, ginger grass millet; Panicum stagninum, hedge-hog grass; Panicum verticillatum, sticky grass; Paspalum scrobiculatum, varagoo; Pennisetum spicatum, spiked millet; Phaseolus mungo, green gram; Phaseolus mungo, var. radiatus, black gram; Phaseolus trilobus, field gram; Pommereulla cornucopiæ, ant grass; Saccharum officinarum, sugar-cane; Saccharum spontaneum, naunal; Sorghum vulgare, cholum; Typha elephantina, bulrush; Zea mays, maize.—"*b*" Ant grass, pommereulla; Barley, hordeum; Basket grass, eragrostis; Bean, dolichos; Broom grass, aristida; Bulrush, typha; Cholum, sorghum; Cleft grass, festuca; Coraly, eragrostis, panicum; Crab grass, eleusine; Cuscus, andropogon; Darbhay, eragrostis, panicum; Dholl, leersia; Ginger grass millet, panicum; Gram, dolichos, phaseolus; Guinea grass, panicum; Hedge-hog grass, panicum; Hurrially, cynodon, panicum; Lemon grass, andropogon; Maize, zea; Millet, panicum, pennisetum; Naunal, saccharum; Paddy, oryza; Paddy-field grass, panicum; Purple grass, panicum; Raggy, eleusine, panicum; Roussa grass, andropogon; Sedge, cyperus; Shaumay, eragrostis, panicum; Spear grass, andropogon; Stalk grass, panicum; Sticky grass, panicum; Sugar-cane, saccharum; Surprise grass, panicum; Tinay, panicum; Trailing grass, chloris; Varagoo, panicum, paspalum.

GHAUT (घट्ट - ghatta, *San.*; گھاٹ - ghát, *Hind.*; ఘాటు - ghátu, *Tel.*). Title from hindostany. San. from (ghatt, san. to go). Steps up from a river; hence a mountain pass [capama, canavye]; hence in particular the mountain ranges themselves parallel to the western and eastern coasts of the peninsula, through which the ghauts lead from the tablelands above down to the coast and lowlands. See also Balaghaut, Talaghaut, and Payeenghaut. Ghautauny, meaning relating to ghauts, is a toll levied on crossing rivers or hill passes.——*Eastern ghauts* (उदयगिरि - udayagiri, San.; مشرقی گھاٹ - mashrakíghát, Hind.; తూర్పుకనమలు - túrpukanamalu, Tel.; പൂർവ്വഘട്ടം - púrvvaghattam, Mal.; கிழக்கணவாய்மலை - kizhkkanaváymalai, Tam.). Tam. from (kízh, tam. east + kanaváy, tam. pass + malai, tam. mountain). Mal. also (pavizhádri), meaning coral + mountain; (pavizhamala), meaning same. Greek *ὀρούδια ὄρη*, from the sanscrit Veidooryam, which means the northern part of the western ghauts. Ptolemy found in indian topographical lists that the great rivers of the eastern or maesolian, Masulipatam coast rose in the Veidooryam, and having no other clue he placed them near and parallel to that coast; in fact he confused them with the eastern ghauts. The Eastern ghauts at their southern extremity are detached clusters of hills appearing at intervals. About lat. 11° 40′ they assume the character of a continuous chain, and, running along the Coromandel coast [q.v.] in a direction a little north-west of Madras, form a junction at Nagary in lat. 13° 20′, with the main ridge, which crosses the peninsula in a south-west direction to the Neilgherries. Thence they continue a northerly course and terminate in about the same latitude as their counterpart of the opposite coast. Here uniting with the Vindhya zone, which crosses the continent from east to west, they constitute one side of the triangle upon which rests the tableland of the Deccan [q.v.]. In regularity and grandeur the Eastern ghauts bear no comparison with those of Western india; and their average elevation does not exceed 1,500 feet. The intermediate tableland has consequently a gradual slope to the eastward, as indicated by the drainage of the country in that direction. All the principal rivers [aur], the Cauvery, Godavery, Kistna and Pennair, though deriving their sources from the base of the Western ghauts, find their way into the Bay of Bengal through fissures in the Eastern ghauts. With regard to geological structure granite [caroom cull] constitutes the basis of the whole range, and overlying the granite, gneiss, and mica slate that form the sides of the mountains are occasionally found clay-slate, hornblende slate, flinty slate, and primitive or crystalline limestone [choonam cull]. The surface of the level country consists of the débris of granitic rocks, as far north as the Pennair, in approaching which, the laterite [q.v.] or iron clay formation expands over a large surface. From the Kistna northward the granite is often penetrated by injected veins of trap [padicutt cull] and dykes of green stone [putchay cull]. Passing on to Vizagapatam and Ganjam, syenite and gneiss predominate, occasionally covered by laterite. Gaulicondah, 5,346 feet, is the highest peak. The Eastern ghauts form a water shed only in the extreme north. The following are the chief passes through the Eastern ghauts in alphabetical order; reference can be made to glossary titles:—Bijauya, in vizagapatam; from parvatipore to jeypore. Bullipully, on route from madras to bellary. Calingyah, in ganjam; leading from goomsoor to maliahs. Caucoola, in the nullamullays, on route from cumbum to pulnaud, kistna district. Chengam, on route from cuddalore to bangalore. Coorly, in the palcondahs. Cuttingia, in ganjam; from sooradah to cuttingia, in the maliahs. Daumalcheroo, on route from vellore to cuddapah; also called cullore pass. Dopully, in the nullamullays; from endrapully to shreegherrypaud, a roman catholic station in pulnaud; much used by people, four streams across it and a stone-built drinking-water well, not fitted for wheeled traffic. Dornaul, on route from bellary to guntoor; good metalled road. Goolcheroo, in the palcondahs; on route from vellore to cuddapah; also called soorya comauroola canama. Joty, in the nullamullays. Lutchmipore, in vizagapatam; leading from parvatipore to jeypore zemindarry. Mogily, on route from madras to bangalore; good metalled road. Moonshingy; on branch route from kimedy to goomma. Muntraula, in the nullamullays; also known as dornaul pass; from vinoocondah in kistna district to kurnool. Naicknairy, on route from madras to bangalore, near sautghur; now abandoned in favor of synigoonta ghaut. Naugapootla, in the palcondahs, on road from mysore to tripatty. Nundicanama, in the nullamullays; on route from cumbum to bellary. Panchipenta, in vizagapatam; on route from vizianagaram to kamptee. Pippalpunka, in ganjam; from gajellabady to the maliahs. Pooypany, in ganjam, from serangy to cheligodo, in the maliahs. Rampore, in the yerramalas, on route from bellary to cumbum. Raupore; between cuddapah and nellore. Royavalsa, in vizagapatam; on route from vizagapatam to jeypore. Saunipoya, in the palcondahs. Soorya camauroola; otherwise goolcheroo canama. Synigoonta; on route from vellore to bangalore near modicooppam. Taptapauny; otherwise the hot spring; in ganjam from digoopoody to lohogoody in the maliahs. Tautaparty, in vizagapatam; from madgole to jeypore zemindarry. Timmarauzpully, in the yerramalas; on route from cuddapah to kurnool. Vaimlapaud; on route from cumbum to guntoor in good order. Velgoty, in the nullamullays; from nundiaul to cumbum.——*Western ghauts* (अस्तगिरि - astagiri, San.; مغربی گھاٹ - maghrabíghát, Hind.; പശ്ചിമഘട്ടം - pashchimaghattam, Mal.; மேற்கணவாய்மலை - mérganaváymalai, Tam.). Tam. from (mél, tam. west + kanaváy, tam. pass + malai, tam. mountain). Mal. also (sahyan). See Sukhein. Greek ἀδίσαθρος, in the southern part. The northern limit is the valley of the Tapty, of which a branch from the Sahyadry mountains form the southern inclosing range, about lat. 21° to 21° 15′, long. 73° 45′ to 74° 40′, and is connected with groups which diminish in height towards the east until they sink into the tableland of Berar. The northern side of the valley of the Tapty is inclosed by the Sautpoora range. In lat. 21° 10′, long. 74°, the range turns south nearly at right angles to that which forms the south inclosing range of the valley of the Tapty. Its elevation increases as it proceeds southwards and attains its general maximum towards Coorg. South of this the ghauts join the Neilgherry group by means of the Nedoomullay range, which forms the western buttress of the Neilgherry tableland to lat. 11° 15′, long. 76° 25′, where it rises into the lofty Coondah mountains, and about 25 miles farther south terminates abruptly in high and nearly perpendicular precipices, forming the northern side of that great valley or depression, which affords an uninterrupted communication in this latitude between the eastern and western sides of the peninsula. The length of the Western ghauts, from the northern extremity of the Sahyadry mountains, forming the southern side of the valley of the Tapty, to the southern brow, joining the Coondah mountains on the north side of the Palghaut valley, is about 800 miles. The mountains rising on the south side of Palghaut valley, and which may, with some latitude of expression, be called a continuation of the Western ghauts, have considerable elevation, a spacious tableland, 4,740 feet above the sea, and peaked summits of 6,000 and 7,000 feet. The length of the chain of mountains extending from the Palghaut gap to Cape Comorin is 200 miles [travancore hills]. The Western ghauts within this Presidency range from 3,000 to 5,000 feet above sea-level on the Coorg and Wynaud slopes, with one or two peaks, ranging over 6,000 and up to nearly 8,000 feet. On the Neilgherry coondah face the average height springs up to over 6,000 feet. It falls again to about 4,000 feet and lower on the southern Neilgherry slopes, and again rises to a high altitude in the Vadamullay fringing the northern edge of the Palghaut gap. On the south edge of the gap the Tenmullay, outliers of the lofty Anamullay mountains, commence with an elevation of 4,000 to 5,000 feet above sea-level. In consequence of the excessive moisture the low tract between the ghauts and the sea is traversed by innumerable torrents, which, stagnating as they approach the coast, overspread the depressed levels and form the series of shallow lakes called by the English backwaters [cauyal]. Geologically the great core of the Western ghauts is of primary formation, inclosed by alternating strata of more recent origin, which strata however have been broken up by prodigious outbursts of volcanic rocks. In their more northern parts the overlying rocks are exclusively of the trap [padicutt cull] formation. The face towards the Concan [q.v.] is not uniformly precipitous, but consists of vast terraces with abrupt fronts, such a conformation being characteristic of this kind of rock. The trap formation terminates southward on the sea-coast in about lat. 18° and is succeeded by laterite [q.v.], a ferruginous clay, easily cut when first raised, but by continued exposure to the atmosphere becoming hard as brick [shengal]. This last-mentioned formation extends southwards as the overlying rock almost without interruption to Cape comorin, covering the base of the mountains and the narrow slip of land that separates them from the sea. About the latitude of the Neilgherries there might be expected the divergence of a great connecting cross chain, corresponding with the Himalaya and Vindhya range, and such a range as this may have been at one time above water, connecting the peninsula with the more easterly ridges. The highest hills are usually naked on their summits, and a large portion of their slopes is also free from forest. The ravines and bases of the mountains are covered with dense forest of lofty trees which abound with wild animals. The following are the chief passes through the Western ghauts in alphabetical order; reference can be made to glossary titles:—Agoomby, on route from mangalore to harihar; a good cart road. Aryancauv, on route from palamcottah to quilon, a well-made and easy cart-road. Bisley, leading from south of hassan district of mysore into south canara; an unmade ghaut fit for pack animals only. Bund, on route from mangalore to bellary, leading through the ombatmarady or nine hills; a well-made and good cart road. Carcoor, on route from calicut to seringapatam, a good cart road. Charmaudy, on the old road from vastaura to mangalore; a very steep and rough path fit for pack bullocks only; almost abandoned now in favor of the bund ghaut. Collore, on branch of route from mangalore to harihar, a fair cart road. Coottiyaudy, on route from ootacamund to cannanore; at present only fit for pack animals; a new trace in progress. Goodalore; on route from trichinopoly to quilon, a good cart road. Govardhangherry, overlooking the town of gersoppah in north canara; very steep; a rugged and devious path for pack animals. Hyderghur, on route from mangalore to harihar, a well-made and good cart road. Manaar leading from copanaury in coimbatore district to manaar in malabar; a bad road for pack animals. Manjarabad, on route from bangalore to mangalore, a well-made and good cart road. Mullore; leading from coppa talook in cadoor district of mysore

towards mangalore; at present unmade and fit for pack animals only, but it is proposed to improve it. Palghaut; a good cart road. Perambaudy, on route from seringapatam to cannanore; a good cart road. Periya, on route from seringapatam to cannanore, a good cart road. Siskal; leading from the hassan district of mysore into south canara, an unmade path fit for pack animals only. Sisparra, on route from calicut to ootacamund fit for pack animals only. Sumpaujey, on route from bangalore to mangalore, a good cart road. Tamracherry, on route from calicut to seringapatam, a good cart road.

GHAUZY (غازی - ghází, *Ar.*). From (ghazu, ar. to go against an enemy). Hero of the faith. Heroic alam; also Takhalloos; as Ghauzy beg, alam + alaumat [ism].

GHEE (घृत - ghrita, *San.*; گھی - ghí, *Hind.*; ತುಪ್ಪ - tuppa, *Can.*; నెయ్యి - neyyi, *Tel.*; നെയ് - ney, *Mal.*; நெய் - ney, *Tam.*). Title from hindostany. Hind. from (ghri, san. to sprinkle). Clarified butter. Butter [q.v.] oil. When milk or cream is briskly agitated for some time, the fat globules become aggregated into masses of butter. When boiled and strained, so as to remove the casein and nearly the whole of the water, this constitutes ghee, which has all the advantages of butter for culinary purposes, and which when pure may be kept without rancidity for an unlimited time. It is made from both buffalo's milk and cow's milk [paul]. In veterinary practice a quart bottle full lukewarm is given in colic when nothing else can be procured.

GHEIB (غیب - ghaib, *Hind.*). From (ghába, ar. to be absent). Secret.——*Gayibut* (غیبت - ghaibat, Hind.). From (ghába, ar. to be absent). Out station [mofussil]. Opposed to Huzoor [q.v.].

GHEIR (غیر - ghair, *Hind.*). From arabic. Without.——*Gheiradah* (غیرادہ - ghairadá, Hind.). From (above + adá, ar. profit). Uncultivated waste [beed, carambay, gayaul].——*Gheir cutnam* (గైరుకట్నం - gairukatnam, Tel.). From (above + katnamu, tel. present). Extraordinary cutnam [q.v.]; presents levied in zemindarry [q.v.] villages on special occasions at the marriage of the poligar [q.v.] or of his relations; opposed to Mamool cutnam.——*Gheir hauzir* (غیر حاضر - ghairházir, Hind.). From (above + házir, ar. present). Not present; especially non-appearance of the shauvy [q.v.] for the revenue inspection.——*Gheir mahdee* (غیر مہدی - ghairmahdí, Hind.). From (above + mahdí, ar. name of the last imaum). Those who disbelieve that the last imaum [q.v.] will appear at the close of the world with Jesus Christ and hold that he has already appeared and gone [soonnees, mahdee].——*Gheir mookallid* (غیر مقلد - ghairmukallid, Hind.). From (above + mukallid, ar. follower). A non-conformist. A branch of the Soonnee [q.v.] church which claims the right of private judgment in the interpretation of law and exposition of legal doctrines [wahauby].

GHERIA (කිරිය - kíriya, *Singh.*). From (kiri, singh. milk). Same as Tiger's milk.

GHERRY (गिरि - giri, *San.*; گری - girí, *Hind.*). Mountain [giry].

GHIL (گل - gil, *Hind.*). From persian. Earth [khauk, munn].——*Ghil arminy* (حجر ارمنی - hajariarmaní, Ar.; گل ارمنی - giliarmaní, Pers. and Hind.; پھول گیرو - phúlgerú, Dec.; సీమకావిరాయి - símakávirâyi, Tel.; சீமைக்காவிக்கல் - shímaikkávikkal, Tam.). Ar. from (hajar, ar. stone + armaní, ar. armenian). Pers. from (gil, pers. earth + armaní, ar. armenian). Dec. from (phúl, hind. flower + gerú, hind. ochre). Tam. from (shímai, tam. european + kávi, tam. ochre + kal, tam. stone). Armenian bole [bole]. Bolus armeniæ or Bolus orientalis of chemists. Friable earthy substance of the soap stone [sowcauracull] family; once an article of materia medica; soft, greasy to the touch; yellowish brown color. Brought from Persian gulf. Medicinally astringent; frequent household remedy, with the juice of the coriander [cassibor] plant, in erysipelas, herpes, eczema, &c.; substituted for british plumbi acetas [eeya carcand]. In times of scarcity it has been used as a mechanical substitute for food. With other ingredients, makes a red pigment [rangh]; with seeds of oval-leaved cassia [chakondah] and indigo [q.v.], dyes a nankeen color [shauyam].——*Ghil i bootah* (گل بوتہ - gilibútah, Hind.). From (bútah, pers. a crucible). Fire-clay.——*Ghil i hikmat* (گل حکمت - gilihikmat, Hind.). From (hikmat, ar. artificial). Lute; cement [cauray].——*Ghil i makhtoom* (گل مختوم - gilimakhtúm, Hind.). From (makhtúm, pers. sealed). Sealing wax [lac].——*Ghil i sarshoe* (گل سرشوئی - gilisarshoe, Hind.). From (sar, pers. head + shoe, pers. cleansing). Fuller's earth [dhoby's earth].——*Ghil i soofaid* (گل سفید - gilisufed, Hind.). From (sufed, pers. white). Chalk [sheemay choonam].——*Ghil i toorsh* (گل ترش - gilitursh, Hind.). From (tursh, pers. acid). Bi-sulphate of lime.——*Ghil i zard* (گل زرد - gilizard, Hind.). From (zard, pers. yellow). Yellow ochre [cauvy].

GHIYAH (گیاہ - giyáh, *Pers.*). Grass [ghaus]. Plant second term. Ex.:—Nardostachys jatamansi (múigiyáh), hair grass.

GHOOLAUM (غلام - ghulám, *Ar.*). From (ghalima, ar. a beardless lad). Hence a slave. Prefixed to names of the prophet, his companions, and the chief saint to form Mahomedan names. As:—Goolaum ally, the servant of ally, devotional term + alam [ism].——*Ghoolaum mahomed ghouse khan* (غلام محمد غوث خان - ghulámmuhammadghauskhán, Hind). From (above + double alam + title of honor). Last nawaub [q.v.] of the Carnatic [q.v.]. Died without issue. A.D. 1842—1855. See vol. I, 45, 46; II, 252.——*Ghoolaum rasool khan* (غلام رسول خان - ghulámrasúlkhán, Hind.). Alam + pataun suffix. Nawaub of Kurnool, who was deported to trichinopoly in consequence of a conspiracy against british government. See vol. II, 87.

GHORAH (अश्व - ashva, *San.*; घोडा - ghódá, *Mahr.*; حصان - hisán, *Ar.*; اسپ - asp, *Pers.*; گھوڑا - ghorá, *Hind.*; کودا - kuda, *Malay*; ಕುದುರೆ - kudure, *Can.* and *Too.*; గుర్రము - gurramu, *Tel.*; ଘୋଡା - ghódá, *Oor.*; കുതിര - kutira, *Mal.*; අශ්වයා - ashvayá, *Singh.*; குதிரை - kuthirai, *Tam.*). Title from hindostany. San. from (ash, san. to be able); enduring animal. Mahr. from (ghóta, san. horse). Ar. from (hasuna, ar. to defend against). Pers. from sanscrit. Hind. from (ghóta, san. horse). Malay from (ghóta, san. horse). Mal. from (kuti, mal. to jump). Singh. from sanscrit. Tam. from (kuthi, tam. to jump) [coothiray]. Equus [ashwam] vulgaris, equidæ, perissodactyla, ungulata, mammalia [sastanam, 21], of naturalists [jantoo]. Apart from the external differences between the horse and ass [gadhah], they have a structural divergence, that the horse has corns or callosities on the inner side of both fore and hind limbs, whilst the asses have them only on the fore limbs; and there is no common term for the two in the native languages. There is no wild horse in India. The indigenous domesticated animal has degenerated to a pony rarely rising to 13·2 hands in height. In the extreme south it is improbable that there has ever been any horse-breeding at all. There is a want of pasturage [maita], and there is no record of horses being used by the early inhabitants for war. Hyder ally and Tippoo sultan bred horses for their wars with the Mahrattas. The English troops in this country had at first no cavalry. A breeding establishment at Ganjam was removed to Oossoor, with branches at Coongull and Coimbatore. These operations were discontinued in 1850, the Australian import trade supplying what was required. The pony of Southern india is, though small, wiry and capable of great endurance. The improvement of pony-breeding is being undertaken by the Government. There is a Hindostany proverb:—ٹٹو کو کوڑا اور تازی کو اشارہ—"A whip "[chowk] for the pony, a sign for the Arab horse." But on the other hand there is a Tamul proverb:—அரபிக் குதிரை யிலும் ஐயம்பேட்டைத் தட்டுவாணி நல்லது—"An Ayyampett pony is preferable to an Arab steed," as to its utility [goorram, tatt].——*Ghorawallah* (گھوڑے والا - ghorewálá, Hind.). From (above + wálá, hind. doer). A groom or horsekeeper; used at Bombay. In Bengal syce [q.v.] is always used. In Madras, horsekeeper.——*Ghorsawaur* (گھوڑسوار - ghorsawár, Hind.). From (above + sawár, hind. rider). A trooper [sawaur].——*Goda* (ଘୋଡ଼ା - góda, Oor.). Horse [coothiray, goorram].——*Godahaddoh* (ଘୋଡ଼ାହଡ଼ - gódáhaddo, Tel.). From (góda, oor. horse + haddoh, oor. bones). River; Ganjam district, Pedda kimedy and Chinna kimedy zemindarries. Tributary of the Rooshcoolya which it joins near Injily. Some tradition of a horse's leap. Has its source in hot springs among Eastern ghauts [q.v.] of Chinna kimedy; is notorious for sudden high floods.

GHOTAGAMBA (غوتا غنبہ - ghotaghamba, *Hind.*). Corruption of Gummiguttæ [gumghautty]. Same as Ceylon gamboge.

GHOUSE (घोस - ghósa, *Mahr.*). From (ghush, san. to proclaim). Division of the writer caste [cauyast] in Bengal [peyar].

GHOUSE (غوث - ghaus, *Ar.*). From (ghaus, ar. to aid). The redresser of grievances. Title of the highest of Mahomedan saints [abdool cawder]. Common alam; as Ghouse bee, alam + alaumat. Ghouse khan, alam + alaumat [ism].——*Ghiyaus* (غیاث - ghiyás, Ar.). From (ghaus, ar. to aid). A redresser, aid. Part of lacab; as Ghiyaus ood deen, the aid of religion [ism].

GHOWL (غول - ghaul, *Ar.*). Demon. Plant second term. Ex., where transl. is of first term:—Abutilon indicum (mashtulghaul), comb, from shape of leaves; Adiantum capillus veneris (sharulghaul), hair. See gloss. paragraphs.

GHUR (گڑھ - garh, *Hind.*). Hill-fort [gada, godo, gooda].

GIDDA (గిద్ద - gidda, *Tel.*). Means small. Smallest measure of capacity in use. 4 giddas = 1 sola [alavay, 3b]. Varies. Compare Hind. chittack.——*Giddana* (గిద్దన - giddana, Can.; గిద్దన - giddana, Tel.). 80 rupees' weight or fourteenth part of a canara maund [q.v.].——*Giddauny* (గిద్దాణె - giddáne, Can.). From (above + káni, tel. one-sixty fourth); small cawny. The 256th fraction of a fanam [q.v.] or rupee [q.v.].

GIDH (गृध्र - gridhra, *San.*; गीद - gída, *Mahr.*; رخمه - rakhamah, *Ar.*; مردار خوار - murdárkhwár, *Pers.*; گدھ - gidh, *Hind.*; رنگیت - rangít, *Dec.*; ರಣಹದ್ದು - ranahaddu, *Can.*; గద్ద - gadda, *Tel.*; കഴു - kazhu, *Mal.*; கழு - kazhu, *Tam.*). San. from (gridh, san. to be greedy). Mahr. from sanscrit. Ar. from (rakham, ar. love); carrion loving. Pers. from (murdár, pers. dead body + khwár, pers. eater). Hind. from sanscrit. Dec. from (rana, san. battle-field + gridhra, san. vulture). Can. from (rana, san. battle + haddu, can. vulture). Tel. from sanscrit. Tel. also (pínugulagádu), meaning corpse + fellow. Tam. also (máduppidingi), meaning cattle + devourer. Title otherwise Common brown vulture, White-backed vulture. Gyps bengalensis, vulturinæ, vulturidæ [gridhram], raptores [pacshy, 1], of naturalists [jantoo]. Alias Vultur changoun, leuconotus. Changoun is bengallee corruption, from (shakuna, san. vulture). Above cinereous black, back and rump white; beneath dark-brown; bill horny, dusky on cere; legs dusky black; found in immense numbers.——*Burragidh* (بڑا گیدھ - barágídh, Hind.). Hind. from (bará, hind. large + gridhra, san. vulture). Hind. also (pahárígídh), meaning mountain vulture; (ságún), from sanscrit. Title otherwise Long-billed brown vulture. Gyps indicus, scop., vulturinæ, vulturidæ [gridhram], raptores [pacshy, 1] of naturalists [jantoo]. Alias Vultur tenuiceps, tenuirostris. Pale cinereous brown; albescent on the back and rump; bill and cere bluish horny, dusky at the tip; legs and feet dusky cinereous; young bird is paler, not rare on the neilgherries; breeds on some of the cliffs on their northern face.——*Rangidh* (राजगृध्र - rájagridhra, San.; رنگیت - rangít, Hind. and Dec.; నల్లబూరగ - nallabúraga, Tel.). San. from (rájá, san. king + gridhra, san. vulture). Hind. from (rana, san. battle-field + gridhra, san. vulture). Tel. from (nalla, tel. black + búraga, tel. vulture). San. also (rájashakuna), meaning king vulture. Hind. also (mullágídh), meaning decoy vulture; (lalmatashakuni), meaning red body vulture; (rájgidh), meaning king vulture. Title otherwise Black vulture, King vulture. Otogyps calvus, vulturinæ, vulturidæ [gridhram], raptores [pacshy, 1], of naturalists [jantoo]. Alias Vultur ponticerianus. Adult, dark-brown, black throughout, naked head, neck yellowish red, often more or less black-spotted; legs dull red; young dull brown throughout; usually seen solitary or in pairs hunting over some rocky hill; dreaded by other vultures.

GILIGITCHA (గిలిగిచ్చ - giligittsa, *Tel.*). From rattle of dry pods. A common name for all crotalarias [ghantaravam].——*Black giligitcha* (నల్లగిలిగిచ్చ - nallagiligittsa, Tel.). Title from purple flowers. Tel. from (nalla, tel. black + giligittsa, tel. crotalaria). Botanically Crotalaria [ghantaravam] hirsuta, willd., leguminosæ [vricsham, 48]. Perennial; herbaceous, procumbent, hairy; leaves broad-oval to oblong, often acute, hairy beneath; racemes terminal and leaf-opposite; calyx hairy, cleft almost to the base; vexillum glabrous, purple-spotted; legume sessile, oblong, broader upwards, slightly hairy, twice as long as the calyx, eight to ten-seeded.——*Black hill giligitcha* (నల్లగిరిగిలిగిచ్చ - nallagirigiligittsa, Tel.). Tel. from (nalla, tel. black + giri, san. mountain + giligittsa, tel. crotalaria). Botanically Crotalaria [ghantaravam] linifolia, linn. f., leguminosæ [vricsham, 48]. Alias Crotalaria cæspitosa, montana, tecta. Cæspitose, suffruticose, diffuse, branching from the base, more or less strigose; stipule none; leaves from cuneate to linear oblong, obtuse, strigose beneath; racemes terminal; bracteoles attached to the tube of the calyx, between the lips; calyx densely hairy; upper lip broad, and shortly two-cleft; legume oblique, roundish-ovoid, sessile, glabrous, scarcely as long as the calyx, eight to twelve-seeded.——*Forest giligitcha* (शाणपुष्पी - shanapushpí, San.; بن سن - bansan, Hind.; جھنجھنی کا جھاڑ - jhanjhanekájhár, Dec.; ತನ್ನೆಲೆವುಲುಕಗಿಡ - tannelevulukagida, Can.; ಗಿಜಿಗಿಜಿದೆ - gijigijide, Too.; గిలిగొరంట - giligóranta, Tel.; പേത്താന്തലക്കൊട്ടി - péttantalakkotti, Mal.; නිල්අඬනහිරිය - nilandanahiriya, Singh.; வட்டக்கிலுகிலுப்பை - vattakkilugiluppai, Tam.). Title from habitat. San. from (shana, san. crotalaria juncea, linn. + pushpa, san. flower). Hind. from (ban, hind. forest + san, hind. crotalaria juncea, linn.). Dec. from (jhanjhaná, hind. castanet + jhár, hind. tree); from rattling noise of seeds in dry pods. Can. from (tanna, can. cool + ele, can. leaf + uluku, can. shining + gida, can. plant). Tel. from (gilaka, tel. rattle + góranta, tel. nail-dye plant, lawsonia alba, lamk.). Mal. from (péy, mal. devil + tantalakkotti, mal. crotalaria retusa, linn.). Singh. from (nil, singh. blue + andanahiriya, singh. crotalaria); from blue flowers. Tam. from (vattam, tam. circle + kilugiluppai, tam. crotalaria); from curled leaf. San. also (bhútagagara), meaning devil + eclipta alba, hassk. Tel. also (allagiligittsa), meaning famous + the plant, crotalaria. Tam. also (pittándalaikkotti), meaning devil + crotalaria; (vellaikkilugiluppai), meaning white + crotalaria; (vattavellaikkilugiluppai), meaning circle + white + the plant. Title otherwise Blue-flowered crotalaria, Fox-frightener, Globe rattle-pod, Rattle nail dye. Botanically Crotalaria [ghantaravam] verrucosa, l., leguminosæ [vricsham, 48]. Crotalaria angulosa, cærulea, flexuosa. Herbaceous, erect; flower large, bright blue and greenish white; flowering in cold season. Slightly bitter, unpleasant-tasted juice of leaves and tender stalks prescribed internally and externally, in scabies and impetigo; juice of leaves efficacious in diminishing salivation.——*Hill giligitcha* (కొండగిలిగిచ్చ - kondagiligittsa, Tel.). Tel. from (konda, tel. hill + giligitsa, tel. crotalaria); found on circar [q.v.] mountains. Botanically Crotalaria [ghantaravam] albida, heyne, leguminosæ [vricsham, 48]. Alias Crotalaria linifolia, montana. Suffruticose, branching from the base, covered all over with silvery hairs; branches procumbent; stipules none; leaves cuneate-oblong, obtuse, or emarginate, mucronate; racemes terminal; bracteoles attached to the tube of the calyx; calyx hairy, the two upper segments lanceolate and longer than the corolla; legume sessile, glabrous, oblong, about twice the length of the calyx, three and four-seeded; flowers drooping.——*Large giligitcha* (مونا - múná, Hind.; పెద్దగిలిగిచ్చ - peddagiligittsa, Tel.; നല്ലതന്തലക്കൊട്ടി - nellutantalakkotti, Mal.; கிலுகிலுப்பை - kilugiluppai, Tam.). Tel. from (pedda, tel. large + gilgittsa, tel. crotalaria). Mal. from (nalla, mal. good + tantalakkotti, mal. crotalaria retusa, linn.). Tam. from sound of seeds in dry legume. Tel. also (manne). Title otherwise Laburnum-leaved crotalaria. Botanically Crotalaria [ghantaravam] laburnifolia, linn., leguminosæ [vricsham, 48]. Alias Crotalaria pendula, pedunculosa. An erect, glabrous shrub; stipules wanting; leaves trifoliolate; leaflets broadly oval, usually acute at both ends; racemes terminal and leaf-opposed; bracteoles very minute, below the middle of the pedicel; flowers long-pedicelled; keel acuminated, longer than the vexillum, and twice as long as the wings; legume stalked, glabrous, cylindric-oblong, three times as long as broad; flowers large, yellow; flowering nearly all the year.——*Nauga giligitcha* (నాగగిలిగిచ్చ - nágagiligittsa, Tel.). Tel. from (nága, san. large + giligittsa, tel. crotalaria). Botanically Crotalaria [ghantaravam] trifoliastrum, willd., leguminosæ [vricsham, 48]. Alias Crotalaria medicaginea, stricta. Suffruticose with erect or ascending stems; branches straight and twiggy, tomentose; leaves somewhat distant, trifoliolate, long-petioled; leaflets cuneate, obcordate, slightly hairy beneath; racemes terminal, many-flowered, with occasionally a few-flowered peduncle in the axils of the upper leaves; flowers distant, largish, yellow; flowering in the cold season.——*Short giligitcha* (جھنجھنیا - jhanjhaniyá, Hind.; جھنجھنی کا جھاڑ - jhunjhunekájhár, Dec.; పొట్టిగిలిగిచ్చ - pottigiligittsa, Tel.; തന്തലക്കൊട്ടി - tantalakkotti, Mal.). Hind. from (jhanjhaná, hind. castanet); from rattling noise of seeds when dry pods are shaken. Tel. from (potti, tel. short + giligittsa, tel. crotalaria). Mal. from (tantala, mal. the sound + kottu, mal. to strike), from sound of dry pods. Title otherwise Wedge-leaved crotalaria. Botanically Crotalaria [ghantaravam] retusa, l., leguminosæ [vricsham, 48]. Alias Lupinus cochin-chinensis. Erect, branched, nearly glabrous; stipules and bracts often wanting; leaves cuneate-oblong, retuse or rounded, under sides silky pubescent; racemes terminal, many-flowered; calyx glabrous; legume oblong, broader upwards, sessile, glabrous, many-seeded; flowers yellow; flowering nearly all the year. Fibres of bark for cordage and canvas [gunny].——*Silky giligitcha* (घण्टारव - ghantárava, San.; جھنجھنیا - jhanjhaniyá, Hind.; جھنجھنی کا جھاڑ - jhunjhunekájhár, Dec.). Title from color of pod. San. from (ghantá, san. bell + rava, san. sound). Hind. from (jhanjhaná, hind. castanet); from rattling seeds of dry pods. Botanically Crotalaria [ghantaravam] sericea, retz., leguminosæ [vricsham, 48]. Alias Crotalaria spectabilis. Erect, branched, glabrous; stems obtusely angled; stipules large, semi-sagittate, reflexed; leaves lanceolate, cuneate at the base, mucronate, slightly glaucous and silky pubescent below; racemes terminal, many-flowered; bracts cordate, reflexed, lower ones without flower; calyx smaller than the corolla, glabrous; legume oblong, glabrous, many-seeded; flowers large, bright-yellow; flowering nearly all the year.——*Stunted giligitcha* (ಕಾಡುಬುದ್ದೆಗಿಡ - kádubuddegida, Can.; కూనగిలిగిచ్చ - kúnagiligittsa, Tel.). Can. from (kádu, can. jungle + buddegida, can. the plant). Tel. from (kúna, tel. little + giligittsa, tel. the plant, crotalaria). Botanically Crotalaria [ghantaravam] orixensis, rottl., leguminosæ [vricsham, 48]. Perennial, herbaceous, procumbent; branches, racemes and lower side of the leaves slightly hairy; leaves trifoliolate; leaflets obovate; racemes elongated, leaf-opposed; bracts cordate reflexed; corolla scarcely longer than the calyx; legume stalked, glabrous, short-cylindrical, more than twice the length of the stalk, few-seeded; flowers small, on long filiform pedicels.——*Water giligitcha* (నీరుగిలిగిచ్చ - nírugiligittsa, Tel.; വലിയതന്തലക്കൊട്ടി - valiyatantalakkotti, Mal.). Tel. from (níru, tel. water + giligittsa, tel. the plant, crotalaria); grows in wet rice-fields. Mal. from (valiya, mal. large + tantalakkotti, mal. crotalaria retusa, linn.). Botanically Crotalaria [ghantaravam] quinquefolia, linn., leguminosæ [vricsham, 48]. Alias Crotalaria heterophylla. Annual; erect, branched, pubescent or glabrous; stems hollow; leaves five-foliolate, some of them occasionally trifoliolate; leaflets from lanceolate to narrow-linear, usually longer than the petioles, young ones silky-pubescent beneath; racemes terminal, much elongated; flowers large, rather distant; legumes clavate-oblong, glabrous; seeds very numerous.

GINGELLY (तिल - tila, *San.*; तीळ - tíla, *Mahr.*; तीळु - tílu, *Conc.*; سمسم - simsim, *Ar.*; کنجد - kunjad, *Pers.*; تل - til, *Hind.* and *Dec.*; ಎಳ್ಳು - ellu, *Can.*; ಊರೆನ್ಮೆ - úrenme, *Too.*; నువ్వు - nuvvu, *Tel.*; ରାଶି - rási, *Oor.*; എള്ള - ellu, *Mal.*; තල - tala, *Singh.*; எள் - el, *Tam.*). Title from (aljuljulán, ar.), the grain in ear. San. from (til, san. to anoint). Ar. from egyptian. Hind. from sanscrit. Mal. from (eli, mal. to be slight), what is slight. Singh. from sanscrit. Hind. also (krishnatil), meaning black sesame; (báríktil), meaning slender sesame; (mithátel), meaning sweet oil. Dec. also (sufedtil), meaning white sesamum. Can. also (olleellu), meaning good + gingelly; (úruellu), meaning country gingelly. Tel. also (núgu); (tellanuvvu), meaning white + the plant; (núvu); (manchinúgu), meaning good + the plant; (telalu), from sanscrit. Mal. also (kárellu), meaning black gingelly; (chittellu), meaning small gingelly. Singh. also (teltala), meaning oil + sesamum. Tam. also (kárel), meaning black gingelly. Greek σήσαμον; Latin sesama. Title otherwise Bennie oil, Georgaline, Indian oily grain, Noovvooloo, Oil plant, Oriental oily grain, Sesame oil, Sesamum, Til oil. Botanically Sesamum indicum, dec., pedalineæ [vricsham, 100]. Generic name from arabic. Alias Sesamum orientale. Annual; leaves ovate-oblong, entire; calyx five-parted; corolla with a short tube and campanulate throat; flowers axillary, solitary; corolla dirty white or pale red; capsule oblong, tetragonal, four-celled; seeds numerous. Stalks straight, herbaceous, hairy, about 2 feet high; bears large, tubular flowers; seeds slightly oval, small, black or red, tasteless and inodorous; native of india, from whence its cultivation was carried in the earliest ages to mesopotamia and egypt, and has now extended to the west indies. Expressed oil from the seeds, met with in all bazaars, known as til or gingelly oil, often dark in color from having been mixed with an inferior oil, or from defective preparation; the plant with black seed is called first sort gingelly, from yielding largest percentage of oil; that with red seed is second sort. In expressing the oil in northern districts, bark of tungaid [q.v.] or babool [q.v.] gum is added to the seed to be pressed, with a view of enhancing the value of the oil cake. Cultivated in sandy soil; the fragrance of the oil is much weaker when the plant has been sown in too moist a soil; cultivation, dry; ground prepared in south in maurgaly or december, on coromandel in pooshyam or january and maugham or february, on w. coast from carcatacam or july till chingom or august; ploughing the soil four or five times and manuring; seed sown in south in maurgaly or december and chittray or april, on coromandel in maugham or february, on w. coast in the early part of chingom [mausam] or august; no nursery; sown broadcast and ploughed in; while under growth, weeded and occasionally watered; four months after sowing plants are pulled up and stacked for seven days; then exposed to the sun for three days, but at night collected again into a heap, and between every two days' drying in the sun it is kept a day in the heap; by this means the capsules burst of themselves and the seed falls to the ground; the cultivators sell the greater part of the seed to the oil-makers; average price twelve imperial seers for one rupee. Oil equal to olive [zeitoon] oil for medicinal purposes, especially for wounds and ulcers; the leaves abound with thick viscid mucilage, serve for emollient poultices; seeds are emollient, nourishing, tonic, diuretic and lactagogue, ground to a paste with water are given with butter in bleeding piles, if taken largely are capable of producing abortion; the plant gives to pharm. gingelly oil, seeds and leaves. The oil will keep for many years without becoming rancid either in smell or taste, after a time it becomes very mild, it is in common use both for the table and for unction; the seed is also made into flour, which is mixed with jaggery [q.v.] and formed into a variety of sweet cakes; cattle are fed with the oil-cake [ponnauk], in some districts the oil-cake mixed with sugar [q.v.] is eaten by the population; the seed is sometimes ground into a chutney [q.v.] to season rice [q.v.] with. Lotion made from leaves is a hair wash; decoction of root has same properties; oil sometimes made the medium for extracting perfume of jasmine [q.v.], tuberose narcissus, camomile [baboona], and yellow rose [gool]; also used to adulterate oil of almonds [baudam]; in europe used for manufacturing soap [sauboon]; for burning in table lamps, in cold climates it is better suited than cocoanut [q.v.] oil, owing to the lower temperature at which it congeals, although the light it gives is not so bright; in s. india it is chiefly used in cooking, for anointing the body, for making soap, for burning in lamps, by the dyer to brighten and fix his colors, &c. [shauyam]; the natives burn it to obtain a species of lamp-black [caujal]; straw used for fuel and for manure. In hindoo medical works, three varieties of gingelly seeds are described, with black, white and red seeds; black kind best suited for medicinal use and in perfumery, the variety with red seed is called as above said second sort gingelly, or bastard gingelly. There is a Tamul proverb:—என்ளுக்காய் பிளந்தாற்போலப் பேசவேண்டும்—"One ought to speak as evenly as a gingelly-pod splits." And another:—காரியும் வெள்ளையும் கருதிப் பயிரிடு—"Cultivate gingelly and cotton [q.v.] gladly;" both are profitable. And another:—இளைத்தவன் எழு வருஷத்துக்கு எள்விதைக்க வேண்டும்—"A poor man should sow gingelly for "seven years;" as returns are easy and quick. There is a Teloogoo proverb:—నువ్వుకునూరు రోగాలు—"Hundred diseases to "the gingelly;" these crops are peculiarly liable to attacks of sap worm, blight, &c. And another:—కొర్త్తోయినవాడా నువ్వులు చల్లుమురన్నట్లు—"O unfortunate man! sow gingelly;" advice given to a farmer very unfortunate in his crops. Compare Ramtil.——*Hill gingelly* (కొండనువ్వు - kondanuvvu, Tel.). Same as Ramtil.——*Peacock gingelly* (तिलक - tilaka, San.; മൈലെള്ള - mailellu, Mal.). Title from color and resemblance of flowers. San. from (tila, san. gingelly, sesamum indicum, dec.), perhaps from similarity to the sesamum plant [country cinnamon, tirootauly]. Mal. from (mayil, mal. peacock + ellu, mal. gingelly). Title otherwise Peacock notchy. Botanically Vitex [sindoocam] alata, heyne, verbenaceæ [vricsham, 102]. Small tree; branchlets with obtuse angles, densely tomentose; leaves trifoliolate, the petiole with a broad wing; leaflets ovate or elliptic-oblong, narrow at both ends, acuminate, quite entire, subcoriaceous, shining above, pubescent or hoary and glandular-dotted beneath, panicle terminal, compound, spreading, pyramidal; flowers pale-yellow, tinged with blue; petioles with a broad veined wing; flowering in april and may. Wood of good quality.——*Wild gingelly* (కారునువ్వు - kárunuvvu, Tel.; കാട്ടെള്ള - káttellu, Mal.; காட்டெள் - káttel, Tam.). Tel. from (káru, tel. jungle + nuvvu, tel. sesamum indicum, dec.). Mal. and tam. from (kádu, tam. forest + el, tam. sesamum indicum, dec.) [ramtil]. Botanically Sesamum prostratum, retz., pedalineæ [vricsham, 100]. Leaves orbiculate, crenated, hispid above, white-tomentose beneath; flowers solitary, peduncled; stem diffuse; sand hills along the sea coast. A prostrate growing plant, bears large deep, rose-colored flowers; sand-binder.——*Wild peacock gingelly* (ಸಂಪಗೆಪಲ - sampagepala, Can.; මිලිල - milila, Singh.; காட்டுமயிலைமரம் - káttumayilamaram, Tam.). Tam. from (kádu, tam. forest + mayilai, tam. black and white + maram, tam. tree); from blue white flowers. Can. also (mirole); (balgai); (nauldi). Singh. also (mílla); (sapumilila), meaning michelia champaca, linn. + the tree; (míammilila). Tam. also (mayilamaram), meaning black and white + tree. Title otherwise Tall chaste tree. Botanically Vitex [sindoocam] altissima, linn. f., verbenaceæ [vricsham, 102]. Large tree with the branchlets quadrangular, compressed, and channelled; petioles and back of the leaf white, with a short, woolly pubescence; leaves long petioled, trifoliolate; leaflets elliptic-oblong, acuminate at both ends, entire; panicle hoary with a dense tomentum, terminal, compound, spreading, pyramidal; cymes interruptedly verticelled; corolla small, lower lip woolly; flowers white, tinged with blue; flowering in april and may. Most valuable timber tree; wood grey with a tinge of olive-brown, hard, close-grained, polishes well.

GINGER (आर्द्रक - árdraka, *San.*; अलें - além, *Mahr.*; आल्ले - állé, *Conc.*; زنجبيل - zanjabíl, *Ar.* and *Pers.*; ادرك - adrak, *Hind.* and *Dec.*; اليا - alya, *Malay*; ಹಸಿಶುಂಠಿ - hasíshunt'hi, *Can.*; ಸುಂಟಿ - súnti, *Too.*; అల్లము - allamu, *Tel.*; ଓଦ୍ଦା - vodda, *Oor.*; ഇഞ്ചി - iñchi, *Mal.*; ඉඟුරු - inguru, *Singh.*; இஞ்சி - iñji, *Tam.*). Title from sanscrit (shringabéra), through arabic. San. from (árdra, san. wet); sown in ardra caurtey [q.v.]. Ar. from (shringabéra, san. the rhizome). Hind. from sanscrit. Can. from (hasi, can. green + shunthi, can. ginger). San. also (shringabéra), meaning horn + body, from antler-like rhizome; (nagarajá), meaning produced in town; (vishvabhéshaja), meaning universal medicine, specially dried ginger. Hind. also (sont), meaning dried ginger; (sandhí), meaning dried ginger. Malay also (sapádas). Can. also (sontigiua), meaning ginger plant; (vanasunt'hi), meaning dry + ginger. Tel. also (sonti). Greek ζιγγίβερις. Title otherwise Zanzibar root by arabic corruption. Botanically Zingiber [aurdracam] officinale, roscoe, zingiberaceæ [vricsham, 144]. Generic name is from sanscrit through arabic. Alias Amomum zingiber; Zingiber majus. Amomum, from (hamámá, ar. from hamma, ar. to heat); the heating plant; from pungency and aromatic property. Rhizome tuberous, biennial; stems erect and oblique, invested by the smooth sheaths of the leaves, generally 3 or 4 feet high, and annual; leaves sub-sessile on their long sheaths, bifarious, linear-lanceolate, very smooth above and nearly so underneath; sheaths smooth, crowned with a bifid ligula; scapes radical, solitary, a little removed from the stems, 6–12 inches high, enveloped in a few obtuse sheaths, the uppermost of which sometimes end in tolerably long leaves; spikes oblong, the size of a man's thumb; exterior bracts imbricated, one-flowered, obovate, smooth, membranous at the edge, faintly striated lengthwise; interior enveloping the ovary, calyx and the greater part of the tube of the corolla; flowers small; calyx tubular, opening on one side, three-toothed, corolla with a double limb; outer of three, nearly equal, oblong segments, inner a three-lobed lip, of a dark-purple color; ovary oval, three-celled, with many ovules in each; style filiform. The recent root is tuberous, ash-white externally, rugose, fleshy, yellowish interiorly; when dried it is in fragments of about 2 inches long, grey or ashy with oval knots; the pieces are called races or hands. There are two kinds distinguished, the scraped and the rough or unscraped; the latter or black ginger consists of the inferior roots, which have been immersed in boiling water, previously to being dried; and the former or

white ginger of the fairest, roundest, and most delicate roots, picked when fresh, peeled, and dried in the sun. In the young state the rhizome is fleshy, while in its advanced state it becomes woody and starchy. Plant contains a volatile oil [yennay], the source of the aroma of the root, and a resin [raul] on which its acridity depends. The ginger from malabar is reckoned superior to any other; that exported from calicut is the produce of district of chernaud, south of calicut; ginger is chiefly exported even now from malabar, and in earlier times the greeks procured it almost exclusively from that province. For cultivation the only suitable kind of soil is that which, being red earth, is yet free from gravel, and the soil good and heavy; rain is essentially requisite, it is also however necessary that the beds be constantly kept from inundation; cultivated on coromandel wet, on w. coast dry; ground prepared on coromandel in cheitram or april and veishaukham or may, on w. coast in vrishchicam or november; seed sown on coromandel in veishaukham or may and jyeshtam or june, on w. coast in yedavam [mausam] or may; no nursery; small beds are formed, ginger root is buried under earth and manured and watered; a full grown plant attains height of 1½ feet; the leaves and stems then dry and wither away; dug up eight months after sowing; the tubers after gathering are washed and brought to market green or dried; a small quantity is preserved as seed for next year and for medicinal purposes; average price, 1 viss for 1 anna. Gives to pharm. zingiberis radix; activity resides in a volatile oil and in a soft acrid resin; stimulant, stomachic, and carminative; substituted for british peppermint [poodeenah], caraway [q.v.] and aniseed [anise] oils; dried ginger is preferable to green ginger for medicinal use; dried root of plant is used as a masticatory [charvanam] in toothache; essence of ginger is made by steeping ginger in alcohol. Chief use of ginger is as a condiment [chutney]. There is a Tamul proverb:— சுக்கு அறியாத கஷாயம் உண்டா?—"Is there any decoction [kwautam] without dried ginger?"——(1) *Ginger grass* (ಸೊಂಟಿಹುಲ್ಲು - sontihullu, Can.; అల్లపుగడ్డి - allapugaddi, Tel.; சுக்குநாறிப்புல் - shukkunárippul, Tam.). Title from smell; cf. roussa grass. Can. from (sonti, can. dry ginger, zingiber officinale, roscoe + hullu, can. grass). Tel. from (allamu, tel. ginger + gaddi, tel. grass); from smell. Tam. from (shukku, tam. dried ginger + náru, tam. to smell + pul, tam. grass) [indian grass, roussa grass]. Botanically Panicum [priyangoo] repens, linn., graminaceæ [vricsham, 156]. Common about commencement of the rains, on cultivated lands, in gardens, &c., cattle are fond of it. Same name also given to Roussa grass. ——(2) *Amada ginger* (انبه سونٹھ - ambahsonth, Hind.). Same as Mango ginger.——*Broad-leaved ginger* (ಅಗಲೆಶುಂಠಿ - agaleshunt'hi, Can.). Same as False ginger.——*Downy-leaved ginger* (زنجبیل بریشه - zanjabíliberíshah, Hind.). Same as Cassumunar. ——*False ginger* (स्थूलग्रन्थि - st'húlagrant'hi, San.; बच - bach, Hind.; ಅಗಲೆಶುಂಠಿ - agaleshunt'hi, Can.; కల్లుసొంటి - kallusonti, Too.; കാട്ടിഞ്ചി - káttiñchi, Mal.). Title from appearance. San. from (s'thúla, san. stout + grant'ha, san. knot). Hind. means acorus calamus, linn. [vasamboo] from similar aromatic taste. Can. from (agala, can. broad + sunt'hi, can. ginger). Too. from (kallu, too. stone + sánt'hi, too. ginger). Mal. from (kátu, mal. wild + iñchi, mal. ginger, zingiber officinale, roscoe). San. also (víranam), meaning strength, also applied to cuscus [q.v.] andropogon muricatus, retz., from similar fragrance; (kumbhika), meaning pot-like. Hind. also (mahábaríbatch), large acorus. Can. also (kallusunt'hi), meaning stone + ginger. Title otherwise Broad-leaved ginger, Wild ginger. Botanically Zingiber [aurdracam] zerumbet, smith, zingiberaceæ [vricsham, 144]. Alias Amomum spurium, sylvestre, zerumbet; Dietrichia major; Zingiber spurium. Stems declinate; leaves sessile, lanceolar; spike long-peduncled, oval, compact, obtuse; bracts broad-obovate obtuse, margins colored; flowers pale sulphur; flowering in august and september.——*Jungle ginger* (جنگلی ادرک - jangliádrak, Hind. and Dec.). Hind. from (janglí, hind. wild + adrak, hind. ginger, zingiber officinale, roscoe). Botanically Zingiber [aurdracam] capitatum, roxb., zingiberaceæ [vricsham, 144]. Stems erect, round, 2–3 feet; leaves narrow-lanceolate, acute, smooth above, slightly hairy beneath; spike terminal, sessile on the mouth of the sheaths of the upper leaves, linear-oblong, somewhat cone-shaped; bracts in pairs, one-flowered, permanent, outer one lanceolate, concave, erect, longer than the corolla tube, inner ovate, shorter, enveloping the ovary, calyx and nearly the whole of the corolla; lip of the corolla three-lobed, middle lobe very large, round, lateral ones expanding; anther with a very long curved beak; flowers large, pure yellow; flowering in the rains.——*Mango ginger* (कर्पूरहरिद्रा - karpúraharidrá, San.; अंबहळदी - ambahaladí, Mahr.; ام هلدی - ámhaldí, Hind.; ام کے بوکی ادرک - ámkebokíadrak, Dec.; మామిడిఅల్లము - mámidiallamu, Tel.; കൂവ - kúva, Mal.). Title from smell of root. San. from (karpúra, san. camphor + haridrá, san. turmeric, curcuma longa, roxb.). Mahr. from (amba, mahr. mangifera indica, linn. + halada, mahr. turmeric); from fresh root smelling like green mango [q.v.]. Hind. from (ám, hind. mango + haldí, hind. turmeric). Dec. from (ám, hind. mango, mangifera indica, linn. + bo, hind. smell + adrak, hind. ginger). Tel. from (mámidi, tel. mango + allamu, tel. ginger, zingiber officinale, roscoe). Mal. means crying stem, applies to curcuma generally [coova, malabar arrowroot]. Hind. also (amada) by corruption; (ambahsonth), meaning mango dry ginger. Tel. also (árukandlakachóramu), meaning six + eye + the plant, curcuma zedoaria, roscoe. Title otherwise Amada ginger, Mango turmeric. Botanically Curcuma [haridrah] amada, roxb., zingiberaceæ [vricsham, 144]; amada from hindostany. Tubers palmate, inwardly pale yellow; leaves long-petioled broad-lanceolate, smooth; spikes central, cylindric, crowned with a tuft of pale abortive bracts; flower smallish, white or pale-yellow, with a deeper yellow line running down the middle of the lip; the tuft, pale purple or rose-colored; flowering in rains. The root has smell of a green mango; root carminative and stomachic; in pharm. non-officinal. Root yields a kind of arrowroot [coova].——*Squirrel ginger* (ఉడతల్లము - vudatallamu, Tel.; சடைப்புல் - shadaippul, Tam.). Title from bushy roots. Tel. from (udata, tel. squirrel + allamu, tel. ginger, zingiber officinale, roscoe). Tam. from (jatá, san. bushy hair + pul, tam. grass); from creeping roots. Title otherwise Basket grass, Hairy grass. Botanically Eragrostis [coosham] bifaria, vahl., graminaceæ [vricsham, 156]. Alias Poa bifaria. Culms erect, simple, slender, 1–2 feet; leaves keeled and folded, stiff, glaucescent, glabrous; sheaths keeled; spike straight, simple, unilateral, distichous; spikelets sessile, alternate, linear-lanceolate, compressed; lower ones four to eleven, upper fifteen to seventeen-flowered; mountains and dry localities.——*Wild ginger* (కారల్లము - kárallamu, Tel.). Title from taste of stems. Same as Caurallam.

GINGHAM (ಗಿಂಟ - ginta, *Can.*; గింటేన - gintena, *Tel.*; கிண்டன் - kindan, *Tam.*). Vernacular means double-thread texture. Cotton cloth [sheelay].

GIRACAUL (ಗಿರಕಾಲು - girakálu, *Can.*). From (gíra, tel. a line + kálu, can. a fourth); an upright line being a symbol for a quarter, it means a quarter of a quarter. One-sixteenth of a rupee [q.v.].

GIRDLE GRASS (മേഖലപ്പുല്ല് - mékhalappullu, *Mal.*). Used in making bramin's girdle. Same as Moonj grass.

GIRY (गिरि - giri, *San.*). Mountain [gherry].——*Girijay* (गिरिजा - girijá, San.). From (above + já, san. to be born). The mountain-born Parvaty [q.v.].

GIYARWEEN (گیارهوین - giyárwín, *Hind.*). Means eleventh. The 11th of 4th month Rabee oos saunee [maheena], dedicated to Peer e dastgheer [abdool cawder]. Sufficiently described at vol. I (97).

GLUE TREE (ಅಂಟೆನಮರ - antenamara, *Can.*). See Gaub.

GNAT TREE (شجرة البق - shajaratulbakk, *Ar.*). See Bakk.

GO (गो - gó, *San.*). From (gam, san. to go) [gaty, gungay]. Cow, earth, eye, sense, water. In sense of cow a common plant first term. Ex., where transl. is of second term:—Ægle marmelos (góharítakí), terminalia chebula; Barleria longiflora (gókshuraka), hoof; Capparis horrida (góvindí), protecting; Citrullus colocynthis (góvandaní), adorer; Clitoria ternatea (gókarní), ear; Elephantopus scaber (gójihva), tongue, from leaves; Feronia elephantum (gópakarna), protector + ear; Gmelina asiatica (gópabhadra), protector + favorable; Hygrophila spinosa (gókantaka), thorn; Pedalium murex (gókhru), hoof; Plumeria acutifolia (gósampige), michelia champaca; Santalum album (góshírsha), head; Schrebera swietenoides (gólídha), eaten; Tinospora cordifolia (góraksha), protecting; Torenia cordifolia (góróchanam), pleasing; Tribulus terrestris (gokshuraka), hoof; Vitis vinifera (gostaní), teat. See gloss. paragraphs.——*Gajwaun* (گاوزبان - gáuzabán, Hind.). Same as Gowzabaun.——*Gauvada* (ಗಾವದ - gávada, Can.). From (gó, san. cow); distance of cow's lowing being heard. Linear measure. 4 hardauries = 1 gauvada [alavay, 1c]. Approximate actual value, 1 gauvada = 10 miles. Compare San. yojanam, Hind. gow, Tel. aumada, Tam. cautham. ——*Gavyooty* (गव्यूति - gavyúti, San.). From (gó, san. cow + úti, san. delight). Pasture. Linear measure. 2 croshams = 1 gavyooty; 2 gavyooties = 1 yojanam [alavay, 1f]. Approximate actual value, 1 gavyooty = 4½ miles. A smaller gavyooty is half.——*Ghye* (گائے - gái, Hind.). From (gó, san. cow). Bos indicus. Cf. Gavæus gaurus (gaurgái), wild cow; portax pictus (nilgái), blue cow. See gloss. paragraphs.——*Goa* (ಗೋವೆ - góve, Can.). Shepherd country [gova]. The Portuguese town on W. coast in Bombay presidency.——*Goa bean* (چارکونی سیم - chárkonísem, Hind.; දරදඹල - daradambala, Singh.; முறுக்குப்பீன்சு - murukkuppínsu, Tam.). Hind. from (chár, hind. four + koná, hind. corner + sem, hind. bean). Singh. from (dará, singh. earth + dambala, singh. kidney bean, phaseolus vulgaris, linn.). Tam. from (murukku, tam. twist + beans). Title otherwise Chevaux-defrise bean, Square bean, Square-podded dolichos, Winged pea. Botanically Psophocarpus teragonolobus, dec., leguminosæ [vricsham, 48]. Plant large; blue flowers in cold season; bears a curious four-sided pod, 6 or 8 inches long and ½ an inch wide, with a leafy kind of fringe running along the length of its four corners; indigenous in the mauritius. Pod is cooked whole in the manner of french beans.

[lobyah], to which it is inferior in flavor. No other species here. ——*Goa potato* (ഗോവക്കിഴങ്ങ - góvakkizhannu, Mal.). Same as Goa yam.——*Gobhoomy* (ಗೋಭೂಮಿ - góbhúmi, Can.). From (above + bhúmi, can. land). Pasture land [gomaula, maita]. ——*Gocharmam* (गोचर्म - gócharma, San.). From (above + charma, san. hide); as much as can be comprehended by strips from a cow's hide [chamrah]. Cf. the story of Dido. Superficial measure [alavay, 2 f]. Approximate actual válue a parallelogram 300 feet by 10 feet. Considered enough for the range of hundred cows, one bull and their calves; and sufficient to support a man for a year.——*Gochry* (गोचडी - góchadí, Mahr.; طلح - tilh, Ar.; گوچڑی - gochrí, Dec.; توما - tuma, Malay; ಉಂಣಿ - unni, Can.; పిడుదు - pinudzu, Tel.; ഉണ്ണി - unni, Mal.; உண்ணி - unni, Tam.). Title from deccany. Mahr. means cattle louse. Ar. from (talah, ar. to render lean). Can. from (únnu, can. to eat). Tel. from (pidutsu, tel. to wring), from extracting blood from cattle. Tam. from (un, tam. to suck). Tick.——*Gocoolam* (गोकुल - gókula, San.). From (above + kula, san. family). Ancient country of Krishnan [q.v.], the cowherd; supposed to be on the Jumna.——*Gocoolaushtamy* (గోకులాష్టమి - gókuláshtami, Tel.). From (above + kula, san. family + ashtamí, san. eighth). Smarta designation. Same as Krishna jayanty.——*Gocull* (ಗೋಕಲ್ಲು - gókallu, Can.). From (above + kallu, can. stone). Stones set up for cows [pashoo] to rub themselves against.——*Gocurnam* (गोकर्ण - gókarna, San.). From (above + karna, san. ear). Cow's ear. Linear measure. 12 ungoolams = 1 gocurnam; 2 gocurnams = 1 hastam [alavay, 1f]. Approximate actual value, 1 gocurnam = 9 inches. Same as San. vitasty, Hind. bilisht, Can. guenoo, Tel. jena, Tam. jaun. Compare San. pradesham, Tam. adee, wottay.——*Godavery* (గోదావరి - gódávari, Tel. godávari *). Always assumed from (gó, san. water + dá, san. to give + varí, san. stream), and hence here exhibited. The indigenous name however is Goday, which see under Goda. Sanscrit name also (vriddhagangá), meaning old + ganges. ψοάρις of Ptolemy though he wrongly makes it disembogue on west coast.—"*a*" Revenue district; situated on the Coromandel coast [q.v.]; between 16° 18′ and 18° 04′ N. lat., and between 80° 55′ and 82° 38′ E. long.; bounded N. by Central provinces and Vizagapatam district, E. by Vizagapatam district and Bay of Bengal, S. by Bay of Bengal and Kistna district, W. by the Nizam's dominions; square miles 7,857; pop. 1,951,645; language Teloogoo. Contains rivers Godavery, Severy; ports Bendamoorlunka, Cocanada, Coringa, Narsapore, Ooppauda, Peroopollem, Yanam; mountains, Bison range. The whole area of the district is represented by the following sub-areas, where talook [q.v.] means an ordinary tract administered by a Tahsildar [q.v.], and division means a Zemindarry [q.v.] tract administered by a superior Deputy tahsildar:—Amalaupooram talook, Bhadrachellam talook, Bheemavaram talook, Cocanada division, Ellore talook, Narsapore talook, Peddapore talook, Pittapore division, Rajahmundry talook, Ramchendrapooram talook, Tanookoo talook, Toony division, and Yernagoodem talook. For general administrative purposes the district is distributed between the following revenue and magisterial officers, who have their head-quarters at the places shown. The pay set opposite the subordinate officers gives the grade of the corresponding charge:—Collector, Cocanada; Sub-collector Rajahmundry, in charge of Amalaupooram, Rajahmundry and Ramchendrapooram talooks; Head assistant collector, Ellore, in charge of Tanookoo, Ellore and Yernagoodem talooks; General deputy collector, Narsapore, in charge of Narsapore and Bheemavaram talooks; Special assistant agent, Coonavaram, in charge of Bhadrachellam talook; General duty deputy collector, Cocanada, in charge of Peddapore talook, and the Pittapore, Cocanada and Toony divisions. Tahsildars, Amalaupooram, Rs. 200; Bhadrachellam agency talook, Rs. 120; Bheemavaram, Rs. 175; Ellore, Rs. 175; Narsapore, Rs. 225; Peddapore, Rs. 150; Rajahmundry, Rs. 175; Ramchendrapooram, Rs. 250; Tanookoo, Rs. 200; Yernagoodem, Rs. 150; Deputy tahsildars, Alamore or Ramchendrapooram, Rs. 70, range situated in the west of Ramchendrapooram talook; Chintalapoody, Rs. 70, range situated in the north of Ellore talook; Cocanada division, Rs. 100, Zemindarry division; Cottapettah, Rs. 70, range situated in the north-west of Amalaupooram talook; Cottapully or Gokavaram or Raghoodevapooram, including Rumpa, Rs. 100, range situated in the north of Rajahmundry talook; Pentapaud, Rs. 70, range situated in the west of Tanookoo talook; Pittapore, Rs. 100, Zemindarry division; Polavaram, Rs. 100, range situated in the north-east of Yernagoodem talook; Prodipadoo or Yeleshwaram, Rs. 70, range situated in the north-east of Peddapore talook; Shivacode, Rs. 70, range situated in the south-east of Narsapore talook; Toony, Rs. 100, Zemindarry division; Sub-magistrate, Cocanada town, Rs. 70. Similarly judicial officers:—Judge, Rajahmundry; District moonsifs, Rajahmundry, Peddapore, Cocanada, Tanookoo, Amalaupooram, Narsapore, Ellore. Contains Registration sub-districts Alamore, Amalaupooram, Bheemavaram, Chintalapoody, Cocanada, Coringa, Cottapettah, Ellore, Mamidivaram, Narsapore, Peddapore, Pentapaud, Pittapore, Prattipaud, Rajahmundry, Ramchendrapooram, Shivacode, Tanookoo, Toony, Yernagoodem. Contains Forest ranges Doomagoodem, Rajahmundry. Contains Municipalities Cocanada, Ellore, Rajahmundry. Contains District board and Talook boards, Rajahmundry Talook board embracing Rajahmundry, Amalaupooram and Ramchendrapooram talooks; Cocanada Talook board embracing Peddapore talook, Pittapooram, Cocanada and Toony divisions; Narsapore Talook board embracing Narsapore and Bheemavaram; Ellore Talook board embracing Tanookoo, Ellore and Yernagoodem talooks. The following general references should be made to the preceding volumes:—general geography, I (1) to (29); general ethnology, I (29) to (109); general history, I (110) to (188); physical geography, II, 1; meteorology, II, 3; geology, II, 8; fauna, II, 21; flora, II, 26; mineralogy, II, 29. The following references in the preceding volumes will furnish details special to the district:—latitudes and longitudes, II, 47; particulars about towns, II, 48; coast survey, II, 165; light-houses, II, 169; comparative population, II, 172; location of revenue officers, II, 385; revenue settlement of the district, II, 411; registrars' and sub-registrars' stations, II, 421; ports, II, 423; salt factories, II, 426; rain-guage stations, II, 428; police divisions, II, 431; maps published, II, 436; hospitals and dispensaries, II, 447; missionary stations, II, 455; head-quarter stations of gazetted officers, II, 461; incidence of taxation, II, 463; weights and measures of the district, II, 511; zemindarries contained, I, 57, and II, 297; agencies contained, I, 75; special public works, I, 395. A special gazetteer account of the whole district is given at II, 79. For the detailed topography of the district, reference should be made to the talook notices in the present volume, viz.:—Amalaupooram, Bhadrachellam, Bheemavaram, Cocanada, Coringa, Ellore, Narsapore, Peddapore, Pittapore, Rajahmundry, Ramachendrapooram, Rekapully, Rumpa, Tanookoo, Toony, Yernagoodem.—"*b*" River; Godavery district. Ignored by ancient and mediæval map-makers. Rises on the eastern declivity of the western ghauts [q.v.], at Trimbac in lat. 19° 58′, long. 73° 30′, 16 miles from Nassick, and 50 miles east of the west coast. The traditional site of the source is on a hill behind the village. It is approached by a flight of 690 stone steps, flanked by a low stone wall. At the top of these steps is a stone platform built at the foot of the rock, out of which issues the water of the stream, and an image under a canopy has been so placed that the water trickles through its mouth into a reservoir. From first to last the general direction is south-east. It first flows south-east for 100 miles to the western frontier of the Nizam's dominions in lat. 19° 48′, long. 74° 40′, and continues in the same direction for 90 miles further, forming the boundary between Ahmednugger and the Nizam's dominions to a point in lat. 19° 23′, long. 75° 37′. It then enters the Nizam's dominions and proceeds in a sinuous, but generally easterly course, for 160 miles, receiving on the left side, in lat. 19° 6′, long. 77° 5′, the Doodhna, a considerable stream flowing from the north-west. From that confluence it flows south-east for 85 miles and receives on the right side in lat. 18° 48′, long. 77° 55′, the Manjeerah flowing from the south. From this confluence the course is still sinuous; but generally eastward, for about 170 miles, to lat. 18° 48′, long. 79° 49′, near which the Munnair falls into it. Thence it flows north-east for about 20 miles to lat. 18° 52′, long. 79° 55′, receiving on the left side at Sironchah, the Wurdah, Peingunga and Weingunga, united in one stream called the Pranheeta which discharges the great drainage of the southern declivity of the Vindhyam range. From this junction the river flows south-east, with the Nizam's dominions on the right, and the Upper godavery district of the Central provinces on the left bank, receiving on the left a considerable tributary, the Indrauvaty, the junction of which is concealed by hills. Below this junction low ranges of hills run almost parallel to the left bank of the river till the junction of the Taul is reached. On the right bank the country is more open and cultivated and is marked by the towns of Nagaram and Mungampettah. A short distance below the last place the river enters Godavary district at Purnashaula. It then passes Doomagoodem where is the first anicut and on the opposite bank to which the sacred hill of Ratabgootta rises into view. After passing Doomagoodem, the prominent object on the British side is the small hill of Bhadrachellam, crowned with Hindoo temples. On the opposite side the country is more open and cultivated and thickly dotted with irrigation tanks extending inland for about 250 miles to Warrangal, and the remains of numerous old irrigation works. The river is then joined by the Severy at Coonavaram. Near this junction the whole range of the Eastern ghauts comes into view. Passing Collore in lat. 17° 29′, long. 81° 34′, 170 miles from Sironchah the river forces a passage through that part of the Eastern ghauts [q.v.] known as the Paupicondah range by a precipitous gorge only about 200 yards wide. It again widens out and finally issues into the plains at Polavaram in lat. 17° 15′, long. 81° 42′, 25 miles below Collore. This gorge forms one of the most beautiful pieces of scenery in Southern india. From Polavaram the river continues south-east, widening as it enters the plain, and passes round the island of Pauta pattesham. This island is the first of a series formed or modified by the rapid stream in its future downward course. These islands are exceedingly fertile and are noted for the lunka [q.v.] tobacco [pogauk] grown on them. In December and January many are covered with the relloo or flowering reed [naunal]. Passing the village of Gootaula on the right bank the river reaches Rajahmundry, on the left bank. On approaching the latter place the bank is in many instances cut down precipitously by the action of the stream, so that Tullapoody and other villages

formerly at some distance from the river are now on the very verge of the bank. A short distance below Rajahmundry the river is barred at Dowlaishweram 30 miles from its mouth by the celebrated anicut [q.v.]; see vol. I, 395. Here at Dowlaishweram it divides into two large streams:—the eastern, known as the Gowtamy godavery, flowing past Yanam and Neelapully for 55 miles, and falling into the Bay of Bengal at Cape godavery near Coringa in lat. 16° 48′, long. 82° 23′; and the western or Vasishta godavary flowing nearly due south for 55 miles and entering the bay at Point narsapore in lat. 16° 18′, long. 81° 43′. A few miles above this mouth another large branch, the Veinateya godavery, separates from the river, and falls into the bay near Bendamoorlunka, forming the island of Nagaram. Hindoos assert that there are seven branches by which the river debouches into the sea, the principal of which are the Toolyabhauga, Atreya, Bhauradwaujam, Gowtamy, the Vriddha or the Old gowtamy, the Veinateyam, the Cowshiky, and the Vasishta. The three early English factories [aurang], Injaram, Bendamoorlunka and Madapollem, were situated near the Gowtamy, Vasishta, and Veinateyam mouths. The rich delta [conamoogam], formerly known as Conaseema, spreads out on both sides, extending on the west to the delta of the Kistna at Colair lake, a distance of about 40 miles, and on the east for about 32 miles to Coringa bay. Total length of river 898 miles; estimated area of drainage basin [nadee], 112,200 square miles. The river is navigable from July to November between Rajahmundry and a place called Davadola on the right bank and some six miles below Yenchampully near the second or middle barrier; but beyond Sooraid 30 miles above Doomagoodem, as far as Yedarlapully, 20 miles further up, the navigation is somewhat dangerous, the river-bed being studded with rocks and the level of the water being very variable even in the flood seasons. There is not much boat traffic above Doomagoodem. The main lines of Godavery delta navigable canal are two; from Dowlaishweram anicut to Cocanada, 32 miles, and from Vijayeshwaram anicut to Ellore, 47 miles. The secondary lines of Godavery delta navigable canal are as follows:—1 mile from head of Dowlaishweram main line to Coringa, 36 miles; 4 miles from head of Dowlaishweram main line to Samulcottah and thence round to Cocanada, 38 miles; 6 miles from head of Vijayeshwaram main line to Narsapore, 39 miles; Bobbar lunka anicut to Amalaupooram, 32 miles; Bobbar lunka anicut to Razole, 36 miles; Bobbar lunka anicut to Inapore, 43 miles. The distances of these secondary lines are calculated from the main heads or anicut. Proposed extensions are as follows:—Coringa to Cocanada, by a new canal between tidal locks; Razole canal, extension 8 miles; Amalaupooram canal, extension 10 miles; Amalaupooram canal to Bendamoorlunka, 14 miles. The Godavery is regarded by the natives as peculiarly sacred. It is considered to flow from the same source as the Ganges, but underground, and it is frequently called the Vriddha gungay. In more than one place in the Pooraunams [q.v.], the Ganges proper is described as passing through Calingam [q.v.], which probably means the same thing. Pliny again makes the country of the three Calingams an island in the Ganges. Those who carry the sacred water of the Ganges to the south of India, when they arrive on the banks of the Godavery, invariably replace the water of the Ganges, evaporated on the journey, by water taken from its sister stream. The Gowtamy branch is, if possible, looked on as more holy than the rest of the river. Once every twelve years the Pooshcaram [pundigay, 6d] feast is held on the banks of the Godavery at Cotipully [q.v.] and pilgrims come from all parts to bathe in its waters.——*Gograusam* (గోగ్రాసము - gógrásamu, Tel.). From (above + grása, san. food). Fodder of a cow.——*Gohatyah* (गोहत्या - góhatyá, San.). From (above + han, san. to kill). Killing a cow, a heinous crime.——*Golla* (ಗೊಲ್ಲ - golla, Can.; గొల్ల - golla, Tel.). From (gó, san. cow). The corresponding terms are:—Hind. dhangar, Mal. yeraudy, Tam. yiday. Canarese and tel. names for the shepherd caste. These were originally the pastoral part of the nation and were engaged in the management of cattle [maud], sheep and goats [aud]. Many now live by cultivation; also employed as confidental servants in public treasuries [inam]. Numbers about a million. See vol. I (67); II, 228.——*Gollapully* (గొల్లపల్లె - gollapalle, Tel.). From (golla, tel. shepherd + palle, tel. village). Village; Kistna dist., Noozveed zemindarry; pop. 1,292; lat. 16° 43′; long. 80° 57′; from Gunnavaram N.E. 15 miles; from Masulipatam N.N.W. 39 miles; from Noozveed S.E. 6 miles. Centre of Golcondah mines.——*Golla's plate* (ಬಂದರೆ - bandare, Can.; గొల్లపుల్లెడ - gollapulleda, Tel.; விராலி - viráli, Tam.). Title from use of leaves. Tel. from (golla, tel. the caste + pulle, tel. plate leaf). Tam. from (viral, tam. strength); heart-wood strong. Can. also (bandargi); (bandrike). Tel. also (pulleda), meaning plate leaf; (bandáru), meaning turmeric, curcuma longa, roxb. [wild anaur, yellow cadamba]; (bandédu), meaning touch wood, from ease with which it burns. Title otherwise Australian native hop, Bog-myrtle, Jamaica switch sorrel. Botanically Dodonæa viscosa, linn., sapindaceæ [vricsham, 43]. Alias Dodonæa angustifolia, burmanniana, dioica; Ptelea viscosa. A stiff, wiry, virgate shrub, with alternate smooth wiry leaves, widening from the stock upwards; foliage resembling arbutus; flowers pale-green and insignificant; covers large meidauns [q.v.]; ascends mountains to 8,000 feet; used for hedges, and for edging in a garden. Leaves viscid and keep green, though dry; taste sour; make poultices. Sapwood white; heart-wood extremely hard and close-grained, dark-brown, with an irregular outline; used for engraving, turning, tool-handles, walking-sticks, &c.; the wood ignites like touch wood, though green. No other common species here.——*Gomantaky* (गोमन्तकी - gómantakí, San.). From (gómantaka, san. cow-possessing, goa). A dialect of Concany [q.v.] used at Goa by Portuguese. See vol. I (60).——*Gomataroya* (ಗೊಮಟರಾಯ - gómataráya, Can.). From (gautama, san. sage so called + ráya, tel. king). Colossal monolithic figures of Booddha [q.v.] among the Jeinas [betta, jeina].——*Gomaula* (ಗೋಮಾಲ - gómála, Can.). From (above + mála, san. village forest). Pasture land [gobhoomy, maita].——*Gomedham* (गोमेध - gómédha, San.). From (above + médha, san. sacrifice). Sacrifice of a cow [pashoo, shiva].——*Gomookhanuddy* (கோமுகநதி - kómuganathi, Tam.). From (above + mukha, san. mouth + nadí, san. river). River; South arcot district, Cullacoorchy and Vriddhauchellam talooks. Rises in the Cullroyen hills and flows for 25 miles through Cullacoorchy talook, joining the Manimooctah nuddy near Nulloor in Vriddhauchellam talook. Several anicuts [q.v.].——*Goomta* (ಗುಮಟ - gumata, Can.). Otherwise Gomaty, Gomataroya. Corruption of Gowtama. A collossal monolithic figure, probably of Booddha [betta, booddha].——*Gopalpore* (గోపాలపురము - gópálapuramu, Tel. gopálpur*). From (gópála, san. vishnu, the cowherd + pura, san. town). Town, Port, Sea-customs house, Lighthouse; Ganjam dist., Berhampore tal.; pop. 2,865; acres 779; lat. 19° 16′; long. 84° 57′; from Berhampore E.S.E. 8¾ miles; from Chetterpore S.W. 9 miles; from Ganjam S.W. 13 miles; from Madras N.E. 515 miles; from Sonapore N.E. 15 miles. On Orissa coast [q.v.] between Ganjam and Berhampore. Has completely displaced Mansoorcottah a little to the north, formerly chief port of district. A large back-water [cauyal] on the north-east separates it from Mansoorcottah. The intense heat of May is tempered by the sea breeze, and it is a pleasant place of residence for Europeans. Light on mainland sixty yards from low water-mark; lat. 19° 15′; long. 84° 57′. White; fixed. 8 miles range. Visible from all directions seaward. Flag-staff painted white. Guide to the anchorage. Another light at the extreme end of pier. Red; fixed. 3 miles range. Visible from all directions seaward. To point out the sea end of the pier. The port is nothing more than an open roadstead. The depth of water in the anchorage varies from 8½ to 9½ fathoms at low water. The bottom at these depths is sand mixed with stiff mud and is good holding ground. The rise and fall of the tide is about 6 feet. During April, May and October, the surf is frequently so high that communication between the shipping and the shore is interrupted for days together; but it is generally possible to communicate in the early part of the day. The prevailing wind is south to south-east, and for eight months of the year it blows very strongly. The surf is considered more dangerous to boats than at Madras. The current usually runs with the wind. The limit of the port on the north-east or Mansoorcottah side is at a distance of 1,160 yards from the custom-house and on the south-west side at a distance of 600 yards from it. To seaward the boundaries of the port extend to where a depth of 12 fathoms is reached. The anchorage for ships is with the custom-house flagstaff on the beach north-west ½ west; centre of the large white godown [q.v.] on the beach from which the Aska sugars [q.v.] are shipped north, north-west by west; saddlehill entirely detached from the high land and appearing to the south over the beach sand hills west south-west; and Mansoorcottah hill north by west about 1½ miles from the shore. Coasting steamers call. Considerable export trade to Europe in grain, myrobalans [q.v.], hemp [indian hemp], horns [sing], hides [chamrah], and seeds [cottay, yennay]. Trig. station in lat. 19° 13′ 00·30″; long. 84° 56′ 28·90″; from Berhampore S.E. 8 miles; from the sea E. 1¼ miles; Mr. Boothby's bungalow [q.v.], the highest part of the roof.——*Gopaulan* (गोपाल - gópála, San.). From (above + pála, san. protector). Vishnoo [q.v.] as the cowherd Krishnan [q.v.]. Gopaulsawmy is another form. Familiarly Gopan, Gopoo. Hindoo 2nd or pers. name [peyar].——*Gopinautan* (கோபிநாதன் - kóbináthan, Tam.). From (gópí, san. cowherdess + nát'ha, san. lord). Krishnan. Hindoo 2nd or pers. name. Common among Madhwas and Goozeratties [peyar].——*Gopooram* (गोपुर - gópura, San.). From (gó, san. eye + pura, san. town). Feature of architecture [staupatyam] peculiar to the peninsula. A gate, a town gate, but more especially the elevated and ornamented gateway or entrance tower of a Hindoo temple [coil]. Originally for defence [toranam].——*Gopy* (गोपी - gópí, San.). From (above + pá, san. to protect). A cowherdess. Also short for Gopy chandanam.——*Gopy chandanam* (गोपीचन्दन - gópíchandana, San.). Literally shepherdess's sandal [q.v.] paste. Common magnesian clay used by hindoos to make sectarian marks [naumam] on faces, breasts and arms [tirmunn]. Veishnavas employ white earth from Dwarca. Also an aluminous yellow earth brought from Ganges at Hardwar and used by Madhwas. Also a medicine. Cf. Ghil arminy. See vol. I (85), (90).——*Gorochanay* (गोरोचना - góróchaná, San.; حجرالبقر - hajarulbakr, Ar.; گاؤ زهره - gáuzahra, Pers.; گورو چنا - gorochaná, Hind.; گائی رون - gáíron, Dec.; ಗೋರೋಚನ - góróchana, Can.; గోరోచనము - góróchanamu, Tel.; ഗോരോചനം - góróchanam, Mal.; கோரோசனை - kórósanai, Tam.).

San. from (gó, san. cow + róchaná, san. yellow pigment). Ar. from (hajar, ar. stone + bakr, ar. cow). Pers. from (gáú, pers. cow + zahra, pers. bile). Dec. from (gáí, hind. cow + róchaná, san. pigment). Ar. also (kharazatulbakr), meaning cow-shell. Bezoar orientale of chemists. Otherwise animal bezoar [q.v.]. One is a concretion found in fourth stomach of capra œgagrus [vellaud], of persia; it has a smooth glossy surface and is of a dark green or olive color, and about the size of a kidney bean [lobyah], roundish or oblong. Another is biliary concretion of the cow [pashoo] or bullock [maud], calculus cysticus bovis of chemists; contained in a small bag, which holds two or three small bezoars, each about the size of a tamarind [q.v.] stone, or one large one as big as a large marble; bright-yellow color; medicinally cordial and alexipharmic; employed with chebulic myrobalan [q.v.] and galls [mauchicoy] in preparing mixture for cleansing inside of mouths of new-born infants; veidyans [q.v.] prescribe solution in warm ghee [q.v.] to be poured up the nose in cases of headache; much used as a pigment. Camel bezoar found in gall-bladder of the camel [ottagam] is used as a yellow paint [rangh].——*Gosain* (گوسائیں - gosáin, Hind.; గోసాయి - gósáyi, Tel.). From (gó, san. sense + svámí, san. master). A religious mendicant in general. The most respectable are the descendants spiritually of Shuncaracharry, of whom there are ten chief branches, called the Dashnamy [q.v.] or ten named Gosains. These attach to their ordinary Hindoo name one of the terms, Teertam or shrine, Aushramam or an order, Vanam and Aranyam or wood, Saraswaty or goddess of eloquence, Bhauraty or goddess of speech, Poory or city, Giry and Parvatam or hill, Saugaram or ocean. As Anandagiry, Vidyauranyam, Ramaushramam. These are usually assembled in mutts [q.v.], under a superior; particularly at Shringairy, in the Western ghauts, near the sources of the Toongabudra, said to have been founded by Shuncaran [q.v.] himself. The Dashnamy gosains worship Shiva [aundy, jauty]. See vol. I (90).——*Gosangy* (గోసంగి - gósangi, Tel.). From (above + hims, san. to kill); cow-killer. A class of pariah beggars.——*Gosawmy* (गोस्वामी - gosvámí, San.). From (gó, san. sense + svámí, san. master); master of senses or passions. Religious mendicant.——*Gostanuddy* (గోస్తనది - góstanadi, Tel.). From (gósht'ha, san. cow's abode + nadí, san. river). Sanscrit name (góstanínadí), meaning cow + udder + river; from tradition of the river flowing from the udder of a cow. Canal; Godavery dist., Bheemavaram and Tanookoo tals.; from Bheemavaram N. 4 miles; from Veeravausaram N.W. 11 miles. Natural channel [q.v.] navigable for 28 miles. Converted into a branch of the Western delta main canal. Waters considered sacred by Hindoos, being mentioned in the Vayoo pooraunam [q.v.].——*Gostany* (గోస్తని - góstani, Tel.). From (gó, san. cow + stana, san. udder); named from the form of the basin [angoor].—"*a*" River; Vizagapatam dist., Gajapatinugger, Vizianagram and Bimlipatam divisions. Also called Champauvaty or Conauda. Rises in Pottinghy division, north of Gaulicondah, flows south-east for 48 miles till it enters the sea at Conauda. Principal places on its banks are Gajapatinugger and Andra.—"*b*" Another. Otherwise called Chittivalsa or Bimlipatam river; Vizagapatam dist., Srungavarapoocote and Bimlipatam divisions. Length 65 miles, rises in Pottinghy divisions north of Gaulicondah, near the source of the other river of the same name and disembogues at Bimlipatam.——*Gosye* (గోసాయి - gósáyi, Tel.). Same as Gosain.——*Got* (گوت - got, Hind.). Same as Gotram.——*Gotram* (गोत्र - gótra, San.). From (above + trai, san. to protect). Literally, a cow-pen; thence an Aryan tribe claiming to be sprung from a particular progenitor. The names of the gotrams have been much confused, particularly in later times, when their number has become considerable. However all Braminic families who have kept the sacred fires are supposed to descend from the seven rishies. These are:—Bhrigoo, Angiran, Vishwamitran, Vasishtan, Cashyapan, Atry, Agastyan. The gotrams which descend from these rishies are again sub-divided into forty-nine gotrams, and these forty-nine branch off into a still larger number of families. The names gotram, vamsham, vargam, pacsham, and ganam are all used in the same sense, to express the larger as well as the smaller families descended from the seven rishies. A Bramin who keeps the sacrificial fire is obliged by law to know to which of the forty-nine gotrams his own family belongs, and in consecrating his own fire he must invoke the ancestors who founded the gotram to which he belongs. Each of the forty-nine gotrams claims one, or two, or three, or five ancestors, and the names of these ancestors constitute the distinctive character of each gotram. See vol. II, 226.——*Gova* (गोव - góva, San.). Meaning cowherd. May imply district of cowherds, that is of nomadic tribes. Ancient name of Southern concan [concan, goa].——*Govardhanan* (கோவர்த்தனன் - kóvarttanan, Tam.). From (above + vardhana, san. increasing). Krishnan, the cowherd. Hindoo 2nd or pers. name [peyar].——*Govindan* (गोविन्द - góvinda, San.). From (above + vind, san. to obtain). Cow-finder, cowherd. Vishnoo as Krishnan. Pilgrims to Tripatty specially invoke this god by this name. Hindoo 2nd or pers. name [peyar]. Otherwise Govindoo.——*Govindrauz* (గోవిందరాడు - góvindarádzu, Tel.). From (góvinda, san. kríshna, the cowherd + rádzu, tel. king). Hindoo 2nd or pers. name [peyar].——*Gow* (گو - gau, Hind.). Mahratta. Distance of cow-lowing being heard. Linear measure. 4 coss = 1 gow [alavay, le]. Approximate actual value, 1 gow = 9 miles. In Ceylon it is 4 miles. Compare San. yojanam, Can. hardaury, Tel. aumada, Tam. cautham. See vol. I, 609.——*Gowtaman* (गौतम - gautama, San.). One of the seven rishies and one of the seven stars [nacshatram] forming the small bear [doobhe asghar], near the pole [dhroovam]. His wife's name is Ahalyay; he is celebrated for his curse on Indran [q.v.]. So the surname of the Shakya tribe, from which Booddha shakya moony sprang. See vol. I (75). Another Gowtaman was the author of the Nyauyam [q.v.] philosophy. See vol. I (74) [matam].——*Gowtameeshan* (गौतमीश - gautamísha, San.). From (gautamí, san. durgá + ísha, san. lord). Shiva [q.v.].——*Gowzabaun* (لسان الثور - lisánussaur, Ar.; گاؤ زبان - gáuzabán, Hind.). Title from hindostany. Ar. from (lisán, ar. tongue + saur, ar. bull). Hind. from (gáu, pers. bull + zabán, pers. tongue); from resemblance of leaves [gajwaun]. Greek βούγλωσσον. Title otherwise Bugloss, Bulls' tongue, Gajwaun. Botanically Onosma bracteatum, wall., boragineæ [vricsham, 92]. Alias Onosma macrocephala. Fragmentary leaves covered with curious tuberculated glands, each terminated by a hair. There are other gowzabauns under Echium and Cacalia.

GO (گو - go, *Hind.*). From (guftan, pers. to speak). Suffix denoting agent in compounds; as Canoongo, meaning rule + speak, interpreter of rules.——*Goindah* (گوینده - goindah, Hind.). From (guftan, pers. to say). A spy.

GODA (గోడ - góda, *Tel.*). Wall.——*Goday* (గోడె - góde, Tel.). Means limit. Dravidian name for the Godavery. A family name also.

GODAURY (धातकी - dhátakí, *San.*; धायटी - dháyatí, *Mahr.*; دھول - dhaval, *Hind.*; గోదారి - gódári, *Tel.*; ଜାତିକୋ - jatiko, *Oor.*). Title from teloogoo. San. from (dhá, san. to hold) Mahr. from sanscrit. San. also (dhátupushpiká), meaning mineral + flower, from the red flowers; (dhátripushpiká), by corruption; (agnijválá), meaning fire flame, from red flowers [flame tree]; (subhikshá), meaning abundance. Tel. also (reyyamánu); (gaddapisinika), meaning root + maba buxifolia, pers.); (gáji); (chiranji) [small dyeing mulberry]; (jargi); (kódára). Oor. also (harwari). Title otherwise Downy grislea, Gummy chiranjy [small dyeing mulberry], Reyya. Botanically Woodfordia floribunda, salisb., lythraceæ [vricsham, 58]. Alias Grislea tomentosa; Lythrum fruticosum; Woodfordia fruticosa, tomentosa. Shrub, 6 feet; branchlets pubescent; leaves opposite, quite entire, lanceolate, somewhat cordate at the base, sessile, hoary underneath; petals usually six; stamens declinate, usually twelve; capsule oblong; peduncles axillary, several-flowered; flowers middle-sized, scarlet, with rose-colored petals, fragrant; flowering from december to march. Gum resembles gum [gond] tragacanth [kateerah] and swells in water. Dried flowers are medicinally stimulant and astringent. Infusion of leaves employed as a tea [q.v.] by hill tribes; a kind of intoxicating drink is extracted from the blossoms with sugar [q.v.]. Flower gives a red dye [shauyam] used in silk [puttoo] dyeing; often used along with morinda [dyeing mulberry]. Wood reddish-white, hard, close-grained. There are two varieties, the white and black, distinguished by the color of the bark, fruit, and shape of the leaves. No other common species here.

GODE (ಕೋಡು - kódu, *Can.*; కోడు - kódu, *Tel.*; കോട് - kótu, *Mal.*; கோடு - kódu, *Tam.*). From (kotu, mal. steep). Summit of a hill. Suffix in place names as Trichengode, meaning sacred + red + summit [code].

GODHICAY (गोधिका - gódhiká, *San.*). From (gudh, san. to envelop); covered with thick skin. Term co-extensive with the european Saurian order of reptiles [sarpy, 5-11]. Distinguished from other reptiles by the presence of legs; some might be taken for snakes [sarpam], but in these are found bones of the shoulder hidden below the skin; the motions of some are slow, while those of others are executed with great but not lasting rapidity; many have the power of changing their colors; this depends on the presence of several layers of cells loaded with different pigments; the animal spreads or compresses these layers by more or less inflating its lungs, whereby the changes in the coloration are effected; the tongue is differently shaped and has different functions affording a character for their sub-division. A key-synopsis connecting european and native terminology will be found included under Sarpy; title heads in this glossary cover each family, and contained genus and species, distinguished by the natives. For insects see poochy; for fishes see matsyam; for batrachians see bhaicam; for reptiles see sarpy; for birds see pacshy; for mammals see sastanam. A general conspectus of the fauna [jantoo] of s. india was given in vol. II, appendix IV.——*Ghorapadey* (ಘೋರಪಡೆ - ghórapade, Can.). From (ghórapade, mahr. iguana). Ancient Mahratta family of Sundoor estate, Bellary district. Identical with Bhonslays of Sattaura. So named from founder Mullojee having scaled an impregnable fort in Concan [q.v.] by fastening a cord round the body of an Iguana [oodoomoo] and sending it up the wall. Originally these were officers of the Beejapore army. Vol I, 42 [charitram].

GODNAH (گودنا - godná, *Hind.*). Puncturing the skin, and rubbing it with the leaves of plants, yielding a dark dye; chiefly by women. Tattooing as a punishment.

GODO (ଗୋଡ଼ୋ - gódó, *Oor.*). Fort [gada, ghur, gooda].

GODOWN (گدنگ - gidang, *Hind.*; గిడ్డంగి - giddangi, *Tel.*; കിടങ്ങ് - kitannu, *Mal.*; கிடங்கு - kidangu, *Tam.*). From malay. An out-house, place where household implements or goods are kept [kidang].

GOGLET (کوزہ - kúzah, *Hind.*). From portuguese gorgoleta. A water-bottle. Usually earthenware, of globular body with a long neck [cooja].

GOGOO (గోగు - gògu, *Tel.*). From (góku, tel. to scrape); from fibres being scraped. Same as Hemp bendy.——*Gogoolpully* (గోగులపల్లి - gógulapalli, Tel.). From (above + palli, tel. village). Tel. also (góvulapalli), meaning cow + village. Village; Nellore dist., Canigherry tal.; pop. 2,075; lat. 15° 16′; long. 79° 22′; from Canigherry S.W. 16 miles; from Nellore N.W. 71 miles. Is surrounded by low hills and jungles. Copper [taumram] mining has been attempted. Two ruined forts built by the Batsaly family, who ruled formerly here.

GOGRA (घोगरा - ghógará, *Mahr.*; బంకెయెద్దు - bankeyeddu, *Tel.*). Tel. from (banka, tel. gum + eddu, tel. bull). Rita pavimentata, siluri læ [kizhautty], physostomi, teleostei [matsyam, 35], of naturalists [jantoo]. Alias Arius pavimentatus; Gogrius sykesii; Phractocephalus gogra. Gogra from mahratta. Freshwater fish; upper jaw longer; upper surface of head smooth, being covered by skin; dull yellowish color, with dark or even black fins; rivers in the deccan [q.v.] and affluents of the kistna, kurnool. No other common species here.

GOKAVARAM (గోకవరము - gókavaramu, *Tel.*). From (kóka, san. wolf + pura, san. town).—"*a*" Deputy tahsildarry, Godavery district. Pay Rs. 100.—"*b*" Village, Deputy tahsildar's station; Godavery dist., Rajahmundry tal.; pop. 1,786; acres 1,962; lat. 17° 16′; long. 81° 53′; from Cocanada N.W. 33 miles; from Coonavaram E. 44 miles; from Ellore N.E. 61 miles; from Madras N.N.E. 300 miles; from Narsapore N.N.E. 57 miles; from Rajahmundry N.N.E. 19 miles. Large tank. A large weekly market for hill people.

GOLANDY (गुल्ममूषक - gulmamúshaka, *San.*; جھاڑی کا چوہا - jhárikáchúhá, *Hind.*; ಗುಲಂದಿ - gulandi, *Can.*; సొరపంజిగాడు - sorapanjigádu, *Tel.*; കാട്ടെലി - kátteli, *Mal.*; කෝපිවත්තමීයා - káp'hivattimíyá, *Singh.*; புதரெலி - puthareli, *Tam.*). Title from canarese. San. from (gulma, san. bush + múshaka, san. rat). Hind. from (jhárí, hind. bush + chúhá, hind. rat). Mal. from (kátu, mal. jungle + eli, mal. rat). Singh. means coffee garden rat. Tam. from (puthar, tam. bush + eli, tam. rat). Title otherwise Bush rat. Golunda ellioti, muridæ, rodentia, mammalia [sastanam, 17], of naturalists [jantoo]; generic from canarese. Above olive brown mixed with fulvous, giving a dusky fulvous tint; beneath yellowish tawny or light yellowish gray; the tail somewhat villose; the head long, muzzle blunt, rounded and covered with rough hair, as are the face and cheeks; ears round, hairy; whiskers long and very fine. This rat is found only in S. india and Ceylon. It lives entirely above ground choosing its habitation in a thick bush, among the thorny branches of which, or on the ground, it constructs a nest of elastic stalks and fibres of dry grass, thickly interwoven. Its motion is slow, and it has not the same power of leaping or springing, by which the rats [ely] in general avoid danger. The Yanaudies [q.v.] catch this rat, surrounding the bush and seizing it as it comes out. It is the coffee rat of Ceylon, so destructive to coffee [q.v.] trees. For Golunda meltada see Varappely.

GOLANOO (గోలను - golanu, *Tel.*). Tank. Suffix, place names.

GOLCONDAH (గోలుగొండ - golugonda, *Tel.* golgonda *). From (golugu, tel. glycosmis pentaphylla, corr. + konda, tel. hill).——**(1)** Talook, Vizagapatam district, Tahsildar's pay Rs. 150. Population 118,514. Language Teloogoo. S.W. inland of district. Boundaries:—north, Jeypore zemindarry and Veeravilly talook; east, Sarwasiddhy and Ankapully talooks; south, Sarwasiddhy talook and the Godavery district; west, the Godavery district. Hilly and rugged. Soil sandy, stony, regar [q.v.], loamy and clayey, poor in quality except in a few places in the southern portion. The northern is occupied by a mass of hills consisting of a rugged tableland about 3,000 feet above the sea, with peaks rising to 5,000 feet, almost entirely covered with jungle. This was the scene of part of the Rumpa disturbance of 1879-80. Agriculture is chief industry, cloth weaving to a limited extent. Commerce to a small extent in jaggery [q.v.], oil seeds [yennay] and pulses [dholl] and hill produce such as gallnuts [mauchicoy], tamarinds [q.v.], saffron [country saffron], wax [mom], &c. Chiefly irrigated by rivers Shaurada and Tandaba, a lake, and tanks. Principal trig. stations:—Calingacondah, Cheroocondah, Dhaura, Nullacondah, Pagoolraulloo, Paundavoola condah, Sanjeevy. The leading places, &c., in the talook are the following.——*Balighattam* (బలిఘట్టము - balighattamu, Tel.). From (bali, san. giant so called + ghatta, san. pass). Village, Place of pilgrimage; pop. 2,268; acres 6,295; lat. 17° 39′; long. 82° 39′; from Narsapatam S. 1 mile; from Vizagapatam W. 44 miles. Small rock in vicinity with pagoda [q.v.] to Shiva [q.v.] as Bramheshwar. The idol [vigraham] faces west instead of east as usual. The Varauhanuddy, which washes the rock on which the temple stands, flows from south to north. This combination of directions is particularly auspicious in Hindoo estimation, and the shrine, under the name of Oottara vauhiny, is held in great veneration. On the river bank is a small bed of pulverised shale, which, from its resemblance to ashes, is declared to be the site of a sacrifice performed by Baly [q.v.] chuckravurty [q.v.].——*Bayyavaram* (బయ్యవరము - bayyavaramu, Tel.). From (bayyana, tel. proper name + pura, san. town). Proprietary estate, Village; pop. 909; from Narsapatam S.E. 7 miles; from Vizagapatam W. 38 miles. Peshcush Rs. 851.——*Calingacondah* (కళింగకొండ - kalingakonda, Tel.). From (kalinga, san. ancient kingdom + konda, tel. hill). Trig. station; lat. 17° 49′ 42·31″; long. 82° 21′ 07·75″; height 4,645 feet; from Ghausy village N. $1\frac{1}{2}$ miles; from Golcondah N.W. 15 miles; from Narsapatam W. 22 miles.——*Cheroocondah* (చెరువుకొండ - cheruvukonda, Tel.). From (cheruvu, tel. tank + konda, tel. hill); after the tank on the hill. Trig. station; lat. 17° 52′ 22·72″; long. 82° 11′ 18·24″; height 4,741 feet; from Goodem W. $2\frac{3}{4}$ miles; from Golcondah N.W. 25 miles; from Narsapatam W. 34 miles.——*Comararole* (కోమరవోలు - kómaravólu, Tel.). See sep. title.——*Dhaura* (ధార - dhára, Tel.). Means stream. Trig. station; lat. 17° 44′ 01·86″; long. 82° 30′ 55·50″; height 4,095 feet; from Golcondah N. 4 miles; from Narsapatam W. 10 miles.——*Dhauracondah* (ధారకొండ - dhárakonda, Tel.). From (dhárá, san. stream + konda, tel. hill). Hill; lat. 17° 58′; long. 82° 15′; from Narsapatam N.W. 33 miles; from Vizagapatam N. 72 miles.——*Golcondah* (గోలుగొండ - golugonda, Tel.). See below.——*Goodem* (గూడెము - gúdemu, Tel.). Means a hamlet. Village; pop. 480; lat. 17° 52′; long. 82° 14′; from Jeypore S.W. 72 miles; from Narsapatam W. 30 miles; from Vizagapatam W. 72 miles. Ancient capital of the Bhoopaties, former Zemindars of Golcondah.——*Gubbauda* (గబ్బాడ - gabbáda, Tel.). From (gabbu, tel. stench + váda, tel. village). Village; acres 1,585; lat. 17° 43′; long. 82° 38′; from Narsapatam N.N.W. 3 miles; from Vizagapatam W. 44 miles.——*Juggampett* (జగ్గంపేట - jaggampéta, Tel.). From (jaggamma, tel. proper name + péta, tel. suburb). Zemindarry, Village; pop. 1,055; acres 538; lat. of village 17° 34′; long. 82° 30′; from Narsapatam S.W. 12 miles; from Vizagapatam W.S.W. 52 miles. Residence of Ooratla proprietor. Peshcush Rs. 282.——*Narsapatam* (నరసపట్టణము - narasapattanamu, Tel.). See sep. title.——*Nullacondah* (నల్లకొండ - nallakonda, Tel.). From (nalla, tel. black + konda, tel. hill). Trig. station; lat. 17° 44′ 10·51″; long. 82° 48′ 23·45″; height 1,607 feet; from Cottacote E.S.E. $4\frac{1}{4}$ miles; from Golcondah E.N.E. 20 miles; from Narsapatam E. 11 miles.——*Ooratla* (ఊరట్ల - uratla, Tel.). From (úru, tel. village + úta, tel. fountain). Proprietary estate, Village; pop. 2,746; lat. of village 17° 34′; long. 82° 43′; from Narsapatam S.E. 9 miles; from Vizagapatam W. 40 miles. Peshcush Rs. 14,954.——*Pagoolraulloo* (పగులురాళ్ళు - pagulurállu, Tel.). From (pagulu, tel. to break + ráyi, tel. stone). Trig. station; lat. 17° 46′ 43·20″; long. 82° 17′ 37·55″; height 3,760 feet; from Bodraulla N. $3\frac{1}{2}$ miles; from Golcondah W. 16 miles; from Narsapatam W.N.W. 25 miles.——*Paidipaula* (పైడిపాల - paidipála, Tel.). From (paidi, tel. gold + pádu, tel. village). Town; pop. 7,010; lat. 17° 38′; long. 82° 46′; from Narsapatam S.E. $8\frac{1}{4}$ miles; from Vizagapatam W. 37 miles. Attached are five hamlets.——*Pandoor mullavaram* (పండూరుమల్లవరము - pandúrumallavaramu, Tel.). From (pandu, tel. fruit + úru, tel. village + mallavaramu, tel. place so called). Proprietary estate, Village; pop. 1,087; acres 135; lat. of village 17° 39′; long. 82° 31′; from Narsapatam W. $8\frac{1}{2}$ miles; from Vizagapatam W. 52 miles. Peshcush Rs. 1,608.——*Paundavoola condah* (పాండవులకొండ - pándavulakonda, Tel.). From (pándava, san. the pándavás + konda, tel. hill). Trig. station; lat. 17° 40′ 54·88″; long. 82° 15′ 42·06″; height 2,669 feet; from Bodalore S.W. 4 miles; from Golcondah W. 16 miles; from Narsapatam W. 25 miles.——*Sanjeevy* (సంజీవి - sanjívi, Tel.). Trig. station; lat. 17° 31′ 21·44″; long. 82° 43′ 52·00″; height 2,145 feet; from Golcondah S.E. 16 miles; from Ooratla S. 3 miles; from Narsapatam S.S.E. 11 miles.——*Sowdvauda* (చౌడువాడ - tsauduváda, Tel.). From (tsaudu, tel. saline soil + váda, tel. village). Proprietary estate, Village; pop. 682; lat. of village 17° 33′; long. 82° 46′; from Narsapatam S.E. 11 miles; from Vizagapatam W. 37 miles. Peshcush Rs. 952.——*Varauhanuddy* (వరాహనది - varáhanadi, Tel.). See sep. title.——**(2)** Village; Vizagapatam dist., Golcondah tal.; pop. 1,838; acres 11,883; lat. 17° 41′; long. 82° 31′; from Coraputt S.S.W. 78 miles; from Madras N.N.E. 342 miles; from Narsapatam W. $8\frac{3}{4}$ miles; from Parvatipore S.W. 98 miles; from Vizagapatam W. 56 miles; from Vizianagram W. 68 miles. Formerly belonged to Golcondah zemindarry [q.v.]. In 1836, in consequence of murder of Ranee [q.v.], the estate was sequestrated and zemindar [q.v.] imprisoned. In following year estate

was brought by Government at auction. In 1845 chiefs rose in rebellion, and held their ground for three years; and again in 1857-58 it was found necessary to send troops against them.

GOLD (सुवर्ण - suvarna, *San.*). Common prefix.——*Gold flower tree* (सुवर्णक - suvarnaka, San.). Same as Common condray.——*Gold mohur tree* (कृष्णचूडा - krishnachúdá, San.; शंकाशूर - shankáshúra, Mahr.; रत्नगंधि - ratnagandhi, Conc.; گل مور - gulmor, Hind.; ರತ್ನಗಂಧ - ratnagandhi, Can.; ರತ್ನಗಂಧ - ratnagandhi, Too.; [illegible] - pamiditangédu, Tel.; ചെത്തിമന്ദാരം - chettimandáram, Mal.; මොනරමල් - monaramal, Singh.; மயிற்க்கொன்றை - mayirkkonrai, Tam.). Title by corruption from hindostany (gulmor, hind. peacock flower). San. from (krishna, san. the god + chúdá, san. top); krishnan's crest jewel. Conc. from (ratna, san. gem + gandha, san. smell); from variegated flowers. Hind. means peacock flower. Can. from (ratna, san. gem + gandha, san. smell). Tel. from (pamidi, vulgar for paidi, tel. gold + tangédu, tel. cassia auriculata, linn.). Mal. from (chetti, mal. red + mandáram, mal. bauhinia variegata, linn.). Singh. from (monará, singh. peacock + mal, singh. flower); from variegated petals. Tam. from (mayil, tam. peacock + konrai, tam. cassia fistula, linn.); from variegated crimson flowers. Hind. also (guliturrah), meaning tassel + flower. Can. also (kenchige), meaning fair tree. Tel. also (réla); (turáyi), meaning head ornament. Mal. also (teççimandáram); (chekkimandáram), by corruption. Title otherwise Barbadoes flower, Barbadoes pride, Fleurde paradis, Flower-fence, Golden tungaid, Krishna chooran, Peacock condray, Peacock flower, Spanish carnation, Tassel flower, Torye flower. Botanically Cæsalpinia [coobairaucshy] pulcherrima, s.w., leguminosæ [vricsham, 48]. Alias Poinciana alata, bijuga, pulcherrima. Shrub, 8-10 feet, armed; sepals five, obtuse, unequal, lower one vaulted; æstivation imbricative; leaves bipinnate; leaflets obovate-oblong, retuse or emarginate; calyx glabrous on both sides; petals five, fringed on long claws, the upper one shaped differently from the others; racemes terminal, corymbiform; style very long; legume two-valved, several-seeded; flowers orange, variegated with crimson; flowering nearly all year; common in gardens; native of w. indies, here naturalized. The bark is ash-colored, smooth, thickly studded with small elliptic corky warts, the whole of the suber readily separates like birch bark, disclosing a streaky, mottled, green and pink surface, which is marked by numerous small scars corresponding to the warts above mentioned; the substance and internal surface of the bark is of a pinkish tinge; taste rather nauseous, very astringent. All parts are powerfully emmenagogue; roots are acid and tonic and in excess are poisonous; leaves are in decoction purgative, and used for senna [q.v.]; seeds in powder are remedy in colic; flowers and fruit also used medicinally. Flower is offered to shiva; the whole an ornamental hedge-plant. The wood makes good charcoal [adooppkary].——*Gold root* (काञ्चनी - káñchaní, San.). Same as Country saffron.

GOMOOTY (گموتي - gomutí, *Malay*; குமுதிப்பனை - kumuthippanai, *Tam.*). Malay also (aren); (anau). Tam. also (ségóvarisi), meaning sago rice. Title otherwise Ejoo palm, Sago palm, Singapore sago. Botanically Arenga saccharifera, labill., palmaceæ [vricsham, 149]. Generic from malay. Alias Borassus gomutus; Saguerus rumphii. Gomutus from malay. A very large palm [taur]; throws up erect from sides of trunk large shining black-green leaves, which take a plume-like curve towards summit; flower largish yellow, purple. Of importance second only to cocoa palm in the rural economy of the asiatic archipelago from one extremity of it to the other; it takes there the place of the palmyra [q.v.] or borassus flabelliformis of the continent of india. Heart of stem contains large quantities of sago [q.v.]; flower stalks yield a sugary sap made into sugar [jaggery] and palm wine [toddy]. From the black horse-hair-like fibres, or gomooty surrounding the petioles of the leaves, cordage and cables are made; the mid ribs of the side leaves are converted into pens and fine arrows, which malayans blow from long tubes; at the base of the leaves a fine woolly material called baroo [q.v.] is employed in caulking ships, as stuffing for cushions and as tinder. Timber extremely hard and fit for building. No other common species here.

GOND (गोण्ड - gónda, *San.*; گونڈ - gond, *Hind.*; కోడు - kódu, *Tel.*). From (konda, tel. hill). Dravidian language and people; mostly in the N. portion of Central provinces, but also some 8,000 in Ganjam district. A few in Kurnool district also speak the Gayety [q.v.] variety of Gond language. Its chief difference from the other Dravidian dialects consists in its peculiarly elaborate conjugational system. Not to be confounded with Khond [q.v.], though has affinity [bhaushay, coyi, jauty].

GOND (निर्य्यास - niryása, *San.*; गोंद - gónda, *Mahr.*; صمغ - samagh, *Ar.* and *Pers.*; گوند - gond, *Hind.* and *Dec.*; پلت - pulut, *Malay*; ಗೋಂದು - góndu, *Can.*; ಅಂಟು - antu, *Too.*; [illegible] - banka, *Tel.*; പശ - pasha, *Mal.*; ලාටු - látu, *Singh.*; பிசின் - pisin, *Tam.*). Title from hindostany. San. from (nis, san. out + yas, san. to exude). Mal. from (pashumai, tam. moistness). Can. also (antu). Gum.——(1) The word gum properly speaking is confined to those natural exudations which solidify on exposure to the air, but are easily redissolved by water; they are often transparent, but vary in tint from white to reddish brown. Under this term however the exudation of a variety of trees is included. When only in part soluble in water, and the rest soluble in alcohol, the exudations bear the name of gum-resins [googal]; these are chiefly used in medicine. When insoluble in water, but soluble in alcohol, ether, and volatile oils, they are resins [raul]; these are used for the most part in preparing dyes [shauyam], varnishes [rangh], lacquers [q.v.], sealing-wax [lac], &c. The resins include also balsams [q.v.] and oleo-resins [teilam]; balsams are semi-solid or liquid exudations from plants, and containing either benzoic acid [sambrauny poo] or an essential oil [attar], or both; oleo-resins are resins combined with volatile oils [yennay]; on distillation the oil passes over, leaving a resin behind. Besides these the elastic gums [pauchonty] belong to the gum class; india rubber and caoutchouc are their types; they come from the indian archipelago. Some gums exude from the fruit and not from the bark [dragon's blood]. There are also some resinous substances as cutch [q.v.], camphor [q.v.], &c., which are artificial decoctions [kwautam] from the bark or wood. The following are two key-lists in the briefest possible terms of the principal indigenous gums of s. india as above defined; further information must be traced in the glossary paragraphs through the small-type cross-references at end of this vclume; see also vricsham, 7, for the method of expressing the products, &c., of the plants in the dravidian languages.—"*a*" Acacia arabica, babool, gum; acacia catechu, catechu, cutch and gum; Acacia farnesiana, cassie oil plant, gum; Acacia ferruginea, anasandra, gum; Acacia leucophlæa, white babool, gum; Acacia sundra, sundra, gum; Achras sapota, sapodilla, gum; Adenanthera pavonina, false red sanders, gum; Ægle marmelos, bael, gum; Ailantus excelsa, coromandel ailanto, gum; Ailantus malabarica, malabar ailanto, resin; Albizzia amara, dark sirissa, gum; Albizzia lebꜧek, common sirissa, gum; Albizzia odoratissima, fragrant sirissa, gum; Albizzia procera, var. elata, hill sirissa, gum; Albizzia stipulata, stone sirissa, gum; Alstonia scholaris, dita, guttapercha; Altingia excelsa, java storax, resin; Anacardium occidentale, cashew, gum; Anogeissus latifolia, vekkauly, gum; Antiaris saccidora, sack tree, resin and inspissated juice from fruit; Aquilaria agallocha, eagle-wood, resin; Areca catechu, areca, catechu; Argemone mexicana, mexican poppy, sap; Artocarpus hirsuta, anjely, concreted juice; Artocarpus incisa, ratadel, gum; Artocarpus integrifolia, bread-fruit, gum; Artocarpus lakoocha, lakoocha, gum; Balsamodendron berryi, kiloovay, gum-resin; Balsamodendron mukul, mookul bdellium, gum-resin; Balsamodendron myrrha, myrrh, gum-resin; Balsamodendron roxburghii, indian bdellium, gum-resin; Bassia latifolia, wild mohwah, gum; Bassia longifolia, common mohwah, gum; Bauhinia purpurea, purple mountain ebony, gum; Bauhinia racemosa, small-flowered mountain ebony, gum; Bauhinia retusa, nirpa mountain ebony, gum; Bauhinia vahlii, large mountain ebony, gum; Bauhinia variegata, variegated mountain ebony, gum; Bombax malabaricum, red-cotton tree, gum; Borassus flabelliformis, palmyra, gum; Boswellia carterii, true olibanum, gum-resin; Boswellia serrata, yellow dammer, gum-resin; Buchanania latifolia, chironjee, gum and varnish; Butea frondosa, bengal kino, gum; Calamus draco, sumatra dragon's blood, resin; Calophyllum inophyllum, common poon, resin; Calophyllum tomentosum, malabar poon, gum; Calotropis gigantea, mudar, gutta-percha; Canarium commune, elemi, resin and oil; Canarium strictum, black dammer tree, resin; Carapa moluccensis, crab-oil plant, resin; Careya arborea, hindostany slow match, gum; Cassia auriculata, tungaid, resin; Cassia fistula, indian laburnum, gum; Casuarina equisetifolia, whip tree, resin; Cedrela toona, toon, gum and resinous substance; Chickrassia tabularis, chickrassy, gum; Chloroxylon swietenia, satin wood, gum; Cinnamomum camphora, camphor cinnamon, camphor; Citrus aurantium, orange, gum; Citrus decumana, pummelow, gum; Citrus medica, lime, gum; Cochlospermum gossypium, golden silk cotton, gum; Cocos nucifera, cocoanut, gum; Convolvulus scammonia, scammony, gum-resin; Cordia rothii, narrow-leaved sebestens, gum; Cryptostegia grandiflora, paulay silk cotton, caoutchouc; Cycas circinalis, indian sago palm, gum; Dalbergia latifolia, malabar black wood, gum; Dalbergia paniculata, yellow mountain ebony, gum; Dichopsis elliptica, indian gutta-percha, gutta-percha; Diospyros embryopteris, gaub, gum from fruit; Diospyros melanoxylon, coromandel ebony, gum; Elæodendron glaucum, nerija, gum; Eriodendron anfractuosum, silk-cotton tree, gum; Erythrina indica, common coral tree, gum; Eucalyptus globulus, blue gum, gum; Eugenia jambolana, common jaumoon, gum; Euphorbia antiquorum, square milk-hedge, gum-resin; Euphorbia cattimandoo, cement plant, milky sap; Euphorbia tirucalli, round milk-hedge, milky sap; Feronia elephantum, wood-apple, gum; Ferula narthex, asafœtida, gum; Ficus bengalensis, banyan, milky sap; Ficus glomerata, cluster fig, gum prepared from milky juice; Ficus religiosa, peepul, milky juice; Garcinia cambogia, malabar gamboge, gum-resin; Garcinia mangostana, mangosteen, gum-resin; Garcinia m rella, ceylon gamboge, gum-resin; Garcinia xanthochymus, yellow mangosteen, gum-resin; Gardenia lucida, decamallee, gum-resin; Garuga pinnata, gargooga, gum-resin; Gossypium herbaceum, indian cotton, gum; Hardwickia binata, yaipy, balsamic oleo-resin; Hopea parviflora, water caung, gum; Jatropha curcas, physic nut, juice; Lagerstrœmia flos-reginæ,

adambo, gum-resin ; Lagerstrœmia parviflora, loose strife, gum-resin ; Liquidambar orientale, indian storax, resin ; Macaranga indica, round-leaved lotus, resin ; Mangifera indica, mango, gum-resin ; Melia azadirachta, margosa, gum ; Melia azedarach, large neem, gum ; Mesua ferrea, nauga champak, resin ; Mimusops elengi, ilanjy, gum ; Mimusops hexandra, monkey-face paulay, gum ; Mimusops kauki, edible paulay, gum ; Moringa pterygosperma, indian horse-radish, gum ; Morus indica, indian mulberry, gum ; Odina wodier, wodier, gum ; Ougeinia dalbergioides, nemmy, gum ; Phœnix sylvestris, wild date, gum ; Phyllanthus emblica, emblic myrobalan, gum ; Piper cubeba, cubeb pepper, resin ; Poinciana elata, indian poinciana, gum ; Poinciana regia, flamboyant, gum ; Pongamia glabra, indian beech, gum ; Prosopis spicigera, shamee, gum ; Prunus amygdalus, almond, tragacanth ; Prunus communis, bokhara plum, tragacanth ; Pterocarpus indicus, andaman red-wood, gum ; Pterocarpus marsupium, malabar kino, gum-resin ; Punica granatum, pomegranate, gum ; Sapindus trifoliatus, soap-nut tree, gum ; Schleichera trijuga, ceylon oak, resin ; Semecarpus anacardium, marking-nut tree, gum and varnish ; Sesbania grandiflora, west indian sesban, gum ; Shorea robusta, common saul, resin ; Shorea talura, taloora saul, gum ; Shorea tumbuggaia, tambaga saul, dammer ; Spondias mangifera, hog plum, gum ; Sponia wightii, indian nettle, gum ; Sterculia urens, false tragacanth, gum ; Sterculia villosa, odul tree, gum ; Styrax benzoin, gum benjamin, resin ; Tectona grandis, teak, resin and oil ; Terminalia arjuna, arjoon, gum ; Terminalia belerica, belleric myrobalan, gum ; Terminalia catappa, country almond, gum ; Terminalia chebula, chebulic myrobalan, gum ; Terminalia tomentosa, var. typica, black murdah, gum ; Thespesia populnea, portia, gamboge from capsule ; Vateria indica, piney tree, resin ; Ventilago madraspatana, pappily, gum ; Woodfordia floribunda, godaury, gum ; Wrightia tinctoria, paula indigo, gum ; Xylia dolabriformis, burmah iron-wood, resin ; Zizyphus jujuba, bair, gum ; Zizyphus nummularia, forest bair, gum.—"*b*" Adambo, lagerstrœmia ; Ailanto, ailantus ; Almond, prunus, terminalia ; Anasandra, acacia ; Anjely, artocarpus ; Arjoon, terminalia ; Asafœtida, ferula ; Babool, acacia ; Bael, ægle ; Bair, zizyphus ; Banyan, ficus ; Bdellium, balsamodendron ; Beech, pongamia ; Benjamin, styrax ; Black-wood, dalbergia ; Blue gum, eucalyptus ; Bread-fruit, artocarpus ; Cashew, anacardium ; Cassie, acacia ; Catechu, acacia ; Caung, hopea ; Cement plant, euphorbia ; Champak, mesua ; Chickrassy, chickrassia ; Chironjee, buchanania ; Cinnamon, cinnamomum ; Cocoanut, cocos ; Coral tree, erythrina ; Cotton, gossypium ; Crab oil, carapa ; Cubeb pepper, piper ; Dammer, boswellia, canarium ; Date, phœnix ; Decamallee, gardenia ; Dita, alstonia ; Dragon's blood, calamus ; Eagle-wood, aquilaria ; Ebony, diospyros ; Elemi, canarium ; Fig, ficus ; Flamboyant, poinciana ; Gamboge, garcinia ; Garooga, garuga ; Gaub, diospyros ; Godaury, woodfordia ; Gutta-percha, dichopsis ; Horse radish, moringa ; Ilanjy, mimusops ; Indigo, wrightia ; Iron-wood, xylia ; Jaumoon, eugenia ; Kiloovay, balsamodendron ; Kino, butea, pterocarpus ; Laburnum, cassia ; Lakoocha, artocarpus ; Lime, citrus ; Loose strife, lagerstrœmia ; Lotus, macaranga ; Mango, mangifera ; Mangosteen, garcinia ; Margosa, melia ; Marking nut, semecarpus ; Mexican poppy, argemone ; Milk-hedge, euphorbia ; Mohwah, bassia ; Mountain ebony, bauhinia, dalbergia ; Mudar, calotropis ; Mulberry, morus ; Murdah, terminalia ; Myrobalan, phyllanthus, terminalia ; Myrrh, balsamodendron ; Neem, melia ; Nemmy, ougeinia ; Nerija, elæodendron ; Nettle, sponia ; Oak, schleichera ; Odul, sterculia ; Olibanum, boswellia ; Orange, citrus ; Palmyra, borassus ; Pappily, ventilago ; Paulay, mimusops ; Peepul, ficus ; Physic nut, jatropha ; Piney, vateria ; Plum, prunus, spondias ; Pomegranate, punica ; Poon, calophyllum ; Portia, thespesia ; Pummelow, citrus ; Ratadel, artocarpus ; Red cotton, bombax ; Red sanders, adenanthera ; Red-wood, pterocarpus ; Sack tree, antiaris ; Sago palm, cycas ; Sapodilla, achras ; Satin-wood, chloroxylon ; Saul, shorea ; Scammony, convolvulus ; Sebestens, cordia ; Sesban, sesbania ; Shamee, prosopis ; Silk cotton, cochlospermum, cryptostegia, eriodendron ; Sirissa, albizzia ; Slow match, careya ; Soap nut, sapindus ; Storax, altingia, liquidambar ; Sundra, acacia ; Teak, tectona ; Toon, cedrela ; Tragacanth, sterculia ; Tungaid, cassia ; Vekkauly, anogeissus ; Whip tree, casuarina ; Wodier, odina ; Wood-apple, feronia ; Yaipy, hardwickia.——**(2)** The gums proper are sometimes divided into three heads, as follows.—"*a*" True gums. Acacia arabica [babool] ; Acacia catechu [catechu] ; Acacia farnesia [piyvail] ; Acacia ferruginea [anasandra] ; Acacia sundra [sundra] ; Adenathera pavonina [false red sanders] ; Ægle marmelos [bael] ; Anacardium occidentale [cashew] ; Anogeissus latifolia [vekkauly] ; Artocarpus integrifolia [jack] ; Barleria prionitis [common nail dye] ; Bassia longifolia [common mohwah] ; Bauhinia racemosa [small-flowered mountain ebony] ; Bauhinia retusa [nirpa mountain ebony] ; Bauhinia vahlii [large mountain ebony] ; Borassus flabelliformis [palmyra] ; Buchanania latifolia [chironjee] ; Careya arborea [coomby] ; Cassia fistula [common condray] ; Cedrela toona [toon] ; Chickrassia tabularis [chickrassy] ; Chloroxylon swietenia [satin-wood] ; Citrus decumana [pummelow] ; Citrus medica [lime] ; Cocos nucifera [cocoanut] ; Cordia rothii [narrow-leaved sebestens] ; Erythrina indica [common coral tree] ; Feronia elephantum [wood-apple] ; Garuga pinnata [garooga] ; Gossypium herbaceum [indian cotton] ; Gyrocarpus jacquini [tanakk] ; Heriteira littoralis [soondree] ; Holarrhena antidysenterica [tellicherry bark] ; Jatropha curcas [wild aumanac] ; Melia azadirachta [neem] ; Melia azedarach [large neem] ; Michelia champaca [champak] ; Mimusops elengi [ilanjy] ; Mimusops kauki [edible paulay] ; Morus indica [indian mulberry] ; Odina wodier [wodier] ; Phœnix sylvestris [wild date] ; Phyllanthus emblica [emblic myrobalan] ; Poinciana elata [soonkeswaram] ; Poinciana regia [foreign tungaid] ; Pongamia glabra [karanj] ; Prosopis spicigera [shamee] ; Prunus domestica [auloo chah] ; Prunus persica [shaft auloo] ; Punica granatum [anaur] ; Sapindus trifoliatus [soap-nut tree] ; Schleichera trijuga [ceylon oak] ; Semecarpus anacardium [marking nut] ; Soymida febrifuga [soymida] ; Spondias mangifera [wild mango] ; Sponia wightii [indian nettle] ; Tamarindus indica [tamarind] ; Tamarix dioica [cypress jhow] ; Terminalia arjuna [white murdah] ; Terminalia belerica [belleric myrobalan] ; Terminalia catappa [catapang] ; Terminalia tomentosa [murdah] ; Thespesia populnea [portia] ; Wrightia tinctoria [paula indigo] ; Zizyphus jujuba [bair].—"*b*" Pseudo gums. Ailantus excelsa [coromandel ailanto] ; Bombax malabaricum [red-cotton tree] ; Cochlospermum gossypium [golden silk cotton] ; Cycas circinalis [indian sago palm] ; Eriodendron anfractuosum [silk cotton] ; Macaranga indica [round-leaved nelumbo] ; Moringa pterygosperma [moringa] ; Sterculia balanghas [balanghas] ; Sterculia colorata [wild papaw] ; Sterculia fœtida [bastard poon] ; Sterculia urens [false kateerah].—"*c*" Astringent gums. Butea frondosa [palans] ; Sesbania grandiflora [west-indian sesban] ; Pterocarpus indicus [padouk] ; Pterocarpus marsupium [common vengay].——**(3)** For gum-resins see Googal ; for true resins see Raul ; for balsams see Balsam ; for oleo-resins see Teilam ; for elastics see Panchonty. For so-called mineral resins see also under Raul ; for animal gelatine see Vajram ; for vegetable gelatine see Nishastah ; for gum as a pharmacographical prefix, see Gum.

GONDY (ಗೊಂದಿ - gondi, *Can.* ; గొంది - gondi, *Tel.*). Lane. Suffix in place names ; as Holalgondy, meaning bright street.

GONG (జేగంట - dzáganta, *Tel.* ; சேமக்கலம் - shémakkalam, *Tam.*). Title from malay. Tel. from (jaya, san. victory + ghantá, san. bell). Tam. from (kshéma, san. security + kalam, tam. vessel). Formerly beaten by watchmen. Flat and generally circular piece of bell metal [cunts] beaten in temples [coil] at the time of worship [poojah]. A small gong is carried in hand by Dausaries [q.v.] and Pundaurams [q.v.], which they strike in begging alms. It is also used at non-bramin funeral ceremonies. In north of presidency it is used in private houses when worshipping household gods [ghantay, ghurry, griha devatay].

GOOD (கூடு - kúdu, *Tam.*). To join [coodal]. Cf. Coodoo and Coor.——*Gooda* (గూడ - gúda, Tel. ; கூடை - kúdai, Tam.). From (kúdu, tam. to unite). Basket [tokrah]. For irrigation used when water to be raised is nearly on a level with the surface of the field to be irrigated ; this is made impenetrable with a coating of cowdung [shauny] and clay [calimunn], and is suspended by four cords ; two men hold a cord in each hand, draw up the water, and empty it in balancing the basket with a swing [chuckram, yaittam]. Goodoo on Neilgherries is a basket of grain received by the Todahs [q.v.] as fee from the Kotar [q.v.], Iroolar [q.v.], and Badagas [q.v.].——*Goodalore* (ഗൂഡലൂർ - gútalúr, Mal. gúdalúr *). From (kútal, mal. meeting + úr, mal. village).—"*a*" Deputy tahsildarry, Neilgherry district. Pay Rs. 100 + Wynaud allowance Rs. 50.—"*b*" Village, Deputy tahsildar's station, Talook head-quarters, Sub-registrar's office, District moonsif's court, Public bungalow ; Neilgherry dist., Wynaud S.E. division ; lat. 11° 30′ ; long. 76° 32′ ; from Coimbatore N.W. 49 miles ; from Coonoor W.N.W. 23 miles ; from Devaulah E.N.E. 8 miles ; from Kotagherry W.N.W. 26 miles ; from Madras W.S.W. 280 miles ; from Ootacamund W.N.W. 15 miles ; from Pundalore E.N.E. 11 miles. At foot of ghaut [q.v.] of same name and at junction of main roads from Mysore and Malabar. Chief town of Numbalagode amshom [q.v.]. Since 1850 the centre of S.E. Wynaud coffee [q.v.] industry, and a place of growing importance. Transferred with surrounding country to jurisdiction of Neilgherry district in 1877. A hospital.—"*c*" Ghaut ; Neilgherry dist., Wynaud S.E. division ; from Goodalore E. 2¾ miles ; from Ootacamund W. 12 miles. So named from village at its base. The old trace was exceedingly rough and steep, the descent being only 4 miles. The new ghaut, which follows mainly the N. face of a spur of the hills, was completed in 1868. From the crest at Nediwuttam near Government cinchona [koinah] plantations to its base distance is 8 miles, and from thence to Goodalore 3 miles. The gradient is easy, being in no case more than one in nineteen. It has eight zigzags. From Goodalore a road runs N.E., and connects this line with Seegore line near Teppacaud, a distance of 11 miles.——*Goodauram* (గుడారము - gudáramu, Tel.). A tent [derah].——*Goodda* (ಗುಡ್ಡೆ - gudde, Can. ; గుడ్డ - gudda, Tel.). From (gudi, tel. circle) ; from being wound round the body. A cloth. The dress of a woman is a single cloth, generally colored [saury, sheelay]. See vol. I (98).——*Goodda* (ಗುಡ್ಡ - gudda, Can.). Hillock [gadda, gootta]. Suffix in place names. Plant first term often joining two genera. Ex., where transl. is of second term :—Careya arborea (guddadaippémara), bassia longifolia ; Elæocarpus lancæfolius (guddanérale), eugenia jambolana. See gloss paragraphs.——*Goodem* (గూడెము - gúdemu, Tel.). From (gúdu, tel. nest). Collection of huts. Suffix in place names ;

as Gollagoodem, meaning shepherds' hamlet [cooppam].——*Goodicutt* (గుడికట్టు - gudikattu, Tel.). From (gudi, tel. village + kattu, tel. tie). The whole extent of land attached to a village [ayacut].——*Goodivauda* (గుడివాడ - gudiváda, Tel.). See sep. title.——*Goodiyattam* (గుడియాతము - gudiyátamu, Tel.). See sep. title.——*Goodoor* (గూడూరు - gúdúru, Tel.). See sep. title.——*Goodoovancherry* (گرانچری - guráncharí, Hind.; கூடுவாஞ்சேரி - kúduváñjéri, Tam. gúduváncheri *). From (kúdu, tam. to meet + shéri, tam. village); junction village. Village, Post office, Railway station; Chingleput dist., Chingleput tal.; pop. 831; acres 552; lat. 12° 51′; long. 80° 07′; height 111 feet; from Chingleput N. 12 miles; from Sydapett S.W. 16 miles; from the sea W. 13 miles. Several cairns [maundavar coozhy]. Travellers' bungalow [q.v.]. Snipe [oollaun] east of this.——*Goody* (گڑی - gurí, Hind.; ಗುಡಿ - gudi, Can.; గుడి - gudi, Tel.; കുടി - kuti, *Mal.*; குடி - kudi, Tam.). From (kúdu, tam. to meet).—"*a*" Temple [coil, dewal, pagoda]. Suffix in place names; as Munnargoody, meaning king's temple.—"*b*" Agricultural village. Suffix in place names, especially in Madura and Tanjore, as Maungoody, meaning mango tree + village [coody].——*Goody* (గుడి - gudi, Tel.). From (kûdu, tam. to unite). Round [goondoo].——*Goomidy* (గుమ్మడు - gummudu, Tel.). Means clustering. Same as Cashmere tree.——*Goomma* (గుమ్మ - gumma, Tel.). From (kúdu, tam. to unite). Grain receptacle.——*Goommy* (గుమ్మి - gummi, Tel.). From (kúdu, tam. to unite). Corn-basket. Swamp [parroo].——*Goompany* (గుంపెన - gumpena, Tel.). Same as Wodier.——*Goompey* (ಗುಂಪೆ - gumpe, Can.). From (kúdu, tam. to bring together); heap [cooppa]. Hillock.——*Goondaur* (குண்டாறு - kundáru, Tam.). From (kundu, tam. rock + áru, tam. river). Sanscrit name (shanmukhanadi), meaning soobramanyan, the six-faced god + river. River; Madura dist., Tirmungalam tal. and Ramnaud zemindarry. Formed by junction of several streams rising in eastern slopes of Varshanaud and Andiputty ranges above Watrap, Oottapa naickanore, and Doddappa naickanore, and uniting about lat. 9° 36′ N.; long. 78° 12′ E. United stream flows south-east almost parallel to Veigay. Entering Ramnaud zemindarry on north near Cariyaputty, it takes a winding easterly course of about a mile, and thence turns almost south five miles passing by Toppoor and Paranjally, where it receives the Shevericottah flowing from the mountains in Tinnevelly district. It widens considerably at the confluence, and then flows south-easterly between Tirshooly and Pullimadam, washing the western wall of the fort, to Ilooppore. North of Ilooppore it is intersected by a brook from the highlands east of Pillaiyaurnuttam. From Ilooppore it winds eastwardly for six miles and passes by Mundal maunicam, and, flowing south-easterly two miles and a half, turns due south to Camoothy, running between the fort and town. East of this town it is obstructed by a large and massive stone dam, about 170 feet in length and 70 in breadth. A large channel [q.v.] called the Raghoonaut cauvery carries off its waters in an easterly direction to the Calary tank. It issues through the southern portion of the dyke, passes through the salt marshes lying below the village of Veigay, continues from Camoothy towards the south-east for 22 miles, and empties its surplus waters into the Gulf of Manaar at Mookkoorputnam in lat. 9° 8′ N.; long. 78° 33′ 30″ E. Total length 95 miles. The river is narrow and rapid. Its mouth is wide but shallow, and a heavy shoal renders free access of boats at the mouth impracticable.——*Goondla* (గుండ్ల - gundla, Tel.). Locative plural. Suffix in place names; as Gosigoondla, meaning pointed rocks.——*Goondlacumma* (గుండ్లకమ్మ - gundlakamma,* Tel.). From (gundu, tel. rock + kanama, tel. pass). Sanscrit name (gandiká) meaning declivity. River; Kurnool, Kistna, and Nellore districts. Rises in the Nullamalays near Goondlabramheshwar in lat. 15° 40′ N.; long. 78° 47′ E., and after receiving two mountain torrents, the Zampalair and Yenoomoolair, enters the plains through the gorge of Cumbum, and winding round the town of Cumbum, turns to the north, its easterly course being obstructed by the base of the Veligonda [q.v.] hills. Here it forms western boundary of Podily and south-western boundary of Darshy divisions of Nellore district. In the gap near Cumbum a dam 57 feet in height has been thrown up, and a fine sheet of water known as the Cumbum tank [q.v.] about 4 miles long by three or four broad and fifteen in circumference formed. After a tortuous course through Marcapore of nearly 40 miles, quits Kurnool district entering Kistna district at Moommadivaram, 10 miles from Vinoocondah. Below Moommadivaram it changes its course to the east and then to the south, and, flowing to the south and south-east of Ongole talook, falls into the sea near Pedda devarampaud about 12 miles north of Ongole. Present mouth is a mile south of the old mouth or Pauta goondlacumma, and not far from the villages of Goondaya pollem and Naccavaury pollem, hamlets of Devarampaud. It is always open, 602 yards during monsoons [q.v.] and 256 in hot season. At high tide water in the bar is $1\frac{1}{2}$ yards, and the river may be used for navigation for two miles inland. The fall of its bed is from three to four feet per mile. There are freshes in September, October and November. It has a perennial flow. A full fresh is sometimes 32 feet.——*Goondoo* (గుండు - gundu, Tel.; குண்டு - kundu, Tam.). Round, rock.——*Goondoo colata* (గుండుకొలత - gundukolata, Tel.). From (gundu, tel. round + kolutsu, tel. measure). Finding the area of a village by measuring the perimeter.——*Gooppa* (గుప్ప - guppa, Tel.; குப்பை - kuppai, Tam.). From (kuppintsu, tel. to collect). Heap. Suffix in place names [cooppa].——*Gootta* (ಗುಟ್ಟ - gutta, Can.; గుట్ట - gutta, Tel.). From (kúdu, tam. to unite). A heap of rocks [goodda]. Suffix in place names; as Bollagootta, mean white hill.——*Goottagoodda* (ಗುಟ್ಟ ಗುಡ್ಡ - guttagudda, Can.). A rocky hill.——*Gooty* (గుత్తి - gutti, Tel.). See sep. title.

GOOD (गुड् - gud, *San.*). To preserve, defend.——*Gola deepicay* (கோளதீபிகை - kólathíbigai, Tam.). From (góla, san. globe + dípiká, san. lamp). Modern tract by Sharvana permaul ayyan. Only known Tamul original work on geography [bhoogola shastram]. It consists of Pooraunic geography from the Sanscrit.——*Golah* (گولا - golá, Hind.). From (gol, hind. round); from the typical form. Granary [ganj, gunj].——*Golam* (गोल - góla, San.). From (gud, san. to defend). Globe. Golandauz, from (golah, pers. cannon ball + andáz, pers. thrower) is an artilleryman. Bhoogolam is earth [bhoomy] or terrestrial globe; bhagolam or khagolam is heaven or celestial globe. Golaurdham is a hemisphere; dacshina golaurdham is southern and oottara golaurdham is northern hemisphere; andagolam or egg-shaped globe is prolate spheroid, chapatagolam or flattened globe is oblate spheroid.——*Golayantram* (गोलयन्त्र - gólayantra, San.; ذات الحلق - zátulhalk, Ar.). San. means sphere + machine. Ar. from (zát, ar. possessed of + halk, ar. circle); instrument consisting of circles or rings merely and not a globe like the Hindoo instrument [maunam]. Armillary sphere. Vedha valayam is the intersecting circle of declination therein. The Golayantram is placed so that the axis shall point to the pole [dhroovam], and the horizon [cshitijam] be true by a water-level. The instrument being thus placed, the observer is instructed to look at the star Veidhrity [q.v.] through a sight fitted to an orifice at the centre of the sphere; and having found the star, to adjust by it the end of the sign [raushy] Pisces [meenam] on the ecliptic [craunty mundalam]. The observer is then to look through the sight at the yogam [q.v.] star of Ashwiny [q.v.], or at some other proposed object; and to bring the moveable circle of declination over it. The distance in degrees [bhaugam], from the intersection of this circle and ecliptic to the end of Meenam or Pisces, is its fixed longitude or dhroovacam [q.v.] in degrees; and the number of degrees on the circle of declination [craunty], from the same intersection to the place of the star [nacshatram], is its latitude or vicshaipam [q.v.], north or south. When the point measured to is the equinoctial colure [maishauyanamundalam] instead of the end of meenam, dhroovacam becomes sauyanam [q.v.]. It is considered by some that the Greek astronomers reckoned longitudes upon the ecliptic intersected by circles of declination instead of by circles of celestial latitude, in the manner which has been here explained [jyotisham].——*Goodam* (गुड - guda, San.). Treacle [goor].——*Goodauk* (गुडक - gudaka, San.; گڑاکو - gurákú, Hind.; ಗುಡಾಕು - gudáku, Can.; గుడాకు - gudáku, Tel.; ചക്കരപ്പുകയില - chakkarappukayila, Mal.; குடாக்கு - kudákku, Tam.). San. from (guda, san. sugar lump). Hind. from (gur, hind. treacle + áku, tel. leaf). Mal. from (chakkara, mal. jaggery + pukayila, mal. tobacco). Composition for the hookah [q.v.]. Consists of tobacco [pogauk], pounded with jaggery [q.v.], plantain [q.v.] fruit and sandalwood [sandal] powder, or some other aromatic.——*Googal* (वृक्षनिर्य्यास - vrikshaniryása, San.; مقل - mukl, Ar.; بوئے جہودان - búijahúdán, Pers.; گوگل - gogil, Hind.; گوگل - gúgal, Dec.; ಮರದಂಟು - maradantu, Can.; గుగ్గిలము - guggilamu, Tel.; ഗുല്ഗുലു - gulgulu, Mal.; மரப்பிசின் - marappisin, Tam.). Title through hindostany. San. from (vriksha, san. tree + niryása, san. gum). Pers. from (bú, ar. fragrance + jahúdán, pers. jews), being used by them as fumigatory [bdellium, mookul bdellium]. Hind. from (guggula, san. resin). Can. from (mara, can. tree + antu, can. gum). Tel. from (gud, san. to preserve), useful in nervous diseases. Tam. from (maram, tam. tree + pisin, tam. gum). Ar. also (aflátan). Gum-resin. Tree exudation consisting of true gum [gond] and resin [raul] mixed, so that it requires both water and alcohol to dissolve it entirely. These are chiefly used in medicine and perfumery. The best known googal is indian bdellium [q.v.], product of Balsamodendron roxburghii, arn., burseraceæ. The following however is a complete list of such:—Emulsive; Garcinia cambogia [malabar gamboge]; Garcinia mangostana [mangosteen]; Garcinia morella [ceylon gamboge]; Garcinia xanthochymus [yellow mangosteen]. Foetid; Dorema ammoniacum [ooshak]; Ferula galbaniflua [galbanum]; Ferula narthex [asafœtida]; Gardenia lucida [decamallee]. Fragrant; Balsamodendron mukul [mookul bdellium]; Balsamodendron myrrha [bole]; Balsamodendron roxburghii [indian bdellium]; Mangifera indica [mango]; Styrax benzoin [benzoin]. See gloss. paragraphs. The term googal is popularly confined to the last or fragrant class of gum-resin.——*Goolaca* (గులక - gulaka, Tel.). Shingles for roofings [parookkay cull].——*Goolancha* (गुडूची - gudúchí, San.; गुळवेल - gulavéla, Mahr.; अमृतवेल - amritavéla, Conc.; گلو - gilo, Ar.; گل بیل - gulbel, Dec.; گل بیل - gulbel, Pers.; گلنچا - gulanchá, Hind.; ಅಮೃತಬಳ್ಳಿ - amritaballi, Can.; ಅಮೃತಬೂರು - amritabúru, Too.; అమృతబళ్ళి ... - tippatíga, Tel.; ചിറ്റമൃത് - chittamritu, Mal.; ...

rasakinda, Singh.; சிந்தில் - shíndil, Tam.). Title from hindostany. San. from (gud, san. to protect). Mahr. from sanscrit. Ar. from (gudúchí, san. the plant). Pers. from (gul, pers. the plant + bel, pers. creeper). Hind. from sanscrit. Dec. from persian. Can. from (amrita, san. ambrosia + balli, can. creeper). Too. from (amrita, san. ambrosia + búru, too. creeper). Tel. from (tippa, tel. dunghill + tíga, tel. creeper). Mal. from (chiru, mal. small + amritu, mal. nectar, the plant). Singh. from (rasa, san. juice + kinda, singh. the plant). Tam. from (shí, tam. to destroy); medicinal. San. also (amritá), meaning not perishing [chebulic myrobalan, emblic myrobalan, wild bachnaug]; (sómavallí), meaning moon creeper; (góraksha), meaning cow-protecting; (pittaghní), meaning bile destroying; (bhishakpriyá), meaning dear to physicians [chebulic myrobalan]; (nirjará), meaning not perishing; (chhinnaruhá), meaning growing when cut; (vatsádaní), meaning edible to children; (jívantiká), meaning enlivening [indian nettle]; (vishalyá), meaning thornless; (madhuparní), meaning sweet-leaved; refers to sweetish variety. Hind. also (gurach), from sanscrit meaning cow protecting. Can. also (uganiballi); (amaradaballi), meaning nectar + creeper. Tel. also (manapála); (dúyutíga); (galúchi). Mal. also (amritu), meaning nectar; (peyyamritam), meaning raining nectar. Singh. also (kinda). Tam. also (amiruthavalli), meaning nectar creeper; (kaippuçíndil), meaning bitter variety; (narchíndil), meaning good + the plant; (porchíndil), meaning gold + the plant; refers to sweetish variety in hilly tracts, which is yellow within when broken; (shíndircharkkarai), meaning seendil sugar. the medicinal salt from stem. Title otherwise Amritavully, Bile-killer, Cow protector, Goolbel, Heart-leaved moon seed, Moon Creeper [gandhaulee, somam], Shindie, Somavully. Botanically Tinospora cordifolia, miers, menispermaceæ [vricsham, 5]. Alias Cocculus convolvulaceus, cordifolius; Menispermum cordifolium, glabrum, malabaricum. Twining shrub; bark thick corky, slightly tubercled; leaves alternate, roundish-cordate, with a broad sinus, shortly and sharply pointed, glabrous; racemes axillary or lateral, of male flowers longer than the leaves, pedicels several together, of female ones scarcely so long as the leaves; pedicels solitary; petals unguiculate; unguis linear, slightly margined upwards; limb triangular, ovate, reflexed; drupes two to three globose; flowers small, yellowish; flowering all the year. Runs over the highest trees; from the branches drop fibres, which enter the ground; found in every hedge. Goolancha root consists of dried transverse segments of the woody stem, varying in diameter from one-quarter of an inch to two inches, and from half an inch to two inches in length; they have a shrunken appearance, and are covered with a smooth shrivelled bark, some of the pieces being marked on their surface with warty prominences; inodorous, of a very bitter taste. The roots, stems, and a watery extract are medicinal; alterative, tonic, antiperiodic and antipyretic. Infusion; take of the stem or root, cut into small pieces and slightly bruised, two ounces and a half; boiling water, one pint; macerate in a covered vessel for two hours and strain. Tincture; take of the stem or root, cut into small pieces and bruised, five ounces; proof spirit, one pint; macerate for seven days in a closed vessel, with occasional agitation, filter and add sufficient spirit to make one pint. The watery extract palo [q.v.] is called indian quinine [koinah] by some hakeems [q.v.]; generally adulterated with cheaper substances; the real palo is either tasteless or slightly bitterish in taste, white in color if it is prepared from the roots, and greenish-white or greenish-brown if from the stems; it occurs in powder or loose and flat cake-like pieces; it is prepared easily by cutting the fresh stem into small pieces, which are bruised in a stone or wooden mortar and soaked in water from six to twelve hours; the mass is then rubbed, squeezed and separated from the fluid by straining the latter through cloth; the fluid being evaporated to dryness in the sun, the residue is the palo; the thicker the creeper or its root is, the better; the plant is known to attain sometimes the thickness of a man's arm. Doses; of the infusion, from one to three fluid ounces; of the tincture, from one to two fluid drachms; of the extract, from one to two drachms. Substituted for Jamaica sarsaparilla, Potass. iodid., Quinine and other alkaloids of cinchona [koinah], James powder, Pulv. cinchon. and Pulv. antimonialis. Goolancha when it grows on a margosa [neem] tree is most efficacious as a medicine. At ceremonies plant bruised and put into water, which is drunk by bramins [q.v.]. Cf. Somam. There are other species:—crispa, malabarica, tomentosa; equally tonic. Compare Indian berry.——*Goolican* (குளிகன் - kuligan, Tam.). One of the seven invisible planets [graham]:—Rahoo, kait, goolican, yamacandan, hastapraharan, caulan, arcan. Goolican is called son of saturn [shany]. Goolica caulam is the time when goolican is in motion in a certain fixed direction in each day of the week; this is marked in calendar [punchaungam] and regarded as auspicious [rahoocaulam, vauram].——*Gooligey* (ಗುಳಿಗೆ - gulige, Can.). From (guda, san. ball). Globular. The form గు with a numeral is employed in old accounts for expressing pagodas [q.v.]. Also pill in pharmacy.——*Goor* (گُر - gur, Hind.; గుడము - gudamu, Tel.). From (gud, san. to preserve). Jaggery [goodam, jaggery].——*Gowda* (गौड़ - gauda, San.; گَوڑ - gaur, Hind.). From (guda, san. sugar), the sugar country. From the province and now ruined city of Gowr, long the capital of Behar and Bengal. Supposed to be the Gangia regia of Ptolemy. One of the two-fold divisions of Bramins [q.v.], into Gowda or Northern and Dravida or Southern. Also as Gowdas proper, a sub-division of the general Gowdas. At present the languages which may be considered Gowda are the Bengalee, Hindee, Hindostany, Punjauby, Goozeratty and Mahratta [bhaushay, jauty]. Distinguish from the canarese form of Gownden [q.v.]. See vol. II, 226.——*Gowdee* (गौड़ी - gaudí, San.). The Bengal dialect.——*Gowndla* (గౌండ్ల - gaundla, pl. obl., Tel.). From (gaudí, san. spirit from molasses). Caste of toddy [q.v.] drawers. Numbers about 40,000 [jauty]. Distinguish from Gaundla.——*Gowra* (गौर - gaura, San.). Bengalee form of Gowda.

GOODA (ଗଡ଼ - gudá, *Oor.*). Fort [gada, ghur, godo].

GOODIVAUDA (గుడివాడ - gudiváda,* *Tel.*). From (gudi, tel. temple + váda, tel. street) [good]. Sanscrit name (bhíméshvara), meaning bheeman [q.v], the hero + lord.——**(1)** Talook, Kistna district. Tahsildar's pay Rs. 200. Area 595 square miles. Language Teloogoo. Deltaic talook north of Masulipatam and comprising greater part of Colair lake. Bounded north by Ellore talook of the Godavery district, and east by Bheemavaram talook in Godavery district, south by Bunder talook, west by Noozveed zemindarry. Plain low lying. Regar [q.v.] soil. Paddy [q.v.], gunny [q.v.] bags and cumblies [q.v.]. Irrigation by Kistna anicut [q.v.]. Places of archæological interest:—Colair lake, Colleticote, Conoocull, Cowtaram, Culdindy, Goodivauda, Keicalore, Mundapaud, Singanapoody, Vinnacote. The leading places, &c., in the talook are the following.——*Boodamair* (బుడమేరు - budaméru, Tel.). See sep. title.——*Chevendra** (చేవేంద్ర - chévéndra, Tel.). From (ché, tel. field + véndramu, tel. heat). Zemindarry, Village; pop. 1,039; square miles 3·23; lat. of village 16° 21′; long. 81° 09′; from Goodivauda S.E. 10 miles; from Masulipatam N.N.W. 12 miles. Peshcush Rs. 4,728.——*Colair* (కొల్లేరు - kolléru, Tel.). See sep. title.——*Colleticote* (కొల్లేటికోట - kollétikóta, Tel.). See sep. title.——*Conoocull* (కోనకొల్లు - konukollu, Tel.). From (kona, tel. corner + kollu, tel. pond). Village; pop. 1,329; acres 2,613; lat. 16° 28′; long. 81° 10′; from Goodivauda E.N.E. $8\frac{3}{4}$ miles; from Masulipatam N. 19 miles. Fort said to have been built by Reddies [q.v.]. Captured by Captain Macleane of Colonel Forde's army on 3rd March 1759. Mussalman coins are found.——*Cowtaram* (కౌతరము - kautaramu, Tel.). From (gautamu, tel. pasture + pura, san. town). Village, Assistant engineer's head-quarters; pop. 2,414; acres 3,299; lat. 16° 20′; long. 81° 07′; from Goodivauda S.E. $8\frac{1}{4}$ miles; from Masulipatam N.N.W. 11 miles. Probably Booddhist. Temple built by Reddy chiefs.——*Culdindy* (కల్దిండి - kaldindi, Tel.). From (kallu, tel. stone + dindi, tel. stumps). Village; pop. 2,104; acres 8,780; lat. 16° 30′; long. 81° 21′; from Goodivauda E.N.E. $20\frac{3}{4}$ miles; from Masulipatam N.N.E. 24 miles. On a large plain of black soil [regar]. Old mud fort built by Mahomedans. Shiva temple of Bhogeshwarasawmy. Festival on Shivarautry [pundigay, 6a] in February. Stone-built reservoir with two perennial springs in front of temple.——*Goodivauda* (గుడివాడ - gudiváda, Tel.). See below.——*Goorza* (గురజ - guradza, Tel.). From (kuraja, tel. class of shepherds so called). Village; pop. 2,269; acres 1,721; lat. 16° 25′; long. 81° 08′; from Goodivauda E.S.E. $7\frac{1}{4}$ miles; from Masulipatam N. 16 miles. Residence of family of Caumadauna zemindars.——*Keicalore* (కైకలూరు - kaikalúru, Tel.). See sep. title.——*Paumarroo* (పామర్రు - pámarru, Tel.). From (pámu, tel. snake + arru, tel. neck of land). Village; pop. 2,949; acres 4,476; lat. 16° 20′; long. 81° 00′; from Goodivauda S.S.W. $7\frac{3}{4}$ miles; from Masulipatam N.W. 14 miles. Bunder canal sends off branch here to irrigate Goodivauda talook. Lock and bridge. Choultry [q.v.].——*Vinnacote* (విన్నకోట - vinnakóta, Tel.). From (vinna, tel. dilapidated + kóta, tel. fort). Village; pop. 1,942; acres 3,491; lat. 16° 23′; long. 81° 07′; from Goodivauda S.E. $7\frac{1}{4}$ miles; from Masulipatam N.N.W. 13 miles. Inscription north-east of the village dated A.D. 1438.——**(2)** Town, Tahsildar's head-quarters; Kistna dist., Goodivauda tal.; pop. 4,732; acres 5,066; lat. 16° 26′; long. 81° 02′; from Bezwada E. 25 miles; from Guntoor E.N.E. 37 miles; from Madras N.N.E. 236 miles; from Masulipatam N.N.W. 20 miles; from Vinoocondah E.N.E. 84 miles. Ruined Booddhist [booddha] tope [q.v.] almost demolished. Four caskets found in it. West is a fine Jeina [q.v.] statue, also the site of old village. Andhra coins [naunyam], metal stone and glass beads [munkah] of all kinds of good workmanship, and heaps of massive pottery [chatty] have been found amongst the gravel and earth. Bheemeshwaran temple with inscriptions.

GOODIYATTAM (గుడియాతము - gudiyátamu, *Tel.*; குடியாத்தம் - kudiyáttam, *Tam.* gudiyátam*). From (gudi, tel. temple + yátamu, tel. picottah) [good].——**(1)** Talook, North arcot district. Tahsildar's pay Rs. 175. Area 446 square miles. Length from S.W. to N.E. nearly 50 miles, average breadth 9 miles. Population 176,709. Language Tamul. S. centre of district. Forms a long strip lying upon N. bank of Palaur and opposite Vellore talook. Bounded west by Pulmanair; north by Chittore; its narrow eastern border adjoins Wallajahpet, the

Poyney marking the boundary. The western portion is composed of hills, spurs of the Eastern ghauts [q.v.], interspersed with valleys. The Chittore hills run for a short distance into the north. The strip which borders the Palaur is generally flat. Chief elevations are Codimoocmala, Keilausagherry or Amboor droog, Sautghur hills, and Vandarantaungal hill. About 50 square miles are covered with jungle which produces timber only fit for fuel. Soil is good, being generally a mixture of sand and red clay; in a few parts it is blackish resembling black cotton soil [regar], and more commonly a grey compound of sand and dark clay. Very rich in iron [auhan]. Lime [choonam] and building stone [cull] are also quarried to a large extent. The chief manufacture is that of female cloths [sheelay]. In a few villages coarse cumblies [q.v.] are made by Coorumbar [q.v.]. Superior pottery [chatty] is also made from clay [calimunn]. Besides Palaur and Poyney, which flow along borders, there are small rivers rising in hills and flowing S. into Palaur, as the Cowndinyanuddy or Goodiyattam and the Goddaur or Amboor. Sixty-three spring channels [q.v.]. The Poyney anicut [q.v.] feeds five tanks [q.v.]. Chief tanks are Cautpaudy, Cauvanore, Chervangy, Cumbaroyapooram, Daurapadavaid, Lauttairy, and Veppore. Places of archæological interest:—Amboordroog, Bramhapooram, Caungyanullore, Cauraputt, Cauvanore, Chervangy, Cholamore, Comauramungalam, Coogaynullore, Eeshamputt, Keelputt, Kemparajapooram, Lauttairy, Malayambutt, Malayaputt, Oodayendram, Oolly, Pasboomauttore, Pullaundiputt, Rajacull, Saitoocaray, Sautghur, Tennamputt, Tirmany, Tirvallam, Toottiputt, Veppore. Principal Trig. station:—Sautghur. The leading places, &c., in the talook are the following.——*Amboor droog* (ஆம்பூர்துருக்கம் - ámbúrtturukkam, Tam.). See Amboor.——*Caungyanullore* (காங்கயநல்லூரு - kángayanallúru, Tam.). From (gángéya, san. gold + nal, tam. good + úr, tam. village); cf. caungyam. Sanscrit name (gangéshvarapura), means town of gangeshwaran, a deity. Village; pop. 1,707; acres 1,438; lat. 12° 57′; long. 79° 12′; from Chittore S.S.E. 19 miles; from Goodiyattam E. 19¼ miles.——*Cauraputt* (காரப்பட்டு - kárappattu, Tam.). From (kárai, tam. thorny webera, canthium parviflorum, lam. + pattu, tam. village). Village; acres 11,936; lat. 12° 46′; long. 78° 41′; from Chittore S.W. 43 miles; from Goodiyattam S.W. 20 miles. Rock-cut cave with frescoes.——*Cautpaudy* (காட்டுப்பாடி - káttuppádi, Tam. kátpádi *). From (kádu, tam. jungle + pádi, tam. village). Village, Railway station; pop. 2,511; acres 4,105; lat. 12° 58′; long. 79° 11′; height 696 feet; from Chittore S.S.E. 18 miles; from Goodiyattam E. 18¾ miles. Junction of Goontacull and Villoopooram, sections of respectively Madras and S. indian railway lines.——*Cauvanore* (காவனூர் - kávanúr, Tam.). From (ká, tam. grove + van, tam. great + úr, tam. village). Village; pop. 1,681; acres 1,788; lat. 12° 57′; long. 79° 01′; from Chittore S.S.W. 20 miles; from Goodiyattam E. 7½ miles. Jeina [q.v.] remains.——*Codimoocmala* (కోడిముక్కుమల - kódimukkumala, Tel.). From (kódi, tel. fowl + mukku, tel. beak + mala, tel. mountain). Hill; resemblance to fowl's beak.——*Cowndinyanuddy* (కౌండిన్యనది - kaundinyanadi, Tel.). See sep. title.——*Dhaura padavaid* (தாராப்படவேடு - táráppadavédu, Tam.). From (dhárá, san. stream + padavédu, tam. town so called). Village; pop. 3,323; acres 2,696; lat. 12° 58′; long. 79° 11′; from Chittore S. 17 miles; from Goodiyattam E. 18 miles. Tank. Vellore railway station.——*Goodiyatam* (குடியாத்தம் - kudiyáttam, Tam.). See below.——*Lauttairy* (இலாட்டேரி - ilátteri, Tam.). From (lát, hind. pillar + éri, tam. tank). Village; pop. 1,922; acres 1,698; lat. 12° 58′; long. 79° 07′; from Chittore S. 17 miles; from Goodiyattam E. 14 miles. Jeina remains. Tank.——*Mahadevamullay* (மகாதேவமலை - magáthévamalai, Tam.). From (mahá, san. great + déva, san. god + malai, tam. mountain). Village, Hill; pop. 1,283; lat. 13° 00′; long. 79° 00′; from Chittore S.S.W. 18 miles; from Goodiyattam E.N.E. 7½ miles. Sacred temple of Shiva on hill. The pious place cooked rice [q.v.], ghee [q.v.], and milk [paul] in hollows of rock. Two vultures [gidh] appear exactly at noonday, bathe in the milk, eat the rice and ghee, and fly away. Said never to die, and to come every day from Tircalicoondram in Chingleput district, where they are always seen at 10 A.M. They are the abodes of the spirits of two Bramins, Shambaran and Sampauty.——*Malayambutt* (மலயம்பட்டு - malayambattu, Tam.). From (malayam, tam. mountain + pattu, tam. village). Village; acres 1,237; lat. 12° 46′; long. 78° 42′; from Chittore S.W. 43 miles; from Goodiyattam S.W. 20 miles. Painted rock.——*Oodayendram* (உதயேந்திரம் - uthayéndiram, Tam.). From (udaya, san. rising + indra, san. the god). Village; pop. 2,677; acres 1,356; lat. 12° 42′; long. 78° 40′; from Chittore S.W. 48 miles; from Goodiyattam S.W. 24¼ miles. 1½ north of Vaniyambaudy railway station. Temple with inscriptions.——*Palaur* (பாலாறு - páláru, Tam.). See sep. title.——*Pernambutt* (பேரணம்பட்டு - peranambattu, Tam.). From (pér, tam. great + aranam, tam. jungle fort + pattu, tam. village). Village; pop. 4,639; acres 4,984; lat. 12° 56′; long. 78° 46′; from Chittore S.W. 32 miles; from Goodiyattam W. 10½ miles. Large trading town, a mile from Sautghur. Population chiefly Lubbays [q.v.] trading in jaggery [q.v.], ghee [q.v.], tamarinds [q.v.] and hides [chamrah], which they collect in Pulmanair talook and bring down upon bullocks by the Talapoolla ghaut [q.v.]. Handsome mosque [musjid] of modern date.——*Poyney* (పొయిని - póyini, Tel.). See sep. title.——*Sautghur* (साटगड़ - sátgarh, Hind.). See sep. title.——*Shengoondram naud* (செங்குன்றம்நாடு - shengunramnádu, Tam.). From (shem, tam. red + kunram, tam. hill + nádu, tam. country). Pop. 1,548; acres 3,477; lat. 13° 00′; long. 78° 54′; from Chittore south-west 21 miles; from Goodiyattam north 4 miles. Part of Padoovore cottam in the ancient Tondaimundalam [q.v.]. In the present Goodiyattam talook, North arcot district.——*Synigoonta* (శ్యానిగుంట - shyánigunta, Tel.). See sep. title.——*Tirvallam* (திருவல்லம் - tiruvallam, * Tam.). (From tiru, tam. holy + villam, tam. holy bael tree, ægle marmelos, corr.). Sanscrit name (shríbilvakshétra), means holy place of bael trees, ægle marmelos, corr.; also (bilvakshétra), means place of bael trees. Village, Railway station; pop. 1,326; acres 706; lat. 12° 59′; long. 79° 18′; height 629 feet; from Chittore S.E. 20 miles; from Goodiyattam E. 26¾ miles. On the Poyney. Temple to Vilvanauteshwaran. Devotees worship with the leaves of Vilvam [bael]. Large tank.——*Vandarantaungal* (வெண்டாரந்தாங்கல் - vendarandángal, Tam.). From (ven, tam. white + taram, tam. hill + tángal, tam. pond). Village; pop. 1,981; acres 4,162; lat. 12° 59′; long. 79° 10′; from Chittore S. 16 miles; from Goodiyattam E. 17½ miles. Two miles north of Vellore railway station.——**(2)** Town, Tahsildar's station, Railway station; North arcot dist., Goodiyattam tal.; pop. 18,747; acres 704; lat. 12° 57′; long. 78° 55′; height 867 feet; from Arnee W.N.W. 34 miles; from Chittore S.W. 24 miles; from Madras W. 96 miles; from Ranipett W. 31 miles; from Tripatty S.W. 60 miles; from Vellore W. 18 miles. Three miles north of Palaur. Divided into two by Cowndinyanuddy. Includes six suburbs. The town is modern. Temple, built 250 years ago by a Canarese named Holiyappa, in honor of Baula shaurdooleshwaran. Chief industry is weaving. Lubbays [q.v.], Vauniyar [q.v.], and Canarese merchants carry on trade. The first in jaggery [q.v.], hides [chamrah], tamarind [q.v.], tobacco [pogauk], and ghee [q.v.]; the second in grain [dhaunyam] and oil [yennay]; the last keep petty shops and are money lenders. Large cattle [maud] fair every Tuesday which rivals that of Ranipett. The Synigoonta pass [ghaut] leads hence to Mysore.

GOODOOR (గూడూరు - gúdúru, *Tel.* gúdúr *). From (gúdu, tel. hut + úru, tel. village) [good]. Greek for the Kistna village κόδουρα.——**(1)** Zemindarry, Village; Kistna dist., Bunder tal.; pop. 3,580; acres 2,609; lat. of village 16° 13′; long. 81° 07′; from Masulipatam N.W. 3¾ miles; from the sea W. 7½ miles. Peshcush Rs. 35,588. Large village on the Hyderabad road. Fragrant flower plants are grown here.——**(2)** Talook, Nellore district. Tahsildar's pay Rs. 200. S. coast part of district. Bounded:—north by Nellore talook; west by Raupore talook; south in part by Polore division; E. by sea. The Shreeharicote division, the southernmost portion, formerly appertained to Madras district but was transferred in 1865. The climate is healthy except in Shreeharicote. The eastern part contains handsome topes [q.v.] of palmyra [q.v.] and casuarina [chowkmaram] trees and has a good supply of water. Numerous mango [q.v.] and margosa [neem] trees with extensive paddy [q.v.] fields. The western part is dry and the scarcity of water is felt in some years. In the south, comprising Shreeharicote range, there are extensive thick jungles the products of which are largely exported to Madras by the Buckingham canal [q.v.] which runs close by. The soil is fertile for the most part. The western part of the talook is rocky and is suited for cultivation of dry crops. Agriculture forms chief industry; paddy and indigo [q.v.] are largely exported. Weaving to some extent. The north-eastern part is irrigated under Pennair anicut [q.v.]; the rest by tanks [q.v.] and small ponds. Though the Swarnamookhy river is seldom in freshes for more than a few days at a time, it supplies water to tanks in the south. Camping grounds:—Bhairipett, Boodanam, Bramhadevam, Cadivaid, Causipooram, Chendode, Chengalpollem, Chennore, Chintavaram, Chittaid, Chittamore, Cottapatam, Cullore, Doogarauzpatam, Doorgavaram, Eepoor, Goodoor, Goonoopaud, Goorvindapoody, Kistnapatam, Kotah, Lutchmakka khandriga, Manoobole, Metta, Momidy, Mootcore, Moottembauca, Moottiaulpaud, Muddauly, Nellipoody, Pambaly, Pidatapolore, Ponnavole, Poody, Pootsalapully, Reddipollem, Roodravaram, Royadorvoo, Sarwapully, Siddhavaram, Toopily, Totacutla, Vaucaud, Vaulamaid, Venaud, Vencatachellam choultry, Vendode, Vulloor, Wodore, Wojelly, Yairore, Yargautipulley, Yellashiry. Places of archæological interest:—Armegam, Doogarauzpatam, Monapollem, Penoobarty, Shreeharicote. Principal Trig. stations:—Bandaldorvoo, Bullavole, Canoopore, Cottapatam, Doogarauzpatam, Goodaly, Jonangipollem, Kistnapatam, Oottamanellore, Poolinjericooppam beacon, Pootsalapulley. The leading places, &c., in the talook are the following.——*Armegam* (ஆறுமுகம் - árumugam, Tam.). See sep. title.——*Bandaldorvoo* (బండలదొరువు - bandaladoruvu, Tel.). From (banda, tel. rock + doruvu, tel. well). Trig. station; lat. 14° 18′ 11·20″; long. 79° 58′ 40·64″; height 149 feet; from Canoopore S.E. 3 miles; from Goodoor N.N.E. 12 miles; from the sea W. 14 miles.——*Blackwood's harbour* (మొనపాలెమురేవు - monapálemurévu, Tel.). See sep. title.——*Bullavole* (బల్లవోలు - ballavólu, Tel.). From (balu, tel. lofty + prólu, tel. town). Trig. station; lat. 14° 6′ 53·89″; long. 80° 5′ 33·68″

from Canoopore W. 2 miles; from Goodoor E.S.E. 14 miles; from the sea W. 5 miles.——*Cadivaid* (కడివేడు - kadivédu, Tel.). From (kada, tel. corner + vídu, tel. town). Village; pop. 1,749; acres 7,774; lat. 14° 50′; long. 79° 57′; from Goodoor S.E. 6¼ miles; from Nellore S.S.W. 27 miles; from the sea W. 15 miles. A ruined fort built before the Mahomedan government by Raivillavaur family.——*Canoopore* (కనుపూరు - kanupúru, Tel.). From (kanapa, tel. a grass, vitis carnosa, wall. + úru, tel. village). Trig. station; lat. 14° 7′ 25·70″; long. 80° 8′ 5·73″; from Bullavole E. 2¾ miles; from Goodoor E.S.E. 16 miles; from the sea W. 2 miles.——*Chella caulwa* (చల్లకాలువ - tsallakálava, Tel.). From (tsalla, tel. cool + kálava, tel. stream). Small river. This is the lower portion of the stream of water called Maumidy caulwa from its source up to its junction with Swarnamookhy at Goodaly, and Chella caulwa from this point to its mouth. It takes its rise in a jungle near Attivaram and flowing through Wojelly, Cooroogonda, Goodaly, and Kotah, falls into the Bay of Bengal at Siddhavaram.——*Chennore* (చెన్నూరు - chennúru, Tel.). See sep. title.——*Chillacore* (చిల్లకూరు - chillakúru, Tel.). From (chilla, tel. small + úru, tel. village). Village; pop. 675; acres 2,676; lat. 14° 8′; long. 79° 55′; from Goddoor S.S.E. 1½ miles; from Nellore S.S.W. 23½ miles; from the sea W. 18 miles. On route from Madras to Nellore.——*Chintavaram* (చింతవరము - chintavaramu, Tel.). From (chinta, tel. tamarind, tamarindus indica, linn. + pura, san. town); from abundance of tamarind [q.v.] trees in the village. Village; pop. 580; lat. 14° 09′; long. 80° 05′; from Goodoor E. 12 miles; from Nellore S.S.E. 22 miles; from the sea W. 6 miles. Ruined fort built by Reddy royadoo, once a renter under the Zemindar of Vencatagherry.——*Condoor pollem* (కొండూరుపాలెము - kondúrupálemu, Tel.). From (konda, tel. hill + úru, tel. village + pálemu, tel. fortified village). Village, a hamlet of Doogarauzpatam; lat. 14° 00′; long. 80° 12′; from Goodoor E.S.E. 22½ miles; from Nellore S.S.E. 33 miles; from the sea W. ½ mile. The bar is opposite to the Doogarauzpatam travellers' bungalow [q.v.].——*Cottapatam* (కొత్తపట్నము - kottapatnamu, Tel.). From (kotta, tel. new + pattana, san. town). Trig. station at the beacon; lat. 14° 5′ 37·95″; long. 80° 10′ 31·72″; from Goodoor E. 18 miles; from Siddhavaram E. 2 miles; from the sea W. 1 mile.——*Doogarauzpatam* (దుగరాజపట్నము - dugarájapatnamu, Tel.). See sep. title.——*Goodaly* (గూడలి - gúdali, Tel.). From (kúdali, tel. junction), at junction of swarnamookhy and chella caulwa. Village; pop. 1,050; acres 3,386; lat. 14° 01′; long. 80° 04′; from Goodoor S.E. 14½ miles; from Nellore S. 30½ miles; from the sea W. 9 miles. Built by a Chola tondiman [q.v.]. At the junction of the Swarnamookhy and Chella caulwa. Annual festival of Sangameshwara sawmy about March or April. Fine handkerchiefs [roomaul] made. Trig. station in lat. 14° 01′ 09·45″; long. 80° 03′ 40·54″; height 299 feet; from Chendode S. 1½ miles; from Goodoor S.E. 14 miles; from the sea W. 9 miles.——*Goodoor* (గూడూరు - gúdúru, Tel.). See below.——*Iroocam* (ఇరుకము - irukamu, Tel.). From (iruku, tel. narrow). Island, in Poolicat lake, Goodoor talook; lat. 13° 34′; long. 80° 11′; from Nellore S. 61 miles; from the sea W. 8 miles.——*Jonangipollem* (జోనంగిపాలెము - dzónangipálemu, Tel.). From (dzónangi, tel. mahomedan of lowest order + pálemu, tel. fortified village). Trig. station; lat. 13° 38′ 36·46″; long. 80° 13′ 56·10″; height 31 feet; from Goodoor S.S.E. 42 miles; from Jonangipollem S. 1 mile; from the sea W. 3 miles——*Kistnapatam* (కృష్ణపట్నము - krishnápatnamu, Tel.). See sep. title.——*Kota* (కోట - kóta, Tel.). See sep. title.——*Manoobole* (మనుబోలు - manubólu, Tel.). From (mannu, tel. wild ox + prólu, tel. town). Village, Railway station; pop. 3,038; acres 13,388; lat. 14° 12′; long. 79° 55′; from Goodoor N.N.E. 3½ miles; from Nellore S.S.W. 19 miles; from the sea W. 17 miles.——*Momidy* (మోమిడి - mómidi, Tel.). After a barber of that name. Village; pop. 2,668; acres 7,610; lat. 14° 12′; long. 80° 05′; from Goodoor E.N.E. 13 miles; from Nellore S.S.E. 18 miles; from the sea W. 5½ miles. Ancient temple to Coota coteshwaraswamy on southern bank of Kistnapatam backwater.——*Monapollem* (మోనపాలెము - monapálemu, Tel.). See sep. title.——*Mootcore* (ముత్తుకూరు - muttukúru, Tel.). See sep. title.——*Moottyaulpully* (ముత్యాలపల్లి - mutyálapalli, Tel.). From (muttayya, tel. proper name + palli, tel. village). Village; pop. 977; lat. 14° 07′; long. 79° 56′; from Goodoor S.E. 3¾ miles; from Nellore S.S.W. 24¼ miles; from the sea W. 16¾ miles.——*Oottamanellore* (ఉత్తమనెల్లూరు - uttamanellúru, Tel.). From (uttama, san. the best + nellúru, tel. place so called). Trig. station; lat. 14° 3′ 42·35″; long. 80° 7′ 8·62″; from Carlapoody S. 1½ miles; from Goodoor E.S.E. 17 miles; from the sea W. 4 miles.——*Paumanjy* (పామంజి - pámanji, Tel.). From (pámu, tel. snake + anja, tel. mark). Village, Port; pop. 314; lat. 14° 04′; long. 80° 09′; from Goodoor E.S.E. 18½ miles; from Kistnapatam S. 15¾ miles; from Madras N. 67¼ miles; from Nellore S.S.E. 28 miles; from Toopily N. 3½ miles. Near mouth of Swarnamookhy. Exports native ornaments and grain.——*Poody royadorvoo* (పూడిరాయదొరువు - púdiráyadoruvu, Tel.). From (púdi, tel. place so called + ráyadu, tel. king + doruvu, tel. well). Tel. also (púdi), meaning village. Village, Point; lat. 13° 52′; long. 80° 16′; from Goodoor S.E. 31½ miles; from Nellore S.S.E. 43¾ miles. Chuttram [q.v.] on the beach, and a building erected by the Zemindar [q.v.] of Vencatagherry.——*Poolinjericooppam beacon* (పులింజేరికుప్పంస్తంభము - pulinjérikuppamdípastambhamu, Tel.). From (puli, tam. tamarind tree, tamarindus indica, linn. + shéri, tam. village + kuppam, tam. village). Trig. station; lat. 13° 37′ 11·66″; long. 80° 16′ 57·73″; from Goodoor S.E. 45 miles; from Pulleveedhy E. 1½ miles; from the sea W. ½ mile.——*Pootsalapully* (పుచ్చలపల్లి - puttsalapalli, Tel.). From (puttsa, tel. a kind of melon, cucumis trigonus, roxb. + palli, tel. village). Trig. station; lat. 14° 2′ 25·92″; long. 80° 8′ 51·79″; from Goodoor E.S.E. 18 miles; from Vaulamaid N.W. ¾ mile; from the sea W. 2¼ miles.——*Sarwapully* (సర్వపల్లె - sarvapalle, Tel.). See sep. title.——*Shreeharicote* (శ్రీహరికోట - shríharikóta, Tel.). See sep. title.——*Swarnamookhy* (స్వర్ణముఖి - svarnamukhi, Tel.). See. sep. title.——*Tammenapatam* ((తమ్మెనపట్నము - tammenapatnamu, Tel.). See sep. title.——*Tayappa chuttram* (తయ్యప్పసత్రము - tayappasatramu, Tel.). From (tayappa, tel. proper name + satramu, tel. choultry). Called after Tayappa moodelly who built the choultry [q.v.]. Village; lat. 14° 02′; long. 80° 11′; from Goodoor E.S.E. 20½ miles; from Nellore S.S.E. 30½ miles; from the sea W. ½ mile.——*Tinnelapoodu* (తిన్నెలపూడి - tinnelapúdi, Tel.). From (tuniya, tel. piece + púdi, tel. village); because granted out piece-meal. Village; pop. 392; acres 980; lat. 14° 01′; long. 80° 05′; from Goodoor S.E. 16 miles; from Nellore S.S.E. 31 miles; from the sea W. 7½ miles. On bank of Swarnamookhy south of Kota. A renter called Velama condama naidoo made a grant of portions of land taken from the three villages of Kota, Vaucaud, and Yargautipulley to a bramin, Oroogunty anna daunam bhatt, an ancestor of the present curnum [q.v.]. There are some stone idols [vigraham] here, probably belonging to the Jeinas [q.v.].——*Toopily* (తూపిలి - túpili, Tel.). From (túrpu, tel. east + palli, tel. village). Village, Port; pop. 3,245; lat. 14° 01′; long. 80° 09′; from Armegam N.W. 10½ miles; from Goodoor E.S.E. 19½ miles; from Madras N. 64½ miles; from Nellore S.S.E. 31 miles; from Paumanjy S. 3½ miles. Between the Swarnamookhy river and Armegam. Of little importance and attached to Doogarauzpatam as a subordinate port. Exports native ornaments, &c., and grain in large quantities.——*Vaucaud* (వాకాడు - vákádu, Tel.). See sep. title.——*Vencatachellam choultry* (వెంకటాచలముసత్రము - venkatáchalamsatramu, Tel.). See sep. title.——*Vindoor* (విందూరు - vindúru, Tel.). From (vindu, tel. feast + úru, tel. village). Village; pop 1,879; acres 6,825; lat. 14° 11′; long. 79° 52′; from Goodoor N.W. 3½ miles; from Nellore S.S.W. 21 miles; from the sea W. 20 miles. Good mats [boriyah] and red handkerchiefs [roomaul] are made.——**(3)** Town, Head-quarters of Tahsildar and Special Sub-registrar, Railway station, C.N.S.R.; Nellore dist., Goodoor tal.; pop. 5,749; acres 11,859; lat. 14° 09′; long. 79° 54′; from Madras N.N.W. 77 miles; from Naidoopett N. 16¾ miles; from Nellore S.S.W. 22½ miles; from Ongole S. 95 miles; from the sea W. 18¼ miles. On trunk road. Travellers' bungalow [q.v.] and good choultry [q.v.], dry, and mainly treeless.

GOODRY (گودری - gúdrí, *Hind.*). Means tattered clothes. A quilt particularly of a fakeer [q.v.] made up of rags of various cloths sewed together [rizye].

GOOJASTA (گذشته - guzashtah, *Hind.*). From (guzashtan, pers. to pass). Past.——*Saulgoojasta* (سال گذشته - sáliguzashtah, Hind.). From (sál, pers. year + above). Last year [saul].

GOOL (گل - gul, *Hind.*). From persian. Any flower, but especially the rose. Botanically the Rosa genus, rosaceæ [vricsham, 49]. Erect, sarmentose or climbing shrubs, usually prickly; leaves pinnate; leaflets serrate; flowers terminal, solitary or corymbose, white, yellow, or red; cultivated for the beauty of flowers; propagated by cuttings. The species best known to the natives are shown below. They sometimes include under gool, other genera; as gomphrena, hibiscus, nerium, papaver, poinciana.——**(1)** *Cabbage rose* (शतपत्री - shatapatrí, San.; गुलाब - gulába, Mahr.; गुलाबि - gulábi, Conc.; وردالاحمر - vardulahmar, Ar.; گل صد برگ - gulisadbarg, Pers.; گلاب پیر - guIábkáper, Hind.; گلاب جہار - gulábkájhár, Dec.; مور - mawar, Malay; ಗುಲಾಬಿಗಿಡ - gulábigida, Can.; గులాబు - gulábu, Too.; రోజా - rójá, Tel.; പനിനീർപുഷ്പം - paninírpushpam, Mal.; රෝසමල - rosamal, Singh.; இரோசா - irósá, Tam.). Title from double petals of flowers. San. from (shata, san. hundred + patra, san. petal). Mahr. and conc. from hindostany. Ar. from (vard, ar. rose + ahmar, ar. red). Pers. from (gul, pers. rose + sad, pers. hundred + barg, pers. leaf). Hind. from (guláb, pers. rose + per, hind. tree). Dec. from (guláb, pers. rose + jhár, hind. tree). Malay from (mawur, malay, to scatter); from the application of rosewater. Can. from (guláb, pers. rose + gida, can. plant). Too. from hindostany. Mal from (paninír, mal. rosewater + pushpa, san. flower). Tam. from english. Pers. also (gulisurkh), meaning red rose. Greek ῥόδον ἑκατοντάφυλλον. Title otherwise Hundred-leaved rose, Moss rose, Provence rose. Botanically Rosa [gool] centifolia, linn., rosaceæ [vricsham, 49]. A small shrub, 3–6 feet high, with numerous erect branches, rather densely covered with prickles of various sizes and the larger ones hooked, mixed with glandular setæ; flowers large, mostly very double usually somewhat drooping; peduncles covered with numerous setæ

and glandular hairs, as is also the calyx-tube; petals usually very numerous, large, thin, and delicate, clear rose-pink or white, often passing gradually into stamens through many intermediate organs; fruit oblong or ovoid-oblong, orange-red when ripe. Bears large, double, rose-colored, fragrant flowers; stems profusely covered with small fine spines; native of syria, cultivated; employed for distillation of rosewater, and in the preparation of the essential oil or attar [q.v.]. Petals and the volatile oil obtained from the petal form medicinally officinal parts; petals are mildly laxative, given in syrup; oil or the attar of roses is employed to disguise the unpleasant odour of certain ointments and other external applications. The following preparations made with the petals are used as medicaments:—Doohn-i-ward-i-khaum; a fatty oil made by exposing rose leaves and sweet oil [zeitoon] to the sun and then filtering; the ῥόδινον ἔλαιον of the greeks; considered to be deobstruent, astringent and aperient; also recommended in poisoning by caustic alkalies [cauram]. Doohn-i-ward-i-matbookh; a similar preparation made by heating the petals with sweet oil over the fire. Goolcund; a conserve made from equal parts of rose petals and white sugar [q.v.] beaten together; considered tonic and fattening, and much used by women and old people; cannabis sativa [kinnab] sometimes added. Goolangabeen; a similar preparation made with honey [shahad] and much the same properties. Goolaub; rosewater largely used in native practice as orange [q.v.] flower water by french. Goolaub-ka-attar; otto of roses having properties similar to those of rosewater; made in persia and india, but not in sufficient quantity to supply the indian market; a good deal therefore imported from turkey; the native still is used, a rough form of alembic without a condensing worm, and one hundred thousand roses produced about hundred bottles of rosewater; otto is only made in cold weather; to obtain it the rosewater is exposed to cold in shallow vessels, a thin film forms upon the surface, and is removed with a feather; one hundred thousand roses are estimated to produce about 180 grains of otto; the most reliable tests of the quality of rose oil are its odour, its congealing point, and its crystallization; much of the persian rosewater is diluted with water before it is sold; pure otto is hardly to be obtained; it undergoes adulteration before it is shipped to this country, and on arrival is still further falsified by a large admixture of sandal-wood oil, reducing its value from Rs. 16 to Rs. 2 per tolah [q.v.]; in the preparation of adulterated otto in india sandal-wood chips are added to the roses in the still [attar]. Rosewater is employed as perfume, also for softening flavor of tobacco [pogauk], also in preparing collyria; attar of roses is mixed with sandal [q.v.] and used largely by the natives at the period of festivals and marriages and is profusely distributed to the guests as they arrive and also sprinkled with profusion in the apartments.——*Changeable rose* (گل عجائب - guliajáib, Pers.). Persian means wonderful flower, from constant change of color. Same as Lotus bendy.——*China rose* (جاسون - jásún, Hind.). Same as China rose bendy.——*Corn rose* (لالہ - lálah, Hind.). Same as Corn poppy.——*Damask rose* (तरणी - taraní, San.; गुलाब - gulába, Mahr.; وردالاحمر بستانی - vardulahmaribustání, Ar.; گل سرخ - gulisurkh, Pers.; گل - gul, Hind.; گلاب - guláb, Dec.; ಪನ್ನೀರುಗಿಡ - pannírugida, Can.; రోజా - rójá, Tel.; പനിനീർപുഷ്പം - paninírpushpam, Mal.; இரோசா - irósá, Tam.). Title from town. San. from (tri, san. to cross); from diffusive smell. Ar. from (vard, ar. rose + ahmar, ar. red + bustán, pers. garden). Pers. from (gul, pers. rose + surkh, pers. red). Hind. and dec. from persian. Can. from (pani, tam. dew + níru, can. water + gida, can. plant). Mal. from (paninír, mal. rosewater + pushpa, san. flower). Tam. from english. Tel. also (gulábipuvvuchettu), meaning rose + flower + plant; (panníruchettu), meaning rosewater + plant. Title otherwise Bussorah rose, Damascus rose, Persian rose. Botanically Rosa [gool] damascena, mill., rosaceæ [vricsham, 49]. Shrubby; prickles numerous, unequal, strong, dilated at the base; leaflets five to seven, ovate, stiffish; flower-bud oblong, sepals deflexed in flower, tube elongated, often dilated at the top, sepals spreading, not inflexed; fruit ovate, pulpy; calyx and peduncles glandulosely hispid, viscous. Same uses as centifolia [cabbage rose]. Very common in S. indian gardens.——*French rose* (وردالجبلی - varduljabalí, Ar.; گل بری - gulibarrí, Pers.; جنگلی گلاب - janglíguláb, Hind. and Dec.). Ar. from (vard, ar. rose + jabal, ar. mountain). Pers. from (gul, pers. rose + barr, pers. forest). Hind. from (janglí, hind. wild + guláb, hind. rose). Title otherwise Provence red rose. Botanically Rosa [gool] gallica, linn., rosaceæ [vricsham, 49]. A small rather compact erect bush, with numerous stems from a creeping root-stock and short stiff branches, the young shoots armed with short nearly equal straight prickles mixed with glandular setæ, but without any large hooked prickles. Native of europe and asia minor; cultivated. Gives to pharm. french rose petals the dried petals of the unexpanded flowers, rosæ gallicæ flores; slightly tonic and astringent.——*Indian rose* (وردصینی - vardisíní, Ar.; گل سفید بری - gulisufídbarrí, Pers.; نسترن - nastaran, Hind. and Dec.; இரோசா - irósá, Tam.). Ar. from (vard, ar. rose + síní, ar. chinese). Pers. from (gul, pers. rose + sufíd, pers. white + barrí, pers. wild). Tam. from english. Title otherwise Bengal rose, China rose [china rose bendy], Monthly rose, Tea rose. Botanically Rosa [gool] indica, linn., rosaceæ [vricsham, 49]. Evergreen, glabrous; stipules very narrow, adnate almost to the top; flowers large on long pedicels rarely single; sepals reflexed.——*Indian white rose* (तरुणी - taruní, San.; وردابیض - vardiabyaz, Ar.; نسرین سفید - nisrínisufíd, Pers.; سفید گل - sufedgul, Hind.; اجلا گلاب - ujlá guláb, Dec.). San. means (tri, san. to cross), from diffusive smell. Ar. from (vard, ar. rose + abyaz, ar. white). Pers. from (nisrín, ar. dog rose + sufíd, pers. white). Hind. from (sufed, hind. white + gul, pers. rose). Dec. from (ujlá, hind. white + guláb, dec. rose). San. also (sévatí), meaning pleasing. Hind. also (seuntí). Title otherwise Indian white dog rose. Botanically Rosa [gool] alba, linn., rosaceæ [vricsham, 49]. Alias Rosa glandulifera. Germs oblong, shrubby, subscandent, armed; all the tender parts ciliate with glutinous, headed glands; leaflets from five to seven, ovate, doubly-serrate; segments of the calyx sub-ensiform, finely pinnatifid; flowers terminal in large corymbiform panicles. Native of caucasus and afghanistaun; cultivated; flowers a cooling medicine in fever [jwaram]; also used in perfumery.——*Musk rose* (शतपत्री - shatapatri, San.; نسرین - nisrín, Ar.; گل مشکین - gulimishkín, Pers.; سیوتی - seutí, Hind.). Title from smell. San. from (shata, san. hundred + patra, san. petal). Pers. from (gul, pers. rose + mishk, pers. musk). Hind. from (sévatí, san. the plant). Pers. also (mushkínchah), meaning musk-scented. Botanically Rosa [gool] moschata, mill., rosaceæ [vricsham, 49]. Alias Rosa glandulifera. Tall climber, prickles scattered stout; leaves 2-6 inches, leaflets two to four pair, 1–3 inch, acute or acuminate, serratures very numerous and acute, base rounded, stipules glandular, free part subulate; inflorescence pubescent and usually glandular, but not prickly or bristly, bracts subulate; flower 1½-2 inches diameter, very numerous, pedicels 1–1½ inches, slender; calyx-tube small, obovoid; lobes ½ inch, lanceolate, caudate-acuminate, entire or cut or pinnatifid, reflexed after flowering, deciduous; petals orbicular-obovate, yellowish-white; fruit ½ inch diameter, dark brown glabrous, styles far exserted.——*Peacock rose* (گل مور - gulmor, Hind.). Same as Gold mohur tree.——*Velvet rose* (گل مخمل - gulimakhmal, Hind.). From softness and appearance. Same as Jaffer goondy.——(2) *Golabjam* (گلابی جام - gulábíjám, Hind.). From (guláb, hind. rose + jám, hind. apple); from color and perfume. Same as Rose apple.——*Goolabash* (گلاباش - gulábásh, Dec.). From (gul, pers. flower + abbás, pers. red), from color of flowers. Same as False jalap.——*Goolaub* (گلاب - guláb, Hind.). Rosewater. ——*Goolaub paush* (گلاب پاش - gulábpásh, Hind.). From (above + áb, pers. water + pásh, pers. sprinkler). A long-necked silver bottle perforated with holes at the mouth in the form of a muffineer, out of which rosewater is sprinkled on guests.——*Goolauby* (گلابی - gulábí, Hind.). Means rose-colored. Ex., Pastor roseus (gulábímaina), rosy myna.——*Goolbadan* (گلبدن - gulbadan, Hind.). From (above + badan, ar. body), from its lightness. A striped silk [puttoo] fabric used chiefly by well-to-do-Mahomedan women for trousers [sheelay], &c.; also servant's name.——*Goolchanabad* (گلشن آباد - gulshanábád, Hind.). From (gulshan, pers. garden + ábád, pers. city). The name given by the Mahomedan rulers to a division consisting of Ichapore, Cassimcote, Chicacole, &c., the Poondy river forming its northern boundary [northern circars].——*Goolcheeny* (گل چینی - gulchíní, Hind.). Same as Shaumanty.——*Goolcund* (گلقند - gulkand, Pers. and Hind.; گلقی - gulqan, Dec.; ಗುಲ್ಕಂದು - gulkandu, Tel.; ഗുൽകന്ത - gulkant, Mal.; குல்கந்து - kulgandu, Tam.). From (above + kand, ar. candy). Candied roses; confection of rose. ——*Goolistaun* (گلستان - gulistán, Hind.). From (above + sitán, pers. place). A garden. Oordoo translation in prose, by Meer shere ally afsos, who lived about 1800, of the Persian work of that name by Saady, the moralist. The following is a specimen extract: اك حكيم اپنے بیٹے كو نصیحت كرتا تھا كہ باباجان علم و هنر سیكھو كہ ملك و دولت دنیا كی لا یق اعتبار كے نہین جاہ و رتبہ جاتا رهتا هی روپا سونا بیچ حضر كے - لیكن هنر كا چشمہ فیض سے مالا مال هی اور دولت بے زوال اگر هنرمند مفلس هوجائے كچھ غم نہین هنر بہ ذات خود دولت هی هنرمند جس جگہ جائے عزت سے رهے *

"A wise man, while advising his son to acquire knowledge and arts, said that the riches and sovereignty of the world are not to be trusted, that rank and dignity fades, and that gold and silver are ever surrounded with fear, but that the fountain of art is always overflowing, and is a wealth imperishable. It is no matter for regret should a man of learning become poor for art itself is a wealth, and go where a man of learning may, he is honored."——*Goolkesh* (گلقیس - gulkes, Hind.). Means flower + comb; from shape of flower. Same as Moorgha.——*Goolkheir* (گل خیرو - gulikhairo, Dec.). Means handsome flower. Hollyhock [foreign tootty]. ——*Gool mindie* (گل مہندی - gulmenhdí, Hind.). From (above + mehndí, hind. lawsonia alba, lamk.); from yielding a similar dye. See Mindie.——*Goolrang* (گلرنگ - gulrang, Hind.). From (above + rang, pers. color). Roseate. Servant's name.——*Goolrookh* (گلرخ - gulrukh, Hind.). From (above + rukh, pers. cheek). Rosy cheek. Servant's name.——*Goolzaur* (گلزار - gulzár, Hind.). From (above + zár, pers. place). Rose garden. Servant's name [ism].

GOOLAUL (گلال - gulál, *Hind.*). Red powder thrown in sport on others' clothes at Cauman pundigay [holy] festival. Formed of barley [jow], raggy [q.v.], rice [q.v.] or wheat [geung] flour, or flour of water-nut, Trapa bispinosa [singhaura], dyed red with sappan [q.v.] wood or sanders wood [red sanders]. Used by Mahrattas [q.v.], Bondilies [q.v.] and Rajpoots [q.v.].

GOOLOOM (वृक्षादनी - vrikshádani, *San.*; गुल्म - gulúma, *Mahr.*; कयावेलिबेंदर्लि - kayávélibéndarli, *Conc.*; باندا - Lándá, *Hind.*; ಕಾಸ್ರಕನಬಂದನಿಗೆ - kásrakanabandanige, *Can.*; బదనిక - badanika, *Tel.*; ഇത്തി - itti, *Mal.*; புல்லுருவி - pulluruvi, *Tam.*). Title from mahratta. San. from (vriksha, san. tree + ad, san. to eat); as parasitic on other trees. Mahr. from (gulma, san. bush); from bushy growth. Hind. from (vandá, san. parasite). Can. from (kásarka, can. poison nut, strychnos nux-vomica, linn. + bandanike, can. parasitic plant). Tel. from sanscrit. Mal. from (iru, mal. to drop). Tam. from (pul, tam. any gramineous plant + uruvu, tam. to pierce); as piercing or growing on other tree [pilloory]. San. also (vandá), meaning worshipping, as depending on other plants; (vrikshabhakshá), meaning tree eating; (vriksharuhá), meaning tree grower [rasnah]. Tel. also (velagabadanika), meaning wood-apple, feronia elephantum, corr. + parasite. Mal. also (káññirattinmélpullunni), meaning parasitical plant on strychnos nux-vomica, linn.; (pullunni), meaning grass eater. Tam. also (kámarisam); (pullúri), meaning parasitic creeper [paushy]; (uççiççedi), meaning top + plant; from habit of overgrowth. Botanically Loranthus longiflorus, desr., loranthaceæ [vricsham]. Alias Loranthus bicolor, falcatus, koenigianus. Parasitic shrub; branches terete; leaves usually opposite, from linear to oblong-lanceolate or ovate, obtuse; racemes axillary, solitary or in pairs, erect or spreading, simple, many-flowered, much shorter than the leaves; bract solitary, concave, oblique; calyx-limb entire, corolla long infundibuliform, gibbous on one side, curved; segments five, linear, recurved, with one of the fissures deeper than the others; anthers linear; fruit oblong; flowers greenish-white, or scarlet-orange with green petals. Common upon the following genera of tree:—albizzia [sirissa], bassia [mohwah], bauhinia [mountain ebony], buchanania [chironjee], diospyros [indian ebony], ficus [atty], melia [neem], mangifera [mango], quercus [belote]. There is a Teloogoo proverb:—[illegible]—"Like showing gooloom "to a snake;" it is said to be an antidote for snake bites. The bark sometimes used in place of betel-nut [q.v.] with choonam [q.v.]; the wood used as a finishing tan stuff in order to give softness to leather [chamrah]. There are numerous other species, as:—amplexifolius, biflorus, blumeanus, buddleioides, capitellatus, cuneatus, elasticus, hookerianus, intermedius, kanneli, lageniferus, lepidophyllus, loniceroides, memecylifolius, neilgherrensis, obtusatus, recurvus, rugulosus, sarcophyllus, tomentosus, trigonus, turbinatus, wallichianus.

GOOLY (കുഴി - kuzhi, *Mal.*; குழி - kuzi, *Tam.*). Lowland. Suffix in place names; as Caroongooly, meaning the black lowland [cooy, coozhy].

GOOMASTA (گماشته - gumáshtah, *Hind.*). From (gumáshtan, pers. to appoint). Agent, clerk, native accountant in the revenue department, substitute for village officers who are minors or otherwise incapacitated from attending to their duties.

GOOMBAZ (گنبذ - gumbaz, *Hind.*). A building with a cupola, a mausoleum.

GOOMCHY (گهچی - gumchí, *Hind.*). From (guñjá, san. abrus precatorius, linn.). From (guj, san. to sound) [goonjana]; from sound of dry pods. Same as Indian liquorice. Same as San. goonjam, Hind. goonj, retty, Can. hauga, Tel. gooriginja, Mal. coonnycooroo, Tam. coondrimany. Small testaceous weight, generally taken as unit. A scale is:—4 dhauns = 1 goomchy; 8 goomchies = 1 mausham [niray, 3e]. Approximate actual value, 1 goomchy = 1¼ grains. Seed averages 1·934 grains. Goldsmith's weight called by the name weighs $2\frac{3}{16}$ grains. See vol. I, 609.——*Elephant goomchy* (هاتی گهچی - háthígumchí, Hind.). Title from size and similarity of seeds. Same as False red sanders.——*Wheel goomchy* ([illegible] - bandigurivenda, Tel.). Title from shape of seed. Same as False red sanders.——*White goomchy* (श्वेतकाम्बोजी - shvétakámbójí, San.). From whitish small round fruit. Same as White poolah.

GOOMSOOR ([illegible] - ghumsará, *Tel.* goomsur *). From (ghumó, oor. large + soró, oor. ditch).——(1) Talook, Ganjam district; Tahsildar's pay Rs. 150; area 1,596 square miles; population 185,870; language Teloogoo and Ooriya. N.E. inland of district. Bounded:—north by Daspalla and Nyagar zemindarries of Cuttack; east by Atagadah zemindarry; south by Bodagooda and Dhauracote zemindarries and Berhampore talook; west by Eastern ghauts [q.v.], which lead up into the Maliahs [q.v.]. Consists of the two ancient zemindarries of Goomsoor and Sooradah, confiscated by Government after rebellion in 1836. One result of annexation was suppression of Meriah [q.v.] among the Khonds [q.v.]. See vol. I, 71, and vol. II, 77. The Sooradah and Goomsoor peiks [q.v.], who hold quit-rent lands in the talook on condition of military service when called out against the Khonds, are a remnant of the old feudal system of Ganjam. The talook contains dense forests, especially on its east and north frontiers; wild beasts and game abound. Towards centre and south it is hilly with well-watered fertile valleys running towards the sea. To the north and east the land is good. Soil generally fertile. The regar [q.v.] soil predominates in the talook, next in quantity the sandy soil. There are no industries worth mentioning. The principal articles of commerce are rice [q.v.], raggy [q.v.], gingelly [q.v.], turmeric [country saffron], hides and skins [chamrah], horns [sing], rape [rara sarsoon] and niger [ramtil] seeds, jaggery [q.v.], hemp [hemp bendy, kinnab] and myrobalans [q.v.]. Rain is plentiful, and artificial irrigation is resorted to, as a rule, only for sugar-cane [q.v.] cultivation. The only important irrigation work is the Bory saugaram tank, near Gungoopooram, constructed by Government in 1861. Camping grounds:—Ballibhadra, Boogoodah, Corcholly, Moojagodoo, Nimmina, Russellcondah. The talook is divided as follows:—Ballibhadra khandam, containing the mittahs of Ballibhadra, Bhavanapooram, Boogoodah, Corcholly and Vishnoochuckram. Boda bora shingy khandam, containing the mittahs of Bondhahgotso, Boottapully, Goondribaudy, Kidica, Kaulo, Noovaugada, Payalpadah, Perdzoo, Poteshingy, Rogodo, and Salingyah. Vonnagherry khandam, containing the mittahs of Biracote, Dacshina godotolo, Darpangya, Doorgaprasaud, Gidipoohully, Jacshabaudy, Padiyah, Pauntso godotolo, Saurau-bady and Vonnagherry. Coollauda khandam, containing the mittahs of Cookloobha, Gullary, Juggannaut prasaud, Oottara godotolo, Pasarah and Poorbo godotolo. For the adjoining hill country called the Goomsoor maliahs, see Maliah. Places of archæological interest:—Boudikhole, Boogoodah, Booraga, Coollauda, Goomsoor, Gopinautapooram, Leppah, Maulaty, Rowty. Principal trig. stations:—Khondhobolo, Maulaty, Patarcoomoodah. The leading places, &c., in the talook are the following.——*Ballibhadra* ([illegible] - ballipotoro, Tel.). From (balli, oor. sand + potoro, oor. meadow). Tract of country; pop. 46,875. A sub-division of Goomsoor.——*Baugwah* ([illegible] - bhúguvá, Tel.). River, Atagadah zemindarry. Rises in the Nyagar hills, and after a winding course of about 50 miles, through parts of Goomsoor and Atagadah zemindarry, joins the Rooshcoolya near Kanjama, a village about 7 miles from Aska.——*Belgoonta* ([illegible] - bellugunta, Tel.). From (bello, oor. bael, ægle marmelos, corr. + gunta, tel. pond). Village; pop. 2,235; acres 676; lat. 19° 52′; long. 84° 41′; from Chetterpore N.N.W. 41 miles; from Russellcondah S.S.E. 3¾ miles. On high road about 5 miles from Russellcondah, and is greatest mart of barter in the talook. Khonds come to exchange their hill-produce. Manufacture of silver [velly] and brass [pittalay] paundauns [q.v.] and other silver ware of excellent kind.——*Boda bora shingy* ([illegible] - bodaborashingi, Tel.). From (bodo, oor. large + boro, oor. banyan tree, ficus bengalensis, linn. + shringa, san. peak). Tract of country; pop. 36,865. A sub-division of Goomsoor.——*Boodanuddy* ([illegible] - budánadi, Tel.). From (buda, oor. old + nadí, san. river). River. Rises in Nyagar hills and flowing southwards drains Goomsoor and joins Mahanuddy near Maudhava boridah. Length about 30 miles.——*Boogoodah* ([illegible] - bugudá,* Tel.). From (bhú, san. earth + gudá, oor. fort). Village; pop. 1,868; acres 1,067; lat. 19° 48′; long. 84° 50′; from Chetterpore N.N.W. 33 miles; from Russellcondah S.E. 15 miles. About a mile from the Baugwah. Image on a hill called Maulaty representing Virinchy narrainsawmy the sun-god. Finely-carved mantapam [q.v.] erected over it shaped like the chariot [rath] of the sun [sooryan] with seven horses [ghorah]. Old fort with ramparts still remaining. Old temple of Virinchy narrainsawmy largely resorted to.——*Comosorogodo* ([illegible] - komosorogodo, Tel.). From (ghumó, oor. large + soró, oor. ditch + gudá, oor. fort). Village; pop. 467; lat. 20° 01′; long. 84° 46′; from Chetterpore N.N.W. 48 miles; from Russellcondah N.E. 10 miles. Near the frontier between Goomsoor talook and Nyagar talook of the Central provinces. Ruined fort situated close to a hill. Scene of a battle during the time of Shreecara bhoonj rajah of Goomsoor between Goomsoor and Nyagar rajahs, in which the former was victorious.——*Cookloobha* ([illegible] - kukkuluba, Tel.). Village; pop. 554; lat. 20° 07′; long. 84° 45′; from Chetterpore N.N.W. 55 miles; from Russellcondah N.N.E. 14 miles. The chief village in the mittah [q.v.] of that name and is jungly and unhealthy. Contains good saul [q.v.] forest.——*Coollauda* ([illegible] - kulláda, Tel.). See sep. title.——*Doorgaprasaud* ([illegible] - durgáprasádu, Tel.). From (durgá, san. párvatí the inaccessible deity + prasáda, san. favor). Village; pop. 210; lat. 20° 07′; long. 84° 30′; from Chetterpore N.W. 62 miles; from Russellcondah N.W. 15 miles. At the foot of the Calingyah ghaut [q.v.] leading to the Maliahs. Formerly one of the principal strongholds of Goomsoor rajahs.——*Ghautigooda* ([illegible] - ghátigudá, Tel.). From (gháti, oor. strong + gudá, oor. fort). Tract of country, Village; pop. 84. Above the ghauts and forms strictly speaking, a part of the Maliahs. Mittah [q.v.] was assessed in 1863 and brought under Goomsoor.——*Girjabaudy* ([illegible] - girijábádi, Tel.). Trig. station, Chinna kimedy zemindarry; lat 19° 29′ 44·94″; long. 84° 25′ 18·46″; height 3,399 feet; from Govindapooram W. 2½ miles; from Russellcondah S.S.W. 34 miles; from Chetterpore W.N.W. 42 miles.——*Goomsoor* ([illegible] - ghumsará, Tel.). See below.——*Juggannaut prasaud* ([illegible] - jagannát'haprasádu, Tel.). From

(jagannátha, san. vishnu, the lord of the world, god of puri + prasáda, san. favor). Village; pop. 891; acres 1,439; lat. 19° 58′; long. 84° 49′; from Chetterpore N.N.W. 44 miles; from Russellcondah E.N.E. 12 miles. Formerly one of the principal strongholds of Goomsoor rajahs and now the chief village in the mittah [q.v.] of that name. Situated near the Boodanuddy river.——*Khondhobolo* (ఖొందొబొలొ - khondhobolo, Tel.). From (konda, tel. hill + palli, tel. village). Trig. station; lat. 19° 51′ 15·78″; long. 85° 00° 45·08″; height 3,115 feet; from Russellcondah E.S.E. 25 miles.——*Loharacundy* (లోహారకండి - lóharákandi, Tel.). From (lóháró, oor. a caste + gandi, tel. pass). River. Rises in the hills of Doorgaprasaud, flows southwards and joins Mahanuddy and Maudhava boridah about 5 miles from Russellcondah. Length about 30 miles. Spanned at Russellcondah by masonry bridge of five arches.——*Mahanuddy* (మహానది - mahánadi, Tel.). From (mahá, san. great + nadí, san. river). River. Rises among the hills N.W. of Chocapaud and falls into Rooshcoolya at Aska, receiving in its course the waters from surrounding valleys and tributary streams of Boodanuddy from the N.E. and of Loharacundy from N.W. Length about 50 miles.——*Maulaty* (మాలతి - málati, Tel.). See sep. title.——*Patar coomoodah* (పతరకుముదా - patarakumudá, Tel.). From (potoro, oor. meadow + konda, tel. hill). Trig. station; lat. 20° 02′ 31·41″; long. 84° 48′ 58·84″; height 1,778 feet; from Khondhogallery E.S.E. 13 miles; from Russellcondah N.E. 13 miles.——*Pippalpunka* (పిప్పలపంక - pippalapanka, Tel.). From (pippala, san. peepul tree, ficus religiosa, linn. + panka, san. marsh). Ghaut, Village; pop. 111; lat. 19° 49′; long. 84° 22′; from Chetterpore N.W. 54 miles; from Russellcondah W.S.W. 20 miles. Near Rooshcoolya river below ghauts [q.v.]. Overrun with jungles. Pass from Gajellabady to Maliahs [q.v.].——*Rooshcoolya* (ఋషికుల్య - rishikulyá, Tel.). See sep. title.——*Russellcondah* (రసూలుకొండ - rasúlukonda, Tel.). See sep. title.——*Salingyah* (సలింగ్యా - salingyá, Tel.). Tract of country. Mittah formerly included in the Maliahs but assessed in 1863.——*Sooradah* (సురదా - suradá, Tel.). See sep. title.——*Vishnoochuckram* (విష్ణుచక్రము - vishnuchakramu, Tel.). From (vishnu, san. vishnu + chakra, san. wheel weapon). Village; pop. 787; acres 883; lat. 19° 46′; long. 84° 43′; from Chetterpore N.W. 34 miles; from Russellcondah S.S.E. 12¾ miles. Near the Mahanuddy. Ruined fort on an elevated rock.——*Vonnagherry* (వన్నగిరి - vonnagiri, Tel.). From (vana, san. jungle + giri, san. mountain). Division; pop. 46,955. A sub-division of Goomsoor talook.——*Wolsoogoommah* (ఒలుసుగుమ్మా - olusugummá, Tel.). From (valasa, tel. colony + gummá, oor. fort). Village; pop. 319. Ancient village near the frontier, between Goomsoor and Daspalla zemindarries. Old fort.——**(2)** Village; Ganjam dist., Goomsoor tal.; lat. 19° 50′; long. 84° 40′; from Chetterpore N.W. 40 miles; from Russellcondah S. 6¾ miles. Former cusbah [q.v.] of the talook [q.v.] but now unimportant. Previous to disturbances of 1835-36, was the seat of Goomsoor chiefs, and members of family still reside. Fort in A.D. 832 by Rajah raghoonauta bhoonj, an ancestor of present Goomsoor rajahs.

GOONAM (गुण - guna, *San.*). From (grah, san. to hold) [graham, graumam, griham]. A quality, property, merit, virtue.—"*a*" Metaphysically there are three Goonams:—Satwagoonam, or property of truth, the source of purity and wisdom; Rajogoonam, or property of foulness, the source of passion and error; Tamogoonam, or property of darkness, the source of inertness and ignorance. A happy disposition is Satwagoonam; if in excess it affords light, and produces knowledge and happiness; the person strives to perform good actions [carmam], has patience, is a lover of truth and understanding, has no bad desire; possesses a good memory, is charitable, is devoid of anger, is without avarice; when such a person dies, he becomes a deva [q.v.]. An active disposition or Rajogoonam signifies desire, the love of gain, industry, and commencement of works [carmam], and produces unhappiness when in excess; such a person is unquiet; when a person with such a disposition dies, his soul re-animates another body of an inferior nature. When an inert disposition or Tamogoonam is in excess, it is indicated by a want of energy, secrecy, and distraction of thought; when such a person dies, his soul is conceived again in irrational animals [samsauram]. Deity abstractedly is Nirgoonam, or without any of the three properties. Eight qualities are in turn ascribed to each of the metaphysical Goonams [matam].—"*b*" Goonam is also an attribute of the five elements [bhootam]; each element has its own peculiar quality or qualities as well as organ of sense [indriyam]; thus ether has shabdam [q.v.] or sound for its goonam and the ear for its organ; the air has tangibility and sound for its goonams and the skin for its organ; fire or light has shape, color, tangibility and sound for its goonams and the eye for its organ; water has flavor, shape, tangibility and sound for its goonams and the tongue for its organ; earth has all the preceding goonams with the addition of its own peculiar goonam of smell, and the nose for its organ.—"*c*" Goonam is also one of the six courses of action in foreign politics, viz., peace, war, march, halt, stratagem and recourse to the protection of a mightier king.——*Goonak* (गुणक - gunaka, San.). Multiplier in arithmetic.——*Goonyam* (गुण्य - gunya, San.). Multiplicand in arithmetic [ganitam, shastram].——*Gownam* (गौण - gauna, San.). From (guna, san. quality). Specific. Also unessential, secondary, subordinate. Also for Gownamausam; opposed to Mookhyam [q.v.].——*Gownamausam* (गौणमास - gaunamása, San.). From (gowna, san. secondary + mása, san. month). The lunar month, from full to full [krishnaudy, maunam, mausam, shooclaudy].

GOONAM (குனம் - kunam, *Tam.*). A corruption of (kunram, tam.). Hill. Suffix in place names; as Vengoonam, meaning the white hill [coonn, coor].

GOONAPORE (గుణుపురము - gunupuramu, *Tel.*). From (ghana, san. great + pura, san. city) [ghanam]. Sanscrit name (ghanapura), meaning same.——**(1)** Division, Vizagapatam district. Languages, Ooriya, Khond, Sowrah and Teloogoo. Boundaries:—E., Ganjam agency; S., Ganjam district and Parvatipore division; W., Royagada division; N., Bissemcuttack division. Physical aspect undulating and hilly. A large plain watered by the Vamshadhaura and surrounded by hills inhabited by the aboriginal Khond [q.v.] and Sowrah [q.v.] tribes. Considerable quantities of grain are exported and much saul [q.v.] wood is floated down the river to Calingapatam. Principal trig. station:—Himagherry. The leading places, &c., in the division are the following.——*Baumany* (బామని - bámani, Tel.). From (bráhmaní, san. bramin lady). Mountain, Trig. station; lat. 19° 32′ 50·40″ N.; long. 83° 49′ 47·50″ E.; height 2,488 feet; from Goonapore N. 32 miles; from Jeypore E.N.E. 92 miles; from Vizagapatam N.N.E. 130 miles. Large weekly market.——*Bijipore* (బిజిపూరు - bijipúru, Tel.). From (vijaya, san. success + pura, san. town). Mittah; pop. 276; lat. 19° 31′; long. 83° 58′; from Goonapore N.N.E. 30 miles; from Jeypore E. 100 miles; from Vizagapatam N.N.E. 130 miles. One of the seven Khond mittahs described by the Meriah [q.v.] agency as addicted to human sacrifice. Consists of nine villages. Separated from Poncaul the next stage by a dense saul jungle nine miles in extent.——*Goodaury* (గుడారి - gudári, Tel.). From (gudáramu, tel. tent). Village; pop. 2,265; lat. 19° 20′; long. 83° 50′; from Goonapore N. 18 miles; from Jeypore E.N.E. 86 miles; from Vizagapatam N.N.E. 116 miles. The Goodaury estate is at present enjoyed by the widows of the Jeypore maharajah's late uncle Cheitanya deo, but will revert to the Maharajah [q.v.] on their death.——*Goomma* (గుమ్మ - gumma, Tel.). Means grain receptacle. Tract of country; pop. 537; lat. 18° 46′; long. 82° 28′; from Goonapore W. 92 miles; from Jeypore W. 11 miles; from Vizagapatam N.W. 90 miles.——*Goonapore* (గుణుపురము - gunupuramu, Tel.). See below.——*Himagherry* (హిమగిరి - himagiri, Tel.). From (hima, san. snow + giri, san. hill). Trig. station; lat. 18° 49′ 30·10″; long. 83° 49′ 34·36″; height 3,710 feet; from Goonapore S. 18 miles; from Merangy E. 15 miles.——*Mondemcull* (మొండెంకల్లు - mondemkallu, Tel.). From (mondemu, tel. stump + kallu, tel. stone). Mittah, Village; pop. 637; lat. 18° 55′; long. 83° 45′ 30″; from Goonapore S.W. 14 miles; from Jeypore E. 74 miles; from Vizagapatam N.N.E. 88 miles. Scheduled tract.——*Vamshadhaura* (వంశధార - vamshadhára, Tel.). See sep. title.——**(2)** Deputy tahsildarry. Pay Rs. 200.——**(3)** Village, Head-quarters of Deputy tahsildar and Ameen [q.v.] of Jeypore maharajah, Superintendent of Hill schools, Vizagapatam dist., Jeypore zemindarry, Goonapore magisterial division; pop. 4,685; lat. 19° 05′; long. 83° 51′; from Coraputt E.N.E. 74 miles; from Jeypore E.N.E. 82 miles; from Madras N. 464 miles; from Narsapatam N.E. 124 miles; from Parvatipore N.E. 32 miles; from Vizagapatam N.N.E. 100 miles; from Vizianagram N.N.E. 71 miles. Village situated on the Vamshadhaura.

GOONCH (मुतड्ड - mutadda, *Mahr.*; گونچ - gúnch, *Hind.*; రాతిజెల్ల - rátijella, *Tel.*; ସାଲନ - sálun, *Oor.*). Title from hindostany. Mahr. means large + pendulous filament; from long barbels. Tel. from (ráyi, tel. stone + jella, tel. sphyræna jello). Mahr. also (t'hóróta), meaning large + pendulous filament; (bágariyas), meaning tiger-faced, from markings of lurid colors on face. Hind. also (búnch). Title otherwise Fresh-water shark. Bagarius yarrellii, siluridæ [kizhautty], physostomi, teleostei [matsyam, 35], of naturalists [jantoo]. Generic name from mahratta. Alias Bagarius buchanani; Bagrus yarrellii; Pachypterus luridus; Pimelodus bagarius, carnaticus, platespogon, yarrellii. Upper jaw the longer; skin somewhat scabrous over the summit of the head, and slightly so on the body; colors body gray or yellowish, with large, irregular, brown or black markings and cross bands; black base to all the fins, and generally also a dark band; takes a live bait, but is difficult to kill; it is sluggish, goes to the bottom, and generally escapes by destroying the tackle; large rivers descending to the estuaries; attains 6 feet or more; eaten by poor; very foul feeder. No other common species here.

GOONDAM (कुण्ड - kunda, *San.*; ಗುಂಡ - gunda, *Can.*; గుండము - gundamu, *Tel.*). From (kunda, san. pot, hollow spot). Deep gorge.——*Goonta* (گنٹا - guntá, Hind.; గుంట - gunta, Tel.). From (kunda, san. a vessel of water). Lake, tank. Hollow spot. Also quarry. Suffix in place names, especially in

Anantapore, Arcot north, Bellary, Cuddapah and Kurnool; as Renigoonta, meaning king's tank [coonta]. Also a superficial measure; 16 annas = 1 goonta, 40 goontas = 1 acre [alavay, 2b]; approximate actual value, 1 goonta = 1,089 square feet; but very variable; compare Tel. coonta, Tam. coozhy, gooly. See vol. I, 609; II, 505.——*Goontaca* (ಗುಂಟಿಕೆ - guntike, Can.; గుంటక - guntaka, Tel.). Tel. from (gunta, tel. indentation). Harrow for cleaning land and preparing it for sowing, as well as for covering the seed [gorroo]. Eight-sided frame, on the sides of which weights are put, or if necessary people stand. There is a Teloogoo proverb:—దున్నని చేను, మధ్యాహ్నభోజనములేని మనిషి—"A crop that is not harrowed will be like a man "compelled to go without his midday meal."——*Goontla* (గుంట్ల - guntla, Tel.). Plural locative form of goonta. Tank. Suffix in place names as Nullagoontla, meaning the black tanks [coontla].——*Guntoor* (గుంటూరు - guntúru, Tel.). See sep. title.

GOONGRA (گھنگرو - ghungrú, *Hind.*). Imitative of sound. Bells fastened round the ankles or wrists of children [shalangay].

GOONJANA (గుంజన - gunjana,* *Tel.*). From (gunja, tel. an indistinct sound) [goomchy]. River; Cuddapah dist., Poollampett tal. Rises in the Sheshachellam or Tripatty hills and drains the southern and eastern portions of Poollampett talook. Rapid and deep but narrow. Not navigable.

GOONJAYISH (گنجایش - gunjáish, *Hind.*). From (gunjídan, pers. to hold exactly). Extent or capacity.

GOORBAH (گربه - gurbah, *Pers.*). Cat [poonay]. Cf.:— Lutra vulgaris (gurbahiábí), water cat; viverra civettina (gurbahizabád), musk cat.

GOORGY (گرگی - gurgí, *Hind.*). From (gurgá, hind. knee). Short trousers tight at the knee and full above [sheelay].

GOORJARA (ఘూర్జర - ghúrjara, obl., *Tel.*). The goozerat [q.v.] country. One of the main sub-divisions of Dravida [q.v.] or Southern bramins [jauty]. See vol. II, 226.

GOOROO (गुरु - guru, *San.*). From (grí, san. to teach). A teacher, priest. Also heavy. A gooroo is regarded as a spiritual parent from whom the youth or disciple receives the initiatory muntram [q.v.] or prayer, and who conducts the ceremonies necessary at various seasons of infancy and youth up to the period of investiture with the sacred thread or string [oopanayanam]. This person may be the natural parent or the religious preceptor. A gooroo is to be distinguished from a poorohit [q.v.], who is a sort of domestic chaplain and must be married. The gooroos generally live in celibacy. Epithet of Shiva [q.v.], Brihaspaty [q.v.]. Suffix in proper names as Shivagooroo [peyar].——*Gooroocal* (കുരുക്കൾ - kurukkal, Mal.; குருக்கள் - kurukkal, Tam.). Plural form, and not used in this sense in singular. In malayalam, temple non-bramin servant caste; originally teachers, but their functions, now-a-days are to supply milk [paul], ghee [q.v.], and flowers to temples and to sweep and clean them [inam, jauty]. In tamul priests in shiva temples, always smarta bramins, though considered low in scale, corresponding to numby the veishnava bramin priest, and to poojarry the shoodra priest.——*Gooroo coolam* (குருகுலம் - kurugulam, Tam.). From (above + kula, san. family). A class of priest fishermen.——*Gooroomoorty* (குருமூர்த்தி - kurumúrtti, Tam.). From (above + múrti, san. body). Shiva, the deity in human form as a preceptor [augamam]. Hindoo 2nd or pers. name [peyar].——*Gooroonautan* (குருநாதன் - kurunáthan, Tam.). From (above + nát'ha, san. lord of the preceptor). Scandan, preceptor to Shiva [shivagooroo]. Hindoo 2nd or pers. name [peyar].——*Gooroopaudam* (குருபாதம் - kurupátham, Tam.). From (above + páda, san. foot). Humble appellation. Hindoo 2nd or pers. name [peyar].——*Gooroorame* (ಗುರುರಾಮ - gururám, Can.). From (above + ráma, san. the god), meaning having rama for preceptor. Hindoo 2nd or pers. name [peyar].——*Gooroosawmy* (குருசாமி - kurusámí, Tam.). From (above + svámí, san. lord). Shiva, the lord. Also Soobramanyan, as preceptor to Shiva [shivagooroo]. Colloquially gooroo. Hindoo 2nd or pers. name [peyar].——*Gooroo's tree* (मुनिपादप - munipádapa, San.). From use of oil by ascetics [moony]. Same as Fire-work plant.——*Gooroot**wam* (गुरुत्व - gurutva, San.). Platinum, as the heaviest metal [loham].——*Gooroovappa* (ಗುರುವಪ್ಪ - guruvappa, Can.). From (above + appa, can. father, titular affix). Compare Shivappa. Hindoo 2nd or pers. name [peyar].——*Gooroo vauram* (गुरुवार - guruvára, San.). From (above + vára, san. day); brihaspaty's day. Thursday [vauram].——*Goorpore* (ಗುರುಪುರ - gurupura,* Can.). From (above + pura, san. town); town of gooroo or priest being a mutt.—"*a*" A hamlet of Moollore village; South canara dist., Mangalore tal.; lat. 12° 56′ N.; long. 74° 58′ E.; from Bombay S.S.E. 425 miles; from Mangalore N.E. 8 miles; from Moolky S.E. 13 miles; from the sea E. 8½ miles. On river of same name; has an old Jangam mutt [q.v.] with windows of the old zenana [q.v.] elaborately pierced and carved.—"*b*" River; South canara dist., Mangalore tal. Falls into Mangalore backwater and with Netraavaty forms Mangalore harbour. Takes its source from foot of Western ghauts [q.v.] in Mangalore talook. Is navigable from Mangalore to Goorpore all the year round, and up to seven miles further inland from June to December.

GOORRAM (గుర్రము - gurramu, *Tel.*). Horse [coothiray, ghorah, goda].——*Goorramcondah* (గుర్రముకొండ - gurramukonda, Tel. gurramkonda *). From (above + konda, tel. hill); from the appearance. Village, Hill-fort; Cuddapah dist., Voilpaud tal.; pop. 1,674; acres 8,335; lat. 13° 47′; long. 78° 38′; from Cuddapah S.S.W. 50 miles; from Voilpaud N.N.W. 10¼ miles. An important fortress in a commanding position on an isolated rock on the summit of a detached and almost inaccessible hill. A portion of the old palace at foot of hill is still used as a traveller's bungalow [moosaufer khana] though very dilapidated. Built or improved by Golcondah kings. Capital of Hyderabad balaghaut [q.v.], one of the five circars [q.v.] of the Carnatic [q.v.] at commencement of eighteenth century. Afterwards held by a poligar [q.v.] under Cuddapah nawaub [q.v.]. The tenure was purely military, and the governor had the privilege of coining money [naunyam]. In 1766 when Meer sahib betrayed Sheerah, he received Goorramcondah, formerly held by his ancestors, as a Mahratta jagheer [q.v.]. In 1768 he made it over to Hyder, his brother-in-law. In 1771 Syed shah, Hyder's general, surrendered it to Trimbac row. Tippoo recaptured it in 1773. In 1791 the Nizam's forces aided by the British captured the lower fort, but the citadel held out till the peace, when the place was ceded to the Nizam. In 1799 it was transferred to the Company with the rest of the Cuddapah district. Near the fort is the tomb of Meer razah ally khan, uncle of Tippoo sultan, with several carved Mussalman buildings. A Persian inscription at the tomb of Razah ally khan consists of an epitaph with the date of his death, A.D. 1780. A Mahomedan religious institution is conducted by Meer mooraud ally khan sahib, a descendant of the Gooramcondah nawaub, who lives in Mahaul [q.v.], thirteen miles distant. He receives a pension of Rs. 60 per mensem from the Mysore government. Twice in the year several hundred fakeers [q.v.] are fed.

GOORTOO (గుర్తు - gúrtu, *Tel.*). Same as Gorroo.

GOORY (గురి - guri, *Tel.*). Means mark. Omen [shacoonam]. Telling one's fortunes by observing marks or lines on face, hands, &c. Soothsaying [coory, samoodricam]. Another name of the Yerkalas [q.v.].——*Goorigin**ja* (గురిగింజ - gurigindza, Tel.). From (guri, tel. mark + gindza, tel. seed). Same as Coondrimany, Goomchy, Retty.

GOOSEBERRY (تپاری - tipárí, *Hind.*). Plant second term. Cf.:—Averrhoa carambola, country gooseberry, coromandel gooseberry; Melastoma malabathricum, malabar gooseberry; Phyllanthus distichus, country gooseberry, country star gooseberry, hill gooseberry, otaheite gooseberry; Phyllanthus emblica, indian gooseberry; Physalis peruviana, cape gooseberry, peruvian gooseberry; Rhodomyrtus tomentosa, hill gooseberry. See gloss. paragraphs.

GOOTTA (گٹا - guttá, *Hind.*). Means lump settlement. Farm; lease. Goottadar is a renter [moostajaur]. For Cauyam goottadar see sep. title.

GOOTY * (గుత్తి - gutti, *Tel.*). From (gutta, tel. a hill) [good]. Sanscrit name (gautamapurí), meaning gowtaman + town.—— **(1)** Talook, Anantapore district. Tahsildar's pay Rs. 200. Area 1,054 square miles; pop. 142,917; languages, Teloogoo, Canarese and Hindostany, N. of district. Boundaries north, Aulore and Putticondah of Kurnool district; east, Tadpatry talook; south, Anantapore; west, Royadroog and Bellary talooks. There are numerous small hills. At Gooty a massive precipitous rock springs abruptly from the plain, which, with the out-lying rocks, is strongly fortified. The other noteworthy hills in the talook are at Conacondla, Goolpollem and Naugasamoodram. At Ooderpidroog and Ooravacondah there are isolated hills about 400 feet in height. In the south of the talook are large unbroken plains of black cotton [regar] soil very thinly wooded. It is almost impossible to grow trees on this soil. A soft limestone [choonamcull] is generally found from 5–10 feet below the surface, partially soluble in water. The trees planted grow well for three or four years, but so soon as the roots strike this limestone strata they wither. In the north of the talook the soil is red and gravelly; in many places rocky and stony. The principal crops on dry soils are cholum [q.v.], cotton [q.v.], corra [tinay] and other pulses [dholl]. Under the tanks [q.v.] and channels [q.v.], paddy; and under wells, paddy [q.v.] and raggy [q.v.] are largely grown. The cotton grown in the south of the talook is sent down to Madras, and the chintzes [q.v.] and dyed cloths of Paumidy are sought for all over the district. A large quantity of cholum and raggy is sent into the Bellary market. Rice [q.v.] is imported from the richer southern talooks, and cattle [maud] in large droves arrive from Nellore through the Kurnool district. There is no special trade in the talook

except at Paumidy. In other villages there are looms [tarry], but the cloths produced are of the ordinary kinds. At Nelgonda, Pundicoonta and Ramgherry, glass bangles [gauzoo] are made. At Krishtapaud, good silk [puttoo] cloths are woven. The Pennair is the only river, and it flows along the southern edge of the talook [q.v.]. From it small channels are taken off by excavations in the sand. No anicuts [q.v.] are attempted and these channels require to be renewed year by year. They are kept in order exclusively by the villagers. The usual custom is that for each acre held by him the ryot [q.v.] must contribute a day's labor either in person or by a hired substitute [coody maraumat]. There are forty-five tanks [q.v.] in the talook, but few of these deserve the name. Only five irrigate an area of more than 200 acres, and seven have an irrigable area of between 50 and 200 acres. All the rest have less than 50 acres dependent on them. The five principal tanks are Appecherla, Gooty, Pautacotta cheroo, Ramgherry, and Yerratimrauzcheroo. Camping grounds are at Gooty and Paumidy. Places of archæological interest:—Caroor, Cawderpett, Chetnepully, Chinna vadoogoor, Chintalcheroo, Chitrachaid, Conacondla, Cundla goodoor, Cundlapully, Devarpully, Goondaula, Gooty, Guddecull, Medimacoolapully, Nakkanadoddy, Narimetla, Ooravacondah, Ootcull, Pedda vadoogore, Pennahobalam, Rampooram, Sangaula, Yeddoolapully, Yerragoontla, Yerratimrauzcheroo. Principal trig. stations:—Boglamauricondah, Bolicondah, Chikalgoorky, Gooty, Gooty base north end, Gooty base south end, Guddecull, Gumpamala, Namdabad, Nimbacull, Ooderpidroog, Paumidy. The leading places, &c., in the talook are the following.——*Appecherla* (అప్పచెర్ల - appecherla, Tel.). From (appa, tel. father + cherla, tel. village). Village; pop. 3,001; acres 7,975; lat. 15° 05′; long. 77° 47′; from Anantapore N.N.E. 29 miles; from Gooty E.S.E. 8 miles. Has a large tank irrigating 206 acres.——*Aumidella* (ఆముదేల - ámidéla, Tel.). From (ámudamu, tel. castor oil, ricinus communis, linn. + ila, tel. ground). Village; pop. 3,317; acres 12,239; lat. 14° 51′; long. 77° 18′; from Anantapore W.N.W. 26 miles; from Gooty S.W. 31¾ miles. A large village in the black cotton country in south of the talook.——*Boglamauricondah* (బొగ్గులమారికొండ - boggulamárikonda, Tel.). From (boggu, tel. charcoal + mári, tel. village deity + konda, tel. hill). Trig. station; lat. 15° 04′ 51·16″; long. 77° 32′ 34·97″; height 2,350 feet; from Anantapore N.N.W. 29 miles; from Gooty W.S.W. 9¾ miles; from Vencatampulley N.E. 13 miles.——*Bolicondah* (బోలికొండ - bólikonda, Tel.). From (bólu, tel. hollow + konda, tel. hill). Trig. station; lat. 15° 10′ 42·57″; long. 77° 33′ 27·65″; height 1,684 feet; from Ameenpully E.N.E. 1¾ miles; from Anantapore N. 35 miles; from Gooty W.N.W. 9½ miles.——*Casaupooram* (కసాపురం - kasápuram, Tel.). From (kasáyi, tel. butcher + pura, san. town). Village, Place of pilgrimage; pop. 1,298; acres 6,603; lat. 15° 12′; long. 77° 26′; from Anantapore N.N.W. 38 miles; from Gooty W.N.W. 17¼ miles. Large temple to Hanooman [q.v.].——*Chikalgoorky* (చికలగురికి - chíkalaguriki, Tel.). Trig. station; lat. 14° 59′ 07·18″; long. 77° 13′ 34·07″; height 1,521 feet; from Anantapore N.W. 34 miles; from Gooty W.S.W. 31 miles; from Paultore E. 2¼ miles.——*Conacondla* (కోనకొండ్ల - konakondla, Tel.). From (kona, tel. peak + konda, tel. hill). Village, Hill; pop. 4,204; acres 14,382; lat. 15° 6′; long. 77° 24′; from Anantapore N.N.W. 33 miles; from Gooty W. 18 miles. A hill fort in a commanding position.——*Goontacull* (గుంతకల్లు - guntakallu, Tel. guntakal *). From (gunta, tel. quarry + kallu, tel. stone). Village, Railway station; pop. 4,797; acres 9,107; lat. 15° 11′; long. 77° 25′; height 1,412 feet; from Anantapore N.N.W. 35¾ miles; from Gooty W. 19 miles.——*Gooty* (గుత్తి - gutti, Tel.). See below.——*Guddecull* (గడ్డేకల్లు - gadékallu, Tel.). From (gadda, tel. mound + kallu, tel. stone). Village; pop. 2,320; acres 7,353; lat. 15° 07′; long. 77° 17′; from Anantapore N.W. 38 miles; from Gooty W. 27 miles. The trig. station is in lat. 15° 07′ 18·12″; long. 77° 16′ 53·10″; height 1,823 feet; from Anantapore N.W. 39 miles; from Doneycull E.S.E. 2¾ miles; from Gooty W. 27 miles.——*Gumpamala* (గంపమల - gampamala, Tel.). From (gampa, tel. basket + mala, tel. hill). Trig. station; lat. 14° 51′ 35·10″; long. 77° 43′ 28·80″; height 2,510 feet; from Anantapore N.N.E. 14 miles; from Chintamaucoolapully S.S.E. 2¾ miles; from Gooty S. 18 miles.——*Hauvaligy* (హావళిగె - hávaligi, Tel.). Village; pop. 2,159; acres 10,747; lat. 15° 01′; long. 77° 10′; from Anantapore N.W. 40 miles; from Gooty W. 35½ miles.——*Krishtapaud* (క్రిష్టపాడు - krishtapádu, Tel.). From (krishna, tel. proper name + pádu, tel. village); built by krishna deva royel. Village; pop. 2,886; acres 5,814; lat. 15° 04′; long. 77° 49′; from Anantapore N.N.E. 28 miles; from Gooty E.S.E. 10½ miles. Manufacture of silk cloths.——*Namdabad* (నామదాబాదు - námadábádu, Tel.). From (namat, hind. proper name + ábád, hind. city). Trig. station; lat. 15° 05′ 55·10″; long. 77° 38′ 54·61″; height 1,173 feet; from Anantapore N. 29 miles; from Gooty W.S.W. 2½ miles.——*Naugasamoodram* (నాగసముద్రము - nágasamudramu, Tel.). From (nága, san. proper name + samudra, san. ocean). Village, Hill; pop. 2,853; acres 16,958; lat. 15° 03′; long. 77° 33′; from Anantapore N.N.W. 27 miles; from Gooty W.S.W. 10 miles.——*Nelgonda* (నేలగొండ - nelagonda, Tel.). From (néla, tel. ground + konda, tel. hill). Village; pop. 1,685; acres 11,261; lat. 15° 06′; long. 77° 29′; from Anantapore N.N.W. 30½ miles; from Gooty W. 12¼ miles. Glass bangles made.——*Nimbacull* (నింబకల్లు - nimbakallu, Tel.). From (nimba, san. the margosa tree, melia azadirachta, linn. + kallu, can rock). Trig. station; lat. 14° 51′ 55·10″; long. 77° 14′ 19·47″; height 1,570 feet; from Anantapore W.N.W. 29 miles; from Aumidella W.N.W. 3¾ miles; from Gooty W.S.W. 34 miles.——*Ooderpidroog* (ఉదిరిపిదుర్గము - udiripidurgamu, Tel.). From (udiri, tel. gold + durga, san. fort). Trig. station; lat. 14° 49′ 54·24″; long. 77° 23′ 11·81″; height 1,725 feet; from Anantapore W.N.W. 20 miles; from Gooty S.W. 28 miles; from Marootla W. 3¼ miles. Also town; pop. 945; acres 10,926. Isolated hill of 400 feet high in the neighbourhood.——*Ooravacondah* (ఉరవకొండ - uravakonda, Tel.). See sep. title.——*Paumidy* (పామిడి - pámidi, Tel.). See sep. title.——*Pautacottacheroo* (పాతకొత్తచెరువు - pátakottacheruvu, Tel. pátakottacheru *). From (páta, tel. old + kotta, tel. new + cheruvu, tel. tank). Village, Railway station; pop. 852; acres 6,135; lat. 15° 10′; long. 77° 34′; height 1,234 feet; from Anantapore N. 33 miles; from Gooty W.N.W. 8¾ miles.——*Pedda vadoogore* (పెద్దవడుగూరు - peddavadugúru, Tel.). From (pedda, tel. great + vadugúru, tel. village so called). Village; pop. 2,427; acres 6,638; lat. 15° 01′; long. 77° 43′; from Anantapore N. 23½ miles; from Gooty S.S.E. 7 miles.——*Pennahobalam* (పెన్నహోబలం - pennahóbalam, Tel.). From (penna, tel. river so called + ahóbalam, tel. place so called). Village, Place of pilgrimage; pop. 4; acres 2,298; lat. 14° 52′; long. 77° 21′; from Anantapore W.N.W. 23¼ miles; from Gooty S.W. 28 miles. On banks of Pennair. Car festival. River narrow and dangerous on account of rocks. Important temple.——*Pennair* (పెన్నేరు - pennéru, Tel.). See sep. title.——*Pundicoonta* (పందికుంట - pandikunta, Tel.). From (pandi, tel. pig + kunta, tel. pond). Village; pop. 486; acres 9,001; lat. 14° 58′; long. 77° 26′; from Anantapore N.W. 24½ miles; from Gooty W. 19¾ miles. Glass bangles made.——*Ramgherry* (రామగిరి - rámagiri, Tel.). From (ráma, san. proper name + giri, san. mountain). Village; pop. 701; acres 5,127; lat. 14° 57′; long. 77° 31′; from Anantapore N.N.W. 21 miles; from Gooty S.W. 15 miles. Glass bangles made.——*Vajracaroor* (వజ్రకరూరు - vajrakarúru, Tel.). See sep. title.——*Vidoopanacull* (విడుపనకల్లు - vidupanákallu, Tel.). From (vitapa, san. offshoot + kallu, can. rock). Village; pop. 2,790; acres 13,478; lat. 15° 03′; long. 77° 14′; from Anantapore N.W. 38 miles; from Gooty W. 31 miles.——*Yerratimrauzcheroo* (ఎర్రతిమ్మరాజుచెరువు - erratimmarádzucheruvu, Tel.). From (erratimmarádzu, tel. proper name + cheruvu, tel. tank). Village; pop. 1,570; acres 4,566; lat. 15° 09′; long. 77° 36′; from Anantapore N. 32 miles; from Gooty W.N.W. 5¾ miles. Large tank, constructed for Krishna deva royel.——(2) Town, Divisional and talook head-quarters, District moonsif's station, Traveller's bungalow; Anantapore dist., Gooty tal.; pop. 6,605; acres 5,629; lat. 15° 07′; long. 77° 41′; height, the town 1,200 feet; top of the rock 2,105 feet; from Anantapore N. 30 miles; from Bellary E. 47½ miles; from Madras N.W. 220 miles; from Penoocondah N. 70 miles. Rishy gowtaman selected the rock as his place of abode. Consists of cluster of fortified hills, nearly surrounding a lower fort and native town; and outside the chain of fortified summits are the military cantonment and another pettah [q.v.] or town. The summits of the inclosing rocks are connected by a rampart, and the access to the town within is through two openings, secured by fortified gateways, one on the south-east, the other on the south-west; there are besides two foot-paths, affording communication through sallyports. In the northern part of the circuit of inclosing rocks is an immense smooth rock, which, fortified by gradations surmounted through fourteen gateways, overlooks and commands the whole of the other works. A well near the summit is said to have communication with the Paumidy. On one of the bastions, overlooking a precipice of about 300 feet, is a small building called Moraury row's seat. About half way down the northern side of this huge rock is a projecting shoulder, called Maha gooty, on which are barracks, formerly occupied by part of a European regiment, but now falling to decay. The cantonment has been abandoned. Fort was besieged by Mussalmans in the sixteenth century and fell after siege of twelve years. Afterwards held by Pataans [q.v.] of Cuddapah and Savanoor, from whom it was wrested in 1714 by Ghorapadey [q.v.] family of Mahrattas [q.v.], the most distinguished of whom obtained in 1744 Nizam's recognition of his territory as a Mahratta state. In A.D. 1758 taken by stratagem by Hindoo row, father of Moraury row; and from him by Hyder ally in A.D. 1776 after siege of nine months. The fort passed to English in A.D. 1799. Sir Thomas Munro, who died of cholera on 6th June 1827 at Putticondah, was first buried here, his remains being afterwards taken to Madras. The Railway station is 2 miles from the town. Trig. station here in lat. 15° 06′ 49·02″; long. 77° 41′ 33·38″; height 2,105 feet; from Gooty E.S.E. ½ mile. Gooty base north end is in lat. 15° 05′ 48·57″; long. 77° 38′ 57·65″; height 1,261 feet; from Anantapore N. 29 miles; from Gooty W.S.W. 2½ miles. Gooty base south end is in lat. 15° 00′ 53·57″; long. 77° 41′ 14·65″; height 1,110 feet; from Anantapore N. 24 miles; from Gajarampulley N.E. 2¼ miles; from Gooty S. 7 miles. The following are the travelling distances by road from Gooty to different places:—

GOOZERAT (गुजरात - gujaráta, *Mahr.*). From (gurjara, san. people so called + ráshtra, san. country) [goorjara]. A province in W. india comprising Surat and other districts round the gulf of Cambay. Goozeratty is the language of Goozerat; see vol. I (61). So here a class of merchants who originally came from Goozerat; numbers about 1,000. Goozeratty bramins are in history one of the five sects of Dravida [q.v.] bramins [bhaushay, jauty].

GOPLA (గొప్పుల - goppula, *Tel.*). From (goppu, tel. threshing floor). Locative plural. Suffix in place names.

GOR (گور - gor, *Pers.*; గోరీ - gôrí, *Tel.*). Tomb [inam].

GORROO (గొర్రు - gorru, *Tel.*). From (korru, tel. spike).—"*a*" A seed drill. It consists of a beam with three or six shares [caur] fitted into it, and a corresponding number of bamboos attached to a zaddigam [q.v.] or drill, into which the seed is thrown and is thence carried into the ground by the bamboos. At the lower end of the bamboo [q.v.], just above the beam, is a hole through which seeds, the passage of which may be obstructed by clods, &c., of earth, are thrown out, thus warning the ryot [q.v.] of the obstruction which has to be removed. The gorroo is also used as a plough [calappay]. Palgorroo is a regular harrow [goontaca] with many teeth.—"*b*" Also land which will occupy one plough [yair]. Superficial measure. 50 goontas = 1 gorroo; 8 gorroos = 1 cootchel [alavay, 2b]. Approximate actual value, 1 gorroo = 3½ acres. But it rises to 5 acres. Compare Bullah. See vol. I, 609; II, 516.

GOSH (گوش - gosh, *Pers.*). Ear. Cf.:—Felis caracal (siyáhgosh), black ear; Lepus nigricollis (khargosh), donkey ear. See gloss. paragraphs.——*Gosha* (گوشه - goshah, Hind.; గోషా - góshá, Tel.). A corner, retirement. Epithet of Mahomedan females of respectability who do not appear in public [zenana]. Many Hindoo women follow the same rule.——*Gosha nisheen* (گوشه نشین - goshahnishín, Hind.). From (goshah, hind. corner + nishín, pers. seated). One who sits in seclusion [purda nisheen].——*Goshparah* (گوشواره - goshwárah, Hind.). From (above + wár, pers. affix of similitude). Aggregate amount, abstract of an account.

GOTAH (گوٹا - gotá, *Hind.*). From (got, hind. the hem of a garment). Narrow gold [pon] and silver [velly] lace [kinaury, sarigay]. Used for female skirts [cholee].

GOTLA (గొట్ల - gotla, *Tel.*). From (gotle, tel. jujube tree). Locative plural. Suffix in place names.

GOURAMY (گورمي - gurami, *Malay*). Fish. Osphromenus olfax, labyrinthidæ, acanthopterygii, teleostei [matsyam, 30], of naturalists [jantoo]. Native of China, where it frequents still places in rivers. Introduced. Attains 20 lb. and is esteemed for flavor. Already naturalized in Mauritius, Cayenne, and Australia. Like all the Labyrinthidæ, is provided with apparatus for retaining water, so that when out of the water it can keep its gills moist, and can run to some distance by means of its fins and tail, and even leap upon neighbouring plants to catch insects [palmyra fish]. No other species here.

GOWNDEN (ಗೌಡ - gauda, *Can.*; கௌண்டன் - kaundan, *Tam.*). From (kavar. tam. to seize); originally life-taker; hunter. Village headman in the Balaghaut [q.v.], where called Gowda, but distinguish from the sanscrit Gowda [q.v.]. The Gownden's province according to old ordinances is to invite and assemble the ryots [q.v.] for the population of a village and cultivation of the lands dependent on it, to settle disputes, bring back and give encouragement to such of the inhabitants as from oppression, caprice, or other cause have deserted the village. If he be not himself a goottadar [q.v.] or renter, it is his duty to make the person who acts in that capacity acquainted with the circumstances of each inferior farmer; that he be not assessed beyond his ability, that the cowle [q.v.] he receives be not infringed, &c. The gownden should be acquainted with all the usages of his village, whether they regard its internal police or the mode of renting out its lands; supposed to have an intimate knowledge of the Shoodamad or ancient customs; he should be able, when applied to either by the ryots or the servants of the Circar [q.v.], to give a satisfactory exposition of every difficult or disputed point. Some of the agricultural classes habitually append the title Gownden as a sort of caste nomenclature after their names [inam, jauty].

GOWRAM (गौर - gaura, *San.*). Reddish.——*Gowr* (गौर - gaura, San.; गवय - gavaya, Mahr.; جنگلی کہلگا - janglíkhulgá, Hind.; سالدنگ - sáladang, Malay; ಕಾಡುಕೋಣ - kádukóna, Can.; ಕಾಟಿ - káti, Too.; కారెనుము - kárenumu, Tel.; ଗୋଇଲୋ - goyilo, Oor.; കാട്ടി - kátti, Mal.; காட்டுயெனி - káttuyéni, Tam.). Title from sanscrit. San. means pale red. Mahr. from (gava, san. cow). Hind. from (janglí, hind. wild + khulgá, hind. buffalo). Can. from (kádu, can. forest + kóna, can. buffalo). Tel. from (káru, tel. forest + enumu, tel. buffalo). Mal. from (kátu, mal. forest). Tam. from (kádu, tam. forest + éni, tam. young deer). San. also (gaya); (gavala). Hind. also (gaur); (gaurgái), meaning wild ox. Tam. also (káttumádu), meaning forest + ox or cow. Title otherwise Bison. Gavæus gaurus, bovinæ, bovidæ, ruminantia, mammalia [sastanam, 23], of naturalists [jantoo]. Horns pale greenish with black tips, curving outwards upwards and slightly backwards, and finally inwards. General color dark chestnut brown or coffee brown; legs from the knee downwards white. Length 9½ to 10 feet; height at shoulder 6 feet; tail 34 inches. The skull is massive, the frontals large, deeply concave surmounted by a large semi-cylindric crest rising above the base of the horns. The head is square, proportionally shorter than in the ox, the bony frontal ridge is five inches above the frontal plane. The muzzle is large and full, and the eyes small, with a dull pupil of a pale blue color. The whole of the head in front of the eyes is covered with a coat of close short hair of a light grayish-brown color, which below the eyes is darker, approaching almost to black. The muzzle is grayish, and the hair is thick and short. The ears are broad and fan-shaped. The neck is sunk between the head and the back, is short, thick and heavy. Behind the neck, and immediately above the shoulder, rises a fleshy gibbosity or hump of the same height as the dorsal ridge. This ridge rises gradually as it goes backwards and terminates suddenly about the middle of the back. The chest is broad the shoulder deep and muscular, the fore legs short, with the joints very short and strong, and the arm exceedingly large and muscular. The hair on the neck and breast and beneath is longer than on the body, and the skin of the throat is somewhat loose giving the appearance of a slight dewlap. The fore legs have a rufous tint behind and laterally, above the white. The hind quarters are lighter and lower than the fore, falling suddenly from the termination of the dorsal ridge. The skin on the neck, shoulders and thighs is very thick, being about 2 inches and more. The cow differs from the bull in having a slighter and more graceful head, a slender neck, no hump, and the points of the horns do not turn towards each other at the tip, but bend slightly backwards; and they are much smaller. The legs too are of a purer white. The very young bull has the forehead narrower than the cow, and the bony frontal ridge scarcely perceptible. The horns [sing] too turn more upwards. In old individuals the hair on the upper parts is often worn off. The skin of the under parts when uncovered is deep ochrey-yellow. The horns are smooth and polished; and in old individuals are generally broken off at both tips. They are slightly flattened at the base. Found in all the large forests of Southern india. On the west coast it is abundant all along the Western ghauts. The Anamullay hills, the Neilgherries, Wynaud, Coorg, and the Bababooden hills, are all favorite haunts. On the eastern side of the peninsula it is found in the Pulney and Dindigul hills, the Shendamungalam range, the Shevaroys, and some of the hill ranges near Vellore and the borders of Mysore. The Gowr is generally driven towards the sportsman by a line of beaters, while he himself remains concealed behind a tree. A wounded Gowr will occasionally charge, but in general he will turn. The flesh of the Gowr is good if not too old. Indian allied species not here found are:—Gavæus frontalis or gayal, Gavæus sondaicus or burmese wild ox, Poephagus grunniens or yak or grunting ox.——*Gowry* (गौरी - gaurí, San.).—"*a*" Parvaty as a maid before she became the wife of Shiva [q.v.]. Gowry was Girijay or mountain-born, that is born in the Himalayas, and she contrasts strongly with the southern Bhadra cauly [bhadra cauly, matam]. Proper name, common to both sexes. Gowripaty is Shiva, the lord of Parvaty; this also pers. name [peyar].—"*b*" Short for Gowry vratam or Gowry pundigay. Otherwise Haritaulica gowry vratam, from yellow image of gowry worshipped on the occasion; also Swarna gowry vratam, from color of image. Precedes Pillaiyaur chatoorty [q.v.]. Distinguish from Kedaury gowry vratam [q.v.]. Lunar festival [pundigay, 6a], subject to intercalation [adhicam], held on the third day [tity] of bright half [shoocla pacsham] of the sixth lunar month Bhaudrapadam [mausam] between 19th August and 18th September and lasting several days. In honor of Shiva's wife Parvaty [q.v.], as

Gowry. The festival is concluded by erecting a statue in each village, composed of paste of grain and intended to represent the goddess. This image is finally placed under a canopy and carried through the streets [maryanday]. See vol. I (93).——*Gowry's fruit* (गौरीफल - gaurip'hala, San.). From (gaurí, san. the goddess + p'hala, san. fruit); red fruit. Hill raspberry, Indian blackberry, Indian bramble, Indian raspberry. Botanically the Rubus genus, rosaceæ [vricsham, 49]. Mostly shrubs trailing or erect, with prickly stems; leaves alternate, simple or compound; flowers white or red; fruit edible. The species best known to the natives are:—Ellipticus, alias rubus flavus, gowreephul, rotundifolius; tall bush; flowers small, white; fruit yellow, flavor of the raspberry; commonly eaten and made into preserves, one of the best of the wild fruits of india; there is a variety hirta. Lasiocarpus, alias rubus albescens, mysorensis, parvifolius, racemosa; large, rambling plant; flowers deep pink; fruits numerous, dry or fleshy, red or orange or a glaucous blue-black color, small, good flavor; white kind of down covers young shoots; very similar to common english blackberry. Moluccanus, the himalayan raspberry; wide-spreading plant; flowers small, white; red edible fruits. Rosæfolius, the mauritius raspberry; fruit very similar in appearance to the english raspberry, but filled with hard seeds; variety produces double white flowers, very like roses [gool].——*Gowry's neem* (گوری نیم - gaurinim, Dec.). Same as Large neem.——*Gowry's tree* (గౌరచెట్టు - gárachettu, Tel.). From nut shells used in her worship. Same as Fire-work plant.

GRAB (غراب - ghuráb, *Hind.*). A sloop with long projecting bows, Malabar.

GRÆMESPETT (గిరింపేట - girimpéta, *Tel.*). From (mr. græme, a former collector + péta, tel. suburb). Village; North arcot dist., Chittore tal.; pop. 2,200; acres 2,464; lat. 13° 12′; long. 79° 08′; from Chittore S. 1¼ miles. Suburb of Chittore.

GRAHAM (ग्रह - graha, *San.*). From (grah, san. to seize) [goonam, graumam]; as seizing or influencing destinies of men [griham]. A moveable point in the heavens. With Madhyam and Spootam prefixed, signifies mean and apparent place of such point in the sidereal or fixed zodiac [raushy chuckram]. So a planet [najm]. The following planets give a name to the seven days of the week [vanram]:—Ravy, or sooryan, the sun; Chundran, or soman, the moon; Mungalan, or coojan, mars; Boodhan, mercury; Gooroo, or brihaspaty, jupiter; Shoocran, or bhrigoo, venus; Shany, saturn. Besides these, Rahoo the moon's ascending node, and Kait her descending node, are reckoned as obscure planets [goolican], which occasion the eclipses [grahanam] of the sun and moon. At the large religious festivals a small offering is made to all the planets at once; excepting on these occasions they are never worshipped together. They are however frequently worshipped separately by those who suppose themselves to be under the adverse influence of one or other of them. Sooryan or ravy the sun, and Chundran or soman the moon, belonged to the old Aryan vedic deities. To Sooryan or ravy are offered in burnt sacrifice small pieces of the shrub, calotropis gigantea [yercum]; to Chundran those of butea frondosa [palaus]; to Mungalan or mars those of acacia catechu [catechu]; to Boodhan or mercury those of achyranthes aspera [indian burr]; to Brihaspaty or jupiter those of ficus religiosa [peepul]; to Shoocran or venus those of ficus glomerata [cluster fig]; to Shany or saturn those of the acacia suma [white sundra]; to Rahoo the ascending node blades of cynodon dactylon [hurrially]; and to Kait the descending node blades of eragrostis cynosuroides [darbhay]. The image of Sooryan is a round piece of mixed metal, twelve fingers in diameter; of Chundran, a piece like a half-moon, a cubit from end to end; of Mungalan, a triangular piece six fingers in width; of Boodhan, a golden bow two fingers in breadth; of Brihaspaty, a piece like a lotus [nelumbo]; of Shoocran, a square piece of silver [velly]; of Shany, an iron scimitar; of Rahoo, an iron macaram [q.v.], half stag [mrigam] and half fish [matsyam]; and of Kait, an iron snake [sarpam].——*Graha chauram* (ग्रहचार - grahachára, San.). From (chára, san. motion). Literally planetary motion. Misfortune.——*Grahanam* (ग्रहण - grahna, San.; گرهن - grahan, Hind.). From (grah, san. to take). An eclipse. The popular account of these in S. india of poorannic origin, is that a serpent swallows the sun or moon. Rahoo [q.v.] and Kait [q.v.] as planets stand for the moon's nodes, or dragon's [tinneen] head and tail. Compare Bel and the dragon worshipped at Babylon, where Bel is a name of the sun. The moon in its orbit [cacsham], passing from node to node [craunty pautam], does in effect draw on the line of sun's path [craunty mundalam] the figure of a serpent; and returning fills up the other side so as to produce the figure of a caduceus such as was put into the hands of Mercury by the Greeks having the head, body and tail of a serpent on a straight rod. The duration of an eclipse is considered a sacred, but inauspicious time. Hindoos observe a strict fast and abstain even from water two jaumams [q.v.] or six hours before beginning. They bathe twice both at sparsham or commencement and vimochanam or termination. Tarpanam [q.v.] or sesamum [gingelly] water offered to deceased ancestors is deemed more meritorious then than at other times. The belief is general that a pregnant female seeing the eclipse will bring forth a child with defect of limbs; so she is confined to a dark room. It is held that muntrams [q.v.] acquire unfailing efficacy when learnt or recited during an eclipse [jyotisham, maryanday].——*Grahapatram* (ग्रहपत्र - grahapatra, San.). From (above + patra, san. paper). Horoscopical table showing position and aspects of heavenly bodies at any particular moment, for birth, marriage, &c. [jenmaputtricay].——*Graha poojay* (ग्रहपूजा - grahapújá, San.). From (above + pújá, san. worship). Worship of the planets, to render them propitious.

GRAM (گرام - grám, *Hind.*). From portuguese (grão), meaning grain. Term applied to many pulses [dholl] especially when used for horses [ghorah] or cattle [maud]. Includes the genera:—arachis, atylosia, cajanus, cassia, cicer, dolichos, ervum, glycine, indigofera, malva, osbeckia, phaseolus, rothia, tephrosia, vigna.——*Bengal gram* (चणक - chanaka, San.; चणा - chaná, Mahr.; चणो - chanó, Conc.; حمص - himmas, Ar.; نخود - nakhúd, Pers.; چنے کا پیڑ - chanekáper, Hind.; چنے کا جھاڑ - chanekájhár, Dec; ಕಡಲೆ - kadale, Can.; ಕಡಲೆ - kadale, Too.; శనగ - shanaga, Tel.; [illegible] - sullochona, Oor.; കടലക്ക - katalakka, Mal.; කඩල - kadala, Singh.; கடலை - kadalai, Tam.). Title from use for horses chiefly in n. india. San. from (chan, san. to give). Mahr., &c., from sanscrit. Mal. from tamul. Tam. from (kadal, tam. sea); foreign plant. San. also (kaláya), meaning causing wind or vayoo [calauyam]; (putasañjan), meaning born with a pod; (harimant'ha), meaning eaten by horse. Hind. also (harbarekájhár); (bút). Can. also (kadli). Tel. also (chanakamu). Mal. also (katala). Tam. also (mañjfram), meaning beautiful. Greek ἐρέβινθος, κριός. Title otherwise Bengal horse-gram, Cadalay, Calavanche, Chenna, Chick pea, Columbine, Common gram, Egyptain pea, Garavance, Gram chick-pea, Pea of venus, Shanaga. Botanically Cicer arietinum, linn., leguminosæ [vricsham, 48]. Specific from being like ram's head. Herbaceous, annual plant; height 2 feet or more; calyx five-lobed, scarcely gibbous, segment as long as the alæ of the corolla; leaves unequally pinnated; leaflets ovate, serrated, equal; stipules lanceolate, somewhat toothed; corolla papilionaceous; flowers axillary, bluish purple; legumes hairy, ¾ to 1 inch long, usually contain two seeds. Chemical composition of the gram is water 11·5, albuminoids 21·7, starch 59·0, oil 4·2, fiber 1·0, ash 1·5, phosphoric acid 1·1 per cent. Gives an acidulated exudation or vinegar; not a product of acetous fermentation or destructive distillation, but consists almost wholly of water, oxalic acid, and acid oxalates; it varies in color from pale brown to reddish brown, and has an intense and sharp acid taste, the characteristic of oxalic acid, and a slight and peculiar odour which is different from that of vinegar; its specific gravity is generally between 1·008 and 1·020. Plant cultivated in black loam; dry; ground prepared in south in audy or july or auvany [mausam] or august, on coromandel [q.v.] two or three months later, by ploughing and manuring; seed sown after soaking in water for some hours, broadcast, and soil levelled by harrow [gorroo]; under growth the weeds are cleared if necessary; grown crop is dark green, one foot high; cut after four months with sickles and heaped up; then put in the sun, beaten with sticks, and grain separated; produce brought to market after one month; average price 15 imperial seers [q.v.] for 1 rupee. The vinegar [candy] above-mentioned is collected in the following manner:—a piece of thin and clean cloth is tied to one of the ends of a stick, and the plants are touched with this early in the morning so as to absorb the dew on them, which is squeezed out in a vessel; sometimes the plants are covered with a cloth during the latter part of the night, which is found wet in the morning and is then wrung out in a vessel, but the liquid in this case is much weaker than in the former case. In medicine seeds are antibilious; vinegar refrigerant, stomachic and tonic, used in atonic dyspepsia; substituted for british diluted acetic acid [sirkey ka tezaub], a common menstruum. When roasted like coffee [q.v.] seeds are aphrodisiac; they are eaten in curries [q.v.] cakes, &c.; very fattening to cattle and horses, but in this case prior to giving it is macerated in cold water till it becomes quite soft and it is not boiled. Varieties, white and red. Bengal gram is also a frequent plant second term. Ex., where transl. is of first term:—Arachis hypogæa (nélashanaga), ground, (vérushanaga), root; Ervum lens (chirishanaga), small; Malva rotundifolia (kátukadale), (káttukatala), and (káttukkadalai), forest; Osbeckia aspera (káttukkadali), forest; Pisum sativum (gundushanaga), round; Sida rhombifolia, var. retusa (kallangadale), stone. See gloss. paragraphs.——*Black gram* (माष - másha, San.; ماش - másh, Dec.; उडीद - udída, Mahr.; उडिदु - udidu, Conc.; اُرد - urud, Hind.; ಉದ್ದು - uddu, Can.; ಉರ್ದು - urdu, Too.; మినుములు - minumulu, Tel.; [illegible] - biri, Oor.; ഉഴുന്ന - uzhunnu, Mal.; [illegible] - búmá, Singh.; உளுந்து - ulundu, Tam.). Title from color of pulse [black horse-gram]. San. from (má, san. to measure); from seed used as weight [niray, 4]. Dec. from sanscrit. Singh. from (bú, singh. earth + má, singh. pulse) [field gram]. Tam. from (uzha, tam. to exert); tonic. San. also (pachélimá), meaning easily cooked; (kasháya), meaning dark-red; (vrishya), meaning aphrodisiac. Can. also (hasaru); (hesaru); (chikuda). Tel. also (uddulu); (káruminumulu), meaning wild + black gram. Title otherwise Maush, Minoomooloo, Oolandoo, Rayet [moodgam] mungo, var kidney bean. Botanically Phaseolus [moodgam] mungo, var. radiatus, linn., leguminosæ [vricsham, 48]. Alias Phaseolus

radiatus, roxburghii. Annual, diffuse; leaves pinnately trifoliolate, hairy; leaflets ovate, acuminated, slightly repand, but not lobed; peduncles erect, shorter than the petioles; flowers somewhat capitate; keel twisted to the left with a very long horn near the base on the left side; legumes very hairy, cylindrical, few-seeded, nearly erect; seeds smooth, somewhat truncated at both ends; flowers yellow; flowering in cold season. Differs from phaseolus mungo [green gram], in having longer and more trailing stems; the plant being much more hairy, the reddish brown pubescence giving the foliage a lighter tint; the seeds being fewer, larger and longer, and usually dark-brown color. Chemical composition of the gram is water 10·1, albuminoids 22·7, starch 55·8, oil 2·2, fibre 4·8, ash 3·3, phosphoric acid 1·1 per cent. This pulse is the origin of the weight mausham, [q.v.], as the seed of abrus precatorius [indian liquorice] is of the weight retty [q.v.]. Cultivated in red loam; dry ground prepared in south from audy or july to poorataushy or september, on coromandel in aushweejam or october and caurteecam or november, on w. coast in mitoonam or june; land ploughed five times, sheep folded; seed sown in south in arpisy or october, on coromandel in caurteecam or november and margashiram or december, on w. coast between 7th and 30th of mitoonam [mausam] or june; sown broadcast and ploughed in; a month after sowing two hoeings; ashes applied; in full grown crop pods are black; three and half months after sowing plants are rooted up; harvesting same as green gram; average price 12 imperial seers for 1 rupee. Root somewhat narcotic; seeds medicinally tonic. Of the meal natives make bread [poppadam] for religious ceremonies; cattle are fond of the straw; mixed with gram reckoned strengthening for horses. Flour detergent. Itself has two distinct sub-varieties, one with large black seeds and the other with smaller green seeds.——*Black horse gram* (कान्कुल्ती - kánkultí, Mahr.; درخت تشميزج - darakhtitashmízaj, Ar.; چشميزج - chashmízaj, Pers.; چاکسو - cháksú, Hind.; چاکوت - chákút, Dec.; చనుపాలవిత్తులచెట్టు - tsanupálavittulachettu, Tel.; കരിങ്കൊള്ള - karinkollu, Mal.; කළුකොල්ලු - kalukollu, Singh.; காட்டுக் கொள் - káttukkol, Tam.). Title because seeds are black and bear a resemblance to the horse-gram [madras horse-gram]; some black seeds are found in real horse-gram itself, and these also are used for medicinal purposes; so that there is some confusion. Mahr. from (kán, mahr. forest + kultí, mahr. horse-gram). Ar. from persian. Pers. from (chashm, pers. eye + zak, pers. tincture). Hind. from (chakshu, san. eye). Tel. from (tsannu, tel. breast + pálu, tel. milk + vittu, tel. seed + chettu, tel. tree); from seed powder applied to eye in breast milk in ophthalmia. Mal. from (kari, mal. black + kollu, mal. horse-gram, dolichos biflorus, linn.). Singh. from (kalu, singh. black + kollu, singh. horse-gram). Tam. from (kádu, tam. forest + kollu, tam. horse-gram). Ar. also (habbussaudán), meaning soudan seeds. Pers. also (chashúm), meaning eye like; (chashmak), meaning small eye. Hind. also (banár). Singh. also (bhútóra), meaning earth + cassia. Tam. also (idikkol), meaning to pound + horse-gram; (karungánam), meaning black + horse-gram; (mulaippálvirai), meaning breast-milk seed; ophthalmic application of seed powder; (kárkkol), meaning black horse-gram. Title otherwise Black-gram [q.v.], Breast-milk seed, Broad-leaved cassia, Chaksoo seed, Eye powder, Four-leaved cassia, Jungle horse-gram [q.v.], Soudan seed. Botanically Cassia [soovarnacam] absus, linn., leguminosæ [vricsham, 48]. Alias Senna absus. Biennial, all over clammy except the leaves; branches diffuse; leaves long-petioled; leaflets two pairs, obovate, obtuse, glabrous or slightly hairy on the under side; lower flowers axillary, solitary, upper ones forming a short raceme; pedicels short, with a bractea at their base, and minute bracteoles about the middle; stamens five, all fertile; legume nearly straight, obliquely pointed, much compressed, sprinkled with rigid hairs, few-seeded; seeds are small, black, and flat, with a projection at one end; flowers small, yellow; flowering all year; common shrub in dry jungles. Chaksoo seeds as occurring are black and polished, flat, of an irregular oval or oblong shape; the end where the hilum is situated is rather more pointed than the other, length and breadth nearly alike, about ⅓ to ⅛ of an inch; testa horny and thick; cotyledons yellow; taste bitter. The seeds are reduced to a fine powder, which is used as a direct application to the conjunctiva in purulent and other ophthalmia, blowing in a few grains from a quill; seeds mentioned in pharm., but non-officinal.——*Cow gram* (निष्पाव - nishpáva, San.; चवळा - chavalá, Mahr.; अलसंदे - alasandé, Conc.; لوبيا - lobiyá, Pers. and Hind.; لوبا - lobá, Dec.; کچنگ - kachang, Malay; ಅಲಸಂದಿ - alasandi, Can.; ಲತ್ತನೆ - lattane, Too.; అలచంద - alatsanda, Tel.; ମାଙ୍କୋଡୋଦାଣ୍ଡି - mamkododandi, Oor.; കോട്ടപ്പയർ - kóttappayar, Mal.; காராமணி - kárámani, Tam.). San. from (nir, san. prefix of intensity + páva, san. winnowing). Tel. from (hasandi, san. cow gram). Mal. from (kóttal, mal. stick for creepers to climb + payaru, mal. leguminous plant). Tam. from (kár, tam. blackness + á, tam. cow + mani, tam. grain). San. also (rájamásha), meaning king's phaseolus mungo, linn., var. radiatus, linn.; (chapala), meaning moving [long pepper]; (shvétarájamásha), meaning white + the plant. Hind. also (sufedlobá), meaning white variety; (chhotálobá), meaning small variety; (ballar) [country bean]; (chaula). Can. also (avade); (bilihesaru); (tadagani); (kursuvpairu). Tel. also (bobbaralu); (dantupesara), meaning stalk + phaseolus mungo, linn.; (kondaalatsanda), meaning hill + the plant; (pesara) [green gram]. Mal. also (mampayar), meaning earth pulse, perhaps from the color; (kantampayar), meaning field pulse; (karkatakappayar), meaning carcatacam, july, the month of fruiting + pulse; (payaru); (arippayar), meaning small pulse. Tam. also (tattaippayaru), meaning flat + pulse [country bean]; (kárámanippayaru), meaning vigna catiang, endl. + pulse; (periyagárámanippayaru), meaning large variety; (payaru) [green gram]; (válavarai), meaning sword + the plant [tambattam]; (perungárámani), meaning large + the plant; (shirugárámani), meaning small + the plant. Greek φακή ἰνδική. Title otherwise Alasanda, Asparagus bean, Cauraumany, Chinese dolichos, Chowlah, Chowlee, Japan lablab, Lentil, Lobyah [q.v.], Red gram [common dholl], Runner bean, Small-fruited dolichos, Tow cok. Botanically Vigna catiang, endl., leguminosæ [vricsham, 48]. Specific name from (kachang, malay, pulses or leguminous plants). Alias Dolichos catjang, cultratus, sinensis, tranquebaricus; Scytalis catjang; Vigna sinensis. Twining annual, glabrous; leaves pinnately trifoliate; leaflets ovate or oblong, acuminated; peduncles longer than the leaves; flowers in an oblong head or short raceme; calyx campanulate, five-toothed; lowest one longer than the rest; legume nearly straight, very long, cylindric, torulose, with a more or less recurved unguiculate beak, six to twelve-seeded; seeds truncated at both ends; flowers largish, pale violet; flowering in june to august. Chemical composition of the gram husked is water 12·5, albuminoids 24·1, starch 56·8, oil 1·3, fibre 1·8, ash 2·5, phosphoric acid 1·0; with husk, water 12·7, albuminoids 23·1, starch 55·3, oil 1·1, fibre 4·2, ash 2·4, phosphoric acid 1·2. Cultivated in sandy soil or black loam; cultivation, dry; ground prepared on coromandel in caurteecam or november and margashiram or december, on w. coast in yedavam or may and mitoonam or june; ploughing the soil four times; seed sown on coromandel in pooshyam or january, on w. coast in mitoonam [mausam] or june; no nursery; broadcast or dibbled in; when the young plant bears three or four leaves ashes are strewn over it; when it is about to climb, boughs of trees of a man's height are given it to climb upon, and mud is heaped round it; pods plucked as they mature; average price, 20 imperial seers for 1 rupee. Seeds considered hot and dry, diuretic and difficult of digestion. Several varieties as to color of flowers and seeds; the most esteemed is the white-seeded. Other common species are pilosa, vexillata.——*Dew gram* (பனிப்பயறு - panippayaru, Tam.). Title from pulse being brought to perfection by dew [pany]. Same as Field gram.——*Dog green gram* (நாய்ப் பயறு - náyppayaru, Tam.). Title from seeds like green gram and wild. Tam. from (náy, tam. dog + payaru, tam. phaseolus mungo, linn.); from pods. Botanically Indigofera [neely] pentaphylla, linn., leguminosæ [vricsham, 48]. Alias Indigofera fragrans, glabra. Suffruticose, decumbent; leaves pinnated; leaflets one to two pair, oval, both sides hoary from white soft hairs; peduncles about the length of the leaves, with two to three rather distant flowers; legumes cylindrical, straight, mucronate, glabrous; seeds ten to twelve, cylindrical, truncated at both ends; flowers small, purple; flowering nearly all the year.——*Field gram* (मुद्गपर्णी - mudgaparní, San.; काकमूग - kákamúga, Mahr.; हर्पुलि - harpuli, Conc.; ترانگلی - tirangulí, Hind.; ಅವರೆ - ávare, Can.; పిల్లిపెసర - pillipesara, Tel.; ചെറുവിട്ടുകോൽ - cheruvitukkól, Mal.; බින්මා - binmá, Singh.; வயப் பயறு - vayappayaru, Tam.). San. from (mudga, san. green gram, phaseolus mungo, linn. + parna, san. leaf). Mahr. from (káka, san. crow + múga, mahr. green gram); from inferiority. Hind. from (tin, hind. three + angul, hind. inch); three-lobed. Tel. from (pilli, tel. cat + pesara, tel. green gram). Mal. from (cheru, mal. small + vitukkól, mal. leguminous plant). Singh. from (bin, singh. ground + má, singh. pulse) [black gram]. Tam. from (vayal, tam. field + payaru, tam. pulse); dry pulse. San. also (ajará), meaning not becoming old; (ákulí), meaning filled; (górékha), meaning earth + line; (tryangulí), meaning three-fingered, from trifoliate leaf; (kákamudga), meaning crow's phaseolus mungo, linn.; (sahá), meaning enduring. Mahr. also (ránamúga), meaning wild green gram. Hind. also (kulaí), from sanscrit. Can. also (káduhesaru), meaning forest + green gram. Tel. also (madikelu); (mittikelu). Tam. also (narippayaru), meaning fox + pulse, from growing wild [jackal green gram]; (kollaippayaru), meaning garden + pulse; (elippayaru), meaning rat + pulse, a wild variety; (panippayaru), meaning dew + pulse, from being matured by dew; (shímaiyavarai), meaning foreign + dolichos lablab, linn. Title otherwise Crow gram, Dew gram, Fox gram, Rat gram, Three-lobed kidney bean. Botanically Phaseolus [moodgam] trilobus, ait., leguminosæ [vricsham, 48]. Alias Dolichos stipulaceus, trilobatus, trilobus; Glycine triloba; Phaseolus asellus. Herbaceous, procumbent, diffuse; petioles elongated; leaves pinnately trifoliolate; leaves much shorter than the petioles, roundish and entire, three-lobed, middle lobe obovate, narrower towards the base; peduncles elongated, ascending; flowers few, small, capitate, yellow; legume cylindrical, glabrous, or slightly hairy; flowering in cold season; grows wild. Also cultivated; dry; sown broadcast or in small patches; when full grown the leaves become yellow spotted and begin to fall off; three months after sowing pods are plucked by hand, then dried and threshed. Seeds gathered and eaten by the poor; affords good fodder; may be cultivated for hay; leaves and seeds used as famine food. There are several varieties,

——*Forest bengal gram* (കാട്ടുകടലി - káttukadali, Mal.; காட்டுக் கடலை - káttukkadalai, Tam.). Title from seeds. Mal. from (kátu, mal. forest + kadali, mal. the plant, melastoma malabathricum, linn.). Tam. from (kádu, tam. forest + kadalai, tam. bengal gram, cicer arietinum, linn.), but really a corruption from malayalam; cf. wild bengal gram. Botanically Osbeckia aspera; bl., melastomaceæ [vricsham, 57]. Alias Melastoma asperum. Shrub; branches obscurely four-angled, bristly; leaves short-petioled, oblong-ovate or oblong-lanceolate, acute, three-nerved, upper side bristly, under hirsute on the nerves, and pubescent between them; calyx-tube cup-shaped, rigidly pubescent; segments five, ovate-oblong, obtuse, deciduous; appendages consisting of a tuft of a few bristles; stamens ten; anthers acuminated; style incurved at the apex; ovary crowned with bristles; flowers on short pedicels, terminal, somewhat racemose, purplish-red; flowering nearly all the year. Used medicinally for coughs. Other species are:–cupularis, hispidissima, kotigueda, leschenaultiana, octandra, truncata, wightiana, zeylanica. ——*Fox gram* (நரிப்பயறு - narippayaru, Tam.). Title from pulse growing wild, fox being token of loneliness. Same as Field gram.——*Green gram* (मुद्ग - mudga, San.; मूग - múga, Mahr.; मुगु - múgu, Conc.; مونگ - múng, Hind. and Dec.; ಹೆಸರು - hesaru, Can.; ಪಂದೆಂಗಿ - pandengi, Too.; పెసర - pesara, Tel.; ମଗ - maggo, Oor.; ചെറുപയര് - cherupayar, Mal.; මුං - mum, Singh.; பயறு - payaru, Tam.). Title from color of pulse. San. from (mud, san. to be glad). Mahr., &c., from sanscrit. Drav. from (pasu, tam. green) [cow gram]. San. also (kámbóji), meaning produced in cambojam [indian liquorice]; (mahásahá), meaning much enduring; (mada), meaning intoxication; (harita), meaning green; (vishaghnı́), meaning poison destroying [indian heliotrope]. Hind. also (kálímúng), meaning black pulse; (harímúng), meaning green pulse; (kálíurud), meaning black phaseolus mungo, var. radiatus. Can. also (paççehesaru), meaning green + gram; (karehesaru), meaning black + gram; (káduhesaru), meaning wild + green gram; (chikada); (atchayasavu). Tel. also (pattsapesara), meaning green + green gram [tufted green gram]; (nallapesara), meaning black + green gram; (pesalu); (pattsapesalu), meaning green + green gram; (nallapesalu), meaning black + green gram. Tam. also (paççaippayaru), meaning green + pulse; (pásippayaru), meaning green + pulse; (shirubayaru), meaning small + pulse; (karuppuppayaru), meaning black pulse, a dark variety. Title otherwise Hairy-podded kidney bean, Moong bean, Payar, Pesaloo, Small-fruited kidney bean. Botanically Phaseolus [moodgam] mungo, linn., leguminosæ [vricsham, 48]. Specific from hindostany. Alias Phaseolus aureus, hirtus, max, melanospermus. Pulse; annual, nearly erect, hairy; leaves pinnately trifoliolate; leaflets broadly ovate or rhomboid, entire; peduncles at first shorter, afterwards longer than the petioles; racemes axillary; corolla papilionaceous; flowers in a kind of cylindrical head; keel twisted to the left with a short spur near the base on the left; legume horizontal, cylindrical, slender, hairy, six to fifteen-seeded; seeds striated; flowers greenish yellow; flowering in december, january; cultivated in fields. Chemical composition of the gram is water 10·8, albuminoids 22·2, starch 54·1, oil 2·7, fibre 5·8, ash 4·4. Grown generally as subordinate crop with millet [q.v.] or cotton [q.v.]; dry; ground prepared in south in pungoony or march or chittray or april, on coromandel in bhaudrapadam or september and aushweejam or october, on w. coast between 1st and 30th of mitoonam or june; land ploughed five times; sheep folded; seed sown in south in veiyaushy or may, on coromandel in aushweejam or october and caurteecam or november, on w. coast between 7th and 30th of mitoonam [mausam] or june; sown broadcast or by drill [zaddigam]; then ground ploughed once more; a month after sowing two hoeings; crop is dependent on rain; four months or so after sowing plants are rooted up; plant dried in sun ten or fifteen days and then beaten with sticks; stems thus separated from leaves and pods; latter are winnowed and pods separated; pods subsequently trodden by bullocks [maud] and buffaloes [khoolgah]; the grain is then sifted and dried; brought to market at once; average price, 15 imperial seers for 1 rupee. Ripe grain has good taste, is wholesome and nutritious, much esteemed, and commands a comparatively high price; eaten boiled or roasted; cooked into curries [q.v.], for which purpose it is broken up; the flour is substitute for peas [calauyam] in pease pudding; it is ground into meal for the preparation of sweet-cakes, &c.; forms a constituent of poppadams [q.v.]; crushed stalks and leaves prized as fodder for cattle. Flour has detergent properties and is used by native for washing the skin. Several varieties; one has dark-colored seeds, and is called black gram [q.v.]. The small-fruited kidney bean, phaseolus calcaratus, roxb., cultivated and wild, is closely allied to phaseolus mungo; phaseolus tortus, roxb., is a cultivated form of this.——*Horse-gram shrub* (कुलत्थ - kulatt'ha, San.; کلتھی - kulthí, Hind.; ಹುರುಳಿಗಿಡ - huruligida, Can.; ಕುಡು - kudu, Too.). Title from resemblance. San. from (kula, san. cluster + st'há, san. to stand) [madras horse gram]. Can. from (hurali, can. horse gram, dolichos biflorus, linn. + gida, can. plant); from resemblance. Botanically Glycine [maushaparny] tomentosa, pursh., leguminosæ [vricsham, 48].——*Jackal green gram* (ಬೇಲಕಾಡುಸೊಪ್ಪು - bélakádusoppu, Can.; ఉబ్బుకాడ - ubbukáda, Tel.; நரிப்பயறு - narippayaru, Tam.). Title from growing wild. Can. from (béle, can. split pulse + kádu, can. wild + soppu, can. leaves). Tel. from (ubbu, tel. to swell + káda, tel. stem). Tam. from (nari, tam. jackal + payaru, tam. pulse, phaseolus mungo, linn.) [field gram]. Botanically Rothia trifoliata, pers., leguminosæ [vricsham, 48]. Alias Dillwynia trifoliata; Glycine humifusa; Lotus indicus; Trigonella indica; Westonia humifusa. Annual, prostrate, thickly sprinkled with soft, silky hairs; calyx cleft to the middle; leaves petioled, palmately trifoliolate; leaflets nearly sessile, cuneate-oblong, rather fleshy, hairy on the under side; stipules foliaceous; pedicels solitary or twin, leaf opposed; flowers small, sulphur, at last becoming reddish; flowering in february and march. A small procumbent weed, with trifoliate leaves; abundant everywhere; used as greens [keeray].——*Japanese cow gram* (کچنگ جاپون - kachangjápun, Malay). Title from original habitat. Malay from (kachang, malay, pulse, vigna catiang, endl. + jápun, malay, japan). Title otherwise Soja bean, Soy plant, White gram. Botanically Glycine [maushaparny] soja, sieb. & zucc., leguminosæ [vricsham, 48]. Specific name from malay word for a sauce. Alias Soja hispida. Stems sub-erect or climbing upwards, annual, densely clothed with fine ferruginous hairs; leaves long-petioled; leaflets membranous, ovate, acute, rarely obtuse 2–4 inches long, calyx ¼ inch densely hairy; corolla reddish, little exserted; pods usually only two to three-developed in the axil of each leaf, linear-oblong, recurved, densely pubescent 1½–2 inches by ⅓–⅜ inch, three to four-seeded, sub-torulose.——*Jungle gram* (جنگلی کلتھی - janglíkulthí, Hind.). Same as Zanzibar indigo.——*Jungle-horse-gram* (بن کلتھی - bankulthí, Hind.; కొండఉలవ - kondaulava, Tel.; காட்டுக்கொள்ளு - káttukkollu, Tam.). Title from appearance [black horse gram]. Hind. means forest horse-gram. Tel. from (konda, tel. hill + ulava, tel. horse-gram, dolichos biflorus, linn.). Tam. from (kádu, tam. forest + kollu, tam. horse-gram). Tel. also (kárulava), meaning jungle + horse-gram. Tam. also (shirugaliyánduvarai), meaning small + black + cajanus indicus, spreng. Botanically Atylosia scarabæoides, benth., leguminosæ [vricsham, 48]. Alias Cajanus scarabæoides; Cantharospermum pauciflorum; Dolichos medicagineus, scarabæoides; Rhynchosia scarabæoides; Stizolobium scarabæoides. Biennial; leaflets obovate, slightly wrinkled and paler on the under side; peduncles shorter than the petiole, about two-flowered; calyx about half the length of the corolla, cleft to the middle; segments lanceolate-acuminate, slightly curved upwards; vexillum recurved; legume linear, velvety or hairy; flowers small, yellow; flowering nearly all year. For atylosia candollei, w. and a., see Jungle dholl.——*Madras horse-gram* (कुलत्था - kulatt'há, San.; कुळीत - kulíta, Mahr.; कुळितु - kulitu, Conc.; قلت - kullut, Ar.; ماش هندی - máshihindí, Pers.; کلتھی - kulthí, Hind. and Dec.; ಹುರುಳಿಗಿಡ - huruligida, Can.; ಕುಡು - kudu, Too.; ఉలవ - ulava, Tel.; କୁଳଥ - kulut'ho, Oor.; മുതിര - mutira, Mal.; කොල්ලු - kollu, Singh.; கொள்ளு - kollu, Tam.). Title from seeds feeding horses especially in s. india; cf. bengal gram. San. from (kula, san. group + st'há, san. to stand); from cluster of pods [horse-gram shrub]. Mahr., &c., from sanscrit. Ar. from sanscrit. Pers. from (másh, pers. green gram, phaseolus mungo, linn. + hindí, hind. indian). Hind. from sanscrit. Oor. from sanscrit. Mal. from (mutiru, mal. to grow up). Singh. from tamul. Tam. from (kol, tam. to take, as food). San. also (khalakula), meaning threshing-floor + group; (balakula), meaning strength + group. Mal. also (kollu). Tam. also (kánam); (shengol), meaning red horse-gram. Title otherwise Cooltee, Horse-gram, Madras gram. Botanically Dolichos [shimby] biflorus, linn., leguminosæ [vricsham, 48]. Alias Dolichos tomentosus, uniflorus, waslawa; Glycine uniflorus. Annual vetch; stem erect; branches twining; young shoots and leaves covered with silk hairs; leaves pinnately trifoliolate; leaflets ovate, villous, pubescent when old; corolla papilionaceous; calyx deeply bilabiate; upper lip split at the apex; vexillum longer than the keel, ovate-oblong; alæ cohering with the keel at the base; flowers axillary, one to three together, sulphur-colored; legumes compressed, linear falcate, softly hairy, six-seeded. Chemical composition of the gram with husk is water 11·0, albuminoids 22·5, starch 56·0, oil 1·9, fibre 5·4, ash 2·2, phosphoric acid 1·0 per cent. Cultivated dry in any fair soil; ground prepared by ploughing and manuring; if land cultivated in previous year, soil only gone over with a harrow [gorroo]; seeds sown broadcast and then ploughed in; no weeding or watering; when plant has put forth two or three leaves ashes are sprinkled to promote growth; when crop is full grown the leaves wither and drop off; the stems are then about 2 feet; harvested generally three months after sowing, on w. coast longer; plants rooted out by hand and bundled and dried in the sun for four days; on fifth day brought to threshing floor and trodden under foot by cattle or beaten with sticks; then winnowed in the wind and separated and grain brought to store; average price 20 imperial seers for 1 rupee; largely cultivated here; has never been seen in a wild state; if irrigated, would produce from six to eight crops in the year. Seeds as food used for cattle; when given to horses, must first be boiled; natives use them in curries [q.v.] as substitute for dholl [common dholl] being a very pleasant tasted pulse [dholl]; haulms are good fodder; an oil is expressed from the seeds. There is a variety with jet-black seeds, distinct from so called Black horse-gram.

Madras horse-gram is also a frequent plant first term; ex., where transl. is of second term:—Tephrosia purpurea (kollukkáyvélai), pod + gynandropsis pentaphylla; Teramnus labialis (kolluppúndu), plant. Also plant second term; ex., where transl. is of first term:—Atylosia scarabæoides (kárunlava), wild, (kondaulava), hill; Cassia absus (karinkollu), and (kalukollu), black, (idikkol), to pound, (káttukkol), wild; Dolichos falcatus (verriulava), mad; Rhynchosia rufescens (chiriulava), and (siriulava), small; Rhynchosia velutina (karraulava), stick. See gloss. paragraphs.——*Manilla gram* (மணிலாக்கொட்டை - manilákkottai, Tam.). Same as Ground nut.——*Moorman's gram* (मकुष्टक - makushtaka, San.; عدس - adas, Ar.; موٹھ - moth, Hind. and Dec.; కుంకుమపెసర - kunkumapesara, Tel.; துலுக்கப்பயறு - tulukkappayaru, Tam.). Title from original habitat. San. from (mank, san. to adorn); from appearance of matured plant [wild green gram]. Tel. from (kunkuma, tel. red saffron powder + pesara, tel. green gram, phaseolus mungo, linn.). Tam. from (tulukkan, tam. turk + payaru, tam. pulse). San. also (vásanta), meaning produced in spring. Tam. also (piççippayaru), meaning wild + pulse. Title otherwise Aconite-leaved kidney bean, Mutt bean, Saffron gram, Turkish gram. Botanically Phaseolus [moodgam] aconitifolius, jacq., leguminosæ [vricsham, 48]. Alias Dolichos dissectus; Phaseolus trilobus. Annual, diffuse, procumbent, slightly hairy; leaflets deeply and palmately divided into linear-lanceolate lobes; stipules attached below the middle; peduncles nearly as long as the petiole; legumes horizontal, cylindrical; flowers somewhat capitate, small, yellow; flowering in the cold season. Trailing slender-stemmed herb, has a small pleasant-tasted pulse; used like black gram [q.v.]; not considered very wholesome; leaves and stalks given to cattle. Chemical composition of the gram is water 11·2, albuminoids 23·8, starch 56·6, fat 0·6, fibre 4·2, ash 2·8, phosphoric acid 0·8 per cent.——*Mysore gram* (మైసూరుపప్పు - maisúrupappu, Tel.). Title corruption from (masúra, san. the plant). Same as Masoor.——*Rat gram* (எலிப்பயறு - elippayaru, Tam.). Title from small size. Same as Field gram.——*Red gram* (துவரை - tuvarai, Tam.). Title from pulse. Same as Common dholl.——*Saffron gram* (కుంకుమపెసర - kunkumapesara, Tel.). Title from pulse. Same as Moorman's gram.——*Small bengal gram* (చిరిశనగ - chirishanaga, Tel.). Same as Masoor ——*Tufted green gram* (పచ్చపెసర - pattsapesara, Tel.; சடைப்பயறு - shadaippayaru, Tam.). Title from close cluster of pods. Tel. from (pattsa, tel. green + pesara, tel. green gram, phaseolus mungo, linn.) [green gram]. Tam. from (jatá, san. bushy hair + payaru, tam. pulse). Botanically Phaseolus [moodgam] trinervius, heyne, leguminosæ [vricsham, 48]. Alias Phaseolus farinosus. Twining; branches and petioles covered with long spreading hairs; leaflets ovate, acuminated, deltoid or lobed at the base, young ones very hairy, densely ciliated; stipules oblong-lanceolate, attached below the middle; peduncles elongated, straight, hairy, much longer than the leaves; flowers forming a kind of cylindrical head; legumes horizontal, cylindrical, hairy.——*Turkish gram* (துலுக்கப்பயறு - tulukkappayaru, Tam.). Same as Moorman's gram.——*Wild bengal gram* (काडुचण्या - káduchanyá, Conc.; خبازی - khubbází, Ar.; پنیرک - panírak, Pers.; ಕಾಡುಕಡ್ಲೆ - kádukadle, Can.; ಕಾಟುಕಡಲೆ - kátukadale, Too.; త్రికాలమల్లె - trikálamalle, Tel.; കാട്ടുകടലക്ക - káttukatalakka, Mal.; காட்டுக்கடலை - káttukkadalai, Tam.). Title from resemblance of leaf. Conc. from (kádu, conc. forest + chanyá, conc. cicer arietinum, linn.). Ar. from (khubz, ar. bread), from flat round fruit. Pers. from (panír, pers. cheese). Can. from (kádu, can. forest + kadle, can. bengal gram). Too. similar. Tel. from (tri, san. three + kála, san. time + malle, tel. jasminum); flowering morning, noon and evening; and flowers like jasmine. Mal. from (kátu, mal. forest + katalakka, mal. bengal gram). Tam. from (kádu, tam. forest + kadalai, tam. bengal gram, cicer arietinum, linn.) [forest bengal gram]. Pers. also (nánikulágh), meaning crow's bread. Title otherwise Crow's bread mallow, Dwarf mallow. Botanically Malva [khoobauzy] rotundifolia, l., malvaceæ [vricsham, 25]. Alias Malva neglecta, vulgaris. Annual; stems herbaceous, spreading; leaves cordate, roundish, shortly and obtusely lobed, crenated; petioles elongated, sometimes with a line of hairs on their upper side; pedicels several, unequal, axillary, one-flowered; bracteoles three; carpels much wrinkled; flowers middle-sized, pale purple; flowering in february and march. Mucilaginous and emollient leaves used for poultices and also as external application in cutaneous diseases.——*Wild green gram* (वनमुद्ग - vanamudga, San.; काडुमुगु - kádumugu, Conc.; بن برٹی - banbarbatí, Hind.; ಕಾಡುಹೆಸರು - káduhesaru, Can.; ಕಾಟುಪಡೆಂಗಿ - kátupadengi, Too.; కారలత్సంద - káralatsanda, Tel.; കാട്ടുപയറ് - káttupayaru, Mal.; காட்டுப்பயறு - káttuppayaru, Tam.). San. from (vana, san. wild + mudga, san. green gram, phaseolus mungo, linn.). Conc. means wild green gram. Hind. from (ban, hind. forest + barbat, hind. bean). Can. from (kádu, can. wild + hesaru, can. green gram). Too. from (kátu, too. wild + padengi, too. green gram). Tel. from (káru, tel. wild + alatsanda, tel. vigna catiang, endl.). Mal. and tam. from (kádu, tam. forest + payaru, tam. green gram). San. also (makushta), meaning adorned [moorman's gram]; (mayashtaka), meaning destroying insects; (anup'hala), meaning small fruit. Hind. also (hullundá). Tel. also (adavipesara), meaning wild + green gram. Botanically Phaseolus [moodgam] adenanthus, g. f. meyer, leguminosæ [vricsham, 48]. Alias Phaseolus alatus, amarus, cultratus, rostratus. Perennial, twining; leaflets ovate, acute; stipules reflexed; racemes long-peduncled, few-flowered, shorter than the leaves; flowers in pairs with a gland between them; wings variously twisted; keel with a long spirally-twisted beak; legume pendulous, flat, curved, long-mucronate, many-seeded; flowers large, deep rose-purple; flowering in the cold season. The tuberous roots are eaten by the natives.——*Wild horse gram* (ಕಾಡುಹುರಳಿಗಿಡ - káduhuraligida, Can.; వెర్రిఉలవ - verriulava, Tel.). Can. from (kádu, can. jungle + hurali, can. horse-gram, dolichos biflorus, linn. + gida, can. plant). Tel. from (verri, tel. mad + ulava, tel. horse-gram). Tel. also (itamungetíga). Botanically Dolichos [shimby] falcatus, klein., leguminosæ [vricsham, 48]. Root perennial, tuberous; stems twining; leaflets somewhat roundish-ovate, acuminated, terminal one more or less three-lobed; stipules sessile, reflexed; peduncles slender, two to eight-flowered at the apex; vexillum broadly-ovate, shortly two spurred at the base, with two long callosities extending half way up the limb and projecting inwards at the apex; keel much falcate; stigma capitate, woolly; legume linear, falcate, glabrous, four to eight-seeded; valves flat; flowers large, bluish-purple; flowering in the cold season.

GRANTAM (ग्रन्थ - grant'ha, *San.*). From (granth, san. to tie). Is the same as tamul nool [q.v.], from which Nunnool [q.v.], a good string. A collection of palm leaves [cadjan] tied together, book. Especially the sacred book of the Sikhs [q.v.], a collection of moral poems. Also an ancient character in the Tamul language, in which Sanscrit is written; called also Arya ezhoot, or bramins' writing; see vol. I (49). The use of several grantam letters, as ஷ sh, ஸ s, ஹ h, ஜ j, &c., is gaining ground among educated Tamulians [bhaushay]. See vol. II, 205.——*Grantavary* (ഗ്രന്ഥവരി - grant'havari, Mal.). From (above + vari, mal. writ). A book formed of the leaves of the Talipot [q.v.] palm in Travancore or S. canara in which Malabar jenmies [q.v.] register their agreements respecting land with their tenants or mortgagees.

GRASS (புல் - pul, *Tam.*). Prefix.——*Grass cutter* (گھاسکاٹ - gháskátá, Hind.). Seems confounded with Hindostany word, the cutter of grass. Servant employed to collect grass [ghaus] for horses [ghorah], one such being usually attached to each horse besides the horsekeeper [q.v.]. In the north the grass cutter is a man; here that office is filled by the horsekeeper's wife.——*Grass oil* (గడ్డినూనె - gaddinúne, Tel.; புல்லெண்ணெய் - pullenney, Tam.). Grass as it begins to flower is cut, bound in small bundles, and thrown into a boiler with water. The oil [yennay] distilling over from this into cold water and thence skimmed is grass oil. The S. indian grass oils are all extremely fragrant, having an odour like a mixture of lemon [q.v.] and rose [gool]. Much esteemed as external application in rheumatism. Internally as carminative. The chief are from Andropogons, viz.:—Martini, roxb., roussa oil grass, giving ginger grass oil; Muricatus, retz., cuscus grass, giving cuscus root oil; Nardus, linn., citronella, giving citronella oil; Schœnanthus, roxb., lemon grass, giving indian melissa oil.

GRAUMAM (ग्राम - gráma, *San.*; ഗ്രാമം - grámam, *Mal.*). From (grah, san. to hold) [goonam, graham, griham]. Holding [cara]. An inhabited but unfortified village in the midst of cultivated fields and where live cultivators, artisans and laborers. A small village has about hundred families; a large village about five hundred. Every village has its grauma devatay [q.v.] or tutelary deity. Graumam is opposed to Aranyam [q.v.] on the one side, and to Pooram [q.v.], Nagaram [q.v.], and Putnam [q.v.] on the other. In Malabar means a Bramin village only, equivalent to agrahauram [q.v.] east of the ghauts [q.v.]. At the time of Parshooraman's gift of the country to the Bramins, sixty-four graumams were established from Goa to Cape comorin, thirty-two being from Cassergode north to Comorin south; to these were attached all the Shoodra villages [keraloputty]. The villages are held by various tenures in the presidency known by different terms according as they are held by one or more persons in common or severally or by fixed determined shares or according as they pay revenue to government or otherwise. The following are the principal tenures which see under their respective heads:—Yecabhogam and palabhogam; Pasancaray, pungoovaly or samoodauyam and arookicaray; Zemindarry and ryotwarry or amauny; Coroo, sangoroo and shrotriem or inam. See vol. I, 112.——*Graumacurts* (గ్రామఖర్చు - grámakhartsu, Tel.). From (above + kharch, hind. expense). The private expenses of a village contribution among the villagers for the performance of festivals and other purposes which concern the community.——*Grauma devatay* (ग्रामदेवता - grámadévatá, San.). From (above + dévatá, san. deity). Tutelar deities which protect the fields, villages, and towns from evil spirits, and ward off plagues, famine, pestilence, war, conflagration, and inundation. They are regarded as beings who can avert much evil, though not able to bestow positive blessings. These were the gods worshipped by the Tamulians [q.v.] when the Aryan [q.v.] colonists first visited them. The Graumadevatays properly so called are Ayenaur [ayen], with his two wives Pooranay and Poodcalay; and the

males Yellamma, Mauriyamman, Ancaulamman, Bhadra cauly, idaury, Chamoondy and Doorga. Among the various images hat are found in their pagodas [q.v.], together with their own, hat of Veerabhadran [q.v.] is the principal. Every township as its Graumadevatay or village goddess, being now under the indoo system regarded as some form of Cauly [q.v.] or Doorga q.v.], to whom an annual sacrifice of a living animal is offered baly]. At Madras town the Graumadevatay is Yegammaul or eganttaul [matam]. See vol. I (77).——*Grauma devatay rnaul* (கிராமதேவதைத்திருநாள் - kirámathévathait-runál, Tam.). Means village + deity + festival. This is an nnual ceremony [pundigay, 6d], generally after harvest about anuary, unless interrupted by war or any other cause. Upon his occasion all the inhabitants, of every tribe and description, esort to the temple of the god, each bringing an offering ccording to his ability. The toty [q.v.] or public crier gives otice of the approaching festival eight days before the time ppointed, nor must travellers leave the village till the ceremony as been performed. Famine, pestilence and every public alamity are attributed to the wrath of the sawmy [q.v.], ffended either at the neglect of the established rites or at the ins of his votaries. The most devout among the latter eprecate his anger by penance. The Shirry [q.v.] was ormerly performed on this occasion. These penances, &c., vere generally at the temple of the indigenous village goddess nly [maryauday]. Inams were formerly granted for performing illage festivals.——*Graumadhicaury* (ग्रामाधिकारी - grámádhi-kárí, San.). From (above + adhikárí, san. superintendent). The head of a village; either the proprietor, the headman, or he collector of the revenue on government account [monigar]. ——*Graumahisaub* (గ్రామహిసాబు - grámahissábu, Tel.). From (above + hisáb, hind. accounts). The general demand collection and balance furnished by curnam [q.v.] at the period of settlement.——*Grauma khandam* (గ్రామఖండము - grámakhandamu, Tel.). From (above + khanda, san. part). Village site. A spot of ground in a village allotted free to bonâ fide residents for building houses [grauma nuttam].——*Grauma merah* (கிராமமேரை - kirámamérai, Tam.). From (above + méra, tel. fee). Allowances of a portion of the crop, to the village officers and servants [balootah, merah].——*Grauma moonsif* (గ్రామమునసపు - grámamunasapu, Tel.). From (above + munsif, hind. judge). The head of a village vested with judicial, criminal and police powers; office created by the British.——*Grauma nuttam* (கிராமநத்தம் - kirámanattam, Tam.). Same as Grauma khandam.——*Graumany* (கிராமணி - kirámani, Tam.). The head man of a village. Title assumed by toddy [q.v.] drawers. In Teloogoo, Canarese, and Malayalam villages it denotes also the village barber.——*Grauma pravarticam* (ग्रामप्रवर्त्तिका - grámapravartiká, San.). From (above + pravartiká, san. judge). Village senate.——*Grauma samoodauyam* (கிராமசமுதாயம் - kirámasamutháyam, Tam.). From (above + samudáya, san. collection). Property, whether land, topes [q.v.], &c., belonging to and enjoyed by the whole village in common.——*Graumattaun* (கிராமத்தான் - kirámattán, Tam.). In Tamul districts the headman [monigar] of a village.——*Graumyam* (ग्राम्य - grámya, San.). Rustic. Provincialism in grammar [lacshanam]. Barbarisms, including all Hindostany and other corruptions.

GRAUSAM (ग्रास - grása, *San.*). From (gras, san. to swallow) [ghaus, ghiyah]. A mouthful; fodder for cattle.

GREEN HILLS (பச்சமலை - paççamalai, *Tam.*). From (paççai, tam. green + malai, tam. mountain). Range of hills; Salem dist., Salem tal.; lat. 11° 50′; long. 78° 16′; height 5,410 feet; from Salem N. 15 miles. Highest portion of the Shevaroy hills [moottanaud]. Distinguish from Putchamullay range in Ahtoor talook on the south-east.

GRIDHRAM (गृध्र - gridhra, *San.*). From (gridh, san. to be greedy) [gidh]. Vulturidæ family, raptores, aves [pacshy, 1] of naturalists [jantoo]. Vultures. Very large, thick, heavy; head and part of the neck often bare; crop prominent, eye small, wings very long, tail short. Habits sluggish, but not shy of man; devour carcases, &c.; discover food by sight, but have strong sense of smell. Divided into Vulturinæ, true vultures, and Neophroninæ, scavengers. The species best known to the natives are:—Gyps bengalensis [gidh], Otogyps calvus [rangidh], Gyps indicus [burragidh], Neophron percnopterus [dung kite].

GRIHAM (गृह - griha, *San.*). From (grih, san. to hold) [ghar, goonam, graham, graumam]. House. Cell excavated in the walls of Booddhist [booddha] caves [staupatyam]. Astronomical mansion [raushy].——*Griha devatay* (गृहदेवता - grihadévatá, San.). From (above + dévatá, san. deity). The household deity; represented by a water-pot, a rude figure, a Shalagram [q.v.] stone, or the Toolsy [q.v.] plant [matam].——*Griha parivritty* (गृहपरिवर्त्ति - grihaparivartti, San.). From (above + parivritti, san. revolution). Name of a cycle [chuckram] of ninety years among the Tamuls, based on the revolution [bhaganam] of the sun and five planets [graham]. The solar year used in this is 365d 6h 12′ 36″ European time, and 365d 15g 31v 30p Indian time [maunam]. The cycle consists of the sum of one revolution of the sun [sooryan], 15 of Mars [coojan], 22 of Mercury [boodhan], 11 of Jupiter [brihaspaty], 5 of Venus [shoocran], and 29 of Saturn [shany]. It was analyzed by Father Beschi [veeramaumoony] in Madura. Its epoch is A.A.C. 24 [jyotisham].——*Grihastan* (गृहस्थ - grihas'tha, San.). From (above + st'há, san. to stand). A householder [aushramam].

GROUND (மனை - manai, *Tam.*). A measure of land 60 × 40 = 2,400 square feet; used at Madras for house-sites. 24 grounds = 1 cawny [alavay, 2a]. Same as Munny. Compare Ancanam. See vol. I, 609; II, 514.——*Ground nut* (भूचणक - bhúchanaka, San.; भुईचणा - bhuíchaná, Mahr.; नेलगड्ले - nélagadlé, Conc.; ولايتی مونگ - viláitímúng, Hind. and Dec.; کچنگ تناه - kachangtanah, Malay; ನೆಲಕಡಲೆ - nelakadale, Can.; ನೆಲಕಡಲೆ - nelakadale, Too.; వేరుశనగ - vérushanaga, Tel.; നിലക്കടല - nilakkatala, Mal.; රටකජු - ratakaju, Singh.; வேர்க்கடலை - vérkkadalai, Tam). Title from pod maturing under ground. San. from (bhú, san. ground + chanaka, san. bengal gram, cicer arietinum, linn.). Mahr. from sanscrit. Hind. from (viláití, hind. foreign + múng, hind. phaseolus mungo, linn.). Malay from (kachang, malay, pulse + tanah, malay, earth). Can. from (nela, can. ground + kadale, can. bengal gram). Too. from (nela, too. ground + kadale, too. bengal gram). Tel. from (véru, tel. root + shanaga, tel. bengal gram). Mal. from (nila, mal. ground + katala, mal. bengal gram). Singh. from (rata, singh. country + kaju, singh. cashew nut, anacardium occidentale, linn.). Tam. from (vér, tam. root + kadalai, tam. bengal gram); from legumes appearing about the roots. Mahr. also (bhuímúga), meaning ground + phaseolus mungo, linn. Hind. also (búmúng), meaning ground gram; (múngphallí), referring to pod. Malay also (kachanggoreng), meaning pulse + to fry; (kachang-miñak), meaning pulse + oil. Can. also (nelagalekáyi); (bérukadale), meaning root + bengal gram. Tel. also (nélashanaga), meaning ground + bengal gram. Mal. also (vérkkatala), meaning root + bengal gram. Tam. also (nilakkadalai), meaning ground + bengal gram; (manilákkottai), meaning manilla nut; from original habitat. Greek οὔιγγον, οὔϊποι, οὔϊτον. Title otherwise American earth nut, Arachis oil plant, Chenee baudam, Country cashew, Earth almond, Earth bengal gram, Earth nut, Earth pea, Grass nut, Katjang, Mandoby, Manilla gram, Manilla nut, Monkey nut, Nut-oil plant, Pea nut, Pindal, Pindar, Underground bean, Teuss oil plant, Underground kidney bean, West indian ground nut. Botanically Arachis hypogæa, linn., leguminosæ [vricsham, 48]. Specific name from the pods burying themselves in the earth, where they ripen their seeds. Alias Arachis africana, americana. Stem hairy; leaves abruptly pinnated; leaflets two-pair; calyx tubular, long; corolla papilionaceous; stamens and petals inserted into the throat of the calyx; pea-like flowers above ground sterile, aggregate, axillary, yellow; legumes long-stalked, to indehiscent, one-celled, two to three-seeded. Annual herb with procumbent branches; presents the appearance of a large clover; its seed-pod perfected under ground, about 2 inches long, and contains two or three pea-like [calauyam] seeds of an earthy flavor; the seeds or nuts abound with starch, oil and a large proportion of albuminous matter; sold in bazaars [q.v.] either parched, with the shell on and put up in paper packets, or shelled and roasted; the cleaned seeds yield about 43 per cent. of a clear straw-colored edible oil possessing a slight bean-like taste and smell. Plant is cultivated in sandy soil; ground ploughed dry in shrauvanam or august; seed sown in bhaudrapadam [mausam] or september, after manuring; no nurseries; watered once a week; height of full grown crop one span; roots are dug after five months, and brought to market immediately; average price 12 imperial seers for one rupee. Oil forms a good substitute for olive [zeitoon] oil; well adapted for the preparation of ointments; gives to pharm. oleum arachis, officinal. The leaf affords food for cattle; nuts, after surplus oil extracted by pressure, yield a good oil cake [ponnauk] for manure, &c.; dried kernels of nuts are largely consumed and from the quantity of oil they contain are nutritious; generally toasted before eaten, less wholesome than the cashew-nut [cashew], which much resemble in taste. Seeds are exported to france and elsewhere for the manufacture of oil; oil is used for adulterating gingelly [q.v.] oil; makes a good soap [sauboon]; in fact is good for every purpose for which olive or almond [baudam] oil is used; does not become rancid so quickly as other oils [yennay]; brilliancy of light in lamps is superior to that of olive oil, with scarcely any smoke.

GUAR (गोवारी - góvárí, *Mahr.*; वाल्लासांगो - vállásángó, *Conc.*; گوار - guár, *Hind.*; مٹکی کی پھلی کاجھاڑ - matkíkíphallíkájhár, *Dec.*; ಚಪ್ಪರದವರೆ - chapparadavare, *Can.*; ತಂಬಡಬರೆ - támbadabare, *Too.*; గోరుచిక్కుడు - góruchikkudu, *Tel.*; പന്തലമര - pantalamara, *Mal.*; கொத்தவரை - kottavarai, *Tam.*). Title from hindostany. Dec. from (matkí, hind. pot + phallí, hind. pod + jhár, hind. tree). Can. from (chappara, can. shed + avare, can. beans, dolichos lablab, linn.). Tel. from (góru, tel. nail + chikkudu, tel. dolichos lablab, linn.); probably from its being sliced with the nail, being too small to require a knife. Mal. from (pantal, mal. shed + amara, mal. bean, dolichos lablab, linn.). Tam. from (kottu, tam. cluster + avarai, tam. dolichos lablab, linn.). Can. also (góriballi), meaning cyamopsis + creeper; (góvardhanakáyigida), meaning cow + increase + fruit + plant, from use as cattle fodder; (chauvalikáyigida), used in

bellary. Tam. also (shíniyavarai), meaning china + dolichos lablab, linn. Title otherwise Chinese lablab, Chupper bean, Cluster bean, Lupin, Nail bean. Botanically Cyamopsis psoralioides, dc., leguminosæ [vricsham, 48]. Alias Dolichos fabæformis, psoralioides; Lupinus trifoliatus; Psoralea tetragonoloba. Robust, hairy, erect, annual herb, 2–3 feet high; flower small, rose-colored; pods thick and from 1½–2 inches long; a sort of gram [q.v.]; cultivated during the cold months; the grain a cattle fodder; small flat pods, used in curries [q.v.] and as french beans [lobyah].

GUAVA (बहुबीजफल - bahubíjap'hala, *San.*; जांबा - jámbá, *Mahr.*; पेर - péra, *Conc.*; امرود کا پیڑ - amrúdkáper, *Hind.*; جام کا جھاڑ - jámkájhár, *Dec.*; جمبو - jambu, *Malay*; ಶೀಬಿ - shíbi, *Can.*; ಪೇರ - péra, *Too.*; జామచెట్టు - jámachettu, *Tel.*; ଜାମୋ - jámó, *Oor.*; പേര - péra, *Mal.*; පේර - péra, *Singh.*; கொய்யா - koyyá, *Tam.*). Title from (guyava, west indian). San. from (bahu, san. many + bíja, san. seed + p'hala, san. fruit); cf. anaur. Hind. means nectar and properly refers to pear [amrood]. Dec. from (jám, hind. guava + jhár, hind. tree). Tel. from hindostany. Mal. from english pear. Tam. from guava by corruption. San. also (amritap'hala), meaning sweet fruit. Hind. also (safríjám), meaning journey + fruit. Can. also (góva); (perala). Tel. also (goyyáchettu); (góvachettu). Mal. also (koyyá). Title otherwise Journey mango. Botanically Psidium guyava, linn., myrtaceæ [vricsham, 56]. Stout-growing shrub, sometimes small tree 15 feet high; begins to bloom during hot season, and bears fruit during rains up to end of cold season; the finest fruit is met with when the general season of bearing is over; the fruit is globose, yellow; an american plant naturalized in india by the portuguese, now universally cultivated, and in some parts of the country has run wild. The external surface of the bark when fresh is smooth and brown, marked by superficial scars indicating the separation of squamous plates of dead bark; these plates sometimes remain partially attached; beneath the brown epidermis the fresh bark is green; its inner surface is marked by longitudinal striæ, and is of a light brown color; the taste is astringent and agreeably acid; the leaves are aromatic, egg-shaped or oblong, short stalked, covered with soft down underneath, and with the principal veins very prominent; the watery extract of bark contains 27·4 per cent. of tannin. For cultivation first sown in nursery in pots; transplanted four months after; fruit plucked after four or five years; average price, 100 per rupee or one fruit per one pie. Bark of the root medicinally astringent; employed in the diarrhœa of children; in form of a decoction young leaves tonic in the diseases of the digestive functions; in pharm. non-officinal. Fruit has thin bright yellow rind, filled with pulpy yellowish, cream-like or red flesh of pleasantly acid-sweet flavor; natives eat it in its natural ripe state; europeans make it into guava jelly or guava cheese; preferred fresh from the tree in the morning early, as the heat of the day injures its flavor. Wood whitish, moderately hard, even-grained; works well and smoothly; used for wood-engraving and for spear handles and instruments. Two varieties:—Psidium guyava, linn., var. pyriferum, linn., or white guava is pear-shaped; Psidium guyava, linn., var. pomiferum, linn., or red guava is round or ovoid. The difference of color lies only in the seeds; the white guava is the best to eat. No other species of the genus here.——*Dark guava* (کالا جام - kálájám, Hind.). Same as Common jaumoon. ——*Hill guava* (ತವಂಟೆ - tavante, Can.; மலைச்சிறுகொய்யா - malaiççirugoyyá, Tam.). Title from habitat. Can. from (tavudu, can. bran). Tam. from (malai, tam. hill + shiru, tam. small + koyyá, tam. guava, psidium guyava, linn.). Tam. also (tavuttukkoyyá), meaning bran + guava; from similar and tomentose appearance of fruit. Title otherwise Hill gooseberry, Woolly myrtle. Botanically Rhodomyrtus tomentosa, wight, myrtaceæ [vricsham, 56]. Alias Myrtus canescens, tomentosa. Small tree, resembling myrtle; branches downy; leaves opposite, entire, ovate, three-nerved, the lateral nerves near the margin, upper side when young downy, under hoary and tomentose; peduncles one to three-flowered, bearing two ovate bracteoles under the flower; calyx downy, five-cleft; petals slightly downy outside; berry three-celled; seeds compressed, forming two rows in each cell; bears a profusion of pink blossoms somewhat resembling those of peach [shaft auloo]; fruit is a berry of a pale, yellow color. Jelly made from berries, similar to apple-jelly; wood white with pink heart, close-grained, dense, splits in seasoning, good for small turnery purposes.——*Malacca guava* (ملاکہ جام - malákájám, Hind.). Same as Malacca jaumoon.

GUDDEE (گدی - gaddí, *Hind.*). A cushion to sit upon, especially a king's cushion, which is generally a carpet on floor with cushion at head, or throne. Also the pad placed on an elephant's back. Guddee nisheen, from (nishín, pers. who sits) is a sovereign.

GUDDILAM (கடிலம் - kadilam, *Tam.* gadilam *). From (kedilam, tam. a deep gulf). Sanscrit name (garudanadí), meaning braminy kite + river. River; South arcot dist., Cuddalore and Tricalore tals. Rises in Yaigal tank in Cullacoorchy talook. Flows through Tricalore and Cuddalore talooks, and passing close by Fort St. David joins the sea about a mile north of Cuddalore. Length, 59 miles. Principally supplied by the Malattaur, which connects it with the Ponniaur. Three anicuts [q.v.].

GUENOO (ಗೇಣು - génu, *Can.*). A span from the tip of the thumb to that of the little finger. 12 ungoolams = 1 guenoo; 2 guenoos = 1 mola [alavay, 1c]. Approximate actual value, 1 guenoo = 9 inches. Used by Canarese. Same as San. vitasty or gocurnam, Hind. bilisht, Tel. jena, Tam. jaun. Compare San. pradesham, Tam. adee, wottay. See vol. I, 609.

GUENY (ಗೇಣಿ - géni, *Can.*). Tenancy. Guenigar is a tenant. Gueny chit is the agreement executed by a tenant-at-will to the proprietor. Gueny hootwully, from (huttuvali, can. produce), is the portion of produce received by landlord as rent. Moolgueny, from (mula, can. original), is a permanent tenancy.

GUINDY (கிண்டித்தோட்டம் - kindittóttam, *Tam.*). From (kindi, tam. a depression). Village; Chingleput dist., Sydapett tal.; pop. 305; acres 1,269; lat. 13° 00′; long. 80° 17′; from Fort St. George S.W. 6½ miles; from Sydapett S.S.E. 1¼ miles; from the sea W. 3¼ miles. The Governor of Madras [q.v.] has an extensive park and country-house here.

GUINEA (گینی - giní, *Hind.*). Means abounding in gold. The country on W. coast of Africa.——*Guinea cloth* (గినియాగుడ్డ - giniyágudda, Tel.). Old name for piece-goods bought here, especially in Nellore, to be used in West african trade.——*Guinea corn* (گینی کا اناج - giníkáanáj, Hind.). Same as Cholum. ——*Guinea grass* (ರುಸ್ಕಹುಲ್ಲು - ruskahullu, Can.; చామకసవు - tsámakasavu, Tel.; கினிப்புல் - kinippul, Tam.). Tel. from (tsáma, tel. panicum italicum, linn. + kasavu, tel. grass). Tam. means guinea grass. Tam. also (shónaippul), meaning incessant rain + grass. Botanically Panicum [priyangoo] jumentorum, swartz., graminaceæ [vricsham, 156]. Alias Panicum maximum. Tall, hardy, succulent grass; introduced; native of guinea; succeeds even on poor clay soil and on sea sand; when irrigated produces from six to eight crops a year; it should be cut before the flowers appear, as the latter exhaust the nutritive substances of the stem; if planted in rows it allows of interculture by cattle power, by which means the land on which it grows may be easily cleansed; thus it affords an excellent crop for a rotation; much liked by horses [ghorah]; supplies fodder for cattle [maud].——*Guinea pepper* (گینی مرچ - ginímirch, Hind.). Same as Common chilly.——*Guinea sorrel* (گینی چکہ - giníchukkah, Hind.). Same as Red hemp bendy.——*Guinea wheat* (حنطۂ رومی - hintahirúmí, Ar.). Same as Mecca cholum.——*Guinea yam* (گینی پنڈالو - ginípindálú, Hind.). Same as Malacca yam.

GULL (గల్లు - gallu, *Tel.*). Corruption of (kallu, tel.). Stone [cull]. Suffix in place names; as Minagull, sky stone.

GUM (گوند - gond, *Hind.*). Prefix in pharmacology [gond]. ——*Gum ammoniac* (اشق گوند - ushshakgond, Hind.). Product of Dorema ammoniacum, don. [ooshak].——*Gum anime* (سندروس - sandrús, Ar. and Pers.; سندرس - sandaras, Hind.; چندرس - chandras, Dec; తెల్లగుగ్గిలము - tellaguggilamu, Tel.; හල්දුම්මල - haldummala, Singh.; வெள்ளைக்குந்துருக்கம் - vellaikkundurukkam, Tam.). Title from many living insects it contains. Tel. from (tella, tel. white + guggalamu, tel. dammer). Singh. from (hal, singh. vateria indica, linn. + dummala, singh. dammer). Tam. from (vellai, tam. white + kunduruka, san. olibanum). Properly resin [raul] of hymenæa courbaril, but generally applied to indian copal [copal] from vateria indica, linn., or piney [q.v.] tree.——*Gum arabic* (صمغ عربی - samaghiarabí, Ar. and Pers.). Ar. from (samagh, ar. gum + arabí, ar. arabic). Greek κόμμι from the egyptian. Product of Arabian acacias. Real gum arabic occurs in roundish morsels, spherical, ovoid, or formless, of variable degrees of whiteness; solid and very hard, rarely friable, diaphanous in some varieties, opaque in others, fractures in plain, shining, glassy surfaces; inodorous, and nearly tasteless; soluble in the mouth, and adherent to the teeth; powder white in proportion to its purity. For Indian gum arabic see Babool. ——*Gum asafœtida* (هنگ - hing, Hind.). Same as Asafœtida. ——*Gum babool* (ببول کا گوند - babúlkágond, Hind.). See Babool. ——*Gum benzoin* (لوبان کا گوند - lobánkágond, Hind.). Same as Benzoin.——*Gum bussorah* (بصرہ کا گوند - basrahkágond, Hind.). Same as Hog gum.——*Gum elastic* (لچیلا گوند - lachílágond, Hind.). India rubber obtained from milky juiced plants [pauchonty].——*Gum elemi* (کانری گا تاہ - kánarígátah, Malay). Gum of Canarium commune, linn. [elemi].——*Gum galbanum* (بریجا گوند - baríjágond, Hind.). Same as Galbanum.——*Gum ghautty* (گھاٹ گوند - ghátgond, Hind.). Title as obtained from above ghauts [q.v.]. Title otherwise Indian gum [q.v.]. Bombay commercial term for mixed gums [gond] from forest trees. Distinguish from Ghotagamba [q.v.].——*Gum kateerah* (کتیرا گوند - katírágond, Hind.). Same as Kateerah.——*Gum kino* (کنیا گوند - kinyágond, Hind.). Same as Kino.——*Gum myrrh* (صمغ مر - simaghimurr, Hind.). Product of Balsamodendron myrrha [bole].——*Gum opopanax* (باس کا گوند - báskágond, Hind.). Hind. means stinking gum. Product of Opopanax

chironium, koch.——*Gum sagapenum* (صمغ سکبینج - simaghi-sakabínaj, Hind.). Same as Sagapenum.——*Gum scammony* (صمغ سقمونیا - simaghisakmúniyá, Hind.). Same as Scammony. ——*Gum styrax* (صمغ اصطرك - simaghiistarak, Hind.). See Storax.——*Gum tragacanth* (کتیراگوند - katírágond, Hind.). Same as Kateerah.

GUNDY (ಗಂಡಿ - gandi, *Can.*; గండి - gandi, *Tel.*; കണ്ടി - kanti, *Mal.*). Mal. from (khand, san. to cut). Pass. Suffix in place names.——*Gundicote* (గండికోట - gandikóta, Tel. gandikót *). From (above + kóta, tel. fort). Village, Cuddapah dist., Jummalmudoogoo tal.; pop. 1,046; acres 10,569; lat. 14° 49′; long. 78° 20′; from Cuddapah W.N.W. 42 miles; from Jummalmudoogoo W.S.W. 6½ miles. Between Gooty and Cuddapah. Stands inside a large Mahomedan fortress, built on edge of a cliff of Yerramalas forming southern wall of a fissure that cleaves a range of sandstone [manal cull] hills from their summit to their base. The Pennair passes through the gap into the plains of Cuddapah. The strong natural fortress, with its temple endowed by the earliest Vijianugger kings, was formerly a famous stronghold. It was the key to the valley of the Pennair, and must have been impregnable. Built in 1589, it was captured by Golcondah and held by Meer joomla. Later it was the capital of one of the five Circars [q.v.] of the Carnatic [q.v.] hyderabad balaghaut [q.v.], until absorbed by the Pataun [q.v.] nawaub [q.v.] of Cuddapah. It was here that Futteh naick, the father of Hyder, first distinguished himself. Hyder improved and garrisoned the fort, which was taken by the British from Tippoo in 1791. The walls of the fort are in good preservation. The principal buildings still in existence are a fine mosque [musjid], granary, and two old Hindoo temples. The fort was approached by stone steps from two sides. A hill stream in the vicinity was dammed and part of its water turned into a pipe which fed a fountain at the foot of the hill near an old pleasure house. The numerous springs in and near the fort water gardens producing orange [q.v.], lime [q.v.] and custard apple [anona]. Trig. station in lat. 14° 47′ 06·05″; long. 78° 18′ 49·44″; height 1,666 feet; from Gundicote S.S.W. 2¼ miles; from Jummalmudoogoo W.S.W. 8½ miles.——*Gundypollem* (గండిపాలెము - gandipálemu, Tel.). From (above + pálemu, tel. fortified village). Village; Nellore dist., Oodayagherry tal.; pop. 329; acres 2,517; lat. 15° 00′; long. 79° 21′; from Nellore N.W. 60 miles; from Oodayagherry N. 8½ miles. Ancient tank formed by damming the waters of the Pillapair, an affluent of the Munnair. Breached shortly after completion 500 years ago. Hills on both sides. Bund [q.v.] only one mile long. Sluice is unusually large. A project for its restoration is being considered.

GUNGAY (गङ्गा - gangá, *San.*). From (gá, san. earth + gam, san. to go) [gaty, go]; as having been brought from heaven to earth.—"*a*" Deity of the Ganges. *στύξ* of Greeks; Styx of Romans; Nile of Egyptians. The secondary wife of Shiva [q.v.] and goddess of water. She is represented as a siren, half woman and half fish, swimming on the water. Her two hands she folds as if engaged in prayer. On her head she wears a crown, and on her forehead the Shiva mark of sacred ashes [vibhooty]. Her ears, breast, neck, arms, hands, and the rest of her body are adorned with various jewels, and from her shoulders a garland hangs down. There are no books treating especially of Gungay, but various stories are related of her in the great poems and the pooraunams [q.v.]; and all books written for the purpose of showing the efficacy of water in washing away sins, may be regarded as setting forth her praise. For though the river Ganges in Northern india is Gungay especially, there are also other rivers which partake of her sanctity, and whose water is regarded as efficacious in removing sin as that of the Ganges. These are the Godavery, Cauvery, &c. And as all people do not live near those rivers, devotees fetch thence sacred water and sell it. No image of Gungay is found in the pagodas [q.v.]; nor is she, like Parvaty [q.v.] and other goddesses, worshipped with offerings. The Tamulians worship her by bathing in rivers and tanks according to prescribed rules, and with the recitation of certain forms of prayer. Bathing is thought to be particularly meritorious on Monday, Wednesday, and Saturday, but there are also special days on which great merit is attached to bathing. In the river near Mayavaram a great number of people bathe throughout the month of Toolaum [mausam] or October, in order to be purified from sin, and there are many such sacred places. At Combaconam, a great festival called Maumaungam [maha magham], i.e., the great Magham, is celebrated every twelve years. The water of a large tank there is supposed to rise once in twelve years on a certain day and at a certain hour, when thousands of people plunge in, to get rid of their sins. There are also two great festivals, at which many people resort to the sea for bathing. The one occurs once in twenty-five years, and is called Hastodayam; the other annually in May, and is named Magha tirnaul. Every tank near the Shiva temple is regarded and adored as Gungay, and bathing in it is thought to be as efficacious in removing sins as bathing in the Ganges itself. Gungay has various names, of which the following are best known:—Bhageeraty, as brought down from heaven through Bhageeratan; Gungah bhawauny; Gungah devy or gungay goddess; Jauhnavy, as being regarded as the daughter of the giant janoo, who, being disturbed in his penance by her roaring, swallowed her, but emitted her again at the request of bhageeratan; Mandaukiny or the celestial ganges; Soora nuddy or the heavenly river; Tripatagay, as supposed to flow through three worlds; Varanuddy or boon river. She has eight virgins as playmates, which are the following eight rivers:—Canyay, Cauvery, Godavery, Mannairy, Nerbudda, Saraswaty, Sindhoo or indus, Yamoonay or jumna [matam]. Gungay is a female proper name [peyar]. Gungah toolsy is holy water in which are mixed the leaves of the sacred Toolsy [q.v.]. See vol. 1 (78).—"*b*" Plant first term often joining two genera, meaning large or excellent. Ex., where transl. is of second term:—Michelia champaca (gangarávi), ficus religiosa; Portulaca oleracea (gangarégu), zizyphus jujuba; Thespesia populnea (gangarávi), ficus religiosa; Trianthema decandra (gangapávili), portulaca quadrifida. See gloss. paragraphs.—"*c*" A dynasty of kings who ruled over congoo [q.v.] country from A.D. 188–894, when they were conquered by the cholas [q.v.]. The founder was Congany vurma. Their capital originally Scandapooram near Guzzelhutty was in third century changed to Talacaud. On the overthrow of their power, one of the family established a kingdom in Orissa [gajapaty] which lasted till 1534 when it succumbed before mahomedans. ——*Ardha gungay* (अर्द्धगङ्गा - ardhagangá, San.). The half Ganges or Cauvery river, having half the merit of the Ganges. ——*Gungamaindan* (கங்கைமைந்தன் - kangaimaindan, Tam.). From (above + maindan, tam. son). Soobramanyan [gungasootan].——*Gungammah* (கங்கம்மா - kangammá, Tam.). From (above + ammá, tam. mother). River-goddess on the Neilgherries. It is a practice there when the rivers are in flood for the herdsman to throw a coin into the rivers before crossing them.——*Gungan* (கங்கன் - kangan, Tam.). Name of a Paundyan king under whose auspices the Nunnool [q.v.] was composed by Pavanandy [q.v.].——*Gungarauz* (గంగరాజు - gangarádzu, Tel). From (above + rádzu, tel. king). Hindoo 2nd or pers. name [peyar].——*Gunga sootan* (गङ्गासुत - gangásuta, San.). From (above + suta, san. son). Soobramanyan, as born of a lake [gunga maindan, sharvanan].——*Gungaudharan* (गङ्गाधर - gangádhara, San.). From (above + dhri, san. to support). Supporter of the Ganges, Shiva [q.v.]. The river is supposed to proceed from the hair of his head. Similarly the Nile had its source in the tresses of Osiris.——*Gungavamsham* (गङ्गवंश - gangavamsha, San.). From (above + vamsha, san. family). The royal house of Orissa gajapaties. See vol. I (151).——*Gungavenyan* (கங்கைவேணியன் - kangaivéniyan, Tam.). From (above + véni, san. braided hair). Shiva who holds the Ganges on his head.——*Gungavole* (గంగవోలు - gangavólu, Tel.). From (above + prólu, tel. town). Lake; Kistna dist., Repully tal. in Peravaly village; lat. 16° 09′; long. 80° 46′; from Masulipatam W. 28 miles; from Repully N.W. 11 miles; from the sea N. 17 miles. Pearls [moty] were formerly found.——*Gungavully* (ಗಂಗಾವಳಿ - gangavalli, Can.). From (above + ávali, san. range). Sanscrit name (pañchagangávali), meaning five + rivers + range. River; South canara dist., Coondapore tal. An estuary formed by the junction of five streams, of which the Collore, Chuckranuddy and Gurgat are the principal.——*Gungaycondapooram* (கங்கைகொண்டபுரம் - kangaigandappuram, Tam.). From (above + konda, tam. obtained + pura, san. town). Place where a Chola king obtained holy water. Village; Trichinopoly dist., Oodayarpolliem tal.; pop. 1,318; acres 930; lat. 11° 13′; long. 79° 30′; height 228 feet; from Ariyalore E.N.E. 25 miles; from Jayancondacholapooram E. 5¼ miles; from Oodayarpolliem E.N.E. 10 miles; from Trichinopoly E.N.E. 57 miles. Also called Gungayconda cholapooram. Capital of Cholas in eleventh century. Ruined Chola temple; the model from which Tanjore temple was constructed. At one time the enclosure was fortified with batteries at four corners, but walls have been demolished and stones used for Coleroon anicut [q.v.]. North of the temple runs an embankment 16 miles long, provided with substantial sluices, and of great strength, which must have formed one of the largest reservoirs in India. This huge tank was filled from the S. end by a channel [q.v.] from Coleroon upwards of 60 miles in length, and from the N. end by a smaller channel from Vellaur. Traces of both channels remain. The tank is in ruins and its bed once almost overgrown with jungle is being gradually brought under cultivation.——*Gungaycondaun* (கங்கைக்கொண்டான் - gangaikkondán, Tam.). From (above + kondán, tam. he who obtained). As maker of a tank [q.v.] or channel [gungaycondapooram]. Name of a Chola king.——*Gungay coolam* (கங்கைக்குலம் - kangaikkular, Tam.). From (above + kula, san. family). Name of the Vellaular [q.v.], as dealing with irrigation.——*Gungayya* (ಗಂಗಯ್ಯ - gangayya, Can.). From (above + ayya, can. master). Hindoo 2nd or pers. name [peyar].——*Gungoola* (గంగుల - gangula, Tel.). From (ganga, tel. proper name). Poligar [q.v.] family, Gungoola gooravayya, principal ancestor of the family, was appointed attsoocauvalgar of the Oodayagherry droog in fusly [q.v.] 1049, and eight villages were granted as Amarams. Under the Mahomedan Government a peshcush [q.v.] of 662 pagodas [q.v.] was imposed on the Amaram [q.v.]. The poliput [q.v.] was enfranchised by the inam [q.v.] commission at an annual quit-rent of Rs. 2,627.——*Gungy* (గంగి - gangi, Tel.). Goddess among sowrahs [q.v.].

GUNJ (گنج - ganj, *Hind.*). A granary. Suffix in place names as Shikargunj [ganj, golah].

GUNNA (గన్న - ganna, *Tel.*). Great.——*Gunnavaram* (గన్నవరము - gannavaramu, Tel.). From (above + pura, san. town).—"*a*" Village, Head-quarters of Deputy tahsildar, Office of Sub-registrar; Kistna dist., Noozveed zemindarry; pop. 1,674; lat. 16° 32′; long. 80° 50′; from Bezwada E. 12 miles; from Guntoor N.E. 29 miles; from Madras N. 240 miles; from Masulipatam N.W. 35 miles; from Noozveed S.S.W. 17¾ miles; from Vinoocondah E.N.E. 77 miles.—"*b*" Canal, Village; Godavery dist., Narsapore tal.; pop. 1,456; acres 1,615; lat. 16° 35′; long. 81° 55′; from Cocanada S.W. 35 miles; from Narsapore N.E. 16 miles; from the sea N. 13 miles. Main canal from the Godavery anicut [q.v.]. Irrigates Amalaupooram and Narsapore talooks. Navigable for 36 miles. Crosses the Veinateyam branch of the Godavery at Gunnavaram by an aqueduct 800 yards long with 49 arches.

GUNNY (गोणी - góní, *San.*; گنی - ganní, *Hind.*; ಗೋಣಿ - góni, *Can.*; గోనె - góne, *Tel.*; கோணி - kóni, *Tam.*). From (gógu, tel. hemp + neyu, tel. weave). Coarse sacking and sacks [borah] made from the fibre [naur] of the jute plant [jute], and sunn [q.v.].

GUNTOOR (గుంటూరు - guntúru, *Tel.* guntúr*). From (gunta, tel. pond + úru, tel. village) [goondam]. Sanscrit name (márkandéyáshrama), meaning marcandeyan the sage + hermit age; also (rámachandrapura), meaning ramchendran, the hero + town.——**(1)** Former British collectorate. Area about 8,413 square miles. Between lat. 15° 37′ and 17° 09′, and long. 79° 15′ to 81° 36′. Bounded north by the Kistna which separated it from the Nizam's dominions and the former district of Masulipatam; south by Nellore and the Bay of Bengal; east by Masulipatam and west by Cuddapah and the Nizam's territory [golcondah coast]. Guntoor, Nizampatam, and Vinoocondah were the principal places. Now represented by Kistna district.——**(2)** Talook, Kistna district. Tahsildar's pay Rs. 225. Area 530 square miles. Population 143,458. Language Teloogoo. Centre of district. Bounded north by the Kistna; east by Repully talook; west by Narsarowpett and Suttenapully talooks; south by Baupatla talook. Extends south as far as the Condaveed range. To the south the tract adjoining Baupatla talook is a fertile expanse of black soil [regar], very fertile when rainfall is propitious, but extremely desolate in dry weather. Hills of gneiss, more or less granitoid, rise here and there; some of the masses of black rock being bold and picturesque, especially in the line of hills stretching southward from near Amravatty towards Guntoor. The centre of the talook is liable to be submerged by river floods; in July 1882 the Kistna water stood black as far as Taudicondah. This deposit river mud on the land favorable to indigo [q.v.] and other crops, although the low-lying ground is difficult to drain and remains swampy. Irrigation, by rain-fed tanks [q.v.] and Kistna anicut [q.v.]. Places of archæological interest:—Caranootla, Caucauny, Cauza, Condapaud, Coriteypaud, Gaurapaud, Gorantla, Guntoor, Laum, Mandipaud, Marcapore, Mookkaumala, Mungalagherry, Nidmookkala, Nullapaud, Numboor, Oondavully, Paumoolpaud, Penoomauca, Pottoor, Prattipaud, Rauvela, Reddipollem, Royapoody, Shaicore, Sooddapully, Taudicondah, Vejalla, Yanamadala, Zonnalagudda. Trig. stations:—Anantavaram, Gorantla, Guntoor N.E., Guntoor S.W., Mungalagherry, Palcalore. The leading places, &c., in the talook are the following.——*Anantavaram* (అనంతవరము - anantavaramu, Tel.). From (anantayya, tel. proper name + pura, san. town). Trig. station; lat. 16° 30′ 57·95″; long. 80° 27′ 57·29″; height 852 feet; from Guntoor N. 15 miles.——*Caucauny* (కాకాని - kákáni, Tel.). After the person of that name. Tel. also (peddakákáni), meaning large + place so called. Village; pop. 2,082; acres 4,076; lat. 16° 21′; long. 80° 32′; from Guntoor N.E. 4½ miles; from Masulipatam W.N.W. 42 miles. On road to Bezwada.——*Cauza* (కాజ - kádza, Tel.). Village; pop. 1,763; acres 4,493; lat. 16° 24′; long. 80° 35′; from Guntoor N.E. 9½ miles; from Masulipatam W.N.W. 41 miles. Vishnoo temple. Inscriptions.——*Chinna caucauny* (చిన్నకాకాని - chinnakákáni, Tel.). From (chinna, tel. small + kákáni, tel. place so called). Tel. also (kukkakákání), meaning dog + the village, so called; also (shunakákáni), meaning dog + village so called. Village; pop. 876; acres 2,670; lat. 16° 25′; long. 80° 36′; from Guntoor N.E. 11 miles; from Masulipatam W.N.W. 40 miles. Carved figures of a horseman and two dogs commemorate the story of a faithful dog killed through mistake by his master; like Llewellyn's story. Inscription in front of Gopaulsawmy's temple.——*Gorantla* (గోరంట్ల - górantla, Tel.). Means the nail-dye plant, lawsonia alba, lamk. Trig. station; lat. 16° 20′ 41·24″; long. 80° 29′ 01·60″; height 258 feet; from Guntoor N. 3¾ miles.——*Guntoor* (గుంటూరు - guntúru, Tel.). See sep. title.——*Kistna* (కృష్ణ - krishna, Tel.). See sep. title.——*Mootloor* (ముట్లూరు - mutlúru, Tel.). From (mushti, san. alms + úru, tel. village). Sanscrit name (mushtipura), meaning handful of alms + town. Village; pop. 3,127; acres 3,458; lat. 16° 10′; long. 80° 31′; from Guntoor S. 9½ miles; from Masulipatam W. 43 miles. Catholic church and missionary's house. Festival on 3rd December, St. Francis Xavier's day, is largely attended.——*Mungalagherry* (మంగళగిరి - mangalagiri, Tel.). See sep. title.——*Nauracodore* (నారాకోడూరు - nárákódúru, Tel.). From (náráya, tel. proper name + kódu, tel. stream + úru, tel. village). Village; pop. 1,595; acres 2,962; lat. 16° 14′; long. 80° 33′ 39″; from Guntoor S.E. 6 miles; from Masulipatam W. 41 miles. On road from Guntoor to Chebrole——*Nidamarroo* (నిడమఱ్ఱు - nidamarru, Tel.). From (nidivi, tel. long + marri, tel. banyan tree, ficus bengalensis, linn.). Village; pop. 1,391; acres 2,777; lat. 16° 26′; long. 80° 34′; from Guntoor N.N.E. 10½ miles; from Masulipatam W.N.W. 42 miles. Jeina [q.v.] images.——*Numboor* (నంబూరు - nambúru, Tel.). From (namban, tam. shiva + úru, tel. village). Village; pop. 3,661; acres 7,404; lat. 16° 22′; long. 80° 35′; from Guntoor N.E. 7¼ miles; from Masulipatam W.N.W. 41 miles. Shiva temple with inscription.——*Oondavully* (ఉండవల్లి - undavalli, Tel.). See sep. title.——*Palcalore* (పలకలూరు - palakalúru, Tel.). From (palaka, tel. plank + úru, tel. village). Trig. station; lat. 16° 19′ 37·92″; long. 80° 25′ 12·04″; height 675 feet; from Guntoor W.N.W. 5¼ miles.——*Pedda palcalore* (పెద్దపలకలూరు - peddapalakalúru, Tel.). From (pedda, tel. great + palaka, tel. slab of stone + úru, tel. village). Village; pop. 1,583; acres 4,411; lat. 16° 20′; long. 80° 25′; from Guntoor W.N.W. 5¾ miles; from Masulipatam W. 50 miles. Near is a Jeina image; the right hand grasps a sword and under the foot is an animal resembling a deer [mrigam].——*Pottoor* (పొత్తూరు - pottúru, Tel.). From (pottu, tel. union + úru, tel. village). Village; pop. 1,267; acres 3,444; lat. 16° 16′; long. 80° 25′; from Guntoor W.S.W. 5¾ miles; from Masulipatam W. 49 miles. Vishnoo temple and inscription south of it.——*Prattipaud* (ప్రత్తిపాడు - prattipádu, Tel.). From (pratti, tel. cotton + pádu, tel. village). Village, Travellers' bungalow; pop. 3,462; acres 5,552; lat. 16° 11′; long. 80° 23′; from Guntoor S.W. 10½ miles; from Masulipatam W. 53 miles. Former head-quarters of Tahsildar. Shiva temple built by Chola kings. Vishnoo temple built by Condaveed reddies. Former has seven inscriptions. Inscription at the temple of Dandeshwarasawmy and at the temple of Vengopaulsawmy.——*Royapoody* (రాయపూడి - ráyapúdi, Tel.). From (ráyalu, tel. title of ruler + púdi, tel. village). Village; pop. 1,444; acres 3,136; lat. 16° 33′; long. 80° 31′; from Guntoor N. 18 miles; from Masulipatam W.N.W. 49 miles. Temples of Hanooman [q.v.] and Shiva [q.v.]. Several inscriptions.——*Seelanagaram* (సీతానగరము - sítánagaramu, Tel.). From (sítá, san. ráma's wife + nagara, san. city). Village, Railway terminus station, Hills; pop. 1,739; lat. 16° 30′; long. 80° 39′; from Guntoor N.E. 17 miles; from Masulipatam W.N.W. 40 miles. The hills are on the right bank of the Kistna opposite Bezwada and form one base of the great anicut [q.v.]. Near this range are the Oondavully caves.——*Shaicore* (షేకూరు - shékúru, Tel.). From (shaikh, hind. class of mahomedans + úru, tel. village). Village; pop. 2,355; acres 5,582; lat. 16° 16′; long. 80° 38′; from Guntoor E. 9 miles; from Masulipatam W. 36 miles. Seven inscriptions.——*Taudicondah* (తాడికొండ - tádikonda, Tel.). From (tádi, tel. palmyra tree, borassus flabelliformis, linn. + konda, tel. hill). Village; pop. 4,607; acres 12,689; lat. 16° 25′; long. 80° 29; from Guntoor N. 8¼ miles; from Masulipatam W.N.W. 47 miles. At the beginning of this century four Zemindars [q.v.], Chilcaloorpaud, Repully, Ryechore, and Suttenapully held each one quarter of Taudicondah, and each made his quarter of Taudicondah the head-quarters of a Sammat [q.v.] or circle of villages. Abounds in remains of old temples and inscriptions. One temple contains Jeina figures.——*Veicoontapooram* (వైకుంఠపురము - vaikunt'hapuramu, Tel.). From (vaikunt'ha, san. abode of vishnu + pura, san. town). Sanscrit name (bandhaviráma), meaning bondage + end; place of emancipation. Village, Place of pilgrimage; pop. 1,059; acres 2,376; lat. 16° 34′; long. 80° 27′; from Guntoor N. 18¼ miles; from Masulipatam W.N.W. 54 miles. On the Kistna. Rajah Vasireddy vencataudry naidoo established Veishnavite bramins and embellished some of the temples with burnished copper [taumram] spires. Previously a sacred place.——*Yanamadala* (యనమదల - yanamadala, Tel.). From (énuga, tel. elephant + manda, tel. herd). Sanscrit name (vírabhógavasantarájapurí), meaning hero + rule + spring + king + town; town of veerabhadran, the beautiful hero-chief. Village; pop. 2,739; acres 6,111; lat. 16° 14′; long. 80° 22′; from Guntoor W.S.W. 8¾ miles; from Masulipatam W. 51 miles. Formerly important. Inscriptions at temple of Veereshwarasawmy. Festival in April.——**(3)** Sub-Magistracy, Kistna district. Pay Rs. 70.——**(4)** Town, Municipality, Head-quarters of Sub-collector and Talook, Railway station and Travellers' bungalow; Kistna dist., Guntoor tal.; pop. 23,359; acres 8,578; lat. 16° 18′; long. 80° 30′; from Bezwada S.S.W. 19 miles; from Madras N. 220 miles; from Masulipatam W. 44 miles; from Vinoocondah E.N.E. 50 miles. About 18 miles S.W. of the right bank of the Kistna, W. 52 miles from the coast, and about 6 miles east of the Condaveed hills. The town is situated at the junction of ridge of red soil with laterite [q.v.] gravel running east from the last outlier of these hills and a patch of gritty sandstone [manal cull] of the upper Gondwana series. From the end of this ridge the ground falls away to black soil and deltaic alluvium with a considerable slope. The surrounding country is open and flat. The soil is black and produces

luxuriant crops of gram [q.v.], cholum [q.v.], and cotton [q.v.]. Divided into the Old town and New town, both irregularly built. Capital of a Circar [q.v.] under the Mahomedans. Came into prominence during French occupation. For military history see vol. I (179). The Judge's court was withdrawn to Masulipatam in 1818, but again restored to Guntoor. Native town burned down in 1823. Famine in 1832. In 1859, on the amalgamation of the old Guntoor and Masulipatam districts, a Sub-collector was stationed at Guntoor. In 1877 the District court was moved from Guntoor to Masulipatam. The village of Ramchendrapooram agrahauram [q.v.], absorbed by Guntoor, is older. Another temple east of red tank with four inscriptions and a sculptured stone many centuries old. A similar stone west of red tank sculptured rudely with a female figure brandishing a sword. Tomb of a Mahomedan priest, Mohee ood deen badshah sahib, who died about 1810. The cemetery contains many reminiscences of the French occupation. Trade in cotton and grain. The former is brought by cultivators and sold to agents who press and despatch it by canal to Cocanada or Madras. American lutheran mission station. Guntoor north-east-end. Trig. station is in lat. 16° 18′ 45·92″; long. 80° 32′ 35·04″. Guntoor south-west-end. Trig. station is in lat. 16° 15′ 41·92″; long. 80° 29′ 22·04″.

GUP (گپ - gap, *Hind.*). Gossip.

GURJAN (कराल - karála, *San.*; گرجن - garjan, *Hind.*; ಗುಗ - guga, *Can.*; හොරගහ - horagaha, *Singh.*). Title from hindostany. San. means opening wide either from deeply cracked bark or open grain in wood. Hind. from bengalee. Title otherwise Borneo vegetable tallow, Indian dipterocarpus, Solid oil, Tallow tree, Wood-oil tree. Botanically Dipterocarpus turbinatus, gærtn., dipterocarpeæ [vricsham, 24]. Alias Dipterocarpus indicus, lævis. Large tree; young branches compressed, two-edged; leaves ovate or oblong-ovate, retuse at the base, acute, shining on both sides, with numerous prominent veins; resembling dillenia [chaltah]; petioles glabrous; tube of enlarged calyx slightly ventricose, two segments expanded into wings when in fruit; capsule ovate, even; flowers white, tinged with red, 3 inches in diameter, appear at beginning of hot season; followed by a nut-like fruit; tree common in all ghaut [q.v.] forests from canara down to cape comorin; the trunk grows to an immense size, bark deeply cracked. The wood oil gurjan balsam is obtained by cutting a notch in the trunk near the earth, where a fire is kept up till the wound is charred, soon after which the liquid begins to ooze out. The freshly-drawn balsam is an opaque, grey fluid, which when placed in the sun gradually separates into two portions; the upper is a thick, viscid fluid of a dark reddish brown color, and transparent when placed between the eye of the observer and the light, but when viewed by reflected light it is opaque, greenish, and florescent; the lower consists of a thick dirty white magma, and is generally rejected; the balsam has a feeble copaiba odour, and a bitter aromatic taste. The balsam [q.v.] in the bazaar generally occurs as a brown, oily looking, semi-transparent liquid, in odour strongly resembling a mixture of balsam of copaiba with a small portion of naphtha [q.v.]; insoluble in water, freely in warm alcohol, and with difficulty in ether; the balsam is shipped to europe. The balsam is in medicine; internally, stimulant, diuretic and alterative; and externally, stimulant; the best way of using it internally is in the form of emulsion with mucilage. Dose, from one to three fluid drachms three times in the 24 hours. Substituted for copaiba, donovan's solution, citrine ointment, chaulmoogra [q.v.] oil. Varieties three, pale-white or grey, red or reddish brown, and black or dark brown; the red or reddish brown and the white or grey are the best for internal medicinal use. Gurjan balsam recently pronounced a specific for leprosy [cooshtam] which is doubtful. Timber very open in the grain, not durable. No other species of dipterocarpus here, but gurjan balsam is also obtained from other species natives of chittagong, tennasserim, burmah, siam, eastern archipelago, philippine islands, andaman islands, and ceylon. Yaipy [q.v.] gives another liquid balsam like copaiba, and called madeiyan sambrauny [q.v.].

GUTT (ಗಟ್ಟು - gattu, *Can.*; గట్టు - gattu, *Tel.*). Bank; hill. Suffix in place names [ghatt].

GUTTA (گاتا - gáta, *Malay*). Inspissated juice.——*Gutta-percha* گاتپارچا - gátahpárcha, Malay). Malay from (gátah, malay, resin + párcha, malay, the tree, dichopsis gutta, benth. h. f.). Product of Dichopsis gutta, benth. h. f. [pauchonty] a tree of perak; largely adulterated, often consisting of the inspissated saps of some five or six different plants mixed together, of which a fig [atty] and bread-fruit tree [jack], yielding inferior india rubber [q.v.] is chief.

GUZ (गज - gaja, *San.*; گز - gaz, *Hind.*; గజము - gajamu, *Tel.*; கெசம் - kesam, *Tam.*). From persian. A yard, two cubits. In the reign of Acbar [q.v.] there prevailed a great number of measures of this denomination, varying from 18 to 58 inches; to correct which a standard was established in their stead, termed the Ilauhee [q.v.] guz. No standard really preserved, and different measurements made it vary from 29 to 35 inches. 33 inches was assumed as the value. A modern scale is:—2 hauts = 1 guz; 2 guz = 1 baum [alavay, 1e]. Generally guz is translated into the English yard of 36 inches. But it still varies from 26 to 39 inches. In Calicut it is 28 inches. Same as gajam. Compare Tutchacole and Tutchamoolam. See vol. I, 609; II, 505.

GUZZELHUTTY (ಗೆಜಲ್ಹಟ್ಟಿ - gejalhatti, *Can.*). From (guzar, hind. passage + hatti, can. village). Village, Ghaut; Coimbatore dist., Suttimungalam tal.; lat. 11° 33′ N.; long. 77° 3′ E.; from Coimbatore N. 38 miles; from Suttimungalam W. 17 miles. Pass by which foot-passengers and pack-bullocks ascend to Mysore plateau. Formerly principal pass from Coimbatore into Mysore, one track leading from Suttimungalam and another from Coimbatore town through Danaicken cottah to foot of ghaut [q.v.]. Route usually taken by Tippoo. No longer kept in order, more northern routes being preferred. The head of the pass, 2,800 feet above sea level, is seventeen miles from the Mysore frontier. The valley through which the pass lies is great gorge down the bottom of which flows the Moyaur, and the sides of which are formed towards S.W. by precipitous brow of Neilgherries and towards the N.E. by declivities of mountains rising towards Mysore. The village with an old fort and bridge is situated on left bank of Moyaur. The fort was in 1768 taken from Hyder ally by a British force, but was retaken in the same year.

GYMKHANA (گیند خانہ - gendkhánah, *Hind.*). From (gend, hind. ball + khánah, pers. house). The name usually given to an English racket-court, meeting for sports, &c.

H (ह - ha, *San.*; ه - he, ح - ḥai, *Hind.*). San. sign for Shiva [q.v.] as Bheiravan [q.v.]. Hind. ه symbol for 5; denotes Thursday the fifth day of the week [vauram]; the sign [raushy] Virgo [cunyay]; the planet [graham] Venus [shoocran] and the moon [chundran]. Hind. ح symbol for 8, and astronomically Sagittarius [dhanoos]; affixed to royal grants as the initial letter of Huzoor navees [q.v.] or Secretary of state.

HABB (حب - habb, *Ar.*). Seed. Plant first term. Ex., where transl. is of second term:—Baliospermum montanum (habbusalátínibarrí), king + wild; Cassia absus (habbussaudán), soudan, the place; Hibiscus abelmoschus (habbulmushk), musk; Ipomæa hederacea (habbunníl), blue; Ipomæa turpethum (habbulzangí), black. See gloss. paragraphs.

HABEEB حبيب - habíb, *Hind.*). From (hubba, ar. to love). Affectionate. Part of lacab; as Habeeb ool lah, friend of God, title of the Prophet [mahomed]. Now a common alam [ism].

HABSHY (حبشی - habshí, *Hind.*). From (habash, ar. abyssinia). Abyssinian; so anything large. Ex., Exacum bicolor (habshícharáitah), abyssinian swertia.

HACKERY (هانكرى - hánkrí, *Hind.*). From (hánkná, hind. to drive). Carriage drawn by bullocks for personal transport.

HAD (هدّ - had, *Hind.*). Bone.——*Haddah* (هدّا - haddá, Hind.). Spavin or ring bone in horses [ashwarogam, ghorah].

HADEES (حديث - hadís, *Hind.*). From (hadasa, ar. to narrate). Tradition. The traditional sayings and doings of the prophet having for the most part force of law [smrity, soonnat]. These are divided into two classes; Hadees e naboovy or the sayings of the prophet himself, Hadees e coodsy or the holy sayings which the angel Gabriel [jibbreel] brought from heaven. The degree of authenticity to be attached to them has been the subject of differences between the various Mahomedan sects; soonnee [q.v.], shiahs [q.v.], wahaubies [q.v.], mootazalites [q.v.], &c.

HAFEEZ (حفيظ - hafíz, *Hind.*). From (hafaza, ar. to preserve). Guardian; an epithet of God [allah]. Common alam; as Abdool hafeez, slave of the guardian [ism].

HAFT (هفت - haft, *Hind.*). Greek ἑπτά, Latin septem. Seven [saptam].——*Haftah* (هفته - haftah, Hind.). Week [caulam, vauram]. Saturday. Haftah kanakk, a weekly report.

HAGARY (హగరి - hagari, *Tel.*). Assumed from (agha, san. sin. + hari, san. destroyer); but probably a vernacular word. Sanscrit also (védavatí), meaning veda + possessor; holy river. River. Rises in Mysore and flows 125 miles into the Toongabudra near Hatsahully in lat. 15° 44′ N., long. 76° 59′ E. Shallow and broad stream, rarely navigable. On both sides are broad belts of sand [manal]. At Moka, 12 miles from Bellary, where the river is crossed, the sand beds are 2 miles broad. In 1851 the town of Gooliem was washed away by a flood in the river. The Southern mahratta railway crosses the river near Paramadevanhully.

HAJ (حج - hajj, *Hind.*). From (hajja, ar. to tend towards). A pilgrimage by a Mahomedan to Mecca, Medina, &c. Sometimes called Haj ool farz, the ordained haj. It is incumbent on all men who have sufficient means to meet the expenses of the journey and to maintain their families at home during their absence. The day of ceremony is the tenth of Zilhaj [maheena]. The haj to Mecca is to the Caaba [q.v.], round which the pilgrim walks seven times, kissing each time the black stone

which is imbedded in the north-east corner of the wall, and which is said to have been given by an angel to Abraham [deen]. The corresponding hindoo term is Yautray.——*Hajee* (حاجی - hájí, Hind.). One who has performed the haj. Taken thereafter as a title. Ism oon nisbat [ism].

HAJAUM (حجام - hajám, *Hind.*). From (hajamá, ar. to cup). Name for the barber caste in Hindostany and Canarese. The corresponding terms are:—Tel. mungala, Mal. vilacattravan, Tam. ambatta. One of the village servants [balootah, inam].

HAJR (حجر - hajar, *Ar.*). Stone.——*Hajrdam* (रक्तोपल - raktópala, San.; حجرالدم - hajruddamm, Ar., Pers. and Hind.; உதிரக்கல் - uthirakkal, Tam.). San. from (rakta, san. blood + upala, san. stone). Ar. from (hajar, ar. stone + damm, ar. blood). Pers. and Hind. from arabic. Tam. from (rudhira, san. red + kal, tam. stone). San. also (rudhira), meaning blood. Bloodstone; also called Heliotrope, Oriental jasper. Species of chalcedony [akeek i soofeed] distinguished by red spots like blood. Used for seals [moodray], &c. [ratnam].

HAKEEM (حکیم - hakím, *Hind.*). From (hikm, ar. knowledge). A philosopher, physician [veidyan]. It is also an attribute of God [allah]. No medical tracts in Deccany [q.v.]. Hakeems are well acquainted with Persian and Arabic.——*Haukim* (حاکم - hákim, Hind.). From (hukm, ar. order). A ruler.——*Hikmat* (حکمت - hikmat, Hind.). From (hakama, ar. to krow). Knowledge; philosophy [ilm]. Daur ool hikmat is Scientific institute.——*Hookum* (حکم - hukm, Hind.). From (hakama, ar. to restrain). An order. Hookum nauma are standing rules for administration.

HAKKAL (ಹಕ್ಕಲು - hakkalu, *Can.*). A kind of dry cultivation carried on during the rainy season in spots detached from an estate. It differs from Coomry [q.v.] in not requiring to be cleared of large trees, and in being for the most part cultivated annually, although not so regularly as the land included within estates [gaddavary, veligada].

HALAUK (هلاک - halák, *Hind.*). From (halaka, ar. to perish). Disorder; death; in law homicide.

HALAUL (حلال - halál, *Hind.*). From (halla, ar. lawful). Food lawful for Mahomedans, opposed to Haraum [q.v.] or unlawful food. The lawful animals are such as chew the cud and are not beasts of prey; birds that pick up food with their bills and do not seize their prey with their claws or wound them with their bills; fish, but no other marine animals; and locusts [tiddah]. To make halaul is to kill an animal according to prescribed mode.

HALEEM (حلیم - halím, *Hind.*). From (hilm, ar. forbearance). Clement; an attribute of God [allah]. Common alam; as Haleem khautoon, alam + pataun female alaumat [ism].——*Haleem khan* (حلیم خان - halímkhán, Hind.). Nawaub [q.v.] of Cuddapah. Alam + pataun suffix. Defeated by Hyder and sent to Seringapatam as captive, where he died. Hyder married his sister, subsequently known as Bukshy begum.

HALEEM (चन्द्रशूर - chandrashúra, *San.*; अहळींव - ahalímva, *Mahr.*; رشاد - rashád, *Ar.*; ترہ تیزک - tarrahtezak, *Pers.*; هالم - hálim, *Hind.*; هلیم - halím, *Dec.*; ಕುರ್ತಿಗೆಗಿಡ - kurtigegida, *Can.*; అడలవితల - adalavitala, *Tel.*; ஆளி - áli, *Tam.*). Title from deccany. San. from (chandra, san. moon + shúra, san. heroic plant; medicinal, common to chitramoolam, masoor and monkey jack), as growing at night. Mahr. from deccany. Ar. from (rashada, ar. to take a straight course), from being erect. Pers. from (tarrah, pers. garden herb + tezak, pers. cress). Tam. from (ál, tam. to nourish); used as salad; same as for linseed, linum usitatíssimum, linn. [alsee]. San. also (chandriká), meaning moonlight [elephant shoonday, snake root]. Mahr. also (hálimva). Ar. also (hurf). Pers. also (shabkhízak), meaning night + growing. Hind. also (chansar), from sanscrit. Tel. also (ádéli); (ádiyálu). Greek κάρδαμον, Latin nasturtium. Title otherwise Cress, Dittander, Garden cress, Moon cress, Pepper grass, Pepper wort, Tongue grass [darbhay], Town cress. Botanically Lepidium sativum, linn., cruciferæ [vricsham, 10]. Cultivated in cold weather, with mustard [rayaun]; seeds small, ovoid, reddish; seeds a gentle stimulant; substituted for british taraxacum; used as salad; gives oil similar to mustard. Nasturtium officinale, water cress, and Nasturtium palustre, yellow cress, have the same names.

HALEY (ಹಳೆ - hale, *Can.*). Old [pauta, pazha]. Prefix in place names especially.——*Halabeed* (ಹಳೇಬೀಡು - halébídu, Can.). From (above + bídu, can. waste). Village in Bailore talook, Hassan district, Mysore, 10 miles east of Bailore. Marks site of ancient city of Dorasamoodram, Dwaupra samoodram [q.v.], or Dwauravatipooram, capital of Hoysala ballaula [q.v.] kings.——*Haleycannada* (ಹಳೆಕನ್ನಡ - halekannada, Can.). Ancient Canarese [bhaushay]. See vol. I (48), (50).——*Haleypeik* (ಹಳೇಪೈಕ - halépaika, Can.). From (above + páik, hind. foot soldier). See vol. I (68). Toddy-drawers in the inland Canarese country. They speak Tooloo. Peiky is the name of the highest class of the Todahs [q.v.] on the Neilgherries [jauty].

HALWAH (حلوا - halwá, *Hind.*). From (halo, ar. sweet). A sweetmeat made of flour [soojee], ghee [q.v.]; sugar [q.v.], spices, &c. Halwayee is a confectioner.

HAM (هم - ham, *Hind.*). Particle implying connexion [sa, sam].——*Hama* (همه - hama, *Hind.*). All. Hama baubat is total. Hama cowm is all classes. Hama jins is all articles.——*Hamaisha* (همیشه - hameshah, *Hind.*). From persian. Continually.——*Hamjaut* (همذات - hamzát, Hind.). From (above + zát, ar. caste). Of the same caste.——*Hamsauya* (همسایه - hamsáyah, Hind.). From (above + sáyah, ar. shelter). A neighbour. To be this gives prior claim in the application for lands [durkhast].

HAMEED (حمید - hamíd, *Hind.*). From (hamada, ar. to praise). Praised [hammaud, haumid]. An attribute of God [allah]. Common alam; as Hameed khan, alam + alaumat. Also part of lacab; as Hameed ood deen, the glory of religion. Feminine Hameeda, as Hameeda bee, alam + female alaumat [ism].

HAMEEYAT (حمیت - hamíyat, *Hind.*). From (hamí, ar. to guard). Honor [himauyat]. Prefixed to an alam forms a lacab as Hameeyat hoossain, honor of hoossain [ism].

HAMMAUD (حماد - hammád, *Hind.*). From (hamada, ar. to praise). Frequent praiser [hameed, haumid]. Part of lacab; as Hammaud ood deen, most praiseworthy of the faithful [ism].

HAMMAUL (حمال - hammál, *Hind.*). From (hamala, ar. to carry). A bearer [boy] of a palankeen [q.v.]. Message-bearer [harcarra].

HAMSAM (हंस - hamsa, *San.*). From (han, san. to go [hanoo, hing]. Cf. latin anser.——**(1)** Swan. Often translated flamingo and goose. It is really a creature no longer to be found, and might be translated phœnix [hooma]. The swan is supposed to possess the property of extracting milk [paul] from water when both are mixed together. Vemana has the following:—పాల నీరు క్రమము వరిగ హంస తెలియంగను నీరు పాల క్రమము నెమలి కేల ఎఱ్ఱవాని నలిశిఖ తెలుగునా—"The swan alone "can distinguish water when mingled with milk; how should "the peacock [mayil] distinguish these fluids and how shall the "ignorant man discern the deity from his own works?" The popular notion originates in the color of the bird, and because it seems to extract its food by suction from the water. There is a Tamul proverb:—தன் ஊருக்கு அன்னம் பிற ஊருக்குக் காகம்—"A swan in his own village, a crow [caurvam] "in the next." Hamsa vimshaty from (vimshati, san. twenty) is a poem in five books containing 1,600 stanzas; like vicramarcan [q.v.] tales this is a series of twenty amorous novels, narrated by a hamsam; each tale introduces expressions peculiar to certain castes or trades.——**(2)** The title is taken here as equivalent of the Anseridæ family, lamellirostres, natatores, aves [pacshy, 49], of naturalists [jantoo]. These divide systematically into:—Plectropterinæ or spurred geese, Nettapodinæ or goose-teal, Tadorninæ or shieldrakes and whistling teal. The species of these three sub-families best known to the natives are shown below. For common teal see Varatam.——*Braminy duck* (चक्रवाक - chakraváka, San.; چکوا - chakwá, Hind.; بہمنی بدق - bahmaníbadak, Dec.; ಚಕ್ಕವಕ್ಕಿ - chakkavakki, Can.; బాపనబాతు - bápanabátu, Tel.; சக்கரவாகம் - shakkaravágam, Tam.). Title from marks on forehead resembling caste marks. San. from (chakra, san. the bird so called + vach, san. to speak), known by the name of chuckram. Hind. from sanscrit. Dec. from (bahman, hind. bramin + badak, hind. duck). Tel. from (bápana, tel. bramin + bátu, tel. wild duck). Hind. also (surkháb), meaning water sucker. Tel. also (bápanachiluva), meaning bramin + wild duck. Title otherwise Ruddy goose, Ruddy shieldrake. Casarca rutila, tadorninæ. Alias Anas rubra. Male, forehead and cheeks pale ochreous-yellow or ferruginous; region of eyes, crown and nape, greyish-white; rest of neck ochreous-yellow, tinged orange, surrounded by glossy black collar nearly half inch wide; back and scapulars orange fulvous, some feathers edged paler; upper tail-coverts glossy green-black; lesser and middle wing-coverts white; greater coverts green, glossed purple; primaries black; secondaries glossy green; tertials bright fulvous; chin pale yellowish; breast and lower parts orange fulvous, deepest on breast; bill black; irides dark brown; legs black; length 24 to 25 inches. Female smaller, wants the black collar, more white about forehead, chin and face. Winter visitant; call goose-like, like á-oung. Natives have a legend that two lovers having been transformed into Braminy ducks, they pass the night on opposite banks of the river; the conversation is 'Chakwah, shall I come? No, Chakwy.' 'Chakwy, shall I come? No, Chakwah' Strong in flavour; seldom brought to table. No other species here.——*Comb-duck* (نکٹا - nakta, Hind.; జుట్టుచిలువ - dzuttuchiluva, Tel.). Title from crest. Tel. from (dzuttu, tel. crest + chíluva, tel. wild duck). Title otherwise Black-backed goose. Sarkidiornis melanonotus, plectropterinæ. No other species here.——*Cotton teal* (گری - girí, Hind.; చిలువ - chíluva, Tel.; ଶିଳେଚୋଡ଼ାଇ - silechodai, Oor.). Title from white cottony appearance of under parts. Title otherwise White-bodied goose-teal.

Nettapus coromandelianus, nettapodinæ. Alias Bernicla girra; Dendrocygna affinis. No other species here.——*Whistling teal* (سلی - sillí, Hind.; ఎరచిలువ - errachiluva, Tel.; செங்கிலுவை - shengiluvai, Tam.). Title from piping note when on wing. Tel. from (erra, tel. red + chiluva, tel. wild duck). Tam. from (shem, tam. red + kiluvai, tam. teal); from color of plumage. Dendrocygna awsuree, tadorninæ. Alias Anas caryophyllacea; D. arcuata. Not much prized for eating. No other species here.——(3) *Hans* (هنس - hans, Hind.). Swan, cygnus genus:—Grus antigone (sárhans), lake swan; Phœnicopterus roseus (rájhans), royal swan. See gloss. paragraphs.——*Hansroy* (హంసరాయి - hansaráyi, Tam.). From (hamsa, san. swan + rájá, san. king). Hindoo 2nd or pers. name [peyar].

HAMZA (حمزه - hamzah, *Ar.*). Lion [hyder, shere]; name of Mahomet's uncle. Common alam; as Hamza hoossain, double alam [ism].

HANA (హణ - hana, *Can.*; பணம் - panam, *Tam.*). From (pana, san. the coin, from pan, san. to barter).—"*a*" Money; the small coin termed a fanam [q.v.], whether of gold or silver. Canteroyhana, sultaunyhana, gopaulyhana are different kinds of gold fanams, each worth about four silver ones [naunyam].—"*b*" Goldsmith's weight. 2 manjoties = 1 hana; 9 hanas = 1 pagoda weight [niray, 3c]. Approximate actual value, 1 hana = 6 grains. S. canara. Same as Tel. chinnam, Tam. panam or pana tookkam. Compare Chowlam. See vol. I, 609.

HANAK (حنک - hanak, *Hind.*). From arabic. Ceremony of naming a child.

HANEEF (حنیف - haníf, *Ar.*). From (hanafa, ar. to incline). Faithful. The old faith of Abraham, which Imaum aboo haneefa, founder of the Hanafee sect, consolidated [cowm]. Common alam. Feminine Haneefa; as Haneefa bee, alam + alaumat [ism].

HANGAUMA (هنگامہ - hangámah, *Hind.*). From persian. Tumult.

HANOO (हनु - hanu, *San.*). From (han, san. to kill) [hamsam, hing]; to destroy and eat. Jaw.——*Hanoomacondah* (హనుమకొండ - hanumakonda, Tel.). From (hanúman, san. the monkey god + konda, tel. hill). The ancient capital of the Warangal [q.v.] kingdom, established south of the Godavery river by the Caucateeya or Ganapaty [q.v.] dynasty, who claimed to be descendants of the old Hastinapooram line. Situated 88 miles east-north-east of Hyderabad in the Deccan [charitram, deccan].——*Hanooman* (हनुमान् - hanumán, San.). From (above + mat, san. affix showing possession). The monkey chief.—"*a*" In early Sanscrit writings the son of the wind, or else an incarnation [avatar] of Vayoo [q.v.] himself. In the Ramayanam [q.v.] story he was the chief general of the monkey-king Soogreevan [q.v.], who assisted Rama [q.v.] in his war with the giant Ravanan [q.v.]. When Rama was in distress at the loss of his wife Seetay [q.v.], Hanooman was employed as a spy; and, after many researches, discovered that Seetay was kept a prisoner in Lunka [q.v.]. Four armies of monkeys and bears [ricsham] were despatched, but only that to the south, under the command of Hanooman, met with any success, and brought back tidings of Seetay. Hanooman is regarded as a demi-god [chiranjeevy] and his whole race as sacred; and because of this monkeys are allowed to multiply indefinitely, no one being willing to interfere with them. The exploits of Hanooman are favourite topics among the Tamulians from childhood to age, and paintings of them are common. He is according to the Ramayanam caumaroopy that is changing his form at will, like Soogreevan, and like all the other monkeys [bandar], his companions.—"*b*" In drawings Hanooman is represented rampant, holding a large fruit in his forepaws, or else a mountain peak with volcanic flames streaming from the summit [humpy]. In the Teloogoo country Hanooman is termed Hanoomanta roya, and in some books Hanoomat deva occurs [matam]. See vol. (63), (72), (86). There is a Tamul proverb:—இராமனைப்போல ராஜா இருந்தால் அனுமானைப்போலச் சேவகனும் இருப்பான்—"If the king be equal to Rama, his servant may be equal to Hanooman;" both rare.—"*c*" The Sanscrit work Meirauvanan charitram from the Jeiminy bhauratam gives a story of Hanooman prevalent in the south. Abstract is the following. The valour of Hanooman. The sorrow of Ravanan at his defeat by Hanooman. Meirauvanan, a raucshasan, comes to console and point out revenge. Ravanan asks what can be done, against not men but gods. Meirauvanan engages to go down to his kingdom in the inferior world, and offer a sacrifice to the goddess there. The wife of Meirauvanan dissuades him. However he sets out at the head of his army from the inferior world to make war. On the way evil omens [shacoonam] appear. Vibheeshanan, younger brother of Ravanan, knowing the preparations, informs Hanooman and Soogreevan. Rama is then sleeping, and cannot be disturbed. Hanooman assumes a supernatural form; and binds his tail all around the camp of Rama, from the heavens down to the lower regions. He allows only one entrance, at which he keeps guard; and despatching Vibheeshanan as a scout, gives charge of the interior to Soogreevan and others. It is now night. Meirauvanan sends a spy who reports preparations made; adding that Vibheeshanan only is outside, whose form thereupon Meirauvanan assumes, and going to Hanooman, tells him to be on his guard. Being allowed to enter the fortress, he takes Rama and his brother Lutchmanan, both being asleep, and putting them into a box carries them down to his inferior world. Vibheeshanan warned by evil omens; and returning to see the cause, the deception is discovered. Hanooman enquires for directions; and, guided by a particular flower tree, comes to the entrance of the descent to the inferior world. Thither he goes with troops. His proceedings, and the battles which follow. It is not possible to kill Meirauvanan. He is cut into pieces, but the parts of his body come together again. All attempts to put him to death fail; until a relative points out that his life is in a certain cave, in the form of bees [tainee]. These are killed by Hanooman, and Meirauvanan expires. The victor then places the relative of Meirauvanan, who has given the information, in possession of the kingdom of the inferior regions, and takes Rama and Lutchmanan, both still asleep in the box, and knowing nothing of the matter, back to their proper place. Agastyan narrates this tale to Rama in praise of Hanooman. Rama is greatly pleased; and showers down benefits on his successful protector. The whole time of the action of the poem is a single night.——*Hanooman moolamuntram* (हनुमान्मूलमन्त्र - hanumánmúlamantra, San.). From (hanumán, san. the monkey god + múlamantra, san. chief spell). One of the spells [muntram] used by Shactibhactans [q.v.].——*Hanoomanta* (ಹನುಮಂತ - hanumanta, Can.). From (above + mat, san. suffix of possession). Plural form of hanoomat. Hindoo 2nd or pers. name. Common among Madhwas [peyar].——*Hanoomat* (हनुमत् - hanumat, San.). Uninflected form of Hanooman.——*Hanoomateertam* (ಹನುಮತ್ತೀರ್ಥ - hanumattírtha, Can.). From (hanumán, san. the monkey god + tírt'ha, san. sacred ford). Village, Spring; Salem dist., Ootancaray tal.; pop. 191; acres 405; lat. 12° 11′; long. 78° 36′; from Ootancaray S. by E. 6 miles; from Salem N.E. 44 miles. The water has a copper [taumram] taste, and the masonry has a greenish tinge where the water flows over it.

HAR (هر - har, *Hind.*). Every.——*Harcarra* (هرکاره - harkárah, Hind.). From (above + kár, pers. business). Messenger [hammaul].

HARAN (हर - hara, *San.*; அரன் - aran, *Tam.*). From (hri, san. to take away). Shiva, the destroyer, otherwise remover of sin [hary].——*Haram* (हर - hara, San.). From (hri, san. to take off). Divisor in arithmetic [ganitam]. Also called Bhaujak [q.v.].——*Haranidattaval* (அரனிடத்தவள் - aranidattaval, Tam.). From (above + idam, tam. left side + aval, tam. feminine suffix). Parvaty, as being on left of Shiva [ardhanaury].——*Haran magan* (அரன்மகன் - aranmagan, Tam.). From (above + magan, tam. son). Soobramanyan [q.v.], as well as Ganesh [q.v.] and Veerabhadran [q.v.].——*Haran tozhan* (அரன்தோழன் - aranrózhan, Tam.). From (above + tózhan, tam. companion). Coobairan [q.v.], the regent of the north and the god of riches [ashta dicpaulacan].——*Harichendra katay* (हरिश्चन्द्रकथा - harishchandrakat'há, San.). From (harishchandra, san. the king, so called + kat'há, san. story). The tale of Harichendran. Derived from episode in Mahabhaurat [q.v.], put into the mouth of Vasishtan [q.v.]. A tale equally popular among Tamul, Canarese, and Teloogoo authors. Harichendran was a great prince of extreme liberality, and being a Chuckravurty [q.v.] it was not permitted him either to degrade himself as to caste or to tell a lie. One day a mendicant Bramin obtained from him a promise, which involved a very large gift of money. The Bramin did not then take the money; but went away, and returned after many years claiming his money with the interest due thereon. The king unable to liquidate the debt sold his kingdom, and still there was a balance due. The Bramin said that if he would tell a lie, or marry an out-caste woman, the whole of the money should be restored; but the king preferred abandoning his kingdom, and selling himself, his wife, and son, as slaves in order to pay the debt. In pursuance of this design he came to Caushy [q.v.] or Benares, where his wife and child were purchased by a Bramin, and he himself by a Chundaulan [q.v.], whose office was to attend burning-grounds [shood caud]. The Bramin sent the child out one day to gather wood, where being bitten by a snake it died and was by the mother taken to the burning-ground, at which her husband was by this time stationed as Chundaulan. He refused to do what was customary without fees, and the mother had nothing to pay. He said that if she would give him the marriage talee [q.v.] it would suffice. She refused; but conjectured from this demand that the man must be her husband, as no one else knew that she possessed any such thing. At this juncture officers of the king of the country came, and took away the child on suspicion of its being the king's own child that was missing; and, the likeness being great, the king sent instructions that the man at the burning-ground should put the woman to death with a sword. Harichendran struck one blow, when flowers burst forth. He was about striking a second, when Bhagwaun [q.v.] appeared, praised his virtues, and restored him to the possession of his former prosperity.——*Harichendran* (هری چندر - haríchandar, Hind.; హరిశ్చంద్రుడు - harishchandrudu, Tel.). From (hari, san. golden + chandra, san. brilliancy). Refulgent lord. Proper name [peyar].——*Haridoss* (ಹರಿದಾಸ -

haridása, Can.). From (hari, san. vishnu, the attractive + dása, san. slave); Veishnava devotee. Hindoo 2nd or pers. name [peyar].——*Haridrah* (हरिद्रा - haridrá, San.). From (hari, san. yellow + dru, san. go). Title otherwise Turmeric. Botanically the Curcuma genus, zingiberaceæ [vricsham, 144]. Generic name from (kurkum, ar. curcuma longa, roxb.). Stemless herbs; roots perennial, palmately tuberous; leaves herbaceous, petioles sheathing, bifarious; scape simple, lateral or central; flowers yellowish, approximated by threes or fives between each bract; capsule three-celled; seeds arillate. The species best known to the natives are:—amada [mango ginger], angustifolia [malabar arrowroot], aromatica [round zedoary], leucorrhiza [red malabar arrowroot], longa [country saffron], zedoaria [long zedoary]. Other s. indian species indigenous or naturalized are:—neilgherrensis, pseudomontana, reclinata, rutescens.——*Hariharan* (हरिहर - harihara, San.; அரியரன் - ariyaran, Tam.). Vishnoo and Shiva combined. Not connected with Ardhanaury [q.v.]. See vol. I (74), (77) [mohiny]. Hindoo 2nd or pers. name [peyar]. One Hariharan, otherwise Hukka, formed first of the three Vijianugger dynasties [charitram, raj]; see vol. I (148) and II, 251.——*Harihara pootran* (हरिहरपुत्र - harihara-pootra, San.). From (hari, san. vishnu + hara, san. shiva + putra, san. son). Ayenaur [ayen] as the son of Shiva [q.v.] by Mohiny [q.v.].——*Haripaulan* (हरिपाल - haripála, San.). From (hari, san. vishnu + pála, san. protector); one who has vishnoo for his protector. Proper name. See vol. I (140).——*Haripootran* (ಹರಿಪುತ್ರ - hariputra, Can.). From (hari, san. vishnu + putra, san. son); applied to bramha [pralayam] and manmatan [q.v.] as the sons of vishnoo [q.v.]. Hindoo 2nd or pers. name [peyar].——*Harishuncaran* (హరిశంకరుడు - harishankarudu, Tel.). From (hari, san. vishnu + shankara, san. shiva, the happiness maker). From of a deity where Vishnoo and Shiva are combined in one [mohiny]. Hindoo 2nd or pers. name [peyar].——*Haritakee* (हरीतकी - harítakí, San.). Means clearing bowels. Same as Chebulic myrobalan.——*Haritam* (हरित - harita, San.). Green. Plant first term. Ex.:—Acalypha indica (haritamañjari), green cluster; Moringa pterygosperma (haritapatra), green leaf. See gloss. paragraphs.——*Haritaulam* (हरिताल - haritála, San.). See sep. title.——*Haritaulica* (హరితాళికము - haritálikamu, Tel.). Means yellow orpiment [hartaul]. From yellow image of gowry set up and worshipped on the occasion. Lunar festival [pundigay, 6d], subject to intercalation [adhicam]. The third tity [q.v.] of the waxing moon of sixth lunar month Bhaudrapadam [mausam] between 19th August and 18th September. An inauspicious day; because Krishnan [q.v.] was falsely accused in his childhood of having stolen a gold gem from Prasainan on that day [gowry, maryauday].——*Hariyanna* (ಹರಿಯಣ್ಣ - hariyanna, Can.). From (hari, san. vishnoo + anna, can. elder brother, titular affix). Hindoo 2nd or pers. name [peyar].——*Haroor* (ಹರೂರು - harúru, Can.). From (hara, san. shiva + úr, tam. village).—"*a*" Deputy tahsildarry, Salem district. Pay Rs. 70.—"*b*" Village; Salem dist., Ootancaray tal.; pop. 2,792; acres 2,187; lat. 12° 03′; long. 78° 32′; from Madras S.W. 140 miles; from Namcull N.N.E. 61 miles; from Oossoor S.E. 62 miles; from Ootancaray S. 16 miles; from Salem N.E. 34 miles; from Tripatore S. 31 miles; from Yercaud N.E. 26 miles. On west bank of Vauniyaur, parcherry [q.v.] being on east bank. West of town towards Morapore and Tencaraycottah extends a vast jungle, chiefly of Tooorinjy [dark sirissa]. Healthy and with good water-supply. Between Haroor and Morapore are sculptural remains. Population consists chiefly of Janapars [janapa], trading in grain and cattle [maud] and Lubbays [q.v.] who export Auvauramputtay [tungaid] in considerable quantities to Vaniyambaudy. Shandy [q.v.] on Mondays.——*Harra* (ہرّا - harrá, Hind.; ಅಳಿಗಾರ - alegára, Can.). Title otherwise Citrine myrobalan. Botanically Terminalia [antya parny] citrina, roxb., combretaceæ [vricsham, 55]. Alias Myrobalanus citrina. Large tree; leaves somewhat opposite, oblong, tapering towards the base, smooth, acute, with two small glands on the apex of the petiole; panicles terminal and axillary, composed of several simple erect spikes; drupe oblong-lanceolate, five-cornered, smooth, of a dull orange-yellow; nut oblong, deeply five-grooved; flowers all hermaphrodite, dull-yellow; flowering in april and may; grows in canara. Fruit a gentle purgative; often made into pickle; used in tanning [chamrah]. For the other myrobalans see Tripalam.——*Harsingaur* (هرسنگار - harsingár, Hind.). From (hára, san. garland + shringára, san. beauty); from use of flowers. Same as Coral jasmine.——*Hartaul* (हरितालक - haritálaka, San.; हरिताली - haritálí, Mahr.; زرنیخ اصفر - zirníkhiasfar, Ar.; زرنیخ زرد - zirníkhizard, Pers.; ہرتال - hartál, Hind.; ورنگن - warangan, Malay; ಅರದಳ - aridala, Can.; ಅರದಾಳ - aradála, Too.; హరిదళము - haridalamu, Tel.; അരിതാരം - aritáram, Mal.; සිරියල් - siriyal, Singh.; அரிதாரம் - arithάram, Tam.). Title from hindostany. San. from (hari, san. yellow + tála, san. orpiment). Ar. from (zirníkh, ar. arsenic + asfar, ar. yellow). Pers. from (zard, pers. yellow). Hind. from sanscrit. Mal. from sanscrit. Singh. corruption from sanscrit. Tam. from sanscrit. Tel. also (doddapáshánamu), meaning great + arsenic. Mal. also (cháyilyam), corruption of (játilingam), meaning vermilion [shangarf]. Tam. also (elikkúduppasánam), meaning mouse + trap + arsenic, used as rat's bane; (kattarithάram), meaning lump + orpiment; (kallarithάram), meaning stone orpiment, as in lumps. Yellow orpiment or golden pigment or king's yellow. Otherwise Sulphuret of arsenic, Yellow arsenic [paushaunam]. Arsenicum flavum, Arsenicum tersulphuretum, Arsenici trisulphidum of chemists. Of a lemon-yellow color, running often into red and brown; usually got in large angulo-granular distinct concretions, also in concentrate lamellar concretions; it is soft and flexible, but not elastic; looks like yellow talc [q.v.], but is much heavier; when thrown in fire emits blue flame; consists of about 62 parts of arsenic [paushaunam] and 38 of sulphur [gandhac]. Found native, and imported especially from China. There are three kinds in bazaars [q.v.], viz., one in glistening golden scales called wurkee hartaul and two others in massive lumps of a yellow color, the fracture in one of these latter being dull and in the other resinous. Veidyans [q.v.] use to check obstinate intermittent fevers [jwaram] and in glandular complaints, in apoplectic attacks, and in certain leprous affections [cooshtam]. Used as a yellow dye [shauyam] and pigment [rangh]; used in calico [q.v.] printing, &c.——*Hary* (हरि - hari, San.). From (hri, san. to remove sin).—"*a*" Vishnoo. Compare ἥρα, ἥρως, ἡρακλῆς in Greek; herth or hertha in German; hur in Chaldean; horus in Egyptian; all solar divinities. Used in the north, as Permaul [q.v.] is in the south. There is a Tamul proverb:—அரி என்றால் ஆண்டிக்குக் கோபம், அரன் என்றால் தாசனுக்குக் கோபம்—"If one says Hary the Sheiva "mendicant is angry, if one says Haran the Veishnava mendicant "is angry" [matam]. Hindoo 2nd or pers. name; common among Madhwas. Also suffix in proper names as Narahary [peyar].—"*b*" Plant first term. Ex., where transl. is of second term:—Methonica superba (haripriyá), meaning liked by vishnoo; Phaseolus mungo (harimúng), meaning green + pulse; Pterocarpus santalinus (harichandana), meaning tawny + santalum album. See gloss. paragraphs.—"*c*" Plant second term. Ex.:—Cassia auriculata (timirahari), ophthalmia + removing; Semecarpus anacardium (shóp'hahari), morbid swelling + removing.——*Hary's plant* (हरिप्रिया - haripriyá, San.). Same as Wild bachnaug.——*Hauram* (हार - hára, San.). From (hri, san. to take off). The denominator of a fraction.——*Hurpanhully* (ಹರಪನಹಳ್ಳಿ - harapanahalli, Can.). See sep. title.——*Hurrially* (ہریالی - hariyálí, Dec.). See sep. title.

HARAUJ (ہراج - haráj, *Hind.*). From (haraja, ar. to run fast). Auction [yailam].

HARAUM (حرام - harám, *Hind.*). From (haruma, ar. to prohibit). Whatever the Mahomedan law disallows; unlawful, such as pork, wine, mushrooms, &c. [halaul].——*Haraumzauda* (حرام زادہ - harámzádah, Hind.). From (above + zádah, pers. born). Bastard, scoundrel. Term of abuse.——*Harem* (حرم - haram, Hind.). From (haruma, ar. to forbid). The portion of a house which is reserved for the women of a family; thence the women themselves, the wives and concubines of a Mussalman collectively. Zenana [q.v.] is the word generally used in S. india.

HARCATT (حرکت - harakkat, *Hind.*). From (haraka, ar. to move). A hindrance.

HARE'S EAR (മുയൽചെവി - muyalchevi, *Mal.*; කඩුපර - kádupára, *Singh.*; முயற்செவி - muyarchevi, *Tam.*). Title from long tubular florets. Mal. from (muyal, mal. hare + chevi, mal. ear). cf. gowzabaun. Botanically Emilia sonchifolia, dec., compositæ [vricsham, 74]. Alias Cacalia glabra, sonchifolia; Crassocephalum sonchifolium; Emilia purpurea; Senecio sonchifolia. Annual; stem herbaceous, branching a little towards the top; leaves lyrate; stem clasping; flowers few, in terminal umbellets, cylindrical, peduncled; flowers small, bright purple; flowering in cold season; is very variable in respect to both stem and leaves. Whole plant used in decoction on west coast as a febrifuge; mixed with sugar [q.v.] the juice is given in bowel-complaints; juice is also as cooling like rosewater [goolaub, panneer], in inflammation of the eyes. No other common species here.

HARITAULAM (हरिताल - haritála, *San.*). From (harit, san. green) [haran]. Treronidæ family, gemitores, aves [pacshy, 28], of naturalists [jantoo]. Sub-divided here into the following sub-families:—Treroninæ, green pigeons; Carpophaginæ, imperial pigeons. The two species best known to the natives are shown below.——*Green pigeon* (ہریال - hariyál, Hind.; ಹಸರುಬಣ್ಣಹಕ್ಕಿ - hasarubannahakki, Can.; పచ్చగువ్వ - pattsaguvva, Tel.; பச்சைப்புறா - paççaippurá, Tam.). Title from color of under parts. Hind. from (hará, hind. green). Can. from (hasaru, can. green + banna, can. color + hakki, can. bird). Tel. from (pattsa, tel. green + guvva, tel. pigeon). Tam. from (paççai, tam. green + purá, tam. pigeon). Crocopus chlorigaster, treroninæ. Alias Treron jerdoni. Whole top of head ashy, devoid in adults of any tinge of green on forehead, whole under parts green; neck and breast less tinged with yellow, shade gradually into green of abdomen; no trace of green upon tail, except at extreme base, which is uniformly ashy above. Length 12 inches. Very abundant. Excellent eating.——*Imperial pigeon* (بڑا ہریال - baráhariyál, Hind.; కాకిరేణిగువ్వ - kákiréni-guvva, Tel.; പൊകിന - pokina, Mal.). Title from bright

color. Hind. from (bará, hind. large + hariyál, hind. green pigeon). Tel. from (káki, tel. crow + rédu, tel. king + guvva, tel. pigeon). Hind. also (dumkal), meaning black tail; (sonakabutrá), meaning golden pigeon. Title otherwise Fruit pigeon, Gold pigeon. Carpophaga sylvatica, carpophaginæ. Alias Carpophaga œnea, pusilla. Head, neck and whole under parts pearl grey, purer on crown and breast, tinged elsewhere, sometimes on crown, with ruddy vinaceous; back, rump, wings and tail shining coppery green, brightest on tail quills, slaty-grey without, dark blackish grey within; under tail-coverts deep chestnut, with which some feathers of vent and flanks are also sprinkled; chin, orbital feathers, and round the base of the bill white; axillaries buff; bill slaty, red at the base above, and bluish white at the tip; irides and the nude orbits crimson; legs lake red, pale on soles; length 18–19 inches; found in forest countries; call low, deep, moan. The Bronze-backed imperial pigeon is carpophaga insignis, malabar.

HARMAL (حرمل - hurmal, *Ar.*; سپند - sipand, *Pers.*; اسبند - isband, *Hind.* and *Dec.*; సీమగోరంట - símagóranta, *Tel.*; சீமையழவினை - shímaiyazhavinai, *Tam.*). Title from arabic. Ar. from syriac. Tel. from (síma, tel. foreign + góranta, tel. nail-dye plant, lawsonia alba, lam.). Tam. from (shímaí, tam. foreign + aivanam, tam. nail dye). Title otherwise Foreign henna, Isbund, Lahore seed, Syrian rue. Botanically Peganum harmala, linn., rutaceæ [vricsham, 32]. Specific from arabic. Herbaceous; calyx five-partite; stamens fifteen, shorter than the petals, some abortive; anthers linear; style simple; stigma trigonal; leaves multifid, lobes linear; flowers terminal, white; capsule three-celled, three-furrowed, many-seeded; indigenous plant. The seeds are brown, irregularly triangular, about a line in length; although about six or seven times larger than mindie [q.v.], yet bear great resemblance in their outline, hence one of names of plant. The drug, as found in the bazaar [q.v.], consists of the seeds mixed with a few pedicels surmounted by the five-partite calyx and portions of the three-celled, three-furrowed capsule; the seeds have a heavy narcotic odour when crushed, and a bitter taste. The seeds are one of the commonest drugs in bazaar; physiological actions, narcotic, antispasmodic, hypnotic, anodyne, nauseant, emetic and emmenagogue; preparation, simple powder; doses of the powder, from thirty grains to two drachms, increased gradually; substituted for belladonna, ether, morphia, salicylic acid and its salts, lactuca, conium, squills, lobelia and yellow jessamine; quoted in pharm. non-officinal. Powdered root, mixed with mustard [rayaun] oil, applied to the hair to destroy vermin; the seeds burnt at marriages to drive away evil spirits; also as a charm during forty days of puerperal state; thrown into the fire with benzoin [q.v.] or mustard seed. No other common species here.

HAROON (هارون - hárún, *Ar.*). Means impatient. Aaron. Mahomedan alam; as:—Haroon sait; alam + alaumat [ism].

HASHISH (حشيش - hashísh, *Hind.*; జనుమొగ్గ - dzanumamogga, *Tel.*). Hind. from (hashsha, ar. dry herbage). Tel. from (dzanumu, tel. hemp plant + mogga, tel. bud). Product of Cannabis [kinnab] sativa, linn. The dried tops and tender parts of the plant collected immediately after inflorescence [mooskiraut].

HASLAR (ಹಸುಲರ - hasulara, *Can.*). From (hasule, can. child from hasur, can. tender). Canarese jungle tribe. A short thick-set race, very dark in color and with curled hair. Their chief employment is felling timber, but they sometimes work in areca [q.v.] nut gardens and gather wild cardamoms [q.v.], pepper [q.v.], &c. They speak a dialect of Canarese [jauty].

HAST (هست - hast, *Pers.*). Is.——*Hastbood* (هست و بود - hastobúd, Hind.). From (above + búd, pers. was). What is and what was; examination into value of land.

HASTAM (हस्त - hasta, *San.*). Means hand. The forearm from the tip of the middle finger to the elbow. Cubit. 2 vitasties or spans = 1 hastam; 4 hastams = 1 dandam [alavay, 1f]. Approximate actual value, 1 hastam = 18 inches. Same as Hind. haut, Tel. moora, Tam. moolam. See vol. I, 609.——*Hasty* (हस्ति - hasti, San.). From the trunk. Elephant [aunay, cary, elephant, gajam]. Plant first term. Ex.:—Cucumis sativus (hastiparní), elephant leaf; Musa paradisiaca (hastivisháni), elephant tusk. See gloss. paragraphs.——*Haut* (هات - hát, Hind.). From (hasta, san. hand). Cubit measured from the tip of the middle finger to the elbow. 2 bilishts or spans = 1 haut; 2 hauts = 1 guz [alavay, 1e]. Approximate actual value, 1 haut = 18 inches. The timber measuring haut is 22 inches. Same as San. hastam, Tel. moora, Tam. moolam. See vol. I, 609.

HASTAMPUTTY (அத்தம்பட்டி - attambatti, *Tam.*). From (aittan, tam. proper name + patti, tam. cattle-fold). Village, Salem dist., Salem tal.; pop. 2,249; lat. 11° 41′; long. 78° 12′; from Salem N. 1¼ miles. European settlement.

HASSAN (حسن - hasan, *Hind.*). From arabic. Virtue. Grandson of the prophet [mahomed] through his daughter Fatimah; born about A.D. 622; died 668 A.D. He succeeded his father Ally [q.v.] as the fifth caliph [q.v.] in A.D. 660 and reigned about six months. He resigned the caliphate [q.v.] in favor of Mooauviya. He was eventually poisoned by his wife, who was suborned to commit the deed by Yazeed, son of Mooauviya, so as to succeed to the caliphate [hoossain]. Common alam; as Hassan ahmed, double alam; Hassan khan, alam + alaumat [ism].——*Hassanee* (حسنى - hasaní, Hind.). Lacab of Syeds [q.v.] directly descended from Hassan.——*Hassanore* (ಹಾಸನೂರು - hásanúru, Can.; ஆசனூர் - ásanúr, Tam. hassanúr*). From (hasan, ar. mahomedan proper name + úru, can. village). Village, Ghaut; Coimbatore dist., Suttimungalam tal.; pop. 2,056; lat. 11° 41′; long. 77° 11′; from Coimbatore N.N.E. 49 miles; from Suttimungalam N.N.W. 14 miles. In the Biligherry rungam hills. Ghaut [q.v.] forms a good road for wheeled traffic from Coimbatore through Suttimungalam to Mysore, with an easy gradient for eight miles to a height of 3,000 feet to Dimmam, and thence four miles to Hassanore, where the Collegaul road branches. It is much used.

HAUDY (هادى - hádí, *Hind.*). From (hudá, ar. to guide). Director [hidauyat]; an attribute of God [allah]. Common alam; as Haudy ally, double alam [ism].

HAUFIZ (حافظ - háfiz, *Hind.*). From (hafaza, ar. to preserve). Protector. One who knows koran [q.v.] by heart. Also the takhalloos [q.v.] of a famous Persian lyric poet. Attribute of God. Feminine Haufiza. Ex.:—Haufiza bee, alam + alaumat [ism].

HAUJIB (حاجب - hájib, *Hind.*). From (hajaba, ar. to veil). A door-keeper. Agent. An officer of court similar to that of chancellor, who introduces foreign ambassadors.

HAUL (حال - hál, *Hind.*). From (hála, ar. to turn towards). Present condition.——*Haulatt* (حالت - hálat, Hind.). Unsubstantial, poor condition.——*Haulavaul* (حال احوال - hálahvál, Hind.). State of man's circumstances.——*Haul saul* (حال سال - hálsál, Hind.). Current year [saul].——*Havildar* (حوالدار - havâldár, Hind.). From (havâlah, ar. charge + dár, pers. holder). One holding any office. A non-commissioned officer in a Native regiment subordinate to soobahdar [q.v.] and corresponding to the English sergeant.——*Hawaula* (حواله - hawálah, Hind.). From (hála, ar. to pass from hand to hand). Charge [haul].——*Hully sicca* (حالى سكه - hálísikkah, Hind.). From (hál, pers. modern + sikka, pers. coin); as recently introduced. Coin current in Hyderabad. 100 Government rupees = 114 Hully sicca [q.v.] rupees.

HAUL (ಹಾಳು - hálu, *Can.*; பாழ் - pázh, *Tam.*). Waste land [paul]. Suffix in place names as Hireyhaul, meaning great waste.

HAUMID (حامد - hámid, *Ar.*). From (hamada, ar. to praise). Praiseworthy [hameed, hammaud]. Lacab of the prophet. Common alam; as Haumid hoossain, double alam [ism].

HAURWA (ಹಾರುವ - háruva, *Can.*). From (háru, can. leap). A degenerate class of Bramins who officiate as priests at harvest festivals [jauty]. Connected with Harihara sect, worship both Vishnoo [q.v.] and Shiva [q.v.]. Wear Braminical cord [poonool]. Every second year walk barefoot on burning coal.

HAUSHIM (هاشم - háshim, *Ar.*). Great grandfather of Mahomet. Common alam; as Haushim beg, alam + alaumat [ism].——*Haushimy* (هاشمى - háshimí, Hind.). Title of Mahomet. Lacab of the class of Mahomedans [ism].

HAUZIR (حاضر - házir, *Hind.*). From (hazara, ar. present). Present, ready.——*Hauzir baushy* (حاضر باشى - házirbáshí, Hind.). From (above + búdan, pers. to be). Attendance.——*Hauzir jaumeen* (حاضر ضامن - házirzámin, Hind.). From (above + zámin, ar. security). The person who becomes security for the appearance of another [nagad jaumeen].——*Hazrat* (حضرت - hazrat, Hind.). From (hazara, ar. to be present). Presence, dignity. Title given to a person of rank, equivalent to Your Excellency [samoogam].——*Hazree* (حاضرى - háziri, Hind.). A muster roll; so breakfast. Chota hazree, from (chhotá, hind. slight + háziri, hind. breakfast) is early light breakfast.——*Huzoor* (حضور - huzúr, Hind.). From (hazara, ar. to be present) [samoogam]. The presence, especially of a superior authority. Used generally for a Collector's office. Also used by natives as a respectful way of speaking of exalted personages.

HAVELLY (حويلى - havelí, *Hind.*). From (haul, ar. girt). Environs. The tract of country adjacent to a capital town, and originally annexed to it for the supply of the public establishments; afterwards came to signify lands under direct government management [amauny]. Cf. Home farms.

HAYAM (हय - haya, *San.*). From (hay, san. to go). A horse [coothiray, ghorah].——*Haya greevan* (हयग्रीव - hayagríva, San.). From (above + gríva, san. neck). A centaur. A portion of Vishnoo [q.v.] manifested in the Matsyam avatar [q.v.] as a demon in order to recover the Vedam [q.v.] carried off by the two Deityans [q.v.] Madhoo and Keitabhan. In the south called Somacausooran [matam].

HAYCALAH (ഹൈക്ലാ - hayklá, *Mal.*). Nave of a church among Malabar syrian christians.

HAZAUR (هزار - hazár, *Hind.*). Thousand [sahasram]. Plant first term. Ex.:—Andropogon schœnanthus (hazármasálah), thousand ingredients, from aroma; Mollugo cerviana (hazárdánah), thousand seed; see gloss. paragraphs.——*Hazaur danah* (पर्पटक - parpataka, San.; पर्पाटकु - parpátaku, Conc.; تپ جهار - tapjhár, Hind.; هزاردانه - hazárdánah, Dec.; ಪರ್ಪಾಟಕ - parpátaka, Can.; ಕೋರಪಂಟಿ - kórapanti, Too.; పర్పాటకము - parpátakamu, Tel.; പർപ്പടകം - parppatakam, Mal.; പൽപാടകം - patpádagam, Singh.; பர்ப்பாடகம் - parppádagam, Tam.). Title from numerous seeds. San. from sound of seeds bursting when the shrub is set fire to. Hind. from (tap, hind. fever + jhár, hind. tree); as febrifuge. Dec. from (hazár, hind. thousand + dánah, pers. seed). Tel., &c., from sanscrit. San. also (kavacha), meaning armour, medicinal; (kundalí), meaning annular, from germ [sangcooppy]. Can. also (parpáshtaka). Tel. also (pittsukakálu), meaning sparrow + leg. Title otherwise Fever plant, Sparrow leg. Botanically Mollugo [parpatam] cerviana, sering., ficoideæ [vricsham, 66]. Alias Pharnaceum cerviana, glabrum. Small plant half a foot; stems straightish, ascending, terete; leaves opposite, or alternate by abortion, linear, verticillate, very narrow, bluntish, glaucous; calyx five-parted; petals none; peduncles elongated, bearing three umbellate flowers; stamens usually five, or less by abortion; capsule three-valved, three-celled, many-seeded; calyx white on the inside. Febrifuge, diaphoretic, expectorant, antibilions.——*Hazaur daustaun* (هزار داستان - hazárdástán, Hind.). Means thousand + note. Madras boolbool [q.v.], pycnonotus hæmorhous.——*Hazauree* (هزاری - hazárí, Hind.). The commandant of a thousand men [amaram].——*Hazaur siry* (هزارسری - hazársirí, Hind.). From (above + sirí, hind. step). Flight of stairs to hill forts [kila].

HEENA (हीन - hína, *San.*; هين - hín, *Hind.*). From (há, san. to abandon). Devoid of, low. Heena jauty is of no caste. Heena raushy is that grain which being at the bottom of the heap is mixed with earth. Heenpacshan is an orphan.

HEERADACOON (اژدهاخون - azhdákhún, *Hind.*). From (azhdahá, pers. dragon + khún, pers. blood). Name in Bombay for Dragon's blood.

HEIBAT (هيبت - haibat, *Hind.*). From (hába, ar. to fear). Awe. Component of alam; as Heibat ool lah shah, fear of god, alam + alaumat [ism].

HEIGA (ಹೈಗ - haiga, *Can.*). From (hávu, can. snake); snake land. Ancient name of part of Canara from Bhadragherry river to the Gungavully. See vol. I (128).——*Hyecshetram* (ಹೈಕ್ಷೇತ್ರ - haikshétra, Can.). Another name of Heiga [q.v.] country.

HEIYAT (هيئت - haiyat, *Hind.*). From (haiyá, ar. face or form). Aspect of heavens, astronomy [ilm, nacshatram, najm].

HEMAM (हेम - héma, *San.*). From (hi, san. to go); useful, valuable. Gold [hiranyam, honn, pon, tungam].——*Hemauvaty* (ಹೇಮಾವತಿ - hémávati, Can.; hemavati, Mys. Gov.). From (above + vat, san. suffix of possession).—"*a*" Also in Canarese Yenneholey, oily or shining river. One of chief tributaries of Cauvery. Runs into Cauvery near Hoscote in Atticooppay talook, Hassan district, Mysore.—"*b*" Village, Place of pilgrimage; Anantapore dist., Madaksira tal.; pop. 2,112; lat. 14° 01′; long. 77° 02′; from Anantapore S.W. 62 miles; from Madaksira W.N.W. 20 miles. A celebrated Shiva temple and two others. A car feast in honor of Shiva. Shiva is an image here which is very unusual. There is a tradition that temples are buried underground all round the village and that at one time there was rain of gold in the village. Hence the name.

HENNA (حنا - hiná, *Pers.*). Dye from leaf of Egyptian privet [mindie].——*Foreign henna* (సీమగోరంట - símagóranta, Tel.). Same as Harmal.

HERMIT (तापस - tápasa, *San.*; దాసరి - dásari, *Tel.*). Prefix.——*Hermit snake* (ದಾಸರಹಾವು - dásarahávu, Can.; దాసరిపాము - dásaripámu, Tel.; தாசரிப்பாம்பு - tásarippámbu, Tam.). Title from marks on head and neck like a dausary's forehead marks. The rock-snake [q.v.].——*Hermit's tree* (तापसप्रिय - tápasapriya, San.). Hermits use oil from seed for burning. Same as Chironjee.

HEY (ಹೆ - he, *Can.*). Abbreviation of hedda in composition. Great [hiree].——*Hebbaura* (ಹೆಬ್ಬಾರ - hebbára, Can.). From (hedda, can. great + háruvá, can. bramin). Title to Canarese veishnava bramins. Hindoo third name [peyar].——*Heggadey* (ಹೆಗ್ಗಡೆ - heggade Can.). Means headman. Title to Bunts. Hindoo third name [peyar].——*Hettey* (ಹೆಟ್ಟೆ - hette, Can.). Great [hiree].——*Hettey coil* (ಹೆಟ್ಟೆಕೋವಿಲ್ - hettekóvil, Can.). From (hette, can. great + kóvil, tam. temple). Principal temple of the Neilgherry badagas.——*Hetteydeva* (ಹೆಟ್ಟೆದೇವ - hettedéva, Can.). From (hette, can. great + déva, can. god). Badaga deity [hiredeva].

HIDAUYAT (هدايت - hidáyat, *Ar.*). From (hudá, ar. to guide). Guidance [haudy]. Prefixed to an alam forms a lacab; as Hidauyat hoossain, guide of hoossain [ism].

HIJJAL (हिज्जल - hijjala, *San.*). Means water-liking [hitam], as growing near water. Same as Small indian oak.

HIJRA (هجری - hijra, *Hind.*; హిజిరి - hijiri, *Tel.*). From (hijr, ar. separation). Flight. The flight of Mahomet the prophet from Mecca to Medina to escape persecution. It took place on the night of Thursday the 15th July, A.D. 622. In the caliphate [q.v.] of Omar, this was constituted the commencement of the Mahomedan era, and the era was called Hijra era. See vol. I, 613. For months see Maheena.

HILL (پهاڑ - pahár, *Hind.*; ಬೆಟ್ಟ - betta, *Can.*; కొండ - konda, *Tel.*; മല - mala, *Mal.*; மலை - malai, *Tam.*). Common prefix. Plant first term in the vernaculars, from place of growth and sometimes indicating large size; often joining two genera. Ex., where transl. is of second term:—Acrocarpus fraxinifolius (malaikkón), king; Agave vivipara (malaikkattázhai), aloe indica; Albizzia procera (kondavágai), albizzia lebbek; Alpinia allughas (malayiñchikkúva), ginger + arrowroot; Alstonia venenatus (kondagannéru), nerium odorum; Amorphophallus campanulatus (malanchéna), yam; Amorphophallus lyratus (kondarákasi), she devil; Andrographis echioides (malakulukki), shaker; Andropogon fascicularis (kondajeri), centipede; Atalantia monophylla (kondanimma), lime; Atylosia scarabæoides (kondaulava), dolichos biflorus; Baliospermum montanum (kondaámudapuchettu), ricinus communis; Balsamodendron roxburghii (kondarégu), zizyphus jujuba; Barleria prionitis (kondagobbi), hygrophila spinosa; Bridelia retusa, var. genuina (malaivéngai), pterocarpus marsupium; Cajanus indicus, var. bicolor (malaittuvarai), cajanus indicus; Caryota urens (kondajílugu), æschynomene aspera; Cassia glauca (kondatantepuchettu), cassia tora; Cassia siamea (kondatangédu), cassia auriculata; Cassia sophera (kondakasinda), cassia occidentalis; Cassia tomentosa (malaiyávárai), cassia auriculata; Cipadessa fruticosa (bettadabévu), melia azadirachta; Cleome aspera (malaivérinbúndu), root + herb; Cochlospermum gossypium (kondagógu), hibiscus cannabinus; Colocasia montana (kondarakkissa), devil; Costus speciosus (malaivasambu), acorus calamus; Croton roxburghii (kondaámudamu), ricinus communis; Cucumis sativus (malaittummatti), cucumis trigonus; Dillenia bracteata (bettadakanigala), nerium odorum; Dillenia indica (bettakanigila), nerium odorum; Eleusine indica (malakkóra), eleusine corocana; Eragrostis punctata (bettadakkabuhullu), grass; Ficus tomentosa (kondamarri), ficus bengalensis; Ficus tuberculata (kondadzuvvi), ficus tsiela; Ficus vagans (kondarávi), ficus religiosa; Garcinia xanthochymus (malaippuli), tamarindus indica; Gardenia latifolia (kondamanga), randia dumetorum; Guizotia abyssinica (kondanuvvu), sesamum indicum; Hibiscus collinus (malaivendai), hibiscus esculentus; Hibiscus furcatus (malaippuliççai), hibiscus cannabinus; Hymenodictyon excelsum (malaittanakku), gyrocarpus jacquini; Ipomæa pentaphylla (kondagummudu), ipomæa digitata; Jatropha curcas (kondaámuda), ricinus communis; Kœmpferia rotunda (malankúva), curcuma angustifolia; Macaranga indica (bettadávare), nelumbium speciosum; Manihot utilissima (malaiççakkaraivalli), sugar + ipomæa batatas; Melia azedarach (malavémbu), melia azadirachta; Michrochloa setacea (kondaponuku), gyrocarpus jacquini; Mundulea suberosa (kondavempali), tephrosia purpurea; Polygonum barbatum (kondamalle), jasminum sambac; Protium caudatum (kondamámidi), mangifera indica; (kondarégu), zizyphus jujuba; (malaikkiluvai), balsamodendron berryi; (malaimá), mangifera indica; Protium pubescens (malaikkiluvai), balsamodendron berryi; Psidium guyava, var. pomiferum (malampéra), guava; Sarcostemma brevistigma (kondapála), milky plant; Scleria lithosperma (kondashákatunga), cyperus rotundus; Sida carpinifolia (malatánni), supporter; Smilax ovalifolia (kondadantena), clitoria ternatea; (malaittámarai), nelumbium speciosum; Solanum torvum (malaisundai), solanum pubescens; Sophora glauca (malaiyávárai), cassia auriculata; Sponia wightii (malantutali), scutia indica; Sterculia urens (kondatámara), nelumbium speciosum; Symphorema involucratum (kondatekkali), clerodendron phlomoides; Thespesia lampas (kondapatti), gossypium herbaceum; Toddalia aculeata (kondakasinda), cassia occidentalis; Trichosanthes cucumerina (bettapadavala), trichosanthes anguina; Vaccinium leschenaultii (malaikkilá), carissa; Webera corymbosa (kondapápata), pavetta indica; Xylia dolabriformis (kondatangédu), cassia auriculata; Zizyphus jujuba (malantutali), scutia indica. See gloss. paragraphs. For compounds of Pahaur see Pahaury.——*Hill aloe* (மலைக்கற்றாழை - malaikkattázhai, Tam. Same as American aloe.——*Hill cobra* (پہاڑی سانپ - pahárisámp, Hind.; కొండనాగు - kondanágu, Tel.; കുറിഞ്ഞി - kuriññi, Mal.). Hind. means mountain serpent. Tel. from (konda, tel. hill + nágu, tel. snake), Mal. from (kuriççi, mal. jungle). Tel. also (vairagu). Title otherwise Hamadryad. Ophiophagus elaps, elapidæ [naug], ophidii colubriformes venenosi, ophidia [sarpam], reptilia [sarpy, 27], of naturalists [jantoo]. The genus contains this species only. Alias Hamadryas elaps, ophiophagus; Naja bungarus, elaps, vittata; Trimeresurus ophiophagus. A hooded snake, varying in length, in the adult state, from twelve to fourteen feet. Olive-green above; the shields of the head, the scales of the neck, hinder part of the body and of the tail edged with black; trunk with numerous oblique, alternate black and white bands converging towards the head; lower parts marbled with

blackish, or uniform pale greenish. This snake is the most aggressive of all Indian poisonous snakes, but it is nevertheless manageable in captivity. As its Latin name implies, it lives as much as practicable upon other snakes. Inhabits hollow trees. Distinguish from Tree snake.——*Hill corindah* (కొండకొరింద - kondakórinda, Tel.). See Corindah.——*Hill goat* (కొండమేక - kondaméka, Tel.). Same as Jungle sheep.——*Hill gooseberry* (కొండఉసిరికె - kondausirike, Tel.). Same as Brazil cherry and Hill guava.——*Hill guava* (மலைக்கொய்யா - malaikkoyyá, Tam.). See under Guava.——*Hill milk hedge* (மலைக்கள்ளி - malaikkalli, Tam.). Same as Zakhm hayaut.——*Hill neem* (மலைவேம்பு - malaivémbu, Tam.). See under Neem.——*Hill raspberry* (गौरीफल - gauríp'hala, San.). See Gowry's fruit.——*Hill sheep* (కొండగొర్రె - kondagorre, Tel.). Same as Chousinga and Saddle back.——*Hill-station* (ಮಲೆ - male, Can.; కొండ - konda, Tel.; മല - mala, Mal.; மலை - malai, Tam.). Anglo-Indian for stations above level of plains resorted to by Europeans, especially in hot-weather.—"*a*" Principal in presidency are the following [q.v.]:—Bangalore, mysore state; Coonoor, neilgherries; Coothiraymookh, dist. s. canara, tal. ooppinangady; Courtallam, dist. tinnevelly, tal. tencaushy; Cumbum, dist. madura, tal. periyacoolam; Horsleycondah, dist. cuddapah, tal. madanapully; Keilausam, dist. vizagapatam, tal. vizagapatam; Kodaykarnal, dist. madura, tal. pulney; Kotagherry, dist. neilgherry; Oodayagherry droog, dist. nellore, tal. oodayagherry; Ootacamund, dist. neilgherry; Pulmanair, dist. north arcot, tal. pulmanair; Peermaid, dist. travancore state; Ramandroog, dist. bellary, tal. sundoor; Somshaparvat, dist. south canara, tal. mangalore; Talamullay, dist. trichinopoly, tal. moosiry; Wellington, dist. neilgherry; Yercaud, dist. salem, tal. salem.—"*b*" The following is the list reversed:—Arcot north, pulmanair; Bellary, ramandroog; Canara south, coothiraymookh, somshaparvat; Cuddapah, horsleycondah; Madura, cumbum, kodaykarnal; Mysore, bangalore; Neilgherries, coonoor, kotagherry, ootacamund, wellington; Nellore, oodayagherry; Salem, yercaud; Tinnevelly, courtallam; Travancore, peermaid; Trichinopoly, talamullay; Vizagapatam, keilausam.

HILSA (इलीश - ilísha, *San.*; هلسه - hilsah, *Hind.*; పలస - palusa, *Tel.*; ଇଲିଶ - ilisha, *Oor.*; உல்லம் - ullam, *Tam.*). Title from hindostany. San. from (il, san. to go). Title otherwise Sable fish, Shad. The genus Clupea, clupeidæ, physostomi, teleostei, pisces [matsyam, 40], of naturalists [jantoo]. The species best known is Clupea ilisha. Specific name from sanscrit. Alias Alausa malayana, palasah; Clupanodon ilisha; Clupea palasah. Alausa from sanscrit; palasah from teloogoo. Silvery, shot with gold and purple; no spots in the adult, but a row of them along the upper third of the body in the immature, the most distinct of which is behind the upper third of the opercle, young are usually of a bronze color along the back, with silvery sides and a burnished silvery band going from above the eye to the upper half of the caudal fin, whilst the caudal fin is often deeply edged with black in its entire circumference; main body of these fish swarm up all the larger rivers as soon as the monsoon [q.v.] commences; they are excellent as food until they have deposited their ova, when they become thin and positively unwholesome; their flavor has been compared to a combination of that of the salmon and herring; they are rather heavy of digestion. A west coast sardine is Dussumieria acuta. Clupea fimbriata is sardine of europeans in india; Clupea longiceps is malabar oil sardine; Clupea alba is white-bait; Clupea herengus is herring; Clupea sprattus is sprat.

HIMAM (हिम - hima, *San.*). Snow.——*Heimavaty* (हैमवती - haimavatí, San.). Produced on the Himalayas. Plant name common to:—Acorus calamus; Terminalia chebula; see gloss. paragraphs.——*Himalaya* (हिमालय - himálaya, San.; هماليه - himáliyah, Hind.; இமயமலை - imayamalai, Tam.). From (above + álaya, san. abode).—"*a*" The sacred mountain, the father of Parvaty [q.v.], whence she is called Himayaval.—"*b*" Plant first term. Ex.:—Abies webbiana, himalayan silver fir; Betula bhojpattra, himalayan birch; Cedrus deodara, himalayan cedar; Rubus moluccanus, himalayan raspberry. See gloss. paragraphs.

HIMAUYAT (حمايت - himáyat, *Ar.*). From (hamí, ar. to defend). Defending [hameeyat]. Prefixed to an alam forms a lacab; as Himauyat hoossain, defence of hoossain [ism].

HIN (ಹಿಂ - him, *Can.*). Latter [pin].——*Hingaur* (ಹಿಂಗಾರು - hingáru, Can.). From (above + káru, can. crop). Season and crop of N. east monsoon [q.v.] of September and October. Otherwise Heinoo [caur, parvam, peira, vellaumay].

HIND (هند - hind, *Hind.*). India [q.v.].——*Hindee* (هندى - hindí, Hind.). Indian.—"*a*" The Bengalee form of Hindostany which employs the Devanagry [q.v.] character or varieties of it, and is used chiefly by Hindoos [bhaushay]. See vol. I (60).—"*b*" Plant first term, often joining two genera. Ex., where transl. is of second term:—Cochlospermum gossypium (hindíkatérá), tragacanth; Hemidesmus indicus (hindísálsá), sarsaparilla; Terminalia catappa (hindíbádam), prunus amygdalus. See gloss. paragraphs.—"*c*" Plant second term, often joining two genera. Ex., where transl. is of first term:—Ægle marmelos (safarjalihindí), cydonia vulgaris; Carica papaya (anabahihindí), vitis vinifera; Cedrus deodara (sanobarihindí), abies excelsa; Cephalandra indica (kabarihindí), capparis spinosa; Clitoria ternatea (mázariúnihindí), daphne mezereum; Hemidesmus indicus (ushbahihindí), sarsaparilla; Picrorhiza kurrooa (kharbakihindí), helleborus niger; Pinus longifolia (sanobarihindí), abies excelsa; Sapindus trifoliatus (fíndakihind), corylus avellana; Sorghum vulgare (jávarsihindí), panicum miliaceum; Tamarindus indica (tamarihindí), phœnix dactylifera. See gloss. paragraphs.——*Hindoo* (हिन्दु - hindu, San.; هندو - hindú, Hind.; ಹಿಂದು - hindu, Can.; హిందువు - hinduvu, Tel.; ഹിന്ദു - hindu, Mal.; இந்து - indu, Tam.). From (sindhu, san. the river indus). The Aryans settled in the districts surrounding the streams of the Sindhoo river. The Persians called this Hind. The Greeks, who gained their first conceptions of India from the Persians, changed the hard aspirate into a soft, and named the Hindoos ἰνδοί [india]. The word Hindoo now means any person of Indian religion and race, not being a Mahomedan or foreigner. The Presidency has about 30 million Hindoos under this definition [jauty].——*Hindoopore* (హిందుపురము - hindupuramu, Tel.). See sep. title.——*Hindoo row* (هندوراو - hindúráu, Hind.). From (hindí, san. durgá, the deity + ráu, hind. title). Father of Morqury row, the Mahratta chieftain who played an important part in the affairs of the Carnatic [q.v.] during the last century. The talook [q.v.] of Hindoopore in Anantapore has been called after him.——*Hindostan* (हिन्दुस्थान - hindust'hána, San.; هندوستان - hindústán, Hind.; இந்துஸ்தானம் - indusdánam, Tam.). From (above + st'hána, san. place). Abode of the Hindoos. Properly speaking the late Persian and present Mussalman name for the great plain between the Sutlej and Benares, inhabited by the Hindee [q.v.] speaking people of the modern West bengal or Behar, the North-western provinces, and the East punjab. It is sometimes extended southwards to the country lying as far south as the Nerbudda and Mahanuddy rivers, but even then does not include Bengal. At the present day it is often incorrectly used for the whole of India, including the peninsula [charitram].——*Hindostany* (هندوستانى - hindústání, Hind.). Otherwise Oordoo. As the prevailing language of the south it is a mixture of the Oordoo [q.v.] and the Deccany [q.v.]. See vol. I (60). About 700,000 persons talk Hindostany in Presidency [bhaushay].

HINDASA (هندسه - hindasah, *Ar.*). Geometry [ilm]. The following are some of the common terms.——*Cootr* (قطر - kutr, Hind.). Diameter.——*Cows* (قوس - kaus, Hind.). Arc.——*Dayeera* (دائره - dáirah, Hind.). Circle.——*Khatt* (خط - khatt, Hind.). Line.——*Khatt i moostakeem* (خط مستقيم - khattimustakím, Hind.). Straight line.——*Khatt i mootawauzy* (خط متوازى - khattimutawází, Hind.). Parallel line.——*Markaz* (مركز - markaz, Hind.). Centre.——*Moorabba* (مربع - murabba, Hind.). Square.——*Moosallas* (مثلث - musallas, Hind.). Triangle.——*Moostateel* (مستطيل - mustatíl, Hind.). Parallelogram.——*Mootar* (مطر - mutarr, Hind.). Oblong.——*Satah* (سطح - satah, Hind.). Superficies.——*Shakl* (شكل - shakl, Hind.). Figure.——*Zauviya* (زاويه - záviyah, Hind.). Angle.

HINDOOPORE (హిందుపురము - hindupuramu, *Tel.* hindupur *]. From (hinduràvu, tel. proper name + pura, san. city) [hindoo]. City of Hindoo row.——**(1)** Talook, Anantapore district. Tahsildar's pay Rs. 150. Area 481 square miles. Population 81,678. Language Teloogoo. S. of district. Boundaries:—North Penoocondah talook, east Cadiry talook of Cuddapah, south Mysore, west Mysore and Madaksira talook. Formerly called the Codicondah talook, and till 1813 a Sub-collector was stationed there. Rocky hills on the east sloping to the Chitrauvaty, west of which there are low hills. Soil gravelly and red. Chief products are grain, wheat [geung], horse-gram [q.v.], saumaloo [shaumay], and castor-oil [lamp-oil]; minor products, cholum [q.v.], cotton [q.v.], saffron [country saffron], sugar-cane [q.v.], and paddy [q.v.]. Agricultural tract. Hindoopore extension railway goes through it. Pennair passes through west of talook [q.v.] close to town of Hindoopore, and Chitrauvaty flows through east. But neither are as yet made use of for irrigation, except by way of supply channels [q.v.] connecting them with some of the tanks [q.v.]. There are large tanks:—Bichaganhully, Cottanore, Hindoopore, Parghy. Camping grounds are Codoor and Paulsamoodram. Places of archæological interest:—Bichaganhully, Chilmuttore, Cholasamoodram, Chowlore, Codigipulley, Codihully, Condoor, Cotmore, Cuggall, Cummavauripully, Gollaupooram, Goodihully, Gorvanahully, Karikera, Lepaucshy, Manasamoodram, Maunepully, Medireddipully, Meidoogolam, Moda, Moolgooroo, Mosalapully, Mullapully, Oolicoonta, Parghy, Salivendla, Shreecuntapooram, Somagutt, Vadigepully, Yerragoontla. Principal trig. station:—Yerracondah. The leading places, &c., in the talook are the following.——*Bichaganhully* (ಬಿಚಗನಹಳ್ಳಿ - bichaganahalli, Can.). From (bichaga, can. proper name + halli, can. village). Village; pop. 1,075; lat. 13° 55′; long. 77° 33′; from Anantapore S. 52 miles; from Hindoopore N. 7 miles. Large tank. Near confluence of Jayamungaly and Pennair.——*Boodaly* (బూదలి - búdali, Tel.).

From (báda, tel. milk pot). Village; pop. 2,228; lat. 13° 56′; long. 77° 47′; from Anantapore S. 51 miles; from Hindoopore E.N.E. 19 miles. Two tanks.——*Chilmuttore* (చిలమత్తూరు - chilamattúru, Tel.). From (chelama, tel. spring + atti, tel. fig, ficus racemosa, linn. + úru, tel. village). Village; pop. 3,185; lat. 13° 50′; long. 77° 45′; from Anantapore S. 57 miles; from Hindoopore E. 15 miles. Inscription A.D. 1367 mentioning Bookka of Vijianugger. Large tank. On left bank of Cooshauvaty.——*Chitrauvaty* (చిత్రావతి - chitrávati, Tel.). See sep. title.——*Codicondah* (కొడికొండ - kodikonda, Tel.). See sep. title.——*Coodoor* (కోడూరు - kódúru, Tel.). From (kúdu, tel. meeting + úru, tel. village); at the junction of chitrauvaty and cooshauvaty. Village; pop. 1,579; lat. 13° 52′; long. 77° 47′; from Anantapore S. 57 miles; from Hindoopore E.N.E. 16 miles. On Bangalore high road. Large tank.——*Cottanore* (కొత్తనూరు - kottanúru, Tel.). From (kotta, tel. new + úru, tel. village). Village; pop. 1,042; lat. 13° 51′; long. 77° 34′; from Anantapore S. 57 miles; from Hindoopore N.E. 3 miles. Large tank.——*Gorantla* (గోరంట్ల - górantla, Tel.). From (góranti, tel. the nail-dye plant, lawsonia alba, lamk.). Village; pop. 1,569; lat. 13° 59′; long. 77° 49′; from Anantapore S.S.E. 48 miles; from Hindoopore E.N.E. 22 miles. Formerly of importance. The E. gate of Penoocondah fort is called the Gorantla gate. Is on Chitrauvaty river. Two tanks.——*Hindoopore* (హిందుపురము - hindupuramu, tel.). See below.——*Lepaucshy* (లేపాక్షి - lépákshi, Tel.). From (lépa, san. anointing + akshi, san. eye); epithet of a deity. Village; pop. 2,256; lat. 13° 48′; long. 77° 39′; from Anantapore S. 60 miles; from Hindoopore E. 8 miles. Large stone temple with good carvings. The roof of the hall is supported by 40 pillars. By the roadside is a colossal monolith stone bull [nundy], similar to those at Tanjore and Mysore.——*Ootcore* (ఊటకూరు - útakúru, Tel.). From (úta, tel. spring + úru, tel. village). Village; pop. 1,500; lat. 13° 54′; long. 77° 32′; from Anantapore S. 53 miles; from Hindoopore N. 6 miles. Large tank. Near the confluence of Jayamungaly and Pennair.——*Parghy* (పరిగి - parigi, Tel.). From (parige, tel. gleanings of corn). Village; pop. 4,124; lat. 13° 53′; long. 77° 30′; from Anantapore S. 55 miles; from Hindoopore N.N.W. 5 miles. Large tank irrigating 2,700 acres. Formerly District moonsif's court.——*Paul samoodram* (పాలసముద్రము - pálasamudramu, Tel.). From (pálu, tel. milk + samudra, san. ocean). Sanscrit name (kshírasamudra), meaning the same. Village; pop. 1,027; lat. 13° 57′; long. 77° 43′; from Anantapore S. 50 miles; from Hindoopore N.E. 16 miles. Halting place on Bangalore road, Tank, Travellers' bungalow [q.v.].——*Pidaty* (ಪಿಡತಿ - pidati, Can.). Village; pop. 551; lat. 13° 57′; long. 77° 29′; from Anantapore S.S.W. 51 miles; from Hindoopore N.N.W. 9 miles. Lands irrigated by Parghy tank.——*Salivendla* (చలివెందల - tsalivendala, Tel.). From (tsalla, tel. cool + pandili, tel. shed). Village; pop. 1,278; lat. 13° 53′; long. 77° 39′; from Anantapore S. 54 miles; from Hindoopore E.N.E. 9 miles. Soil suited to growth of date [kharjooram] trees.——*Santebidanore* (సంతేబిదనూరు - santébidanúru, Tel.). From (sante, can. fair + bidanúru, can. place so called). Village; pop. 1,424; lat. 13° 43′; long. 77° 31′; from Anantapore S. 65 miles; from Hindoopore S. 6 miles. Tank fed by Pennair.——*Siracolam* (ಶಿರಕೊಳಂ - sirakolam, Can.). From (sira, can. head + kola, can. tank). Village; pop. 1,243; lat. 13° 54′; long. 77° 28′; from Anantapore S.S.W. 55 miles; from Hindoopore N.W. 7 miles. Is irrigated by Parghy tank.——*Vaunavole* (వానవోలు - vánavólu, Tel.). From (vána, tel. rain + prólu, tel. town). Village; pop. 2,501; lat. 14° 00′; long. 77° 53′; from Anantapore S.S.E. 48 miles; from Hindoopore E.N.E. 27 miles.——*Yerracondah* (ఎర్రకొండ - errakonda, Tel.). From (erra, tel. red + konda, tel. hill). Trig. station; lat. 13° 54′ 58·56″; long. 77° 41′ 36·07″; height 2,820 feet; from Anantapore S. 53 miles; from Hindoopore E.N.E. 12 miles; from Velidadakala S.E. 2 miles.——**(2)** Town, Talook head-quarters; Anantapore dist., Hindoopore tal.; pop. 7,905; lat. 13° 49′; long. 77° 32′; from Anantapore S. 59 miles; from Bellary S.S.E. 97 miles; from Gooty S. 89 miles; from Madras W.N.W. 194 miles; from Penoocondah S.S.W. 19 miles. A large commercial town, the principal market of the talook. Trade in jaggery [q.v.], piece-goods and grain. Founded by Moraury row, and called after his father Hindoo row. Irrigated by tanks and channels from the Pennair, and a commercial centre for agricultural produce. The irrigation project here consists of a channel [q.v.] to be taken from the Pennair river by means of an anicut [q.v.] to be built across the river near Santebidanore. The channel will be nearly 11 miles long by 15 yards broad, and will have an average depth of 4 feet. It will pass above and benefit by sluices the tanks of Basavanhully, Calcoonta, Coolacoonta, Cottanore, Hindoopore, Shreecuntapooram, Yerrakerey, and will finally end in the Ootcore tank. The Hindoopore extension railway passes through the town. Much of the trade is with Bangalore, 62 miles distant by road. The fort has been dismantled and the town is increasing in size. There are good areca [q.v.] nut gardens in the neighbourhood. The talook cutcherry [q.v.] is an old structure, built round a central courtyard. Hand weaving of gunny [q.v.], sacking, common cloth, and blankets [cumbly] is carried on.

HINDRY (హింద్రి - hindri, * *Tel.*). A corruption of indrauvaty, meaning a place frequented by the god indran [q.v.]. Sanscrit name (indrávatí), meaning indran's town. River; Kurnool dist., Putticondah and Ramalcottah tals. Rises in the fields of Maddikera at frontier of Putticondah talook and to S.W. of Kurnool in lat. 15° 16′; long. 77° 27′. It flows through Putticondah and Ramalcottah talooks for a distance of 30 miles, receiving an affluent from the Yerramalas at Ladagiry, and joins the Toongabudra at Kurnool in lat. 15° 50′; long. 78° 06′. Liable to sudden floods. Bed is of yellow sand and rock. Never navigable except by smallest boats. Picottahs [q.v.], but no anicuts [q.v.] Kurnool canal is carried across the bed by aqueduct at Kurnool town. After subsidence in November, sand banks are left, on which vegetables and melons [oorvauroo] are grown.

HING (हिंगु - hingu, *San.*; هنگ - hing, *Hind.*). From (han, san. to kill) [hamsam, hanoo]. Asafœtida [q.v.].——*Hingol* (हिंगुल - hingula, San.; هنگول - hingol, Hind.). From (above + lá, san. to take). That which has the color of asafœtida. Cinnabar [shangarf].

HINGAN (هنگن - hingan, *Hind.*). The Fire-work plant.

HIRA (هيرا - hírá, *Hind.*). Diamond [vajram].——*Hirachund* (హీరాచందు - hiráchandu, Tel.). From (above + chand, hind. moon). Hindoo 2nd or pers. name [peyar].——*Hirakash* (هيرا كشيش - hírákashísh, Dec.). From (hará, hind. green + kasis, hind. sulphus ferri). Same as Annabhaidy [q.v.].——*Hirasing* (హీరాసింగు - hirásingu, Tel.). From (above + singh, hind. lion). Hindoo 2nd or pers. name [peyar].——*Hirojee* (హిరోజీ - hirójі, Tel.). From (above + ji, hind. master). Hindoo 2nd or pers. name [peyar].

HIRANYAM (हिरण्य - hiranya, *San.*). From (hari, san. yellow) [haran]. Gold [hemam, honn, pon, tungam].——*Hiranya cashipoo* (हिरण्यकशिपु - hiranyakashipu, San.). From (above + kashipu, san. clothing). A giant [narsimha avatar].——*Hiranya garbham* (ഹിരണ്യഗർഭം - hiranyagarbham, Mal.). From (above + garbha, san. womb). Originally said to have been a ceremony of being born of, or actually passing through, a golden cow. At present day it is a ceremony performed in Travancore by the rajah [q.v.] of that state in a large golden vessel with a cover of gold. Inside the vessel is placed a mixture of the five products of the cow [punchagavyam]. After preparatory rites the rajah enters the golden tub, the cover is put on, he bathes and offers prayers inside for ten minutes, while the assembled priests continue praying and chanting hymns. After coming out, he is again crowned by the chief priest and is advanced in caste purity. The golden vessel is cut up and distributed amongst the Bramins.——*Hiranya garbhan* (हिरण्यगर्भ - hiranyagarbha, San.). From (above + garbha, san. womb). Bramha [q.v.], as born from the golden egg.

HIREE (ಹಿರಿ - hirí, *Can.*). Great [hey]. So senior, as of rulers; for instance Hiree chauma rajah, the elder chauma rajah.——*Hiredeva* (ಹಿರಿದೇವ - hiridéva, Can.). From (above + déva, can. god). Badaga god [hetteydeva].——*Hirode* (ಹಿರೋಡೆ - hiróde, Can.; hiród, Mys. Gov.). From (above + óde, can. palace). Village and former military station, Mysore district, 4 miles north of Seringapatam, on the Mysore-Naugamungala road [french rocks].

HISAUB (حساب - hisáb, *Hind.*). From (hasaba, ar. to compute). An account [kanak, lekka]; arithmetic [ilm].

HISSA (حصه - hissah, *Hind.*). From (hissa, ar. to cut). Share [coroo]; astronomical degree [bhaugam], the minute being dakeeka [calay]. For Hissa shrotriem, see Inam.

HITAM (हित - hita, *San.*). From (dhá, san. to hold). Agreeable.——*Hitopadesh* [हितोपदेश - hitópadésha, San.). From (above + upadésha, san. advice). Good advice. Cf. Hoomayoon nauma. Compiled from the larger and older Punchatantram [q.v.].

HIZABR (هزبر - hizabr, *Ar.*). Fierce lion [hamza, hyder shere]. Part of lacab; as Hizabr ood deen, lion of the faith; Hizabr jung, lion of war [ism].

HOBLY (ಹೋಬಳಿ - hóbali, *Can.*; ഹോബളി - hóbali, *Mal.*). Division of a district. In Malabar formerly under Hyder a sub-division of a talook [q.v.] comprehending several Deshoms [q.v.] or villages. It corresponds with Maugauny in Canara, and with Maugaunam [q.v.] on the Eastern coast. See vol. I, 112.

HOG (سياه - siyáh, *Hind.*). Prefix.——*Hog gum* (سياه گوند - siyáhgond, Hind.). Otherwise Bussorah gum, Hog tragacanth, Kateerah. Group of high-colored gums resembling tragacanth, but inferior. They may be enumerated as follows:— Pale-colored; cochlospermum gossypium [golden silk cotton], sterculia urens [false kateerah]; other species of sterculia [cauvalam]. Dark-colored, decidedly inferior; moringa pterygosperma [moringa], horse-radish tree, gum rapidly decays into a black powder, called mocharas [q.v.] and also false tragacanth; bombax malabaricum [red-cotton tree], yields also a mocharas, superior to the last, but of little commercial value; ailanthus

excelsa [coromandel ailanto], resembles moringa gum, but occurs in deep, dark red, large, rounded tears, instead of masses; stereospermum suaveolens [pauthiry], very little known. Odina wodier [wodier], although soluble and not a bussorah gum, is pressed on the market, either as an adulterant for gum arabic, or as a substitute for bussorah and tragacanth [q.v.].——*Hog plum* (امرا - amrá, Hind.). Title from being eaten by hogs. Same as Wild mango.

HOGEY (ಹೊಗೆ - hoge, *Can.*). Smoke [pogay].——*Hogeycull* (ಹೊಗೆನಕಲ್ಲು - hogenakallu, Can.). From (above + kallu, can. rock), from the cloud of spray in the fall. Waterfall; Salem dist., Dharmapoory tal.; lat. 12° 07′; long. 77° 49′; from Dharmapoory W. 25 miles; from Salem N.W. 40 miles. A fall of the Cauvery [q.v.]. The main body of the river here takes a leap of some 80 feet into a deep chasm, and in so doing impinges on an opposing rock. Sacred in Hindoo estimation, being the scene of a yearly festival to which devotees from all parts of India resort. Bramin time of pilgrimage is Arpisy [mansam] or October, and Shoodras and merchants hold a festival called Audy pathinett [pundigay, 2c] on 2nd August [aroovy].

HOLA (ಹೊಲ - hola, *Can.*). Dry land [polam].——*Holeya* (ಹೊಲೆಯ - holeya, Can.). Canarese pariahs. The corresponding terms are:—Tel. maula, Mal. poolaya, Tam. pariah. They believe like all the other pariah tribes that they were once an independent people, and had kings of their own [janty].——*Holigarna* (होलगेरि - hólagéri, Mahr.; ಹೊಲಗೇರು - holagéru, Can.; കാട്ടുചേർ - káttuchér, Mal.). Can. from (hola, can. dry land + géru, can. marking-nut plant, semecarpus anacardium, linn. f.). Mal. from (kátu, mal. forest + chér, mal. the marking-nut tree); from habitat and similar fruit and nut. Mahr. also (húlagiri). Can. also (kádugéru), meaning wild + marking-nut plant. Title otherwise Jungle marking-nut, Malabar black varnish, Malabar marking-nut. Botanically Holigarna longifolia, roxb., anacardiaceæ [vricsham, 45]. Generic from canarese. Forest tree, 60 feet; leaves alternate, cuneate, oblong or acute; petioles usually with a soft, incurved, thorn-like, deciduous process on each side about the middle; panicles terminal and axillary; styles recurved; calyx five-toothed; petals five, oblong, spreading; stamens five, shorter than the corolla; flower small, whitish; flowers in december and january; ripens fruit in april and may; fruit like a prune [auloochah], at first glaucous and downy, when ripe dark blue and glabrous; nut about size of an olive [zeitoon] contains between the laminæ numerous cells filled with black rather thick, acrid fluid. Fruit and bark are used medicinally. Black oily acrid substance exudes from fruit as in marking-nut tree [q.v.]; used by painters [rangh], and also for fixing indelible colors figured on linen cloths; juice by incision of the stem very acrid, employed in malabar for varnishing shields; small boats are made from the timber. Another variety with a round dark fruit. Another species, Grahamii.

HOLY (هولی - holí, *Hind.*). Title from sound of syllables in songs used on the occasion. Bengal name of Cauman pundigay. Also used in Mysore, Coimbatore, Salem, &c. A festival in honor of Krishnan [q.v.] as Cauman [q.v.] the god of love, held for fifteen days previous to the vernal equinox [meshauyanam], when the hindoos disport themselves; songs are sung in the streets, and performers throw a red powder [goolaul], and splash saffron [country saffron] colored water upon one another. Cf. Dusserah.

HOM (هوم - hom, *Pers.*). Same as Somam [q.v.]. Distinguish from sanscrit Homam [hoo] which is a separate root.

HOME FARMS (حویلی اجارہ - havelíijárah, *Hind.*). From (havelí, ar. household + ijárah, ar. farm). Also called Havelly [q.v.] lands. The East india company had, prior to the cession of the Chingleput jagheer [q.v.], become possessed of these, meaning a few villages round the area comprising the original grant for building Fort St. George. They were at first managed by the Board of Revenue, but shortly afterwards placed under a separate officer. The following is a list of the villages:—Arasanore, Auttpollam, Chetput, Egmore, Kilpauk, Mylapore, Nedoombauray, Nungumbaukum, Perambore, Poothoopauk, Pursewaukum, Tondiarpett, Triplicane, Vepery, Vyausarpaudy, and Yiroongoolam. The extent covered by them included the jurisdiction of the former Recorder and present High court.

HONN (ಹೊನ್ನು - honnu, *Can.*). Gold [hemam, hiranyam, pon, tungam]. As a gold coin:—2 dharanams = 1 honn; 2 honns = 1 varahah [naunyam, 2c]. Old coin of Mysore with many prefixes. Not now current [hoon]. Compare Tel. mauda.——*Hangar cutta* (ಹಂಗಾರಕಟ್ಟೆ - hangárakatte, Can.). From (hongara, can. indian coral tree, erythrina indica, lamk. + katte, can. a basin round the trunk of a tree). Part of Coodroo village, Port; South canara dist., Oodipy tal.; from Mangalore N. 42 miles; from Oodipy N. 10 miles. The port of Barcore. At the mouth of the Seetanuddy. Five miles from old Barcore. Considerable export trade in rice [q.v.], &c., principally to Goa, and import trade in cotton [q.v.] piece-goods, cocoanut [q.v.] oil, and salt [ooppoo] from Goa. Goods from the interior and those brought from above the ghauts [q.v.] are taken to it by boats from Cokkarney and Bajey on the Seetanuddy and Swarnanuddy respectively.——*Honiga* (द्वीपी - dvípí, San.; खरडा - kharadá, Mahr.; پلنگ - palang, Pers.; تیندوا - tendwá, Hind.; چیتا باگھ - chítábágh, Dec.; أرموتالپ - arimautálap, Malay; ಹೊನಿಗ - honiga, Can.; చిన్నపులి - chinnapuli, Tel.; କୋରଡପୋତ୍ରିୟ - koradapotriya, Oor.; പുലി - puli, Mal.; කොටියා - kotiyá, Singh.; சிறுத்தை - shiruttai, Tam.). Title from canarese. San. from (dvípa, san. island); island-skinned, or spotted. Mahr. from (kharadané, mahr. to move along upon the buttocks). Dec. from (chítá, hind. spotted animal + bágh, hind. tiger). Malay from (arimau, malay, tiger + tálap, malay, perfume box); variegated. Can. from (honnu, can. gold). Tel. from (chinna, tel. small + puli, tel. tiger). Tam. from (shiru, tam. small). San. also (pundaríka), ordinarily means white lotus; as a leopard, may strictly apply to ounce or snow panther. Hind. also (sonáchítá), meaning golden cheetah. Malay also (rimaubintang), meaning tiger + star. Tel. also (ponnáda), meaning gold + dress. Mal. also (karimpuli), meaning black + tiger. Tam. also (peruñjivingi), meaning great + pard. Title otherwise Panther, Puma, Couguar. Felis [marjauram] pardus, felidæ [deeptaucsham], digitigrada, carnivora, mammalia [sastanam, 9], of naturalists [jantoo]. Alias Felis leopardus. The pard generally, of which the panther is the larger variety, is an animal of a rufous-fawn color, more or less deep, with dark spots grouped in rosettes; tail more or less ringed. Varies greatly in size, from six to eight feet and upwards. The color of the panther is generally pale fulvous yellow, the belly white; whilst some are deeper and more tawny in hue, and others without any white at all beneath. As a general rule the fur of the panther is shorter and closer than that of the leopard. The black panther is merely a variety of the common one. The tiger is tameable, the panther not so. A man-eating panther is more to be dreaded than a tiger [pooly] of the same class. Indian species not here found are:—Nebulosa or macrocelis or clouded panther, Uncia or ounce or snow panther. For the smaller panther or leopard see Kerkal.——*Honnholey* (ಹೊನ್ನುಹೊಳೆ - honnuhole, Can.). From (above + hole, can. river). Sanscrit name (svarnávati), meaning gold + possession. River; Coimbatore district. Tributary of the Cauvery [q.v.]. Formed of two jungle streams, rising in Hassanore ghaut [q.v.] and Taulavaudy hills respectively in Suttimungalam talook, about 45 miles south of the cusbah [q.v.]. It flows through Mysore to a great distance and empties itself into the Cauvery near Humpapore, on its southern bank 2 miles north of the cusbah. The Honnholey valley is fertile, the stream being dammed in its short course by three permanent anicuts [q.v.] as well as by many temporary structures.——*Honzaram* (హొంజరాము - hondzarámu, Tel.). From (above + tsára, tel. vein + gám, hind. village). Estate, Village; Vizagapatam dist., Palcondah tal.; pop. 946; acres 836; lat. of village 18° 26′; long. 83° 51′; from Palcondah S.S.E. 11 miles; from Vizagapatam N.E. 60 miles. Honzaram estate, consisting of thirteen jiroyaty [q.v.] and two shrotriem [q.v.] villages, was purchased by the Collector on behalf of Government for arrears of revenue on the 18th October 1811 and was managed by him up to July 1846, when it was leased with Palcondah to Messrs. Arbuthnot and Co.——*Hoon* (हून - húna, San.; هون - hun, Hind.). From the can. (honnu), meaning gold [hoon]. The Mahomedan gold pagoda [q.v.] borrowed from the natives. Equivalent to 3½ rupees [naunyam, 2c]. The company continued the term. Same as Star pagoda, but different from Kurruck pagoda. See vol. I, 609.

HOO (हु - hu, *San.*). To offer to fire.——*Homam* (होम - hóma, San.). From (hu, san. to sacrifice). A fire-offering of butter, oil, grain, &c., not flesh; burnt in small pits consecrated to the planets [graham], or some household god [grihadevatay]. Anciently the homam was the offering peculiar to Agny [q.v.] the god of fire, as the somam [hom, somam] juice was peculiar to Indran [q.v.] the god of rain. The largest homam now kept up in the south is that held annually at Aroonagherry or Trinomallee [q.v.]. It is lighted on the hill by fishermen, at the moment when a signal light appears below [matam].——*Hootaushana powrnamy* (హుతాశనపౌర్ణమి - hutáshanapaurnami, Tel.). From (hutáshana, san. agni, the oblation-eater + paurnami, san. a day of full moon). In commemoration of Cauman's burning on that day. Same as Cauman pundigay.——*Hotra* (होत्र - hótra, San.). From (hu, san. to sacrifice). Oblation.——*Hotry* (होतृ - hótri, San.). Rig veda [q.v.] priest.

HOO (ಹೂ - hú, *Can.*). Flower [poo].——*Hoovinhadgully* (ಹೂವಿನಹಡಗಲ್ಲಿ - húvinahadagalli, Can.). See sep. title.——*Hoory* (ಹೂವಿ - húvi, Can.). From (húvu, can. flower). Hill-tribe female proper name [peyar].

HOODHOOD (هد هد - hudhud, *Ar.*; مرغ سلیمانی - murghi-sulaimání, *Pers.*; هد هد - hudhud, *Hind.* and *Dec.*; కుక్కురుగువ్వ - kukkuruguvva, *Tel.*; പുഴുകൊത്തി - puzhukotti, *Mal.*). Ar. from its call. Pers. from (murgh, pers. bird + sulaimán, ar. solomon); the having shielded him from the sun. Tel. from (kukkuru, tel. sound + guvva, tel. bird). Mal. from (puzhu, mal. insect + kottu, mal. to peck); from picking up insects for food. Ar. also (aburrabí), meaning father of spring; from its appearing in that season. Tel. also (kondepitta), meaning crest + bird. Upupidæ family, tenuirostres, insessores, aves [pacshy, 18], of naturalists

[jantoo]. Hoopoes. European hoopoe is upupa epops; mussalmans venerate it; voice loud, double or treble hoop; found on neilgherries. Indian hoopoe is upupa nigripennis; alias upupa senegalensis; similar, but smaller, distinguished by generally darker hue of rufous of head and crest, no white on crest; when feeding, crest is depressed; flight undulating and vigorous; call a deep whoot.

HOOKAH (حقہ - hukkah, *Hind.*). From arabic. Meaning a receptacle. An apparatus for smoking consisting of a box in which the tobacco [pogauk] burns, a vessel of water through which the smoke passes, and a long pliant pipe through which it is conveyed to the mouth. An elaborated hubble-bubble [q.v.]. The following is a Hindostany proverb:—گنگی جورو بھلی گنگا ناریل نہ بھلا—"A dumb wife is better than a dumb pipe;" for unless the hubble-bubble makes a noise it is not worth smoking. Hookah burdar, from (bardár, pers. carrier), is the servant who prepares the pipe for smoking.

HOOLY (ಹುಲಿ - huli, *Can.*). Tiger [pooly].——*Hooliculll droog* (ಹುಲಿಕಲ್ಲುದುರ್ಗ - hulikalludurga, Can.). From (above + kallu, can. rock + durga, san. hill-fort). Sanscrit name (bakásura-parvata), meaning the demon, so called + mountain. Village, Hill; Neilgherry dist., Merkoonaud division; pop. 1,938; lat. 11° 19′; long. 76° 53′; height about 6,000 feet; from Coonoor S.E. 2 miles; from Ootacamund S.E. 11 miles. One of principal eminences on S. side of plateau. Separated from Coonoor ghaut [q.v.] by Coonoor river. Diversified with scarp and crag, relieved with bright green foliage in each hollow. Its base is covered with rich tropical forest, gradually passing into stretches of waving bamboo [q.v.]. Much primeval forest, above the elevation of three or four thousand feet, has been destroyed and its place supplied by coffee [q.v.] plantations. The old fort commands the Coonoor ghaut and the low country. Used by Tippoo sultan, and it is one of the three principal forts of the Neilgherries, with Oodayaroyacottah and Mailcottah [q.v]. Near this place was a large five-celled dolmen [coday cull], profusely sculptured. Since destroyed. The village near is Nidimund. The village lies at foot of peak. It contains a shrine dedicated to Rama [q.v.] at which Badagas [q.v.] worship. Coffee and cinchona [koinah] estate here, 120 acres.

HOOMA (هما - humá, *Hind.*). Phœnix, a bird of happy omen, as it is supposed that every head it overshadows will wear a crown [hamsam].——*Hoomayoon* (همايون - humáyún, Hind.). From (above + yún, pers. like). Prefixed to an alam forms a lacab; as Hoomayoon ally, ally the auspicious; Hoomayoon jah, auspicious in pomp and dignity [ism].——*Hoomayoon nauma* (همايون نامہ - humáyúnnámah, Hind.). From (humáyún, pers. auspicious + námah, pers. work). Turkish edition of Punchatantram [hitopadesh, punchatantram].

HOOMMA (ହୁମ୍ମା - humma, *Oor.*). Means horse [ghorah, goorram]. Ancient zemindarry, Village; Ganjam dist.; pop. 3,862; acres 5,120; lat. of village 19° 26′; long. 85° 07′; from Berhampore E.N.E. 20 miles; from Chetterpore N.N.E. 7 miles; from Russellcondah S.E. 44 miles; from the sea W. 5 miles. Near Ganjam. Smallest zemindarry [q.v.] in district. Contains thirteen villages, some of which are in the Tiroostaunam khandam of Berhampore talook. Formerly in thick jungle. To protect travellers Capilendra deo, king of Orissa, appointed one Madana mohana samanto to be zemindar [q.v.] with the title of Saumanta roya mahapatro, A.D. 1228. Peshcush [q.v.] is Rs. 1,038.

HOONDEE (هنڈی - hundí, *Hind.*; హుండి - hundi, *Tel.*; உண்டி - undi, *Tam.*). From (hund, san. to collect). Not connected with Hoon [q.v.]. A written order purchased from a sowcar [q.v.] in one place for the payment by a specified sowcar in another place of a specified sum of money; a bill of exchange written in the vernacular.——*Hoondauvany* (هنڈاونی - hundávaní, Hind.). Commission on a cheque.

HOONRAUJ (هنراج - hunráj, *Hind.*; اندراينی - indráiní, *Dec.*). Dec. from (indráyan, hind. citrullus colocynthis, schrad.); from use of seeds as emetic. Hind. also (drob). Title otherwise Armstrong, Beggar-weed, Common knot grass, Crab grass, Crab-weed, Iron grass, Ninety knot [hurrially], North american door-weed, Pink-weed, Sparrow tongue [paula indigo], Swine's grass, Wire grass [wild raggy]. Botanically Polygonum [water gannair] aviculare, linn., polygonaceæ [vricsham, 110]. Root fibrous, long, very tough, and somewhat woody; branched below, simple at the crown; stems several, spreading in every direction, generally prostrate, much branched, round, striated, leafy at the numerous knots or joints; leaves alternate, stalked, hardly an inch long, elliptic or lanceolate, entire, obtuse, single-ribbed, smooth except at the margin, tapering at the base, very variable in width, substance rather coriaceous, color greyish or glaucous; flowers variegated with white, crimson and green; seeds acutely triangular, of a shining black. Dried root anodyne; seeds emetic and purgative.

HOONSOOR (ಹುಣಸೂರು - hunasúru, *Can.*; húnsúr, *Mys. Gov.*). From (hunase, can. tamarindus indica, linn. + úru, can. village). Can. also (gádipálya), meaning cart village. Town in 12° 18′ N. lat., 76° 19′ E. long., on right bank of the Lutchmanateertam, 25 miles west of Mysore. Head-quarters of Hoonsoor talook, Mysore district, Mysore.

HOORMAT (حرمت - hurmat, *Ar.*). From (haruma, ar. sacred). Respect. Prefixed to an alam forms a lacab; as Hoormat hoossain, honor of ally. Also an alam; as Hoormat bauno, alam + alaumat [ism]. Cf. Moharram.

HOOSAUM (حسام - husám, *Hind.*). From (hasama, ar. to cut). Sword. Part of lacab; as Hoosaum ood deen, the sword of the faith; Hoosaum ood dowla, the sword of the kingdom [ism].

HOOSSAIN (حسين - husain, *Hind.*). From (husn, ar. beauty). Common alam; as Hoossain ally, double alam; Hoossain khan, alam + alaumat [ism]. The historical Hoossain was one of the grandsons of Mahomet by his daughter Fatimah and his cousin Ally [q.v.]. It is to commemorate the martyrdom of him and his companions that the moharram [q.v.] anniversary is celebrated. The death occurred on Friday 10th Moharram [maheena], Hijra [q.v.] 61, or 9th of October A.D. 680. His familiar name was Aboo abdoollah, and he is occasionally styled Syed oosh shohdah, the prince of martyrs. Cf. Hassan. Hoossainy are a class of Mahomedans of the syed [q.v.] sect tracing their pedigree to Hoossain. Cf. Cyanecula suecica (husainipiddá), beautiful black robin; Tchitrea paradisi (husainíbulbul), beautiful black boolbool; see gloss. paragraphs.

HOOT (मेदस्तिमि - médastimi, *San.*; حوت - hút, *Ar.*; ಹೆದ್ದಲೆಮೀನು - heddaleminu, *Can.*; తిమి - timi, *Tel.*; തിമിംഗിലം - timinnilam, *Mal.*; பெருந்தலைத்திமிங்கிலம் - perundalait-timingilam, *Tam.*). Title from arabic. San. from (médas, san. fat + timi, san. whale). Can. from (hedda, can. huge + tale, can. head + mínu, can. fish). Tel. from sanscrit. Mal. from (timi, san. whale + gila, san. devourer); large whale. Tam. from (perum, tam. large + talai, tam. head + timingilam, tam. whale). Title otherwise Cachelot, Sperm whale. Euphysetes macrocephalus, physeteridæ, cetacea, mammalia [sastanam, 30], of naturalists [jantoo]. The Hoots have an enormous head with numerous teeth in the lower jaw, the upper teeth being concealed in the gums. The upper part of their huge heads is cellular, and the cavities are filled with the fatty substance, becoming hard when cool, known as spermaceti, for which they are chiefly hunted. The substance called ambergris [meen amber] is a concretion found in their intestines. These are not whale-bone whales [timingilam]. Found in the Bay of Bengal. The hoots are without symmetry, of a prevailing dull black color, occasionally marked with white, especially on the abdomen and tail. They propel themselves round by striking and pulling against the water with the flashes of their tails. They spout a thick watery mist from the nostrils at intervals of 10 or 15 minutes. Spermaceti, the cetaceum of chemists, is white, tasteless, inodorous, crystalline, insoluble in water; it is separated from the oil by filtration and pressure, and afterwards purified and cast into cakes; these are of a white color, have a peculiar lustre, are transparent, brittle, smooth, but not greasy; smell peculiar, but weak; spermaceti makes a soap [sauboon] with potash [jharka namak]. It burns with a brilliant flame. Euphysetes simus is the Great-nosed cachelot; it has less spermaceti. For the fin-whale see Timingilam. For a constellation of this name see Nacshatram.

HOOVINHADGULLY (ಹೂವಿನ ಹಡಗಲ್ಲಿ - húvinahadagalli, *Can.*; హువ్విన్నహడగళి - huvvinahadagali, *Tel.* huvinahadgalli *). From (húvu, can. flower + hadagalli, can. place so called) [hoo]. So called because flowers were once grown and exported.——(1) Talook, Bellary district. Tahsildar's pay Rs. 150. Area 585 square miles. Population 80,521. Language Canarese. N.W. of district. In shape an irregular parellelogram with an average length of 32 miles and a breadth of 20 miles. Bounded on N. and W. by Toongabudra, on S. by Hurpanhully talook, and on E. by Hospett and Coodligy talooks. The talook is in general flat with a gradual fall to the north. There are a few small and unimportant hills in the south near Adavimullankerey. The soil is chiefly of the red and mixed description, and only about 9 per cent. of the total area is black soil. Very little of it is irrigated. The principal products are cholum [q.v.], raggy [q.v.], sadza [bajrah], corra [tinay], oil-seeds [yennay], cotton [q.v.], gram [q.v.], and other pulses [dholl]. Cholum is the principal crop. The grain exported is sent chiefly to Chitvaudigy, whence it finds its way to the Nizam's territory and to Bellary. The cotton goes to Moondrigy market. Rice [q.v.] from Mysore and wheat [geung] from Dharwar are the only imported grains. Excellent betels [q.v.] and plantains [q.v.] are grown. At Batchigondanahully, Humpasaugar, and Tamrahully, silk cloths [puttoo] are woven. Those made at the last-mentioned place being of superior quality. The only rivers are the Toongabudra and the Hagary, which must be distinguished from the river of the same name which falls into the Toongabudra lower down. There is an anicut [q.v.] across the Toongabudra at Vallabhapooram, and there is a small anicut across the Hagary near Tamrahully. The only large tanks are those of Chintarapully, Hireyhadgully, and Magimauvinahully. There are good camping grounds at Hireyhadgully, Hoovinhadgully, and Tamrahully, and travellers' bungalows at Ballahoonsy and Humpasaugar. Places of archæological interest:—Angore,

Cogaly, Combaly, Cottanacull, Cuttibinnore, Hireyhadgully, Hollal, Hoovinhadgully, Maugalam, Meilaura, Moradagherry, Rungapooram, Sogy, Tamrahully, Vallabhapooram. Principal trig. stations:—Auneycullgoodda, Bettada mullappa, Rameshwarabandy. The leading places, &c., in the talook are the following.——*Auneycullgoodda* (ಆನೇಕಲ್ಲುಗುಡ್ಡ - ánékallugudda, Can.). From (áne, can. elephant + kallu, can. rock + gudda, can. hill). Trig. station; lat. 15° 02′ 35·57″; long. 76° 20′ 44·65″; height 2,378 feet; from Aunecull E. 2 miles; from Bellary W. 41 miles.——*Bettada mullappa* (ಬೆಟ್ಟದಮಲ್ಲಪ್ಪ - bettadamallappa, Can.). From (betta, can. hill + mallappa, can. proper name). Trig. station; lat. 14° 55′ 38·57″; long. 76° 00′ 24·65″; height 3,177 feet; from Bellary W.S.W. 65 miles; from Hoovinhadgully S.S.E. 7 miles.——*Chinna hagary* (చిన్నహగరి - chinnahagari, Tel.). See sep. title.——*Chintarapully* (చింతరపల్లి - chintarapalli, Tel.). From (chintaráya, can. proper name + palli, tel. village). Village; pop. 589; acres 6,877; lat. 15° 02′; long. 76° 16′; from Bellary W.S.W. 47 miles; from Hoovinhadgully E. 20 miles. Contains a large tank.——*Cudlebaul* (ಕಡ್ಲೆಬಾಳು - kadlebálu, Can.). From (kadle, can. bengal gram, cicer arietinum, linn. + bálu, can. growth). Village; pop. 1,176; acres 8,923; lat. 15° 5′; long. 76° 15′; from Bellary W.S.W 48 miles; from Hoovinhadgully E.N.E. 17 miles. On the Hagary.——*Hireyhadgully* (ಹಿರೇಹಡಗಲ್ಲಿ - hiréhadagalli, Can.). From (hiri, can. great + hadagalli, can. place so called). Village; pop. 3,118; acres 5,528; lat. 14° 56′; long. 75° 53′; from Bellary W. 74 miles; from Hoovinhadgully S.W. 9 miles. Beautifully carved blackstone temple of Culleshwara and several large inscribed stones.——*Holalgondy* (ಹೊಲಲಗೊಂದಿ - holalagondi, Can.). From (hole, can. bright + gondi, can. alley). Village; pop. 2,807; acres 11,132; lat. 15° 02′; long. 76° 03′; from Bellary W. 62 miles; from Hoovinhadgully E. 5 miles. Shiva temple on a rock near the village.——*Hollal* (ಹೊಳಲು - holalu, Can.). From (hole, can. brightness). Village; pop. 2,572; acres 7,589; lat. 14° 50′; long. 75° 45′; from Bellary W.S.W. 80 miles; from Hoovinhadgully S.W. 19 miles. Carved statue of Ananta shayana sawmy.——*Hoovinhadgully* (ಹೂವಿನಹಡಗಲ್ಲಿ - húvinahadagalli, Can.). See below.——*Humpasaugar* (ಹಂಪಸಾಗರ - hampaságara, Can.). From (hamparasayya, can. proper name + ságara, san. ocean). The Toongabudra passes by the village. Sanscrit name (pampáságara). Village; pop. 3,713; acres 4,792; lat. 15° 09′; long. 76° 05′; from Bellary W. 58 miles; from Hoovinhadgully N.E. 11 miles. On Toongabudra. Silk cloths woven. Travellers' bungalow.——*Maugalam* (మాగళం - mágalam, Tel.). From (má, tel. great + kallamu, tel. threshing floor). Village; pop. 2,091; acres 10,284; lat. 15° 00′; long. 75° 50′; from Bellary W. 76 miles; from Hoovinhadgully W. 10 miles. On Toongabudra. Temple of Vengopaulsawmy. Another older temple deserted. There is a Jeina temple still used for worship.——*Meilaura* (ಮೈಲಾರ - mailára, Can.). From (malla, san. name of a demon + ari, san. enemy + pura, san. town). Sanscrit name (malláripura), meaning town of mullaury or shiva, the enemy of mullan [q.v.], the giant. Village, Place of pilgrimage; pop. 2,750; acres 4,087; lat. 14° 48′; long. 75° 44′; from Bellary W.S.W. 85 miles; from Hoovinhadgully S.W. 23 miles. Close to the Toongabudra. An important Shiva temple. 50,000 pilgrims resort at the annual festival in February. There is a special custom at the feast in the utterance of a prophetic sentence annually by a child or man supposed to be inspired by the deity.——*Rameshwarabandy* (ರಾಮೇಶ್ವರಬಂಡಿ - ráméshvarabandi, Can.). From (ráméshvara, san. ráma the lord + bande,, can. rock). Trig. station; lat. 15° 12′ 20·57″; long. 76° 12′ 08·65″; from Bellary W. 50 miles; from Hoovinhadgully N.E. 20 miles.——*Tamrahully* (ತಂಬ್ರಹಳ್ಳಿ - tambrahalli, Can.). From (támbra, can. copper + halli, can. village). Copper vessels were once manufactured. Village; pop. 2,492; acres 3,445; lat. 15° 09′; long. 76° 13′; from Bellary W. 48 miles; from Hoovinhadgully E.N.E. 18 miles. Has a large channel and a small anicut across the Hagary. Vishnoo temple on a rock. Silk cloths woven. Fine well called Sooley bhauvy.——*Toongabudra* (తుంగభద్ర - tungabhadra, Tel.). See sep. title.——**(2)** Village, Talook head-quarters; Bellary dist., Hoovinhadgully tal.; pop. 4,441; acres 4,890; lat. 15° 01′; long. 75° 59′; from Adony W.S.W. 96 miles; from Bellary W. 64 miles; from Hospett W.S.W. 35 miles; from Hurpanhully N.N.W. 17 miles; from Madras W.N.W. 317 miles; from Tadpatry W. 139 miles. Built on open ground and considered very healthy. Temple of Keshava sawmy. Two temples were discovered, hidden by the walls of the fort, when the latter was dismantled in 1866.

HOPE ISLAND (కోరంగిదివి - kórangidivi, *Tel.*). Vernacular means coringa island. Island, Lighthouse; Godavery dist., tal. Cocanada division; pop. 25 included in Coringa; lat. 16° 49′; long. 82° 22′; from Cocanada S.S.E. 11 miles. A small sand bank above water formed by the discharge of the silt of the Godavery at its mouth. East of Coringa [q.v.] and 2 miles E. of the mouth of Coringa river.

HOPPER (அப்பம் - appam, *Tam.*). Tam. from (appu, tam. to clap with the hand). Unleavened cakes of rice [q.v.] flour and cocoanut [q.v.] milk. Resembling the wheaten choopatties [q.v.] of Upper india.

HORAH (होरा - hórá, *San.*). From the greek. One-twenty-fourth of natural day, European hour [caulam, ghuntay, ghurry].

HORN FISH (سینگی مچھی - síngímaççhí, *Hind.*). Same as Gar-fish [colah].

HORSE (گھوڑا - ghorá, *Hind.*; குதிரை - kuthirai, *Tam.*). Prefix.——*Horse grass* (കുതിരപ്പുല്ല് - kutirappullu, Mal.). Same as Keshinee.——*Horse keeper* (گھوڑےوالا - ghorewálá, Hind.; గుర్రపువాడు - gurrapuvádu, Tel.; குதிரைக்காரன் - kuthiraikkáran, Tam.). From (gurramu, tel. horse + vádu, tel. man). Tam. from (kuthirai, tam. horse + káran, tam. possessor). Term used in Madras and Ceylon for groom. In Northern india, syce [q.v.]. In Bombay ghorawallah [q.v.].

HORSLEYCONDAH (హార్సిలికొండ - hársilikonda, *Tel.* horsley-konda *). From Mr. Horsley, a former Collector. Tel. also (énugamallammakonda), meaning elephant + mullammah, proper name + hill. Hill; Cuddapah dist., Madanapully tal.; lat. 13° 39′; long. 78° 27′; from Cuddapah south 63 miles; from Madanapully N.W. 9 miles to foot. One of the highest peaks in Madanapully talook. There is a valley full of trees, and two bungalows [q.v.] belonging to district officers. The climate is adapted for a sanitarium, being free from fever, and from 10 to 12 degrees cooler than the country below. Well wooded. Cut up into narrow valleys which are but little cultivated. Samber [q.v.], pig [soor] and bears [ricsham] are found in the ravines [hill-station].

HOSA (ಹೊಸ - hosa, *Can.*). New [poothoo]. Prefix in place names; as Hospett.——*Hosangady* (ಹೊಸಂಗಡಿ - hosangadi, Can.). From (above + angadi, can. shop). Hind. name (haidargarh), meaning hyder's fort.—"*a*" Village; South canara dist., Coondapore tal.; pop. 375; lat. 13° 42′; long. 75° 00′; from Coondapore E.N.E. 18 miles; from Mangalore N.N.E. 58 miles; from the sea E. 20 miles.—"*b*" Pass; South canara dist., Coondapore tal.; lat. 13° 43′ N.; long. 75° 1′ E. On route between Bednore and Malabar coast. Much used in the campaigns with Tippoo sultan. Practicable for carts as far as head of water communication with coast. Good road into Mysore.——*Hosdroog* (ಹೊಸದುರ್ಗ - hosadurga, Can.; പുതിയകോട്ട - putiyakótta, Mal.). Can. from (above + durga, san. fort). Mal. means same. A small town in the village of Caunjangaud, Sub-port, Deputy tahsildar's station, Hill; South canara dist., Cassergode tal.; pop. 4,581; lat. 12° 18′; long. 75° 08′; from Cannanore N. 36 miles; from Cassergode S. 15 miles; from Coondapore S.S.E. 95 miles; from Mangalore S.S.E. 41 miles; from Oodipy S.S.E. 75 miles; from Poottore S.S.W. 31 miles; from the sea E. 1½ miles. On route from Cannanore to Mangalore. Large ruined fort built by an Ikkairy [q.v.] rajah [q.v.]. Temple and bungalow [q.v.].——*Hospett* (ಹೊಸಪೇಟೆ - hosapéte, Can.). See sep. title.

HOSPETT (ಹೊಸಪೇಟೆ - hosapéte, *Can.* hospet *). From (hosa, can. new + péte, can. suburb) [hosa].——**(1)** Talook, Bellary district. Tahsildar's pay Rs. 175. Area 540 square miles exclusive of the Sundoor jagheer [q.v.], which contains 145 more. Population 92,512. Language chiefly Canarese. N. of district. Bounded on the north by the Toongabudra and Nizam's territory, east by Bellary talook, south by the Coodligy talook, the Sundoor jagheer and the Mysore territory, on the west by Hoovinhadgully talook. Formerly known as Cumply talook. In 1851 head-quarters were moved from Cumply to Hospett. The Sundoor jagheer, formerly included in Coodligy talook was in 1832 transferred to Hospett talook, and has since been declared to be an independent native state. The principal natural features are the parallel ranges of hills bounding the Sundoor valley, which run through the talook from north to south, finishing abruptly at Hospett. Some of the higher plateau of these ranges have an elevation of 3,000 feet. There are smaller detached ranges, one commencing near Paupinaickhully and going on to Darojee and another starting from Camalaupooram and passing by Bookkasaugaram to Metry. The slopes of these hills are well-wooded and most of the fuel consumed in Bellary is brought from them. The western half of the talook has a more open aspect. The soil is throughout rich. About 4 per cent. is black cotton [regar] soil, but in the west the red predominates. Cholum [q.v.] being the staple food of the agricultural classes, the surplus rice [q.v.] of the talook is very largely exported to Adony, Bellary, and to Moondrigy in the Dharwar district. In return cholum, gram [q.v.] and wheat [geung] are sent into the markets of Chitvaudigy, Cumply, and Narraindevarakery from the Nizam's country and from Hurpanhully and Dharwar. The chief industrial pursuits are the weaving of silk [puttoo] and cotton [q.v.] cloths, known all over the district by their thickness; the manufacture of brass [pittalay] and copper [taumram] vessels at Hospett; and the iron foundaries at Camalaupooram, Hospett and Chilacanhutty, where the caldrons used in sugar-boiling are made. The iron-ore [auhan] is procured from the Ramandroog hills. The Toongabudra flows along the northern side of the talook. It is crossed at intervals by anicuts [q.v.] from which six irrigation channels [q.v.] are led off. The only tanks [q.v.] of any size are at Auvinmadoogoo, Camalaupooram, Danaickenkery, and Darojee. Camping grounds:—Antapore, Camalaupooram and Cumply.

Places of archæological interest:—Ananta shayana goody, Caderampooram, Callirampooram, Kishkindyay, Malpangoody, Moopangoody, Nimbaupooram, Odrahully, Sancalaupooram, Timmapooram, Vijianugger. Principal Trig. stations:—Jamboonauta, Timmapooram. The leading places, &c., in the talook are the following.——*Ananta shayana goody* (ಅನಂತಶಯನಗುಡಿ - anantashayanagudi, Can.). Means temple of vishnoo who has anantan, the serpent for his couch. Village; pop. 631; acres 847; lat. 15° 17′; long. 76° 27′; from Bellary W.N.W. 35 miles; from Hospett E.N.E. 1½ miles; from Camalaupooram S.W. 5 miles. Large ruined temple of great architectural interest.——*Antapore* (అంతాపురము - antápuramu, Tel.). From (anantayya, tel. proper name + pura, san. city). Village; pop. 1,333; acres 2,809; lat. 15° 06′; long. 76° 46′; from Bellary W. 14 miles; from Hospett E.S.E. 24 miles. Situated among hills.——*Auvinamadoogoo* (ಆವಿನಮಡುಗು - ávinamadugu, Can.). From (ávu, tel. cow + madugu, can. pond). Village; pop. 1,207; acres 3,287; lat. 15° 05; long. 76° 47′; from Bellary W.S.W. 13 miles; from Hospett E.S.E. 26 miles. Contains a tank.——*Belagodehaul* (ಬೆಳಗೋಡುಹಾಳು - belagóduhálu, Can.). From (bilu, can. white + kódu, can. hill top + hálu, can. waste land). Village; pop. 873; acres 2,197; lat. 15° 26′; long. 76° 39′; from Bellary N.W. 29 miles; from Hospett E.N.E. 19 miles. Contains a channel.——*Bella* (ಬೆಲ್ಲ - bella, Can.). Means jaggery. Channel; one of the Toongabudra channels. Its head is just above the village of Hosoor. It is an old native work of rough stone concave towards the stream, and only extends from the right bank to an island in the river. At the south of this island there is a ledge of rock forming a natural anicut [q.v.].——*Bookkasaugaram* (బుక్కసాగరము - bukkaságaramu, Tel.). From (bhukka, san. name of a king + ságara, san. ocean). Village; pop. 1,124; acres 3,455; lat. 15° 21′; long. 76° 35′; from Bellary W.N.W. 30 miles; from Hospett E.N.E. 12 miles. The Ramsaugar anicut is built near this. It is an old native work of rough stone.——*Callirampooram* (కల్లిరాంపురము - kallírámpuramu, Tel.). From (kalli, can. milk hedge, euphorbia tirucalli, linn. + rámpuramu, tel. place so called). Sanscrit name (rámapura), meaning rama's town. Village built during the reign of Ramrauz of the Vijianugger family; pop. 553; acres 294; lat. 15° 18′; long. 76° 25′; from Bellary W.N.W. 38 miles; from Hospett N.N.W. 2 miles.——*Camalaupooram* (కామలాపురము - kámalápuramu, Tel.). See sep. title.——*Chitvaudigy* (ಚಿತ್ತವಾಡಿಗಿ - chittavádigi, Can.). From (chitti, can. small + vátike, can. garden). Sanscrit name (chitravátiká), meaning beauty + garden. Town; pop. 3,278; acres 607; lat. 15° 17′; long. 76° 25′; from Bellary W.N.W. 37¼ miles; from Hospett N.W. 1½ miles. Many of the leading merchants of Hospett town live there. Market of western Bellary talooks and for goods from Nizam's dominions, every Saturday. Roya channel from Toongabudra runs through town.——*Cumply* (ಕಂಪಲಿ - kampali, Can.). See sep. title.——*Danaickenkery* (ಧನಾಯಕನಕೆರೆ - dhanáyakanakeri, Can.). From (dhanáyaka, can. proper name + kere, can. tank). Village; pop. 1,095; acres 4,975; lat. 15° 08′; long. 76° 24′; from Bellary W. 37 miles; from Hospett S. 9 miles. Large tank.——*Darojee* (ದರೋಜಿ - daróji, Can.). From (darú, hind. tank). Village; pop. 2,620; acres 9,796; lat. 15° 16′; long. 76° 42′; from Bellary W.N.W. 19 miles; from Hospett E. 18 miles. Large tank famous for fish, constructed under Tippoo. The bund [q.v.] breached in 1851, and greater part of village destroyed. Small travellers' bungalow [q.v.] on tank-bund.——*Dhanaupooram* (ధనాపురము - dhanápuramu, Tel.). From (dhana, san. wealth + pura, san. town). Village; pop. 1,245; acres 454; lat. 15° 19′; long. 76° 28′; from Bellary N.W. 34 miles; from Hospett N.E. 5 miles. Near Humpy.——*Hoscote* (ಹೊಸಕೋಟೆ - hosakóte, Can.). From (hosa, can. new + kóte, can. fort). Village; pop. 151; acres 553; lat. 15° 15′; long. 76° 22′; from Bellary W.N.W. 39 miles; from Hospett W. 5 miles. Near the Cooradagudda anicut.——*Hosoor* (ಹೊಸೂರು - hosúru, Can.). From (hosa, can. new + úru, can. village). Village, Place of pilgrimage; pop. 1,574; acres 3,126; lat. 15° 18′; long. 76° 24′; from Bellary W.N.W. 39 miles; from Hospett N.W. 3 miles. Annual festival.——*Hospett* (ಹೊಸಪೇಟೆ - hosapéte, Can.). See below.——*Humpy* (ಹಂಪಿ - hampi, Can.). See sep. title.——*Jambconauta* (ಜಂಬುನಾಥ - jambunát'ha, Can.). From (jambu, san. the tree, eugenia jambolana, lamk. + nát'ha, san. lord); epithet of a Jeina arhat [q.v.]. Trig. station; lat. 15° 13′ 41·57″; long. 76° 28′ 14·65″; height 2,980 feet; from Bellary W. 33 miles; from Hospett S.E. 4 miles; from Jamboonautanahully S.E. 2 miles.——*Metry* (మెట్రి - metri, Tel.). From (metta, tel. rising ground). Village; pop. 1,333; acres 5,288; lat. 15° 19′; long. 76° 40′; from Bellary W.N.W. 23 miles; from Hospett E. 15 miles.——*Mooddapooram* (ముద్దాపురము - muddápuramu, Tel.). From (mudda, tel. maiden + pura, san. town). Village; pop. 1,535; acres 3,715; lat. 15° 25′; long. 76° 43′; from Bellary N.W. 25 miles; from Hospett E.N.E. 22 miles.——*Narraindevarakery* (ನಾರಾಯಣದೇವರಕೆರೆ - náráyanadévarakeri, Can.). From (náráyanadévaru, can. proper name + kere, can. tank). Town; pop. 4,701; acres 5,878; lat. 15° 11′; long. 76° 21′; from Bellary W. 41 miles; from Hospett S.W. 8 miles. The chief town of a jagheer [q.v.] resumed in 1837. Parts of fort walls remain. Fine tank. District moonsif's court.——*Nimbaupooram* (నింబాపురము - nimbápuramu, Tel.). From (nimba, san. margosa tree, melia azadirachta, linn. + pura, san. town). Village; pop. 94; acres 312; lat. 15° 20′; long. 76° 32′; from Bellary W.N.W. 32 miles; from Hospett N.E. 8 miles. Formerly an Agrahauram [q.v.]. About a mile east lies an oval-shaped heap of calcareous scoria, apparently artificial. Bramins consider it the ashes of bones of giant Vauly [q.v.], killed here by Rama [q.v.] on his expedition to Ceylon.——*Paupinaickhully* (ಪಾಪಿನಾಯಕನಹಳ್ಳಿ - pápináyakanahalli, Can.). From (pápináyaka, can. proper name + halli, can. village). Village; pop. 804; acres 4,624; lat. 15° 14′; long. 76° 32′; from Bellary W.N.W. 29 miles; from Hospett E. 7 miles. Railway station.——*Sanaupooram* (సానాపురము - sánápuramu, Tel.). From (shána, san. grind stone + pura, san. town). Village; pop. 905; acres 1,868; lat. 15° 26′ 30″; long. 76° 41′; from Bellary N.W. 28 miles; from Hospett N.E. 21 miles.——*Suncalaupooram* (సంకలాపురం - sankalápuram, Tel.). From (sankala, san. collection + pura, san. town). Sanscrit name (kótivináyakapura), meaning crore + the belly-god, the obstacle-remover + town. Village; pop. 174; acres 609; lat. 15° 17′; long. 76° 44′; from Bellary W.N.W. 18 miles; from Hospett E. 19 miles.——*Soogunhully* (ಸೂಗನಹಳ್ಳಿ - súganahalli, Can.). From (súganna, tel. proper name + halli, can. village). Village; pop. 557; acres 4,212; lat. 15° 17′; long. 76° 44′; from Bellary N.W. 18 miles; from Hospett E. 20 miles.——*Timmapooram* (తిమ్మాపురము - timmápuramu, Tel.). From (timmaya, tel. proper name + pura, san. town). Trig. station; lat. 15° 20′ 33·57″; long. 76° 36′ 10·65″; height 2,133 feet; from Bellary W.N.W. 27 miles; from Hospett E.N.E. 13 miles; from Canvitimmapooram S.W. 1 mile.——*Toongabudra* (తుంగభద్ర - tungabhadra, Tel.). See sep. title.——**(2)** Town, Talook and Divisional head-quarters, Railway station; Bellary dist., Hospett tal.; pop. 12,878; acres 2,095; lat. 15° 16′; long. 76° 26′; from Adony W.S.W. 65 miles; from Bellary W.N.W. 36 miles; from Hurpanhully N.N.E. 43 miles; from Madras W.N.W. 302 miles; from Tadpatry W.N.W. 110 miles. On high ground. Hill behind town called Joladaraushy, or heap of cholum, from shape. Head assistant collector stationed here. Town improved in 1866 by levelling fort wall and filling up ditch. One fine temple at end of main street. Interesting Mahomedan tombs outside town. Inhabitants chiefly weavers, but brass and copper vessels are made. Ruins of old town Trimaldevipooram are near.

HOURI (حور - húr, *Hind.*). Nymph of paradise, with Mahomedans.

HOWDAH (هودج - haudah, *Hind.*). From (haudaja, ar. to be high). Seat fixed on elephant [q.v.]. A kind of box with low sides and no top, and holds several persons.

HOWZ (حوض - hauz, *Hind.*). From (háza, ar. to collect water). Reservoir, especially in mosque [musjid] for ablutions.

HOY (ಹೊಯಿ - hoyi, *Can.*). To strike.——*Hoysala ballaula* (ಹೊಯಿಸಳಬಲ್ಲಾಳ - hoyisalaballála, Can.). From (above + sala, can. the founder of the family + ballála, can. the family); from the incident of his killing a tiger [pooly] with an iron staff. See Ballaula.

HUBBLE-BUBBLE (حقه - hukkah, *Hind.*). Title from sound. Ordinary kind of hookah [q.v.]. The tobacco, or a mixture containing tobacco [pogauk] among other things, is placed with embers in a terracotta chillum [q.v.], from which a reed carries the smoke into a cocoanut [q.v.] shell half full of water, and the smoke is drawn through a hole in the side, either without any kind of mouth-piece, or with a long tube, and making a gurgling sound.

HUDD (حد - hadd, *Hind.*). From (hadda, ar. to prevent). Limit, whether of place or time [avadhy].

HUKK (حق - hakk, *Hind.*). From (hakka, ar. to be right). Truth. A just claim; attribute of God [allah].——*Hakeekat* (حقيقت - hakíkat, Hind.). From (hakk, ar. right). Statement. The final stage of absorption [soofee].——*Hakeeyat* (حقيت - hakíyat, Hind.). From (hakk, ar. right). Right, share, proprietorship.——*Hookook* (حقوق - hukúk, Hind.). Plural from hukk. Rights.

HUKKA (ಹಕ್ಕ - hakka, *Can.*). Short for (hariga), which in turn is colloquial for Hariharan [q.v.]. Proper name.

HULCAUR (اهلكار - ahlikár, *Hind.*). Servant [ahlecaur].

HULDEE (هلدى - haldí, *Hind.*). From (haridrá, san. turmeric) [haran]. Same as Country saffron.

HULLA (ಹಳ್ಳ - halla, *Can.*; பள்ளம் - pallam, *Tam.*). Lowland. Suffix in place names [pullam].——*Hully* (ಹಳ್ಳಿ - halli, Can.; பள்ளி - palli, Tam.). Hamlet. Suffix in place names [milly, pully, villy].

HUMMAUM (حمام - hammám, *Hind.*). From (hamím, ar. hot water). Bath, especially hot or steam bath.

HUMPY (ಹಂಪಿ - hampi, Can.). From (hampu, can. proud); the magnificent city. Sanscrit name (pampákshétra), place of preservation; also (virúpákshapura), meaning the mis-shapen-eyed shiva + town. Village, Place of pilgrimage; Bellary dist.

Hospett tal.; pop. 354; acres 848; lat. 15° 20′; long. 76° 30′; from Bellary W.N.W. 33 miles; from Hospett N.E. 7 miles. On right or south bank of Toongabudra. Main street parallel with river is lined with temples and palaces. Very sacred. For bathing in Toongabudra at a certain conjunction of the planets [graham] vast numbers assemble. Near are ruins of ancient city of Vijianugger [q.v.], covering with Camalaupooram on the south and Anagoondy a space of nearly 9 miles, the most remarkable monument in S. india. During the two and a quarter centuries that the Vijianugger rajahs held the city of Humpy, they extended it and beautified it with palaces and temples. Edoardo Barbessa describes the capital as "of great extent, highly popu-"lous, and the seat of an active commerce in country diamonds "[vajram], rubies [laul] from Pegu, silks [puttoo] of China and "Alexandria and cinnabar [shangarf], camphor [q.v.], musk "[custoory], pepper [q.v.], and sandal [q.v.] from Malabar. The "palaces of the king and his ministers and the temples are "described as stately buildings of stone, but the greater part of "the population lived in hovels of straw and mud." In the travels of Cæsar Frederic, the palace is thus spoken of:—"I have seen "many kings' courts, yet have never seen anything to compare "with the royal palace of Vijianugger, which hath nine gates. "First, when you go into that part where the king lodged, there "are five great gates, kept by captains and soldiers. Within "these are four lesser gates, which are kept by porters, and "through these you enter into a very fair court at the end." He describes the city as being 24 miles round, enclosing several hills. The ordinary dwellings were mean buildings with earthen walls, but the three palaces and the pagodas [q.v.] were all built of fine marble [shalavay cull]. Nicolo di Conti A.D. 1420 says it is 60 miles in circumference. Bartema says that it is very like Milan. Of the remains of all this greatness little is now visible. Many of the buildings are so destroyed that it is difficult to say what they were originally meant for. Amongst the ruins however are found particularly fine specimens of Indian architecture. The massive style of architecture and the huge stones that have been employed in their construction specially attract attention. The principal buildings to be noted are the following:—the palace buildings, including council room, concert hall, zenana [q.v.], elephants' stables [aunesaul], three towers, and the queen's bath; the temple of victory or Hazaur rama, so called from containing 1,000 figures of rama, temple of Maulyavanta runganauta sawmy; temple of Vittala; the pagoda [q.v.] at Humpy itself; a small temple west of that of Vittalsawmy, with two historical inscriptions; temple of Shree pampaupatysawmy with fine blackstone sculptures and inscriptions and group of Jeina temples south of same; temple of Krishnasawmy; temples of Atchootanarayanasawmy; large monolithic statue of Narsimhan [q.v.]; temple of Hazaur rama and two pavilions west from same; temple of Gaunagitty and temple of Puttaubhy ramasawmy near Camalaupooram; houses in Humpy bazaar of archæological interest. Veishnava, Sheiva and Jeina temples are found in close proximity, and on many temples sculptures of both the first two mixed together. Some of the Jeina temples are constructed in a northern style. The elephant [q.v.] stables consist of a long row of chambers domed over, the centre one having a double storey over it. The architecture is of the mixed Hindoo and Mahomedan style. The temple of victory is about 300 yards to the south-west of the palace buildings in a quadrangle, 110 feet from north to south and 200 feet from east to west. The bas-reliefs on the exterior of the walls are singularly characteristic, and the long rows of horses [ghorah], elephants, camels [ottagam], soldiers, spirited dancing women, &c., may have led to the name given to the building. The adytum of the interior is supported on four elaborately-carved black basaltic [caroompalingoo cull] columns. The throne consists of a succession of platforms, the outer walls of which are carved in relief with elephants, camels, dancing girls. It is about 600 yards south of the palace buildings. The total height of the platform is 31 feet, and there are signs on its summit of a pavilion having existed. Inside this mound is a staircase which is partly blocked up. It goes by the name of Mahanavamy [q.v.] dibba [q.v.] or Dusserah [q.v.] dibba. The queen's bath about 150 yards south-east of the throne is a building 78 feet 5 inches square in plan, with a reservoir in the centre 50 feet 9 inches square and 6 feet deep. The corridor has an arched ceiling richly carved with foliated ornament in plaster, and over the bath, on each of the four sides, is a projecting window with three openings. The temple of Maulyavanta runganauta sawmy is about 1½ miles north-east of the travellers' rest-house and stands in a walled enclosure on a rocky hill. There are three gopoorams [q.v.] of the usual Dravidian style of architecture. A mantapam [q.v.] inside is the best architectural feature of the place and is very picturesque with its carved masonry columns. The temple of Vittala or Vittoba is a very fine example of the Dravidian style. In some respects it is as remarkable a specimen as any to be found in Southern india, though less in extent than those at Chidambaram, Rameshwaram and Sheerungam. It is situated on the right bank of the river on a level spot above the reach of any flood, and nearly opposite to the ruins of a bridge, begun but never completed, to connect Vijianugger with Anagoondy. The site of the temple is very picturesque. Behind it are piles of naked granite [caroom cull] rocks of all imaginable forms, stretching westwards to the town of Humpy in a succession of rugged hills. To the north and east are still more lofty eminences of the same formation, all connected with each other, rising into pinnacles of naked tors and loggan stones, and extending down the river to Anagoondy. Immediately in front of the temple, and between it and the river, is a small plain, in part cultivated, and interspersed with trees, which combine with the river and the rocky hills around to form a constant succession of romantic landscapes. Entering by the gateway, which is lofty and in the style peculiar to Vijianugger, is seen an area enclosed by a ruined piazza in the usual monolithic style of construction, intended as shelter for visitors to the shrine. A little to the left of the gateway is a separate smaller temple in the same style of construction as the large one, and between it and the larger edifice is the stone car [rath]. This car is composed of only one stone, most probably a boulder existing on the spot. The upper portion has been restored with a moderate degree of success. A considerable portion of the porch at the each side of the temple was blown away by Tippoo sultan after a vain endeavour to raze the temple by manual labor. A portion of the roof in the centre of the building was also destroyed without however displacing the pillars, or injuring the stability of the edifice. The richness and beauty of the interior is remarkable. In Hindoo temples in general, black hornblende [shalavay cull] rock or green stone [putchay cull] is most usually found as the material of the pillars, which from its color gives a sombre effect to the whole; but in this instance the material is wholly the granite of the locality, which is a creamy, or in some instances a pinkish, white, and as a consequence the interior of this temple, besides having an ample supply of light from without, has a peculiarly cheerful and elegant appearance, while the finish of the figures, flowers, and patterns of all kinds is not less perfect than that of the black stone of other localities. Some of the pillars have been polished with emery or corundum [q.v.], others are prepared for polish and are as smooth as marble. Many have been cut into forms of dragons or lions, with female figures on their backs, interspersed with foliage and smaller figures, ornamented and relieved by rows of separate pillars cut from the same block of stone, which are perfectly unique in design. The larger pillars have four of these columns on each face, others have three or two, the basement they appear to rest on being supported by sitting lions. The heavy eaves are huge blocks of granite, fluted inside and surmounted by a string course of stone, on which is a curious pattern of wolves' [konye] heads in pairs, open mouthed, above which the turrets and other pinnacles are of masonry, plastered. The basement is also peculiarly handsome, and the execution of the stonework and its joints wonderfully perfect. The shrine in this great temple was never filled. The legend of it, which is not an exaggerated one, is that in the plenitude of their power the rajahs of Vijianugger determining to bring the holy image of Krishnan which is at Punderpoor to Vijianugger, built this temple to exceed in beauty everything before created in the Deccan [q.v.], so as to receive it; but the design was never accomplished owing probably to the decadence of the kingdom. Local tradition ascribes the erection of the porch to Atchoota roya, A.D. 1529—1542, or more probably to the usurper Ramrauz during his tenure of power. The pagoda at Humpy itself is dedicated to Viroopaucshan or Shiva, and covers a large area, which is filled by courts containing other shrines, reading rooms, &c., with several Bramins' dwellings. It has only one enclosure and two gateways. Krishna deva royel of Vijianugger is said to have built the edifice in the fifteenth century out of the booty which he obtained on conquering the Chola rajahs of Conjeeveram. The door to the vimaunam [q.v.] has some handsome brass-work with hammered ornament. The temple of Hazaur rama, built in A.D. 1513, has a Jeina figure on the outside of the vimaunam wall. The monolithic statue of the Narsimha avatar [q.v.] close by was hewn, as an inscription states, in A.D. 1529. The Gaunagitty temple, a Jeina shrine, built according to an inscription by Hariharan in A.D. 1385, is in excellent preservation. An interesting group of the Vijianugger ruins is situated in the valley that separates the ground of Humpy proper from Kishkindyay, the sacred land of the Rajah vauly, and of the deeds of the heroes of the Ramayanam [q.v.]. Kishkindyay comprises the area of the hills on the opposite side of the valley, which are a wild congeries of fantastic naked granite rocks, with narrow valleys between, some of these being watered by channels from the main irrigation stream. In one of these is shown the place where the body of Rajah vauly was burned and where his wives performed suttee [q.v.] with him. It is a bed of very white carbonate of lime [choonam], which, as the ashes of the dead, serve to attest the event to all true pilgrims. Here Hanooman [q.v.], of the Ramayanam was born, and here also many of his descendants live in the shape of large grey apes [lungoor], which abound among the rocks and ruins. Here too are believed to be existent evidences of the truth of his feats in the piles of rocks which lie on the plains. These are said to have been brought by his legions from the Himalaya in relays to fill up the sea from Rameshwaram to Ceylon, where the armies of Rama were to cross. There is an outlying line of fortification 8 miles from Humpy on the Bellary road. Anagoondy was formerly a suburb of Vijianugger and was the family dwelling place of the chiefs. It has been identified with the Kongkien-an-pu-lo or Concanapooram of Hwen Thsang. Camalaupooram was another suburb.

HURPANHULLY (ಹರಪನ ಹಳ್ಳಿ - harapanahalli, *Can.* harpanahalli*). From (harappa, can. proper name + halli, can. village) [haran]. Sanscrit name (harapura), meaning shiva's town.——(1) Talook, Bellary district. Tahsildar's pay Rs. 150. Area 611 square miles. Population 82,241. Language Canarese. W. of district. Situated in the extreme west of the district. Bounded by Hoovinhadgully talook on the north; Mysore territory on the south; Coodligy talook on the east; Toongabudra river and Mysore province on the west. It is intersected by low ranges of hills. The principal of these runs from Adavimullankerey to Chigatairy, a distance of 10 miles, and thence is connected by isolated hills with the Mysore tableland. The principal crops are zonna [cholum], raggy [q.v.], corra [tinay], cotton [q.v.] and oil-seeds [yennay], and on irrigated land sugar-cane [q.v.] and paddy [q.v.]. These are exported to Dharwar and Moondrigy in the Bombay presidency and to Hurrihur and Chitaldroog in Mysore. Rice [q.v.] is imported from Dharwar and the better irrigated talooks of Mysore. Most of the people live by agriculture, but there is a small trade in cotton and piece-goods which find a market at Ootchangy droog. At Hurpanhully, copper [taumram], brass [pittalay], and ornamental metal [loham] vessels are made, and the manufacture of wooden toys carried on. The Toongabudra flows along a small part of the western frontier. The largest part of the talook is under dry cultivation. There are only four tanks, Arsikerey, Baugaly, Hagranore and Neelgoonda, capable of irrigating an ayacut [q.v.] of over 200 acres, and no advantage has been taken of the Toongabudra for river channels [q.v.]. There are nine other tanks capable of irrigating between 100 and 200 acres, the largest of which is at Coontsore. Camping grounds:—Arsikerey, Halavaugal and Neelgoonda. Travellers' bungalow [q v.] at Hurpanhully. Places of archæological interest:—Arsikerey, Baugaly, Bennihully, Chigatairy, Chikka calganacuttey, Chirtahully, Chittenahully, Coolahully, Coorvutty, Doogavutty, Garbhagoody, Goodihully, Goondagutty, Halagilvauda, Halavaugal, Harivy, Hariyammanahully, Hurpanhully, Masalvauda, Mauchahully, Maudalgherry, Munnaira masalvanda, Neelgoonda, Ootchangy droog, Raugy masalvauda. Principal Trig. stations:—Garbhagoody, Narsimha devargoodda. The leading places, &c., in the talook are the following.——*Arsikerey* (ಅರಸೀಕೆರೆ - arasikere, Can.). From (arasi, can. a queen + kere, can. tank). Village; pop. 1,694; acres 4,103; lat. 14° 40′; long. 76° 07; from Bellary W.S.W. 65 miles; from Hurpanhully S.S.E. 10 miles. Tank.——*Baugaly* (ಬಾಗಳಿ - bágali, Can.). Village; pop. 1,397; acres 3,796; lat. 14° 50′; long. 76° 01′; from Bellary W.S.W. 66 miles; from Hurpanhully N. 4 miles. Tank. Sculptured temple of Cauleshwarasawmy near tank bund.——*Chigatairy* (ಚಿಗಟೇರಿ - chigatéri, Can.). From (chiguru, can. blossom + éri, can. tank). Village; pop. 2,314; acres 8,472; lat. 14° 49′; long. 76° 08′; from Bellary W.S.W. 60 miles; from Hurpanhully E.N.E. 8 miles. Small particles of gold [pon] are found at the foot of a hill.——*Chinna hagary* (చిన్నహగరి - chinnahagari, Tel.). See sep. title.——*Coontsore* (ಕುಂಚೂರು - kunchúru, Can.). From (kuncha, can. a fly brush + úru, can. village). Sanscrit name (chámarapura), meaning chowry + town. Village; pop. 1,524; acres 4,848; lat. 14° 44′; long. 75° 52′; from Bellary W.S.W. 78 miles; from Hurpanhully W.S.W. 12 miles. Large tank.——*Coorvutty* (ಕುರುವತ್ತಿ - kuruvatti, Can.). From (kuri, can. sheep + hatti, can. sheep fold). Sanscrit name (nandikunda), meaning the bull-god + sacred pool. Village, Place of pilgrimage; pop. 1,439; acres 5,524; lat. 14° 47′; long. 75° 45′; from Bellary W.S.W. 84 miles; from Hurpanhully W. 18 miles. Car festival about February. Cattle fair held on the occasion is noted. Fort on bank of Toongabudra.——*Garbhagoody* (ಗರ್ಭಗುಡಿ - garbhagudi, Can.). From (garbha, san. interior + gudi, can. temple). Village; pop. 257; lat. 14° 43′; long. 75° 48′; from Bellary W.S.W. 82 miles; from Hurpanhully W.S.W. 15 miles. Old fort on a hill. Trig. station in lat. 14° 43′ 46·97″; long. 75° 50′ 25·30″.——*Goodihully* (ಗುಡಿಹಳ್ಳಿ - gudihalli, Can.). From (gudi, can, temple + halli, can, village). Village; pop. 257; lat. 14° 39′; long. 76° 07′; from Bellary W.S.W. 65 miles; from Hurpanhully S.E. 11 miles. Formerly the village was built within precints of Shiva temple. Now deserted and village is ½ mile from original site.——*Hagranore* (ಹಗರನೂರು - hagaranúru, Can.). From (hagara, can, proper name + úru, can. village). Village; pop. 590; acres 3,528; lat. 14° 56′; long. 75° 54′; from Bellary W. 72 miles; from Hurpanhully N.W. 13 miles. Large tank.——*Halavaugal* (ಹಲ್ವಾಗಲು - halvágalu, Can.). From (hallu, can. ivory + bágalu, can. door). Sanscrit name (dantadvára), meaning ivory + door. Village; pop. 2,069; acres 10,457; lat. 14° 43′; long. 75° 49′; from Bellary W.S.W. 82 miles; from Hurpanhully W.S.W. 15 miles. Near Toongabudra.——*Hurpanhully* (ಹರಪನಹಳ್ಳಿ - harapanahalli, Can.). See below.——*Narsimha devargoodda* (ನರಸಿಂಹದೇವರಗುಡ್ಡ - narasimhadévaragudda, Can.). From (narasimhadévaru, can. the man-lion god + gudda, can. hill). Sanscrit name (narasimháchala), meaning the same. Trig. station; lat. 14° 40′ 13·57″; long. 76° 05′ 03·65″; height 2,544 feet; from Bellary W.S.W. 67 miles; from Hurpanhully S.S.E. 9 miles; from Timmalaupooram W.N.W. 1¼ miles.——*Neelgoonda* (ನೀಲಗುಂಡ - nílagunda, Can.). From (níla, can. proper name, nílávati + gunte, can. tank). Sanscrit name (nílávatipattana), meaning neelauvaty's city. Village; pop. 1,161; acres 3,318; lat. 14° 44′; long. 75° 56′; from Bellary W.S.W. 74 miles; from Hurpanhully W.S.W. 7 miles. A flourishing town some centuries ago. Temple of Ananta shayanan and that of Bheemeshwaran on the tank bund [q.v.] are of great antiquity. The latter is profusely sculptured. There is a large tank.——*Ootchangy droog* (ಉಚ್ಚಂಗಿದುರ್ಗ - uççangidurga, Can.). See sep. title.——*Toongabudra* (తుంగభద్ర - tungabhadra, Tel.). See sep. title.——(2) Town, Talook head-quarters; Bellary dist., Hurpanhully tal.; pop. 7,842; acres 9,829; lat. 14° 47′; long. 76° 02′; from Adony W.S.W. 104 miles; from Bellary W.S.W. 67 miles; from Hospett S.S.W. 43 miles; from Madras W.N.W. 312 miles; from Tadpatry W. 136 miles. During the last century the seat of a powerful poligar [q.v.]. The founder of the family was a Boy [q.v.] by caste and Taliyary [q.v.] by profession. On subversion of Vijianugger he seized two small districts near Hurpanhully. One of his successors married daughter of Poligar [q.v.] of Chitaldroog, and received as dowry talook of Ootchangy droog. The last of the line was Somashekhara naick, who died without issue in 1766. At this time the poligar was paying peshcush [q.v.] to the Nizam, to Moraury row of Gooty, and the Peshwah [q.v.]. The widow adopted. In 1786 Hurpanhully was taken by Tippoo sultan, and the poligar and his three sons captured and sent to Seringapatam. One of his followers escaped and having joined the army of the Mahratta purseram bhow, was set up by him as poligar. He was expelled in a few days by a detachment sent against him by Tippoo, but he returned during the second Mysore war and made himself master of Hurpanhully. He surrendered in 1800 to General Harris, by whom he was recognised as poligar. This surrender was due to the influence of the Diwaun [q.v.] Hamparasayya, who was rewarded with a jagheer [q.v.] in the Hospett talook. The fort has been deserted and is said to be haunted by a late Tahsildar [q.v.], M. Bheema row, who took up arms in 1857 and was killed at the storm of Kopala. A colony of Jeinas has settled in the town.

HURRIALLY (दूर्वा - dúrvá, *San.*; करली - karalí, *Mahr.*; जिर्बांकुर - jirbánkura, *Conc.*; دوب گنیر - dúbganer, *Hind.*; هریالی - hariyálí, *Dec.*; ಗರಿಕೆ - garike, *Can.*; ಕಡಿಕೆಪಂತಿ - kadikepanti, *Too.*; గరిక - garika, *Tel.*; കറുക - karuka, *Mal.*; හෙලිතණ - helaítana, *Singh.*; அறுகு - arugu, *Tam.*). Title from deccany [haran]. San. from (durv, san. to injure); as devoured by cattle; also from sharp blades; must not be confounded with darbhay, a synonym of the celebrated coosham [q.v.] grass. Hind. from sanscrit. Dec. from (hará, hind. green). Can. from (gari, can. to fall upon). Mal. from tamul. Tam. from (aru, tam. to cut); from curing virtue. San. also (rasála), meaning juice giving [mango, sugar-cane]; (bhárgaví), meaning pertaining to bhrigoo; (aurva), meaning pertaining to bhaurgavan, born from thigh; (sahasravíryá), meaning very powerful; (anantá), meaning endless [common nail dye, indian sarsaparilla]; (shataparviká), meaning hundred-knotted; (gólómí), meaning earth's hair strictly the white variety [vashamboo]. Hind. also (janíwá); (dúb) to be distinguished from (dáb). Can. also (karike); (ambatíhullu). Tel. also (tellagarika), meaning white + the grass; (garakanattu), meaning garikay, the grass + nutt [q.v.]. Mal. also (muyalpullu), meaning hare + grass; (velikkaruka), meaning sacrificial + the grass. Tam. also (muyarbui), meaning hare + grass, forms food of hares; (angusóli), meaning goad-like, from leaves. Greek ἄγρωστις. Title otherwise Bahama grass, Bent grass, Bermuda grass, Conch grass, Creeping cynodon, Creeping panic grass, Dog grass, Dog's tooth grass, Doob, Doorvay, Hare grass, Hundred-knotted grass [hoonraj], Linear bent grass, Panic grass [purple grass, tinay]. Botanically Cynodon dactylon, pers., graminaceæ [vricsham, 156]. Alias Agrostis bermudiana, cynosurioides, linearis; Chlolis maritima, cynodon; Cynodon linearis, maritimus, occidentalis, portoricensis, stellatus; Dactylon officinale; Digitaria dactylon, linearis, stolonifera; Fibichia umbellata; Milium dactylon; Panicum dactylon, lineare; Paspalum praecox, umbellatum, dactylon; Vilfa linearis. Culms creeping, with flower-bearing branchlets, erect, 6–12 inches high, smooth; leaves small; spikes three to five, terminal, sessile, secund, 1–2 inches long; rachis waved; flowers alternate, single, disposed in two rows on the under side; calyx much smaller than the corolla; exterior valves boat-shaped, keel slightly ciliate. A very nutritious creeping grass; all its stems, which lie near the ground, take root, and by this means, though an annual plant, it spreads; here it constitutes three-fourths of the pasture; it is when cultivated, of most luxuriant growth in the hottest time of the year; with shade, such as light bushes or straw strewed over it, it rises like a creeper 5 or 6 feet high, and when chopped up it will take root. Its merits, its lowly gesture, its spreading quality, give it a frequent place in native poetry; it is sacred to ganesh [q.v.], probably on account of its great tenacity of life. When cultivated, freely manured and irrigated, produces from six to eight crops in the year; like most other meadow grasses, should be cut immediately the flower begins to appear; in this state the juices of the grass are more nutritious, and the hay is superior than when made from the fully-matured plant. The juice of the green grass is a remedy for dysentery; decoction of roots and young leaves is used in fever. The most nutritious fodder for horses [ghorah] and cows [pashoo]. There is a Tamul proverb:—ஆனையும் அறுகம்புல்லிஞல் தடைபடும்—

"Even an elephant [q.v.] may be impeded by aroogoo;" that is to say, by a small thing. Other common species are:—gracilis, virgatus.——*Barren hurrially* (ಬಂಜೆಗರಿಕೆ - banjegarike, Can.). Same as Wild hurrially.——*Gum hurrially* (ಅಂಟುಗರಿಕೆ - antugarike, Can). Same as Small raggy.——*Wild hurrially* (ಬಂಜೆಗರಿಕೆ ಹುಲ್ಲು - banjegarikehullu, Can.; தினை - tinai, Tam.). Can. from (banje, can. barren + garikehullu, can. bent grass, cynodon dactylon, pers.). Tam. from (tin, tam. to eat). Botanically Panicum [priyangoo] burmanni, retz., graminaceæ [vricsham, 156]. Alias Echinochloa hirtella; Oplismenus burmanni; Orthopogon albus, brasiliensis, burmanni, humboldtianus; Panicum album, bromoides, hirtellum. Culms creeping, branched, extremities erect; leaves lanceolate, waved hairy; sheaths half the length of the joints, very hairy; spikes compound, secund, erect; spikelets four to eight, alternate, secund, adpressed; flowers generally paired, one sessile, the other pedicelled; glumes hairy, long-awned; generally found under the shade of trees; cattle eat it, and makes fair hay [ghaus].

HUTTY (هٹی - hattí, *Hind.*; ಹಟ್ಟಿ - hatti, *Can.*; பட்டி - patti, *Tam*). Cattle-pen. Herds man's residence. Suffix in place names [putty].

HYDER (حيدر - haídar, *Ar.*). Lion [hamza, hizabr, safder, shere]. Lacab of ally, the son-in-law and companion of Mahomet. Common alam. Feminine form is Hydary; as Hydary begum, alam + alaumat [ism].——*Hyder ally* (حيدرعلى - haídaralí, Hind.). Double alam. The Mysore ruler; born about 1700; assumed the raj, 1761; negotiated with Council of Bombay, 1763; met the English in battle, September 26, 1767, and November 8; Amboor besieged by Hyder, November 1767; Shingaricottah taken from Hyder on February 12, 1767; Salem on March 20; Krishnagherry on May 2; Vencatagherry on June 10; Moolbaugal on June 28; Oossoor on July 11; Annecull, July 13; Mangalore, March 1, 1769; Honnore on March 25; advanced on Madras, March 29, 1769; treaty signed with English, April 4, 1769; repeatedly defeated in 1781 and in 1782; died, December 7, 1782 [charitram]. See vol. I (180) to (183), 20. Vol. II, 63, 71, 102.——*Hyderghur* (حيدرگڑھ - haidargarh, Hind.). Means hyder's fort. Fort not now in existence; South canara dist., Coondapore tal.; lat. 13° 43′; long. 75° 03′; from Coondapore E.N.E. 22 miles; from Mangalore N.N.E. 60 miles; from the sea E. 24 miles; from Poottore N.N.W. 67 miles.——*Hyder's tree* (حيدر كا جهاڑ - haidarkájhár, Hind.). Same as Mysore thorn.

HYE (حى - haí, *Hind.*). From (hai, ar. to live). Living. As an attribute of God means deathless [allah]. Common alam; as Abdool hye, slave of the living [ism].——*Hayaut* (حيات - hayát, Ar.). From (hai, ar. to live). Life. Said to be created on the tenth day of Moharram [q.v.].—"*a*" Common alam; as Hayaut bee, alam + alaumat; Hayaut khan, alam + alaumat [ism].—"*b*" Plant second term. Ex., where translation is of first term:—Clitoria ternatea (darakhtibíkhihayát), tree; Sphæranthus indicus (zakhmihayát), wound. See gloss. paragraphs.

I (इ - i, ई - í, *San.*; ا - i, *Pers.*; இ - i, ஈ - í, *Tam.*). San. short, symbol of Cauma devan [cauman]. San. long, symbol of Candarpan, god of love [manmatan]; and of Lutchmy [q.v.]. Sign of the Persian genitive case; as Adawlut i auliya, high court.

IBEX HILL (ಮುತ್ತುಬೆಟ್ಟ - muttubetta, *Can.*). From (muttu, can. upright post + betta, can. hill). Hill; Neilgherry dist., Todanaud div.; lat. 11° 21′; long. 76° 35′; from Ootacamund W.S.W. 11 miles. Bluff-like eminence near head of Seegore pass [ghaut].

IBHARANCOOSHA (ज्वरांकुश - jvaránkusha, *San.*; कंबेलो - kambraló, *Conc.*; اذخر - izkhir, *Ar.*; گورگياه - gorgiyáh, *Pers.*; ابهرن کشا - ibharankushá, *Hind.*; ಕರಿಲಾವಂಚ - karilávancha, *Can.*; ಕರಿಮುದ್ಯಲ - karimudyala, *Too.*; వాసనగడ్డి - vásana-gaddi, *Tel.*; കൊടിപ്പുല്ല് - kotippullu, *Mal.*; காமாட்சிப்புல் - kámádchippul, *Tam.*). Title from sanscrit through hindostany. San. from (jvara, san. fever + ankusha, san. goad); febrifuge. Ar. from (zakhara, ar. provision); as forage for camel. Pers. from (gor, pers. camel + giyáh, pers. hay). Can. from (kari, can. black + lávancha, san. andropogon muricatus, retz.). Too. means black cuscus. Tel. from (vásana, san. fragrance + gaddi, tel. grass). Mal. from (koti, mal. creeper + pullu, mal. grass). Tam. from (kámákshí, san. the goddess + pul, tam. grass); really appears to be corruption from (kámanchi, tel. the grass) [indian grass, lemon grass, roussa grass]. San. also (lámajjaka), meaning destroying sap from correcting bad blood [cuscus]. Ar. also (tibulgharíb), meaning wonderful fragrance. Hind. also (rusá) [roussa grass, stunted jack]. Tel. also (nimmagaddi), meaning lemon, citrus medica, linn., var, limonum, brandis + grass [lemon grass]. Title otherwise Black cuscus, Camel hay, Fever grass. Botanically Andropogon [beard grass] iwarancusa, roxb., graminaceæ [vricsham, 156]. Specific name from hind. Alias Cymbopogon iwarancusa. Root perennial, fibrous; culms erect, 3-6 feet, smooth, filled with a light spongy substance; leaves near the root longer than the culm-points, margins hispid, otherwise smooth; panicles axillary and terminal, consisting of numerous fascicles of pedicelled, thin, five-jointed spikes, with a spathe to each pair of spikes; flowers on the rachis in pairs, one awned, sessile, the other one awnless, male, and pedicelled; the terminal florets are three, one hermaphrodite, two male; glumes two, one-flowered, with which the rachis and pedicels are woolly at the base; native of himalayas. Roots have agreeable aromatic taste, with certain degree of bitterness; medicinally stomachic.

IBN (ابن - ibn, *Hind.*). From arabic. Son. Coonyat [ism].

IBRAHIM (ابراهيم - ibráhím, *Hind.*). From hebrew, father of the multitude. Abraham. Patriarchal alam; as Ibrahim beg, alam + alaumat [ism].——*Ibrampatam* (ఇబ్రహాముపట్టణము - ibrahámupattanamu, Tel.). From (ibráhím, hind. proper name + pattana, san. town). Town; Kistna dist., Bezwada tal.; pop. 1,578; acres 8,480; lat. 16° 35′; long. 80° 33′; from Bezwada N.W. 8 miles; from Masulipatam N.W. 48 miles. On northern bank of the Kistna below Condapully range. Favorite residence of Ibrahim cootb shah of Golcondah, A.D. 1530 to 1580. Many allusions in Ferishta to Ibrahim's gardens. Travellers' bungalow [q.v.].

IBRAT (عبرت - ibrat, *Hind.*). From (ibr, ar. to admonish) [itibar]. Example. Part of lacab; as Ibrat jung, an example in war [ism].

IDREES (ادريس - idrís, *Ar.*). Enoch. Mahomedan alam; generally taken by the Saits; as Idrees sait [ism].

IFTAUR (افطار - iftár, *Hind.*). From (fatara, ar. to break) [fitr]. Breaking fast [roza]. Eating at sunset daily during the Ramzaun month [maheena]. Also the ceremony of breaking the fast at the end of that month [eed ool fitr].

IFTIKHAR (افتخار - iftikhár, *Ar.*). From (fakhara, ar. to glory). Pride. Prefixed to alam makes a lacab; as Iftikhar hoossain, pride of hoossain; Iftikhar ool moolk, ornament of the state [ism].

IJAURA (اجاره - ijárah, *Hind.*). From (ajr, ar. hire). A contract, lease [gootta]. Ijauradar is a contractor [goottadar, moostajar]. There is a hindostany proverb:—اجاره اجاڑا—"farming is famishing."

IJAUZ (اعجاز - ijáz, *Ar.*). From (ajiza, ar. to lack strength); as proving the weakness of the adversary. Miracle. Prefixed to alam makes lacab; as Ijauz hoossain, miracle of hoossain [ism].

IJMAH (اجماع - ijmá, *Hind.*). From (jama, ar. to collect) [jamaut, jumma]. The concordant decisions of the companions of Mahomed and of the general assemblies on matters theological, civil and criminal; received by the Soonnees [q.v.] as a third source of legal authority, after Koran [q.v.] and Soonnat [q.v.].

IKRAR (اقرار - ikrár, *Hind.*). From (karra, ar. to settle) [caraur, istikraur]. Fixing firmly. Ikrarnauma is a deed of acknowledgment.

IKTIAR (اختيار - ikhtiár, *Hind.*). From (khárah, ar. to choose). Choice, will. Doctrine of free will [takdeer] held by the orthodox mahomedans; that man has been endowed with the capacity to understand God's commands, that he is neither the absolute master of his actions [tafweez] nor bound by fixed immutable decrees [jabr]. Iktiar nauma is a power-of-attorney [adhicaura patrica, mooctiar nauma].

ILANG ILANG (الڠ الڠ - alangalang, *Malay*). Title otherwise Cananga flower tree. Botanically Cananga odorata, h. f. and t., anonaceæ [vricsham, 4]. Generic name from malay. Alias Uvaria odorata. Tall tree; trunk straight; bark smooth, ashy; shoots glabrous; leaves five to eight by two to three inches, most puberulous on the veins beneath, base rounded, margins waved; petiole ½ inch; flowers three inches long, usually ternate, drooping, yellow, odorous; peduncles solitary or several from old scars; pedicles one inch, recurved, hoary, with a few basal and median scaly bract; petals ⅓ inch, base broad, silky when young; carpels about twelve, ½ to ⅓ inch, ovoid or obovoid, black, six to twelve-seeded. An attar [q.v.] prepared from the flowers; frequently blended with pimento [china pepper], orris, rose [gool], tuberose, and jasmine [q.v.] in the preparation of european handkerchief [roomaul] scents.

ILANJY (बकुल - bakula, *San.*; बकुली - bakulí, *Mahr.*; वोवलि - vóvali, *Conc.*; مولسری - molsarí, *Hind.*; کھولسری - gholsarí, *Dec.*; ಪಗಡೆ - pagade, *Can.*; ರೆಂಜಿ - renji, *Too.*; పొగడ - pogada, *Tel.*; ବାଉଳ - baulo, *Oor.*; ഇരഞ്ഞി - iraññi, *Mal.*; මුනමල් - múnamal, *Singh.*; மகிழம் - magizham, *Tam.*). Title from malayalam. San. from (vak, san. to go crookedly). Mahr. and conc. from sanscrit. Dec. from hindostany. Tel. means coral, from fruit. Oor. from sanscrit. Mal. from (ireyu, mal. to murmur); from murmuring noise produced when wind blows upon the tree. Singh. from (muna, singh. face + mal, singh.

flower); cf. generic name. Tam. from (magizh, tam. to rejoice); from fragrance of flower. San. also (késara), meaning filament [kamela, nauga champak, poison bamboo, saffron]; (simhakésara), meaning lion's mane; (anangaká), meaning pertaining to cupid, from odour of flower; (makura), meaning adorned. Hind. also (bakulmolsarí). Dec. also (bholsarí); (tendu) [coromandel ebony]. Can. also (renji), from malayalam; (mugali); (minjulu). Mal. also (ilaññi), by corruption. Tam. also (vagulam), corruption from sanscrit. Title otherwise Adam's apple [adam's apple, sweet lime], Ape-face flower, Buckool, Elengi, Gholsaree, Kaisaram, Magizham, Mogadam, Molsaree, Monkey-face flower, Pogada, Pointed-leaved mimusops, Taindoo [coromandel ebony], Vacoolam, West indian medlar. Botanically Mimusops [csheericay] elengi, linn., sapotaceæ [vricsham, 82]. Alias Mimusops lucida. Elengi from malayalam. Tree, middling size, of slow growth; leaves alternate, oval-lanceolate or oblong, acuminated, glabrous; pedicels shorter than the petioles, many together, one-flowered; calyx eight cleft, in a double series, segments lanceolate, four exterior ones larger and permanent; corolla-tube very short, fleshy, segments in a double series, exterior ones sixteen, spreading, interior ones eight, generally contorted, and converging, lanceolate, and slightly torn at the extremities; berry oval, smooth, yellow when ripe, usually one-celled; seeds solitary, oblong; produces during hot season small white or pale green fragrant flowers which fall in showers, succeeded by the small, egg-shaped yellow one-seeded berries. Celebrated in pooraunnams [q.v.] and placed amongst flowers of paradise [poonyoshadhy]. The substance of the bark is red, it is covered externally by a very thick grey suber on the older branches, which separates in irregular scales, leaving isolated attached portions which consist of five or more distinct suberous layers; the inner surface is red and presents a coarsely striated surface; fracture short, disclosing white specks and stains in the substance of the bark caused by the drying up of the milky juice which it contained when fresh; the taste is bitter, astringent and mucilaginous. Bark medicinally tonic, and antiperiodic; in pharm. non-officinal; water distilled from flowers used in melancholia. Berries have a small quantity of sweetish pulp, sometimes eaten; flowers also eaten. Bark makes a brown color with myrobalans [q.v.]; flowers used as a perfume; grown also for shade; the seed-oil in request by painters [rangh]; an odoriferous water [attar] distilled from the flowers; gives a gum [gond]. Timber close and even-grained, pinkish to reddish brown in color, takes a good polish.——*Foreign ilanjy* (சீமைமகிழம் - shímaimagizham, Tam.). Title from resemblance. Tam. from (shímai, tam. foreign + magizham, tam. mimusops elengi, linn.). Can. also (olay), in use among burghers. Tam. also (pálai), meaning milky tree [dita, edible paulay, eve's apple, ground paulay, monkey-face paulay, nakchiknee silk cotton, naugachampak, pauchonty, paula indigo, paulay silk cotton, tellicherry bark]. Title otherwise Buckool sapota, Bully tree, Iron wood [cassa, chowkmaram, dark vail, deccany deodar, nauga champak, yellow condray]. Botanically Sideroxylon tomentosum, roxb., sapotaceæ [vricsham, 82]. Alias Achras elengioides, tomentosa; Sapota elengioides, tomentosa; Sideroxylon elengioides. Small tree, unarmed; leaves oval, undulated, obtusely narrowed at the apex, younger ones rufous-tomentose; fascicles of flowers axillary, many-flowered; pedicels shorter than the flower and with the calyx silky-pubescent; lobes of the calyx ovate-acute, outer ones broader, corolla twice as long as the calyx; sterile stamens lanceolate-subulate, hispid outside; berry broad ellipsoid, size of an olive [zeitoon], yellow; flowers small, dull white; flowering in the hot season. Fruit made into pickles [chutney] and curries [q.v.]. Wood dull red color, short but straight in the grain and very dense, makes good beams for houses, splits too much to be used for planks; if well seasoned turns well and makes excellent carpenter's planes; sinks in water and corrodes like iron [auhan].

ILAUHEE (الہی - iláhí, *Hind.*). From (iláh, hind. god) [allah]. Divine. Title of era [saca] instituted by Acbar [q.v.], commencing with first year of his reign, A.H. 963, A.D. 1556; it did not obtain currency. He embraced what he called Ilauhee mazhab or divine religion of peace with all the world. The Ilauhee was his gold coin, value Rs. 10; also called Laul e jalauly meaning jalaul's ruby, Jalaul [q.v.] being Acbar's name. Ilauhee guz was Acbar's yard of 41 finger breadths [alavay, 1e]; approximate actual value, 33 inches.

ILAUKA (علاقہ - ilákah, *Hind.*). From (alaka, ar. to hang). Connection, jurisdiction, district [zillah], department.

ILAVA (ഈഴവ - ízhuva, obl.; ഈഴവൻ - ízhuvan, pers. sing.; ഈഴവർ - ízhuvar, pers. pl. *Mal.*). From (ízham, mal. ceylon). Literally Ceylonese [ceylon, eelam]. Tribal-title. These are a branch of a great and wide-spread race of people that occupies South tinnevelly, Travancore, and the Malabar coast as far as the Tooloo country. In the far south on both coasts they are known as Shaunaur [q.v.]; in Central travancore as Ilavar; from Quilon to Paravore as Choganmaur; in Malabar, as far as Calicut, as Teeyar [q.v.]; and still farther north as Billawa [q.v.], a slightly altered form of Ilavar. They immigrated into Malabar from Ceylon, bringing the cocoanut tree along with them. Cf. Dweepar. See vol. II, 99. The Panikkar [q.v.] or artificer is priest of this caste. The special occupation of the Ilavar is the culture of the cocoanut [q.v.] palm, and the manufacture from it of toddy [q.v.] and ardent spirits [arrack]; they are also general agriculturists; some are weavers and boatmen, and a few are petty-traders, teachers, priests, doctors, and such like. Demon worship, especially that of Bhadra cauly [q.v.], is the customary cultus of the tribe, with sacrifices and offerings and devil-dancing like the Shaunaur. Shaustauv [q.v.] and Veerabhadran [q.v.] are also venerated, and the ghosts of ancestors [pitry]. Groves [cauv] of trees stand near the temples, and serpent [cobra] images are common, these creatures being accounted favorites of Cauly. The Ilavar who assemble for festival wear the marks of Shiva [q.v.], a dot and horizontal lines on the forehead, and three horizontal lines of yellow turmeric [country saffron] on the chest. The Ilavar proper follow Makkatoyem [q.v.]. Usually the body is buried, either wrapped in mats, or enclosed in a coffin; but if the deceased had been distinguished for wealth, social position, or great age, the remains are burnt. Total numbers about 20,000 [jauty].

ILAY (इला - ilá, *San.*). From (il, san. to go); flow, draught. Libation to the gods [deva]. Food. Earth, source of giving and feeding; also cow, as giving milk. Also the daughter of Menoo, as the thinking man worshipping the gods; she is the goddess of worship and libation, of refreshment and animation; so also of transformation and development. Also in the pooraunams, a son of Veivaswatan [q.v.], the Noah of the Aryans [q.v.], transformed into a woman. On this son a curse from Shiva [q.v.] and Parvaty [q.v.] rested to the effect that he should become a woman for the crime of intruding on their privacy. This resembles the curse from Noah on Ham. Compare the Greek Tiresias. The story is probably a symbol for a change of opinion in religion, by substituting a feminine power [shacty] in creation for a masculine energy.——*Ilauvritam* (इलावृत - ilávrita, San.). From (above + vrita, san. surrounded). One of the central divisions of Jamboo dweepam [q.v.] or asia. See vol. I (3).

ILL (ఇల్లు - illu, *Tel.*; இல் - il, *Tam.*). House.——*Illacoor* (ഇല്ലക്കൂർ - illakkúr, Mal.). From (above + kúr, mal. share). House share. The private property of a w. coast rajah which descends to his heirs. He relinquishes this property to his nephew or next heir [maroomakkatoyem] upon his giving up one official dignity [staunam] for a higher step. Not that he absolutely gives up all control over it, but this arrangement is made to distinguish and separate it from the public property of the official station he has just held, and to prevent its being claimed by his successor in it [maryauday].——*Illam* (ഇല്ലം - illam, Mal.). House. Especially a Numboory bramin's house in Malabar [mana]. A clan among certain tribes [poolaya] for the purpose of prohibiting marriage therein. Cf. Gotram.——*Illaram* (இல்லறம் - illaram, Tam.). Domestic life [aram].——*Illaricam* (ఇల్లరికము - illarikamu, Tel.). From (above + rikamu, tel. suffix meaning state). Connexion by descent from a common ancestor, marked by bearing same family or house name [illatam]. Cf. Gotram among bramins [q.v.].——*Illatam* (ఇల్లటము - illatamu, Tel.). From (above + áta, tel. stage performance, hence life). Residence of son-in-law permanently at father-in-law's house. A son-in law so living receives in some castes an equal share in the father-in-law's property along with sons [maryauday]. Cf. Dutt.

ILM (علم - ilm, *Hind.*). From (alama, ar. to know). Science [shastram].——*Ilm i ab* (علم آب - ilmiáb, Hind.). Means science of water. Hydraulics.——*Ilm i adab* (علم ادب - ilmiadab, Hind.). Means science of discipline of mind. Science of Polite literature.——*Ilmiakhlauk* (علم اخلاق - ilmiakhlák, Hind.). Means science of manners. Moral philosophy.——*Ilmiaroozy* (علم عروضی - ilmiarúzi, Hind.). Means science of versification. Prosody.——*Ilm i avauz* (علم آواز - ilmiáváz, Hind.). Means science of sound. Accoustics.——*Ilmi balaughat* (علم بلاغت - ilmibalághat, Hind.). Also (ilmibayán). Rhetoric.——*Ilm i basr* (علم بصر - ilmibasr, Hind.). Means science of sight. Optics.——*Ilm i calaum* (علم کلام - ilmikalám, Hind.). Means science of logos. Metaphysics.——*Ilm i coolyaut* (علم کلیات - ilmikuliyát, Hind.). Integral calculus.——*Ilm i falsafee* (علم فلسفی - ilmifalsafí, Hind.). Philosophy.——*Ilm i fikh* (علم فقه - ilmifikha, Hind.). Jurisprudence.——*Ilmi filzaut* (علم فلزات - ilmifilzát, Hind.). Metallurgy.——*Ilm i havah* (علم هوا - ilmihavá, Hind.). Means science of air. Pneumatics.——*Ilm i heivanaut* (علم حیوانات - ilmihaivánát, Hind.). Zoology.——*Ilm i heiyat* (علم هئیت - ilmihaiyat, Hind.). Means the science of outward form of heavens. Astronomy.——*Ilm i hindsa* (علم هندسه - ilmihindasah, Hind.). Means science of figures. Geometry.——*Ilm i hindsa biljabr* (علم هندسه بالجبر - ilmihindasahbiljabr, Hind.). Analytical geometry.——*Ilm i hisaub* (علم حساب - ilmihisáb, Hind.). Means science of accounting. Arithmetic.——*Ilm i ilauhy* (علم الهی - ilmiiláhí, Hind.). Means science of god. Theology.——*Ilm i imaraut* (علم عمارات - ilmiimárát, Hind.). Means science of building. Architecture.——*Ilm i inshah* (علم انشا - ilmiinshá, Hind.). Belles lettres.——*Ilm i jabromoocaubilah*

(علم جبرو مقابله - ilmijabromukábalah, Hind.). Means science of perfective addition and compensative subtraction, because of the frequency of these operations in the reduction of equations. Also (aljabr). Algebra.——*Ilm i jarr i sakeel* (علم جرثقيل - ilmijarrisakíl, Hind.). Means science of heavy base. Mechanics.——*Ilm i jooghraufiyah* (علم جغرافيه - ilmijughráfiyah, Hind.). Geography.——*Ilm i joozyaut* (علم جزيات - ilmijuzyát, Hind.). Differential calculus.——*Ilm i keemiyah* (علم كيميا - ilmikímiyah, Hind.). Alchemy.——*Ilm i kiyaufa* (علم قيافه - ilmikiyáfah, Hind.). Means science of appearance. Physiognomy.——*Ilm i madaniyaut* (علم معدنيات - ilmimadaniyát, Hind.). Mineralogy.——*Ilm i mantik* (علم منطق - ilmimantik, Hind.). Means science of speech. Logic.——*Ilm i masauhat* (علم مساحت - ilmimasáhat, Hind.). Mensuration.——*Ilm i moodan* (علم مدن - ilmimudun, Hind.). Means science of cities. Also (ilmisiyásatimudun), meaning science of government of cities. Politics.——*Ilm i moosallas* (علم مثلث - ilmimusallas, Hind.). Means science of trilateral or triangular figures. Trigonometry.——*Ilm i moosiky* (علم موسيقى - ilmimúsíkí, Hind.). Music.——*Ilm i moosowiry* (علم مصورى - ilmimusawwirí, Hind.). Painting.——*Ilm i nabataut* (علم نباتات - ilminabátát, Hind.). Means science of plants. Botany.——*Ilm i noojoom* (علم نجوم - ilminujúm, Hind.). Means science of stars. Astrology.——*Ilm i raml* (علم رمل - ilmiraml, Hind.). Means science of sand or earth. Also (ilmikhatt) or science of lines. Geomancy.——*Ilm i rasm ool arz* (علم رسم الارض - ilmirasmularz, Hind.). Mathematical geography.——*Ilm i riyauzy* (علم رياضى - ilmiriyází, Hind.). Means science of learning. Mathematics.——*Ilm i tabaee* (علم طبعى - ilmitabaí, Hind.). Natural philosophy.——*Ilm i tasawoof* (علم تصوف - ilmitasawwuf, Hind.). Mysticism.——*Ilm i tashreeh* (علم تشريح - ilmitashríh, Hind.). Anatomy.——*Ilm i tashreehool arz* (علم تشريح الارض - ilmitashríhularz, Hind.). Means science of anatomy of earth. Geology.——*Ilm i taureek* (علم تاريخ - ilmitáríkh, Hind.). Means science of date. History.——*Ilm i tazkira* (علم تذكره - ilmitazkirah, Hind.). Means science of memoir. Biography.——*Ilm i teerandauzy* (علم تيراندازى - ilmitírandází, Hind.). Means science of shooting arrows. Archery.——*Ilm i tibb* (علم طب - ilmitibb, Hind.). Medicine.——*Ilm ool yadd* (علم اليد - ilmulyadd, Hind.). Means science of hand. Palmistry.

IMAUD (عماد - imád, *Ar.*). From (amada, ar. to support). Pillar. Part of lacab; as Imaud ood deen, pillar of religion, Imaud ool moolk, pillar of the state [ism]. Imaud shahy was dynasty [raj] which ruled at Berar from 1484 to 1568 [charitram]. See vol. I, (148); II 252.

IMAUM (امام - imám, *Hind.*). From (amma, ar. to preside). Prelate. The title of the four great doctors of the four orthodox Soonnee [q.v.] sects; Shahfayee, Aboo haneefa, Malik and Hambal. Also the title of the twelve leaders of the Shiah [q.v.] sect. Also given to any religious leader in religious matters, whether the head of all Mahomedans as the caliph [q.v.], or the priest of a mosque [musjid] or the leader in the prayers [namauz] of the congregation. In the Koran [q.v.] Abraham, Isaac, and Jacob are called imaums. Common Mahomedan alam; as Imaum ally, double alam [ism].——*Imaumat* (امامت - imámat, Hind.). The office of imaum. The question of imaumat forms a subject of controversy between the followers of the different sects of Mahomedans.——*Imaumiah* (اماميه - imámiyah, Hind.). The Shiah [q.v.] sect, from their recognizing twelve Imaums in direct hereditary descent from Ally and Fatima, prophet's daughter.

IMAUN (ايمان - ímán, *Hind.*). From the (amn, ar. security) [amaun, ameen]. Faith; according to Mahomedans, interior belief, and exterior confession to six articles of creed, viz., God, angels of god [ferishta], books of God, prophets of God, day of judgment, and predestination [takdeer] to good and evil [islam].

IMAURAT (عمارت - imárat, *Hind.*). From (amara, ar. to dwell). A mansion, public building.

IMMY (இம்மி - immi, *Tam.*). 1,075,200th part of a unit.

IMPERIAL (شاهى - sháhí, Hind.). Prefix denoting superior size and excellence.——*Imperial dove* (رام گهوگهو - rámgghuggú, Hind.; అండిబెల్లగువ్వ - andibellaguvva, Tel.). Hind. from (rám, hind. rama + ghuggú, hind. owl); from cry. Tel. from (andi, tel. kind of metallic vessel + bellaguvva, tel. dove); from brown color of under parts. Hind. also (rájghugghú), meaning king dove. Title otherwise Bronze-winged dove, Ground dove. Chalcophaps indicus, phapinæ, gouridæ, gemitores [pacshy, 30], of naturalists [jantoo]. Alias Columba javanica, superciliaris. Back and wings shining dark emerald green, slightly glossed golden; beneath whole neck, breast and lower parts vinaceous red-brown, paler on lower abdomen; feeds mostly on the ground; flight very rapid; generally seen alone; voice a low plaintive moan. No other common species here.——*Imperial pigeon* (شاهى كبوتر - sháhíkabútar, Hind.). See under Haritaulam.

IMPHEE CANE (ಇಂಪಿಗಿಡ - impigida, *Can.*). Title from canarese, meaning sweet plant. Same as Sweet cholum.

IN (ان - in, *Ar.*). If.——*Insha* (انشا - inshá, Hind.). From (above + shá, ar. please). If it please.——*Insha allah* (انشاءالله - insháalláh, Hind.). If it please God! Ejaculation of Mahomedans.

INAM (انعام - inám, *Hind.*; ఇనాము - inámu, *Tel.*; இனம் - inám, *Tam.*). From (nama, ar. to confer favor). Generally a gift from a superior to an inferior [daunam]. So a grant of land for religious or charitable purposes, made by government. Sometimes given free, sometimes with light quitrent or jody [q.v.]. Same as Maunyam [q.v.]. Technically a Major inam is a whole village [dehaut] or more than one village, and a Minor inam is something less than a village [graumam]. A shrotriem [q.v.] ranks as a major inam; a khandriga [q.v.] as a minor inam. See vol. I, paras. 203 and 204, and the various distinguishing definitions there given. The following is a list of the principal inam tenures past or present of the Presidency, by the names under which they are generally known to the people.——*Acharya pooroosham* (ஆசாரியப்புருடம் - ásáriyappurudam, Tam.). Means priest + man. For the service of head priest [acharry] in a pagoda [q.v.].——*Adhyayanam* (அத்தியயனம் - attiyayanam, Tam.). Means study of sacred books. For reciting Vedas [q.v.] in pagodas [cuttyam, vedavritty].——*Agny poomaun* (அக்கினிப்புமான் - akkinippumán, Tam.). Means fire + man. For dancing before the village goddess with a pot containing fire [gadigey].——*Agrahauram* (அக்கிரகாரம் - akkiragáram, Tam.). A village, or part of a village, occupied by Bramins [q.v.] and held at a favorable rate of assessment [teervay]; sometimes rent-free [bhattavrity, dehaut, kheirauty, shrotriem]. See sep. title.——*Alavan* (அளவன் - alavan, Tam.). Means measurer. Held by village officer, who measures the grain, where the assessment is paid in kind.——*Amaram* (அமரம் - amaram, Tam.). Means the command of one thousand footmen. A grant of land by a poligar [q.v.] on condition of service, such grants being resumable when the grantee fails to perform service [bissoye, mokhausa, oomblikay]. See sep. title.——*Ambalacauran* (அம்பலக்காரன் - ambalakkáran, Tam.). Means councilman. Held by the headmen of villages, particularly of villages inhabited by Shoodras [q.v.]. See sep. title.——*Ambaly* (انبلى - ambil, Hind.). For supplying to the poor thick conjee [q.v.].——*Ambicaur* (امبكار - ambikár, Hind.). For ferryman's service.——*Anaicauran* (அணைக்காரன் - anaikkáran, Tam.). Means anicut-man. For preserving anicuts [q.v.] in good order and for keeping off cattle, &c.——*Anakala* (అనకల - anakala, Tel.). Held by cuttoobuddy [q.v.] peons [q.v.] whose duty it was to carry provisions to village and talook officials.——*Angazaula* (అంగజాల - angadzála, Tel.). Means a sentinel. For distributing water to the fields and collecting ryots [q.v.] for the performance of customary labor [aulotty, coody maraumut].——*Annacauvady* (அன்னக்காவடி - annakkávadi, Tam.). Means cooked rice + shoulder pole. For collecting boiled rice from door to door and feeding beggars [sadauvritty].——*Anna shrotriem* (அணசரோத்திரியம் - anásurôttiriyam, Tam.). Inam villages in which the interest of the inamdar is so many annas [q.v.] out of each rupee [q.v.] of revenue, the rest going to the Government [hissa shrotriem].——*Arasoo caural* (அரசுக்காவல் - arasukkával, Tam.). Means king + police. For performing general police duties [desha cauval, men cauval]. In contradistinction to Grauma cauval [q.v.] or village police.——*Aray* (அறை - arai, Tam.). Means room. For service of storekeeper in pagoda [q.v.].——*Archanay bhaugam* (அருச்சனைப்பாகம் - aruççanaippágam, Tam.). Means worship + portion. For service of poojarry [q.v.] in pagoda [gooroocal, numby].——*Ardha maunyam* (அருத்தமானியம் - aruttamániyam, Tam.). Means half + gift. Land half rent-free.——*Ashoorkhana* (عاشورخانه - áshúrkhánah, Hind.). Means ten-day + house. For maintenance of building in which bier, banners, and insignia used at Moharram [q.v.] are set up.——*Athirvedy* (அதிர்வெடி - athirvedi, Tam.). Means thundering explosion. For discharging rockets during festivals.——*Atsoocauvaly* (అచ్చుకావలి - attsukávali, Tel.). Means recompense + guard. For guarding a tract with the obligation of making good the value of any property stolen.——*Attar* (عطر - itr, Hind.). From arabic. For supplying perfumes to the poligar [q.v.]. See sep. title.——*Aulotty* (ஆளோட்டி - álotti, Tam.). Means man + driver. For collecting ryots [q.v.] for the performance of customary labor [angazaula, coody maraumut].——*Aundy samaudhy* (ஆண்டிசமாதி - ándisamáthi, Tam.). Means an aundy's tomb. For support of tomb [gor] of an Aundy [q.v.].——*Ausaudy* (ఆసాది - ásádi, Tel.). Means musician. For beating a drum [paray] before the village deity [davanday, grauma devatay, pambacauran, pambalam, zaumilica].——*Bady baud* (బడిబాడు - badibádu, Tel.). Means petty + fee. Lands held on favorable assessment generally by Rauchavaur [rancha] caste in Godavery and Kistna.——*Badye* (بڑهى - barhai, Hind.). INAUYAT (عنايت - ináyat, *Ar.*). From (ani, ar. to belong to). Gift [inam]. Prefixed to an alam forms a lacab; as Inauyat ally, gift of ally. Devotional term + alam. Generally a Shiah name [ism]. Inauyat nauma is a deed of gift or exemption.

INCH (انچ - inch, *Hind.*). Measure of rain. That is to say, if the rain were to fall on a level surface which did not absorb it, and from which it could not run off or evaporate, it would form a sheet of water one inch in depth [dookky, padoonoo].

INDAH (ندہ - indah, *Pers.*). Suffix added to Persian infinitive to denote agent [dar]; as Naveesindah, writer.

INDIA (هند - hind, *Hind.*; ಇಂಡಿಯ - indiya, *Can.*; ఇండియ - indiya, *Tel.*; ഇന്ത്യ - indya, *Mal.*; இந்தியா - indiyá, *Tam.*). From sanscrit Sindhoo or river indus, of which the persians made Hindoo. Greeks called it ἡ ἰνδική, sc. γῆ, Ionian Greeks dropping the aspirate. So latin India. The sanscrit name proper is Bhaurata varsham [jamboo dweepam], divided into khandams [navakhandam]. The holy land of Menoo [q.v.] and the Pooraunams [q.v.] lies between the Drishadwaty and Saraswaty rivers in North-west India. In Hindoo geography fifty-six countries are enumerated [bhoogolashastram]. The principal ancient kingdoms were nineteen, viz., Magadham, Oudh, Indraprastam or the ancient delhi, Canouj or canyacoobjam, Matooray, Vangam or east bengal, Andhram, Ootcalam, Carnautam, Cholam, Paundyam, Cheram, Maharashtram, Concanam, Malwah, Goozerat, Punjab, Cashmere, Nepaul. The tamul country and language are called Dravida [charitram]. According to Marco Polo there was India the greater, extending from Maabar [q.v.] or Coromandel [q.v.] to Mekran and containing thirteen kingdoms; India the lesser, extending from Champah [cambodia] or Cochin china to Mootfily [motoopully] or Kistna delta [conamoogam] and containing eight kingdoms; and Middle india froming the province of Abash or Abyssinia. Friar Jordanus has similar divisions. From these different plural ideas arose the term Indies.——*Indian* (देशीय - déshíyá, San.; هندى - hindí, Ar., Pers. and Hind.; ناٹ - nát, Dec.; ನಾಡು - nádu, Can.; నాటు - nátu, Tel.; നാട്ടു - nátu, Mal.; நாட்டு - náttu, Tam.). San. from (désha, san. country) [desham]. Ar. from (hind, ar. india). Dec. from tamul. Drav. means country, in the oblique form [naud]. Tel. also (déshapu). Anglo-indian prefix to designate plants or products of india considered to resemble the foreign plant, &c., which follows [country].——*Indian aconite* (بيش هندى - bishihindí, Hind.). Same as Bachnaug.——*Indian allspice* (ناٹكى سيتل چينى - nátkísítalchíní, *Hind.*). Same as China pepper.——*Indian almond* (هندى بادام كا پيڑ - hindibádámkáper, Hind.). Same as Catapang.——*Indian aloe* (صبر هندى - sibrihindí, *Hind.*). See under Aloe.——*Indian aristolochia* (زراوند هندى - zaráwandihindí, Hind.). Same as Isharmool.——*Indian barberry* (فيل زهرة هندى - filzahraihindí, Hind.). See under Berberry.——*Indian bdellium* (گوگل هندى - gúgalihindí, Hind.). See under Bdellium.——*Indian bead* (ناٹ كا منكا - nátkámanká, Hind.). Same as Indian shot.——*Indian beech* (ولايتى گولر - viláitígular, Hind.). Same as Karanj.——*Indian beet* (पालक्की - pálankí, San.). Same as Paulak.——*Indian berry* (काकमारी - kákamárí, San. and Mahr.; गड्फल - gardap'hala, Conc.; مرگ ماهى - margmáhí, Pers.; كاكمارى - kákmárí, Hind. and Dec.; توبا - tuba, Malay; ಕಾಗೆಮಾರಿ - kágemárí, Can.; ಚಿಪುಲು - chipulu, Too.; కాకిచంపు - kákitsampa, Tel.; പൊള്ളക്കായ - pollakkáya, Mal.; තිත්තවැල් - tittaval, Singh.; காக்காய்க்கொல்லி - kákkáykkolli, Tam.). San. from (káka, san. crow + mári, san. killer); as mixed with rice for a lure and poison to crows. Pers. from (marg, pers. death + máhí, pers. fish). Can. from (káge, can. crow + mári, san. destroyer). Tel. from (káki, tel. crow + tsampu, tel. to kill). Mal. from (polla, mal. blister + káya, mal. fruit). Singh. from (titta, singh. bitter + val. singh. creeper); from bitter berry. Tam. from (kákkáy, tam. crow + kol, tam. to kill). San. also (kákanáshiká), meaning crow + destroyer; (kákáhvá), meaning crowplant; compare indian hounds' berry. Mahr. also (kákap'halí), meaning crow + fruit. Can. also (kákísoppugadde), meaning crow + leaf + root. Mal. also (karantakam); (naññinkuru), meaning poison nut; (mínnaññu), meaning fish poison; (naççattinkáya), meaning poison + fruit; (garalap'hala), meaning poison + fruit; cf. common emetic nut. Tam. also (péngottai), meaning louse + seed; destroys vermin. Title otherwise Bacca orientalis, Bitter berry, Caukmaury, Cocculus indicus, Cocques dulevant, Crow berry, Crow-killer, Fish-killer, Fish poison, Jagged moonseed, Louse berry, Meizaragi, Poison berry. Botanically Anamirta cocculus, w. & a., menispermaceæ [vricsham, 5]. Alias Anamirta paniculata, racemosa; Cocculus flavescens, lacunosus, orbiculatus, suberosus; Menispermum cocculus, heteroclitum, lacunosus monadelphum, orbiculatum. A strong climbing shrub, with the bark corky, ash-colored, and deeply cracked into fissures; long trailing branches; stalks shorter than leaves; leaves alternate, slightly cordate, roundish, acute, deep green, whitish beneath, with five digitate ribs; calyx six-sepalled; corolla none; racemes of female flowers, lateral, whitish green; long pendulous bunches of fruit, the size of a large pea [calauyam], pure white in color becoming red and ultimately black as they ripen; resembles tinospora cordifolia [goolancha]. The dried berries as occuring are somewhat kidney-shaped, blackish brown, wrinkled, containing a yellowish, oily, bitter, kidney-shaped kernel inclosed in a two-valved shell; the berries are extremely bitter. Medicinally the berries, fructus cocculi of chemists, are employed powdered for destroying pediculi in the hair, and mixed with warm castor-oil [aumanac] as ointment in cutaneous diseases; the juice of the fresh berry is applied externally to foul ulcers, and in scabies; the kernels contain a large percentage of the virulent principle picrotoxine; the pericarp yields another dangerous alkaloid menispermine, never administered internally; gives to pharm. unguentum cocculi insecticide, officinal, substituted for ung. hydrarg. and ung. hydrarg. nitratis, discarded from british pharmacopœia. Berries added to malt liquors to increase their intoxicating effect; berries formed into paste with moistened rice for intoxicating birds and fish [andaman indian oak, common emetic nut, marotty, round milk-hedge, sooptee, tejbul, walsoora, zanzibar indigo] in order to catch them; oil from berries similar; highly poisonous when in excess. For cocculus genus, see Vausanavully.——*Indian birch* (صنوبر هندى - sanobarihindí, Hind.). Same as Bhoojpattar.——*Indian birthwort* (زراوند هندى - zaráwandihindí, Hind.). Same as Isharmool.——*Indian blood wood* (هندى ركت چندن - hindírakatchandan, Hind.). Title from prickly flower stalk. San. from

(apa, san. away + márga, san. way); as being shunned. Conc. means prickly jasmine. Pers. from (khár, pers. thorn + vázhgún, pers. reversed). Hind. means pungent [surprise grass]. Can. from teloogoo. Tel. from (utta, tel. false + rénu, tel. jujube tree, zizyphus jujuba, lam.). Mal. from (katal, mal. sea + átu, mal. to wave). Tam. from (náy, tam. dog + uruvi, tam. the piercing plant), from its prick. San. also (kharamañjarí), meaning sharp + flower cluster; (dírghamañjarí), meaning long + flower cluster; (apánga), meaning down + limb; (pratyakpushpí), meaning turned downwards + flower; (ghantá), meaning killing; (kíshaparní), meaning monkey + leaf, from leaf hair like that of monkey; (kinihí), meaning one affected with dadroo + to go; (kubja), meaning crooked; (markatí), meaning ape [common cowitch]; (markatapippalí), meaning ape + long pepper, piper longum, linn.; (málákant'ha), meaning wreath + throat; (durabhigraha), meaning difficult to hold; (katumañjariká), meaning sharp + flower cluster; (mayúraka), meaning peacock, from the faint resemblance of the stalk to peacock's feather [indian maiden hair]; (panktikantaka), meaning row + thorn; (shaikharika), meaning produced on mountain tops; (shikhyanga), meaning peacock + limb; (vashira) [elephant long pepper]. Pers. also (khárívázhún), meaning inverted thorn. Hind. also (chikrá); (chirchittá); (latjira). Tel. also (antisa), meaning sticking. Title otherwise Apamaurgam, Chaff-flower, Dog-prick, Monkey-leaf plant, Monkey long pepper, Nyeoorivy, Prickly chaff-flower, Rough chaff-flower. Botanically Achyranthes aspera, linn., amarantaceæ [vricsham, 106]. Alias Achyranthes indica, obtusifolia. Shrub about 6 feet; branches somewhat four-sided; stem erect, pubescent; leaves on short petioles, obovate-rotund, abruptly attenuated at the base, pubescent; spikes virgate, acute, at first horizontal, afterwards reflexed; flowers purplish-green; bracts at first soft, soon becoming rigid and prickle-like; capsules 5-seeded, reddish. The dried plant medicinally astringent and diuretic; has marked diuretic properties in decoction; when burnt the ashes yield potash [jharkanamak], and are administered with ginger [q.v.] for dropsy; the flowering-spikes, rubbed with sugar [q.v.], are made into pills and given to people bitten by mad dogs; the leaves taken fresh and rubbed to a pulp are external remedy for sting of scorpions [tail]; paste of fresh leaves and spikes, with or without turmeric [country saffron] is a remedy in piles; for british digitalis, spiritus ætheris nitrosi and galls; all parts quoted in pharm. non-officinal. Seldom eaten alone, and in general used in calavay keeray [q.v.] or mixed greens; famine food. Used in incantations and sacrifices [yanyam]; used in washing linen; also as a tooth-brush; ashes used as mordant [cauram].—"*a*" There is a species aquatica, called in teloogoo water spinach [maurisham]. Other species are:—bidentata, rubrofusca.—"*b*" Litsæa zeylanica and Panicum javanicum are also called Indian burr; see gloss. paragraphs.—"*c*" Small indian burr, so called in the vernaculars, is Cyathula prostrata, blume, amarantaceæ [vricsham, 106]; alias Achyranthes prostrata; Pupalia prostrata. Stem herbaceous, perennial, prostrate, or ascending; branches subtetragonal, slightly hairy; leaves opposite, obovate, pubescent, glaucous below; spikes virgate, slender, lax; sepals, lanceolate, hairy, interior ones narrower, three-nerved, hispid; staminodes minute, bifid at the apex, glochides fifteen to twenty; unequal, hooked at the apex, hairy below, yellowish; utricle glabrous, greenish; seed ovate-oblong, shining, pale chestnut; flowers greenish-red or purple or whitish-violet; flowering in the cold season.——*Indian bramble* (خسك هندى - khasakihindí, Hind.). See Gowry's fruit. ——*Indian buckbean* (باقلۂ هندى - báklahihindí, Hind.). Same as Floating nelumbo.——*Indian caoutchouc* (ولايتى بڑ - viláitíbar, Dec.; ಶೀಮೆಆಲ - shímeála, Can.; సీమమఱ్ఱి - símamarri, Tel.; சீமையால் - shímaiyál, Tam.). Vern. means foreign banyan. Title otherwise Elastic fig, Foreign banyan, Indian rubber tree. Botanically Stilpnophyllum elasticum, endl., moraceæ [vricsham, 121]. Alias Ficus elastica; Urostigma elasticum. Tree, 30 to 40 feet; leaves from oval to oblong, pointed, thick, firm, and glossy; fruit in axillary pairs, sessile, oval, smooth, the size of an olive [zeitoon]; stipules nearly as long as the leaves, smooth and rosy; cultivated in malabar. Produces when wounded a quantity of milk which yields about one-third of its weight of caoutchouc [pauchonty]; when the juice is exposed to the air, it separates spontaneously into a fine elastic substance and a fœtid whey-colored liquid; the juice is formed into pear-shaped bottles by being spread over moulds of clay. Caoutchouc furnishes candles and flambeaux; with the milk the insides of vessels and baskets are smeared.——*Indian chamomile* (بابونۂ هندى - bábúnahihindí, Hind.). San. from (ákásha, san. sky + nimba, san. melia azadirachta, linn.); tall and similar; cf. bhoo nimbam, andrographis genus. Hind. from mahratta. Can. from (biráte, can. cork + mara, can. tree). Tel. from (mánu, tel. tree + malle, tel. jasmine). Tam. from (maram, tam. tree + malliká, san. jasminum sambac, ait.); from flower [tree jasmine]. Hind. also (nímchambelí), meaning melia azadirachta, linn. + chambelí, jasminum sambac, ait.; from leaf like margosa and flowers like jasmine. Tam. also (kárkkumaram), meaning cork tree, cf. cork oak; (káttumalli), meaning forest + jasmine [wild jasmine]. Title otherwise Tree jasmine [indian zebra-wood]. Botanically Millingtonia hortensis, linn. f., bignoniaceæ [vricsham, 99]. Alias Bignonia suberosa. Tree, 40–50 feet; leaves opposite, supra-decompound; leaflets acuminated, subcordate, entire; panicles terminal, with horizontal ramifications, the first trichotomous, then dichotomous, with generally a simple flower in the fork; flowers numerous, trumpet shaped, large, pure white, fragrant; ornamental and very rapid grower; flowering in cold season. Flower religious; bark yields an inferior cork; used as an avenue [shaulay] tree; wood is white, firm, and close-grained. Indian cork is also a title given to the Baobab [q.v.].——*Indian corn* (مكہ جارى - makkahjárí, Dec.). Title from being introduced from W. indies. Same as Mecca cholum.——*Indian cotton* (قطن - kutn, Ar.). See under Cotton.——*Indian cowhage* (هندى كاچكورى - hindíkáchkurí, Hind.). Same as Common cowitch.——*Indian cuckoo* (कोकिल - kókila, San.). Can. from (rasa, san. juice + bíja, san. seed). Singh. from (dada, singh. wilderness + kirilla, singh. cork tree, millingtonia hortensis, linn. f.). Tel. also (náli); (návarachettu); (peddanavilieragu). Singh. also (godakirilla). Tam. also (káñji) [caunchy, jow]. Title otherwise Jungle cork tree, Wawalee. Botanically Holopetala integrifolia, planch., ulmaceæ [vricsham, 120]. Alias Ulmus integrifolia. Large tree; dense dark green foliage; leaves alternate, ovate or cordate, entire, glabrous, shortly petioled, deciduous; flowers hermaphrodite and male mixed; hermaphrodite flowers, calyx four to six-lobed, leaflets spreading, oval; stamens seven to nine; pistils two; capsule one-celled, one-valved, indehiscent; the first part of the flowers that appears is the reddish anthers, next the calyx increases and becomes visible, but is always very minute, and if not looked for may pass unperceived; flowering in cold season. Bruised leaves are applied to boils; leaves lopped for cattle fodder; adapted for avenues [shaulay]; the forks of the branches are used to protect straw heaps against cattle [maud]; oil [yennay] expressed from seed; wood light yellowish-grey, moderately hard, no heart-wood.——*Indian endive* (هندباء برى - hindabáibarrí, Ar.; كاسنى برى - kásníibarrí, Pers.; جنگلى كاسنى - janglíkásní, Hind. and Dec.; காசினிவிரை - kásinivirai, Tam.). Ar. from (hindabá, ar. endive + barr, ar. forest). Pers. from (kásní, pers. endive + barr, ar. forest). Hind. from (janglí, hind. wild + kásní, pers. endive). Tam. from hindostany. Tam. also (shekkiraishivattamullangi), meaning chicory + red + radish plant. Greek κιχώριον. Title otherwise Chicory, Succory, Wild endive, Wild succory, Witloof. Botanically Cichorium intybus, linn., compositæ [vricsham, 74]. The achenes are about the same size as those of the lettuce [kahoo], angled, of a pale, mottled grey color; the root is fleshy and tapering, somewhat branched, longitudinally wrinkled, light brown externally and whitish internally; the bark is rather thin, radially striate from the dark colored milk-vessels, and separated by a brown cambium-line from the finely porous yellow-wood; the taste is bitter and mucilaginous. Seeds are one of the four lesser cold seeds of old writers, and as such are still in use in the east. Tonic, demulcent, and cooling; seeds carminative and cordial; prescribed in bilious complaints much like taraxacum. Young plant used for salad, the leaves being blanched like endive; roots roasted, ground, and mixed with coffee [q.v.] to flavor it. Gives a dye [shauyam]. Garden endive, greek σέρις κηπευτὴ στενοφύλλος, is Cichorium endivia, linn.; two principal varieties of this vegetable, batavian or broad-leaved often used for stews, and the curled called sometimes capuchin's beard used as a garniture for salads.——*Indian fescue* (கமரிப்புல் - kamarippul, Tam.). Hind. from (gandh, san. aromatic + ghás, hind. grass). Dec. from (nárangí, hind. orange, citrus aurantium, linn. + bás, hind. smell + ghás, hind. grass); cf. lemon grass. Can. from (gandu, can. male + hanchi, can. long grass of which brooms are made, aristida setacea, retz. + khaddi, can. spear). Tel. from (káru, tel. forest + manchi, tel. good + gaddi, tel. grass) [lemon grass, roussa grass]. Mal. from (chóra, san. fragrance + pullu, mal. grass). Singh. from (vatu, singh. garden + savandará, singh. andropogon muricatus, retz.). Tam. from (shukku, tam. dry ginger + náru, tam. to smell + pul, tam. grass) [ginger grass, roussa grass]. Tel. also (kámákshikasavu) by corruption. Mal. also (kámákshippullu). Singh. also (máná). Tam. also (shukkunárippul), meaning dry ginger + to smell + grass; (vásanaippul), meaning smell + grass; (kámádchippul), by corruption from teloogoo; (mándappul), meaning indigestion + grass; (kávattambul), meaning shed + grass. Title otherwise Citronella, Garden cuscus, Orange grass, Spice grass. Botanically Andropogon [beard grass] nardus, linn., graminaceæ [vricsham, 156]. A large perennial herb, with a long slightly branched, partly aërial rhizome, reaching $\frac{1}{2}$ inch in diameter, and strongly ringed with the closely placed scars of the leaf-sheaths, the remains of which persist on the upper portion, and giving off numerous tough root-fibres. Stem reaching 6 feet or more high, erect, stout, cylindrical, solid, smooth and shining, partially concealed by the leaf-sheaths, scarcely thickened at the nodes, which are approximated below but widely separated above, flat or channelled on one side in the upper portion. Leaves very large and long, numerous, erect, lower ones sometimes reduced to their sheaths; sheaths thick and strong, about 6 inches long, close but not entirely enveloping the stem, quite smooth, striate; ligule short, brown, lacinate, scarious; blade about 2 feet long, linear, very much attenuated at the apex, tapering below, minutely denticulate with forward points on the edges, smooth on both surfaces, pale somewhat glaucous green, lighter beneath. Spikelets very small, arranged in couples, one stalked, containing one male flower, the other sessile, with one hermaphrodite and often one barren flower; the couples, to the number of three or four, articulated on alternate sides of a short, flattened, jointed rachis clothed along the edges with long white silky hairs tufted beneath the spikelets, forming a short acute spike about $\frac{1}{2}$–$\frac{3}{4}$ inch long; the spikes arranged in pairs on a common slender stalk, at the bent basal node of which is a large, erect, acute, leafy, striate, orange-red, shining bract, scarious at the edges, which encloses the pairs of spikes before expansion; the pairs of spikes very numerous, placed on the somewhat zic-zac, elongated, smooth, slender, erect, flattened branches of elongated panicles, which come off in clusters from the axils of the upper leaves, the whole forming a very large, tufted, elongated, somewhat drooping inflorescence, often 2 feet or more in length; glumes nearly equal, acuminate, membranous, smooth, purplish, boat-shaped, the lower one of the sessile spikelet flattened on the back against the rachis and without a midrib, those of the stalked spikelets with several parallel strong veins; pales of the lower spikelet two, or with a third representing a barren flower, very unequal, the lower very small, deeply bifid with two long cusps, from between which comes off a long, slender, slightly kneed purple awn, about twice the length of the glumes, and projecting considerably beyond the spikelet, the upper much larger, acute but without an awn, very delicate and membranous, without veins; in the flower of the upper spikelet there is but a single membranous non-awned pale. Lodicules two, oblong, truncate, longer than the ovary. Stamens three, anthers purple. Stigmas two, spreading, protruded from the flower, plumose, bright red-purple. Fruit not united with the pales. Native of Ceylon. Can be distinguished from other Beard grasses by rufous colour, short spikes, and narrow leaves. On being chewed grass has exactly the flavor of ginger [q.v.]. In infusion is medicinally stomachic; gives to pharm. citronella oil, the volatile oil obtained by distillation from the fresh plant; color is of a light greenish-yellow; officinal; oleum graminis indici, or oleum andropogonis of chemists. Oil used to flavor honey-soap.——*Indian gum* (صمغ هندی - samaghihindí, Hind.). Same as Gum ghautty [q.v.]. Mixture of gums [gond] of:—Acacia arabica, willd. [babool]; Acacia catechu, willd. [catechu]; Acacia farnesiana, willd. [piyvail]; Ægle marmelos, corr. [bael]; Albizzia lebbek, benth. [common sirissa]; Albizza odoratissima, benth. [fragrant sirissa]; Anogeissus latifolia, wall. [vekkauly]; Cassia auriculata, linn. [tungaid]; Feronia elephantum, corr. [wood-apple]; Mangifera indica, linn. [mango]; Melia azadirachta, linn. [neem]; Terminalia belerica, roxb. [belleric myrobalan]; and many other trees.——*Indian gum arabic* (کیکر کا گوند - kíkarkágond, Hind.). Gum of the Babool [q.v.].——*Indian gut* (هندی مدن مست - hindímadanmast, Hind.). Product of caryota urens, linn., palmaceæ [bastard sago palm].——*Indian gutta-percha* (ناٹ کا گاٹہ پرچا - nátkágátaparchá, Hind.). Hindostany means country guttapercha. Same as Pauchonty.——*Indian heliotrope* (हस्तिशुण्डा - hastishundá, San.; थोरकुरडू - t'hórakuradú, Mahr.; هاتهی شورا - háthíshúrá, Hind.; بچھو کے ڈاک کا پتا - biççhúkedákkápattá, Dec.; ಚೇಳುಬಾಲದಗಿಡ - chélubáladagida, Can.; ಚೇಳಕಡೆ - chélakade, Too.; తేలుమణి - télumani, Tel.; ହାତିସୁରା - hátisurá, Oor.; തേൾക്കൊടുക്ക - télkkotukku, Mal.; தேட்கொடுக்கி - tédgodukki, Tam.). San. from (hasti, san. elephant + shundá, san. trunk); from fruits like elephant's trunk. Mahr. from (t'hóra, mahr. large + kuradú, mahr. ear-ring). Hind. from sanscrit. Dec. from (biççhú, hind. scorpion + dák, hind. sting + pattá, hind. leaf). Can. from (chelu, can. scorpion + bála, can. tail + gida, can. plant). Too. from (chélu, too. scorpion + kade, too. end). Tel. from (télu, tel. scorpion + mani, san. precious stone). Oor. from sanscrit. Mal. from tamul. Tam. from (tél, tam. scorpion + kodukku, tam. sting); from fruits like scorpion's sting. San. also (bhúvrishchikáli), meaning ground + the plant, tragia involucrata, mueller; (nakrári), meaning crocodile's enemy; (vishaghná), meaning poison-destroying; (amarađáru), meaning immortal tree; (nágadantí), meaning serpent's tooth; (shríhastiní), meaning having beautiful elephant's ear-like leaf; (bhúrundi), meaning growing on earth; (vrishchikáli), meaning scorpion + friend [caunjory]. Can. also (chélukondi), meaning scorpion + sting; (chélumani), meaning scorpion + stone. Tel. also (gurugu) [moorgha]. Mal. also (teliyanni), meaning having a clear dye; (télkata), meaning scorpion's end; (vénappaçça), meaning summer green. Tam. also (nakkippú), meaning to lick + flower; (úttiram). Title otherwise Crocodile's foe, Indian turnsole, Scorpion plant, Scorpion sting, Scorpion tail, Wild clary. Botanically Heliotropium indicum, linn., boragineæ [vricsham, 92]. Alias Heliophytum indicum; Heliotropium anisophyllum, cordifolium, hispidum; Tiaridium anisophyllum, indicum. Annual, 1 foot; stem hairy; leaves generally alternate, petioled, cordate, wrinkled, curled at the margins; spikes leaf-opposed, solitary, peduncled, longer than the leaves; flowers sessile, minute, in two rows on the upper sides of the spikes; corolla longer than the calyx, tube gibbous; flowers small, lilac-bluish; flowering in rainy season; common weed, usually found among rubbish. Flowers like those of the garden heliotrope, but smaller; fruit mitreshaped; the plant has a fetid odour like stramonium [europe datura]; taste a little bitter. Whole is medicinally astringent; juice of the leaves applied to gum-boils and pimples on the face and in ophthalmia; in pharm non-officinal. Other common species are:—ovalifolium, paniculatum, polystachyum, scabrum, supinum, zeylanicum.——*Indian hemp* (ناٹ کا سن - nátkásan, Hind.). Fibre of Cannabis sativa, linn., urticaceæ [kinnab]. Extended also to the following fibres:—Crotalaria juncea, linn. [sunn]; Hibiscus cannabinus, linn. [hemp bendy]; Arenga saccharifera, labill. [gomooty palm].——*Indian hibiscus* (انغرای هندی - anghiráihindí, Ar.). Same as China rose bendy.——*Indian hoopoe* (هد هد هندی - hudhudihindí, Hind.). Same as Hood-hood.——*Indian horse radish* (ناٹ کا سہجنا - nátkásahjná, Hind.). Same as Moringa.——*Indian hounds' berry* (काकमाची - kákamáchí, San.; कामुनी - kámuní, Mahr.; عنب الثعلب - anabussalab, Ar.; روباه تربك - rúbáhiturbak, Pers.; مکو - mako, Hind.; کامونی - kámuní, Dec.; ಕರಿಕಾಚಿ - karikáchi, Can.; కాచి - káchi, Tel.; മണത്തക്കാളി - manattakkáli, Mal.; மணத்தக்காளி - manattakkáli, Tam.). San. from (káka, san. crow + má, san. lustre + añch, san. to go); from crow-black berries; compare indian berry. Ar. from (anab, ar. grape + salab, ar. fox). Pers. from (rúbáh, pers. fox + turbak, pers. grape, vitis vinifera, linn.). Dec. from arabic. Can. from (kari, can. black + káchi, can. the shrub). Tel. from sanscrit. Mal. and tam. from (manam, tam. fragrance + takkáli, tam. physalis). San. also (váyasí), meaning crow-like; (kóvidára), meaning small + solanum verbascifolium, linn. [variegated mountain ebony]; (krishnakóvidára), meaning black + the plant; (raktakóvidára), meaning red + the plant. Ar. also (anabussalabiaswad), meaning black fox grape; (anabuzzayib), meaning jackal-grape. Pers. also (rúbáhiturbakisiyáh), meaning black fox grape; (angúrrúbáh), meaning fox grape; (angúrrúbáhisiyáh), meaning black fox grape; (sagangúr), meaning dog grape [dog angoor]; (sagangúrisiyáh), meaning black dog grape. Hind. also (kálámako), meaning black fox grape; (údámako), meaning blue fox grape; (lálmako), meaning red solanum. Dec. also (údíkámuní), meaning blue solanum; (kálíkámuní), meaning black solanum; (lálkámuní), meaning red solanum. Can. also (karikánchí), meaning black + the shrub; (kariganike), meaning black + the shrub; (kempukánchi), meaning red + the shrub; (kempuganike), meaning red + the shrub; (kánchi); (ganiké). Tel. also (kánchi); (nallakánchi), meaning black + the plant; (kámanchi); (nallakámanchi), meaning black + the plant; (errakámanchi), meaning red + the plant; (errakánchi), meaning red + the plant; (gádzuchettu), meaning glass + plant, from fruit. Mal. also (nílaççunta), meaning blue solanum; (karuppumanattakkáli), meaning the black variety; (chovannamanattakkáli), meaning the red variety; (manattankanni). Tam. also (karup-

pumanattakkáli), meaning black + the plant; (shivappumanat-takkáli), meaning red + the plant. Title otherwise Black-berried nightshade, Dog grape [dog angoor], Fox grape, Garden nightshade, Hound-berry, Manatakkauly. Botanically Solanum [cooly] nigrum, linn., solanaceæ [vricsham, 94]. Alias Solanum incertum, roxburghii, rubrum. A small low growing species of nightshade; bears white flowers, producing small berries of a black or red color; annual, if cultivated with care perennial; erect, from 1½ to 3 feet high; branches occasionally and slightly angular and somewhat tubercular at the angles; leaves ovate, soft, slightly wavy, occasionally and partially dentate; petiolate; petiole short and slightly margined; flowers very small and white, drooping, lateral, pedunculate, pedicellate, and three or four form together a kind of umbel; calyx persistent, green, sepals five; corolla white, petals five; stamens five; berries drooping, small purple or black, many-seeded, juicy, and slightly sourish in taste; always found in flower and fruit. In the red variety or rubrum, the berries are red and slightly sweet; leaves generally and distinctly dentate, larger, thicker than that of nigrum, paler in color, not wavy, and possess a slight disagreeable smell; branches more spreading and not distinctly angular or tubercular. In decoction [kwautam] the leaves are bruised and the juice pressed out; this is warmed in an earthen vessel until it loses its green color and becomes reddish brown; when cool, it is strained; the same juice, instead of being warmed, if evaporated on a sand or water bath to the consistence of a soft mass forms an extract. Leaves diuretic, alterative, and laxative; slightly narcotic; used in dropsical affections in decoction and extract; juice of leaves useful in chronic enlargement of liver; substituted for british sweet nitre, cream of tartar and digitalis; in pharm. non-officinal. Berry although reckoned poisonous in europe, is eaten by tamulians with impunity; it is sweetish, but not very palatable; plant itself used as potherb.——*Indian house sparrow* (کہانچری - khánchurí, Hind.). See Chiriyah.——*Indian hydrocotyle* (ارتا نیاہ ہندی - artániyáihindí, Hind.). Same as Indian pennywort.——*Indian ipecacuanha* (मुलिनी - múliní, San.; انتمول - antamúl, Hind.; پت کاڑی - pitkárí, Dec.; ನೇಪಾಳ - népála, Can.; ನೇಪಾಳ - népála, Too.; కుక్కపాల - kukkapála, Tel.; വള്ളിപ്പാല - vallippála, Mal.; බිංනුග - binnuga, Singh.; நாய்ப் பாலை - náyppálai, Tam.). San. from (múla, san. root) [country radish]. Hind. from (anta, san. end + múla, san. root). Dec. from (pit, hind. bile + kárí, hind. stick). Can. from (náyi, can. dog + pála, can. milky plant). Tel. from (kukka, tel. dog + pála, tel. plant so called). Mal. from (valli, mal. creeper + pála, mal. milk plant). Singh. from (bin, singh. ground + nuga, singh. milk fig tree, ficus laccifera, roxb.). Tam. from (náy, tam. dog + pálai, tam. milky plant); useful in dog cure. Hind. also also (janglípikván), meaning country ipecacuanha. Can. also (kirumanjiballi), meaning small + hemp + creeper; (ádu-muttadagida), meaning goat + not touch + plant; compare adhatoday. Tel. also (verripála), meaning mad + milk plant; (kákapála), meaning crow + milk plant [carook vauly]; (kurinja); (podapatramu), meaning spot + leaf. Tam. also (kurinjá); (sárangam); (naççaruppán), meaning poison + cutter; (nanju-muriççán), meaning poison + breaker; (péyppálai), meaning devil + milk plant; (kodagam). Title otherwise Asthmatic swallow-wort, Coorinjah, Country ipecacuanha, Vomiting swallow-wort. Botanically Tylophora asthmatica, w. & a., asclepiadeæ [vricsham, 88]. Alias Asclepias asthmatica, vomitoria; Cynanchum ipecacuanha, viridiflorum, vomitorium. Twining; leaves opposite, ovate-roundish, acuminated, cordate at the base, glabrous above, downy beneath; peduncles short, with two to three sessile few-flowered umbels; flowers rather large on long pedicels, externally pale green with a faint tinge of purple, internally light purple; corolla five-parted; follicles glabrous, divaricated; leaflets of corona fleshy, clasping the base of the gynostegium. In the dry state the leaves are rather thick and harsh, of a pale yellowish green; they have a not unpleasant herbaceous smell, with but very little taste; the root consists of a short, knotty, descending root stock, about one-eighth of an inch in thickness, emitting two to three aerial stems, and a considerable number of wiry roots; these roots are often six inches or more in length by half a line in diameter, and are very brittle; the whole drug is of a pale yellowish brown; it has no considerable odour, but a sweetish and subsequently acrid taste; in general appearance it is suggestive of valerian, but is some-what stouter and larger. Root expectorant and diaphoretic in large dose, answers as an emetic; in smaller, often repeated doses, as a cathartic; also as an emetic by rubbing upon a stone 3–4 inches of fresh root, and mixing it with water for a dose; generally purges at the same time; substitute for ipeca-cuanha; similarly the dried leaf; gives to pharm. dried leaves, tylophoræ folia, emetic, diaphoretic, and expectorant, officinal.—"*a*" Other species of tylophora are:—fasciculata, iphisia, mollissima, pauciflora, tenuis.—"*b*" Small indian ipecacuanha; with the following vernacular names (méshashringí, San.; merá-singí, Hind.; parpatrah, Dec.; podapatra, Tel.; binnuga, Singh.; shiruguriñjá, Tam.). San. from (mésha, san. sheep + shringa, san. horn), from fruit like ram's horn; compare wodier and screw-tree. Dec. from teloogoo. Tel. from (poda, tel. spot + patra, san. leaf). Singh. from (bin, singh. ground + nuga, singh. milky fig tree, ficus laccifera, roxb.). Tam. from (shiru, tam. small + kuriñjá, tam. the plant, tylophora asthmatica, w. & a.). Otherwise Small coorinjah; is botanically Gymnema sylvestre r. br., asclepiadeæ [vricsham, 88]; alias Asclepias geminata; Gymnema parviflorum; Periploca sylvestris. Climbing; all, except the upper side of the leaves, softly pubescent; leaves ovate, or ovate-lanceolate, attenuated at both ends, or obscurely cordate at the base; peduncles as long as the petioles; umbels twin, many-flowered; follicles slender, attenuated; flowers crowded, small, yellow; flowering nearly all the year. The leaves are from 4–5 inches long; upper surface dark green shin-ing, under surface pale green; venation transverse and reticulate with a marginal vein; taste saltish and acrid. The root is about the size of the little finger or less, not unlike hemidesmus [indian sarsaparilla]; it has a tough wood, and when fresh a soft spongy bark, which is reddish brown and fissured longitudinally, but loses much bulk in drying, and becomes loose and trans-versely fissured; the taste is acrid and saltish; the whole plant abounds in milky juice. If chewed the plant destroys the power of the tongue to appreciate the taste of sweets and bitters; sugar [q.v.] tastes like sand, quinine [koinah] like chalk; effect lasts for one or two hours. Leaves a remedy in snake bites; also emetic and expectorant; quoted in pharm., non-officinal.—"*c*" Other common species of Gymnema are:—elegans, hirsutum, tingens, heyneana, lactiferum.——*Indian iron wood* (இருள்மரம் - irulmaram, Tam.). Same as Naugachampak.——*Indian jack* (ചക്ക - chakka, Mal.). Same as Common jack.——*Indian jalap* (جالپ ہندی - jálapihindí, Hind.). Same as Turbith.——*Indian jay* (नीलकण्ठ - nílakant'ha, San.; तास - tása, Mahr.; شقراق - shakrák, Ar.; سبزک - sabzak, Pers.; نیل کنٹھ - nílkanth, Hind.; سبزک - sabzak, Dec.; ಕರಸುಂಗನಹಕ್ಕಿ - karasunganahakki, Can.; పాలపిట్ట - pálapitta, Tel.; കാട്ടുകാക്ക - káttukákka, Mal.; கட்டுக்காடை - kattukkádai, Tam.). San. from (níla, san. blue + kant'ha, san. throat). Mahr. corruption from (chásha, san. indian jay). Ar. from (shakará, ar. dusky red). Pers. from (sabz, pers. green). Hind. from sanscrit; cf. neelcunty. Dec. from persian. Can. from (kari, can. black + sunku, can. wrinkle + hakki, can. bird). Tel. from (pálu, tel. milk + pitta, tel. bird); from property of feathers increasing cow's milk when given to eat with grass. Mal. from (kátu, mal. forest + kákka, mal. crow). Tam. from (kattu, tam. to confine + kádai, tam. quail); as a bird of omen. San. also (manikant'haka), meaning beauty + throat; (kiki), imitative from cry; (kikidiva), meaning kiki, the sound + uttering; (chála), meaning sporting. Ar. also (akak). Can. also (goravanka). Tam. also (párguruvi), meaning milk + small bird. Title otherwise Indian roller. Coracidæ family, fissirostres, insessores, aves [pacshy, 8], of naturalists [jantoo]. Rollers. Birds of large size, resembling jays. Adorned, especially on wings, with rich blue colors; noisy and somewhat familiar. The species best known is Coracias indica. Alias Coracias bengalensis; Garrulus naevius. When seated puffs out the feathers of its head and neck; flies not unlike the crow [caurvam], though more buoyant, making sudden darts in the air in all directions; has a harsh grating cry; sacred to shiva [q.v.], who assumed its form; one of the birds on whose movements many omens [shacoonam] depend; if it cross a traveller just after starting it is considered a bad omen [neelcunty].——*Indian kale* (قلقاس - kulkás, Ar.). See Kachvee.——*Indian kino* (دم الاخوین ہندی - dammulakhwaini-hindí, Hind.). Product of Common vengay.——*Indian laburnum* (خیار شنبر ہندی - khiyárshambarihindí, Hind.). Title from appearance and taste of root. San. from (guj, san. to sound); from sound of dry pod. Conc. from canarese. Ar. from (aín, ar. eye + dík, ar. cock); from appearance of seed. Pers. from (chashm, pers. eye + khurús, pers. cock). Hind. from sanscrit. Can. from (guru, san. heavy + gunji, can. the plant); from seed being used as a weight [indian shot]. Tel. similar. Tam. from (kunru, tam. to decrease); from small size of weight. San. also (kákachiñchá), meaning crow + tamarind, tamarindus indica, linn.; (raktiká), meaning slightly red, after the seed. Can. also (gulganji), meaning ball + the plant, as bearing ball-like seeds. Tel. also (gurivenda). Tam. also (kundumani), meaning globular + bead, by corruption. Title otherwise Bead root, Coondrimany, Coral-bead, Country liquorice [tootty], Goomchy, Jamaica wild liquorice, Love pea, Red-bead vine, Rosary-pea, Wild liquorice. Giving Coondry root [q.v.], Retty seeds [q.v.]. Botanically Abrus precatorius, linn., leguminosæ [vricsham, 48]. Alias Abrus minor, pauciflorus; Glycine abrus. Twining woody shrub; young shoots with a few addressed hairs at the apex; leaves alternate, abruptly pinnated; leaflets eight to twenty pair, linear-oval, obtuse at both ends, glabrous or slightly hairy; calyx campanulate, obsoletely four-lobed, upper lobe broadest; racemes axillary, peduncled, many-flowered; flowers pale purple or rose-colored; flowering in cold season; legumes oblong, compressed, four to six-seeded; seeds roundish, distinct;

common in hedges and waste grounds. Root has appearance and taste of liquorice root, product of glycirrhiza glabra, linn., leguminosæ [atimathooram]; note the following distinctions :—"a" glycirrhiza glabra, linn.; generally about size of a large goose quill or of the little finger, and sometimes as large as a thumb; color greyish or reddish-brown externally and slightly yellow internally; taste sweet and mucilaginous;—"b" abrus precatorius, linn.; generally much smaller than real liquorice and seldom acquires size of a finger; brown externally and white internally; taste generally not distinctly sweet. The seeds of abrus are size of a small pea [calauyam], chiefly black and red, and well known for their polish. Plant is mentioned in sooshrootan. Root yields an extract similar in medicinal properties to liquorice, though somewhat bitter; the leaves yield same even more than root; gives to pharm. indian liquorice root, abri radix; seeds, if eaten, produce headache; powdered and injected hypodermically are poisonous; in the form of paste disperse light and recent swellings, as from bites of poisonous insects; native women swallow seeds, generally the white, every day for some days after each menstruation to prevent conception; for british iodine as a discutient; oil also used in native medicine. In jamaica the leaves are used instead of tea [q.v.], not so known here. The lowest weight in use among the native jewellers and druggists takes its denomination from the seed, though the fictitious weight is nearly double that of the seed; weight of one indian liquorice seed may be a grain and five-sixteenths; the fictitious retty [q.v.] weight is two grains and three-sixteenths nearly; the scarlet seeds, with jet black spot at top, are those generally used thus; the goldsmiths [tattaun] also reduce them to a fine powder, and in this state use them to increase adhesion in the more delicate parts of manufactured ornaments [nagay, zewar]; they are also used for beads [munkah] and rosaries [maulay], whence the specific botanical name of plant. Three principal varieties :—with rose-colored flowers, red seed and black eye; with dark-colored flowers, black seed and white eye; with white flowers, white seed; the first is commonest; also varieties with yellow and purple seeds; abrus fruticulosus, wall., is a species called "small" in all the vernaculars. There is a Tamul proverb :—குன்றி மணிக்கும்குண்டியிற் கறுப்பு—"Even a coondrimany seed has a black spot "on it;" same as no rose [gool] without a thorn. No other common species of abrus here. Compare where transl. is of second term :—Adenanthera pavonina (bandigurigíndza), round; Dalbergia volubilis (bandigurigindza), round; Rhynchosia cyanosperma (nallagurigindza), black. See gloss. paragraphs.——*Indian lynx* (سیاہ گوش ہندی - siyáhgoshihindi, Hind.). Same as Caracal.——*Indian madder* (ناتکا منجیٹ - nátkámanjíth, Hind.). Same as Coral jasmine.——*Indian mulberry* (شاہ توت - sháhtút, Hind.). From (sháh, pers. king + tút, hind. mulberry). See sep. title.——*Indian myrobalan* (ہلیلۂ ہند - halílahihind, Hind.). Same as Chebulic myrobalan.——*Indian nettle* (जीवन्ती - jívantí, San.; کولسے کا جھاڑ - kolse kájhár, Dec.; ಕಿರುಹಾಲೆ - kiruhále, Can.; కాకముస్టె - kákamuste, Tel.; മലന്തുടലി - malantutali, Mal.; பேய்முன்னை - péymunnai, Tam.). San. from (jív, san. to live) [goolancha]. Dec. from (kolsá, hind. charcoal + jhár, hind. tree); from use of wood for charcoal [indian nightshade, neermoolly]. Can. from (kiru, can. small + hále, can. the tree, a species of mimusops). Mal. from (mala, mal. mountain + tutali, mal. scutia indica, brongn.). Tam. from (péy, tam. devil + munnai, tam. premna integrifolia.) San. also (jívaní), meaning living [dita]. Hind. also (chíkun). Can. also (kádubajagida), meaning wild + acorus calamus, linn.; (gorklu). Tel. also (tellakákamuste), meaning white + the plant; (gaddanelli), meaning root + premna latifolia, roxb.; (moralichettu) [chironjee]; (úrakanudzunáluka), meaning domestic + plant, tetranthera pentandra, rox.; (áva); (shékumánu); (budumuru); (priyáluvrikshamu). Mal. also (tíntapparuva), meaning polluting creeper. Tam. also (munnai), meaning shining [moonnay]; (kuttippilá), meaning small jack tree, artocarpus integrifolius, willd. [stunted jack]. Title otherwise Amboyna sponia, Charcoal tree. Botanically Sponia wightii, planch., ulmaceæ [vricsham, 120]. Alias Celtis orientalis; Sponia amboinensis, andaresa, orientalis; Trema orientalis. Small tree, 15 feet; harsh-rough leaves alternate, bifarious, short-petioled, ovate-cordate, acuminated, minutely serrated, scabrous above, villous underneath; flowers axillary, aggregated on short two-cleft diverging peduncles; calyx five-parted; male and female flowers generally on separate trees; drupe small, succulent, black when ripe, nut wrinkled, one-celled, one-seeded; flowers very small, green; common, of rapid growth; flowering all the year. Yields a gum [gond] resembling that of cherry [q.v.] tree. Planted in avenues [shaulay]; the leaves are used for polishing wood and horns [sing]; bark yields fibre [naur], used to tie rafters of houses. Wood is soft and white; makes the best charcoal for gunpowder.—"a" Another species of sponia is Velutina.—"b" White indian nettle, so called in vernaculars, is Celtis wightii, planch, ulmaceæ [vricsham, 120]. Leaves oblong, abruptly acuminate, somewhat acute at the base, quite entire, three-nerved, lateral pair of nerves extending from the base to the apex; stipules somewhat peltate; cymes about the length of the petioles or sometimes twice as long; berry shortly rostrate, smooth; flowers pale bluish; flowering nearly all the year; subalpine tracts. Wood greyish-white, very hard, close-grained; annual rings indistinctly marked by a narrow belt without pores.—"c" There are other species of celtis :—Australis, is european nettle tree, grecian honey-berry, lote tree, lotus tree [bair]; Occidentalis is american nettle tree, hackberry; Roxburghii is a small tree, common on ghauts [q.v.]; Serotina is a tree on neilgherries.—"d" Compare also in other genera. Girardina heterophylla, neilgherry nettle; Urtica crenulata, devil's nettle, fever nettle; for which see gloss. paragraphs.——*Indian nightshade* (बृहती - brihatí, San.; कलाँट - kallánta, Conc.; کولسے کا جھاڑ - kolsekájhár, Dec.; ಕೆಂಪುಗುಳ್ಳಗಿಡ - kempugullagida, Can.; ಕಲ್ಲಂಟೆ - kallante, Too.; తెల్లములక - tellamulaka, Tel.; ചെറുചുണ്ട - cheruchunta, Mal.; තිබ්බටු - tibbatu, Singh.; முள்ளி - mulli, Tam.). San. from (brih, san. to grow) [prickly brinjaul]. Dec. from (kolsá, dec. charcoal + jhár, dec. tree) [indian nettle, neermoolly]. Can. from (kempu, can. red + gullagida, can. the plant, solanum ferox, linn.). Tel. from (tella, tel. white + mulaka, tel. solanum ferox, linn.). Mal. from (cheru, mal. small + chunta, mal. solanum verbascifolium, linn.). Tam. from (mul, tam. thorn). San. also (alpap'halá), meaning having small fruit; (bahupatrí), meaning large-leaved; (dushpradharshiní), meaning not to be touched; (kshudrabhantákí), meaning small brinjaul; (kantálu), meaning adorned with thorn; (kantakiní), meaning thorny; (vanavrintákí), meaning wild brinjaul; (simhí), meaning injuring, from thorns; (dusparshá), meaning not to be touched [caunjory, prickly brinjaul]; (kantakáriká), meaning giving out thorn; (kantatanu), meaning having thorny body; (mahatí), meaning great; (mahatíkrántá), meaning surpassing brinjaul; (ráshtriká), meaning produced in country; (st'húlakantaká), meaning large thorned;

(tóraní), meaning pertaining to gate; (shvétavrihatí), meaning white brinjaul; (asprishí), meaning not to be touched; (vyághrí), meaning tiger-like, from thorns. Can. also (kirigullagida), meaning small + solanum ferox, linn.; (badanegida). Mal. also (nilavazhutina), meaning ground brinjaul, solanum melongena, linn.; (cheruvazhutina), meaning small brinjaul. Tam. also (kuttuççedikkandangattiri), meaning bunch + tree + solanum xanthocarpum, schrad. and wendle; (páppáramulli), meaning bramin + the plant; (vazhuthalai); (karimulli), meaning black + the plant; (shiruvazhuthalai), meaning small + solanum melongena, linn. Title otherwise Bramin moolly. Botanically Solanum [cooly] indicum, linn., solanaceæ [vricsham, 94]. Alias Solanum agreste, canescens, heynei, pinnatifidum, sodomaeum, violaceum. Shrub, armed; prickles of stem compressed, recurved; leaves solitary or twin, oblong or ovate, tomentose, discolored, sinuately lobed, unequal at the base, prickly on both surfaces; racemes interfoliaceous; calyx prickly, segments reflexed; berries globose; corolla deeply five-cleft, blue; berries orange yellow; flowering all year. Root has little sensible taste or smell. Root an ingredient of dashamoolam [q.v.], used in very many diseases; in pharm. non-officinal. There are varieties, differing chiefly in shape of leaves.——*Indian oak* (بلوطالهند - ballútulhind, Hind.). Same as Teak. Also Barringtonia genus, for which see Indian oak, separate title.——*Indian oats* (ولايتى جو - viláitíjau, Hind.). Same as Vilauyaty jow.——*Indian olibanum* (لبان - lubán, Ar.). See under Olibanum.——*Indian olive* (زيتون كاپيڑ - zaitúnkáper, Hind.; زيتون كاجهاڑ - zaitúnkájhár, Dec.; കരിവെട്ടി - karivetti, Mal.). Hind. from (zaitún, ar. olive, olea europæa, linn. + per, hind. tree) [zeitoon]. Mal. from (kari, mal. black + vetti, mal. a tree of worthless timber). Title otherwise Indian wild olive. Botanically Olea [jita] dioica, roxb., oleaceæ [vricsham, 85]. Moderate sized tree; leaves opposite, oblong, remotely and acutely serrate, acuminate, smooth, on short petioles; panicles axillary and opposite below the leaves; male flowers numerous; calyx four-toothed; corolla tube very short, border four-cleft; female flowers on a separate tree; calyx as in the male; corolla none; drupe nearly round, one-celled, one-seeded, much like english sloe; flowers small, white; flowering in july. A valuable timber.——*Indian paper birch* (صنوبر هندى - sanobarihindí, Hind.). Same as Bhoojpattar.——*Indian pareira* (पाठा - pát'há, San.; वेणीवेल - vénívéla, Mahr.; دكهہ نربسى - dukhnirbisí, Hind.; పాఠ - páta, Tel.; കാട്ടുവള്ളി - káttuvalli, Mal.; වෙනිවැල් - venival, Singh.: பொன்முசுட்டை - ponmusuttai, Tam.). San. from (pat'h, san. to declare); often quoted in medicine books. Mahr. from (véní, san. braid + véla, mahr. creeper). Hind. from (dukh, hind. pain + nir, san. antidote + visha, san. poison). Mal. from (kátu, mal. forest + valli, mal. creeper). Tam. from (pon, tam. gold + musuttai, tam. ipomæa candicans); from flowers. San. also (ambasht'há), meaning behaving like mother; (véní-vallí), meaning braided creeper. Hind. also (hárjorá), meaning bonesetter; cf. piranday. Tam. also (vattattiruppi), meaning circle + to turn; from orbicular sepals. Title otherwise False pareira brava plant, Gravel root, Hair creeper, Ice vine, Velvet leaf, Wild vine. Botanically Cissampelos pareira, linn., menispermaceæ [vricsham, 5]. Alias Cissampelos acuminata, capeba, cocculus, convolvulacea, hernandifolia, hirsuta, mauritiana, microcarpa, orbiculata, tomentosa; Cocculus orbiculatus; Menispermum orbiculatum. Twining shrub; stem pubescent; leaves cordate, usually obtuse or acute, rarely emarginate, sinus narrow or wide, upper side glabrous or slightly pubescent, under more or less pubescent, or even tomentose; petioles inserted at the margin; male racemes 3-4, shorter than the petioles; sepals orbicular, unguiculate; column of stamens longer than the entire and externally hairy cup-shaped corolla; female racemes usually in pairs, sometimes solitary and forked; in flower scarcely so long as, in fruit often longer than, the leaf; drupes hairy; flowers very small, yellowish; flowering all year; habitat, tropical and sub-tropical india from scinde to ceylon. The root is about half an inch in diameter, bark light brown, marked with longitudinal furrows, and transverse constrictions, sometimes very crooked and knotty, from growing in stony ground, seldom branched, fracture fibrous, bark corky, and thick for the size of the root, wood yellowish, in from 10 to 15 wedge-shaped bundles, containing many large vessels, and separated by narrow medullary rays; odour none; taste at first sweetish and aromatic, afterwards very bitter. The bark is brown or greyish-brown, wrinkled longitudinally and crossed transversely by annular elevations; interior woody, porous, and yellowish-white. The root is medicinally demulcent, sedative, and slightly diuretic; active principle, a bitter alkaloid identical with bebeerine. Decoction; take of the root, cut into small pieces and slightly bruised, two ounces and a half; water, one pint and a half; boil on a slow fire till the liquid is reduced to one pint, cool, strain. Dose from one to three fluid ounces. Substituted for pareira root imported from europe. Real pareira brava is from Chondodendron tomentosum of Peru and Brazil. ——*Indian pennywort* (मण्डूकपर्णी - mandúkaparní, San.; एकपानी - ékapání, Mahr. and Conc.; ارتانياء هندى - artániyái-hindí, Ar.; وللارى - vallárí, Dec.; ಒಂದೆಲಗ - ondelaga, Can.; ತಿಮರೆ - timare, Too.; పిన్న ఏలకి - pinnaélaki, Tel.; കടകം - kutakam, Mal.; හිංගොටුකොළ - híngotukola, Singh.; வல்லாரை - vallárai, Tam.). San. from (mandúka, san. frog + parna, san. leaf) [munjeet]. Ar. from (artániyá, ar. pennywort, antirrhinum cymbalaria, linn. + hindí, ar. indian). Dec. from tamul. Can. from (ondu, can. one + ele, can. leaf). Tel. from (pinna, tel. small + élaki, tel. elettaria cardamomum, maton). Mal. from (kutaku, mal. the hill so called). Singh. means small hydrocotyle. Tam. from (val, tam. strong + árai, tam. marsilea quadrifolia, linn.). San. also (bhékaparní), meaning frog + leaf; (mandúka-patra), meaning frog + leaf; (satyanát'ha), meaning lord of truth; (bráhmí), meaning relating to brahma; (mandukí); (bhékí). Hind. also (bráhmamendki), meaning bramin frog. Dec. also (vallárikápattá), meaning hydrocotyle leaf. Tel. also (mandúkabramhi); (bokkudu) [prickly coorvitchy]; (bollibúsara), meaning white + physalis peruviana, linn.; (babbasa). Mal. also (muttil), meaning matured gingelly. Title otherwise Asiatic penny-wort, Frog-leaf, Vallauray. Botanically Hydrocotyle asiatica, linn., umbelliferæ [vricsham, 67]. Alias Hydrocotyle thunbergiana, triflora; Trisanthus cochin-chinensis. Herbaceous; leaves attached by the margin, orbicular-reniform, equally crenated, seven-nerved, glabrous or slightly villous below when young; petioles and peduncles fascicled, sprinkled with soft hairs; umbels capitate, short-peduncled, few-flowered; calyx tube slightly compressed; petals ovate, acute, spreading; fruit orbicular, reticulated, with four ribs on each of the flat sides, flowers whitish or purplish red. The plant grows freely all the year round if watered, sending out long runners, which produce leaves, roots and fruit at the joints; the fresh herb has an aromatic somewhat ivy-like odour when crushed and a nauseous bitter taste, but these qualities are to a great extent lost in drying. Gives to pharm. the bitter leaves, hydrocotyles folia; active principle, oil, vellarine; weak alterative tonic, locally applied stimulant; preparations, pulvis hydrocotyles, cataplasma hydrocotyles; officinal. There are other species:—conferta, javanica, rotundifolia.——*Indian peppermint* (فوتنج هندى - fútanjihindí, Hind.). See Poodeenah.——*Indian perch* (ندى كا كٹرنا - naddíkákatarná, Hind.). Same as Cock up.——*Indian pink* (कामलता - kámalatá, San.; ಕೆಂಪುಮಲ್ಲಿಗೆ - kempu-mallige, Can.; సూర్యరత్నము - súryaratnamu, Tel.; സൂര്യകാന്തി - súryakánti, Mal.; තරුලතා - tarulatá, Singh.; கெம்புமல்லிகை - kembumalligai, Tam.). San. from (káma, san. love + latá, san. creeper); beautiful creeper [quamoclit]. Can. from (kempu, can. red + mallige, can. jasmine). Tel. from (súrya, san. sun + ratna, san. gem) [quamoclit]. Mal. from (súrya, san. sun + kánti, san. lustre) [sooryacaunty]. Singh. from (taru, san. tree + latá, san. creeper). Tam. from (kembu, tam. ruby + malli-gai, tam. jasmine, jasminum). San. also (tarulatá), meaning tree + creeper; (shvétatarulatá), meaning white + tree + creeper. Hind. also (kámalata); (láltarulata), meaning red + the creeper; (sufedtarulata), meaning white + the creeper. Tam. also (mayirmánikkam), meaning hair ruby; from filiform leaves. Title otherwise American bell-flower, Barbadoes sweetwilliam, China creeper, Crimson cypress-vine, Cupid's flower, Cypress vine, Indian forget-me-not, Star creeper, Wing-leaved convolvulus. Botanically Ipomæa [calamby] quamoclit, linn., convolvulaceæ [vricsham, 93]. Alias Convolvulus pennatus, quamoclit; Quamoclit vulgaris. Climbing annual, 6 feet, pinnate leaves, bright-red, white, or rarely yellow flowers.——*Indian pipeflower* (భారంగి - bhárangí, Tel.). Same as Bhraungy.——*Indian plum* (प्राचीनामलक - práchínámalaka, San.; ताळीशपात्रि - tálíshapatri, Mahr.; زرنب - zarnab, Ar.; تالسپترى - tálíspatrí, Hind. and Dec.; ತಾಳೀಸಪತ್ರಿ - tálisapatri, Can.; తాళిసపత్రి - tálisapatri, Tel.; താളീശപത്രം - tálíshapatram, Mal.; රටඋගුරැස්ස - rataugurassa, Singh.; தாளிசப்பத்திரி - tálisappattiri, Tam.). San. from (práchína, san. east + ámalaka, san. emblic myrobalan tree, phyllanthus emblica, linn.). Hind., &c., from (tálísha, san. the tree + patra, san. leaf) [country cinnamon]. Singh. from (rata, singh. foreign + ugurassa, singh. sweet lovilovi tree, flacourtia ramontchi, l'herit.). Tam. from (tálísha, san. the tree + pattra, san. leaf) [cassia cinnamon]. San. also (tálísha), meaning killing disease like toddy [taulisam]; (tálíshapatra), meaning the tree + leaf; (kálaméshí), meaning black + nardostachys jatamansi, dec. [bawchee, munjeet]; (khadiraparni), meaning having leaves like khadira, acacia catechu, willd; (vidára), meaning tearing asunder. Ar. also (rijluljurád), meaning foot of locust, from shape of leaf. Hind. also (pániáunla), meaning water + phyllanthus emblica, linn.; (paníyála), by corr.; (barhmí). Dec. also (tajpát), meaning cassia leaf, cinnamomum tamala, nees. [country cinnamon]; (barmí). Can. also (goragi); (charichali); (chanchalimara). Singh. also (talis). Title otherwise East indian plum, Many-spined flacourtia, Puneeala plum, Water myrobalan. Botanically Flacourtia [swaudoocantacam] cataphracta, roxb., bixineæ [vricsham, 14]. Middling sized tree, armed with large multiple thorns; leaves oval-oblong, acuminated, serrated; racemes axillary, many-flowered; flowers small, greenish; fruit of the form and size of a cherry [q.v.] or tiparee, slightly compressed into a five or six-sided shape, of a deep dull purplish chocolate color; indigenous in dry forests; flowering in the cold season. Leaves and young shoots taste like rhubarb; astringent and stomachic properties, in diarrhœa, weakness and consumption; infusion of bark in hoarseness; quoted in pharm. but non-officinal. Fruit edible; oil [yennay] from seeds; wood closegrained, hard and durable, but girth small. Compare — Achras sapota, sapota plum; Cordia myxa, assyrian plum; Dios-

pyros kaki, japanese date plum; Diospyros montana, date plum; Eugenia jambolana, java plum; Eugenia jambos, malabar plum; Flacourtia ramontchi, mauritius plum; Prunus communis, var. insititia, bokhara plum; Prunus triflora, chinese plum; Spondias mangifera, hog plum; Ximenia americana, mountain plum; Zizyphus vulgaris, round plum. See gloss. paragraphs.——*Indian purslane* (लोणी - lóní, San.; بقلةالحمقاء - bakalatulhumakah, Ar.; خرفەکلان - khurfahikalán, Pers.; برالونیا - baráloniyá, Hind.; خلفہ - khulfah, Dec.; ದೊಡ್ಡಗೋಣಿ - doddagóni, Can.; బొడ్డుపావిలి - boddupávili, Tel.; കരിച്ചീര - kariççíra, Mal.; ගොන්ද - genda, Singh.; கோழிக்கீரை - kózhikkírai, Tam.). San. from (lú, san. to cut); on account of its acidity. Ar. from (bakalah, ar. purslane, portulaca + humaka, ar. fools); from its growing anywhere regardless of soil. Pers. from (khurfah, pers. purslane + kalán, pers. large). Hind. from (bará, hind. large + loniya, hind. purslane). Dec. from persian. Can. from (dodda, can. large + góni, can. a plant). Tel. from (boddu, tel. navel + pávili, tel. portulaca quadrifida, linn.). Mal. from (kari, mal. black + chíra, mal. greens). Tam. from (kózhi, tam. fowl + kírai, tam. vegetable); from fleshy leaves like cock's crest. San. also (lónámlá), meaning cutting sourness; cf. sour auray. Ar. also (bakalatulmubárik), meaning excellent purslane. Pers. also (turuk). Hind. also (loniya); (núniyah); (luniyakhulfah). Can. also (doddagorai). Tel. also (peddapávili), meaning large + portulaca quadrifida, linn.; (gangapávili), meaning large + the plant; (gangarégu), meaning large + jujube tree, zizyphus jujuba, lam.; (battsali) [heart-leaved malabar night-shade, indian spinach, small indian purslane]; (pappukúra), meaning dholl + vegetable. Tam. also (paruppukkírai), meaning dholl + vegetable, from being cooked with dholl [common dholl]. Greek ἀνδράχνη, Latin porcilaca. Title otherwise Cock's greens, Dholl greens, Fool's purslane, Khoolfah, Lony. Botanically Portulaca oleracea, l., portulaceæ [vricsham, 18]. Annual, herbaceous diffuse; leaves scattered, entire, cuneiform, fleshy, axils and joints naked; flowers sessile; petals five, small, yellow; capsule one-celled; seeds numerous; common weed cultivated by gardeners; flowering in the rainy season. Seeds are medicinally demulcent, slightly astringent and diuretic; leaves refrigerant, astringent, diuretic and emollient; draught made from either; dose of seeds, from thirty grains to one drachm; of juice of leaves, from one to two fluid ounces; substituted for spirit of nitrous ether, pareira-brava, tragacanth [kateerah], elm-bark, rhatany and copaiba. Used as spinach and in curries [q.v.] almost tasteless; leaves used as famine food. Leaf makes green dye [shauyam]. Three varieties of oleracea, the common green, the golden, and the large-leaved golden, grown in gardens.—"*b*" Small indian purslane; with the following vernaculars (upódakí, San.; bhuíkóhalí, Mahr.; baklatulmubárik, Ar.; khurfah, Pers.; chhotáloniyá, Hind.; khulfah, Dec.; baççale, Can.; sannapávili, Tel.; nílaççíra, Mal.; híngenda, Singh.; shirubasalai, Tam.); San. from (upa, san. near + udaka, san. water); Mahr. from (bhuí, mahr. earth + kóhali, mahr. cucurbita pepo, dec.); Ar. from (bakalah, ar. purslane, portulaca + mubárik, ar. auspicious); Hind. from (chhotá, hind. small + loniyá, hind. the purslane, portulaca); Dec. from persian; Can. from (baçça, san. to eat + ele, can. leaf); Tel. from (sanna, tel. fine + pávili, tel. the plant); Mal. from (nila, san. blue + chíra, mal. greens); Singh. from (hín, singh. small + genda, singh. portulaca oleracea, linn.); Tam. from (shiru, tam. small + pasalai, tam. the plant); title otherwise Creeping purslane, Large-flowered purslane, Sun plant, White horse; is botanically Portulaca quadrifida, linn., portulacaceæ [vricsham, 18]; alias Illecebrum verticillatum; Meridiana quadrifida; Portulaca linifolia, meridiana, repens. Annual, diffuse, creeping; joints and axils hairy; moss-like leafage; leaves oblong, fleshy, entire, flat; flowers terminal, nearly sessile, surrounded by four leaves, small, yellow; petals four stamens 8-12; flowering in august and september; the flowers expand at noon and continue open till sunset; medicinal action same as oleracea; fleshy leaves used as greens [keeray]; used as famine food.—"*c*" Other common species of portulaca are:—tuberosa, wightiana.—"*d*" Compare in other genera:—Bergia verticillata (nírupávila), water purslane; Sesuvium portulacastrum, west indian samphire purslane; Trianthema decandra (gangapávili), large purslane; see gloss. paragraphs.——*Indian quince* (سفرجل هندی - safarjalihindí, Ar.). Same as Bael.——*Indian rattel* (भल्लशूकर - bhallashúkara, San.; بیجو - bíjú, Hind.; బియ్యఖవర్ - biyakhavar, Tel.; പന്നിക്കരടി - pannikkarati, Mal.; தவக்கரடி - tavakkaradi, Tam.). San. from (bhalla, san. bear + shúkara, san. pig). Mal. from (panni, mal. hog + karati, mal. bear). Tam. from (tavazh, tam. to creep + karadi, tam. bear); from the slow awkward motion. Tam. also (tagasu). Title otherwise Badger, Honey badger. Mellivora indica, melinæ, mustelidæ, semi-plantigrada, carnivora, mammalia [sastanam, 8], of naturalists [jantoo]. Alias Mellivora ratel; Ratelus indicus; Ursitaxus inauritus; Ursus indicus. The badgers and their affines differ from the weasels and martens by their heavy form; stout limbs and more inactive gait, by the decidedly fossorial claws in some, and their harsh coarse hair; and in this group are comprised most of those animals that have the power of diffusing a fetid stench. They are moreover entirely ground animals. They ordinarily erect their tail, and most of them are more are less striped longitudinally. The animal mentioned at head is, above tawny white or light gray, black on the sides and beneath; tail short. Found chiefly in hilly districts, where it has greater facilities for constructing holes and dens. Eats rats [ely], birds [pacshy], frogs [bhaicam], whiteants [q.v.], and various insects, and in the north of India it is known as the grave-digger. It is often destructive to poultry. Its thick and loose skin preserves it from the effects of stings.——*Indian red wood* (ناتکا شیشم - nátkáshísham, Hind.). Same as Soymida.——*Indian resin* (ناتکا گوند - nátkágond, Hind.). Same as White dammer.——*Indian rhubarb* (रेवलचिनी - révalchinní, Mahr.; راوند هند - rávandihind, Ar.; ریوند هندی - revandihindí, Pers.; هندی ریوند چینی - hindírevandchíní, Hind.; نات کی ریوند چینی - nátkírevanchíní, Dec.; ನಾಡುರೇವುಚಿನ್ನಿ - nádurévuchinni, Can.; నాటురేవల్చిన్ని - náturévalchinni, Tel.; நாட்டுமஞ்சட்சீனக்கிழங்கு - náttumañjadchínakkizhangu, Tam.). Ar. from persian Pers. from (revand, pers. rhubarb + hindí, pers. indian). Hind. from (hindí, hind. indian + revand, pers. rhubarb + chíní, pers. chinese). Dec. from (nát, hind. country + revan, hind. rhubarb + chíní, hind. chinese). Can. from (nádu, can. country + revan, hind. rhuburb + chíní, hind. chinese). Tel. from (nádu, tel. country + révandchíni, hind. chinese rhubarb). Tam. from (nádu, tam. country + mañjal, tam. yellow + shínam, tam. china + kizhangu, tam. esculent root). Hind. also (révandíchíní), meaning chinese rhubarb. Tel. also (nátupasupuchínagadda), meaning country + yellow + china + root; (révalchinni); (pasupuchínagadda), meaning yellow + china + root. Tam. also (náttuyirévalsinni), meaning country + rhubarb; (mañjadsínakkizhangu), meaning yellow + china root; (irévalsinni) [ceylon gamboge]. Title otherwise Himalayan rhubarb. Product of Rheum emodi, wall., Rheum moorcroftianum, royle, and Rheum webbianum, royle, polygonaceæ [vricsham, 110]. Less active than imported rhubarb, turkey, russian or china; which are officinale. Oxalic acid exists in the juice and crystals of oxalate of lime give grittiness to the roots. The dried root is primarily a mild cathartic; secondarily astringent; in small doses, stomachic and astringent; hakeems [q.v.] use it more than veidyans [q.v.]. The petioles used in cooking.——*Indian roller* (عقعق هندی - akakihindí, Hind.). Same as Indian jay.——*Indian rose* (گل سفید بری - gulisufídíbárrí, Hind.). See under Gool.——*Indian rose-bay* (خر زهره هندی - kharzahrahihindí, Hind.). Same as Adam's apple.——*Indian rubber* (لبر - labbar, Hind. and Dec.; പാച്ചോറ്റിപ്പശ - páççóttippasha, Mal.). Hind. by corruption. Mal. from (páççótti, mal. the milk-shedding plant, dichopsis elliptica, benth. + pasha, mal. gum). Also known as caoutchouc. Is the thickened milky juice of trees, principally of the breadfruit [jack], mulberry [indian mulberry], dogbane, swallow-wort [yercum], and spurge-wort [milkhedge] families; great quantities obtained from species of hevea, in commerce known as para rubber. Manihot glaziovii, euphorbiaceæ, gives ceara or scraprubber, ceara being province of north brazil. Stilpnophyllum elasticum, endl., moraceæ [indian caoutchouc], gives real east indian. Urceola elastica, roxb., affords a juice that when thickened has all the properties of the caoutchouc. The milky exudations of Artocarpus integrifolia, willd. [common jack], Ficus bengalensis [banyan], and Ficus religiosa, linn. [peepul] possess nearly similar qualities.——*Indian rubber tree* (ناتکا لبر - nátkálabbar, Hind.). Same as Indian caoutchouc.——*Indian rubber vine* (பாலை - pálai, Tam.). Same as Paulay silk cotton.——*Indian sacred bean* (श्रीपर्णी - shríparní, San.). Same as Nelumbo.——*Indian sage* (कर्पूरपत्र - karpúrapatra, San.; سفاقس - safákus, Ar.; سالبیه - sálbiyah, Pers.; ولایتی کافور کا پات - viláitíkáfúrkápát, Hind.; ولایتی کافور کا پتا - viláitíkáfúrkápattá, Dec.; சேசி - shési, Tam.). San. from (karpúra, san. camphor + patra, san. leaf); from smell. Hind. from (viláití, hind. foreign + káfúr, pers. camphor + pát, hind. leaf). Hind. also (banbabúri), meaning forest + acacia arabica, willd. Tam. also (shímaikkarppúrayilai), meaning foreign + camphor + leaf; (káttukkañjángórai), meaning forest + white basil, ocimum basilicum, linn., from similar smell. Title otherwise Camphor leaf, Sage tea plant. Botanically the Salvia genus, labiatæ [vricsham, 103]. Herbs or shrubs distinguished by lipped calyx and two forked stamens; some species considered to have healing properties. The species best known to the natives are:—Gerardiana; with scarlet flowers. Indica, infusion used as gentle tonic. Officinalis, garden, sage, shrubby, dwarfish plant, of somewhat bitter and very hot, aromatic, and slightly astringent flavor; native of south europe; leaves imported; the chinese prize this, and the tea-trade commenced by the dutch exchanging it for tea [q.v.]; leaves are medicinally feeble tonic, astringent, diaphoretic, antispasmodic; their chief use is as a wash for aphthous affections of the mouth and as a gargle in sore-throat and relaxation of the uvula; leaves are macerated to form a drink used in febrile affections to allay nausea. Plebeia, stem herbaceous, erect, branched, pubescent; leaves petioled, oblong, wrinkled; verticels lax, about six-flowered, racemose; racemes paniculate; calyx campanulate, upper lip quite entire, teeth of the lower lip obtuse; corolla scarcely longer than the calyx; flowers purple. Silarea; common clary; greek ὅρμινον and φύρβιον; latin oculus christi.——*Indian sago palm* (ساگودانه هندی - ságúdanahihindí, Hind.). See under Sago.——*Indian*

salep (सफेदमुसळी - sap'hédamusalí, Mahr.; هقاقل هندی - shakákulihindí, Ar., and Pers.; سفید موصلی - sufedmúslí, Hind.; هندی هقاقل - hindíshakákul, Dec.). Mahr. from (sap'héda, mahr. white + musalí, mahr. curculigo orchioides, gærtn.). Ar. from (shakákul, ar. wild carrot, asparagopsis floribunda, kth. + hindí, hind. indian). Hind. from (sufed, hind. white + múslí, hind. curculigo orchioides, gærtn.). Dec. from arabic. Hind. also (satávar). Title otherwise Indian shakaukool, Indian wild carrot. Botanically Asparagopsis [shatamooly] ascendens, kunth., liliaceæ [vricsham, 136]. Alias Asparagus ascendens. Herbaceous, erect; spines solitary, straight; leaves fascicled, cylindric; racemes lateral, simple or composite; berries pendulous; flowers white; flowering in october and november; the sprays of minute flowers resemble plumes of silver. Dried tuberous root demulcent and nutrient; substituted for british salep [q.v.]. Is the soofaid moosly of other parts of india, not here; see that head.——*Indian salt-wort* (سجی کهار - sajjíkhár, Hind.; ఈలకూర - ílakúra, Tel.; உமரிக்கீரை - umarikkírai, Tam.). Title from place of growth. Hind. from (sajjí, hind. alkali + khár, hind. saline). Tam. from (uvar, tam. salt + kírai, tam. vegetable). Tel. also (yellakúra). Tam. also (kózhikkásiraikkírai), meaning cock + hibiscus cannabinus, linn.; (kózhippasalai), meaning fowl + the plant, basella. Title otherwise Indian glass-wort, Indian salsola, Yellacoora. Botanically Suæda indica, moq., salsolaceæ [vricsham, 108]. Alias Salsola indica. Stems perennial, erect, branching out into many diffuse, alternate ramifications; leaves scattered round the branchlets, erect, approximate, sessile, linear, semi-cylindric, colored in the older plants; spikes terminal, erect, compound or panicled, leafy; flowers minute, greenish, aggregate in the axils of the floral leaves; calyx five-cleft; segments concave within, with a slightly membranaceous margin. Small, procumbent weed, linear shaped leaves having no stalks; with pea green leaves; found in salt marshes, sometimes in gardens. Used in native culinary as spinach [indian spinach]. Yields alkaline ashes, used as mordant [cauram]. There is a Teloogoo proverb:—ఉలుకుల్లని మొగుడు ఈలకూరలో ఉప్పు లేదన్నట్లు.—"The carping husband says to "his wife there is no salt in yellacoora."—Sea side indian salt-wort; with the following vernaculars (ravakáda, Tel.; nírumari, Tam.); Tam. from (nír, tam. water + umari, tam. the plant, suæda indica, moq.); is Suæda nudiflora, moq., salsolaceæ [vricsham, 108]; alias Salsola nudiflora; stems perennial, many, spreading close upon the ground, and often rooting; extremities of the branches ascending, young parts smooth and colored reddish; leaves alternate, sessile, linear, fleshy; spikes terminal, erect, very long, compound, leafless; flowers very small, greenish, numerous, fascicled; common in salt barren land near sea; very saline taste; yields sujjee [q.v.] for making soap [sauboon] and glass [cunnaudy]; ashes used as mordant [cauram]; natives gather it for fuel.——*Indian sanobar* (صنوبر هندی - sanobarihindí, Ar.). Same as Deodar.——*Indian sarsaparilla* (अनन्ता - anantá, San.; अनन्तमूळ - anantamúla, Mahr.; दुदवालि - dudaváli, Conc.; عشبة مغربية - ushbahimaghribiyah, Ar.; عشبهٔ هندی - ushbahihindí, Pers.; هندی سالسهٔ - hindísálsa, Hind.; ناتکا عشبه - nátkáushbah, Dec.; ಸುಗಂಧಿಬಳ್ಳಿ - sugandhiballi, Can.; ಕನ್ಯಾಬೂರು - kanyábúru, Too.; సుగంధిపాల - sugandhipála, Tel.; നറുനീണ്ടി - naruninti, Mal.; ഇരമസു - iramasu, Singh.; நன்னாரி - nannári, Tam.). Title from similar odour of root. San. from (a, san. negative prefix + anta, san. end); from its value as medicine or from long root [common nail-dye, hurrially]. Mahr. from (ananta, san. endless + múla, san. root). Ar. from (ushbah, ar. sarsaparilla + maghribí, ar. western); from being first known in andalusia in spain. Pers. from (ushbah, ar. sarsaparilla + hindí, pers. indian). Hind. similar. Dec. means country sarsaparilla. Can. from (sugandhi, san. well perfumed + balli, can. creeper). Too. from (kanyá, san. virgin + búru, too. creeper). Tel. from (su, san. good + gandha, san. smell + pála, tel. milk plant). Mal. from (naru, mal. fragrance + nílu, mal. to extend). Tam. from (nal, tam. good + náru, tam. to be fragrant). San. also (sugandhí), meaning sweet-smelling [marootham]; (gopí), meaning protecting; (anantamúla), meaning having endless root; (bhadravallí), meaning happy creeper; (raktashárívá), meaning red + the plant; (shárívá), meaning variegated, from striped leaf [sarsaparilla china root]. Ar. also (ushbatunnár), meaning sarsaparilla + fire; (zaiyán). Pers. also (yásmínibarrí), meaning wild jasmine, from fragrance and acridity. Hind. also (nannáríjar), meaning sarsaparilla root; (kural); (maghrabí), meaning western; (janglíchambélí), meaning wild jasmine. Dec. also (nannárí), from tamul. Can. also (sugandhapáladagida), meaning good smelling + the plant; (námadabéru), meaning sectarian mark + creeper, from white striped leaf; (dúdaváli), meaning milk creeper. Tel. also (nallasugandhipála), meaning black + the plant; (tellasugandhipála), meaning white + the plant; (pálasugandhi), meaning milk + good smelling; (pálatsukkandéru), meaning milk + good smelling; (gadisugandhi), meaning large + the plant; (muttavapulagamu), meaning old + grandmother + pudding [common balah], from medicinal value in household practice. Mal. also (nannári), meaning sweet-smelling; (páravalli), meaning rock + creeper. Tam. also (kiruttinavalli), meaning black + creeper, from dark stems; (párgodi), meaning milk + creeper. Title otherwise Country ooshbah, Country sarsaparilla, False sarsaparilla, Fragrant paulay, Fragrant root, Indian sarsa, Indian sassafras, Sectarian creeper, Wild jasmine [q.v.]. Botanically Hemidesmus indicus, r. br., asclepiadeæ [vricsham, 88]. Alias Asclepias pseudosarsa; Hemidesmus cordatus; Periploca indica. Twining; stem glabrous; leaves from cordate to ovate, cuspidate, passing into narrow linear, acute, often oblong-lanceolate cymes, often sub-sessile, sometimes peduncled; scales of the corolla obtuse, cohering the whole length of the tube; follicles slender, straight; flowers on the outside, pale green, on the inside, dark blood-colored; flowering in rainy season; common in waste ground. The drug is found in commerce in the form of small bundles, which consist of the entire roots of one or more plants, often several feet long, tied up with a portion of the stem. The root is cylindrical, tortuous, from $\frac{2}{10}$ to $\frac{1}{10}$ of an inch in diameter, seldom branched; the bark is transversely cracked and fissured longitudinally, of a dark brown color, sometimes with a slight violet hue when viewed in a strong light; the wood is yellow and porous; the fresh or freshly dried root has a peculiar odour like sassafras or new mown hay, and a sweet but slightly acrid taste. Dried root alterative tonic, diuretic, and diaphoretic; veidyans [q.v.] use it in powder with cow's milk [paul] in gravel and strangury, and in decoction with cumin [jeerah] seeds to purify the blood and correct bile [pittam]; hakeems [q.v.] consider it the best alterative medicine in the country; frequently adulterated with other roots; gives to pharm. hemidesmi radix, crystallizable principle, hemidesmine; preparations, infusum hemidesmi, syrupus hemidesmi; officinal; like dulcamara, and sarsaparilla; also in british pharm. Gives a dye [shauyam]. Another species is pubescens. Compare the smilax genus [china root], which has real or jamaica sarsaparilla, smilax officinalis.——*Indian scented wood* (عود هندی - údihindí, Pers.). Same as Eagle wood.——*Indian screw-tree* (आवर्तनी - ávartaní, San.). See Screw-tree.——*Indian senna* (سناء هند - sanáihind, Ar.). Same as Tinnevelly senna.——*Indian shot* (सर्वजया - sarvajayá, San.; देवकेळी - dévakélí, Mahr.; केळ - kéla, Conc.; نبات عقيق البحر - nabátiakíkulbahr, Ar.; شجر عقيق البحر - shajariakíkulbahr, Pers.; عقيق البحر كا جهاڑ - akíkulbahrkájhár, Dec.; ಕೇಳಹೂ - kélahú, Can.; కృష్ణతామర - krishnatámara, Tel.; കാട്ടുവാഴ - káttu-vázha, Mal.; ബുത്സരണ - butsarana, Singh.; கல்வாழை - kal-vázhai, Tam.). Title from seeds being black and extremely hard, size of swan-shot. San. from (sarva, san. all + ji, san, to conquer). Mahr. from (déva, san. god + kélí, mahr. musa paradisiaca, linn.). Conc. from (kadalí, san. plantain) [plantain]. Ar. from (nabát, ar. tree + akík, ar. cornelian + bahr, ar. sea). Pers. from (shajar, pers. tree + akík, ar. cornelian + bahr, ar. sea). Dec. from (akík, ar. cornelian + bahr, ar. tree + jhár, hind. tree). Can. from (kéla, can. musa paradisiaca, linn. + hú, can. flower). Tel. from (krishna, san. black + támara, tel. nelumbium speciosum, willd.). Mal. from (kátu, mal. forest + vázha, mal. musa paradisiaca, linn.). Singh. means booddha's foot. Tam from (kal, tam. stone + vázhai, tam. plantain, musa paradisiaca, linn.); found among rocks [wild plantain]. San. also (vanakadalí), meaning forest plantain; (shilárambhá), meaning rock plantain. Hind. also (lálsabza), meaning red ocimum basilicum, linn.; Can. also (húdingana). Tel. also (gurigindza), meaning abrus precatorius, linn. + seed; from seeds [indian liquorice]. Tam. also (púvázhai), meaning flower + plantain, musa paradisiaca, linn.; (kunrimaniççedi), meaning seed of abrus precatorius, linn. + plant; from seeds, commonly applied to indian liquorice [q.v.]. Title otherwise Booddha's foot, Cornelian tree, Flowering plantain, Flowering reed, Indian bead, Liquorice plantain, Rock plantain, Stony plantain. Botanically Canna indica, linn., marantaceæ [vricsham, 143]. Alias Canna orientalis, rubra, variabilis; Cannacorus ovatus. Shrub, 2–3 feet; leaves large, ovate-lanceolate, stem-clasping; inner wing of the corolla trifid, segments lanceolate, straight; anther single, attached to the edge of the petal-like filament; style spathulate, growing to the tube of the corolla; capsule bristly, 3-celled, many-seeded; flowers bright scarlet or yellow; constantly in blossom in gardens as ornamental plant; round, hard, black seeds, contained in the hairy pericarp; the root is acrid and stimulant. The root broken up in small pieces and boiled in rice-water [conjee] with pepper [q.v.] is given to cattle [maund] that have eaten any poisonous grass; in ordinary medicine diaphoretic and diuretic in fevers and dropsy. Contains starch in the root-stock, which renders it fit to be used as food after being cooked. The leaves are large and tough, and are sometimes used for wrapping up goods; the natives make necklace [maulay] and other ornaments of the seeds; the leaves yield a purple dye [shauyam] not durable. From Canna edulis comes Tous les mois in w. indies like arrowroot.——*Indian skylark* (வானம்பாடி - vánambádi, tam.). See Vaunambaudy.——*Indian sloth* (شرمندی بلی - sharmindíbillí, Hind.). Ar. from greek. Pers. from greek. Can. from tamul [heart-leaved malabar nightshade]. Tel. from (dumpa, tel. root + battsali, tel. bassella cordifolia, lam.) [red malabar nightshade]. Tam. from (pasumai, tam. greenness) [papaw, small indian purslane]. Hind. also (sagpáluk), meaning dog spinach. Tel. also (mattubattsali), meaning inferior + bassella cordifolia, lam.; (battsali) [heart-leaved malabar nightshade, indian purslane]. Title otherwise Butchaly, Common spinach, Garden spinach, New zealand spinach, Paluck, Spinage. Botanically Spinacea oleracea, linn., salsolaceæ [vricsham, 108]. Alias Spinacia tetrandra. Potherb, native of persia. The plant has large, thick, succulent, deep-green leaves, of a somewhat triangular form, produced on long foot stalks; the stem is erect, large, round and hollow, about two feet high; the male plants are distinguished by their long terminal spikes of green flowers, while those of the females are axillary, sessile and clustered; cultivated in gardens as culinary vegetable [keeray]. Two varieties; prickly-seeded, smooth-seeded.——*Indian squill* (اسقیل هند - iskílihind, Ar.). See Squill.——*Indian swift* (عصفور هند - usfúrihind, Hind.). See Abaubil.——*Indian tailor-bird* (टुण्टुक - tuntuka, San.; پھدکی - phudkí, Hind.; پٹپٹا - pitpitá, Dec.; ಗಿಜ್ಗ - gijga, Can.; లిక్కుజిట్ట - likkujitta, Tel.; தூக்கணங்குருவி - túkkanan-guruvi, Tam.). Title from building its nest by sewing leaves together. Tel. from (likki, tel. small sickle + jitta, tel. bird). Tam. from (túnganam, tam. pendant + kuruvi, tam. small bird). Tel. also (rellujitta), meaning reed bird, from haunts. Title otherwise Wren-warblers, Drymoicinæ, sylviadæ [calacuntam], dentirostres, insessores, aves [pacshy, 23], of naturalists [jantoo].—"*a*" The best known is Orthotomus longicauda. Alias Orthotomus bennettii, sphenurus, sutoria; Sylvia guzurata, ruficapila. Ordinary note is to-wee-to-wee-to-wee; when alarmed or angry has a different call. Makes nest with cotton [q.v.], wool [pushm], and various soft materials, sometimes lined with hair, draws together one leaf or more, generally two leaves, on each side, stitches them together with cotton, either woven by itself, or cotton thread [nool] picked up; after passing thread through the leaf, makes a knot at the end to fix. Nest generally built from two to four feet above ground.—"*b*" The dark-ashy wren-warbler is Prinia socialis not seen north of the Godavery. Nest not so neatly sewn together as orthotomus, generally more grass and other vegetable fibres used in construction.—"*c*" Rufous grass-warbler is Cisticola schoenicola. When put up, takes short jerking flight for a few yards and then drops again. Single note jik, jik.—"*d*" The common wren-warbler, called in Teloogoo the hollow eye bird, is Drymoipus inornatus. Rather loud monotonous note twee-twee-twee. Flight feeble. Nest woven with grass, nearly globular, with a hole at the side, lined with soft down. generally that of Calotropis gigantea [yercum].—"*e*" The jungle wren-warbler is Drymoipus sylvaticus.——*Indian tamarisk* (گزانگبین هندی - gazangabínihíndí, Hind.). Same as Manna jhow.——*Indian tea* (ناٹ کی چاہ - nátkíchá, Hind.). Infusion of the leaves of Ocimum canum [white toolsy].——*Indian titlark* (గుర్రపుమారిజిట్ట - gurrapumárijitta, Tel.). See Pilkya.——*Indian tragacanth* (هندی کتیرا - hindíkaterá, Hind.). Product of Cochlospermum gossypium, dec. [golden silk cotton].——*Indian tree spurge* (زقوم هندی - zakkúmihindí, Ar.). Same as Round milk-hedge.——*Indian trout* (ஆற்றுக்கெண்டை - áttukkendai, Tam.). Tam. from (áru, tam. river + kendai, tam. carp, barbus genus). Title otherwise Neilgherry trout, River carp. Barilius gatensis, cyprininæ, cyprinidæ, physostomi, teleostei [matsyam, 39], of naturalists [jantoo]. Alias Barilius rugosus; Leuciscus gatensis; Opsarius gatensis. Silvery gray with about fifteen vertical bars descending from the back, and which become more or less broken up in the adult; dorsal and anal with dark bases and light margins; females and young generally have smooth scales, whereas most of the adult males have one or more rough spots on each; western ghauts of malabar and neilgherry hills, up to about 5,000 feet above the level of the sea; at least six inches in length.——*Indian trumpet flower* (शुकनास - shukanása, San.). Same as Pajanely.——*Indian varnish* (بھلاوینکا جھاڑ - bhílávenkájhár, Hind.). Same as Marking nut.——*Indian walnut* (هندی اکروٹ کا پیڑ - hindíakrotkáper, Hind.). Tel. from (saura, tel. beauty + anga, san. body). Mal. from (katiram, mal. beauty). Tam. from (kizhangu, tam. esculent root). Tel. also (tellasórangí), meaning white + whiting, sillago genus; (aritikáya), meaning plantain; (nettaluchépa), meaning sprat, clupea sprattus + fish. Sillago sihama, trachinidæ, acanthopterygii, teleostei [matsyam, 21], of naturalists [jantoo]. Alias Atherina sihama; Platycephalus sihamus; Sciæna malabarica; Sillago acuta, erythræ, malabarica; Sparus soring. Soring from teloogoo. Upper jaw slightly longer; scales about six rows between lateral-line and last dorsal spine; air-vessel extends posteriorly to opposite first third of anal fin; colors olive-green along back, becoming light on abdomen, the whole having brilliant purple reflection; silvery longitudinal band; minute black points on dorsal and anal fins; sea, ascends tidal rivers. Native women who have young babies are advised to eat it, as it is said to be even more nourishing than shark's [soorah] flesh. The only fish which veidyans [q.v.] allow leprous [cooshtam] patients to eat. Whitings are here smaller than in Europe. Bengal whiting is Sciænoides pama.——*Indian wild pepper* (اثلق ابی - aslakiábí, Hind.). Same as Water notchy.——*Indian wine palm* (سیندی کا جھاڑ - sendíkájhár, Hind.). Same as Wild date.——*Indian willow* (بیدمجنون هندی - bedimajnúnihindí, Hind.). See under Varoonam.——*Indian winter cherry* (टङ्कारी - tankárí, San.; جوزالمرج - jauzulmaraj, Ar.; کاکنج - káknaj, Pers.; مکو - makao, Hind.; ಬುಡ್ಡೆಹಣ್ಣು - buddehannu, Can.; బూసర - búsara, Tel.; பெரியதக்காளி - periyathakkáli, Tam.). San. from (tam, san. imitative sound + kára, san. doer); from sound with which the leafy cover of fruit bursts on pressure. Ar. from (jauz, ar. nut + maraj, ar. the tree). Can. from (budde, can. swelling + hannu, can. fruit). Tam. from (periya, tam. big + takkáli, tam. physalis angulata, linn.). San. also (agnimanda), meaning fire + to languish. Hind. also (poptá). Tel. also (buddabúsara), meaning bladder + the plant; (pámubudda), meaning snake + bladder; (budama) [country cucumber]. Tam. also (takkáli) [europe brinjaul]. Title otherwise Cape gooseberry, Edible winter cherry [adhatoday, asgand], Peruvian cherry, Poptah cherry, Takkauly. Botanically Physalis [takkauly] peruviana, linn., solanaceæ [vricsham, 94]. Alias Physalis edulis, esculenta. Resembling the next or indigenous article, but stouter, flowers and fruit-calyx larger, usually villous or pubescent; corolla with five large purple spots near the base within; native of tropical america; bears small yellowish flowers; fruit exactly resembles winter cherry of english gardens, to which it is closely allied; is concealed in a dry leafy appendage; is of a bright amber [karbah] color, of the precise size and form of a cherry [q.v.]; the young shoots bear the finest fruit; fruit makes good preserve; cf. brazil cherry. Small indian winter cherry; with the following vernaculars (lakshmídaivatyá, San.; chiriputla, Conc.; bondula, Can.; bondoli, Too.; pinottánotiyan, Mal.; shinnattakkáli, Tam.); San. from (lakshmí, san. the goddess + dévatá, san. goddess). Can. from (bondu, can. hole + hula, can. insect). Too. from canarese. Mal. from (pí, mal. dirty + nottánotiyan, mal. the plant, physalis). Tam. from (shinna, tam. small + takkáli, tam. physalis angulata, linn.); otherwise Small takkauly; is physalis [takkauly] minima, linn., solanaceæ [vricsham, 94]; alias Physalis lagascæ, parviflora; herbaceous, loosely villous with diffuse branches; leaves subcordate or ovate, acuminate, repandly toothed or almost entire, hairy; corolla without spots; anthers yellow; calyx of the fruit ovate, angled, here and there hairy; segments while flowering, triangular acuminate, shorter than the tube; flowers small, pale yellow; flowering nearly all the year; berries eaten by natives. Compare in other genera, where transl. is of first term:—Cardiospermum canescens (chinnabuddabúsara), small + bladder; Hydrocotyle asiatica (bollibúsara), white; Lycopersicum esculentum (erumaittakkáli), buffalo, (péttakkáli), demon, (shímaittakkáli), foreign; Solanum melongena (mulakutakkáli), chilly, capsicum; Solanum nigrum (manattakkáli), fragrance. See gloss. paragraphs.——*Indian wood-cock* (سیمتیتر - símtitar, Hind.; ಕಾಡುಕೋಳಿ - kádukóli, Can.). Hind. from (sím, pers. silver + títar, hind. partridge), from color. Can. from (kádu, can. forest + kóli, can. fowl) [grey jungle-fowl]. Hind. also (tutalar). Scolopax rusticola, scolopacinæ, scolopacidæ [vana cookkootam], longirostres, grallatores [pacshy, 41], of naturalists [jantoo]. Alias Scolopax indicus. Forehead and crown ash-grey, tinged rufous; dusky streak from gape to eyes; occiput, with four broad transverse bars of blackish brown; rest of upper part variegated chestnut brown, ochre yellow and ash-grey, with zigzag lines and irregular spots of black; throat white; rest of under parts yellowish white, passing into rufous on breast and forepart of neck with cross wavy bars of dusky brown; quills barred ferruginous and black; tail black, outer webs edged rufous, tips ash-grey above, silvery white beneath; bill fleshy grey; legs livid; irides dark brown; length 14 to nearly 16 inches; female is larger with colors more dull; a winter visitant to more elevated wooded regions. No other common species here.——*Indian worm-killer* (पत्रभंग - patrabhanga, San.; किडेमारी - kidémárí, Mahr.; کیڑا مار - kírámár, Hind. and Dec.; ಆಡುಮುಟ್ಟದಗಿಡ - ádumuttadagida, Can.; కడపర - kadapara, Tel.; ପାନିରି - paniri, Oor.; ആടുതിന്നാപ്പാല - átutinnáppála, Mal.; ஆடுதின்னாப்பாலை - áduthinnáppálai, Tam.). Title from medicinal properties. San. from (patra, san. leaf + bhanga, san. marking); from use in ornamental markings on face. Mahr. from (kidá, mahr. worm + márí, mahr. killer). Hind. from (kírá, hind. worm + már, hind. killing). Can. from (ádu, can. sheep + muttada, can. not

touching + gida, can. herb). Mal. from tamul. Tam. from (ádu, tam. goat + tin, tam. to eat + á, negative particle + pálai, tam. milky plant); goats will not eat; cf. adhatoday. Hind. also (gandán), meaning bad smeller; (gandatí). Can. also (kurigida), meaning sheep + plant. Tel. also (gádidegaddapara), meaning ass + the plant. Mal. also (átutodáppála), meaning sheep + not touching + milk-plant. Tam. also (kárirattam), meaning black + blood, from dark purple flowers; (viranambókki), meaning ulcer + to cure; cf. zakhmhayant; (pangambálai), meaning mire + milky plant; (puzhukkolli), meaning worm-killer; antidote against all insect poisons [snake jasmine]; (kiruminásam), meaning worm-killer. Title otherwise Black blood plant, Bracteated birth-wort, Floral-leaved birth-wort, Pelican flower, Ulcer plant. Botanically Aristolochia [eeshwaram] bracteata, retz., aristolochiaceæ [vricsham, 117]. Alias Aristolochia microphylla, sempervirens. Trailing; roots perennial, fibrous; stems striated, waved; leaves alternate, petioled, kidney-shaped, curled at the margins, glaucous below; petioles channelled; flowers axillary, solitary, peduncled, drooping; calyx with the upper part of the tube and tongue erect; color dark purple; covered on the inside with purple hairs; capsules ovate; flowering nearly all the year. The drug consists of the whole plant in fruit; the stems are striated, slender, and about as thick as a piece of whip cord; the leaves are of a pale, glaucous green, obtuse, heart-shaped, with wavy edges, about 2 inches long and $1\frac{1}{2}$ inch broad, when dry they are blackish; the capsules are ovate, $\frac{3}{4}$ of an inch long, ribbed, depressed at the apex, six-celled; each cell contains a column of heart-shaped flat seeds, closely packed; the appearance of the seeds is peculiar, they look as if they had been cut out with a punch; one side is flat, black, and rough from a number of irregular projections; the other is almost entirely occupied by two brown comparatively smooth lobular projections of a soft corky structure; these under the microscope are seen to be entirely composed of ovate, empty, dotted cells; the whole plant is nauseously bitter. Plant is medicinally insecticide, anthelmintic, emmenagogue, febrifuge and parturifacient; juice in pharm. non-officinal; natives squeeze juice into wounds to kill worms. Cf. Indian mulberry. ——*Indian worm wood* (افسنتین هندی - afsantínihindí, Ar.). Same as Indian absinth.——*Indian zebra-wood* (हिमपुष्प - himapushpa, San.; पन्नीरजांब - pannírajámba, Conc.; پنیرکے پھولکا جھاڑ - panírkephúlkájhár, Hind.; ಬಿಳಿಹೂವಿನಲಕ್ಕಿಮರ - bilihúvinalakkimara, Can.; పన్నీరుపువ్వుచెట్టు - pannírupuvvuchettu, Tel.; രാവുപൂ - rávupú, Mal.; නිල්පිච්ච - nilpiçça, Singh.; பன்னீர்மரம் - pannírmaram, Tam.). Title from stripes in timber like those of zebra. San. from (hima, san. dew + pushpa, san. flower); flowering in the evening. Hind. from (panír, hind. corruption of tamul meaning dew-water + phúl, hind. flower + jhár, hind. tree). Can. from (bili, can. white + húvu, can. flower + lakkimara, can. vitex negundo, linn.). Tel. from (panníru, tel. rose water + puvvu, tel. flower + chettu, tel. tree). Mal. from (rávu, mal. night + pú, mal. flower). Singh. from (nil, singh. blue + pichha, singh. jasminum sambac, ait.). Tam. from (pannír, tam. dew water + maram, tam. tree); flower on the dew-fall. San. also (hima), meaning dew. Can. also (pannéralu). Tel. also (pannírupushpachettu), meaning rose-water + flower + tree. Singh. also (valpichha), meaning forest + jasminum sambac, ait. [wild-jasmine]. Title otherwise Dew-flower, Evening flower, Jasmine cadamba, Pigeon wood, Tree jasmine [indian cork]. Botanically Guettarda speciosa, linn., rubiaceæ [vricsham, 71]. Alias Cadamba jasminiflora; Gardenia speciosa; Jasminum hirsutum; Nyctanthes hirsuta. Cadamba, from (kadamba, san. anthocephalus cadamba, miq.). Tree; leaves ovate or obovate, often slightly cordate at the base, obtuse at the apex, pubescent on the under side; cymes peduncled, axillary, velvety, much shorter than the leaf; corolla hypocrateriform, with cylindrical tube; flowers four to nine-cleft; anthers sessile in the throat of the corolla; calyx limb deciduous; stamens four to nine; drupe depressed, marked by the traces of the calyx; cells of the nut curved, one-seeded; flowers white, very fragrant. Coarse shrub frequent in gardens; flowers come out in the evening and have all dropped on the ground by the morning; flower sacred to shiva [q.v.] and vishnoo [q.v.]; in travancore odoriferous water is distilled from the corollas, like rose water [goolaub]; close-grained and durable wood.——*Indian zebu* (ماشیہ هند - máshiyahihind, Hind.). See Maud.——*Indigo* (نیل - níl, Hind.). See sep. title.

INDIAN EBONY (तिन्दुक - tinduka, *San.*; ಕರಿಮರ - karimara, *Can.*; తుమికి - tumiki, *Tel.*). San. from (tij, san. to sharpen); from acid exudation [gaub]. Can. from (kari, can. black + mara, can. tree). Title otherwise Bastard lotus, Date plum. Botanically the Diospyros genus, ebenaceæ [vricsham, 83]. Large, hard-wooded, slow-growing trees, natives of tropical countries; flowers hermaphrodite; fruit pulpy, generally egg-shaped; hard and black heart wood is the ebony of commerce; surrounded by white sapwood. The species best known to the natives are:—ebenum [ceylon ebony], embryopteris [gaub], hirsuta [calaminder wood], kaki [chinese gaub], melanoxylon [coromandel ebony], montana [forest gaub], tomentosa [sweet gaub]. Other species are:—Assimilis, on western ghauts; Candolleana, large tree, glabrous on western ghauts; Chloroxylon, small tree, circars, godavery forests, and western jungles, flower small white, fruit edible, gives a sort of ebony called large oollinda; Foliosa, moderate-sized tree, everywhere glabrous, leaves dark shining green; light-colored wood, valuable; Insignis; Microphylla; Nilagirica; Oocarpa; Ovalifolia; Paniculata; Pruriens; Sylvatica, has a whitish, very hard, but small wood. ——*Ceylon ebony* (आबनूस - ábanúsa, Mahr.; آبنوس - ábnús, Ar., Pers., Hind. and Dec.; ಕರಿಮರ - karimara, Can.; తూకి - túki, Tel.; କେନ୍ଦୁ - khendu, Oor.; කළුවර - kaluvara, Singh.; ஆச்சா - áççá, Tam.). Mahr. from arabic. Ar. from hebrew [ebony]. Can. from (kari, can. black + mara, can. tree). Tel. from (túgu, tel. to weigh), from weight. Oor. corruption from (tindu, san. diospyros embryopteris, pers.) [gaub]. Singh. means dark. Tam. from (ár, tam. density, also lustre); from hard wood capable of high polish [atchah, yaipy]. Tel. also (nallaúti), meaning black + maba buxifolia, pers. Tam. also (kákatáli), meaning crow black + palmyra, borassus flabelliformis, linn.; (tumbi). Title otherwise Black palmyra, Black satin-wood, Pomander wood. Botanically Diospyros [indian ebony] ebenum, kœnig., ebenaceæ [vricsham, 83]. Specific name from arabic. Large tree; branchlets glabrous; leaves 4 by $1\frac{3}{4}$ inches, coriaceous; primary nerves oblique; petiole $\frac{1}{6}$–$\frac{1}{5}$ inch; male flower three to twelve together, almost fascicled on peduncles 0–$\frac{1}{4}$ inch; calyx $\frac{1}{4}$ inch, funnel-shaped, nearly glabrous, lobes four, not reaching half-way down, rounded, glabrous or ciliate-pubescent on the margins; corolla-buds $\frac{1}{2}$ inch, narrower upwards, lobed half-way down; filaments minutely pilose, anthers linear glabrous, connective long produced; female flower solitary very shortly peduncled; calyx larger than in the male; style one, stigmas four; ovary eight-celled; fruit $\frac{3}{4}$ inch diameter, globose, glabrous, or adpressedly pubescent; fruiting calyx a sub-hemispheric wooden cup, fitting the base of the fruit; below its margin without spread the four ovate calyx lobes. Found in mountain forests on both sides of presidency; leaves turn very black in drying; flower small, greenish; gives the best looking ebony; wood grey, with irregularly-shaped masses of jet-black ebony [q.v.] near the centre, frequently with lighter-colored streaks; much affected by weather, on which account cabinet-makers seldom use it except in veneer; to prevent splitting, it should be well covered; grain so fine that when polished no trace of woody fibre is perceptible; white when young and darkens with age; wood imported from ceylon.——*Coromandel ebony* (काकतिन्दुक - kákatinduka, San.; آبنوس - ábnús, Ar. and Pers.; سیسم - sísam, Hind.; تیندو - tendú, Dec.; ಕರಿಮರ - karimara, Can.; తుమిద - tumida, Tel.; କେନ୍ଦୁ - khendu, Oor.; കരുവീട്ടി - karuvítti, Mal.; தும்பிலி - tumbili, Tam.). San. from (káka, san. crow + tinduka, san. diospyros); as yielding black ebony. Dec. from (tindu, san. diospyros embryopteris, pers.) [gaub, ilanjy]. Can. from (kari, can. black + mara, can. tree). Oor. corruption from sanscrit; like deccany. Mal. from (karu, mal. black + vítti, mal. black wood, dalbergia latifolia, roxb.), from purple streaks of heart-wood resembling dalbergia [yooga pattricay]. Tam. from (tumbu, tam. fibre + ili, tam. having not); fruit eatable. Hind. also (sísamkájhár), meaning dalbergia sissoo, roxb. [sissoo]. Can. also (abanási); (bilára); (balaimara). Tel. also (tummika); (tummi). Mal. also (karimaram), meaning black wood. Tam. also (karuppumaram), meaning black tree; (karungáli), meaning black + post [sandra]; (karundumbi), meaning black + the tumby tree. Title otherwise Black ebony, Crow ebony, Taindoo gum. Botanically Diospyros [indian ebony] melanoxylon, roxb., ebenaceæ [vricsham, 83]. Alias Diospyros dubia, exculpta, tomentosa, wightiana. Large tree; young shoots pubescent; leaves nearly opposite, oblong or oblong-lanceolate, acute at the base, coriaceous, entire, obtuse, when young pubescent; calyx and corolla five-cleft; male peduncles axillary, solitary, three to six-flowered; stamens twelve; hermaphrodite flowers rather larger than the male, nearly sessile; styles three to four; berry round, yellow; flowers white; seeds two to eight immersed in pulp; common in most dry forests in remote situations; trees are always small and stunted in the trunk; sheds leaves in cold season, appear again with flowers yearly in the hot season. Bark astringent used in decoction in diarrhœa and dyspepsia as a tonic; in a dilute form used as astringent lotion for eyes; reduced to powder, is applied to ulcerations; mixed with black pepper [q.v.] administered in dysentery; noted in pharm. but non-officinal. Ripe fruit is eatable, but astringent. Wood hard, light-pink color, irregular-shaped masses of ebony [q.v.] in the centre; the ebony is jet black with purple streaks, extremely hard, pores and medullary rays difficult to distinguish; wood used for buildings, shoulder poles, and carriage shafts; ebony for all purposes of fancy work, and carving, though not so good as ceylon ebony.

INDIAN MULBERRY (तूल - túla, *San.*; शातूता - shátútá, *Mahr.*; توت - tút, *Ar.*, *Pers.* and *Hind.*; شاه توت - sháhtút, *Dec.*; كراتو - kratau, *Malay*; ಹಿಪ್ಪಲಿನೇರಳೆ - hippalinérale, *Can.*; కంబళిబూచిచెట్టు - kambalibúchichettu, *Tel.*; கம்பளிப்பூச்சிச்செடி - kambalippúççiççedi, *Tam.*). San. a corruption from persian. Mahr. from persian. Ar. from persian. Pers. from (tutí, pers. parrot), from their fondness for it. Dec. from persian. Can. from (hippali, can. long pepper, piper longum, linn. + nérale, can. nauwal, eugenia jambolana, lamk.). Tel. from (kambalibúchi, tel. caterpillar + chettu, tel. tree). Tam. from (kambali, tam. woollen cloth + púçci, tam. insect + shedi,

tam. tree); caterpillar tree. San. also (túda), meaning tormented, from leaves being eaten through by the silk-worms. Ar. also (fisád). Hind. also (tutrí). Malay also (babesaran). Tel. also (kambalichettu), meaning blanket + tree. Singh. also (ratuom-billa). Tam. also (musukkattai), meaning large red ant + wood; (kambalikkondán), meaning cumbly + possessor; (kambaliççedi), meaning woollen cloth + tree. Greek *συκαμῖνος*, not to be confounded with the sycamore. Title otherwise Catterpillar tree, Parrot tree, Silk-worm tree, Sycamine, Toot. Botanically Morus indica, linn., moraceæ [vricsham, 121]. Alias Morus parvifolia. Tree 20 feet; trunk rarely more than the thickness of a man's leg; branches numerous, spreading; bark smooth, ash-colored; leaves deciduous, alternate, petioled, ovate-cordate, long, tapering, entire, pointed, with the lateral margins serrate, and sometimes lobate, and even deeply so, smooth on both sides, very various in size; female aments from the axils of the first leaves or from the scales of the envelope of the bud of the young shoots, solitary, short-peduncled, nearly oval or oval; calyx of four, fleshy cuneate leaflets; style single, half two-cleft; divisions tapering and villous; berry about the size and shape of a small field bean; when ripe black. Flower small, greenish; fruit long and cylindrical resembling a pepper [q.v.] corn, very sweet, but deficient in flavor. Root anthelmintic and astringent; fruit cooling and laxative; juice remedy for sore-throat; consists of sugar [q.v.] and tartaric acid [draucsha ooppoo]; gives to pharm.; juice of the ripe fruit, mori succus, coloring agent, officinal. Fruit and young leaves eaten; the latter are used to feed silk-worms [puttoo]. Gives a gum [gond]. The common mulberry of europe is morus nigra; the red and white mulberries, morus alba and atropurpurea, are natives of persia; the former produces the best fruit, the latter is the handsomer tree.——*Dyeing mulberry* (आच्छुक - áchhuka, San.; आल - ála, Mahr.; آل - ál, Hind. and Dec.; منكدو - mangkudú, Malay; ಹಳದಿಪಾವಟೆ - haladipávate, Can.; మూలుగు - múlugu, Tel.; ఆచు - achu, Oor.; കടപ്ലാവു - katappilávu, Mal.; අහු - ahu, Singh.; நுணா - nuná, Tam.). Hind. from mahratta. Can. from (haladi, can. yellow + pávate, can. the plant, pavetta indica, linn.). Mal. from (katal, mal. sea + pilávu, mal. jack tree, artocarpus integrifolia, willd.). San. also (achyuta), meaning not fallen. Hind. also (aççí); (ák) [yercum]. Can. also (maddi); (tagachi) [chakondah]. Tel. also (maddi) [murdah]; (togaruchettu), meaning red color + tree; (togarumogali), meaning red color + screw-pine, pandanus odoratissimus, linn.; (mogili) [screw-pine]. Mal. also (maññanátti), meaning turmeric, curcuma longa, rox. + smelling. Tam. also (mañjalbávattai), meaning yellow + the plant, pavetta indica, linn.; (mañjanatti), meaning turmeric, curcuma longa, roxb. + smell; from timber; (tunavu); (periyanuná), meaning large + the tree. Title otherwise Ach, Ach root, Ahoo, Aul, Broad-leaved morinda, Dyeing aul, Morinda root, Muddy, Munjanutty, Noonah, Red screwpine, Sea jack, Togar mogaly, Turmeric timber tree, Yellow pavetta. Botanically Morinda citrifolia, linn., rubiaceæ [vricsham, 71]. Small tree; leaves opposite, oval, alternated at both ends, shining; capituli shortly peduncled, leaf opposed; branchlets four-angled; corolla long infundibuliform five occasionally four to seven-cleft; anthers half hid in the tube; style the length of the tube; berries concrete into an obtuse ovate shining fruit; flowers white; fragrant. Root has a reddish-brown nearly smooth bark, which has a nauseous slightly bitter flavor; the woody portion is hard and of an orange-yellow or reddish-yellow color; the odour of the freshly dug root is acrid and disagreeable. Expressed juice of leaves externally applied in gout; applied fresh to wounds and ulcers; cf. indian worm-killer and zakhm hayaut. Fruits used as famine food. A scarlet dye [shauyam] from bark of root, used for handkerchiefs [roomaul], turbans [puggry], &c.; not equal to that of chayroot [q.v.]; forms an ingredient of various recipes for dyes fixed with alum [padi-cauram]. The wood is deep yellow, easily worked, and used for common purposes. A variety is citrifolia, linn., var. bracteata; a small tree with large shining leaves; flowers small, white; found in native gardens, temples, &c.; wild in north-east of presidency; root bark yields yellow dye; wood bright, yellow. Another variety is citrifolia, linn., var. citrifolia proper, common; leaves used to wounds and ulcers; internally as tonic and febrifuge; root cathartic; the chief dye-yielding form; wood yellow colored, useful for various purposes. Another variety is citrifolia, linn., var. elliptica; root-bark yields scarlet dye. The separate species tinctoria is by some considered to be citrifolia in its wild state, but the foliage is smaller and never shining; this has fruit, of many drupes, coalescent into a fleshy-globose head, one inch in diameter, insipid; green fruits eaten in curries [q.v.]; the wood hard, very durable, variegated red and white, and employed for gun stocks. The tinctoria, roxb., var. tinctoria proper is a small tree, common; roots have dyeing properties of citrifolia; wood close-grained, light, tough and easily worked, when fresh of bright yellow color, after exposure turning to yellowish brown; used for gun stocks, wooden shoes, &c. The tinctoria, roxb., var. tomentosa is common, in flower a great part of the year; the triplicane burying ground in madras is thickly studded with the tree; root-bark gives a dye; timber yellow. For the umbellata see next head.——*Small dyeing mulberry* (दारुहरिद्रा - dáruharidrá, San.; रुक्कावेलिहलदि - rukkávélihaladi, Conc.; چھوٹا آل - chhotáál, Dec.; چالوب کرتو - chálubkratau, Malay; ಮರದರಸಿನ - maradarasina, Can.; ಮರಮಂಜಲ್ - mara-manjal, Too.; మూలుగుడు - múlugudu, Tel.; നുണാ - núná, Mal.; കിരിവെൽ - kirivel, Singh.; நுணா - nuná, Tam.). Title from size of plant, compared with citrifolia. San. from (dáru, san. wood + haridrá, san. turmeric, curcuma longa, roxb.) [berberry, false calumba]. Dec. from (chhotá, hind. small + ál, dec. the tree, morinda citrifolia, roxb.). Can. from (mara, can. tree + arasina, can. turmeric). Too. from (mara, too. tree + mañjal, too. turmeric, curcuma longa, roxb.). Singh. from (kiri, singh. white + vel, singh. creeper). San. also (pítadáru), meaning yellow tree; (klíbapushpá), meaning having neuter flower; (klíbá), meaning impotent. Dec. also (álkáphúl), meaning morinda flower. Can. also (poppili). Tel. also (maddi); (chiranji) [godaury]. Tam. also (mañjanatti), meaning turmeric + smell, from timber; (matti); (shuriñji). Title otherwise Narrow-leaved morinda, Small ach root. Botanically Morinda umbellata, linn., rubiaceæ [vricsham, 71]. Alias Morinda padavara, scandens. Climbing shrub, glabrous; corolla short infundibuliform; leaves from oblong-lanceolate to cuneate oblong, pointed; stipules membranaceous, united in a truncated sheath; peduncles terminal, three to seven in a sessile terminal umbel about half the length of the leaves; capituli globose; calyx margin entire; limb four occasionally five-cleft; filaments short, inserted into the bottom of the dilated part of the tube among many hairs; anthers exserted; small, delicate flowers, white and extremely fragrant; religious. Fruit when green, used in pickles [chutney]. Compact grained wood yellowish color, made into chairs, &c.

INDIAN OAK (समुद्रफल - samudrap'hala, *San.*; ناتک کا بلوط - nátkáballút, *Hind.*; මිඩෙල්ල - midella, *Singh.*). Title from resembling oak in branching. San. from (samudra, san. ocean + p'hala, san. fruit). Botanically the Barringtonia genus, myrtaceæ [vricsham, 56]. Trees; natives of india and malayan peninsula; leaves crowded near extremities of branches; flowers in spikes; fruits one-seeded and fleshy; bark narcotic; wood hard and durable. The species best known to the natives are shown below.——*Andaman indian oak* (ಸಮುದ್ರಫಲ - samudra-p'hala, Can.; సురపొన్న - suraponna, Tel.; சமுத்திரச்செடி - shamuttiraççedi, Tam.). Can. means sea fruit. Tel. from (sura, san. divine + ponna, tel. tree, calophyllum inophyllum, linn.), from appearance of foliage and flower; cf. common poon. Tam. from (samudra, san. ocean + shedi, tam. plant). Tam also (shamuttiráppazham), meaning sea fruit; (shemmulli), meaning red + moolly plant barleria [common nail dye]. Title otherwise South sea island bottle-brush tree, Tahiti futu tree. Botanically Barringtonia [indian oak] speciosa, forst., myrtaceæ [vricsham, 56]. Tree 30–50 feet, glabrous; leaves often 15 by 7 inches, obtuse, narrowed at the base, quite entire, sessile; raceme short, erect; lower pedicels with a leaf-like bract, upper bracts much smaller; calyx closed over the bud; lobes two, $1\frac{1}{4}$ inch, oblong; petals white; ovary four-celled; ovules about six in each cell; style often exceeding 4 inch; fruit 3 by 3 inch, quadrangular or nearly ovoid by abortion one-seeded. Tree introduced into gardens in s. india, not found in wild state; large foliage, heads of blossom with flowers made up of numerous assemblage of long deep rose-colored filaments. Seeds mixed with bait inebriate fish [common emetic nut, indian berry, marotty, round milk-hedge, sooptee, tejbul, walsoora, zanzibar indigo].——*Common indian oak* (नीप - nípa, San.; समुद्रफल - samudrap'hala, Conc.; اجل - ijal, Hind.; ಸಮುದ್ರಫಲ - samudrap'hala, Can.; సముద్రపండుచెట్టు - samudrapanduchettu, Tel.; സംസ്തരവടി - samstara-vati, Mal.; දියමිඩෙල්ල - diyamidella, Singh.; சமுத்திரக் கடம்பு - shamuttirakkadambu, Tam.). San. from (ni, san. down + ap, san. water); from site of growth [cadamba]. Conc. from (samudra, san. ocean + p'hala, san. fruit). Hind. from (hijjala, san. the tree). Can. from (samudra, san. ocean + p'hala, san. fruit). Tel. from (samudra, san. ocean + pandu, tel. fruit + chettu, tel. tree). Mal. from (samudra, san. ocean + vati, mal. stick). Singh. from (diya, singh. water + midella, singh. barringtonia). Tam. from (samudra, san. ocean + kadambu, tam. the tree, barringtonia acutangula, gærtn.). Hind. also (jauntaríkáphal), meaning mace, myristica fragrans, houtt. + fruit [nutmeg]. Tel. also (kaudangi); (kaniti); (kanapa); (karpa) [cadamba]. Mal. also (samudrappú), meaning ocean flower. Tam. also (kondalamaram), meaning eastern tree; (shamuttiráp-pazham), meaning sea fruit, said to be brought from eastern islands; (vengadambu), meaning white + indian oak. Title otherwise Canapa, Carpa, Sea side indian oak, White indian oak. Botanically Barringtonia [indian oak] racemosa, blume, myrtaceæ [vricsham, 56]. Alias Eugenia racemosa; Stravadia alba, racemosa; Stravadium coccineum. Stravadia from malayalam. Tree; reddish bark; leaves alternate, short-petioled, cuneate-oblong, acuminated, serrulated, smooth on both sides; racemes terminal, or axillary from the large branches, pendulous; flowers on short pedicels, large, white with a tinge of rose; calyx two to three-cleft; petals four; filaments longer than the petals; style long; fruit size of egg, ovate, drupaceous, bluntly four-angled, smooth, brownish red; endocarp scarcely separating from the epicarp; seed one; flowering in may. Root resembles cinchona [koinah]; slightly bitter, aperient, deobstruent, and cooling; fruit powdered used as snuff medicinally. Wood white, very soft, porous.——*Small indian oak* (हिज्जल - hijjala, San.; समुद्रफळ - samudrap'hala, Mahr.; سمندر پھل - samandarphal, Hind.; ಕೆಂಪು ಕಣಗಿನಮರ - kempukanaginamara, Can.; కనప - kanapa, Tel.;

ಕಿಂಜೊಲೊ - kinjólo, Oor. ; ചെറിയസംസ്തരവടി - cheriyasamstaravati, Mal. ; ඇළමිදෙල්ල - elamidella, Singh. ; கடம்பு - kadambu, Tam.). San. from (hita, san. suitable + jala, san. water); as growing near water. Mahr. from hindostany. Hind. from (samandar, hind. ocean + phal, hind. fruit); from growing on banks beyond tidal range. Can. from (kempu, can. red + kanaginamara, can. nerium odorum, soland.). Oor. from sanscrit. Mal. from (cheriya, mal. small + samstaravati, mal. barringtonia racemosa, blume). Singh. from (ela, singh. white + midella, singh. barringtonia). Tam. from (katam, tam. jungle) [abrony]; cf. cadamba. San. also (ambuja), meaning water-born [nelumbo]; (nichula). Hind. also (íjal), from sanscrit; (panniari), meaning water + apart, i.e., beyond tidal influence; (ingar), from sanscrit. Can. also (ganagilatóramara). Tel. also (kanigi); (karpá); (kadimi) [cadamba, water cadamba]. Oor. also (hinjara), from sanscrit. Tam. also (níbamaram), meaning low ground + tree; (kanatti), meaning heavy wood; (shengadambu), meaning red + the tree. Title otherwise Hijjal tree, Red nauclea, Red oleander. Botanically Barringtonia [indian oak] acutangula, gærtn., myrtaceæ [vricsham, 56]. Alias Botryoropis; Eugenia acutangula, racemosa; Meteorus coccineus; Stravadium acutangulum, coccineum, rubum; Stravadium from malayalam. Tree; leaves crowded about the ends of the branches, cuneate-obovate, serrulated; racemes long, pendulous: pedicels very short; calyx four-cleft; ovary two-celled; fruit oblong, four-sided, sharp-angled; flowers small, reddish white, with scarlet filaments; common on banks of rivers or on western coast backwaters [cauyal]; flowering in the hot season. The dry seeds as met with in the shops resemble a nutmeg [jautikye] in size and shape; externally they are somewhat rough, brown, and marked with longitudinal striæ; internally horny, hard and brittle when dry, but easily softened by immersion in water; the bulk of the seed consist of starch; taste sweet at first, afterwards bitter and nauseous. The fruit is one of the best known domestic remedies; when children suffer from a cold in the chest, the seed is rubbed down on a stone with water and applied over the sternum, and if there is much dyspnœa a few grains with or without the juice of fresh ginger [q.v.] are administered internally and seldom fail to induce vomiting and the expulsion of mucus from the air passages; to reduce the enlarged abdomen of children it is given in doses of from 2 to 3 grains in milk [paul]; the roots are used to kill fish. Bark is used in tanning [chamrah]. Wood is hard and of a fine grain, red, and equivalent to mahogany; stands a good polish, greatly in request by cabinet makers.

INDIAN WATER-LILY (उत्पल - utpala, *San.* ; కలువ - kaluva, *Tel.* ; அல்லி - alli, *Tam.*). San. from (ut, san. up + pal, san. to burst); bursting upwards as a blossom. Tam. from (al, tam. night), from flowering at night; generally applied to white indian water-lily [q.v.] as being the commonest here. San. also (kamala), meaning water adorning; (kuvalaya), meaning earth + bracelet. Tel. also (pankéruhamu), meaning growing in marsh; (kákikaluva), meaning crow + the plant. Greek *νυμφαία*. Botanically the Nymphæa genus, nymphæaceæ [vricsham, 7]. Water plants found in lakes and rivers; rootstock fleshy or tuberous, sending down rootlets into mud; leaves usually circular, entire or toothed, floating on water; leaf-stalks cylindrical, traversed with air-canals; flower stalks similar to leaf stalks; flowers large, expanded, floating, containing many series of petals; fruit a spongy berry ripening under water. The species best known to the natives are shown below. Distinguish from Egpytian lotus [nelumbo]. Compare also in other genera :—Crinum asiaticum, keel-leaved african lily, poison lily; Fourcroya gigantea, giant mexican lily; Methonica superba, malabar glory lily, superb lily; Phornium tenax, flax lily; Polianthes tuberosa, tuberose white lily. See gloss. paragraphs.——*Blue indian water-lily* (नीलकमल - nílakamala, San. ; نیلوفر - nílofar, Ar., Pers., Hind, and Dec. ; ಕನ್ನೈದಲು - kannaidalu, Can. ; నల్లకలువ - nallakaluva, Tel. ; കരിങ്കുവലയം - karinkuvalayam, Mal. ; නිල්තෙල්ලු - niltelólu, Singh. ; நீலல்லி - nílalli, Tam.). Title from color of flower. San. from (níla, san. blue + kamala, san. nymphæa lotus, linn.). Ar. from (nílótpala, san. blue lily). Can. from (kari, can. blue + naidile, can. water-lily). Tel. from (nalla, tel. black + kaluva, tel. nymphæa). Mal. from (kari, mal. black + kuvalaya, san. water-lily). Singh. from (nil, singh. blue + telólu, singh. water-lily). Tam. from (níla, san. blue + alli, tam. lily). San. also (nílótpala), meaning blue water-lily; (indívara), meaning chief abode of lutchmy; (nílámbujanma), meaning blue lotus. Tel. also (nítikaluva), meaning water + the plant. Mal. also (chittámbal), meaning small water-lily. Title otherwise Star-flowered lily. Botanically Nymphæa [indian water-lily] stellata, willd., nymphæaceæ [vricsham, 7]. Alias Nymphæa cyanea, hookeriana, punctata, versicolor. Perennial creeper; leaves quite entire, margins waved; lobes diverging at the base; petiole attached within the margin; stigma eight to twelve-rayed; flowers blue; flowering all the year; roots and seeds eaten as in red indian water-lily [q.v.].——*Purple indian water-lily* (रक्तोत्पल - raktótpala, San. ; செங்கழுநீர் - shengazhunír, Tam.). Title from color of flowers. San. from (rakta, san. red + utpala, san. water-lily, nymphæa genus). Tam. from (shem, tam. red + kazhunír, tam. the plant). Title otherwise American sweet-scented water-lily. Botanically Nymphæa [indian water-lily] odorata, willd., nymphæaceæ [vricsham, 7]. Aquatic perennial, ornamental; leaves cordate, entire, emarginate; lobes divaricating; point obtuse; calyx four-leaved; flowers white; flowering in july. The flower has a smell somewhat like the wall flower.

——*Red indian water-lily* (कुमुद - kumuda, San. and Mahr. ; तांबडेसालक - támbadésálaka, Conc. ; نیلوفر - nílofar, Ar. and Pers. ; کنول - kanwal, Hind. ; چھوٹا کنول - chhotákanwal, Dec. ; ಕೆನ್ನೈದಿಲೆ - kennaidile, Can. ; ಕೆಂಪಲ್ಲಿ - kempalli, Too. ; ఎర్రకలువ - errakaluva, Tel. ; ରଙ୍ଗକାଇଁ - rangkain, Oor. ; ആമ്പൽ - ámbal, Mal. ; තෙලොලු - telolu, Singh. ; செவ்வல்லி - shevvalli, Tam.). Title from color of flower. San. from (ku, san. earth + mud, san. to rejoice). Ar. from (níla, san. blue + utpala, san. water-lily). Pers. from arabic. Hind. from sanscrit [nelumbo, white indian water-lily]. Dec. from (chhotá, hind. small + kamala, san. lotus). Can. from (kem, can. red + naidile, can. water-lily). Too. from (kempu, too. red + alli, too. water-lily). Tel. from (erra, tel. red + kaluva, tel. nymphæa). Mal. from (ám, mal. water + alli, mal. lily) [white indian water-lily]. Tam. from (shem, tam. red + alli, tam. lily). San. also (hallaka), meaning attracting as bees; (shálúka), meaning the root of a lily; (raktótpala), meaning red + water-lily; (kamala), meaning water adorning [nelumbo]; (kalhára), meaning delighted with water; (saugandhika), meaning sweet smelling; (raktasandhyaka), meaning red like twilight; (nílótpala), meaning blue water-lily; (kákótpala), meaning crow's lily; (kandóta), meaning white bulbous water-lily; (varótpala), meaning superior lily; (raktaníla). Hind. also (raktachandan), meaning pterocarpus santalinus, linn. f. [red sanders]. Dec. also (alíphúl), from tamul. Can. also (kempudávare), meaning red, nelumbium speciosum, willd.; (bilidávare), meaning white + lotus; (naidele), meaning water-lily; (chennaidile), meaning red + lily; (kóle); (kendávare), meaning red + lotus. Tel. also (chengaluva), meaning red + the plant; (chendova), meaning red + the plant; (kákikaluva), meaning crow + the plant; (koteka). Mal. also (allittámara), meaning lily + lotus; (arakkámbal), meaning red water-lily. Singh. also (ratutelólu), meaning red water-lily; (nelum), meaning lotus, nelumbium speciosum, willd.; (ólu). Tam. also (allittámarai), meaning lily + lotus; (ámbal), meaning water-lily; (shengazhunír), meaning red + the plant; (shivappalli), meaning red lily; (arakkámbal), meaning red lily; (shivandavallittámarai), meaning red + lily + lotus. Title otherwise Ally, Aumbal, Crow lily, Red lotus, Twilight lily. Botanically Nymphæa [indian water-lily] lotus, linn., nymphæaceæ [vricsham, 7]. Alias Castalia magnifica; Nymphæa edulis, esculenta, rubra. Aquatic; sepals four; petals numerous; leaves peltate, sharply toothed, downy but not spotted beneath; lobes diverging; connectivum not prolonged; petioles inserted very near the margin of the leaf; flowers deep red; torus bottle-shaped; carpels numercus, many-seeded; stigma ten to twenty-rayed; flowering all year; grows in tanks. The dry petals are from 2–3 inches long, broad at the base and lanceolate towards the end, and of pink, crimson or reddish-brown color without any distinct smell or taste; the seeds are small, round, about twice the size of the mustard [rayaun] seeds, pale brown in color, devoid of smell and somewhat mucilaginous in taste; the root is sold in the bazaar in round and flat slices, varying from 1–2 or $2\frac{1}{2}$ inches in diameter, pale or dirty white in color, odourless, and almost insipid with an uneven or irregular and more or less hairy edge. The flowers or rather petals are medicinally cardiac tonic refrigerant and diuretic; the seeds, demulcent and nutrient; the roots, stomachic, demulcent and astringent. The best preparation of the flowers is the syrup; the most convenient way of using the seeds and roots is in simple powder. Doses; of the syrup of flowers, from 2 to 4 drachms; of the powder of the seeds, from 40 grains to 1 drachm; of the powder of the root, from 30 to 50 grains. Substituted; the flowers for digitalis; the seeds for iceland moss, tragacanth [kateerah] and pepsine; the roots for subnitrate of bismuth, pepsine and gallic acid. Root, stalk, leaf, and flower, eaten as vegetables; and the seed as a nut; a kind of arrowroot made from the underground stems and roots.——*White indian water-lily* (सितोत्पल - sitótpala, San. ; धवेसालक - dhavésálaka, Conc. ; نیلوفر ابیض - nílofariabyaz, Ar. ; نیلوفر سفید - nílofarisufíd, Pers. ; سفید کنول - sufedkanwal, Hind. ; اجلا کنول - ujlákanwal, Dec. ; ಬಿಳೇನೈದಿಲೆ - bilénaidile, Can. ; ತಾಮರೆ - támare, Too. ; తెల్లకలువ - tellakaluva, Tel. ; വെള്ളാമ്പൽ - vellámbal, Mal. ; සුදුතෙල්ලොලු - sudutelólu, Singh. ; நெய்தல் - neydal, Tam.). Title from color of flower. San. from (sita, san. white + utpala, san. water-lily, nymphæa genus). Conc. means white lily. Ar. from (nílofar, ar. nymphæa lotus, linn. + abyaz, ar. white). Pers. from (nílofar, ar. nymphæa lotus + sufíd, pers. white). Hind. from (sufed, hind. white + kanwal, hind. nymphæa lotus, linn.). Dec. from (ujlá, dec. white + kanwal, dec. nymphæa lotus). Can. from (bile, can. white + naidile, can. water-lily). Too. from (támare, too. lotus). Tel. from (tella, tel. white + kaluva, tel. the plant). Mal. from (vella, san. white + ámbal, san. water-lily). Singh. from (sudu, singh. white + telólu, singh. water-lily). Tam. from (ney, tam. to be glutinous). San. also (indívara), meaning chief abode of lutchmy; (kairava), meaning liked by swan [hamsam]. Hind. also (kairub); (kanwal) [nelumbo, red indian water-lily]. Can. also (bilitá-

mare), meaning white + lotus. Mal. also (nírámbal), meaning water + water-lily; (ámbal), meaning water-lily [red indian water-lily]. Tam. also (vellámbal), meaning white + lily; (indirávásam), meaning abode of lutchmy. Title otherwise Lutchmy's lily, White aumbal. Botanically Nymphæa [indian water-lily] lotus, linn., var. pubescens, h. f. and t., nymphæaceæ [vricsham, 7]. Alias Castalia pubescens, sacra; Nymphæa lotus, pubescens. Aquatic; leaves oval, quite entire, downy underneath, margin sometimes slightly waved; petiole attached a little within the margin; petals ten to fifteen; stamens thirty, in a double series; stigmas ten to fifteen-rayed; flowers white; connectivum not prolonged; seeds numerous. Has peltate leaves, sharply serrated; the under surface pilose at the nerves and pubescent between them, red at the margins; bears large, white flowers of a vinous smell the root is large, tuberous and eatable like that of the nelumbo [q.v.].

INDIGO (نیل - níl, *Hind.*). Greek τὸ ἰνδικὸν βαφικόν. Hence Latin indicum for short, and Portuguese indico. The Sanscrit name appears through the Portuguese anil in "aniline." The Greek ἰνδικὸν was also applied to pepper. Indigo is called ἰνδικὸν μέλαν in the Periplus. For the botanical indigofera genus see Neely. Besides the various species of that genus, it will be seen from the sub-heads that there are several other so-called indigoes.——*Arabian indigc* (نیل عرب - níliarab, Hind.; இருப்புமுறி - iruppumuri, Tam.). Tam. from (irumbu, tam. iron + muri, tam. to break); from leaves glistening like iron filings. Tam. also (aramuri), meaning file + to break. Title otherwise Silvery-leaved indigo, Wild indigo. Botanically Indigofera [neely] argentea, linn., leguminosæ [vricsham, 48]. Alias Indigofera glauca. The Egyptian and Arabian species, but is also a native here. Allied to Indigofera anil, linn. [west-indian indigo]. Shrub several feet high, with sulcate woody branches; leaves 1–2 inches long; leaflets opposite, sub-coreaceous, persistently argenteous, $\frac{1}{2}$–1 inch long; petiole $\frac{1}{2}$ inch; stipules minute, setaceous; racemes subsessile, twelve to twenty-flowered, shorter than the leaves, $\frac{1}{2}$–1 inch long whilst in flower; calyx $\frac{1}{24}$ inch campanulate, argenteous; teeth deltoid, cuspidate, as long as tube; corolla $\frac{1}{8}$ inch, reddish yellow, externally canescent; pod $\frac{1}{2}$–$\frac{1}{3}$ inch by $\frac{1}{8}$ inch at first argenteous, finally glabrescent, distinctly torulose. Yields dye, in small quantities, but of superior quality. Cf. Wild indigo.——*Bastard indigo* (கள்ளவுரி - kallavuri, Tam.). Dye from Amorpha fruticosa, linn. Ornamental deciduous shrub, 6 feet high; teeth of calyx four blunt, one acuminate, flowers purple.——*British indigo* (ادلمیه - idlimeh, Ar.). Woad, Isatis tinctoria, linn. A biennial plant, with oblong crenate root-leaves about a foot in length, on pretty long stalks; an upright, much branched leafy stem, about 3 feet high; small yellow flowers; leaves when cut are reduced to a paste which is kept in heaps for about fifteen days to ferment and then formed into balls which are sun-dried; these balls are subjected to a further fermentation before use.——*Chinese indigo* (نیل خطائی - nílikhatáí, Hind.). Dye from Isatis indigotica, fortune. Small half shrubby plant, with a decumbent stem, bearing at its extremity several long drooping racemes of small yellow flowers, and smooth black and fiddle-shaped pods about half inch long; the lower leaves are rather fleshy, on long stalks oval, lance-shaped, and pointed, with the edges slightly toothed, the upper ones very much narrower and smaller.——*Common indigo* (नीलिनी - níliní, San.; नीली - nílí, Mahr.; نلیج - nílaj, Ar.; درخت نیل - darakhtiníl, Pers.; نیل کا پیڑ - nílkáper, Hind.; نیل کا جھاڑ - nílkájhár, Dec.; ترم - tarum, Malay; ನೀಲಿಗಿಡ - níligida, Can.; ನೀಲಿ - níli, Too.; నీలి - níli, Tel.; അമരി - amari, Mal.; අවරි - avari, Singh.; அவுரி - avuri, Tam.). San. from (níla, san. blue). Mahr. from sanscrit. Ar. from sanscrit. Pers. from (darakht, pers. tree + níla, san. indigo). Hind. from (níla, san. indigo + per, hind. tree). Dec. from (níla, san. indigo + jhár, hind. tree). Tel. from sanscrit. Mal. from tamul. Tam. from (avi, tam. to boil); from decoction dye. San. also (vanikbandhu), meaning trader's friend; (klítaká), meaning exchanged; (vajranílí), meaning diamond + the plant; (nílí), meaning black; (kálá), meaning black; (shríp'halí), meaning auspicious fruit [bael]; (rañjaní), meaning dyer. Ar. also (anníl), meaning the blue. Can. also (olleníli), meaning good + indigo; (hennuníli), meaning female + indigo. Tel. also (aviri). Singh. also (nilgaha), meaning indigo + plant; (nilavari). Title otherwise Aviry, Dog-bite shrub, Dyer's indigo, Indian indigo. Botanically Indigofera [neely] tinctoria, linn., leguminosæ [vricsham, 48]. Alias Indigofera emarginata, hawer, indica. Shrub, 2–3 feet, erect, pubescent; branches terete, firm; leaves pinnated; leaflets five to six pairs, oblong-ovate, cuneate at the base, slightly decreasing in size towards the apex of the leaf, darker above than below; racemes shorter than the leaves, sessile, many-flowered; flowers small, approximated at the base of the raceme, more distant and deciduous towards the apex, greenish-rose color, scentless; calyx five-cleft, segments broad, acute; legumes approximated towards the base of the rachis, nearly cylindrical, slightly torulose, deflexed and curved upwards; seeds about ten, cylindrical, truncated at both ends; generally resembles lucerne; flowering in rainy season. The cultivated species of this presidency and of bengal; indigenous in west tropical africa; common here but never far from where cultivated; though naturally a shrub, is grown as an annual or biennial. Indian indigo, as a blue dye, was known in ancient rome; it was first imported into modern europe by the dutch in the year 1660; subsequently by portuguese, french and british traders; it experienced much opposition in europe on account of its interference with woad [british indigo] and was there called the devil's dye. In this presidency indigo cultivation extends along the east coast from kistna to south arcot, and inland to kurnool and cuddapah; cuddapah is the principal district for indigo; next nellore; the crop requires a rich friable soil, neither too moist nor too dry; bright sunshine favors the development of the dye principle, but frequent rains cause a more luxuriant growth; it is generally cultivated as a dry crop; in some parts it is sown mixed with millet [q.v.] crops; then, after the latter are harvested, the indigo shoots up; in dry land as a rule one cutting is obtained in october and a second in january; indigo is also grown however on wet land, here two cuttings are certain, and sometimes there is a third; it is not unfrequently sown in paddy [q.v.] fields a few days before reaping; on whatever soil sown, the crop so far from exhausting is believed to strengthen the soil; the first step in the culture is to plough and manure the ground; a flock of sheep [aud] is sometimes enclosed on the ground; at other times the ground is lightly scattered with wood-ashes, cow-dung, &c.; or the refuse of the indigo plant from the steeping vat, or its ashes, are scattered over the fields; the seed is generally sown broadcast; the plant in favorable damp weather, or if lightly irrigated, makes its appearance above ground in four or five days, and ripens in about two months and a half; great care is taken to weed the plantation thoroughly, and to keep the ground moist, but not too wet; when the seedlings attain two or three inches, the fields are weeded; the leaves are cut just before the plant flowers; the first cutting takes place when the crop is three months old, after which the field is lightly ploughed; the other cuttings follow after intervals of two or three months, and are better than the first; the leaves are not gathered after heavy rain, as this washes off from them the farina which constitutes their principal value. Many ryots [q.v.] have their own manufacturing vats, others merely cultivate and sell their leaf to some neighbour who has a vat; large factories for manufacturing the dyes [shauyam] exist at cuddapah, nellore, rajahmundry, salem, tinnevelly, tripassore, vellore, &c. In former years the usual mode of extracting indigo, as practised in southern india, was from the dry leaf; this is now almost superseded by the system of the green leaf manufacture, except in parts of south arcot and salem. The process of green-leaf manufacturing is as follows; the cut bundles of the plant, comprising stalks, leaves, &c., are taken directly after cutting to the factory, and are then at once stacked into the steeping vat, and pressed down by large beams which are firmly bolted to upright iron rods or stone posts buried in the ground; water is then let into the steeping vat, so as to stand a couple of inches above the plant; in this manner it is allowed to macerate for from eighteen to twenty hours, by which time a kind of mucous fermentation will have taken place; the fluid is then let out by the removal of plugs into the beating vat, where it is beaten with oars or paddles for a couple of hours; lime-water [choonam tunny] in proportionate quantity is then thrown in, and the fluid allowed to settle for a couple of hours; during this time the fecula precipitates to the bottom of the vat; the plugs are now opened and the supernatant fluid let out; the fecula is then taken up with flat copper pans and strained through a layer of coarse cloth; it is next placed in a copper boiler with a sufficient quantity of fresh water, and boiled till ebullition freely occurs; the fire is then put out and the contents allowed to cool; the pulpy mass is next collected in bags made of dungry [q.v.] cloth; these are placed in a wooden box having a till, in which it is submitted to pressure by means of a screw in order to expel the whole of the fluid contained in the mass; this is repeated for two or three days; and when the mass has been completely drained, it is cut into square cakes and placed in the shade, and the moisture allowed gradually to evaporate; in about a month the cakes are cleaned or brushed to remove a whitish efflorescence which forms on their surface, and also to give them a glossy appearance; the article is now ready for the market and is styled fresh-leaf indigo; the average quantity of indigo obtained from hundred bundles of the plant is one maund [q.v.]. The dry-leaf process is carried out in the same way, except that the plant is cut, dried and threshed to collect the leaves separately, and these are sold to the manufacturer by weight, or by measure; when kept dry, the leaves undergo, in the course of four weeks, a material change, their green tint turning into a pale blue grey, previous to which they afford no indigo; the dried leaves are infused in the steeping vat, with six times their bulk of water, and allowed to steep for two hours, with continual stirring, till all the floating leaves sink; the fine green liquor is then drawn off into the beater vat; in this method the fermentation of the fresh leaves, often capricious in its course, is superseded by a much shorter period of simple maceration; the following is a Hindostany proverb:—نیل بگڑنا, spoilt indigo, hence to tell lies, because when the vat seems likely to fail, dyers from a curious notion tell lies as a way of charming it; the process of agitation, boiling, &c., are the same as with fresh leaves. Ryots sometimes manufacture on a small scale in large earthenware pots [chatty] about $2\frac{1}{2}$ feet high; this generally with dried leaf; such pots are placed in a range of four, six, or eight, over one fire and slowly boiled; as soon as the boiling
